ACCESSION NUMBERS A66-10001 to A66-43226

INTERNATIONAL AEROSPACE ABSTRACTS is published semimonthly by the Technical Information Service, American Institute of Aeronautics and Astronautics, Inc., at Phillipsburg, N. J.
Editorial and Subscription Offices: 750 Third Avenue, New York, N. Y. 10017
Telephone 212 TN-7-8300 TWX: 212 867-7265

SUBSCRIPTION INFORMATION.

Semimonthly issues: United States and Possessions, 1 year, \$25 postpaid; Foreign Countries, 1 year, \$33 postpaid.

Cumulated Index Volumes: United States and Possessions, 1 year, \$25 postpaid; Foreign Countries, 1 year, \$33 postpaid.

Second-class postage paid at Phillipsburg, N. J.

INTRODUCTION

INTERNATIONAL AEROSPACE ABSTRACTS (IAA) is an abstracting and indexing service covering the world's published literature in the field of aeronautics and space science and technology. IAA is issued semimonthly; on the 1st and 15th of each month.

Coverage of Published Literature

The following types of publications are covered in IAA:

- Periodicals (including government-sponsored journals) and books.
- Meeting papers and conference proceedings issued by professional societies and academic organizations.
- Translations of journals and journal articles.

Coverage of Reports ("Unpublished" Literature)

Abstracts and indexes of report literature are issued in SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS (STAR), which is published by the Scientific and Technical Information Division, National Aeronautics and Space Administration.

By special arrangement between NASA and the American Institute of Aeronautics and Astronautics, IAA is issued in coordination with the twice-monthly schedule of STAR, which appears on the 8th and 23rd of each month.

IAA and STAR utilize both identical subject categories and indexes, which are described below.

Thus the two services provide comprehensive access to the national and international unclassified report and published literature of current significance to aerospace science and technology.

Arrangement of the Semimonthly Issues

IAA is arranged in two major sections:

- (1) Abstracts Section. This section contains complete bibliographic citations with informative abstracts, arranged by appropriate subject categories to facilitate scanning. The subject categories are numbered from 01 to 34, and the scope of each category is outlined in the Table of Contents and again at the beginning of each category in the Abstracts Section. Each abstract is prefixed by the IAA accession number.
- (2) Index Section. Four indexes are contained in this section: Subject, Personal Author, Meeting Paper, and Accession Number. Each index is prefaced by explanatory notes to guide the user to the desired abstract.

Cumulated Indexes

Cumulated indexes are prepared and issued promptly at the end of each quarter year, with the 4th quarterly being the Annual Index.

Each cumulated index contains the following sections: A—Subject Index, B—Personal Author Index, C—Contract Number Index, D—Meeting Paper Index, and E—Accession Number Index.

Guide to the Subject Indexes

A GUIDE TO THE SUBJECT INDEXES FOR STAR has been issued by the Scientific and Technical Information Division of NASA. This publication contains an alphabetic listing of the subject headings and cross-references used in both STAR and IAA indexes, which use the same subject terminology.

Subscribers to the IAA Cumulative Indexes may obtain copies of the guide by writing to the AIAA Technical Information Service, 750 Third Avenue, New York, N. Y. 10017.

Information regarding SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS and the availability of INTERNATIONAL AEROSPACE ABSTRACTS to organizations having contractual arrangements with NASA may be obtained from the following address:

National Aeronautics and Space Administration
Scientific and Technical Information Division
Attention: Code USS-A
Washington, D. C. 20546

How to obtain publications abstracted

All publications abstracted are available from the AIAA Technical Information Service.

LOANS

Individual and Corporate AIAA Members in the United States and Canada, and NASA Centers, may borrow publications without charge. Interlibrary loan privileges are extended to the libraries of government agencies and academic nonprofit institutions in the United States and Canada. The loan period is two weeks, excluding transit time. The borrower pays return postage and insurance.

PHOTOCOPIES

Documents can be supplied in the form of positive paper copies or negative 35-mm. microfilm.

MICROFICHE SUBSCRIPTIONS

Documents available on microfiche are identified in INTERNATIONAL AEROSPACE ABSTRACTS by the symbol # following the accession number in the Abstracts Section and in the Report Number and Accession Number Indexes. Microfiche are made in conformity with Federal Microfiche Standards (COSATI) and are 105 x 148.75 mm. (approximately 4 x 6 inches) in size.

Microfiche of documents announced in INTERNATIONAL AEROSPACE ABSTRACTS may be obtained on annual subscription—each subscription covering all IAA-announced documents that are available on microfiche. Approximately 50 per cent of the documents announced each year are available in this manner. Subscriptions are accepted on a current basis, and subscribers will be billed monthly for the actual charges at the rate of \$0.40 per microfiche issued. Individual microfiche continue to be available on a demand basis at \$0.50 each.

RATES

Positive paper copies	\$0.25 per page
minimum order	\$1.50
Negative 35-mm. microfilm	\$0.20 per frame
minimum order	\$2.50
Microfiche (demand)	\$0.50 per microfiche
Microfiche (subscription)	see above

(Minimum air-mail postage to foreign countries is \$1.)

Requests for loans or photocopies may be made by telephone, telegram, TWX, or in person.

PLEASE REFER TO THE ACCESSION NUMBER WHEN REQUESTING PUBLICATIONS

NOTE: The AIAA does not sell the publications abstracted, except those issued by the AIAA.

Address all inquiries and requests to:

TECHNICAL INFORMATION SERVICE
AMERICAN INSTITUTE OF AERONAUTICS
AND ASTRONAUTICS, INC.
750 Third Avenue, New York, N. Y. 10017

Telephone: 212 TN-7-8300
TWX: 212 867-7265

CROSS REFERENCES

The subject index includes two types of cross references to aid the user of the index in locating the material being sought:

1. "SEE" references (S) direct the user to alternate headings under which material on the subject will be found, for example:

COLUMBIUM
S NIOBIUM

2. "SEE ALSO" references (SA) refer the user to additional headings in the same subject area, for example:

LUMINESCENCE
SA ELECTROLUMINESCENCE

OF SUBJECT HEADINGS OF
ICATIONS

otation of Content, rather than the title of publication, appears under each subject heading; it is listed under several subject headings which provide multiple access to the subject each accession. The IAA accession number is listed under and to the right of the Notation of Content and is preceded by the category number. The category number identifies the subject category as listed in the Table of Contents of the issue of *International Aerospace Abstracts*.

M

EGION

Worldwide positive-negative impulse pair served on geomagnetic records found to be recurrent and associated with M-region disturbances 05 p0670 A66-14953
Correlation between unipolar magnetic storms and recurrent geomagnetic storms 11 p1773 A66-22784

CH INERTIA PRINCIPLE

Identity between inertial and gravitational fields in infinitesimally small region of space-time, discussing equivalence and Mach principle 14 p2332 A66-27211
Kinematics of noninertial reference frames in both metric and tetrad formulations of general theory of relativity 14 p2332 A66-27213
Gravitational field as form of matter, testing Mach inertia principle 14 p2333 A66-27218

Electromagnetic field of concentric rotating mass shells, noting Machian effects in cosmological models with near-Schwarzschild radius 22 p3948 A66-40525

CH NUMBER

Spectral energy distribution modified by Mach number effects and structural response to boundary layer turbulence and susceptibility to changes in mean flow Mach number 01 p0005 A66-10129
Mach number effect on secondary losses of high speed turbine-blade configuration at high hypersonic velocities 01 p0007 A66-10924
Rarefied hypersonic flow at high Mach numbers and stagnation temperatures counteracted by ballistic missiles and satellites, noting air plasma with magnetic field [AIAA PAPER 65-754] 03 p0354 A66-12588
Lead-on interaction of plane shock wave in supersonic cone-cylinder 03 p0316 A66-12813
Hypersonic pilot wind tunnel using compression heater gives Mach-14 flow 03 p0353 A66-13223
Hypersonic aircraft and aerodynamic effects for global transport operation noting shock waves, Mach number and gas dynamics 04 p0453 A66-13504
Mach-Zehnder interferometer for

electromagnetically accelerated shock waves in hydrogen 04 p0554 A66-14285

Pressure coefficient of accelerating slender body in terms of body geometry and Mach number for velocity potential, using acoustic theory [ASME PAPER 65-WA/APM-28] 05 p0607 A66-15449

Determination of symmetric flow between two smooth walls attaining Mach number maximum value at point on symmetry axis 07 p0982 A66-18129

Flow of compressible fluid about circular cylinder at Mach number less than unity solved, using small parameter method 08 p1161 A66-18608

Pressure distribution on star-shaped bodies in wind tunnel at Mach 4 and Reynolds number .000006 08 p1165 A66-19480

Fuel requirements for high altitude high-Mach number aircraft, noting thermal stability, autooxidation, self-ignition, specific heat, etc 10 p1590 A66-21400

Molecular beam approximation for plane normal shock in free stream monatomic gas flow at large Mach numbers 11 p1690 A66-22911

Pressure coefficient of accelerating slender body in terms of body geometry and Mach number for velocity potential, using acoustic theory [ASME PAPER 65-WA/APM-28] 12 p1797 A66-23968

Pressure regulation in equalization chamber of model blowdown wind tunnel used at various Mach numbers, calculating compressed-air flow through control valve and characteristics of transfer function 12 p1857 A66-24322

Wind tunnel apparatus for flow visualizations at Mach 14 by glow discharge method 13 p2059 A66-26376

Schlieren photographs of turbulent hypersonic wakes behind cones and spheres at various Mach numbers and pressures, analyzing laminar wake core, wake diameter and distance to transition 13 p1992 A66-26664
Mach number, Reynolds number and boundary layer trip devices effect on base pressure 14 p2219 A66-27443

Supersonic jet interaction for hypersonic flow of Mach 7.1 and for variable Mach number, noting jet instability, stagnation pressure, drag variation, wind tunnel, etc 14 p2220 A66-27467

Refractory ceramics for air breathing engine for Mach 7 aircraft, noting zirconia properties 16 p2790 A66-30257

Hypersonic wind-tunnel test program giving data on turbulent boundary layer with mass addition including Mach number effect on heat transfer and skin friction reduction and massive blowing 17 p2839 A66-32477

Wind tunnel analysis of separated flow in region of several two-dimensional flow perturbations, presenting fluctuating pressure levels as function of Mach number for undisturbed flow 17 p2910 A66-32762

Laminar boundary layer transition in hypersonic shock tunnel of cone, noting effect of high Mach numbers and tip surface roughness, using surface heat transfer gauges [AIAA PAPER 66-494] 17 p2841 A66-32772

Mach 16 hot shot wind tunnel testing of film cooling techniques 17 p3039 A66-33482

Panel flutter at high Mach numbers, using linear plate theory and first-order aerodynamics, noting damping, relation between traveling and standing wave theories, etc 18 p3257 A66-34592

Mach detonation wave formation conditions, noting magnitude of shock pressures in metals and possibility of obtaining steady state wave patterns 18 p3266 A66-34629

Estimation of shock induced pressure rise on wedge or conical body for various Mach numbers, noting variation of blast-induced pressure ratio with incidence angle 19 p3275 A66-35634

Supersonic compressor flow induction process as affected by Mach number, cone angle, rotational speed and blade angle [AIAA PAPER 66-615] 19 p3275 A66-35943

Structure of flow past bodies with radial cross section in wind tunnel at various Mach numbers and angles of attack, noting position of shock waves 19 p3276 A66-36473

Velocity and angle dependence of rain erosion for various materials, using rotating arm apparatus with high circumferential speeds 20 p3588 A66-37810

Supersonic flow of reacting gases in de Laval nozzle for Mach number near unity 21 p3724 A66-38721

Mach number and body geometry effects on stability characteristics of oscillation in supersonic regime of bodies of revolution 22 p3844 A66-40373

Shock wave instability and mass flow accommodation for ribbon-type parachutes, noting canopy porosity and free stream Mach number 22 p3845 A66-40594

Model tests on free jet scramjet facility configurations at high Mach numbers, obtaining data on bypass flow pressure recovery and diffusion process [AIAA PAPER 66-745] 22 p3846 A66-40632

Arc heated impulse wind tunnel facility including Mach 16 contoured nozzle [AIAA PAPER 66-759] 22 p3894 A66-40642

Nozzle design using liquid metal vapor condensation Mach number as design parameter 24 p4294 A66-42786

MACH-ZEHNDER INTERFEROMETER

Adjustable compensator for Mach-Zehnder interferometer which is suited for large-aperture systems 02 p0233 A66-12216

Simultaneous streak and frame interferometry for short duration hypervelocity facilities 03 p0370 A66-12962

Mach-Zehnder interferometer study of fluctuations in turbulent wakes of slender cones and spheres in ballistic flight [AIAA PAPER 65-809] 04 p0455 A66-13691

Mach-Zehnder interferometer for visualization and analysis of density changes in gases, liquids and solids 04 p0520 A66-13762

Horizontal plate Mach-Zehnder interferometer for hypervelocity range vacuum use, high speed photography problems and electron density measurement 10 p1537 A66-21871

Mach-Zehnder laser interferometer as diagnostic tool in shock tube experiments 11 p1714 A66-23352

Thermally-induced optical path distortions in laser rods measured by obtaining time resolved interferograms, using Mach-Zehnder interferometer and Q-switched laser 13 p2092 A66-25994

Random error estimation for Mach-Zehnder interferometer interference fringe measurements 15 p2502 A66-29383

Immersion technique using Mach-Zehnder interferometer for obtaining sum and difference of major stresses in plane stress distribution 15 p2611 A66-29416

High temperature flow characteristics in free piston shock tube measured by means of pulsed light of He-Ne gas laser 19 p3339 A66-35353

Compressible and incompressible flows made visible by optical method sensitive to density variations, shadowgraph, schlieren system, Mach-Zehnder interferometer and holographic interferometry with lasers 24 p4192 A66-43196

Investment castings in advanced high strength steels and titanium alloys, noting reliability and quality control [SAE PAPER 650770] 05 p0688 A66-15009

Selecting proper cutting tool for machining high-strength steels and alloys 08 p1229 A66-18689

Micromachining with pulsed helium-neon gas laser, noting experimental techniques, operation and application 08 p1232 A66-19734

Summation of errors with variable distribution parameters in finishing and assembling of batches of parts 09 p1384 A66-20766

Machinability of refractory metals, examining two molybdenum alloys, graphing relation between tool life and cutting speed 10 p1545 A66-21222

SAE handbook, 1966, supplies definitions, testing methods, measurement methods and data for engineering materials, machine elements and vehicle components 10 p1540 A66-21700

Machining technology of titanium alloys, investigating machining characteristics under controlled machine variables such as cutting speed, feed rate, tool material, tool geometry, cutting fluid, etc [ASME PAPER 65-PROD-11] 11 p1709 A66-22473

Changes in mechanical and electrical properties of thin Zn, Cd and Cu films during machining and thermal treatment 11 p1758 A66-23322

Standardization of machining criteria for aerospace materials, compiling data about tool design, planning, manufacturing, costs, etc, on simple form [ASTME PREPRINT MM66-714]

12 p1887 A66-24418
Aerospace structural material machinability, cost estimating, machine tool selection, metal cutting problems, etc [ASTME PREPRINT MM66-715]

12 p1887 A66-24419
Rigidity and support requirements of fixturing for titanium alloy milling operations [ASTME PREPRINT MR66-716]

12 p1887 A66-24420
Selection of parts for numerically controlled manufacturing, noting periodical necessity of intermixing with conventional machining operations

[ASTME PREPRINT MM66-724]

12 p1887 A66-24422
Point-to-point contouring systems noting procedures, codes and cost savings [ASTME PREPRINT MS66-725]

12 p1887 A66-24423
Industrial technology and cost estimate of chemical machining metal removal process [ASTME PAPER MR66-155]

14 p2299 A66-26953
Machining characteristics of 18 percent nickel maraging steel [ASTME PAPER EM66-163]

14 p2311 A66-26956
Machinability data for hard-to-machine materials, noting cost reductions, tool holder test program, cutting fluids, fixtures, producibility, etc [ASTME PAPER MM66-178]

14 p2300 A66-26958
Manufacturing methods and equipment to sculpture aluminum honeycomb core, discussing tracer control, airfoil mill, traversing router, etc [SAE PAPER 660326] 14 p2301 A66-27294

Effective emittance of machined surfaces determined through groove models numerically analyzed 14 p2334 A66-27429

Fatigue testing metal rods in rotating beam machines without machining as-produced specimen 14 p2318 A66-28481

Notched and unnotched bending fatigue strength of machined work hardened AISI type 305 stainless steel affected by cold worked surface layer with high compressive residual stresses 15 p2521 A66-29073

Titanium profile milling and application of numerical control equipment [SAE PAPER 660289] 15 p2511 A66-29830

Electrical discharge machining of sintered aluminum powder with different alumina content 18 p3116 A66-34061

Laboratory turning tests of machinability of high density unalloyed tungsten and silver-infiltrated tungsten, discussing machining effect on tool life, tool forces, surface finish, producibility, etc 19 p3369 A66-36132

Refractory alloy machining techniques, tool materials, cutting speeds, etc 19 p3369 A66-36133

Two machining processes for eliminating unbalanced state of machine parts, using eccentric cutting and adjustment of part CG for coincidence with spindle axis 20 p3562 A66-36920

Mathematical engine for machining complicated shapes 20 p3563 A66-37766

Prevention and control of Ti machining fires 21 p3744 A66-39198

Mechanical properties of semifinished products, welds and machined sections of high strength V92Ts aluminum alloy 22 p3936 A66-40883

Susceptibility to cold deformation of semifinished B95-2 Al-Zn-Mg-Cu alloy products, noting machinability in manufacturing of parts 22 p3928 A66-40885

Manufacturing of semifinished pressed products of AD31 Al-Mg-Si alloy, examining coarse-grained structure occurring after hardening and machining 22 p3928 A66-40886

Machining of gear train made of titanium alloy, discussing surface treatment 23 p4074 A66-41650

Machining conditions and techniques used in producing tungsten jet pipe neck, detailing equipment 23 p4074 A66-41651

Wound glass-fiber material used in reinforced plastic construction for production of solid fuel heavy missiles 23 p4074 A66-41653

MACROMOLECULE

Biological macromolecule detection using thiocarbocyanine dye and observation of absorption spectra changes 15 p2441 A66-29962

Origin of life experiments noting hereditary propagation in macromolecules arising after spontaneous chemical evolution but before self-replicative biological evolution 17 p2853 A66-32100

Macromolecular organization of hemocyanins and apohemocyanins as revealed by electron microscopy 18 p3060 A66-34460

Statistical mechanical predictions of second

rial, adiabatic Joule-Thomson, viscosity and
 diffusion coefficients for intermolecular
 potential functions 20 p3678 A66-37313
 Macromolecular parameters of memory and
 learning and information processing in
 molecular genetics, molecular immunology
 and molecular neurology 24 p4162 A66-42313
MACROSCOPIC EQUATION
 Macroscopic theory for fully ionized plasma
 waves 03 p0399 A66-12785
 Macroscopic equations of plasma physics
 using one-and two-fluid MHD
 approximation 03 p0400 A66-12851
 Thermodynamic formalism based on
 fundamental relation and Legendre
 transformation, with macroscopic and
 statistical application 08 p1319 A66-19292
 Plasma stability problem, discussing
 macroscopic and microscopic approaches and
 application of Liapunov
 method 13 p2141 A66-25583
 Macroscopic equations for nonequilibrium
 processes in rarefied gases by disrupting
 moment equations infinite chain, using
 notion of maximum entropy
 distribution 14 p2336 A66-28059
 Collection of papers on macroscopic
 thermodynamic equilibrium, statistical
 thermodynamics, concepts and methods of
 thermodynamics, etc 17 p3037 A66-32999
MGMA
 Vacuum upwellings of simulated basalt and
 granite magma, showing correlation with
 near surface by 20 p3655 A66-38025
 Photometry 20 p3655 A66-38025
 Fluorine, chlorine and other trace elements
 determined through differentiated tholeiitic
 basaltic sill from Tasmania using statistical
 techniques, showing hydroxyl lattice sites by
 fluorine and fluorine 24 p4198 A66-42364
MGNESUM
 Born approximation of cross sections for
 electron and proton impact ionization of Na
 and Mg 11 p1737 A66-22496
 Surface orientation effect on twin
 accommodation in hcp metal magnesium and
 relation to twin boundary
 movement 13 p2107 A66-25585
 Chemical composition effect on fracture
 properties of Al-Zn-Mg-Cu
 alloys 14 p2317 A66-28009
 Corrosion of magnesium in
 water 15 p2523 A66-29724
 Magnesium I lines in solar spectrum
 searched on basis of multiplet table of
 wavelengths, intensities, excitation
 potentials of magnesium
 spectrum 16 p2802 A66-30939
 Ultrasonic attenuation changes due to
 dislocation formation during yielding of
 magnesium, molybdenum and
 Fe 16 p2726 A66-31458
 Temperature dependence of magnetization
 and resistivity in SHF magnesium-aluminum
 ferrite 16 p2786 A66-31877
 Water vapor effects on burning rate of
 aluminum and magnesium wires at
 atmospheric pressure
 [VSCI 66-4] 18 p3264 A66-34421
 Grain boundary self-diffusion coefficient
 variation with applied stress and production
 of lattice vacancies applied to cavity growth
 at high temperature fatigue of
 Mg 23 p4081 A66-41714
MGNESUM ALLOY
 Aging characteristics of Al-Zn-Mg
 alloys 03 p0381 A66-12722
 Nonconservative motion of jogged screw
 dislocations in high temperature deformation
 of Al-Mg alloys 03 p0382 A66-12937
 Galvanic corrosion in panel-type couples of
 dissimilar metals with magnesium evaluated
 on tensile strength loss 08 p1241 A66-19714
 Powder metallurgy development of
 intermetallic alloys of magnesium with MgO and
 magnesium-beryllium alloys with high
 oxidation resistance 10 p1544 A66-21200
 Kinetics of two-phase decomposition of
 solid solution of magnesium-aluminum alloy,
 using X-ray analysis, noting grain orientation
 and size 12 p1898 A66-25027
 Corrosion mechanism for eutectic or near-
 eutectic Mg-Zn alloys in halide
 solution 13 p2110 A66-26026
 Kinetics of natural aging process of Al-4
 percent Cu alloy, experiments indicate
 addition of up to 1.0 percent Mg
 proportionately slows down aging

process 16 p2723 A66-30871
 Chemical activities of cadmium and
 magnesium in binary Mg-Cd alloys based on
 vapor pressure measurement by Knudsen
 effusion method 18 p3121 A66-33729
 Hardness and lattice parameter increase
 effect on oxidation temperature of
 internally oxidized Ag-Mg and Ag-Al
 alloys 18 p3122 A66-33750
 Aging behavior and mechanical properties
 of three wrought high-strength magnesium-
 yttrium alloys 18 p3122 A66-33751
 Electronic packaging weight reduction by
 using magnesium-lithium
 alloy 19 p3376 A66-35327
 Heat transfer dependence on pressure and
 thermal loads in bubble boiling of mercury
 and Hg-Mg alloys 22 p3999 A66-40295
 Susceptibility to cold deformation of
 semifinished B95-2 Al-Zn-Mg-Cu alloy
 products, noting machinability in
 manufacturing of parts 22 p3928 A66-40885
 Manufacturing of semifinished pressed
 products of AD31 Al-Mg-Si alloy, examining
 coarse-grained structure occurring after
 hardening and machining 22 p3928 A66-40886
 Magnesium alloy components protected
 from corrosion by subjection to anodic
 oxidation 23 p4074 A66-41659

MAGNESIUM COMPOUND

Chromospheric emission lines of
 magnesium iodine analyzed, calculating
 hydrogen concentration and ionization
 degree at 1000 km 01 p0134 A66-10269
 Compressive strength and instability
 failure mechanism in uniaxial boron fiber-
 metal matrix composite
 material 08 p1240 A66-19139
 Single crystal silicon on spinel, achieving
 epitaxy on magnesite aluminate by Splane
 pyrolysis and silicon chloride reduction in
 hydrogen atmosphere 13 p2158 A66-25053
 Optical absorption spectra of cobalt ion in
 magnesium aluminate
 crystal 20 p3621 A66-37822
 Magnesium antimonide and magnesium
 bismuthide as materials for power
 generating thermocouples 24 p4227 A66-42111

MAGNESIUM FLUORIDE

Magnesium fluoride overcoated aluminum
 mirrors, discussing thickness monitoring
 techniques by vacuum UV reflectance
 measurements 11 p1737 A66-23430

MAGNESIUM GERMANIDE

Increase in carrier mobility in Mg₂GeS₁₂
 with neutron irradiation may be due to
 decreasing effective mass, caused by
 creation of internal
 stresses 06 p0936 A66-17136

MAGNESIUM OXIDE

Plasma arc tunnel tests show
 thermochemical heat of ablation of magnesite
 strongly dependent on stagnation enthalpy
 [AIAA PAPER 65-641] 01 p0089 A66-10225
 MgO coated integrated sphere to
 determine reflectance and surface roughness
 on cryogenic space chamber walls
 [AIAA PAPER 65-674] 01 p0090 A66-10234
 Ultrasonic maser amplification by
 stimulated phonon-photon double quantum
 emission in magnesium
 oxide 01 p0080 A66-10247
 Asymmetric line near g equals 2.00 of
 paramagnetic resonance spectrum of MgO
 powder as polycrystalline spectrum of ferric
 ions in cubic field 01 p0123 A66-10602
 MgO crystals subjected to plane shock
 waves for number of explosive shocking
 geometries 02 p0249 A66-11945
 Electron paramagnetic resonance spectrum
 of carbon dioxide when absorbed on UV
 irradiated magnesium
 oxide 05 p0630 A66-15766
 Deformation of polycrystalline MgO at
 elevated temperatures, with stress-strain
 curves for five types 08 p1243 A66-18773
 Measured thermal conductivities of
 magnesium oxide, aluminum oxide and
 zirconium oxide powders 10 p1546 A66-21538
 Theoretical expression for thermal
 conductivities of magnesium oxide,
 aluminum oxide and zirconium oxide
 powder 10 p1546 A66-21539
 High-temperature deformation of magnesite
 single crystals with /110/ tensile axis,
 favoring slip on systems with oblique
 vectors, related to observations on /001/
 crystals 12 p1898 A66-23564

Oxygen interacting with zinc oxide and
 UV-irradiated magnesium oxide studied,
 using electron paramagnetic resonance
 techniques 12 p1916 A66-23618
 Adsorption of CO radicals on three types
 of magnesium oxide using EPR techniques,
 noting spectrum of adsorbed radical,
 bonding, etc 12 p1916 A66-23619
 Hot-pressed high-purity polycrystalline
 MgO 12 p1900 A66-24721
 Grain boundary role in high temperature
 fracture behavior of magnesite, noting
 temperature and orientation dependence of
 shear strength 12 p1897 A66-24920
 Growth of single crystal and polycrystalline
 thin films of magnesium aluminum oxide
 and magnesium iron oxide, discussing
 techniques employed, results,
 etc 17 p2982 A66-33061
 Time dependence of dislocation density in
 single crystal MgO undergoing plastic
 deformation at elevated
 temperatures 19 p3387 A66-35421
 Low temperature optical fluorescence of
 ruby and vanadium doped magnesium oxide
 in which vibronic sideband intensity near
 sharp R line is measured as function of
 energy separation from no-phonon R
 line 19 p3446 A66-36395
 High temperature tensile deformation of
 polycrystalline magnesite prepared by single-
 crystal recrystallization and hot
 pressing 21 p3753 A66-38592
MAGNET
 SA CRYOGENIC MAGNET
 SA ELECTROMAGNET
 SA FERRIMAGNET
 SA SUPERCONDUCTING MAGNET
 Dependence of magnetic moment and
 thermal coefficient of permanent magnets
 on annealing temperature and
 length/diameter ratio 02 p0232 A66-12147
MAGNETIC ABSORPTION
 Resonance curve analysis from microwave
 absorption measurements on polycrystalline
 ferrimagnetic doped and undoped garnets at
 room and low temperatures, with application
 to low noise receivers 24 p4260 A66-43172
MAGNETIC AMPLIFIER
 Saturation characteristics of ferromagnetic
 amplifiers 01 p0041 A66-10567
 Magnetic semiconductor amplifier behavior
 with internal feedback and negative control
 currents 01 p0045 A66-11023
 Two operation modes of two-way DC
 improved efficiency amplifier under active
 loading 08 p1197 A66-19689
 Amplitude and phase of first harmonic of
 load current of differential magnetic
 amplifier determined, using generalized
 characteristics 09 p1352 A66-20303
 Effect of degree of coupling between
 resonator system and load on generation
 zones and regenerative amplification of
 pulsed magnetron, noting
 characteristics 09 p1353 A66-20437
 Operation modes of electron beam
 generators with resonant oscillating systems
 and bipolar regenerative amplifiers
 developed from them 09 p1353 A66-20438
 Nonresonant solid state magnetic,
 semiconductor and dielectric devices, noting
 operation characteristics, control parameters,
 etc 10 p1509 A66-21418
 Magnetic amplifier telemetry encoder
 circuit, using silicon controlled rectifiers
 /SCR/, for application in satellites and
 rockets 14 p2263 A66-27062
 Two operation modes of two-way DC
 improved efficiency amplifier under active
 loading 18 p3087 A66-34675
MAGNETIC ANNULAR ARC
 Propulsion efficiency of magnetic annular
 arc /MAARC/ 06 p0808 A66-16251
 [AIAA PAPER 66-115] 06 p0808 A66-16251
 Annular magnetic Hall current plasma
 accelerator 10 p1594 A66-21779
 Axial current distribution in exhaust of
 magnetic annular arc, examining effect of
 entrainment on thrust measurement
 [AIAA PAPER 66-198] 11 p1761 A66-23084
 Propulsion efficiency of magnetic annular
 arc /MAARC/ 23 p4107 A66-41901
MAGNETIC ANOMALY
 SA GEOMAGNETIC ANOMALY
 Total geomagnetic field intensity
 measurements made over last ten years

facilitate preliminary magnetic anomaly map of Gulf of Mexico 09 p1369 A66-19876
 Brazilian magnetic anomaly as observed by Sputnik V and VI and five satellites of Cosmos series 09 p1446 A66-21036
 Anomalous diffusion and instabilities of argon plasma in strong magnetic field 10 p1564 A66-21568
 Latitude distributions obtained for nucleonic and neutron components of cosmic radiation during flights from South Africa, compared with Northern Hemisphere distributions 18 p3197 A66-34878
 Photomagnetic anomaly in germanium in induction coil subject to variations in magnetic moment 20 p3618 A66-37564

MAGNETIC CIRCUIT

System designing with all-magnetic logic circuits based on resistance shift register circuit 08 p1187 A66-19101
 Frequency division by various factors in magnetic frequency divider with gate in excitation winding circuit 16 p2666 A66-31551
 Gain-bandwidth product of Hall magnetic amplifier circuits design 16 p2666 A66-31573
 Angular transducer using Hall effect, noting errors due to distortions in magnetic circuit and temperature effects 16 p2709 A66-31577
 Controllable threshold circuit using interconnection simple toroids for all-magnetic logic to select signal paths 24 p4189 A66-43178

MAGNETIC COIL

Losses and overheating temperature dependences in toroidal coils with various core configurations 11 p1667 A66-22792
 Forced oscillations of ferrite core circuit, showing phase characteristics and parameters of inductance and amplitude 12 p1958 A66-23725
 Superconducting magnetic bottle consisting of two mirror coils, central field coil and quadrupole field coil 20 p3601 A66-37107
 Quantum paramagnetic traveling wave amplifier using rutile with admixture of chromium and combined with magnet with superconducting coil 20 p3580 A66-37996
 Internal magnetic flux in superconducting solenoid, discussing winding and stability with respect to current jumps 22 p3964 A66-40195

MAGNETIC COMPASS

Magnetic compensation methods which eliminate swinging aircraft 07 p1032 A66-17684
 Feasibility of using perfected gyromagnetic compass as heading reference for aircraft 07 p1033 A66-17698
 Instrumentation of Polish gliders including altimeters, rate-of-climb, turn and air speed indicators, magnetic compasses, artificial horizon, etc 12 p1882 A66-24386

MAGNETIC CONTROL**SA ELECTROMAGNETIC CONTROL**

Spinning satellite attitude control using interaction between Earth magnetic field and onboard current carrying coils [AIAA PAPER 64-235] 03 p0430 A66-12735
 Low density plasma confinement by HF and static magnetic fields 04 p0550 A66-13474
 Equilibrium of plasma confined in toroid 05 p0725 A66-15240
 Transformation of transverse oscillations of electron flux by short magnetic lenses studied by eigenvector concept 08 p1199 A66-18907
 Simulation of satellite magnetic stabilization system in airbearing facility, using coils-only magnetic torquing for attitude orientation 08 p1203 A66-19514
 Passive magnetic stabilization of satellites, noting use limitations, satellite geometry, spin effects, etc 09 p1464 A66-20553
 Utilization of magnetic deflection in display systems 12 p1829 A66-23536
 Dynamic stabilization of direct discharge in magnetic field 12 p1922 A66-24215
 Magnetic deflection for display systems offers improved design freedom and good frequency response 13 p2047 A66-25362
 Focusing of long cylindrical electron beam by means of short-period permanent magnet or long-period reversed field magnet 15 p2467 A66-29709
 Passive and semipassive magnetic attitude stabilization for satellites in circular and elliptic orbits 18 p3243 A66-33858

Gravity gradient stabilization of near-Earth satellite with extensible boom and libration damping with combined lossy spring and magnetic hysteresis rods 18 p3244 A66-33862
 Faraday rotation obtained with pulsed high-field magnets for controlling laser cavities 19 p3372 A66-35380
 Radial plasma transport in magnetic wells, emphasizing LF instabilities not stabilized by positive gradient and employing free energy arguments 19 p3415 A66-36516
 Dynamic stabilization of plasma column by HF magnetic field 19 p3424 A66-36557
 Plasma adiabatic compression by external magnetic field increasing with time in toroidal chamber, providing two-stage plasma heating 19 p3430 A66-36588
 Magnetic attitude control of rigid spinning satellite in circular Earth orbit by producing control torques 21 p3763 A66-38846
 Dynamic stabilization of direct discharge in magnetic field 22 p3957 A66-40579
 Guiding magnetic fluxes by superconducting screens independently of medium permeability 24 p4237 A66-42339

MAGNETIC CORE

Memory system using microelectronics with conventional magnetic core matrices noting diodes, transistors, resistors and sense circuit 02 p0193 A66-11930
 Switching properties of partially set square-loop ferrite core, noting flux level influence, measurement techniques, etc 10 p1508 A66-21413
 Gamma-level ring-core magnetometer sensitivity parameters, noting frequency, dynamic differential permeability, number of pickup turns, etc 10 p1508 A66-21415
 General mathematical model of DC relay performance which includes effects of leakage path permeance and magnetic properties of core material 15 p2461 A66-28996
 High saturation core material magnetic behavior, noting structural instability accompanied by deteriorating magnetic properties at high temperatures 20 p3583 A66-37258
 Basic circuit, sensitivity and mode of operation of balanced magnetic core comparator 24 p4187 A66-43179
 Analytic model for describing operation of Marzolf tunnel diode inverter 24 p4187 A66-43181

MAGNETIC DIFFUSER

Magnetic diffusivity measurement for cylinder of type II Nb-Zr superconductor at 4.2 degrees K, using magnetoconductance probe 14 p2350 A66-26878
 Free and confined turbulent and free laminar plane jets in highly diffused magnetic fluid 23 p4107 A66-42005

MAGNETIC DIPOLE**SA ELECTRIC DIPOLE**

Geomagnetic field represented as dipoles located by least squares gradient method 01 p0063 A66-11052
 Earth magnetic field represented as dipole field to study secular variations of field 02 p0225 A66-12142
 Plasma instabilities in dipole magnetic field 03 p0400 A66-12893
 Terrestrial magnetic field and secular variations 04 p0514 A66-13448
 Radiation from vertical magnetic dipole in inhomogeneous stratified media above horizontal conducting plane, noting Hertz potential as contour integral 04 p0483 A66-14041
 Ionospheric magnetic dipole transition, noting radiative transfer equation for atomic oxygen and nitric oxide 05 p0667 A66-14793
 Stable plasma belt trapped in permanent dipolar magnetic field, measuring floating potential, electric and magnetic drifts, etc 08 p1265 A66-19408
 Critical Stormer pass points for quadrupole field and double-ring-current field with parallel or antiparallel dipole moments 09 p1404 A66-20085
 Radiation energy emitted by magnetic dipole passing along axis of cylindrical waveguide resonator and waveguide of periodic structure 10 p1570 A66-21992
 Feed polarization incident upon conic reflector in antenna system specified in terms of crossed electric and magnetic dipoles 11 p1663 A66-22544

Atomic integral obtained with magnetic dipole-dipole operator in form of finite sum of integrals over hypergeometric functions 11 p1739 A66-22887
 Spacecraft magnetic testing, discussing geomagnetic effects on orbiting satellites, magnetic dipole moment, etc 13 p2058 A66-25847
 Earth magnetic field represented as dipole field to study secular variations of field 14 p2287 A66-28098
 Stormer method solution of charged particle motion in field of magnetic dipole situated in external uniform magnetic field antiparallel to dipole magnetic moment vector 15 p2482 A66-28449
 Electromagnetic excitation by vertical magnetic dipole located above spiral anisotropic plane 17 p2897 A66-33518
 Radiation energy emitted by magnetic dipole passing along axis of cylindrical waveguide resonator and waveguide of periodic structure 18 p3088 A66-34969
 Synchrotron radiation of relativistic electrons in magnetic field of dipole 19 p3455 A66-35255
 Charged particle motion in field of magnetic dipole situated in external magnetic field /magnetospheric G region/, using Stormer method 19 p3451 A66-35282
 Principal geomagnetic field approximation by centered dipole field and eccentric dipole field 21 p3732 A66-38663
 Single-axis meter design and development for measuring feeble torques on massive bodies, discussing calibration, testing results, evaluation of static dipole moments and spacecraft spin-rate control moments 21 p3722 A66-38880
 Plasma stream conductivity and velocity measurement, using systems of primary coil and several secondary coils 22 p3921 A66-40899
 Nonsymmetric inflation of dipole magnetic field by ionized gas, noting nonsymmetric gas dissipation 24 p4199 A66-42587

MAGNETIC DISPERSION

Electron density distribution in magnetosphere inferred from dispersion characteristics of hydromagnetic wave propagating between hemispheres along geomagnetic field as in atmospheric whistlers 05 p0747 A66-14787
 Hysteresis properties of thin ferromagnetic films of nickel-iron and of nickel-iron-molybdenum compositions, noting anisotropic dispersion effect 09 p1431 A66-20868
 Ferromagnetic film behavior near hard direction of magnetization 09 p1431 A66-20869
 Effects of angular dispersion of anisotropy and film thickness on thin permalloy ferromagnetic film pulse switching 16 p2773 A66-30682
 Faraday and Voigt and dispersive magneto-optic effects in semiconductors in crossed field due to energy band transitions 21 p3800 A66-38995
 Electromagnetic wave propagation, excitation and dispersion in metals in magnetic field 21 p3792 A66-39300
 Optimal lumped constant dispersive network design with inductors and capacitors functioning independently 23 p4034 A66-41015
 Dispersive network with attenuation equalizing network, weighting filter for control of output side lobe level with Gaussian shaped frequency response and matching system 23 p4034 A66-41016

MAGNETIC DOMAIN**SA BLOCH WALL****SA SATURATION**

Elastic tensile stress effect on domain structure of thin ferromagnetic films composed of iron and nickel 09 p1431 A66-20870
 Quasi-equilibrium states during pulse remagnetization of thin ferromagnetic films, discussing domain structure 11 p1752 A66-22798
 Changes in domain structure of cobalt films as function of substrate temperature during sputtering and transformation from poly-to single-crystal structure 11 p1753 A66-22803
 Domain structure of single-crystal epitaxial

on films as function of perfection of crystalline structure, using Lorentzian electron microscopy, noting two-axis isotropy 11 p1753 A66-22806
 Domain structure and reverse magnetization of single crystal nickel films 11 p1754 A66-22816
 Existence of superconductivity along domain boundaries in ferromagnetic materials having domain structure when induced by nonmagnetic s-electrons or when only magnetic electrons are present 13 p2166 A66-25919
 Temperature dependence of domain structure of thin ferromagnetic films prepared by thermal evaporation in vacuum 16 p2774 A66-30696
 Domain structure and hysteresis loops of iron-gadolinium films of different thicknesses 16 p2775 A66-30699
 Current oscillations, negative resistance and high field domain transition in dark conductive cadmium sulfide crystals 17 p2975 A66-31940
 Contrast formation of coupled walls studied by electron microscope with variable defocusing 20 p3620 A66-37821
MAGNETIC EFFECT
 A BARKHAUSEN EFFECT
 A GEOMAGNETIC EFFECT
 A MEISSNER EFFECT
 A PHOTOELECTROMAGNETIC /PEM/ EFFECT
 Interplanetary magnetic effects of solar waves recorded by Explorer XVIII and Pioneer V 03 p0419 A66-12681
 Model for behavior of optical maser in static magnetic field of arbitrary strength in direction and in electromagnetic field composed of traveling waves 03 p0379 A66-13135
 Stabilizing flute and sausage instabilities of plasma jets by transversed magnetic field 03 p0406 A66-13192
 Critical current in planar and cylindrical superconducting tin films as affected by magnetic field and temperature 04 p0559 A66-13715
 Magnetic field effects on spectrum and intensity of spontaneous emission in InSb luminescent diode 07 p1094 A66-17316
 Effect of extremes in magnetic environment on physiological behavior 08 p1174 A66-18585
 Interplanetary dust dynamics, discussing comet tails, electric charge carrying properties, etc 08 p1287 A66-18635
 Magnetic field effect on electron temperature, number of ionization events and potential gradient in argon and neon HF discharge 08 p1264 A66-19186
 Attitude control system, using magnetic interaction with geomagnetic field to check spin rate and spin axis orientation of spin-stabilized Explorer A satellite 08 p1304 A66-19512
 N-type germanium electric conductivity dependence on applied electric and magnetic field 09 p1430 A66-20857
 Model for interpretation of positive column two-dimensional striations of diffuse mode as discharge in uniform magnetic field 10 p1564 A66-21569
 Dispersion equation for cylindrical plasma with finite electrical conductivity under influence of applied magnetic field and own cavitation field 12 p1920 A66-24191
 Response of tissue culture cells to low magnetic fields, noting no quantitative growth differences 12 p1807 A66-25015
 Interaction between layers of ferromagnetic films of different composition and coercivity separated by insulating quartz layer, obtaining films by vacuum deposition 12 p1933 A66-25028
 Mutual-inductance coefficients of coaxial toroidal plasmoids interacting with external magnetic field 13 p2152 A66-26513
 Plasma contamination by electrode material coaxial accelerator reduced by longitudinal magnetic field 13 p2153 A66-26523
 Optical transition of manganese fluoride as function of temperature and magnetic field both emission and absorption 14 p2351 A66-26886
 Magnetic effect on emission spectrum of negative glow plasma in hollow-cathode

discharge, noting pressure effect 14 p2340 A66-27024
 Optical absorption in semiconductors with impurity center participation in external magnetic field 14 p2358 A66-27082
 Recombination radiation in semiconductor affected by strong magnetic field 14 p2363 A66-27597
 Magnetic coupling effect on flux pinning and flux-flow resistivity in superconducting tin film 16 p2770 A66-30170
 Magnetic interaction between layers of two-layer ferromagnetic film, discussing inhomogeneity effects, Barkhausen jumps, reverse magnetization nuclei, etc 16 p2774 A66-30689
 Magnetic field effect on direct band-to-band tunnel current in doped germanium, noting decreases in reverse current and current-voltage characteristics 16 p2776 A66-30735
 Hall effect of homogeneous semiconductors in nonuniform magnetic fields and of thin inhomogeneous films in uniform field 16 p2666 A66-31576
 Jet flow effect on electrical discharge in conducting viscous fluid based on magnetic boundary layer theory 17 p2964 A66-31895
 Magnetic effects on reproduction and metabolism of normal and diseased mammalian cells in vivo and in vitro 17 p2859 A66-32229
 Electromagnetic excitation by vertical magnetic dipole located above spiral anisotropic plane 17 p2897 A66-33518
 Ionized noble gas lasers, considering problems at higher powers, especially those of inversion mechanism and magnetic field effects 18 p3118 A66-33767
 Nonaccelerated electron beam envelope trajectory equation reformulated and solved allowing for finite emittance, space charge and self-magnetostatic forces 19 p3319 A66-36170
 Magnetic viscosity effect on Rayleigh-Taylor instability and Kelvin-Helmholtz instability of superposed fluids 19 p3408 A66-36271
 Successive hourly variations of equivalent current systems of magnetic bay disturbance patterns and F layer minimum frequency increases 20 p3658 A66-38232
 Plasmoid motion and purification in helical magnetic field and mass spectrograms of pure dense hydrogen 21 p3787 A66-39048
 Noncollisional ergodic shock wave propagating in plasma situated in magnetic field and thermal oscillation effect on thermonuclear kinetics 21 p3787 A66-39052
 Tunnel current dependence on magnetic field for two superconductors with thin dielectric interface 21 p3804 A66-39314
 Optical absorption in semiconductors with impurity center participation in external magnetic field 22 p3967 A66-40838
 Parallel and transverse magnetic field effects on electric field induced optical absorption at photon energies below direct gap in Ge 23 p4109 A66-41036
 Specific heat measurements and cryogenic thermodynamic properties of single crystal V in mixed state under 12 different magnetic fields 23 p4080 A66-41372
 Diffusion in potassium plasma in presence of universal instability, examining dependence of diffusion coefficient on magnetic field for given density range 23 p4106 A66-41708
 Steady state flow of liquid metal in MGD channel of rectangular section, noting magnetic field effect on resistance factor 23 p4106 A66-41729
 Sliding magnetic field effect on electric current in conducting annular channel flow, noting energy-transfer efficiency and acoustic resonance 23 p4107 A66-42030
 Recombination radiation in semiconductor affected by strong magnetic field 24 p4257 A66-42731
MAGNETIC EQUATOR
 SA GEOMAGNETIC EQUATOR
 Airborne ionospheric probes on both sides of magnetic equator at low African latitudes during equinoctial and solstice periods, obtaining daily behavior of F layer 05 p0674 A66-15113
 Jupiter decametric radio emission spectrum

noting power at various frequencies, mean flux density, magnetic pole locations, etc 16 p2801 A66-30922
 Ionospheric electron content variation with solar radio flux from Faraday rotation data at magnetic equator 20 p3633 A66-38198
MAGNETIC FIELD
 SA ELECTROMAGNETIC FIELD
 SA ELECTROMAGNETISM
 SA FIELD EMISSION
 SA FORCE-FREE MAGNETIC FIELD
 SA GALACTIC MAGNETIC FIELD
 SA GEOMAGNETIC FIELD
 SA INTERPLANETARY MAGNETIC FIELD
 SA INTERSTELLAR MAGNETIC FIELD
 SA KERR EFFECT
 SA LUNAR MAGNETIC FIELD
 SA NONUNIFORM MAGNETIC FIELD
 SA PLANETARY MAGNETIC FIELD
 SA SELF-CONSISTENT FIELD /SCF/
 SA SOLAR MAGNETIC FIELD
 SA STELLAR MAGNETIC FIELD
 SA TRAPPED MAGNETIC FIELD
 Finite difference method solving Dirichlet problem for quasi-linear elliptic equation, with results applied to calculation of magnetic field in nonlinear media 01 p0091 A66-10165
 Release of persistent current energy by local heat injection and propagation through Nb-Zr wires 01 p0116 A66-10238
 Magnetic flux jumps in hard Nb₃Sn and NbZr superconductors in pulsed magnetic fields 01 p0118 A66-10253
 Tetracene and anthracene organic semiconductor photoconductivity increase effect in weak magnetic field 01 p0118 A66-10264
 Delay characteristics of round and square magnetized rods of yttrium-iron garnet /YIG/ crystals compared 01 p0120 A66-10522
 Pulse transmission through cavity, observing if instability or bistable response is present, in connection with behavior of ferromagnetic thin films of permalloy 01 p0120 A66-10529
 Wideband junction circulator design with maximum product of isolation and frequency bandwidth but maintaining minimum temperature and DC magnetic field variation 01 p0040 A66-10548
 RF magnetic field effect, applied parallel to external DC field, on Heisenberg ferromagnet with dipolar coupling, using Green function 01 p0122 A66-10579
 Kinetic theory of Lorentz plasma in rotating magnetic fields and electromagnetic fields based on Boltzmann equation 01 p0113 A66-10640
 Book on satellite-caused ionospheric disturbances, particularly in particle density and electric and magnetic fields in vicinity of artificial body 01 p0138 A66-10975
 Hysteresis of screw instability of positive plasma column in magnetic field 02 p0265 A66-11418
 Plasma resonance modifications in magnetic field used for electron density finding 02 p0265 A66-11434
 Superconducting coil degradation, noting flux jumps causing sudden decrease in series current which causes field disturbances throughout coil 02 p0271 A66-11440
 Electron density distribution in linear pinch discharge with transverse rotating magnetic field 02 p0266 A66-11471
 Structure of shock wave propagating through plasma perpendicular to initial magnetic field 02 p0269 A66-11799
 Plasma kinetic theory effect of magnetic field on dispersion relation for ionic sound wave 02 p0269 A66-11836
 Excitation of magnetic field in spherical conductor for case where vortex concentration is assumed to be constant for entire core 02 p0225 A66-12141
 Spectral analysis of drift oscillations expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory 03 p0396 A66-12380
 Gas-filled closed ring-current surface with continuum of equilibrium figures in external magnetic field in case of surface tension 03 p0354 A66-12388
 Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma,

determining radiation spectrum range and total radiation energy 03 p0397 A66-12389

Coherence of Gunn oscillations enhanced by transverse magnetic field for certain applied voltages 03 p0332 A66-12427

External DC field of long solenoid noting infinite and finite solenoid solutions 03 p0341 A66-12607

Interaction mechanisms of neutralized beam of ions and two symmetric neutralized ion beams flowing parallel to magnetic field 03 p0404 A66-12979

Harmonic generation in double beam system in presence of magnetic field 03 p0404 A66-12981

Free-carrier magneto-Kerr effect analysis considering amplitude ratio of two polarized components of reflected wave and phase difference between these two components 03 p0412 A66-13151

Kim-Anderson model of flux pinning to compute magnetization of cylindrical hard superconductor, e.g. lead alloy 03 p0413 A66-13277

Tetracene and anthracene organic semiconductor photoconductivity increase effect in weak magnetic field 03 p0413 A66-13309

Hydrogen atom beam characteristics discussing signal power, generating frequency, radiation signal damping and hydrogen atom relaxation time 03 p0380 A66-13316

High power relaxation oscillation in multilevel solid state ruby maser due to magnetic field modulation 03 p0380 A66-13327

Bifurcation of nonevolutionary shock wave propagating parallel to magnetic field 04 p0509 A66-13571

Plasma density enhancement in arc discharge by applying converging magnetic field 04 p0551 A66-13742

Anisotropy of ytterbium iron garnet and ytterbium-doped yttrium iron garnet crystals measured by torque method in applied magnetic fields 04 p0563 A66-13812

Behavior of Ising model of ferromagnet in nonzero magnetic field, using high temperature series 04 p0563 A66-13815

Laminar flow of viscous electrically conducting fluid through annular channel in presence of transverse magnetic field 04 p0551 A66-13824

Vortical electric field effect on inhomogeneities spreading in weakly ionized plasma /ionosphere/ in magnetic field 04 p0577 A66-13842

Transport coefficients of intrinsically conducting InSb above room temperature in magnetic field of medium strength 04 p0566 A66-14288

Pressure increase in plasma of cylindrical arc column under superimposed axial magnetic field, applying corona equation 04 p0554 A66-14296

Energy balance of cylindrically symmetric hydrogen arc immersed in axial magnetic field led to current-voltage characteristic and radial temperature distribution 04 p0554 A66-14298

Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanism and hyperfine relaxation frequency 04 p0567 A66-14340

Influence of microinhomogeneities under magnetic field on Nernst effect in InSb 04 p0568 A66-14345

Small amplitude wave propagation in hot ionized gases, noting magnetic field presence 05 p0721 A66-14716

Shock wave formation in collisionless plasma investigating magnetic compression pulse, electron density and radial magnetic field profile 05 p0722 A66-14720

Amplitude and phase of anharmonic oscillator, using relativistic Schrodinger equation in magnetic field 05 p0695 A66-14906

Ambipolar diffusion in magnetic field showing plasma equations of momentum-transfer yield unambiguous steady state solutions 05 p0669 A66-14943

Plasma measurements including temperatures, electron density, current density, etc, noting behavior of probes in magnetic fields 05 p0726 A66-15247

Dynamics and radiation of expanding cloud containing relativistic particles and magnetic field, approximating extended radio source 05 p0762 A66-15277

Electric arc interaction with argon flow analyzed in crossed convective and magnetic fields [ASME PAPER 65-WA/ENER-1] 05 p0728 A66-15626

Magnetic design of OGO and Pioneer solar probe including data on instrumentation, mechanical equipment, permanent magnets, test methods, etc 06 p0958 A66-15919

Electromagnetic wave propagation in semiconductor filled rectangular waveguide in presence of transverse magnetic field 06 p0846 A66-16092

Electromagnetic wave propagation through semiconductor with nonuniform density distribution in transverse magnetic fields 06 p0923 A66-16177

Response of plasma in magnetic field to electric field oscillating with frequencies higher than collision frequency 06 p0915 A66-16179

Influence of suction or injection in boundary layer flow past vertical flat porous plate in presence of uniform magnetic field 06 p0969 A66-16181

Reducing values of potential magnetic or gravitational field observed on Earth surface with weak profile to values on single horizontal plane in lower half-space 06 p0876 A66-16417

Plasma convective instability, discussing effect of axial density gradient on weakly ionized state 06 p0917 A66-16516

Random model for classical electrodynamics presents properties of quantum electrodynamics as extension of work on harmonic oscillator under magnetic field 06 p0867 A66-17063

Cylindrical beam plasma system immersed in finite longitudinal magnetic field, deriving dispersion equation for approximate boundary conditions 06 p0921 A66-17161

Highly sensitive optically pumped helium magnetometer measuring static magnetic fields of 10 to 100 oe at temperatures from 300 to 1.5 degrees K 07 p1032 A66-17471

Hydromagnetic stabilization of periodic magnetic fields composed of mirrors and quadrupole fields 07 p1088 A66-17949

Wave propagation in Q band of n-type indium antimonide at low temperature as function of longitudinal magnetic field, noting helicon waves 07 p1101 A66-18200

Microwave emission from InSb in magnetic fields, explaining experimental results via modified traveling wave helicon model 07 p1104 A66-18219

Critical magnetic field curves of superconducting Ru isotopes and dependence of superconducting transition temperature on isotopic mass 07 p1109 A66-18443

Negative double derivative in vacuum magnetic field in terms of flux surfaces about magnetic axis of arbitrary shape 08 p1260 A66-18543

Instability initiating plasma transport across magnetic field in plasma discharge occurring after plasma decayed for some time, damping loss by addition of cold electrons to discharge 08 p1260 A66-18544

Lorentz force maximization in continuous-flow Hall current plasma accelerators, using either axial electric field and radial magnetic field or radial electric field and slanted magnetic field 08 p1263 A66-19154

Effective compensation of perturbation effects in three-turn helical magnetic field, using combinations of two-turn and perpendicular stationary magnetic fields 08 p1264 A66-19178

Smooth plasma polarization obtained by injecting plasma fluxes toward each other across magnetic field 08 p1264 A66-19179

Charged particle drift across magnetic field in plasma with oscillating electrons contained in metal chamber 08 p1264 A66-19181

Interaction of drift oscillations in homogeneous weakly turbulent plasma which tends to develop flute instability along magnetic field 08 p1264 A66-19274

Two-port network representations derived for general linear magnetic and electric

field transducers, showing energy conversion leading to nonlinear relationships applications to DC motor 08 p1224 A66-1928

Structure of plane shock wave of arbitrary force propagating across magnetic field 1 hot rarefied plasma 08 p1265 A66-1946

Interband Faraday effect in semiconductor in strong crossed electric and magnetic fields 08 p1277 A66-1961

Interaction of ideally conducting sphere of variable diameter and constant uniform magnetic field 08 p1186 A66-1976

Random nonuniformities effect on measurements of thermal emf and Nernst coefficient in strong magnetic field 09 p1412 A66-1998

Quantized vortices in thin superconductor in perpendicular magnetic field, noting that superconducting sample completely expelled flux 09 p1415 A66-2000

Magnetic field dependence of microwave surface impedance of superconducting aluminum 09 p1416 A66-2002

Effect of static magnetic field of millimeter wave absorption in superconducting aluminum at reduced temperature 09 p1416 A66-2002

Tunneling characteristics of superconducting energy gap of lead above critical magnetic field 09 p1416 A66-2002

Measurement of magnetic field produced by rotating singly and multiply-connected superconductors, formulating macroscopic electrodynamics of rotating body at low angular velocities 09 p1418 A66-2004

Magnetocaloric effects in high-field superconductor, noting magnetic field induced temperature variation effects of thermally isolated superconducting alloy specimen 09 p1420 A66-2005

Complete behavior of mixed state type I semiconductor in sufficiently large magnetic field 09 p1421 A66-2005

Transition curves of high field superconductor with A-15 structure, such as niobium-tin systems, for various transverse magnetic fields 09 p1422 A66-2006

Internal field and current distributions in superconducting NbSn disks of various geometries 09 p1423 A66-2006

Motion of magnetic flux in type I superconductor when applied magnetic field is changed to different value 09 p1423 A66-2006

Current density distribution in MPD arc jet exhaust measured, using Hall effect sensors [AIAA PAPER 66-116] 09 p1433 A66-2008

Stationary nonviscous plane flow of conducting plasma in narrow channel subject to transverse magnetic field and Hall effect using sectionized electrodes, noting boundary layer near anode 09 p1407 A66-2013

Kinetic equation for plasma in strong static magnetic field derived, using Bogoliubov method 09 p1408 A66-2037

Multiband quasi-classical wave functions of semiconductors in presence of constant external magnetic field 09 p1427 A66-20536

Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression loads 09 p1428 A66-20591

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals 09 p1429 A66-20597

Doubling frequency in ferrites in presence of constant magnetic field not equal to resonance field at frequency being doubled 09 p1348 A66-20791

Upper critical field for Ti-V alloys estimated, using combined Goodman model and Clogston concept 09 p1430 A66-20852

Plasma convective instability, discussing effect of axial density gradient on weakly ionized state 09 p1409 A66-20897

Magnetic and electric field and current density distributions in propagating current sheet [AIAA PAPER 66-200] 10 p1563 A66-21442

Ion propulsion by electrostatic acceleration of cesium ions subjected to transverse magnetic field, using negative space charge sheath [AIAA PAPER 66-256] 10 p1563 A66-21461

Electric arc interaction with argon flow

analyzed in crossed convective and magnetic fields
[ASME PAPER 65-WA/ENER-1]
10 p1563 A66-21503

Axial magnetic field effect on resonance of surface waves propagating along cylindrical plasma column
10 p1497 A66-21559

Local magnetic field, ion density flow and electric field in plasma measured downstream of theta-pinch accelerator in presence of uniform guide field
[AIAA PAPER 66-155]
10 p1565 A66-21684

Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field
10 p1569 A66-21991

Structure of magnetic field of toroidal stellarator with two-helix field
10 p1570 A66-21995

Toroidal system for adiabatic compression of plasma by magnetic field
10 p1570 A66-21996

Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave
10 p1570 A66-21998

Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse
10 p1571 A66-22011

Current oscillations and microwave emission in indium antimonide subjected to high applied parallel electric and magnetic fields at 77 degrees K
10 p1585 A66-22082

Coupling impedance of thin hollow electron beam injected into magnetic field and rippling at cyclotron frequency in cylindrical waveguide carrying E₀₁ mode
11 p1661 A66-22395

Plasma column equilibrium in toroidal chamber maintained by pressure of HF traveling magnetic field and DC magnetic field of longitudinal surface currents
11 p1743 A66-22442

Effect of electric field on LF oscillations of nonhomogeneous plasma contained by magnetic field, using geometrical optics approximation
11 p1744 A66-22449

Effect of cold plasma admixture on LF oscillation spectrum and stability of nonhomogeneous hot plasma contained by magnetic field
11 p1744 A66-22450

Faust 1, hardcore discharge stability experiment with final configuration obtained from radial inward collapse of plasma sheath from tube wall
11 p1744 A66-22451

Superconducting systems partitioned by thin barriers allow supercurrents to pass through, noting magnetic field penetration into barrier, AC supercurrents, structure in DC, current-voltage characteristics of barrier, etc
11 p1756 A66-22978

Design and operation of helium-neon laser noting radiation, frequency structure, power density, external magnetic field effect, application, etc
11 p1713 A66-22980

Space radiation shielding for space vehicles using electric and magnetic fields
11 p1778 A66-23166

Electric polarization of plasmod moving in curvilinear magnetic fields with different signs of curvature of lines of force
11 p1747 A66-23306

Longitudinal plasma oscillations excited in warm plasma column at microwave frequencies in presence of magnetic field, manifest themselves as absorption peaks near harmonics of electron cyclotron frequency
11 p1748 A66-23395

Behavior of system of infinite compressible fluids under gravity and magnetic field action, with MGD equations showing instability at plasma boundaries
11 p1748 A66-23418

Superconductivity variation in tantalum noting dependence of critical current, transition temperature and magnetic field on impurity concentration
12 p1927 A66-23856

Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters
12 p1921 A66-24209

Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs
12 p1929 A66-24451

Density of electron states and classical effective mass of current carriers in magnetic field for semiconductor with wurtzite-type lattice
12 p1930 A66-24457

Newtonian and relativistic analysis of orbits of electromagnetically neutral test particles in magnetic universe
12 p1914 A66-24567

Steady state structure and LF modes of infinitely long finite thickness cylindrical sheet of relativistic electrons in applied external field
12 p1873 A66-24576

Convective stability in plasma with horizontal magnetic fields, obtaining stability conditions
12 p1924 A66-24591

Electromagnetic wave propagation in infinite uniform plasma medium with and without magnetic field
12 p1924 A66-24732

Injected plasma spiral instability in transverse magnetic fields, demonstrating existence of rotating mode in semiconductor disk
12 p1931 A66-24803

Spiral shaped perturbations of plasmas in Corbino disk shaped semiconductors during application of axial magnetic and radial electric fields
12 p1931 A66-24804

Nonequilibrium effect in two-dimensional steady flow of ionizing gas past magnetized wall, calculating velocity distribution along wall
12 p1924 A66-24809

Long-wave electron oscillations excited by electron beam in rarefied plasma in presence of magnetic field
12 p1925 A66-24883

Charged particle excitation of weakly damped MHD waves in metal placed in magnetic field
12 p1825 A66-25021

Magnetization of synthetic filamentary superconductors, discussing sample preparation, critical field and transition temperature effect on flux jumping and magnetic hysteresis loop
13 p2157 A66-25037

RF sputtering of insulators, noting effects of auxiliary magnetic field, electrode size, oxygen concentration, substrate temperature and target material on thin dielectric film formation
13 p2157 A66-25039

Complex longitudinal microwave magnetoconductivity and permittivity of n-type silicon at 77 degrees K, noting influence of DC magnetic field
13 p2159 A66-25066

Ultrasonic observation of magnetization and flux jumping in superconducting niobium-zirconium alloy, analyzing field penetration effect on temperature dependent compressional wave absorption structure
13 p2159 A66-25071

Plasma density drops developing when injecting plasma into trap with combined field, noting rise of HF field and acceleration of fraction of plasma ions with each drop
13 p2137 A66-25104

Diffusion and lifetime of plasma charged particles in magnetic field covering instability, contraction, decay, recombination, etc
13 p2138 A66-25222

Spectral analysis of drift oscillations expanding crosswise in external magnetic field of inhomogeneous plasma, based on perturbation theory
13 p2139 A66-25385

Gas-filled closed ring-current surface with continuum of equilibrium figures in external magnetic field in case of surface tension
13 p2062 A66-25393

Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma, determining radiation spectrum range and total radiation energy
13 p2139 A66-25394

Potential representation of solution of equations for homogeneous and isotropic medium in presence of magnetic and temperature fields
13 p2195 A66-25401

Conductivity of ionized gas in DC discharge in argon for various magnetic field intensities
13 p2139 A66-25406

Ohm law in partially ionized inhomogeneous plasmas in presence of magnetic field derived, accounting for electron, ion and fluid motion
13 p2140 A66-25418

Excess velocity profiles in confined jets in presence of uniform transverse magnetic field, confirming affinity hypothesis
13 p2140 A66-25433

Wave propagation during gyroresonance interaction, noting nonlongitudinal characteristics of waves generated in

magnetosphere between beams of charged particles
13 p2072 A66-25462

MHD gyroscope with axial magnetic field, plotting design parameters, estimating performance, etc
13 p2078 A66-25513

Effect of magnetic field on field effect at germanium surface, determining rate of surface recombination
13 p2166 A66-25697

Decay of electron Langmuir waves in plasma in presence of magnetic field into electromagnetic waves
13 p2143 A66-25712

Nonadiabatic motion of particle in cusped magnetic field
13 p2143 A66-25715

Plasma stability in magnetic field where disordered energy of particles may be liberated so as to cause collective evolution of plasma, using formalism describing particle diffusion, noting distribution function role
13 p2144 A66-25719

Transverse magnetic field effect on toroidal discharge in strong axial magnetic field
13 p2144 A66-25722

Transverse magnetic field effect on drifting hot plasma resonance peaks, noting oscillation mechanism and application of successive moments of Boltzmann equation
13 p2144 A66-25725

Vlasov equation solution, using expansion in inverse powers of magnetic field
13 p2145 A66-25732

Tokamak-3 experimental thermonuclear device for analysis of toroidal quasi-stationary discharge in strong longitudinal magnetic field
13 p2146 A66-25737

Magnetic flux jumps in hard Nb₃Sn and NbZr superconductors in pulsed magnetic fields
13 p2168 A66-25969

Spectrum of electron excitations with small energies compared to critical temperature of superconducting transition in absence of magnetic field
13 p2168 A66-25978

Voltage drop in direction of current flow produced in superconducting alloys by current perpendicular to magnetic field explained by assuming Abrikosov filaments move under influence of Lorentz force
13 p2168 A66-26022

First order /Jeans/ stability analysis of infinite uniform medium pervaded by magnetic field
13 p2187 A66-26138

Photoluminescence and stimulated emission of gallium arsenide and indium antimonide obtained by optical pumping, noting effect of applied magnetic field on laser and diode emissions
13 p2099 A66-26182

Spontaneous and coherent emission from lead sulfide, telluride and selenide diode lasers in oriented magnetic field, determining band edge parameters from spin-split zero order Landau level transitions
13 p2100 A66-26185

Organic gas magnetically tuned laser spectroscopy, discussing resolution, absorption spectra and vibrational deactivation
13 p2100 A66-26197

Multiple quantum equations for mode amplitude and frequency determination for magnetic field-tuned gas optical maser
13 p2101 A66-26200

Values for contribution of core polarization to hyperfine structure of excited states of chromium compared theoretically and experimentally, extracting core contributions to magnetic field
13 p2135 A66-26268

Instrument for checking optical properties of uniform field magnetic spectrometers
13 p2083 A66-26550

Propagation of circularly polarized plane electromagnetic waves through helium plasma along direction of static magnetic field, determining electron density
13 p2154 A66-26672

Propagation of linear polarized electromagnetic waves through helium plasma along magnetic field, measuring phase and intensity of components of electric field
13 p2155 A66-26673

Interaction of boundary layer produced by vortex flow of viscous electrically conducting fluid over disk with axial magnetic field and relation to MHD generator and hydromagnetic capacitor
13 p2156 A66-26707

Alfven wave propagation in inhomogeneous magnetic fields satisfying magnetohydrostatic equation and allowing for electric currents solved, using differential equation
13 p2156 A66-26710

Cylindrical wave propagation across strong magnetic field in cold rarefied plasma analyzed, using Maxwell equations, for experiments on plasma pinch 14 p2339 A66-26781

Two types of plasma instability affecting phenomena of transverse diffusion in magnetic field and particle scattering across lines of force 14 p2339 A66-26815

Hall coefficient and thermal emf of electron gas of PbTe in strong magnetic field 14 p2358 A66-27088

MHD wave propagation along uniform magnetic field in cold plasma solved in terms of Jacobean elliptic functions 14 p2340 A66-27134

Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 14 p2340 A66-27148

Stabilization of gas conductor carrying HF current with aid of steady state magnetic field, noting MHD perturbations role 14 p2341 A66-27149

Stability limits and Gibbs free energy for type II superconductor in magnetic field as functional of ordering parameter, using Bardeen-Cooper-Schrieffer theory 14 p2360 A66-27193

Behavior of thin superconducting film in stationary magnetic field, deriving spectrum which is used to determine film specific heat 14 p2360 A66-27196

Microwave radiation from inductive posts of indium antimonide in broadband spectrum occurring when placed in DC magnetic field and pulsed to average electric field, results suggest solid state plasma instabilities 14 p2363 A66-27517

Excitation of magnetic field in spherical conductor for case where vortex concentration is assumed to be constant for entire core 14 p2287 A66-28097

Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanism and hyperfine relaxation frequency 14 p2367 A66-28234

Influence of microinhomogeneities under magnetic field on Nernst effect in InSb 14 p2367 A66-28241

Hydrogen atom beam characteristics, discussing signal power, generating frequency, radiation signal damping and hydrogen atom relaxation time 14 p2310 A66-28289

Channel flow of inviscid fluid with tensor conductivity considered when flow leaves transverse magnetic field, noting spatial distribution and ohmic power loss for application in MHD generators 14 p2346 A66-28302

Propagation of ionizing fronts across magnetic field, examining flow behind and ahead of front 14 p2347 A66-28305

Reflection, transmission and absorption coefficients of circularly polarized electromagnetic wave incident on plasma layer situated in stationary magnetic field 14 p2348 A66-28471

Stormer method solution of charged particle motion in field of magnetic dipole situated in external uniform magnetic field antiparallel to dipole magnetic moment vector 15 p2482 A66-28491

Ultrasonic-electromagnetic wave interaction in metals including resonance effects from waves arising in external magnetic field, determining Fermi levels 15 p2559 A66-28621

Tangential electrode forces on cathode and anode electrode for arc moving in magnetic field are not negligible in plasma driving 15 p2428 A66-28687

Calculation of electromagnetic field within two-dimensional plasma sheath with static magnetic field, noting effect of electron-cyclotron frequency on refractive index of medium 15 p2549 A66-28707

HF magnetic fields within homogeneous plasma sheath measured as function of plasma parameters and perpendicularly superimposed static magnetic field, noting resonance of electron cyclotron wave 15 p2549 A66-28708

Stability of pulsating plasma cylinder contained by time-dependent magnetic field described by MHD

equations 15 p2550 A66-28957

Transport properties in indium antimonide under magnetic field at microwave frequency, showing effect of angular frequency times relaxation time /of electrons and holes/ 15 p2566 A66-29393

Dielectric constant, permeability and conductivity of random media determining electric field, current, magnetic field, etc, assuming these quantities are time harmonic plane waves 15 p2451 A66-29619

Charge motion in Hf accelerator described by nonadiabatic approximation in magnetic field under action of polarized wave 15 p2553 A66-29639

Boundary of magnetic field of two arbitrary line currents immersed in plasma at uniform pressure 15 p2553 A66-29687

Two-dimensional flow of incompressible conducting viscous liquid in inlet region of straight channel under magnetic field, obtaining flow characteristics 15 p2553 A66-29742

Plasma flows past bodies in magnetic field, using plasma gun, analyzing downstream wake of ordinary hydrodynamic shock wave 15 p2553 A66-29743

Deuterium plasma jet injection into simple biconical cusped magnetic field, noting ion energy transfer to electrons and plasma potential variations 15 p2554 A66-29748

Energy from hydrogen molecule interaction with magnetic field and from hyperfine interaction expressed as products of irreducible spherical tensors 15 p2548 A66-29806

Magnetic effects on diffusion of ferromagnetic colloidal particles dispersed in current-carrying fluid medium, noting force effects on relaxation process 15 p2556 A66-29809

Transverse and axial magnetic field effects on gas lasers, deriving expression for atomic and macroscopic polarization, determining oscillation mode characteristics, frequency responses, etc 15 p2518 A66-29813

Ambipolar diffusion of plasma cloud imbedded in ionized gas with homogeneous magnetic field, assuming electric current is not vanishing 15 p2494 A66-30045

Polarized-neutron scattering by tri-vanadium silicide, identifying electronic susceptibility and modification in passing through superconducting transition 16 p2770 A66-30174

Mechanical forces on superconducting tin film in magnetic field, using torsion pendulum, noting conservative force association with currents in film 16 p2770 A66-30175

Quantum oscillations in damping of helicons propagating through degenerate semiconductor plasmas in presence of quantizing magnetic fields 16 p2770 A66-30185

Flow in viscous incompressible conducting fluid subjected to magnetic field in concentric cylinders rotating at different angular velocities, assuming planar motion, using differential equations 16 p2757 A66-30214

Plasma density drops developing when injecting plasma into trap with combined field, noting rise of HF field and acceleration of fraction of plasma ions with each drop 16 p2758 A66-30283

HF instabilities in plasma situated in superimposed magnetic and radial electric fields 16 p2758 A66-30293

Laminar boundary layer of low temperature plasma on isolator walls in channel of MHD generator in presence of transverse magnetic field 16 p2758 A66-30327

Ion beam velocity measurement, using radial electric and tangential magnetic field 16 p2701 A66-30347

Steady flow of highly rarefied ionized gas through channel with magnetic field solved by Monte Carlo method obtaining density, energies, wall shear stress, etc 16 p2759 A66-30371

Gravitational perturbation effect on MHD stability of helical magnetic field in spiral arm 16 p2800 A66-30652

Magnetic anisotropy of vacuum deposited permalloy films under applied magnetic field and obliquely incident molecular beam 16 p2773 A66-30686

Effect of annealing in magnetic field on structural and magnetic properties of thin films prepared from nickel alloy 16 p2774 A66-30695

Propagation characteristics of whistle mode radio signal over one-hop path from transmitter magnetic conjugate point to far-away receiver, noting transmission loss 16 p2652 A66-30710

Interplanetary plasma stream analysis using bistatic radar transmissions, considering wave propagation in presence of uniform magnetic field, stream velocity, Faraday rotation, etc 16 p2801 A66-30716

Intrinsic electric field of rarefied ion-electron plasma in external magnetic field and plasma stability, noting use of Galerkin method to determine plasma layer slippage 16 p2760 A66-30790

Magnetoplasma diffusion measurements in narrow discharge tube, using classical ambipolar diffusion model for weak magnetic fields 16 p2760 A66-30802

Magnetic shielding between superconducting niobium tin plates in transverse magnetic field, noting flux jumps degradation and elimination 16 p2779 A66-31091

Parametric resonance in plasma situated in magnetic field, noting oscillation, frequency stability, kinetic equations, electric field effect, etc 16 p2762 A66-31170

Perturbation of electron density at large distances from body at high velocity in collisionless plasma under steady external magnetic field 16 p2762 A66-31181

Energy dissipation due to deformation of magnetic field in compressible conducting medium near zero field lines 16 p2762 A66-31182

Three-dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two-dimensional flow 16 p2765 A66-31373

Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with concentrated inductance and capacitance, deriving line gain 16 p2765 A66-31374

Magnetic field influence on AC surface field effect in germanium resulting from change in sample conductance and not from change in surface barrier height 16 p2784 A66-31450

Hall voltages in silicon obtained by combining MOS transistor structure with Hall effect of material, noting experimental results, design criteria, etc 16 p2667 A66-31581

State density for highly doped semiconductor in magnetic field, obtaining results at near Fermi level energies and at bottom of conduction band 16 p2788 A66-31779

Efficiency criterion for semiconductors, using equations for flux density of electric current and energy for isotropic semiconductor in absence of magnetic field 16 p2789 A66-31790

Hexapole magnetic field for guiding accelerated plasma injected from inductive conical theta pinch gun 17 p2962 A66-31824

Effect of injected plasma on curvilinear magnetic field, noting polarization effect 17 p2962 A66-31825

Interaction of modulated high current pulsed electron beams with plasma in longitudinal magnetic field 17 p2963 A66-31826

Interaction of linear plasma column with alternating quadrupole magnetic field 17 p2963 A66-31827

Magnetoresistance effect in semiconductors applied to microwave power measurement, noting multiplying action between electric and magnetic field components of wave 17 p2885 A66-32288

Anisotropy of electrical resistance of indium in magnetic field shown to be nearly absent, confirming absence of open Fermi surface 17 p2977 A66-32315

Gas laser emission in weak longitudinal magnetic field assuming Zeeman splitting is much smaller than Doppler linewidth 17 p2934 A66-32319

Model of reentry plasma layer consisting of magnetic line source in ground plane,

- etermining plasma temperature effect, computing radiation pattern of far-zone field 17 p2875 A66-32387
- Computer-derived contour plots of electric and magnetic fields for acoustic electromagnetic plane wave pulse incident in wedge 17 p2875 A66-32390
- HF flute unstable oscillations occurring when low temperature plasma is added to high temperature one, finding frequency and growth rate are of order of cyclotron harmonic frequency 17 p2966 A66-32423
- Plasma motion and confinement in octupole magnetic field, noting electron temperature density and field fluctuation 17 p2966 A66-32428
- Additional measurements from electron-magnetic field interactions and power limitations in coaxial filament and anode geometry in electron bombardment heated thruster 17 p2990 A66-32462
- Proton trajectories in static dipole magnetic field, noting effects in radiation belt proton pitch angle oscillation at cyclotron frequency, etc 17 p2993 A66-32519
- Charged particle distribution, in hollow cylinder shaped positive plasma column during diffusion and helical instability in longitudinal magnetic field 17 p2969 A66-32548
- Velocity of arc wind measured for various magnetic fields and distances above arc path, using temperature probe and dragmeter 17 p2969 A66-32639
- Magnetic instabilities in form of reversed field flux annihilation pulses in grossly inhomogeneous superconductor 17 p2980 A66-32642
- Cylindrical electron beam behavior in axial, nonrotationally increasing magnetic field, noting compression, percentage scalloping, etc 17 p2887 A66-32696
- Finite-difference calculation of MHD flow of conducting fluid past circular cylinder in transverse magnetic field based on Navier-Stokes equation 17 p2971 A66-32862
- MHD flow of electroconductive fluid in transverse magnetic field 17 p2971 A66-32863
- Wave propagation in rarified plasma under action of Coriolis force, Hall current and self-gravitation, noting LF coupling rotation effects, etc 17 p2973 A66-33000
- Strong axial magnetic field effect on constant current discharge in continuous-duty ion laser, noting plasma diffusion, charged particle density and laser output decrease 17 p2936 A66-33117
- Interband Faraday effect in semiconductors in strong crossed electric and magnetic fields 17 p2983 A66-33133
- High-field superconductors, noting role of defects in pinning, magnetization, critical currents, applications in solenoids, etc 17 p2985 A66-33156
- Alternating current thermionic power mode with magnetic regeneration 18 p3163 A66-33813
- Atomic Zeeman patterns using strong pulsed magnetic fields for electronic transitions for Si, Cu, C, O, Ca, Mg and B 18 p3137 A66-33990
- Transverse magnetic field effects on heat transfer in turbulent flow of mercury in circular iron tube 18 p3145 A66-34109
- Upper limit on fractional binding energy of nonrotating magnetoturbulent supermassive star and for mass which can reach radiative equilibrium 18 p3229 A66-34141
- Cylinder magnetization in axisymmetric magnetic field, noting calculation of critical current in conductor 18 p3155 A66-34160
- Mariner II data analysis on effect of magnetic field on radiation and high energy particles in interplanetary space and solar plasma 18 p3167 A66-34334
- Reconnection velocity of oppositely directed field lines of two adjacent magnetic field regions in idealized plasma configuration 18 p3168 A66-34345
- Solar particle propagation in magnetic fields revealing anisotropies in proton flux analyzed from Pioneer VI space probe data 18 p3170 A66-34536
- Transverse and longitudinal oscillations in low density relativistic plasma in constant magnetic field 18 p3147 A66-34725
- Atmospheric argon Poiseuille plasma arc instability in axial magnetic field examined, noting frequency and shapes of stability curves 18 p3149 A66-34916
- Stability of swirling flow of viscous conducting fluid in presence of circular magnetic field 18 p3150 A66-34934
- Instability of HF electron oscillations in plasma flows with nonuniform velocity profile along lines of force of external confining magnetic field 18 p3150 A66-34968
- Structure of magnetic field of toroidal stellarator with two-helix field 18 p3150 A66-34972
- Toroidal system for adiabatic compression of plasma by magnetic field 18 p3150 A66-34973
- Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 18 p3151 A66-34975
- Plasma instability in HF electric and constant magnetic field for sufficiently low pressure 18 p3151 A66-35067
- Coaxial plasma gun performance in longitudinal magnetic field, noting conditions of generation of single plasmoid 18 p3151 A66-35070
- Stability of flexible conductor in longitudinal magnetic field, using scalar potential to determine disturbed state 18 p3152 A66-35081
- Drift effect on diffusion spreading of plasma inhomogeneities in magnetic field, deriving expression for Fourier component potential and magnetic field perturbations 19 p3344 A66-35265
- Operation of electron image time dissector framing camera achieving time resolution by multiple reflection in crossed magnetic and electric fields in electron image storage device 19 p3353 A66-35313
- Alternating current losses in type II superconductor, showing dependence on magnitude and direction of local magnetic field and transport current 19 p3439 A66-35728
- Critical temperatures and critical magnetic fields determined for superposed normal and superconducting films, noting dependence on metal thickness 19 p3443 A66-36003
- Alfven waves in bismuth for propagation along magnetic field, noting dielectric constant variation with frequency, effect on real part of refractive index, relaxation time analysis, etc 19 p3443 A66-36006
- Minimum electric resistivity of chromium in antiferromagnetic state shows no disappearance in longitudinal magnetic field 19 p3444 A66-36071
- Temperature and magnetic field effect on flux pinning by superconducting Sn precipitates in lead-indium matrix, noting occurrence of magnetic hysteresis 19 p3444 A66-36077
- Nonlinear effects for immersion of positive plasma column in longitudinal magnetic field near critical strength, noting occurrence of resonance in received signal 19 p3407 A66-36078
- Hot plasma probed with atomic beam in presence of intense self-radiation flux and magnetic field impulse scattering 19 p3407 A66-36095
- Ferromagnetic fluid developing body force under magnetic field influence, noting changes in internal pressure, velocity, etc, applied to attitude control devices, accelerometers, etc 19 p3445 A66-36178
- Hot cathode-gas discharge in equipotential space of magnetic field, noting formation of plasma column with opposite charge and discharge instability 19 p3408 A66-36275
- MHD stabilization of open-ended systems including minimum-magnetic-field configurations in plasma stabilization 19 p3411 A66-36495
- Finite Larmor radius, inhomogeneity of magnetic field and particle collision effects in plasma instabilities analysis, noting open mirror defect 19 p3412 A66-36496
- Instabilities in plasma produced by magnetron source diffusing along static magnetic field, examining effect on particle diffusion perpendicular to magnetic field 19 p3416 A66-36521
- Drift-wave instability in weakly inhomogeneous fully ionized plasma confined in strong magnetic field in Q machine 19 p3416 A66-36523
- Interaction of dense plasma with HF field of magnetic wave traveling along toroidal discharge chamber, noting connection to nonlinear effects 19 p3416 A66-36525
- Fluid equations used in describing electron and ion motion perpendicular to field lines in slab of plasma supported against gravitational field by sheared magnetic field 19 p3417 A66-36527
- Drift instabilities calculated in beta limit, examining influence on electron cyclotron harmonic waves, Larmor radius flute, structure of infinite plasma in magnetic field, etc 19 p3418 A66-36535
- Interchange instabilities at general Meyer and Schmidt surfaces in plasma pinch model, noting magnetic field role 19 p3418 A66-36537
- Plasma confinement experiments with electron injection parallel to cusped magnetic field axis in nonadiabatic regime 19 p3422 A66-36549
- Current-carrying toroidal plasma column behavior in strong varying longitudinal magnetic field of Tokamak TM-1 19 p3428 A66-36577
- Plastic deformation in hollow metal cylinder by rapidly varying axial magnetic field, calculating time dependence assuming substance is rigid and plastic 19 p3475 A66-36602
- Magnetic torquing of spinning satellites, deriving equations for motion of symmetrical rigid body about center of mass in homogeneous magnetic field 19 p3471 A66-36692
- Synchrotron theory to calculate energy content of radio sources as function of relativistic electrons and magnetic flux 20 p3645 A66-36961
- Interaction of decaying waves in magnetoelectric plasma when wave vectors are oriented along magnetic field 20 p3512 A66-37138
- Ginzburg-Landau equations for local superconductors in magnetic field starting from equations of coupled electron-phonon system with treatment restricted to temperatures near critical temperature 20 p3619 A66-37641
- Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 20 p3619 A66-37683
- Density of electron states and classical effective mass of current carriers in magnetic field for semiconductor with wurtzite-type lattice 20 p3620 A66-37689
- Degradation of continuous argon laser performance when positioned in axial magnetic field, noting role of quenching, radiation trapping and excitation mechanisms 20 p3579 A66-37779
- Gas pressure effect on excitation of 4.38-ev level in Pb during hollow cathode discharge in magnetic field 20 p3579 A66-37780
- Deflection of plasma jet generated by coaxial gun and injected along axis of quadrupole magnetic field eliminates neutral gas, producing complete ionization 20 p3610 A66-38058
- Magnetic field, microscopic particle distribution function, plasma instabilities and wave-particle interactions of solar wind 20 p3632 A66-38061
- Seminfinite flow of axisymmetric flow of viscous thermoelectric gas around blunt body with ablation shield, noting magnetic field effect 20 p3611 A66-38108
- Electromagnetic and gas dynamic effects on magnetic compression of plasma loop 20 p3611 A66-38120
- Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression loads 20 p3622 A66-38124
- Pressure dependent critical temperature and magnetic field of superconducting transitions in metals 20 p3622 A66-38131
- Correlation of magnetic fields and energetic electrons on IMP I satellite, noting depression in geomagnetic tail region, electron fluxes and diamagnetic effect 20 p3633 A66-38201

Synchrotron radiation from high-energy electrons spiraling in magnetic field, noting parameter effects and computation of numerical results 20 p3644 A66-38348

Potentials for cylindrical warm plasmas, noting anisotropic effects caused by external magnetic field 20 p3611 A66-38362

Third moment equation derived from Boltzmann-Vlasov equation for wave propagation in plasmas with very strong magnetic field used instead of state equation 20 p3521 A66-38363

Critical magnetic field and transition temperature measurements of superconducting indium in porous glass, using LF mutual inductance technique 21 p3796 A66-38549

Shubnikov-de Haas effect for transport properties of electron gas in magnetic field, noting oscillatory parts of thermal and electric conductivities 21 p3776 A66-38632

Temperature dependence of mixed-state thermoconductivity of type II superconducting In-Pb alloys in magnetic field 21 p3797 A66-38751

Langmuir electron oscillation behavior in inhomogeneous plasma in magnetic field when applied at angle to oscillation axis 21 p3781 A66-39012

Particle acceleration by plane wave along magnetic field increased by self-induced resonance, analyzing radiation effect on particle acceleration 21 p3782 A66-39017

Electron beam interaction with plasma in magnetic field, obtaining stronger interaction when beam has initial modulation 21 p3782 A66-39018

Potential difference and electric polarization field measurement in plasma moving in combined toroidal and helical magnetic field of stellarator type 21 p3789 A66-39062

Metal strength in pulsed magnetic fields at low temperatures, noting resistance of copper wire as function of number of pulses 21 p3750 A66-39064

Quenching and hysteresis effects between Zeeman oscillations on single axial mode observed in near-zero magnetic fields for short planar laser 21 p3747 A66-39116

Diffusion of antiparallel bias magnetic field during initial stages of theta pinch explained as loss of trapped flux 21 p3791 A66-39179

Flux flow in type II superconductors, measuring critical current, longitudinal and transverse voltages for varied orientation of magnetic field 21 p3802 A66-39201

Nonlinear theory of fast-particle motion in helical toroidal magnetic fields, using averaging techniques to obtain adiabatic invariants describing nonlinear oscillatory motions 21 p3792 A66-39295

AC losses and magnetic field aberrations associated with use of high-field superconducting wire in adiabatic demagnetization apparatus 21 p3804 A66-39381

Stationary nonviscous plane flow of conducting plasma in narrow channel subject to transverse magnetic field and Hall effect, using sectionized electrodes, noting boundary layer near anode 21 p3793 A66-39407

Megagauss magnetic field generation by explosives and related experiments - Conference, Frascati, Italy, September 1965 21 p3773 A66-39501

High density thermonuclear plasma confinement by multimegagauss magnetic fields 21 p3793 A66-39508

Solid state experiments in pulsed magnetic fields extended to explosively generated high field region 21 p3804 A66-39511

Multimegagauss fields obtained by cylindrical explosive compression applied to plasma compression, using slotted liner and unslotted resistive cylinder methods 21 p3794 A66-39512

Resistivity and Hall coefficient of Sb doped Ge at He temperatures measured as function of magnetic field and temperature to determine high field effects on impurity conduction 21 p3805 A66-39579

Energy loss of charged particles during passage through weakly turbulent plasma in magnetic field with HF oscillations 22 p3952 A66-39751

Plasma instability in HF electric field perpendicular to given magnetic field under low pressures 22 p3952 A66-39754

Equations for ionized positive plasma column of gas discharge between infinite dielectric planes under oblique magnetic field with component in direction of external electric field 22 p3953 A66-39756

Radial current density distribution in homopolar, noting deviation of magnetic field and nature of current distribution around anode 22 p3953 A66-39757

Bending effect of spectral lines in plasma created by rotating HF dipole in quasi-steady magnetic field 22 p3953 A66-39761

Shock wave propagation in plasma across magnetic field, solving problem via two-component hydrodynamic equation 22 p3953 A66-39765

Doubling frequency in ferrites in presence of constant magnetic field not equal to resonance field at frequency being doubled 22 p3874 A66-39850

Ion mass spectrometry of D layer, using magnetic fields and cyclotron resonance principle 22 p3907 A66-39956

Simultaneous existence /triple resonance/ of spin, helical and acoustic waves in ferromagnetic conductor in strong magnetic field 22 p3964 A66-40310

Incoherent scattering of radio waves by plasma extended to include effects of unequal ion and electron temperatures and magnetic field 22 p3867 A66-40550

Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters 22 p3956 A66-40573

Hall coefficient and thermal emf of electron gas of PbTe in strong magnetic field 22 p3967 A66-40844

Explosive nature of chromospheric flares, effect of magnetic fields and thermoconductivity calculated, using mathematical model 22 p3975 A66-40852

Kinetics of nonuniform generation of longitudinal plasma waves by transverse wave beam with narrow spectrum, noting effect of magnetic field 22 p3958 A66-40931

Plasmoid density, electron temperature and radius variation during propagation through magnetic field, using electric and magnetic probes 22 p3958 A66-40932

Nonsymmetric oscillations in plasma in magnetic field arising from electron beam passage through plasma, deriving dispersion equation 22 p3958 A66-40939

Systems with toroidal magnetic field increasing toward periphery, considering method using skin effect of semiconductors 22 p3959 A66-40941

Electrostatic oscillations in dielectric, semiconductor and plasma in presence and absence of external magnetic field 22 p3968 A66-40947

Long wave electron oscillations excited by electron beam in rarefied plasma in presence of magnetic field 23 p4099 A66-41090

Surface magnetoeconcentration in intrinsic-conductivity semiconductors, noting space-charge region characteristics dependence on surrounding fields 23 p4110 A66-41131

Voltage oscillations as function of applied magnetic field in weak contacts between superconductors in resistive region when applying currents above critical value 23 p4111 A66-41251

Radiative equilibrium of electron gas in magnetic field based on quantized particle motion and perturbation theory 23 p4101 A66-41365

Magnetization measurements of Pb-Tl cylinders in axial magnetic field with superconductivity confined to superconducting surface sheath 23 p4113 A66-41370

Monograph on kinetic theory of plasmas, deriving state equation, Maxwell equation for plasma-magnetic field interaction and boundary layer heat transfer expressions 23 p4102 A66-41400

Dispersion relation for hydromagnetic waves in infinite collisionless plasma in static magnetic field, using numerical solutions 23 p4103 A66-41488

Second term obtained in asymptotic series for second adiabatic invariant of charged

particle motion in static magnetic field and found to vanish at mirror points 23 p4103 A66-41491

Integral ratios for calculating diffusion rate of magnetic field into wall-cooled plasma 23 p4106 A66-41716

Velocity field generated by current flow between electrodes immersed in conducting fluid permeated by uniform magnetic field 23 p4108 A66-42034

Viscous electrically conducting liquid oscillating in laminar regime between parallel planes when applying magnetic field normal to planes and motion direction 23 p4108 A66-42047

Radiation characteristics of filament with triangular current distribution situated along axis of magnetized plasma column, noting guided and space waves excited by filament 24 p4240 A66-42291

Plasma physics reviews, Volume 2, plasma confinement including structure of magnetic fields, plasma equilibrium, MHD stability and charged particles in EM field 24 p4241 A66-42328

Static and quasi-stationary magnetic fields and possibility of providing stable plasma confinement, with emphasis on toroid fields 24 p4236 A66-42329

Linearly polarized incident electromagnetic waves propagated along static magnetic field through plasma in region of electron cyclotron frequency, noting wave modes behavior 24 p4242 A66-42400

Critical fields of thin superconducting films determined by specular reflection of electrons from surfaces 24 p4256 A66-42531

Current measuring device for EHV transmission line, obtaining instantaneous magnetic field by gauging Faraday rotation angle of laser beam in flint glass rod 24 p4222 A66-42556

Plane laminar jet of incompressible conducting fluid propagating homogeneous magnetic field at magnetic Reynolds number 24 p4196 A66-42872

Propagation of weak shock wave in heterogeneous conducting medium in presence of magnetic field 24 p4238 A66-42874

Magnetic field above surface of conductor with flaws that emerge at surface when direct current is passed through 24 p4218 A66-42897

Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 24 p4244 A66-42968

Stabilization of gas conductor carrying HF current with aid of steady state magnetic field, noting MHD perturbations 24 p4244 A66-42969

Magnetic dipole moment in spark produced by focusing laser radiation 24 p4226 A66-43055

Stability limits and Gibbs free energy for type II superconductor in magnetic field as functional of ordering parameter, using Bardeen-Cooper-Schrieffer theory 24 p4259 A66-43091

Behavior of thin superconducting film in stationary magnetic field, deriving spectrum which is used to determine film specific heat 24 p4259 A66-43094

Dissipative mechanism in cylindrical plasma confined by axial magnetic field noting coefficients, linear transport relations, equations of change, Chapman-Enskog expansion and anomalous effects 24 p4246 A66-43112

Magnetic field rapidly reversed in shorted superconducting coil by subjecting coil to increasing external reverse field 24 p4216 A66-43213

Scherzer theorem on aperture aberration extended to monochromatic nonrelativistic system with electrostatic or magnetic quadrupole fields with common planes of optical symmetry 24 p4239 A66-43215

Rapid transfer of magnetic energy via exploding foils, noting inductive storage 24 p4239 A66-43217

MAGNETIC FIELD COIL

Magnetic storage, discussing mechanical and thermal energy conversion into magnetic field energy and electromagnetic energy transfer 05 p0717 A66-15335

magnetic-pulse working of metals based on
 rent surge in coil inducing magnetic field
 generate electric current in metal articles
 and coil 06 p0888 A66-17073
 miniature Rogowski coil probes for direct
 measurement of current density
 distributions in transient
 plasmas 07 p1037 A66-18494
 magnetic storage, discussing mechanical
 thermal energy conversion into
 magnetic field energy and electromagnetic
 energy transfer 15 p2543 A66-29982
 hard superconductors as generators of
 long magnetic fields to accelerate plasma
 energy converters and plasma propulsion
 systems of spacecraft 17 p2981 A66-32898
 closed toroidal magnetic field
 configurations satisfying stability criterion
 low-pressure plasma of
 minimum-B 19 p3413 A66-36504
MAGNETIC FIELD DISTURBANCE
 flux-gate magnetometer device for
 determining attitude of satellite or rocket
 vehicle, considering magnet perturbation due
 to solar wind and solar
 storms 01 p0069 A66-10786
 auroral type of riometer absorption and
 magnetic disturbances for stations situated
 at different longitudes in auroral
 zone 03 p0364 A66-12660
 helicons in n-type silicon and germanium,
 calculating collective modes of electrons in
 external magnetic field from frequency and
 wavelength-dependent conductivity
 absorber 06 p0923 A66-16275
 cosmic ray diffusion, discussing existence
 and influence of radial magnetic
 field 06 p0947 A66-16574
 rotating non-Newtonian fluid, discussing
 stabilizing and destabilizing effect of
 regular magnetic field for cross-viscous
 parameter variation 07 p1019 A66-17259
 upper atmospheric parameters that control
 time electron density distributions in F-1
 region determined with use of N/h/
 profiles 09 p1372 A66-20369
 reconnection of magnetic lines of force to
 form closed loops during transient phase of
 formation of spheres and cylinders from
 jet 12 p1868 A66-23857
 relation between magnetic activity and
 atmospheric disturbances in F-2 layer studied
 on basis of 30-year data 12 p1870 A66-24285
 magnetic disturbances at midlatitudes,
 tracing origin from locally generated
 currents 12 p1871 A66-24292
 correlation between plasma and ion
 density fluctuations as detected by magnetic
 probe, spectral emission techniques and
 Langmuir probe 13 p2142 A66-25703
 auroral occurrence rate at zenith as
 function of latitude for magnetically quiet
 and magnetically disturbed
 periods 15 p2486 A66-29092
 solar magnetic field observations,
 discussing fine structure, twisting, field
 rotation, etc 17 p2998 A66-32031
 spread F and ionospheric F region
 regularities relation to magnetic field
 segment, discussing radio star
 occultations 17 p2923 A66-33433
 sunburst decreases associated with
 magnetic events not definitely accepted as
 form sudden
 commencements 20 p3632 A66-38071
 upper atmospheric parameters that control
 time electron density distributions in F-1
 region determined with use of N/h/
 profiles 20 p3636 A66-38235
 acceleration processes of outer zone
 ions investigated, using Kellogg
 hypothesis of radiation belt formation
 through magnetic disturbances where third
 adiabatic invariant is
 violated 20 p3640 A66-38322
MAGNETIC FIELD INTENSITY
 nonlinear scattering effect of Langmuir
 oscillations on electrons of plasma located in
 long magnetic field 01 p0115 A66-11055
 total vector components of solar magnetic
 field strength determined from nomograms
 on computer 04 p0577 A66-13855
 helical wave excitation in weakly ionized
 cylindrical plasma discussing experimental
 techniques, apparatus and
 results 04 p0552 A66-13986
 one-dimensional plasma flow in crossed
 electric and magnetic fields covering

subsonic, transonic and supersonic
 flow 05 p0720 A66-14508
 Rocket measurements discussing electron
 and proton flux, energy spectra and angular
 distribution in high
 altitudes 05 p0676 A66-14776
 Splitting of electron paramagnetic
 resonance lines of zinc-tungstate crystals,
 discussing parameters and experimental
 technique 05 p0738 A66-15356
 Properties of solar and geophysical
 phenomena analyzed, concluding that
 magnetic field of corpuscular fluxes has
 forceless structure 05 p0753 A66-15392
 Longitudinal and transverse voltages in
 superconductors, noting Hall effect,
 resistivity and functional relation to applied
 magnetic field 06 p0940 A66-17162
 Traveling wave MHD converter basic
 equations, accounting for magnetic potential
 difference in iron via generalized boundary
 conditions 07 p0991 A66-17242
 Intensity of polarized light transmitted
 through laser amplifier and linear polarizer,
 as function of axial magnetic field
 strength 07 p1041 A66-17292
 Mathematical analysis of steady flow of
 incompressible viscous fluid in presence of
 magnetic field, taking flow as momentum
 source 07 p1089 A66-17960
 Microwave emission from InSb, measuring
 energy generated at low temperatures and
 intense electric and magnetic
 fields 07 p1103 A66-18218
 Oscillators in local cylindrically symmetric
 and uniform magnetic
 fields 07 p1104 A66-18222
 Plasma formation during unstable electron
 beam passage through air, argon and
 hydrogen in magnetic field, determining
 plasma density, oscillation frequency and
 amplitude 08 p1283 A66-19176
 Transition region magnetic field and polar
 magnetic disturbances, comparing Explorer
 XII data with ground measurements from
 Arctic observatories 08 p1218 A66-19399
 Magnetophonon fluctuation of thermal emf
 of n-InSb in longitudinal magnetic
 field 09 p1412 A66-19985
 Effect of quantizing magnetic field on
 frequency spectrum and relative noise value
 associated with impurity recombination and
 generation in
 semiconductor 09 p1342 A66-19992
 Dependence of step-like structure of volt-
 ampere characteristics of superconducting
 Sn-I-Sn tunnel junction as function of
 temperature, magnetic field and junction
 dimensions 09 p1428 A66-20593
 Geomagnetic field measurements by
 Cosmos satellites at 49 degrees latitude,
 including typical magnetograms of magnetic
 field intensity 10 p1526 A66-21051
 Variation in coercivity of magnetization
 loops of multilayer films of nickel as
 function of rate of rise in applied magnetic
 field 10 p1575 A66-21412
 Superconductivity of composite of fine
 niobium wire in copper, measuring critical
 temperature, transverse magnetic field,
 current density, etc 10 p1575 A66-21535
 Kadomtsev instability characteristics in
 terms of onset and spectra of strong
 oscillations in positive column discharge
 [AIAA PAPER 66-157] 10 p1565 A66-21685
 Motion of magnetic moment of thin
 ferromagnetic films in rotating magnetic
 field, determining signals of first and
 second harmonics as function of field
 intensity 11 p1752 A66-22800
 Dependence of emission intensity of gas
 laser on longitudinal and transverse
 magnetic fields, using simplified
 model 12 p1891 A66-24885
 Sudden appearances and disappearances of
 filaments and changes in thermoconductivity
 of chromospheric plasma due to variation in
 magnetic field strength, noting
 reestablishment of thermal
 equilibrium 13 p2180 A66-25413
 Dependence of Zeeman beat frequency on
 interferometer tuning in single-mode He-Ne
 laser with various gas pressures and
 magnetic field strengths 13 p2101 A66-26201
 Effect of longitudinal magnetic field on
 output power of gas laser operating in IR
 spectrum, noting gas-mixture pressure in
 discharge tube role 14 p2307 A66-27156

Generalization of measurement of vertical
 and horizontal components of terrestrial
 magnetic field intensity with proton
 magnetometer 14 p2295 A66-27624
 Electromagnetic waves in isotropic plasma
 layer and in plasma layer in magnetic field,
 determining second harmonics of wave and
 obtaining nonlinear dispersion
 equation 14 p2348 A66-28470
 Dynamic dissipation of magnetic field,
 examining mechanism by which magnetic
 energy is converted directly into fast
 particle energy 15 p2576 A66-29132
 Spherical blast waves in weak dipole
 magnetic field, calculating distortion by
 using motion equations, noting similarity to
 supernovae explosions 15 p2479 A66-29304
 Spectral distribution of recombination
 radiation caused by
 electroluminescence /EML/ in
 indium antimonide 15 p2568 A66-29726
 O-shaped magnetic systems using
 unsaturated steel magnetic circuit to
 produce strong uniform magnetic fields for
 MHD machines 16 p2637 A66-31375
 Sputnik III data application to plotting of
 total magnetic field intensity chart above
 U.S.S.R., using spherical harmonic
 analysis 19 p3345 A66-35290
 Nonuniform plasma stability in magnetic
 field gradient 19 p3417 A66-36530
 Dependence of step-like structure of volt-
 ampere characteristics of superconducting
 Sn-I-Sn tunnel junction as function of
 temperature, magnetic field and junction
 dimensions 20 p3622 A66-38126
 Magnetic intensity distribution, polarity
 and macrostructure of solar and
 interplanetary magnetic
 fields 20 p3635 A66-38218
 Performance of three-component
 superconducting solenoid, noting optimal
 alloy composition 21 p3804 A66-39318
 Dependence of emission intensity of gas
 laser on longitudinal and transverse
 magnetic fields, using simplified
 model 23 p4076 A66-41092
 Nonlinear dependence of current in
 electric field in thin semiconductor film in
 quantizing magnetic field 24 p4256 A66-42525
 Effect of longitudinal magnetic field on
 output power of gas laser operating in IR
 spectrum, noting gas-mixture pressure in
 discharge tube 24 p4225 A66-42977
 Conformal mapping to determine shape and
 field distribution of shim used to modify
 field in air gap between pole faces of
 electromagnet 24 p4239 A66-43211
MAGNETIC FILM
SA FERROMAGNETIC FILM
 Microwave acoustic waves generated by
 ferromagnetic resonance and spin-wave
 resonance modes in magnetic
 film 03 p0331 A66-12409
 Magnetoelastic interaction in thin
 permalloy films at X-band noting phonon
 excitation by spin waves, spin wave
 excitation by phonons and re-excitation of
 spin waves by phonons 04 p0561 A66-13726
 Hall effect B-H loop recorder for thin
 magnetic films 08 p1224 A66-19297
 Angular and magnetic dispersion of
 anisotropy and its effect on behavior of thin
 magnetic films, allowing for magnetostatic
 interactions 08 p1278 A66-19743
 Superimposed normal superconducting
 films used in conjunction with theory to
 investigate nature and magnitude of
 electron-electron interaction in normal
 metal 10 p1572 A66-21174
 Compositional variations in thin evaporated
 nickel-iron films 10 p1577 A66-21555
 Thin ferromagnetic film physics - All-Union
 Symposium, Irkutsk, U.S.S.R., July
 1964 11 p1751 A66-22796
 Amplitudes and linewidth of discrete
 spectrum of natural frequencies of thin
 magnetic films, noting motion equations,
 dispersion ratio and resonance
 peaks 11 p1752 A66-22799
 Anisotropy of films deposited on
 cylindrical substrate 11 p1754 A66-22812
 Electron and nuclear magnetic system
 interaction in ferromagnetic crystals, effect
 on basic characteristics of nuclear magnetic
 resonance in
 ferromagnetics 11 p1754 A66-22813
 Coercive force for Bloch wall displacement

of thin magnetic films coupled with stripe domain neon-iron films 11 p1758 A66-23359

Approximate solution of micromagnetic equations for Neel-type domain wall in multiple films 14 p2351 A66-26887

Domain wall mobility effect on multilayer magnetic thin films consisting of permalloy layers separated by silicon oxide layers 14 p2351 A66-26888

Multilayer composite magnetic thin films used to constrain domain walls to localized region 14 p2351 A66-26889

Thin magnetic film with helical anisotropy 14 p2351 A66-26890

Energy and width of domain walls in double films 14 p2351 A66-26891

Uniaxial anisotropy field measurement for magnetic annealing of permalloy films 14 p2353 A66-26903

Magnetic hysteresis and switching property of manganese-bismuth thin magnetic films epitaxially grown by vapor deposition technique 14 p2355 A66-26913

Parallel and perpendicular magnetic transitions of superconducting lead films and foils determined from transverse magnetization and AC susceptibility measurements 16 p2770 A66-30190

Temperature dependences of coercive force, hysteresis loops and domain structure of thin iron-gadolinium alloy films 16 p2774 A66-30698

Surface roughness effects in hydromagnetically lubricated externally pressurized bearings and hydromagnetic squeeze film between two circular plates [ASME PAPER 66-LUBS-9] 17 p2931 A66-33182

MAGNETIC FORMING

Magnetomotive forming noting strain rate effect on material deformation, applications to aerospace technology and magnetohydraulic vs electrohydraulic forming [ASME PAPER 66-MD-19] 21 p3742 A66-38480

MAGNETIC INDUCTION

Induction in cylinder by field of current-carry leads, calculating input parameters and ponderomotive force 03 p0396 A66-12285

Ginzburg-Landau theory for fluxoid structure in superconducting film in presence of perpendicular magnetic field 03 p0409 A66-12604

Piezomagneto-resistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 04 p0569 A66-14358

Electromagnetic interaction between moving conducting ring and magnetic field inducing voltage in search coil 07 p1091 A66-18416

Induction method for measuring electrical conductivity of steady plasma flow 08 p1262 A66-18858

Induction synchronous MGD generator fed with jet of varying-conductivity working medium 10 p1484 A66-21313

Electromagnetic induction in conducting sphere rotating in transverse field, extending results for steady state to unsteady rotation, determining magnetic moment 12 p1871 A66-24298

Heating of small plasmoids impinging on axisymmetric magnetic field 13 p2152 A66-26512

Piezomagneto-resistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 14 p2368 A66-28256

Steady emf induced by flux line motion in superconductors 16 p2768 A66-30136

Ponderomotive force acting on conducting cylinder in moving magnetic field of cylindrical inductor 16 p2765 A66-31408

Increase in inductance effect on acceleration of plasma cluster in external magnetic field 23 p4100 A66-41139

Plane homogeneous wave scattering by cylindrical plasma column with glass wall placed in vacuum, noting axial drift velocity and resonance peaks 23 p4101 A66-41366

MAGNETIC INDUCTION PROBE

Magnetic storage, discussing mechanical and thermal energy conversion into magnetic field energy and electromagnetic energy transfer 05 p0717 A66-15335

Magnetic storage, discussing mechanical

and thermal energy conversion into magnetic field energy and electromagnetic energy transfer 15 p2543 A66-29982

MAGNETIC INSTRUMENT

SA ELECTROMAGNETIC INSTRUMENT

Hall effect B-H loop recorder for thin magnetic films 08 p1224 A66-19297

Design and operation of telemagnetograph for visual observation of geomagnetic field 08 p1228 A66-19799

Pulse repetition rate of magnetic pulse generators increased by transforming generator power supply frequency, using multipliers 09 p1352 A66-20301

Flutter, time base error and jitter analyzed in multichannel magnetic recorder, noting measurement techniques 13 p2079 A66-25662

Fringe field double focusing magnetic spectrograph, noting resolution, solid angle, energy range, astigmatic lens, etc 13 p2083 A66-26551

Explosive driven magnetic generator applied to investigate electric, optical and elastic properties of various substances, plasma physics and charged particle accelerator 16 p2637 A66-31585

Design and operation of telemagnetograph for visual observation of geomagnetic field 21 p3736 A66-38795

Construction method for pulse generator in digital magnetic devices and current generators in magnetic deflecting system 23 p4046 A66-41521

MAGNETIC MATERIAL

Geometrical acoustics in magnetic materials, examining control of direction and shape of beam by introducing inhomogeneities in medium 01 p0120 A66-10508

Loaded linewidth measured for given value of circuit coupling, determining unloaded linewidth, noting ferromagnetic parametric amplification and harmonic generation 01 p0039 A66-10528

Wide tuning range L-band traveling wave maser noting slow wave structure and isolator material 03 p0377 A66-12441

Resonator made of magnetic materials for tuning molecular generator by Zeeman modulation 09 p1357 A66-20792

Magnetic material and field application to solid state electronics, noting amplification of microwaves, magnetoelastic waves, application of microwave ferrite components, low temperature circulators, etc 13 p2165 A66-25520

Magnetism and magnetic materials - IEEE and AIP Conference, San Francisco, November 1965 14 p2349 A66-26875

Handbook of microwave ferrite materials 16 p2787 A66-31752

Resonator made of magnetic materials for tuning molecular generator by Zeeman modulation 22 p3931 A66-39851

MAGNETIC MEASUREMENT

SA ELECTROMAGNETIC MEASUREMENT

Microwave permeability and permittivity measurement, knowing resonant frequency of unperturbed cavity and distribution of electric and magnetic field 01 p0025 A66-10527

Modified Z-variometer design and operation 02 p0227 A66-11348

Measured aerodynamic characteristics of cone-cylinder-cone model using magnetic balance system, discussing techniques, errors and data 03 p0315 A66-12773

Total vector modulus measurements from absolute field element observations and proton magnetometer compared 04 p0516 A66-13866

Rocket measurements to investigate vertical current distribution of electrojet over India to correlate magnetic profiles with simultaneous electron density measurements 05 p0688 A66-14794

Instrument measuring field index of DC magnetic fields, particularly circular accelerators using two identical vibrating measuring coils 06 p0883 A66-16946

Skin effect in semiconducting cylinder analyzed for electric and magnetic cases 07 p1001 A66-17350

Kelvin-Helmholtz instability in fully ionized plasma in magnetic field, assuming variable streaming velocity 07 p1089 A66-17961

Data analysis from Explorer XIV satellite,

noting magnetic field measurements in tail of geomagnetic cavity 07 p1029 A66-18086

Comparison of magnetic observations aboard Zaria and aeromagnetic surveying according to magnet plan 08 p1214 A66-19040

Geomagnetic and ionospheric observations of 1964 expedition of Zaria 08 p1214 A66-19041

Digital simulation of magnetic hysteresis, using analytic approximation of magnetic curves by seventh degree polynomials 08 p1187 A66-19513

Magnetic measurements and exchange interactions in thin anisotropic ferromagnetic films 09 p1410 A66-19905

Calorimetric and magnetic measurements of dilute titanium alloys with other transition elements, distinguishing between homogeneous and nonhomogeneous transitions 09 p1419 A66-20045

Simultaneous measurements of magnetic field and positive ion fluxes in Earth magnetosphere from Elektron II satellite 09 p1444 A66-21025

Earth magnetosphere measurements in radiation belt region from Elektron II satellite 09 p1444 A66-21026

Earth magnetic field measurements with three-component ferroprobe magnetometers on Elektron II and Elektron III satellites 09 p1378 A66-21027

Single sample chamber determining magnetothermodynamic characteristics including magnetic moment, heat capacity in magnetic fields, entropy change, free energy, etc 13 p2083 A66-26558

Faraday effect method for measuring magnetic fields of extremely short duration and device for observing slightly luminous phenomena 14 p2290 A66-26824

Magnetic torque and hysteresis loop measurements, examining exchange anisotropy in sulfided Fe films 14 p2354 A66-26907

Device for visible recording of H component of geomagnetic field 19 p3352 A66-35275

Magnetic fields at various depths of solar atmosphere measured by Crimean Astrophysical Observatory double magnetograph 20 p3646 A66-37029

Mossbauer, X-ray and magnetic measurements of wustite structural and magnetic decomposition properties 20 p3623 A66-38391

MAGNETIC MEMORY

Information storage density reduction techniques for magnetic recording tape 01 p0034 A66-11132

Measured characteristic curves for evaluation of memory devices, specifically toroidal core 10 p1508 A66-21414

Crystalline structure and magnetic properties of single-crystal films of iron-nickel alloys, for application as memory elements of computers 11 p1753 A66-22807

High-speed memory units for digital computer, discussing ferrite, semiconductor and thin magnetic or ducting film memories 19 p3322 A66-36814

Operational reliability of superconducting storage element of memory matrix operating in symmetric recording regime under noise signal influence 19 p3310 A66-36815

System comparison of magnetic matrix memory procedure 19 p3311 A66-36816

Magnetic memory units and memory storage unit component design for digital computer 21 p3708 A66-39626

Automatic, multichannel system for data recording and processing obtained in studies of ionospheric structural inhomogeneities, containing magnetic-tape memory and device for digital tape memory and device for digital computer input 22 p3920 A66-40772

Ferrite core memory system organization for lower cost and higher performance, noting diode decoded drive system 24 p4177 A66-43182

MAGNETIC MIRROR

Confinement of slow ions by magnetic mirror trap in plasma with positive potential 01 p0109 A66-10258

Ion escape from magnetic mirror trap due to nonlinear stage of plasma instability related to loss cone 01 p0109 A66-10261

Extension of measurements in Van Allen belt concerning particle equator crossing at

ven pitch angle between magnetic mirrors, suggesting repulsing force from
uator 01 p0132 A66-10495
Electron beam generating plasma in tube
igned with magnetic field, measuring
asma density, beam velocity distribution
d RF noise spectrum 02 p0266 A66-11442
stability and energy decrease caused by
asma captured by collision in magnetic
irror bottle 03 p0403 A66-12967
Mirrors composed of multilayer stacks of
electric films and attaining high
reflectance over extended spectral
ange 07 p1079 A66-17290
Mirror ratio is principal parameter
ntrolling heating of plasma by electron
am in magnetic mirror
stem 07 p1090 A66-18260
Comparison between auroral effects and
perimentally observed electron leakage
om magnetic mirror with electron
celeration 09 p1373 A66-20471
Inhomogeneous thick plasma layer formed
ove metallic surface, effect on reflection
d absorption of electromagnetic
ves 09 p1347 A66-20788
Mirror ratio is principal parameter
ntrolling heating of plasma by electron
am in magnetic mirror
stem 09 p1409 A66-20904
Boundary condition effects in magnetic
irror compression experiment, noting
pendence of transition from unstable to
asi-stable plasma containment on density
d lifetime 10 p1568 A66-21824
ariational formulation for equilibrium and
ability of plasma with particle orbits
cribed by guiding center
proximation 12 p1923 A66-24569
F flute instability of collisionless plasma
urved mirror-type magnetic
ld 13 p2143 A66-25718
onfinement of slow ions by magnetic
irror trap in plasma with positive
ential 13 p2148 A66-25975
on escape from magnetic mirror trap due
nonlinear stage of plasma instability

Pitch-angle dependence of first-order
Fermi acceleration of particles trapped
between shock front and moving magnetic
mirror 21 p3776 A66-39564
End loss mechanism of slow theta pinch
plasma analyzed, using mirror coil in which
plasma did not drift to
wall 21 p3795 A66-39582
Inhomogeneous thick plasma layer formed
above metallic surface, effect on reflection
and absorption of electromagnetic
waves 22 p3862 A66-39847
Instabilities resulting in loss of energetic
electrons and fast electrons analyzed in
electron cyclotron plasma confined by
magnetic mirrors 23 p4103 A66-41490
High energy neutral particle injection into
mirror quadrupole cusp magnetic well,
Lorentz ionization and trapped particle
trajectories 23 p4103 A66-41493
Equilibrium distribution function of
particles in phase space applicable to
collisionless rarefied plasma confined by
magnetic mirror, using first integrals of
motion 24 p4242 A66-42399
Stability criterion for plasma with
anisotropic pressure in magnetic mirror
system with stabilizing
rods 24 p4242 A66-42403
Existence and topography of stationary
points of square of magnetic field intensity
determined by magnetic mirror system with
minimum B field 24 p4242 A66-42404
Magnetic mirror trapping of hot-electron
plasma heated in quartz discharge
tube 24 p4243 A66-42730
Time of confinement of hot plasma in
magnetic bottle without touching material
walls, examining instability types, pinch
configurations, etc 24 p4246 A66-43113
MAGNETIC MOMENT
Magnetic moment of charged particle as
function of initial particle motion, particle
distance from axis of field and asymptotic
behavior of field 02 p0268 A66-11775
Magnetic moment of plasmoid impinging on
uniform longitudinal magnetic field as
function of particle
density 02 p0268 A66-11776
Low temperature excitation spectrum for
ferro- and antiferromagnets with large
crystalline field splittings 05 p0741 A66-15867
Westward drift of secular variations in
inclination and alteration of terrestrial
magnetic moment estimated from
archeomagnetic data 07 p1027 A66-17307
Energy transfer mechanism in solar
corpuscular flux interaction with terrestrial
magnetosphere 08 p1285 A66-19786
Friction and inertia fields induced by
electromagnetic effects arising in motion of
hard magnetic moment in thin circular
film 11 p1753 A66-22808
Electromagnetic induction in conducting
sphere rotating in transverse field,
extending results for steady state to
unsteady rotation, determining magnetic
moment 12 p1871 A66-24298
Compensation and decompensation in
ferromagnetic alloys viewed as electric
interaction of spins 12 p1930 A66-24684
Pressure effect on magnetic moment of
solids, noting magnetic transition point,
ferromagnetic anomalies,
etc 15 p2565 A66-29067
Superconductivity destruction by magnetic
field in type II superconductors with
nonzero demagnetizing factor, especially for
case of ellipsoidal body 18 p3154 A66-33942
Optical pumping of rubidium atoms,
describing design and operation of
equipment, concepts of resonance, atomic
orientation, nuclear magnetic moments,
etc 18 p3120 A66-35028
Optical pumping of rubidium atoms,
treating oriented atoms as magnetized
macroscopic gyroscope 18 p3120 A66-35029
Broken symmetry densities within current
algebra arising in magnetic moment ratio,
renormalization constants and unitary
symmetry correction
investigations 20 p3606 A66-38293
Energy transfer mechanism in solar
corpuscular flux interaction with terrestrial
magnetosphere 21 p3809 A66-38782

MAGNETIC PISTON

End wall insulator ablation effect on performance of magnetic piston shock tubes, discussing transient heating and degassing of adsorbed material 08 p1260 A66-18526

Plasma convergence, structure and heating by collisionless cylindrical shock waves, discussing wave front 19 p3424 A66-36560

MAGNETIC PROBE

Magnetic probes of inductive loop type for plasma measurements 04 p0521 A66-14190

HF magnetic probes for measurement of transient magnetic fields in linear pitch devices and Helmholtz coil calibration 07 p1037 A66-18491

Compensation magnetic probe and plasmascopy study of plasmoid motion in uniform axisymmetrical magnetic field 08 p1264 A66-19182

Magnetic field measurement in shock tube when plasma moves with respect to probe 08 p1226 A66-19695

Probing technique for magnetic field in TA 2000 discharge device, noting plasma instabilities effect on oscillation 13 p2137 A66-25122

Magnetic probing of plasma column motion in cylindrical and toroidal discharge vessels 13 p2144 A66-25723

Nondestructive testing specifications noting equipment, personnel and acceptance criterias, radiographic ultrasonic penetrant and magnetic particle specifications, etc 15 p2508 A66-28814

Hall devices and multipliers, characteristics and types 16 p2666 A66-31574

Plasmoid in shock tube with electrical discharge, measuring pressure, velocity and conductivity with magnetic probe 20 p3611 A66-38119

MAGNETIC PROPERTY

SA HALL EFFECT

SA HYSTERESIS

SA INDUCTION

Precipitation in 17-7 PH stainless steels analyzed, measuring saturation magnetization, Youngs modulus and hardness as functions of aging time for material in condition T 01 p0086 A66-10412

Surface impedance of ferromagnetic metals at frequencies approaching ferromagnetic resonance, considering spatial dispersion of magnetic permeability 01 p0123 A66-10721

Magnetic properties of ideal gas of charged bosons and fermions as affected by dimensionality n of containing space 03 p0409 A66-12630

Electrical and magnetic properties of cobalt telluride /gamma phase/ to verify semiconductive character 04 p0559 A66-13479

Magnetic and electrical transport properties of superconducting whiskers and platelets of NbC/NbN 04 p0559 A66-13716

Audiofrequency hysteresis loops and initial permeabilities of single-crystal yttrium iron garnet cores with annealing and silicon substitution 04 p0562 A66-13750

Crystal structure and allotropic transformation of cobalt and thermal, thermodynamic, electrical and magnetic properties 08 p1240 A66-18961

Electrical and magnetic properties of ten synthesized perovskite compounds of complex composition 08 p1273 A66-19268

Magnetic transitions in terbium and dysprosium as affected by hydrostatic pressure at various high pressures and low temperatures 08 p1274 A66-19361

Magnetic field effect on energy gap of superconductor 09 p1416 A66-20028

Magnetic properties of quantized vortices in superconducting films determined by extension of Abrikosov model 09 p1422 A66-20062

Stripline cavity resonator for low microwave frequency measurements of ferrites 12 p1881 A66-24156

Time decrease of initial permeability in manganese zinc ferrite, noting increase in magnetic loss due to increasing disaccommodation 13 p2166 A66-25881

Magnetic field-temperature relations of type II superconductor Nb upon adiabatic magnetization of superconducting state 14 p2350 A66-26877

Structural effect on DC magnetic behavior of high temperature

alloys

Magnetic and semiconducting properties of solid solutions of LaMnO sub 3 and LaCoO sub 3 14 p2311 A66-26884

Structural properties correlated with magnetic characteristics of annealed electrodeposited permalloy 14 p2353 A66-26900

Magnetic properties of vacuum deposited iron nickel films 14 p2354 A66-26908

Static magnetic properties of zero-magnetostrictive permalloy films during vacuum deposition and substrate heating and cooling period 14 p2355 A66-26910

Magnetic and electrical properties of intermetallic compound FeRh, discussing preparation of thin films 14 p2355 A66-26911

Magnetic characteristics of miniature reed relays, noting greater sensitivity over other types of sealed relays 15 p2460 A66-28991

Magnetic properties of thin Permalloy films prepared in glow and arc discharge in inert gas 16 p2774 A66-30692

Cobalt doping effect on magnetic properties of nickel thin films prepared by chemical precipitation 16 p2774 A66-30694

Apparatus for analysis and preparation of magnetic properties of thin ferromagnetic films in vacuo, noting hysteresis loop, thermal evaporation, etc 16 p2661 A66-30697

Temperature dependence of magnetization and resistivity in SHF magnesium-aluminum ferrite 16 p2786 A66-31677

Magnetic properties of lattice imperfections in lithium fluoride, potassium chloride and sodium chloride single crystals 18 p3157 A66-34499

Magnetic properties and structure of ferromagnetic films obtained on single-crystal sodium chloride substrates heated to various temperatures during spray coating 19 p3438 A66-35497

Effect of electric and magnetic properties of titanium oxide explained through Matsubara and Yokota theory extended to finite temperatures 19 p3444 A66-36175

High saturation core material magnetic behavior, noting structural instability accompanied by deteriorating magnetic properties at high temperatures 20 p3583 A66-37258

Magnetic, electric and SHF properties of oxides and solid solutions of bivalent europium from 1.6 to 300 degrees K 20 p3617 A66-37478

Surface impedance of ferromagnetic metals at frequencies approaching ferromagnetic resonance, considering spatial dispersion of magnetic permeability 20 p3619 A66-37659

Superconducting properties of Nb-Zr alloy, discussing resistive transition, ultrasonic attenuation, flux jump magnetic instabilities, etc 21 p3796 A66-38550

Pauli paramagnetism effect on magnetic properties of high field superconductors, noting spin-orbit scattering 21 p3797 A66-38557

Magnetic properties of ferromagnetic zinc-zirconium alloy between 120 degrees and 0.1 degrees K, suggesting possible indication of superconductivity 21 p3801 A66-39000

Electric and magnetic properties in TaC systems and dependency on C-to-Ta ratio 22 p3934 A66-40091

Equiatomic rare earth germanide magnetic structural characteristics 24 p4252 A66-42353

Electrical properties of barium plumbate noting conductivity, Hall field, thermoelectromotive force, magnetization, etc 24 p4253 A66-42382

Geometry and magnetic parameters effect on magnetically tunable filters consisting of rectangular waveguide and containing thin magnetized ferrite slab against one wall 24 p4186 A66-43173

Latching phase modulator in standard rectangular waveguide, using square loop magnetic properties of toroidal ferrite materials to obtain digital increments of reciprocal phase shift 24 p4186 A66-43174

MAGNETIC PUMPING

Two models /for collisional heating and collisionless transit-time heating/ of cylindrical plasma heated by oscillating magnetic field 07 p1086 A66-17652

Energy losses at input of superconducting coil in type of magnetic flux pump designed by H. L. Laquer 08 p1268 A66-18676

Electromagnetic field equations for plane linear induction pump with secondary boundary effects 17 p2972 A66-32872

Resistance and heat transfer coefficient relation theoretically determined for flow of electrically conducting liquid in magnetic field 20 p3679 A66-37614

Magnetic pumping heating rate for plasma, using conversion of organized energy into random energy by charged particle collisions 23 p4100 A66-41250

Superconductors application to large turbogenerators for power generation and medium-capacity machines for aviation and other transport 23 p4114 A66-41742

MAGNETIC RELAXATION

Magnetic relaxation and high temperature effect of Bloch wall stabilization in ferrite Mn-Fe 15 p2565 A66-29052

MAGNETIC RESONANCE

SA FERROMAGNETIC RESONANCE

SA NUCLEAR MAGNETIC RESONANCE

SA PARAMAGNETIC RESONANCE

SA PROTON MAGNETIC RESONANCE

Quantum RF physics text covering magnetic resonance theory, electron paramagnetic resonance, nuclear magnetic resonances, two- and three-level masers, RF gas spectroscopy and ammonia oscillator 01 p0108 A66-10954

Magnetic resonance applied to semiconductors, determining electron density at nucleus sites and kinetic energy temperature of hot electrons in indium antimonide 04 p0563 A66-14030

Barrat theory of multiple scattering of magnetic resonance radiation, accounting for vapor dispersion and photon propagation time 05 p0697 A66-15172

Transverse optical pumping of mercury: isotope to show existence of new magnetic resonance lines 08 p1232 A66-18646

Theory of spin-magnetophonon resonance in semiconductor 09 p1425 A66-20190

Excited state of cesium lifetime determined from double magnetic resonance experiments 09 p1406 A66-20944

Excited state of cesium lifetime determined from double magnetic resonance experiments 15 p2543 A66-28532

Single cavity microwave laser amplifier analysis, determining gain, bandwidth, noise, cavity Q-factor effect and width of magnetic resonance line 20 p3578 A66-37583

Light absorption by optically pumped atoms undergoing magnetic resonance, noting modulation amplitudes and modulation frequency limitation for primary interaction 22 p3930 A66-39807

Optical pumping on He 4 atom in metastable level, examining modulation of light in absorption in longitudinal and transverse beams and obtaining magnetic resonance curves 22 p3930 A66-39808

Magnetic resonance in He 3 ground states examined through interaction with metastable atoms in gas discharge, observing transfer of transverse magnetization by collision 22 p3931 A66-39809

Ground state resonance, noting absence of Doppler broadening of signals in forward scattered light 22 p3931 A66-39810

MAGNETIC RIGIDITY

Inter calibration of cosmic ray neutron monitors at nine European sea level stations and deduction of daily latitude effect in 1963 01 p0132 A66-10321

Compression of geomagnetic field effect on cosmic radiation at cut-off rigidities and asymptotic directions of radiation incidence 02 p0283 A66-12111

Effect of currents, distributed over envelope surface formed by revolution of magnetic dipole force line about its axis, on cosmic ray cut-off 02 p0284 A66-12128

Upper limiting rigidity of solar diurnal variation of cosmic ray primaries in free space determined by neutron monitors at sea level and meson telescopes underground 03 p0423 A66-13178

Quantitative comparison of primary cosmic radiation rigidity spectrum during current solar cycle 07 p1124 A66-18001

Changes in rigidity spectra of primary cosmic radiation during Forbush decreases and 27-day variations 07 p1125 A66-18003

Time variation of primary cosmic ray

rigidity spectrum over solar cycle derived by measuring latitude effect of nucleonic components 07 p1127 A66-18016
Cosmic ray threshold rigidities determined by trajectory calculations, noting disagreements between hemispheric data 07 p1128 A66-18017
Empirical and experimental modulation functions for cosmic ray intensity variation, showing rigidity dependence of intensity changes 07 p1128 A66-18018
Vertical cut-off rigidities of cosmic rays, using sixth degree simulation of geomagnetic field 07 p1128 A66-18019
Rigidity and energy spectra of primary cosmic rays in nondisturbance and disturbance periods during past 12 years 07 p1128 A66-18021
Sea level cosmic ray intensity and threshold rigidity around South African magnetic anomaly, noting Quenby and Wenk measurements 07 p1129 A66-18022
Intensity variation of nucleonic component of atmospheric cosmic radiation, geomagnetic threshold rigidity and calculation of cosmic ray equator 08 p1284 A66-19398
Geomagnetic cut-off rigidity variations calculated relative to disturbed field models represented by equatorial current 09 p1438 A66-20210
Expected rigidity spectrum of variations in framework of dynamic piston model of Forbush effect 09 p1438 A66-20213
Parameters of dynamic modulation determined from measurements of proton and alpha particle spectra, used in cosmic-ray modulation in interplanetary space 11 p1762 A66-22411
Effect of equatorial current ring distributed over globe on geomagnetic cut-off rigidity of cosmic rays 12 p1941 A66-24173
Compression of geomagnetic field effect on cosmic radiation at cut-off rigidities and asymptotic directions of radiation incidence 14 p2377 A66-28070
Effect of currents, distributed over envelope surface formed by revolution of magnetic dipole force line about axis, on cosmic ray cut-off rigidity 14 p2377 A66-28085
Changes in cosmic-ray rigidity spectrum during cosmic ray storms, showing correlation with magnitudes of geomagnetic disturbances 15 p2574 A66-28900
Cosmic ray storms analyzed for changes in effective integral rigidity spectrum of nucleon component, noting time dependency of spectrum exponent 16 p2793 A66-30229
Error correction of recent work on modulation of primary spectrum during solar cycle for rigidities between 4 and 12 billion volts 17 p2994 A66-32536
Differential rigidity spectra model of nuclear component of primary cosmic radiation under various environmental influences 17 p2994 A66-33431
Long-term modulation of cosmic ray intensity in interplanetary medium 18 p3180 A66-34774
Rigidity spectra of primary cosmic rays in past solar cycle from observations of balloon-borne ion chambers and GM counters 18 p3180 A66-34775
Rigidity dependence of intensity variation of nucleonic component during solar cycle 18 p3181 A66-34778
Spherical harmonic analysis to obtain latitude dependence of diurnal variations and changes with time during Forbush decrease 18 p3183 A66-34792
Cosmic ray rigidity spectra during solar rotations 18 p3184 A66-34795
Integral rigidity spectrum of primary cosmic rays, considering solar active days 18 p3186 A66-34807
Flux and East-West asymmetry of primary electrons at geomagnetic rigidity cut-off of about 4.5 gv 18 p3187 A66-34817
Low rigidity end of differential power spectra of proton and helium components of primary cosmic radiation, considering ionization loss and interaction with interstellar hydrogen 18 p3189 A66-34830
Multiplicity distribution measured in IGY ship-borne neutron monitor, noting dependence on latitude and geomagnetic

threshold rigidity 18 p3194 A66-34858
Latitude and altitude survey in North America made by road transport carrying neutron monitor, meson telescope, mercury barometer, etc 18 p3198 A66-34879
Degree of agreement between cosmic ray cut-offs derived from McIlwain parameter and those from numerical integration of motion equations 18 p3198 A66-34880
Threshold rigidities for vertical incident cosmic ray particles derived, using trajectory computations by higher-order simulation of geomagnetic field 18 p3198 A66-34881
Effect of geomagnetic cavity field on cosmic ray threshold rigidity, using model of cavity field, finding cavity shape produces amplitude in diurnal variation of cosmic ray intensity 18 p3198 A66-34882
Effect of compression and expansion of magnetosphere on cut-off rigidities and position of impact zones 18 p3198 A66-34884
Cosmic ray threshold rigidities examined, discussing penumbral and threshold perturbation effects produced by superimposing external magnetic fields on dipole model 18 p3096 A66-35227
Geomagnetic cut-off rigidities determined for cosmic ray particles arriving at top of atmosphere over Hyderabad as function of zenith and azimuthal angles 19 p3454 A66-36642
Cosmic ray modulations in solar system and in interstellar space, presenting graphs of rigidity spectra of protons and helium 22 p3973 A66-40524
MAGNETIC SHIELDING
SA ELECTROMAGNETIC SHIELDING
Space vehicle shielding with two concentric toroidal superconducting coils providing magnetic field for deflection of charged particles 13 p2190 A66-25262
Electronic analog magnetic shield simulator /Magsim/ for producing radiation-protective region around space vehicles 16 p2681 A66-30610
Magnetic shielding between superconducting niobium tin plates in transverse magnetic field, noting flux jumps degradation and elimination 16 p2779 A66-31091
Solar radiation protection based on charged particle motion through magnetic field of solenoid [AIAA PAPER 66-512] 16 p2811 A66-31481
Ideal and perturbed focusing conditions effect on spread of immersed flow beam 17 p2971 A66-32821
MAGNETIC SIGNAL
Gain saturation of ruby maser by nearby interfering signal derived from motion equation of density 09 p1385 A66-19933
Infrasound frequency spectrum transformation using magnetic signal recording and reproduction 21 p3713 A66-39322
MAGNETIC SPECTROSCOPY
Adsorption of CO radicals on three types of magnesium oxide using EPR techniques, noting spectrum of adsorbed radical, bonding, etc 12 p1916 A66-23619
Durham horizontal spectrograph measurements of charge ratio of cosmic ray muons at sea level 15 p2588 A66-29574
Momentum measurements of muons using solid iron magnet spectrograph 15 p2546 A66-29578
MAGNETIC STORM
SA GEOMAGNETIC STORM
Penetration of interplanetary plasma into magnetosphere, connected to aurorae and magnetic storms, noting that plasma need not behave like magnetofluid 07 p1138 A66-18081
Sudden commencement of magnetic storms in outer space caused by oblique MHD shock wave from corpuscular stream 08 p1290 A66-19032
Radiation belts theorized as resulting from penetration of charged particles into magnetosphere, accelerated by reversed phase of magnetic storm 09 p1444 A66-21022
Variations in cosmic ray intensity recorded at world network of stations during consecutive magnetic storms, noting changes in corpuscular fluxes, interplanetary medium, etc 12 p1941 A66-24167

MAGNETIC SURVEY

Structure of main geomagnetic field over Eurasia, noting difference in spectra over oceans and continents 12 p1870 A66-24280

MAGNETIC SUSCEPTIBILITY

Thermal and magnetic properties of GeTe and PbTe semiconductors containing transition elements in solution 01 p0127 A66-11079
Location and nature of singularity of Ising square lattice susceptibility, using Pade approximation based on Clapp spin-spin correlation function 02 p0263 A66-11887
Hall effect on hafnium paramagnetic susceptibility at room and cryogenic temperature 05 p0699 A66-14687
Refinement of Lewis formula for reversible susceptibility along hard axis of thin permalloy film to account for effect of small amplitude magnetic ripple in film plane 08 p1274 A66-19347
Temperature dependence of Ginzburg-Landau coefficient in type I superconductors 09 p1420 A66-20048
Field penetration in superconductors with surface layers, describing LF low field AC susceptibility measurements in swept DC fields 09 p1420 A66-20049
Low temperature measurement of magnetic susceptibility of CdS single crystals with manganese impurity, considering effects of antiferromagnetic exchange 09 p1424 A66-20078
Resonance carrier scattering and spin-magnetophonon interaction effect on semiconductor magnetic susceptibility 09 p1427 A66-20200
SHF susceptibility of ferromagnetic thin films for constant magnetic fields far from electromagnetic resonance 11 p1753 A66-22809
Low temperature behavior of manganese germanate compared to manganese titanate, showing magnetic susceptibility 12 p1931 A66-24811
Magnetic semiconductor efficiency determined from product of majority carrier mobility and effective magnetic permeability 13 p2163 A66-25420
Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763
Inherent LF losses of superconducting surface sheath 16 p2769 A66-30167
Low temperature resistivity, magnetic susceptibility and superconductive transition point in La containing rare earth impurities 17 p2982 A66-32972
Calculating magnetic shielding constants of diatomic HF molecules, based on gauge-invariant atomic orbitals 22 p3950 A66-39919
HF magnetic susceptibility of ferrites with two magnetic sublattices 23 p4110 A66-41132
Magnetic transformation and effect of plastic strain on shear modulus of Fe-Cr-Ni alloys 24 p4227 A66-42310
MAGNETIC SUSPENSION
Magnetic suspension for aerodynamic wind tunnel models in Mach 8 airstream controlled in five degrees of freedom 09 p1364 A66-20664
ONERA research on use of magnetic suspension systems in hypersonic wind tunnels and measurement of base pressure and heat transfer rates 16 p2683 A66-31699
Liquid oxygen converter designed to provide oxygen for space flight, using combined forces of surface tension and paramagnetism [AICE PREPRINT 24C] 22 p3886 A66-39898
MAGNETIC SWITCHING
Logic circuit construction problems in multicore magnetic elements with magnetic flow switching 17 p2878 A66-33495
MAGNETIC TAPE
Stress relaxation of wound reel of magnetic tape, assuming homogeneous and isotropic material, exhibits instantaneous and delayed elasticity, creep under shear and elastic behavior under hydrostatic stress [ASME PAPER 65-WA/APM-8] 05 p0689 A66-15430
Stress relaxation of wound reel of magnetic tape, assuming homogeneous and isotropic material, exhibits instantaneous and delayed elasticity, creep under shear and elastic behavior under hydrostatic stress

[ASME PAPER 65-WA/APM-8]

10 p1539 A66-21481
Properties of metallic recording media in terms of physical properties of medium and geometrical dimensions of recording system 13 p2082 A66-26295

MAGNETIC TAPE RECORDER

Maintenance recordings of aircraft parameters, discussing signal conditioning, economics and application

[ISA PREPRINT 1.3-1-65] 05 p0794 A66-15499
High data rate radar cross section measurement system for high angular precision and direct digital recording on magnetic tape 10 p1501 A66-21621

Automatic handling of information by analog recording on magnetic tape for control, monitoring and maintenance of aircraft 12 p1880 A66-23817

Digital transducers utilizing magnetic recording 16 p2704 A66-30539

Frequency analysis of simplex signals using closed loop magnetic tape recorder 17 p2925 A66-32312

Magnetic tape and photographic film recording from video output of digital TV spectrometer system 23 p4069 A66-41667

MAGNETIC TRANSDUCER

Quantitative theory of magnetic anisotropy torque transducers in reasonable accord with measured data 07 p1030 A66-17218

High speed ferrimagnetic microtransducer capable of embedding in wide variety of materials and sensors to explore stress characteristics and pressure profiles 20 p3555 A66-36851

Ferromagnetic transducer operation principles, noting dimension optimization, energy efficiency, etc 21 p3741 A66-39505

MAGNETIC TRAP

Interaction of polarized plasma flows in uniform transverse magnetic field with imposed magnetic field induced by longitudinal current-carrying rods 01 p0114 A66-10701

Equilibrium configuration of plasma confined by magnetic field on kinetic equations of particle drift without considering collisions 02 p0268 A66-11781

Excitation of collisionless shock waves in rarefied plasma, examining neutron radiation and charged particle flux at chamber walls and magnetic field structure in plasma volume 04 p0557 A66-14431

Confinement and stability of plasma in magnetic wells, examining pressure plasma and particle motion 05 p0726 A66-15252

Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 10 p1570 A66-22000

Interaction of polarized plasma flows in uniform transverse magnetic field with imposed magnetic field induced by longitudinal current-carrying rods 11 p1747 A66-23303

Cosmic ray variations analysis based on IGY and IGC data, discussing diurnal variations, cosmic ray burst, Forbush effect and existence of interplanetary magnetic field and of solar magnetic traps 12 p1940 A66-24161

Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 13 p2139 A66-25335

Magnetic field with stopper-type configuration which increases with radius for plasma confinement in adiabatic trap 13 p2144 A66-25724

Charged particles in nonadiabatic magnetic traps, noting behavior in mirror machine with spatially modulated central field, using model with square wave modulation 13 p2145 A66-25727

Plasma confinement in adiabatic trap formed by combined magnetic field, noting lifetime and instability 13 p2146 A66-25738

Transverse plasma injection into magnetic field, noting plasma-particle collision 13 p2151 A66-26507

Spatial velocity distribution of plasma in transverse magnetic field 13 p2151 A66-26508

Instabilities in plasma trapped by transverse magnetic field 13 p2151 A66-26509

Plasma interacting with transverse magnetic field, noting polarization and field changes 13 p2151 A66-26510

Plasmoid collapse in growing external magnetic fields, noting conversion of field energy to ion energy 13 p2152 A66-26511

Density of plasmoid interacting with axisymmetric magnetic field investigated by thermocouple 13 p2152 A66-26514

Plasmoid interacting with axisymmetric magnetic field 13 p2152 A66-26515

Fast-particle beam plasma probing of plasmoid interacting with axisymmetric magnetic field 13 p2152 A66-26516

Instability of plasmoid injected into axisymmetrical magnetic field 13 p2152 A66-26517

Plasmoid passage through spatially inhomogeneous magnetic field, noting losses of different components 13 p2152 A66-26518

Boundary stabilization for plasma blobs moving in corrugated magnetic field 13 p2152 A66-26519

Static and magnetic HF field gradient combinations for accelerating, reflecting and accumulating plasmas 14 p2339 A66-26817

Large annular steady state stable hot-electron plasma blanket formed by magnetically trapping electrons originating in intense arc gas discharge 14 p2347 A66-28304

Electrostatic and magnetic pinch effects in electron beam-generated plasmas 15 p2549 A66-28717

Decaying plasma density determined from high-mode oscillations produced in magnetic trap with metallic chamber at 2000 to 6000 oe 16 p2756 A66-30099

Dependence of plasma heating and containment on distribution of magnetic field along trap axis in mirror trap 16 p2758 A66-30295

Plasma injection into programmed magnetic field 17 p2963 A66-31828

Plasma injected into magnetic trap with aid of conical theta pinch investigated to determine ion and electron energy, lifetime and charged particle concentration 17 p2969 A66-32546

Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 18 p3151 A66-34977

Plasmoid interaction with magnetic field barrier, explaining acceleration and penetration processes 19 p3408 A66-36279

Containment of plasma trapped in magnetic well by guiding plasma from coaxial gun along injection line by converging magnetic field 19 p3412 A66-36498

Plasma heating and confinement in magnetic well, using deuterium plasma jet obtained by induction gun, measuring lifetimes 19 p3412 A66-36499

Stabilization by shear and negative second-derivative of volume against gravitational interchange of toroidal system 19 p3412 A66-36501

Magnetic well stable to pure interchange instability and ballooning mode instability 19 p3412 A66-36502

Helical fields possessing mean magnetic wells treated by stream function formalism, calculating field shape 19 p3413 A66-36503

Astron facility experiments on injection of very intense pulses of relativistic electrons into cylindrical azimuthally symmetric magnetic trap 19 p3423 A66-36551

Plasma with relativistic electrons in magnetic mirror trap, discussing stability and fast pulsed heating of ions 19 p3423 A66-36553

VGL-2 cryogenic magnetic trap, filling with hydrogen plasma 19 p3428 A66-36580

Plasma injection and confinement in stellarator magnetic trap with multipolar helical field, noting magnetic surfaces and perturbation effect 19 p3429 A66-36582

Plasma turbulent heating by direct current discharge in magnetic mirror trap, analyzing adiabatic compression 19 p3430 A66-36589

Ion cyclotron resonance heating and trapping and adiabatic compression of plasma in QP machine 19 p3431 A66-36590

Plasma electrons heating by UHF fields analyzed in DC magnetic field, varied for HF electromagnetic or plasma wave propagation 19 p3431 A66-36591

Energy-and mass-spectrum measurements of ions from plasmoids from coaxial plasma source, examining plasma acceleration

mechanism inside source 21 p3785 A66-39036
HF energy absorption effect on plasmoid passing through magnetic barrier with superimposed HF field 21 p3786 A66-39045

Plasma injection from coaxial plasma gun into magnetic trap with opposite fields 21 p3788 A66-39055

Rarefied plasma in magnetic trap with oppositely moving magnetic fields, examining charged particle motion 21 p3788 A66-39057

Intense beams of fast neutral hydrogen atoms injected into magnetic trap by ionization in strong magnetic field 21 p3789 A66-39060

GVL-2 magnetic trap filling with plasma, considering possibilities of suppressing instabilities in trap and intensifying process of plasma accumulation 21 p3789 A66-39061

Trapping, stability and confinement of high beta plasma in cusped geometry to measure hole size and relationship to energy containment time 21 p3792 A66-39181

Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 22 p3952 A66-39712

Nonlinear theory on effect of drifting cone plasma instability on particle drift from adiabatic trap 22 p3955 A66-40191

Plasma jet motion in inhomogeneous transverse magnetic field, noting drift velocity 23 p4099 A66-41130

LF plasma instabilities causing pumpout losses prevented by scaling law determination for stable confinement in toroidal magnetic wells 23 p4102 A66-41482

Superconductor solenoid application to laser devices and development of magnetic plasma traps for research in controlled thermonuclear reactions 23 p4115 A66-41743

MAGNETIC VARIATION

Diurnal velocity variations of ionospheric wind in auroral zones and disturbance daily solar variation 01 p0064 A66-11161

Homogeneous auroral arcs orientation and relation to magnetic disturbance currents 01 p0064 A66-11164

Corpuscular flux entry zone and spiral time distribution of disturbance maxima 01 p0133 A66-11165

Relative position of solar disturbance daily variations mean flux system compared with auroral region of same period 01 p0065 A66-11169

Solar disturbance daily variations and behavior of horizontal perturbation vector based on magnetic observations at Soviet high latitude stations 01 p0065 A66-11170

Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 02 p0224 A66-12118

Structural design and equipment of three-component mobile field station Izmiran-4 that uses quartz sensitive elements for magnetic variation recordings 02 p0232 A66-12123

Relation between irregular variations in magnetic field intensity with sporadic E region containing current system responsible for quiet solar diurnal variation 02 p0225 A66-12140

Earth magnetic field represented as dipole field to study secular variations of field 02 p0225 A66-12142

Diurnal variation of cosmic radiation of intermediate energies measured at Earth attributed to particle removal due to scattering by magnetic irregularities 04 p0575 A66-14181

Lower ionospheric wind effect on geomagnetic field variation 05 p0668 A66-14935

Day-to-day variability of terrestrial magnetic daily variation, establishing morphology of different types 05 p0673 A66-15042

Earth magnetic field including mathematical descriptions, origin, daily magnetic variations, polar and auroral disturbances, magnetic storms, activity indices and whistlers 05 p0675 A66-15742

Instrumentation used in analysis of short-periodicity and microvariations of cosmic ray intensity, noting supermonitor with scintillation counters, photomultipliers,

Hourly distribution and variation of
perturbed geomagnetic field, using
instantaneous synoptic charts in geomagnetic
coordinates 08 p1220 A66-19783
Space- and time-dependent variations of
magnetic fields of sunspots and faculae
based on daily magnetograms for several
sequences of 8 to 10 days 08 p1298 A66-19785
Dependence of variations in critical F-2
ionization on solar 08 p1220 A66-19791
Correlation coefficients for daily ranges of
horizontal component of quiet day diurnal
magnetic variation 11 p1695 A66-22370
Ionization structure of polar auroras from
spatial distribution of radar-reflecting zones,
taking into account magnetic field
variations 12 p1871 A66-24293
Quiet solar diurnal variations of
geomagnetic field at middle and low
latitudes during IGY to determine
coordinate system and equatorial
electrojet 14 p2286 A66-28077
Relation between irregular variations in
magnetic field intensity with sporadic E
region containing current system responsible
for quiet solar diurnal
variation 14 p2287 A66-28096
Earth magnetic field represented as dipole
field to study secular variations of
field 14 p2287 A66-28098
Latitude distribution curves of two quasi-
circular zones of maximum magnetic activity
along 12 consecutive meridians of local
geomagnetic time 15 p2487 A66-29100
Hourly distribution and variation of
perturbed geomagnetic field, using
instantaneous synoptic charts in geomagnetic
coordinates 21 p3732 A66-38779
Space- and time-dependent variations of
magnetic fields of sunspots and faculae
based on daily magnetograms for several
sequences of 8 to 10 days 21 p3812 A66-38781
Dependence of variations in critical F-2
ionization on solar 21 p3733 A66-38787
MAGNETICALLY TRAPPED PARTICLE
A GEOMAGNETICALLY TRAPPED
PARTICLE
Adiabatic motion determination of charged
particle containment in combined mirror-
multipole cusp magnetic
fields 05 p0718 A66-14712
Captured electron drift from trap with
spatially periodic helical magnetic field,
using time variable 06 p0919 A66-16879
Injection of plasma blobs into mirror trap
and subsequent compression of plasma by
increasing magnetic field, using longitudinal
current, noting X-ray
radiation 12 p1925 A66-24877
Perturbation of particle motion in
cellarator 14 p2347 A66-28307
Distribution of charged particles of
different energies escaping from magnetic
trap in which spiral moving electron fluxes
are created 16 p2755 A66-30094
Temporary capture of charged particles in
static magnetic bottle, based on resonant
perturbations and Stoermer
track 16 p2760 A66-30588
High density plasma injection into
magnetic-mirror trap by generation of
plasma vortex structures under mirror
poles 17 p2967 A66-32429
Motion of isolated energetic charged
particle in simple force-free magnetic field
with rectilinear lines of
force 19 p3400 A66-35925
Magnetic fields and trapped radiation
intensities of other planets in solar system,
particularly Jupiter 20 p3639 A66-38316
Charged particle motion in magnetic traps
of acute geometry, examining particle
trajectories by numerical
integration 21 p3788 A66-39056
Nonadiabatic magnetic trap energy
distribution during charged particle
motion in spatially periodic magnetic
field 21 p3788 A66-39058
Closed magnetic trap for transverse-to-
longitudinal conversion of energy of
particles moving in spatially periodic
magnetic field 21 p3788 A66-39059
Pitch-angle dependence of first-order
term acceleration of particles trapped
between shock front and moving magnetic

mirror 21 p3776 A66-39564
Injection of plasma blobs into mirror trap
and subsequent compression of plasma by
increasing magnetic field, using longitudinal
current, noting X-ray
radiation 23 p4099 A66-41084
High energy neutral particle injection into
mirror quadrupole cusp magnetic well,
Lorentz ionization and trapped particle
trajectories 23 p4103 A66-41493

Magnetism and magnetic materials - IEEE
and AIP Conference, San Francisco,
November 1965 14 p2349 A66-26875
Magnetics - International Conference,
Stuttgart, April 1966, Volume 2, covering
ferrite and semiconductor devices,
superconductivity and magnetic
logic 24 p4260 A66-43170

MAGNETIZATION

SA BARKHAUSEN EFFECT
SA KERR EFFECT
Anomalous Barkhausen effect in
ferromagnetic alloys 01 p0117 A66-10239
Magnetization curve recording system for
hysteretic
superconductors 03 p0371 A66-13253
Thin ferromagnetic Fe-Ni films, discussing
elastic tensile stresses on structure of
interdomain boundaries and distribution of
magnetization vectors 04 p0563 A66-13876
Nonideal superconducting properties of
inhomogeneous tin alloys with data on
resistive temperature and field transitions,
magnetization curves, etc 07 p1107 A66-18411
Magnetization using Hartree-Fock
approximation in terms of boson distribution
for uniformly interacting spins
system 07 p1084 A66-18441
Perpendicular anisotropy of Ni and Fe
films and saturation magnetization under
various pressures 08 p1270 A66-19011
Electron microscopic estimation of
perpendicular anisotropy of magnetic thin
film originating from nonmagnetic grain
boundaries 08 p1270 A66-19012
Magneto-crystalline anisotropy of hexagonal
ferromagnetic substances in neighborhood of
Curie point 08 p1273 A66-19249
Quantized flux in small hollow
superconducting cylinders cyclically cooled
through transition
temperature 09 p1418 A66-20038
High current-carrying capacity and flux
trapping in homogeneous alloy single crystal
type II superconductors 09 p1421 A66-20057
Free energy calculations and
crystallographic properties of vortex line
lattices in type II semiconductor for square
and triangular lattices in given magnetic
field 09 p1421 A66-20058
Ferromagnetic film behavior near hard
direction of
magnetization 09 p1431 A66-20869
Magnetic hysteresis and associated current
carrying capacity of type II superconductor
on pinning of flux threads by internal
defects 10 p1573 A66-21246
Changes with time in coercive force of
iron films and permalloy films prepared by
sputtering material in magnetic
field 11 p1753 A66-22802
Kerr effect measurement of coercive force,
nucleation field and saturation field for thin
films 11 p1754 A66-22814
Reverse magnetization and energy of
anisotropy of single crystal ferromagnetic
films 11 p1754 A66-22815
Domain structure and reverse
magnetization of single crystal nickel
films 11 p1754 A66-22816
Critical curves of quasi-static reverse
magnetization of thin permalloy films
analyzed, based on angular dependence of
critical fields 11 p1755 A66-22819
Magneto-optical study of critical curves of
thin films by observing domain structures
during magnetization

process 11 p1755 A66-22820
Local reverse magnetization regions,
threshold field and residual saturation states
in nonuniform rotation processes in thin
permalloy films 11 p1755 A66-22821
Quasi-static reverse magnetization of thin
ferromagnetic films under action of SHF
field 11 p1755 A66-22823
Incoherent rotation of reverse
magnetization in thin ferromagnetic films,
allowing for internal magnetostriction and
exchange interaction 11 p1755 A66-22824
Nonuniform rotation of local magnetization
vectors in thin nickel-iron films, measuring
contribution of time-dependent variations in
torque during magnetic field
reversal 12 p1934 A66-25031
Hardening temperature effect on saturation
magnetization and distribution of cations
over sublattices in magnesium-base
ferrites 13 p2160 A66-25100
Magnetization induced by circularly
polarized laser light incident on
nonabsorbing material, in absence of
external magnetic field, in doped calcium
fluoride proportional to light intensity and
Verdet constant 13 p2131 A66-26142
Magnetic field-temperature relations of
type II superconductor Nb upon adiabatic
magnetization of superconducting
state 14 p2350 A66-26877
Thin magnetic film with helical
anisotropy 14 p2351 A66-26890
RF probe measurements to determine local
magnetization direction and H sub k values
in planar films 14 p2352 A66-26894
Lever mechanism for magnetization creep
in nickel-iron thin films in longitudinal DC
and transverse AC field 14 p2353 A66-26898
Superconductivity and origin of magnetic
field at nucleus and ferromagnetism
problems analyzed in rare earth metals and
alloys 14 p2362 A66-27461
Thin ferromagnetic Fe-Ni films, discussing
elastic tensile stresses on structure of
interdomain boundaries and distribution of
magnetization vectors 14 p2363 A66-27581
High critical magnetic field, high current
superconductors, degradation and practical
magnet systems 14 p2364 A66-27649
Heat treatment effect on superconducting
properties of cold-worked niobium, noting
results of magnetization, critical current and
resistivity measurements 15 p2564 A66-28760
Magnetic state of gadolinium impurities in
superconducting
lanthanum 16 p2768 A66-30134
Heat magnetization in simple model
applied to thulium intermetallic
compounds 16 p2745 A66-30177
Magnetization-density-wave instability of
quantum plasma in random phase
approximation 16 p2757 A66-30192
Magnetic interaction between layers of
two-layer ferromagnetic film, discussing
inhomogeneity effects, Barkhausen jumps,
reverse magnetization nuclei,
etc 16 p2774 A66-30689
Critical current enhancement and
degradation due to hysteresis in nonideal
type II superconductors in axial magnetic
fields 18 p3153 A66-33612
German papers on metal physics, chemical
bonds in crystals and
ferromagnetism 19 p3439 A66-35712
Micromagnetic theory of ferromagnetics,
discussing magnetization curve, saturation
and hysteresis effects 19 p3439 A66-35714
Magnetization curve and magnetic
hysteresis of ferromagnetic single
crystals 19 p3439 A66-35715
Approximate molecular-field and quantum
mechanical methods used to describe
temperature dependence of saturation
magnetization in ferrites and
ferrimagnets 19 p3445 A66-36317
Enthalpy of impure sample of niobium
calculated from simultaneous measurements
of magnetization and heat developed during
process of magnetizing type II
superconductor 20 p3616 A66-37445
Pauli spin paramagnetism and spin-orbit
scattering in magnetization of
superconducting Ti-Mo
alloy 21 p3796 A66-38551
Magnetization curves for two specimens of
semiconducting strontium titanate of given
electron density, noting magnetic hysteresis

and heat capacity 21 p3796 A66-38553
 Magnetization measurements of Pb-Tl cylinders in axial magnetic field with superconductivity confined to superconducting surface sheath 23 p4113 A66-41370
 Material selection for linear ferrite devices including determination of internal biasing field, estimate of required saturation magnetization, etc 24 p4260 A66-43171

MAGNETO-OPTIC
 Theory of interband magnetodispersion effects in crossed field semiconductors, obtaining expressions for Faraday and Voigt effects 02 p0272 A66-11711
 Magneto-optical reflection measurements at liquid-helium temperature for p-type PbTe samples in Faraday and Voigt configuration 07 p1102 A66-18206
 Impurity scattering in theory of interband magneto-optical effects, noting inadequacy of first-order perturbation treatment and low and high impurity-atom concentration with weak interaction 15 p2558 A66-28610
 Pulse switching of permalloy films by use of interrupted pulses and Kerr magneto-optical effect 16 p2773 A66-30683
 Optical and magneto-optical phenomena in CdSnAs sub 2, discussing reflection and absorption spectrum, optical activity, double refraction, dielectric constant, etc 16 p2788 A66-31775
 Optical reflection, transparency and Faraday effect for indium antimonide, calculating effective electron mass, relation between energy and wave number, etc 16 p2788 A66-31777
 Amplitude and phase of complex Kerr magneto-optic coefficients measured, describing technique and results 17 p2958 A66-32623
 Magnetopiezo-optical reflection in germanium observed by piezoreflection technique for direct transition 18 p3156 A66-34467
 Valence band spin-orbit splitting in highly degenerate semiconductors determined from splitting of peak laser diode emission in high magnetic fields 19 p3374 A66-36036
 Absorption coefficient of light in semiconductors in crossed electric and magnetic fields, examining conditions for Franz-Keldysh effect occurring in magnetic field 24 p4256 A66-42524

MAGNETOACOUSTIC WAVE
 Geometrical acoustics in magnetic materials, examining control of direction and shape of beam by introducing inhomogeneities in medium 01 p0120 A66-10508
 Spin wave excitation of magnetoacoustic oscillation modes and beating of these modes in yttrium-iron garnet /YIG/ 01 p0126 A66-10965
 Magnetosonic wave emission from AC ring current and acoustic monopole passage through magnetoactive plasma 02 p0268 A66-11770
 Magnetoacoustic wave in rarefied plasma, examining nonstationarity of motion, wave front behavior, wave energy absorption and magnetic field profile 06 p0921 A66-17056
 Jump discontinuities in nonlinear hyperbolic systems of equations applied to formation of magnetoacoustic shocks from simple waves 07 p1089 A66-17967
 Resonance heating of decaying cold plasma by fast magnetoacoustic wave of quasi-stationary longitudinal electromagnetic field 07 p1090 A66-18258
 Resonant ohmic damping of linearized magnetoacoustic waves in incompressible infinite homogeneous resistive plasma in static equilibrium 09 p1408 A66-20423
 Resonance heating of decaying cold plasma by fast magnetoacoustic wave of quasi-stationary longitudinal electromagnetic field 09 p1409 A66-20902
 Magnetoacoustic wave excitation and detection in rotating plasma accelerator, noting resonance and wave transition [AIAA PAPER 66-172] 10 p1560 A66-21426
 Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 10 p1587 A66-22156
 Cerenkov electron absorption of Alfvén and magnetoacoustic waves in plasma cylinder, obtaining formula for energy

absorbed by plasma and damping factor where there is no resonance 11 p1743 A66-22443
 Electrical fluctuations in argon-potassium nonequilibrium plasma measured and correlated with theories of electrothermal and magnetoacoustic waves 13 p2149 A66-26261
 HF heating of dense plasma by resonance excitation of cyclotron-type ion waves and fast magnetoacoustic waves 16 p2756 A66-30095
 MHD first-order partial differential equations used to investigate wave front between perturbed and unperturbed flow regions in magnetosonic propagation through homogeneous medium 16 p2764 A66-31363
 Conical refraction of magnetosonic waves occurring when Alfvén waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field 18 p2764 A66-31364
 Gradient instability of galvanomagnetic and galvanomagnetoacoustic waves in electrical fields 19 p3440 A66-35770
 Kjeldas absorption edge in cryogenic potassium for shear magnetoacoustic wave propagation in spherical metallic Fermi surface with spin density wave ground state 21 p3800 A66-38991
 Stability of one-dimensional magnetoacoustic waves traveling in axial direction in Hall type MHD generator analyzed by steady state flow equations 23 p4024 A66-41884

MAGNETOELASTIC VIBRATION
 Spin wave generation in nonuniform magnetic fields with application to magnetic delay lines 03 p0332 A66-12417
 Magnetoelastic coupling constant in microwave frequency of ferrites and garnets 03 p0408 A66-12418
 Magnetophonon fluctuation of thermal emf of n-InSb in longitudinal magnetic field 09 p1412 A66-19985
 Amplitudes and linewidth of discrete spectrum of natural frequencies of thin magnetic films, noting motion equations, dispersion ratio and resonance peaks 11 p1752 A66-22799
 Magnetoacoustic natural oscillations in solid MHD resonators 17 p2971 A66-32787

MAGNETOELASTIC WAVE
 Mechanical energy dispersion by internal friction mechanism of ferromagnetic metals in alternating magnetic field 01 p0116 A66-10193
 Microwave acoustic delay lines made practical by low-loss propagation of microwave phonons at room temperature in single crystals 03 p0331 A66-12412
 Transmission and attenuation of elastic and magnetoelastic waves in yttrium iron garnet 03 p0408 A66-12416
 Pure spin and spin-acoustic delay modes of single crystal YIG 06 p0847 A66-16104
 Parametric generation and amplification of magnetoelastic waves in single-crystal yttrium iron garnet cylinder at L-band at room temperature 06 p0851 A66-16457
 Modification of Fourier law used to obtain hyperbolic wave equations of thermomagnetoelasticity for conductors and wave equations of thermopiezoelectricity 08 p1270 A66-19113
 Nonlinear phenomena and relaxation oscillations associated with magnetoelastic propagation in yttrium iron garnet 08 p1198 A66-19751
 Magnetic permeability effect on magnetoelastic plane wave propagation 09 p1403 A66-20579
 Magnetothermoelastic wave propagation in finite conducting medium located in primary magnetic field 10 p1555 A66-21314
 Propagation modes of small disturbances in homogeneous incompressible magnetoelastic medium at Alfvén velocities 12 p1929 A66-24379
 Potential representation of solution of equations for homogeneous and isotropic medium in presence of magnetic and temperature fields 13 p2195 A66-25401
 Materials for acoustic and magnetic microwave delay lines, discussing thin film piezoelectric transducers and magnetoelastic mode of microwave propagation 13 p2165 A66-25519

Magnetic material and field application to solid state electronics, noting amplification of microwaves, magnetoelastic waves, application of microwave ferrite components, low temperature circulators, etc 13 p2165 A66-25520
 Axisymmetric wave propagation in elastic body-conducting fluid system, noting parameters of motion expressed in PDE 13 p2150 A66-26427
 Insertion loss of room temperature magnetoelastic waves in yttrium iron garnet from 1.8 to 8.5 gc 16 p2715 A66-30892
 Excitation of magnetoelastic waves at 200 to 3000 mc at room temperature in yttrium garnet single crystals obtained by gradual crystallization from yttrium and ferric oxides 20 p3617 A66-37479
 Uniform magnetic field effect on plane acceleration wave propagation and growth in homogeneously deformed perfectly electroconductive elastic material 22 p3955 A66-40135
 Magnetostriction of yttrium terbium ferrite garnets, noting absence of correlation between temperature dependences of magnetostriction and magnetization for high Tb content 24 p4256 A66-42518

MAGNETOELASTICITY
 Magnetoelastic interaction in thin permalloy films at X-band noting phonon excitation by spin waves, spin wave excitation by phonons and re-excitation of spin waves by phonons 04 p0561 A66-13726
 Plastic deformation effect on accuracy of stress measurements, based on magnetoelastic method 07 p1036 A66-18384
 Variational formulation for linearly coupled magnetothermoelasticity, examining electrodynamics of slow moving media, equations of motion and coupled thermoconductivity equation 12 p1963 A66-24028
 Magnetostrictively generated microwave acoustic pulse in thin films of Dy, Ho, Gd and Er 14 p2350 A66-26876
 Torsional strain sensitivity and absolute compositional analysis of permalloy films 14 p2354 A66-26905
 Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field 16 p2764 A66-31367
 Growth of plane acceleration discontinuities propagating into homogeneously deformed hyperelastic dielectric material in presence of magnetic field 22 p3948 A66-40136

MAGNETOELECTRIC MEDIUM
 Spectral distribution of carrier lifetime obtained from photomagnetolectric effect and photoconductivity 02 p0273 A66-11719
 Relativistic electrodynamics of moving medium, discussing Maxwell-Minkowski equations, Born equations, field vector transformations, etc 12 p1915 A66-24650
 Nonrelativistic force in simple magnetizable fluid derived from thermodynamic information about energy and power 12 p1915 A66-24651
 Electromagnetic field interaction with accelerated material medium, considering ponderomotive forces and finiteness of deformations 14 p2335 A66-28048
 Shubnikov-de Haas oscillations in two-dimensional electron gas in surface of p-type silicon inverted by electric field perpendicular to surface 16 p2771 A66-30204
 Magneto-optical phenomena studied by extension of wavelength range of electroreflectance measurements in solids using electrolyte into near IR 23 p4111 A66-41263

MAGNETOHYDRODYNAMIC ACCELERATION
 Hall currents effect during acceleration of plasma intrinsic magnetic field 02 p0264 A66-11384
 Faraday type MHD accelerator with series connected electrodes investigated by employing external jumpers 03 p0399 A66-12808
 Plasma behavior in MHD accelerators and electrical nonequilibrium conductivity, noting energy loss mechanisms and techniques for improving cross field accelerators 04 p0550 A66-13543
 MHD accelerators offer increase in

- performance capabilities of test facilities, Faraday accelerator is best at high low densities
[IAA PAPER 65-631] 05 p0660 A66-15165
- MGD DC crossed field plasma accelerator capable of operating on LF AC
current 08 p1262 A66-18829
- large vacuum facility tests of MPD arc thruster
[IAA PAPER 66-117] 08 p1282 A66-19001
- Resonance conditions in accelerating plasma clusters between parallel conductors strong transverse magnetic
09 p1410 A66-20982
- Resistance effect on resonance conditions accelerating plasma clusters of constant mass in external magnetic
09 p1410 A66-20983
- Plasma cluster and shock wave acceleration using plasma induction accelerator with axial magnetic field
09 p1333 A66-20984
- MHD plasma accelerator with circular stable path where centrifugal force is balanced by spontaneous centripetal MHD force
09 p1410 A66-20985
- Arc heating, self-magnetic acceleration and person flow in plasma thrusters
[IAA PAPER 66-237] 11 p1760 A66-22220
- Faraday MHD accelerator operated with electrically driven high density reflected shock tunnel
11 p1685 A66-22834
- Digital computer determination of equilibrium conductivity effect on MHD plasma engine
12 p1935 A66-23604
- Electromagnetic properties of gases interacting with magnetic fields whose conductivity increases with temperature
12 p1919 A66-23642
- Longitudinal magnetic field reduction of growth rate of gravitational type acceleration instability of liquid metal by por
17 p2967 A66-32452
- Minimum length solution for constant pressure MHD accelerator with axial variation in conductivity and magnetic field
17 p2968 A66-32466
- Large vacuum facility tests of MPD arc thruster
[IAA PAPER 66-117] 21 p3777 A66-38716
- Free jet MHD accelerator for determining minimum length of crossed field accelerators, noting operation and solution closed form
21 p3699 A66-39645
- Reentry simulation systems using MHD accelerators, technical difficulties, performance and efficiency
[CAS PAPER 66-39] 22 p3896 A66-40661
- ### MAGNETOHYDRODYNAMIC FLOW
- Unsteady convective flow of electrically conducting fluid through vertical channel in magnetic field, using differential equations
01 p0111 A66-10426
- Flow structure in initial length of MHD channel of square cross section taking longitudinal magnetic field nonuniformities into account
01 p0113 A66-10699
- Electrically conducting two-dimensional incompressible flow in traveling wave plasma accelerator, noting effect of nonuniform magnetic field
01 p0115 A66-11085
- MHD boundary layer development on body at motion by jerking movement where rate of formation of flow around body is greater than boundary
02 p0264 A66-11386
- Flow parameters for MHD ionizing shock waves in conducting medium
02 p0266 A66-11475
- MHD flow analyzed in entrance region of parallel-plate channel
02 p0267 A66-11531
- Collisionless mass flow of ionized gas through channel with imposed magnetic field
[IAA PAPER 65-124] 02 p0267 A66-11535
- Large amplitude MHD flow with magnetic lines coincident with streamlines
02 p0269 A66-11950
- Perturbation velocity and magnetic fields due to interaction of slow flow field of viscous fluid with aligned quadrupole magnet calculated
02 p0270 A66-12159
- Motion of medium of variable electric conductivity in rectangular channel situated in magnetic field
02 p0270 A66-12172
- Drag on plasma cylinder from rotating magnetic field, solving MHD and Maxwell equations
03 p0397 A66-12385
- Quasi-one-dimensional ionized gas motion through channels of arbitrary cross section in crossed electrical and magnetic field
03 p0398 A66-12516
- Hydromagnetic flow against rotating disk noting magnetic field effect on torque, boundary layer thickness and velocity profile, applying motion equation
03 p0399 A66-12689
- Stabilization of laminar conducting fluid flowing down inclined plane in transverse magnetic field
03 p0356 A66-12946
- MHD experiments with high enthalpy flow of argon
03 p0445 A66-13214
- Stokes flow of viscous incompressible electrically conducting fluid around hollow sphere
04 p0550 A66-13470
- Plasma flow discussing flow mode stabilization in channel formed by two electrodes, flow parameters and plasma conductivity
04 p0529 A66-13553
- Laminar flow of viscous electrically conducting fluid through annular channel in presence of transverse magnetic field
04 p0551 A66-13824
- MHD equations linearized by Newton iteration method, describing weak perturbation propagation
04 p0574 A66-13841
- One-dimensional unsteady flow of ideal compressible finite conductivity medium in presence of mass forces and plane magnetic field
04 p0516 A66-13856
- Non-one-dimensional solutions of MHD equations for axisymmetric motion of electrically conducting gas in magnetic field
04 p0552 A66-14153
- Effect of heat removal through MHD channel walls on stability of temperature distribution during electrical discharge in gas between two planes
04 p0557 A66-14421
- Two-dimensional flow of inviscid nonheat-conducting gas with variable conductivity in crossed constant electric and arbitrary magnetic fields
04 p0557 A66-14422
- MHD flow in rectangular ducts, discussing laminar motion of conducting liquid under uniform transverse magnetic field
04 p0558 A66-14475
- Integral approximations for skin friction and heat transfer in MHD channel flow [ASME PAPER 65-HT-15] 05 p0783 A66-14739
- Hydromagnetically squeezed films between two conducting surfaces used as lubricator, discussing load capacity, pressure and time of approach
06 p0884 A66-16202
- MHD stagnation-point flow, discussing incompressible viscous conducting fluid boundary layer behavior
06 p0916 A66-16355
- Aerodynamic calculations for diffusion combustion in laminar boundary layer between two plane parallel conducting gas flows in transverse magnetic field
06 p0918 A66-16844
- Polarization of plasma moving in magnetic field of toroidal solenoid
06 p0919 A66-16890
- MHD boundary layer equations with explicit solutions for longitudinal field in plane stationary incompressible laminar flow
06 p0920 A66-17007
- Unsteady, combined free and forced convective MHD channel flow of conducting fluid through transverse magnetic field
07 p1085 A66-17580
- Slow stationary MHD motion of electrically conducting viscous liquid in weak induced magnetic field in moving spherical envelope
07 p1086 A66-17836
- Slow steady motion of viscous and electrical conducting fluid in moving rigid spherical envelope immersed in uniform magnetic field
07 p1087 A66-17838
- Mathematical analysis of steady flow of incompressible viscous fluid in presence of magnetic field, taking flow as momentum source
07 p1089 A66-17960
- Quasi-one-dimensional unsteady hydromagnetic wave flow of ideal inviscid compressible conducting fluid in nonuniform ducts
07 p1089 A66-17962
- Shock wave propagation in electrically conducting incompressible fluid imbedded in magnetic field
07 p1089 A66-17975
- Exact solution of hydromagnetic stability of nondissipative conducting Couette flow between two coaxial cylinders in axial magnetic field
07 p1021 A66-18048
- Current sheet formation on plasma magnetospheric boundary at hyperbolic null point, noting possible connection with solar flare mechanism
07 p1138 A66-18082
- Stability of fast and slow attached shocks in stationary MHD flow around dihedral
07 p1089 A66-18105
- Axisymmetric MHD flows classified by configuration of electromagnetic field
07 p1090 A66-18123
- Two-dimensional steady MGD flow of ideal thermally nonconducting fluid with infinite conductivity, when magnetic intensity and velocity are orthogonal
08 p1261 A66-18675
- Power characteristics of linear axisymmetric flow of ideal incompressible conducting gas with Hall effect in two-component magnetic field
08 p1168 A66-18863
- MHD model of cyclone, considering motion of type of rotating ideal compressible conducting fluid
08 p1213 A66-19023
- Two-dimensional flow of electrically conducting medium in presence of body forces and plane magnetic field
08 p1290 A66-19024
- Spatial properties of rapid geomagnetic fluctuations, noting correlation and epoch differences between distant stations azimuth distributions and Parkinson plane effects
08 p1219 A66-19416
- Heat transfer to wedge in nearly free-molecular hypersonic flow of strongly rarefied gas
08 p1165 A66-19484
- Russian monograph on MHD of liquid metals, discussing application for transport and technological treatment of metals, molten salts and slags
08 p1266 A66-19566
- Computation and measurement of Hall potentials and flow field perturbations in MGD flow of axisymmetric free jet
08 p1266 A66-19815
- Steady state exothermal hydromagnetic discontinuity in perfectly conducting gas for arbitrarily oriented magnetic field
08 p1267 A66-19822
- MHD flow between torsionally oscillating disks in viscous conducting fluid subjected to uniform axial field
09 p1408 A66-20502
- Transverse magnetic field effect on velocity profile of turbulent mercury flow most pronounced in suddenly expanding flow
09 p1409 A66-20834
- Perturbation technique solution for MHD flow in closed regions with symmetric flow properties and axial boundary conditions
10 p1563 A66-21543
- Small perturbation plane steady flows in nonequilibrium MGD, noting diffusion effects
10 p1566 A66-21793
- MHD natural convection in cylinder, noting independence of thermodynamic profile from magnetic field
10 p1566 A66-21794
- Stationary flow of viscous incompressible anisotropically conducting fluid in coaxial channel
11 p1743 A66-22235
- Hydraulic resistance coefficient dependence on Reynolds and Hartmann numbers in turbulent flow of conducting fluid through tube in magnetic field
11 p1743 A66-22337
- Pressure and temperature distribution in flow of combustion products in presence of transverse magnetic field
11 p1786 A66-22596
- Torsional oscillations of fluid sphere with rigid boundary in uniform magnetic field
11 p1745 A66-23007
- Stability of forward and rearward slug flows due to motion of body through perfectly conducting liquid with embedded magnetic field
11 p1746 A66-23011
- Inviscid flow of compressible conducting gas with aligned magnetic field through axially symmetric Laval nozzle in various transition regions
11 p1636 A66-23256
- Flow structure in initial length of MHD channel of square cross section, taking longitudinal magnetic field nonuniformities into account
11 p1747 A66-23301
- Magnetic forces effect on laminar wall jet of electrically conducting incompressible fluid of constant properties
12 p1796 A66-23594
- Surface tension and buoyancy effects in cellular convection of electrically conducting liquid in magnetic field

- MHD duct flow under circular and radial magnetic field
12 p1920 A66-23954
- MHD flow patterns
12 p1920 A66-23955

Current vortices and critical surface shape for stationary axisymmetric plasma flow in azimuthal magnetic field 12 p1922 A66-24341

Pressure distribution of viscous electrically conducting fluid in lubricating layer of cylindrical bearing 12 p1887 A66-24425

Transition solution of physical state across plane nonrelativistic MHD shock of finite strength in compressible dissipationless perfect gas in uniform magnetic field 12 p1923 A66-24578

Drag on plasma cylinder from rotating magnetic field, solving MHD and Maxwell equations 13 p2139 A66-25390

Nonstationary two-dimensional channel flow of compressible electrically conducting fluid subject to traveling magnetic field 13 p2140 A66-25422

Velocity variation along two types of confined jets, with and without lateral flow, in presence of transverse magnetic field 13 p2140 A66-25444

MHD channel flow as affected by extremities 13 p2141 A66-25474

Steady flow of anisotropic conducting medium in half-space under influence of magnetic field 13 p2142 A66-25632

Random phase approximation of electron conductivity of turbulent plasma and effects of random static inhomogeneities 13 p2149 A66-26245

MHD channel flow as affected by nonuniform and anisotropic electric conductivity and boundary effects 13 p2150 A66-26339

Nonseparated flow of finite conductivity fluid past half-body with flow branching 13 p2067 A66-26534

Solar magnetic fields examined, using kinematical hydromagnetic theory, noting factors opposing field concentration 13 p2189 A66-26668

Unsteady laminar forced and free convection in coaxial sector tubes in presence of constant axial temperature gradient, accounting for oscillation and resonance 13 p2210 A66-26719

Laminar ducted flow of viscous electrically conducting fluid under uniform arbitrarily oriented magnetic field for rectangular duct with nonconducting walls 14 p2342 A66-27407

Plasma core nuclear rocket utilizing MHD driven vortex [AIAA PAPER 65-583] 14 p2329 A66-27409

Nonconducting fluid motion in infinite tube applied to violent thunderstorm dynamics, reducing current intensity to value for convection currents 14 p2346 A66-28268

Basic equations and methods for transverse MHD flow analysis when Hall currents are not suppressed, noting set of suitable simplifications, restrictive conditions and boundary value considerations 14 p2346 A66-28301

Three-dimensional MHD flow with jet and vortex nature in viscous incompressible conducting fluid 14 p2348 A66-28393

Two-dimensional laminar MHD flow in convergence channel with uniform input, finding effect of flow convergence on boundary development for arbitrary magnetic field induction 15 p2549 A66-28638

MHD equations applied to hypersonic flow of solar plasma around magnetosphere and approximation with simpler equations of gas dynamics 15 p2483 A66-28815

Stability of pulsating plasma cylinder contained by time-dependent magnetic field described by MHD equations 15 p2550 A66-28957

Hysteresis effects in one-dimensional conducting gas flow through rectangular MHD converter channel with constant magnetic gap and variable electron spacing 15 p2428 A66-29219

Approximation of electrical conductivity change in ideally conducting gas in turbulent MGD flow 15 p2551 A66-29220

Standing sound field effect on MHD flow past flat plate 15 p2551 A66-29249

Transverse magnetic field applied to high Reynolds number flow of liquid mercury in pipes and ducts inhibits convective mechanism of heat transfer [AIAA PAPER 65-539] 15 p2616 A66-29279

Extension to MHD hypersonic stagnation flow theory of Bush, including viscous term

and solving boundary value problem from both ends at once 15 p2424 A66-29307

MHD inclined slider bearing with azimuthal magnetic field, noting load capacity 15 p2509 A66-29407

Two-dimensional flow of incompressible conducting viscous liquid in inlet region of straight channel under magnetic field, obtaining flow characteristics 15 p2553 A66-29742

Instability arising as overstability in magnetohydrodynamic Benard problem 16 p2761 A66-31104

Velocity profile of incompressible and electrically conducting flow in entrance region of constant area MHD channel 16 p2763 A66-31255

Mean Lorentz force field of electrically conducting medium in turbulent motion affected by Coriolis force 16 p2763 A66-31349

Numerical solution of MHD equations for boundary layer conducting gas flow near flat plate when velocity distribution of external flow obeys power law 16 p2764 A66-31366

General solutions of MHD equations for linear nonsteady and plane steady motions of ideally conducting gas 16 p2764 A66-31369

Laminar-turbulent transition conditions in MHD channel flow 16 p2764 A66-31370

MHD fluid flow in rectangular channels with allowance for finite wall conductivity 16 p2764 A66-31371

Rotating disk induced viscous conducting fluid motion in axial magnetic field 16 p2764 A66-31372

Three-dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two-dimensional flow 16 p2765 A66-31373

Incompressible viscous conducting flow between two concentric cylinders in radial magnetic field 16 p2765 A66-31376

Two-dimensional MHD jet flow of conducting fluid in coplanar magnetic field and nonstationary flow past body with magnetic field perpendicular to surface 16 p2765 A66-31402

MHD boundary layer flow of incompressible conducting rotational fluids over infinite dielectric disk 16 p2765 A66-31403

One-dimensional MHD equation solution, using calculus of variations 16 p2765 A66-31513

Flow of compressible conducting gas around symmetrical wing in longitudinal magnetic field 16 p2766 A66-31628

General numerical method of characteristics for three-dimensional unsteady magnetofluid dynamics of multi-component medium 16 p2690 A66-31653

Fully ionized gas flow over wedge of finite angle for applied magnetic field aligned with incident stream 16 p2767 A66-31660

Current-carrying incompressible fluid confined between two axisymmetrically deformed nonconducting coaxial tubes 17 p2966 A66-32420

Two-dimensional MHD flow of inviscid incompressible conducting neutral fluid about an insulating cylinder with uniform applied magnetic field 17 p2968 A66-32469

Modified Pohlhausen method applied to velocity profile for MHD boundary layer problems 17 p2968 A66-32490

Finite-difference calculation of MHD flow of conducting fluid past circular cylinder in transverse magnetic field based on Navier-Stokes equation 17 p2971 A66-32862

MHD flow of electroconductive fluid in transverse magnetic field 17 p2971 A66-32863

Discontinuous one-dimensional dissipative flow of perfect liquid and gas conductor in magnetic field, emphasizing case where magnetohydraulic jump may occur 17 p2973 A66-33070

MHD lubrication flow in thrust bearing, noting fluid inertia effect on load capacity and flow rate [ASME PAPER 66-LUBS-8] 17 p2931 A66-33181

Supersonic MHD flow around right angle bend, constructing characteristic net by applying energy equations 18 p3147 A66-34625

Hartree solution of MHD laminar boundary layer incompressible conducting fluids,

specifically considering flow at inlet to semiinfinite flat channel 18 p3147 A66-34636

Boundary layer of steady incompressible plane crossed fields MHD flow at large Reynolds number 18 p3147 A66-34663

Steady aligned-field hydromagnetic flow of inviscid liquids past slender body reexamined, using boundary layer arguments 18 p3147 A66-34666

MHD flow with parabolic velocity at entrance region of flat channel 18 p3149 A66-34915

Hall effect influence on steady hypersonic flow of inviscid compressible gas past wedge 19 p3275 A66-35736

Drag coefficient of turbulent flow of electrically conducting liquid metal in MHD channels of round cross section 19 p3407 A66-36098

Exact solution of MHD equation for infinite electrical conductivity and application to solar magnetic field theory 19 p3464 A66-36296

Hydraulic-approximation equations in calculating MHD channel flows 19 p3410 A66-36458

MHD boundary layer at conducting wall of plane channel treated by numerical method 19 p3410 A66-36459

Plasma formation by fast atom injection into mirror magnetic field and well, showing effect of geometric transition on hydromagnetic drift and ion-cyclotron instability 19 p3421 A66-36541

Pulsating laminar flow of viscous incompressible conducting fluid in annular channel between circular cylinders under radial magnetic field, solving MHD equations 19 p3432 A66-36643

Boundary layer behavior in fully ionized two-temperature plasma 19 p3433 A66-36827

Electric field in MHD channels in presence of near-electrode potential drop 19 p3433 A66-36828

MHD flow past semi-infinite plate under conditions where viscosity is destroyed 20 p3609 A66-37537

Nonequilibrium ionization phenomena interaction with nonuniform flow of plasma reviewing nonequilibrium characteristics for uniform flow with electric and magnetic fields 20 p3610 A66-37982

Hamilton principle extended to compressible MHD flow of perfect conducting fluid 20 p3610 A66-37987

Differential equations for quasi-homogeneous MHD flow of electrically conducting medium at low magnetic Reynolds numbers 20 p3611 A66-38109

Fluid mechanics model representation of solar wind and geomagnetic field interaction, noting flow parameters in shock layer and application of MHD equations 20 p3642 A66-38337

Bomb debris motion following Star Fish test, noting formation of MHD shock wave, production of stationary plasma through X-ray ionization and collision in neutral air 20 p3644 A66-38345

Free laminar boundary layer flow between parallel streams of different magnetic fields and temperatures for incompressible viscous fluid 21 p3776 A66-38682

Boundary layer equations of MHD free convection from heated horizontal plate in vertical uniform magnetic field 21 p3776 A66-38707

Nonisentropic two-dimensional MHD flow 21 p3777 A66-38725

Conical source plasma parameters during transverse and longitudinal motion in magnetic field examined by parabolic method and Thomson mass analyzer 21 p3786 A66-39043

Sufficient conditions for instability against small oscillations of symmetric laminar flow of inviscid incompressible perfect magnetofluid 21 p3791 A66-39169

Velocity profile, induced magnetic field, shear stresses and skin friction on plates for viscoelastic liquid flow between nonconducting oscillating infinite flat plates in uniform TM field 21 p3794 A66-39575

Shear stress, velocity profiles, MHD and cross-viscous effects on forced non-Newtonian flow of Reiner-Rivlin liquid against rotating disk 21 p3795 A66-39576

Solar wind disturbance detected by ground

- facility and Explorer XVIII while behind Moon 22 p3983 A66-40562

- Electrical characteristics of linear, segmented electrode, Hall and Faraday MHD generators operating in equilibrium and nonequilibrium ionization modes, obtaining data on loss mechanisms 13 p2001 A66-26256
- Two-dimensional analysis of flow in electrofluid dynamic generator showing effect of radial fields and viscous forces on performance, stressing effect on electrical breakdown of gas, noting basic equations 13 p2001 A66-26257
- MHD power generation by pulsating preheated gas with shock waves, noting thermodynamic cycle composition, efficiency and parameters 13 p2001 A66-26258
- Performance efficiency and weight considerations for liquid MHD power conversion [AIAA PAPER 64-760] 13 p2008 A66-26660
- Interaction of boundary layer produced by vortex flow of viscous electrically conducting fluid over disk with axial magnetic field and relation to MHD generator and hydromagnetic capacitor 13 p2156 A66-26707
- Electrical output and conversion cycle efficiency of vortex type MHD induction generator, considering viscosity effects 13 p2156 A66-26708
- DC liquid-metal MHD generator tested with cold NaK to determine power efficiency 14 p2225 A66-27408
- End effects in steady state MHD J x B accelerator, noting voltage and current distribution and eddy-current geometry 14 p2342 A66-27430
- Channel flow of inviscid fluid with tensor conductivity considered when flow leaves transverse magnetic field, noting spatial distribution and ohmic power loss for application in MHD generators 14 p2346 A66-28302
- Self-excited explosive-driven MHD generator as possible source of pulsed electrical power 15 p2429 A66-29302
- Laminar boundary layer of low temperature plasma on isolator walls in channel of MHD generator in presence of transverse magnetic field 16 p2758 A66-30327
- Effect of finite width on performance of polyphase rectangular MHD converter, showing that for isotropic fluid electric current extends in two dimensions 16 p2637 A66-31102
- Small scale MHD fluid flywheel attitude control systems applied to deep space probes, suitable for overcoming cyclical additions of angular rate to satellite of 10 revolutions per day 16 p2811 A66-31253

Optimum operation modes of MHD converter 16 p2637 A66-31368

O-shaped magnetic systems using unsaturated steel magnetic circuit to produce strong uniform magnetic fields for MHD machines 16 p2637 A66-31375

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator 16 p2637 A66-31377

Electrical power dependence of ideally sectioned Faraday MHD generator on nonequilibrium plasma flow Mach number 16 p2637 A66-31606

Constant flow velocity and constant Mach number flow problems in MHD generator of minimal length for given temperature drop at output and internal efficiency 16 p2638 A66-31611

Electric conductivity in low voltage atmospheric pressure gas discharge, noting Maxwellian electron density distribution 17 p2968 A66-32484

Geometric, gasdynamic and electromagnetic parameters of one-dimensional flow of conducting gas with Hall effect for maximum power tapping from channel electrodes 17 p2972 A66-32869

Coupling between free electron and molecular vibrational temperatures in plasma environments, noting energy distribution, application to MHD generation, etc 18 p3145 A66-34105

Low temperature plasma conductivity of combustion products, particularly of exhaust gases in duct of MHD oscillator 18 p3145 A66-34107

Diamagnetic properties of plasma described by extended field equations suggest existence of steady state inductive power transfer between plasma and magnetic fields 18 p3145 A66-34108

Experiments of internal impedance of MHD generator show wide range of working conditions as slowly varying function of applied current 18 p3053 A66-34112

Book on direct energy conversion covering thermoelectric, photovoltaic, thermionic and MHD generators and fuel cell 18 p3054 A66-34164

Optimum MHD generators using anisotropic plasma, discussing conducting-gas MHD flow, Hall effect, ion slip effect, etc 18 p3152 A66-35075

MHD power generator in which ionization of alkali atoms occurs by collision with excited noble gas atoms, calculating velocity-dependent cross section 19 p3406 A66-35436

Jet compression requirements for circulating working medium in closed cycle magnetoplasma dynamics /MPD/ electrical power generator [AIAA PAPER 65-466] 19 p3280 A66-35621

Criteria for use of Rankine MHD systems in space 19 p3280 A66-35802

Induction synchronous MGD generator with modulated conductivity, examining electric and gas dynamic characteristics 19 p3281 A66-36308

Optimization of MHD generating duct by varying cross-sectional area and electrical loading 19 p3281 A66-36372

Motion of plasma stream injected transverse to magnetic field, examining stream action as it crosses region where magnetic field lines reverse direction about field null line 19 p3426 A66-36568

Thermodynamic analysis of MHD generator with vapor liquid injector 19 p3282 A66-36773

Thermodynamics of MHD converter cycles with previously mixed liquid metal used as working body, discussing thermal, electrical and energetic efficiency 20 p3496 A66-36986

Electric field in MHD generator channel under mixed boundary conditions solved by Wiener-Hopf technique, evaluating ohmic losses 20 p3500 A66-37491

Low pressure, high temperature and low values of electrical output effect on plasma conductivity, noting operation of MGD generators at high Hall numbers 21 p3698 A66-39409

Conducting gas flow in Hall MHD generator reduced to quasi-one-dimensional problem 21 p3698 A66-39416

Scaling parameters in explosive driven linear MHD generators, noting Reynolds number and volt-ampere

characteristics 21 p3698 A66-39506

Explosive driven MHD converters, discussing plasma geometry, density measurements and breadboard application 21 p3698 A66-39507

Pulsed electrical power generation from detonation-driven linear MHD channels with magnetically located explosive 21 p3699 A66-39509

Steady state equations for one-dimensional flow of conducting medium through channel of MHD generator in homogeneous magnetic field 22 p3952 A66-39692

MHD facility of CNR at Aerodynamics Institute of Naples 23 p4017 A66-41037

University 23 p4017 A66-41037

Cylindrical induction type MHD AC power generator analyzed in terms of cylindrical geometry, neglecting end effects 23 p4017 A66-41583

Gas dynamic calculations of power generator with closed circulation of fissionable gas supported by nuclear reaction behind supersonic diffuser 23 p4022 A66-41763

Hall effect in MHD generator using partially ionized gas 23 p4108 A66-42031

Velocity field of conducting fluid interaction with electromagnetic fields, noting applications to electric propulsion, MGD power generation and reentry 24 p4240 A66-42281

Hall effect influence on characteristics of MHD generator with two pairs of electrodes with symmetrical or crosswise connections 24 p4162 A66-42873

Plasma thermocouple and MHD generator as energy conversion devices, with bibliography 24 p4162 A66-43119

MAGNETOHYDRODYNAMIC SHEAR

HEATING

Energetic electrons from shock heating of exosphere, discussing formation of artificial radiation belt via MHD shock wave heated and density gradient accelerated electrons 20 p3644 A66-38346

MAGNETOHYDRODYNAMIC STABILITY

Hydromagnetic rotational instability of electrically conducting non-Newtonian fluid between two rotating cylinders 01 p0114 A66-10712

Hydromagnetic stability of interface formed by two superposed columns of dilute plasmas with anisotropic pressure 01 p0116 A66-11198

Stellar magnetic field attributed to role of field in producing hydrostatic equilibrium when general-relativistic effects are included in equations of MHD 02 p0290 A66-11705

Plasma instabilities in dipole magnetic field 03 p0400 A66-12893

Stabilizing flute and sausage instabilities of plasma jets by transversely magnetic field 03 p0406 A66-13192

MHD equations linearized by Newton iteration method, describing weak perturbation propagation 04 p0574 A66-13841

Stability diagrams for MGD channel flow of conducting fluid for different coplanar magnetic field intensities 05 p0721 A66-14710

Hydromagnetic stability of plasma 05 p0725 A66-15241

Confinement and stability of plasma in magnetic wells, examining pressure plasma and particle motion 05 p0726 A66-15252

Instability of plasma supported under gravity by magnetic field, considering collisions between charged and neutral particles dominate over charged particle interaction 06 p0915 A66-16180

Current convection modification in low pressure plasma in magnetic field when collision frequency is less than all other characteristic frequencies 06 p0917 A66-16627

Magnetic field effect on gravity and sound waves in nonuniform plasma 06 p0956 A66-17046

Slow stationary MHD motion of electrically conducting viscous liquid in weak induced magnetic field in moving spherical envelope 07 p1086 A66-17836

Exact solution of hydromagnetic stability of nondissipative conducting Couette flow between two coaxial cylinders in axial magnetic field 07 p1021 A66-18048

Negative double derivative in vacuum magnetic field in terms of flux surfaces

about magnetic axis of arbitrary shape 08 p1260 A66-18543

Approximation error on interchange stability of Van Allen belt corrected 08 p1284 A66-19421

MHD models used for analysis of stability of nonhomogeneous magnetized plasma with regard to perturbations whose electrical field is calculated from potential 08 p1265 A66-19469

Temperature oscillations in molten metals and relation to growth striae in melt-grown crystals 10 p1572 A66-21167

Dense high-temperature plasma produced by 30-kjoule theta pinch examined by IR maser-excited coupled resonator system [AIAA PAPER 66-151] 10 p1559 A66-21420

Angular velocity effect on radial hydromagnetic oscillations of rotating plasma cylinder 10 p1566 A66-21732

Hydromagnetic stability of current-carrying fluid between two coaxial cylinders with radii ratio 0.05 to 0.9 10 p1568 A66-21829

MGD stability treated by transfer function method for lumped-parameter dynamic systems 11 p1677 A66-23114

Convection and stability criteria for nonlinear steady solutions with homogeneous vertical magnetic field acting on fluid 11 p1787 A66-23420

Reconnection of magnetic lines of force to form closed loops during transient phase of rotation of spheres and cylinders from rest 12 p1868 A66-23857

MHD approach to axisymmetric perturbations in plasma permeated by static dipole field 12 p1951 A66-24574

Stability of pulsating plasma cylinder contained by time-dependent magnetic field described by MHD equations 15 p2550 A66-28957

Exchange principle for thermal stability of completely confined fluid in arbitrary region with rigid bounding surface 15 p2553 A66-29685

Gravitational perturbation effect on MHD stability of helical magnetic field in spiral arm 16 p2800 A66-30652

Instability arising as overstability in magnetohydrodynamic Benard problem 16 p2761 A66-31104

Circular toroidal plasma stability under average magnetic well conditions 17 p2966 A66-32424

Hall current effect on capillary instability of finitely conducting liquid jet carrying axial volume current 17 p2908 A66-32432

Longitudinal magnetic field reduction of growth rate of gravitational type acceleration instability of liquid metal by vapor 17 p2967 A66-32452

Equilibrium structure of magnetic fields in stars analyzed, employing perturbation theory for assumed polypotic configuration 17 p3005 A66-33001

Virial theorem study of magnetic field effect on gravitational instability of primeval gas cloud, noting possibility of collapse upon change in magnetic flux 17 p3005 A66-33002

Atmospheric argon Poiseuille plasma arc instability in axial magnetic field examined, noting frequency and shapes of stability curves 18 p3149 A66-34916

Stability of swirling flow of viscous conducting fluid in presence of circular magnetic field 18 p3150 A66-34934

Set of fluid equations in finite Larmor radius obtained by systematic asymptotic expansion, using gyration period and radius as small space and time parameters 18 p3150 A66-34965

Galactic model for studying hydromagnetic stability of spiral arm in which field lines are helices around axis 18 p3237 A66-35043

Structure of hydromagnetic shockfront wherein electrostatic turbulence continuously develops, analyzed to aim at orders of magnitude for front width, electron and ion heating and magnitude of fluctuation excitation 19 p3408 A66-36278

MHD stabilization of open-ended systems including minimum-magnetic-field configurations in plasma stabilization 19 p3411 A66-36495

Radial plasma transport in magnetic wells, emphasizing LF instabilities not stabilized by positive gradient and employing free

energy arguments 19 p3415 A66-36516
interdiffusion of plasma and magnetic
fields in pinch and hardcore discharges in
ge bore discharge tube
BER/ 19 p3424 A66-36555
finite resistivity and nonhydromagnetic
stability studied for extent of shear
stabilization in levitron 19 p3424 A66-36556
dynamic stabilization of plasma column by
magnetic field 19 p3424 A66-36557
wall conductance effect on stability of
Hartmann flow in curved channel, solving
envelope problem via Galerkin
method 21 p3777 A66-38762
magnetic field effect on stability of fluid
motion of plane parallel flows,
determining critical flow velocity and
critical Reynolds number 21 p3777 A66-38944
transmission and coupling resonance of
hydromagnetic disturbances in nonuniform
magnetosphere calculated by
proximate dipole coordinates valid near
equatorial plane 21 p3734 A66-39217
plasma filament instability suppression by
applying external magnetic
field 21 p3792 A66-39307
MHD and velocity space instabilities of
plasma in ring vortex confined by cold gas
magnet in toroidal magnetic
field 22 p3954 A66-39931
electric and thermal conductivity effects
on MHD instabilities in diffuse linear
pinch 23 p4105 A66-41706
MHD stability of toroidal gas discharge for
perfectly ionized gas 23 p4108 A66-42041
plasma physics reviews, Volume 2, plasma
confinement including structure of magnetic
fields, plasma equilibrium, MHD stability
and charged particles in EM
field 24 p4241 A66-42328
equilibrium theory of plasma stability in
M field, applying virial theorem and
variational principle to random infinitesimal
plasma perturbations 24 p4241 A66-42330
MHD stability of ideally conducting plasma,
discussing small oscillations equation, energy
principle, pinch effects and stabilization of
various current
instabilities 24 p4241 A66-42331
time of confinement of hot plasma in
magnetic bottle without touching material
walls, examining instability types, pinch
configurations, etc 24 p4246 A66-43113
MAGNETOHYDRODYNAMIC TURBULENCE
attenuation of uniform turbulent motion in
incompressible fluid located in magnetic
field 02 p0270 A66-12179
laminar and turbulent MHD free jet, using
skin analysis 05 p0721 A66-14719
turbulence in hydrodynamics and plasma
physics 05 p0727 A66-15260
spectral distribution of kinetic and
magnetic energies from stationary
inhomogeneous MHD 07 p1087 A66-17945
turbulence
electrical conductance of turbulent
magnetically active plasma, assuming
oscillation is possible, determining width of
peak shock wave in collisionless
plasma 11 p1744 A66-22448
spectral equations of homogeneous MHD
turbulence in strong uniform magnetic field
presence of Hall effect 12 p1924 A66-24807
MHD instability in plasmas during pinch
discharge, noting wave velocity dependence
on Larmor radius, Hall effect, electron
temperature fluctuations,
etc 13 p2142 A66-25704
MHD approximation of solar plasma fluxes
observed by Mariner II as free rotating
vortex 15 p2574 A66-29077
Malkus theory in weakly-conducting
turbulent liquid flow between parallel plates
transverse magnetic field, noting velocity
profile and transition
region 16 p2766 A66-31652
transverse magnetic field effects on heat
transfer in turbulent flow of mercury in
circular iron tube 18 p3145 A66-34109
turbulence of inhomogeneous plasma in
strong magnetic field, deriving turbulence
equations from two-component MHD by
variational technique 19 p3408 A66-36274
hydromagnetic disturbances during radial
pinch phase of preionized theta pinch
discharge 19 p3414 A66-36510
MAGNETOHYDRODYNAMIC WAVE
initial pulse propagation in relativistic

MHD with finite
conductivity 02 p0265 A66-11397
Hydromagnetic oscillation in toroidal
discharge with external magnetic field
distorting plasma column into helical
form 02 p0266 A66-11444
Alfven waves and fast magnetosonic waves
in nonisothermal plasma with molecular ions
traversed by charged particle
flux 02 p0268 A66-11771
MHD absorption of internal gravitational
waves in ionospheric F layer in terms of
traveling disturbances 02 p0283 A66-12116
Wave propagation in photosphere,
chromosphere and corona noting
hydromagnetic waves and waves in
convective zone 03 p0425 A66-12847
Interaction of conduction electrons with
lattice vibrations in semiconductor produces
additional transmission bands or
disappearance of resonance absorption
region 04 p0564 A66-14251
Formalism for determining linearized
hydromagnetic wave phenomena in perfectly
conducting plasma permeated by static
magnetic multipole field 05 p0720 A66-14709
Electron density distribution in
magnetosphere inferred from dispersion
characteristics of hydromagnetic wave
propagating between hemispheres along
geomagnetic field as in atmospheric
whistlers 05 p0747 A66-14787
Hydromagnetic waves in nonisotropic
medium in presence of gravitational
field 05 p0759 A66-14877
Oscillations of geomagnetic field recorded
at two high-latitude conjugate points, noting
frequency spectra and amplitude
relationships 05 p0673 A66-15049
General dynamical effects of suprathermal
gas particles on hydromagnetic wave
propagation in interstellar
space 05 p0749 A66-15275
Alfven waves in conducting nondissipative
fluid permeated by external localized
inhomogeneous magnetic field while in
equilibrium 07 p1086 A66-17655
Steady state jump equations for normal
ionizing shock wave propagating into
nonconducting gas in electromagnetic
field 07 p1087 A66-17939
Hydromagnetic shock structure from
dissipative set of
equations 07 p1090 A66-18128
Propagation mode in waveguide filled with
partially ionized magnetoplasma, obtaining
dispersion relations for hydromagnetic and
acoustic waves by three-fluid
method 07 p1091 A66-18408
Text on wavefronts and wave propagation
in classical electromagnetic theory, general
relativity, MHD and nonlinear
electrodynamics 08 p1180 A66-18680
Sudden commencement of magnetic storms
in outer space caused by oblique MHD
shock wave from corpuscular
stream 08 p1290 A66-19032
Sinusoidal hydromagnetic pulsations noting
morphological properties, planetary
distribution and inverse dependence of
amplitude, frequency and duration on solar
activities 08 p1220 A66-19784
Diurnal properties of horizontal
geomagnetic micropulsation field in New
Zealand, noting variation of period, field
rotation and direction of oscillating
vector 10 p1529 A66-21152
Conditions for regular stationary reflection
of hydromagnetic shock on rigid
wall 10 p1521 A66-21194
Electromagnetic phenomena inside weak
MHD shock wavefront 10 p1569 A66-21916
Hydromagnetic waves in partially ionized
cylindrical hydrogen
plasma 11 p1745 A66-22453
Existence of collisionless MHD bow shock
wave attached to
magnetosphere 11 p1699 A66-23133
Differences in MHD emission occurrence
times, considering ionospheric penetration
propagation toward equator and error
sources 11 p1701 A66-23150
Propagation of MHD emissions in Alfven
mode along high latitude geomagnetic field
lines, auroral zone signal energy penetration
and isotropic wave mode
transformation 11 p1701 A66-23151
Cyclotron instabilities in hydromagnetic

waves in magnetosphere as possible origin
of geomagnetic micropulsations, stressing
ion resonance mode of waves relevant to hm
whistlers 12 p1874 A66-24842
Charged particle excitation of weakly
damped MHD waves in metal placed in
magnetic field 12 p1825 A66-25021
Hydromagnetic waves in plasma in external
magnetic field 12 p1925 A66-25033
Two-fluid approach for solutions to
hydromagnetic waves including pressure,
viscosity, heat conduction, etc, using partial
differential equations 13 p2146 A66-25741
Exothermal discontinuities propagation in
conducting media without restricting
magnetic field orientation, noting velocity
and energy released, showing that existence
of propagation velocities leads to two
detonation modes 13 p2149 A66-26260
Rotation in polarization ellipse of
hydromagnetic oscillations type Pc 1 from
observations at magnetically conjugate
stations 13 p2073 A66-26347
Periodic modulations of energetic electron
fluxes observed throughout distant radiation
zone by Geiger counters aboard satellites
suggest MHD wave activity 13 p2175 A66-26354
MHD wave propagation along uniform
magnetic field in cold plasma solved in
terms of Jacobian elliptic
functions 14 p2340 A66-27134
Cowling theorem for short-circuited MHD
dynamo theory 14 p2341 A66-27199
Similar solutions of partial differential flow
equations for cylindrical blast uniform flow
shock wave and determination of blast wave
velocity 14 p2344 A66-27633
Quasi-linear perturbation theory of
transverse electromagnetic waves from
instabilities in nonthermal magnetoactive
plasma, using Boltzmann equation, applied to
magnetospheric MHD
emissions 14 p2286 A66-27982
MHD absorption of internal gravitational
waves in ionospheric F layer in terms of
traveling disturbances 14 p2286 A66-28075
MHD wave generation in sunspots,
examining depth of solar magnetic layer
that affects magnetic
convection 15 p2596 A66-29138
Simple wave propagation in MHD system
subject to magnetic field 15 p2551 A66-29252
MHD model of interface between solar
wind and geomagnetic field on Earth tail,
showing existence of unstable
waves 18 p2695 A66-30717
MHD wave propagation emphasizing
viscosity, heat and electrical conductivity,
Hall current, no nonequilibrium phenomena
and effect of medium
inhomogeneity 16 p2766 A66-31583
Dispersion and modes of MHD wave
propagation in collisionless
plasma 17 p2973 A66-32977
Collision-free hydromagnetic shock
observed simultaneously in interplanetary
space on October 7, 1962 by Mariner II and
Explorer XIV 18 p3168 A66-34340
Equatorial transmission of geomagnetic
micropulsations through ionosphere and
lower exosphere below 2000 km
altitude 18 p3107 A66-34526
Three-dimensional polarizations of high-
latitude micropulsations derived from
conjugate point observatories from
hydromagnetic wave-ionospheric current
model 18 p3107 A66-34527
Transitions of steady flows of conducting
gases through two successive oblique MHD
shock waves 18 p3147 A66-34726
Dynamical behavior of cosmic ray gases,
noting modes of hydromagnetic wave
propagation and static equilibrium
configurations for thermal interstellar gas
and field 18 p3178 A66-34759
Incapability of looping trajectories existing
in finite amplitude hydromagnetic waves
propagating across magnetic field in quasi-
neutral cold collision-free
plasma 18 p3148 A66-34908
MHD wave equation for compressible
infinitely conducting fluid formulated in
Cartesian tensor form 18 p3103 A66-34935
Energetic particle interaction with
hydromagnetic shock wave, noting case of
particle in radiation belt 19 p3451 A66-35250
Hydromagnetic wave induced variations in

- plasma velocity and magnetic field in interplanetary space measured by Mariner II 19 p3466 A66-36766
- Latitudinal variation of Pc-1 micropulsation propagation, examining attenuation by ionospheric F region duct that acts as waveguide for hydromagnetic waves 20 p3554 A66-38203
- Sinusoidal hydromagnetic pulsations noting morphological properties, planetary distribution and inverse dependence of amplitude, frequency and duration on solar activities 21 p3733 A66-38780

- MHD and fluid dynamics interpretation of solar wind-comet interaction 18 p3169 A66-34355
- Discontinuities in plasma parameters of solar wind satisfy conditions of Mhd and can be treated as shock waves and stationary contact surfaces 19 p3452 A66-35980
- Book on space electrodynamics noting application of MHD, plasma properties, waves, interaction with magnetic field, shock waves, solar atmospheric motion, etc 20 p3631 A66-37984
- Plasma flux interaction with external

- magnetic fields, noting equations of flexible current turn correspond to MHD equations 21 p3787 A66-39047
- MHD analysis of luminescence and widening of tail of Finsler 1937 V Comet passing through solar corpuscular stream containing frozen-in magnetic field 21 p3814 A66-39277
- Book on MHD covering fundamental equations, boundary conditions, compressible flow, steady flow MHD simple and shock waves, etc 22 p3957 A66-40619
- Planetary scale atmospheric circulations of Jupiter and Saturn using fluid dynamics, noting rotation effects 23 p4129 A66-41679
- Free and confined turbulent and free minar plane jets in highly diffused magnetic fluid 23 p4107 A66-42005
- Book on instrumentation for high speed plasma flow including magnetic field balance, transducers, flow angle indicator, HD profile meter, etc 24 p4211 A66-42487
- Book on theory and application of plasma physics including adiabatic charged particle motion, MHD characteristics, shock waves and hydromagnetic flow 24 p4246 A66-43109
- MAGNETOHYDROSTATICS**
- A FLUID MECHANICS**
- A PLASMA PHYSICS**
- Magnetohydrostatic models of long-duration spot of depth 1000 km 06 p0954 A66-16466
- Magnetohydrostatic cavity formed around stem of line currents in infinitely conducting atmosphere 14 p2279 A66-28394
- Buoyancy and magnetohydrostatic stability of magnetic body immersed in magnetizable fluid 16 p2749 A66-31757
- Finite conductivity and heat release on magnetohydrostatic equilibrium of thermodynamically ideal plasma 23 p4099 A66-41081
- Fluidmagnetic buoyancy effects in microhydrodynamic /FHD/ flows and applications of Ernschaw levitation theorem 23 p4057 A66-41885
- MAGNETOIONIC PLASMA**
- Plasma compression effect of space vehicle magnetoionic medium, discussing section and removal of quasi-trapped ions 08 p1302 A66-18756
- VLF dipole antenna impedance values, magnetoionic and collision effects in ionospheric magnetoplasma 17 p2874 A66-32386
- Maxwell equation solution for source currents in unbounded magnetoionic medium with uniaxial dielectric tensor, using Fourier transform technique 17 p2959 A66-32962
- Governing equations for electromagnetic phenomena in lossy magnetoionic media in terms of compressivity tensor, deriving wave equations which are decoupled, giving resulting uncoupled differential equations 19 p3305 A66-36412
- Axially oriented point source current and filament with triangular current distribution in magnetoionic medium, examining ion sheath effect on radiation characteristics 20 p3516 A66-37624
- Third moment equation derived from Blizmann-Vlasov equation for wave propagation in plasmas with very strong magnetic field used instead of state equation 20 p3521 A66-38363
- Radiation in magnetoplasmas, noting correctness of infinity catastrophe theory for dielectric radiation sources in magnetoionic media 23 p4105 A66-41632
- Antenna radiation theory, noting iteration of incorrectness of infinity catastrophe theory and application to oscillating dipole in uniaxial medium 23 p4047 A66-41633
- Radiation resistance of antennas in magnetoplasma, considering inapplicability of versible power concept to steady state mode 23 p4047 A66-41634
- Wave packet propagation at whistler and hydromagnetic frequencies in magnetoionic medium, noting group refractive index 23 p4041 A66-41643
- LF drift waves observed in thermally ionized cesium plasma in magnetic field with variable curvature 23 p4106 A66-41710
- MAGNETOIONICS**
- Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetoionic wave 02 p0224 A66-12134
- Propagation and diffraction of electromagnetic waves in inhomogeneous magnetoionic medium, noting exoionospheric propagation and Hamiltonian optics 02 p0192 A66-12208
- Exoionospheric communications system with ideal matched filter and signal processing at transmitter for increased range and secure coding possibilities 04 p0480 A66-13627
- Magnetoionic splitting of radio signal in E and F layers, comparing calculated and theoretical gyrofrequency values 04 p0482 A66-13861
- Current distribution for cylindrical dipole of infinite length immersed in homogeneous lossless magnetoionic anisotropic ionosphere 06 p0827 A66-16033
- Antenna radiation pattern in anisotropic medium such as ionosphere in presence of Earth magnetic field 09 p1340 A66-19842
- Admittance measurements for antenna in ionosphere, effect of local magnetic field variations, plasma frequency and gyrofrequency 09 p1341 A66-19854
- LF admittance measurements on orthogonal dipoles in ionosphere 09 p1341 A66-19855
- Radio wave absorption coefficients calculated, using approximations of magnetoionic formulae 09 p1341 A66-19860
- High RF magnetoionic propagation effects on polarization scattering matrix 10 p1501 A66-21628
- Correlation characteristics of signal reflection and magnetoionic components obtained in phase fluctuation measurements 11 p1696 A66-22414
- Antenna orientation effect on polarization components of radio waves reflected from ionosphere, noting occurrence and properties of magnetoionic component of polarization 12 p1869 A66-24273
- Magnetoionic couplings and electromagnetic wave propagation in horizontally stratified layer of gyrotropic medium 14 p2283 A66-27125
- Surface waves supported by plane boundary of semiinfinite region of gyrotropic plasma analyzed when magnetostatic field direction is parallel to interface and propagation direction 14 p2241 A66-27961
- Estimation of apparent vertical wind velocity from measurement of phase variation of ordinary and extraordinary magnetoionic wave 14 p2287 A66-28091
- Generalized full wave theory equations derived for EM plane wave propagation through magnetoionic medium for electron collision frequencies proportional to electron energy 22 p3869 A66-40805
- MAGNETOMETER**
- Flux-gate magnetometer device for determining attitude of satellite or rocket probe, considering magnet perturbation due to solar wind and solar storms 01 p0069 A66-10786
- Transistorized proton magnetometer for observatory and field measurements, analyzing use of free-proton precession to excite electromagnetic signal 01 p0072 A66-11073
- Magnetometer on Mariner IV Mars probe for interplanetary magnetic field and Mars magnetic field measurements 01 p0073 A66-11117
- High speed transistorized magnetometer 02 p0230 A66-11817
- Magnetic torquing system controlling satellite spin rate and spin axis orientation 05 p0769 A66-14521
- Highly sensitive optically pumped helium magnetometer measuring static magnetic fields of 10 to 100 oe at temperatures from 300 to 1.5 degrees K 07 p1032 A66-17471
- Towed Z magnetometer with pendulum supported by Cardan suspension, comparing measurements with those obtained on Zaria 08 p1223 A66-19055
- High sensitivity spinner magnetometer for remnant magnetic polarization measurement of rocks in paleomagnetic research 08 p1223 A66-19081
- Gamma-level ring-core magnetometer sensitivity parameters, noting frequency, dynamic differential permeability, number of pickup turns, etc 10 p1508 A66-21415
- Magnetopause location, boundary positions and magnetic noise spectral data obtained with triaxial search coil magnetometer aboard Ogo I satellite 11 p1701 A66-23148
- Counting system for use with rubidium magnetometer for ground observations of geomagnetic micropulsations with sensitivity of 1/100 gamma 13 p2085 A66-26752
- Generalization of measurement of vertical and horizontal components of terrestrial magnetic field intensity with proton magnetometer 14 p2295 A66-27624
- Transistorized NMR magnetometer 14 p2296 A66-27732
- Metrological characteristics of three-component magnetometers with ferromagnetic probes installed in Elektron II space station 15 p2497 A66-28501
- Magnetometer for determining position of sounding rocket 16 p2707 A66-30997
- Geomagnetic micropulsations observed, using five-station array of three-component induction variometers 17 p2923 A66-33360
- Interplanetary magnetic field measurements using flux gate magnetometer sensor mounted on Pioneer VI space probe, noting various graphs 18 p3108 A66-34538
- Flux gate magnetometer for interplanetary magnetic field measurements 19 p3356 A66-35674
- Final estimate of interplanetary magnetic field at 1 AU provided by Pioneer V uniaxial induction-coil magnetometer 20 p3649 A66-37336
- MAGNETOMETRY**
- Midlatitude ionospheric currents detected by rocketborne rubidium vapor magnetometers in Nike-Apache rockets 05 p0667 A66-14791
- Oscillations of geomagnetic field recorded at two high-latitude conjugate points, noting frequency spectra and amplitude relationships 05 p0673 A66-15049
- VLF anomalies on midlatitude paths during local nighttime not caused by solar flares, nuclear detonations or magnetic storms 13 p2074 A66-26365
- MAGNETOPOUSE**
- Magnetospheric boundary /magnetopause/ dependence on intensity of solar wind 05 p0767 A66-15750
- High time-resolution measurement of knee position in magnetospheric ion density using whistlers 10 p1527 A66-21137
- Electron density and total electron content in force tubes near knee in magnetospheric ionization studied, using whistlers 10 p1527 A66-21138
- Magnetopause location, boundary positions and magnetic noise spectral data obtained with triaxial search coil magnetometer aboard Ogo I satellite 11 p1701 A66-23148
- Solar wind parameters and geomagnetic activity determined from satellite plasma experiments and observations of magnetopause locations 13 p2075 A66-26368
- Reconnection mechanism for geomagnetic and interplanetary field lines, estimating field-cutting efficiency at magnetopause 18 p3231 A66-34348
- Magnetopause boundaries and geomagnetic field at magnetopause and interaction region by IMP I 18 p3106 A66-34352
- Energy spectrum change of group of electrons being convected downwind in magnetosheath and behind Earth bow shock 18 p3170 A66-34521
- SSC rise time, discussing solar wind inhomogeneity effects, magnetopause, wave front broadening, etc 20 p3635 A66-38220
- Shape of magnetopause determined by solving equations for boundary of geomagnetic field with trapped particles 20 p3641 A66-38331
- Vacuum conditions in space based on data obtained by Earth-orbiting satellites, noting shock front and magnetopause caused by interaction of solar wind with geomagnetic field 22 p3979 A66-40205
- MAGNETOPLASMA**
- Helicon wave propagation and related magnetoplasma effects in semiconductors, using microwave version of Rayleigh refractometer 01 p0026 A66-10541

Nonlinear interaction between transverse gyro wave and longitudinal temperature dependent wave propagating in magnetized plasma 01 p0028 A66-10563

Singularities of kinetic /plasma/ dispersion equation 01 p0113 A66-10637

Interaction of polarized plasma flows in uniform transverse magnetic field with imposed magnetic field induced by longitudinal current-carrying rods 01 p0114 A66-10701

Probability equations for scattering and decay of normal waves in nonlinear interaction with plasma electrons and ions 01 p0114 A66-10720

Nonlinear theory LF oscillation excited in magnetoplasma by ion beam 02 p0268 A66-11779

Nonlinear interaction of two electromagnetic waves in infinite cold magnetoactive plasma 02 p0192 A66-11839

Possibility of determining electron concentration and magnetic field of plasma by measuring drift wave frequencies 02 p0291 A66-12114

Attenuation of uniform turbulent motion in incompressible fluid located in magnetic field 02 p0270 A66-12179

Scattering of H-polarized plane waves by infinitely long axially magnetized cylinder of uniform plasma 04 p0484 A66-14100

Light scattering theory and generation of second harmonic in plasma in external magnetic field 04 p0555 A66-14333

Ionization and recombination processes in multicomponent steady nonequilibrium flow in MPD energy converter 04 p0555 A66-14335

Nonsteady cylindrical waves propagating in cold rarefied plasma situated in strong magnetic field 04 p0557 A66-14430

Magnetic field interaction with ring current in plasma gun for multiple acceleration and reflection of plasmoids 04 p0558 A66-14490

Formalism for determining linearized hydromagnetic wave phenomena in perfectly conducting plasma permeated by static magnetic multipole field 05 p0720 A66-14709

Stability diagrams for MGD channel flow of conducting fluid for different coplanar magnetic field intensities 05 p0721 A66-14710

Unstable precession of plasma particles in gradB under influence of drag forces associated with viscous or resistive energy dissipation in background plasma 05 p0721 A66-14711

Third harmonic component of current density in plasma in presence of electric and magnetic fields, analyzing generation and propagation of third harmonic of electromagnetic wave in magnetoplasma 05 p0724 A66-15188

Separation constants for finite gyromagnetic plasmas, discussing ion motion effects 06 p0826 A66-16024

Nanosecond electromagnetic pulse dispersion in longitudinally magnetized plasma confined in coaxial transmission line 06 p0826 A66-16026

Traveling magnetic wave plasma accelerator, discussing representative MHD equations, force and output power parameters and energy relations [AIAA PAPER 66-72] 06 p0942 A66-16253

Axial variation of plasma column density in nonuniform axial magnetic field determined by theory for ambipolar diffusion and Boltzmann transport 06 p0917 A66-16649

Spectral distributions for current and field fluctuations in nonequilibrium plasma located in external magnetic field 06 p0918 A66-16868

Flute oscillations of rarefied plasma situated in cylindrically symmetric magnetic field with nonzero shear 07 p1086 A66-17650

Resistive instability of shearing magnetic fields in incompressible plasma explored by perturbation procedure 07 p1088 A66-17947

Nonlinear interaction between ordinary and extraordinary wave modes for collisionless cold magnetoplasma 07 p1090 A66-18203

Anisotropic transverse magnetoplasma effects in cubic semiconductors, examining reflectance and elliptic polarization 07 p1102 A66-18204

Resonance heating of decaying cold plasma by fast magnetoacoustic wave of quasi-

stationary longitudinal electromagnetic field 07 p1090 A66-18258

Propagation mode in waveguide filled with partially ionized magnetoplasma, obtaining dispersion relations for hydromagnetic and acoustic waves by three-fluid method 07 p1091 A66-18408

Hall effect in two-dimensional flow of conducting gas interacting with external inhomogeneous magnetic field along insulating plane 08 p1205 A66-18533

Compensation magnetic probe and plasmascopy study of plasmoid motion in uniform axisymmetrical magnetic field 08 p1264 A66-19182

Interstellar and intergalactic plasma instability effects on energy distribution functions, cosmic ray diffusion and direction and interspace field interaction 08 p1285 A66-19448

Evaluation and comparison of methods of calculating antenna impedance in ionized medium 09 p1349 A66-19844

Radiative and capacitive terms of impedance of finite cylindrical antenna calculated in magnetoplasma with losses by using Kogelnik theory 09 p1349 A66-19845

Plasma resonance excitation by small dipole antenna operating in pulsed mode in presence of and in absence of external magnetic field 09 p1340 A66-19849

Transverse diffusion theory and static and HF conductivity of plasma in strong magnetic field 09 p1406 A66-19962

Collision effects taken into account in determining conductivity tensor of quantum plasma in uniform magnetic field 09 p1407 A66-20077

Current density distribution in MPD arc jet exhaust measured, using Hall effect sensors [AIAA PAPER 66-116] 09 p1433 A66-20089

Complex Doppler effect in dense cold magnetized plasma 09 p1343 A66-20339

Electromagnetic-wave radiation peculiarities in homogeneous anisotropic dispersive magnetic plasma 09 p1343 A66-20342

Self-focusing of longitudinal electromagnetic waves in nonlinear plasma in strong magnetic field 09 p1343 A66-20343

Wave propagation in magnetoplasmas noting momentum transfer, dispersion relations, temperature relaxation effects and collisional energy exchange 09 p1408 A66-20372

Resonance heating of decaying cold plasma by fast magnetoacoustic wave of quasi-stationary longitudinal electromagnetic field 09 p1409 A66-20902

Performance capabilities of Hall current accelerators determined from parameters influencing anode power loss [AIAA PAPER 66-201] 10 p1563 A66-21443

Anomalous diffusion and instabilities of argon plasma in strong magnetic field 10 p1564 A66-21568

Electron density and temperature measured in exhaust of magnetoplasma dynamic /MPD/ source, using Langmuir probe and spectrometry [AIAA PAPER 65-298] 10 p1594 A66-21780

Nonpotential Alfvén drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 10 p1569 A66-21964

Cerenkov radiation from charge spiralling in warm plasma under action of infinite magnetostatic field 11 p1745 A66-22494

Plane electromagnetic wave scattering by conducting cylinder surrounded by hot magnetoplasma sheath 11 p1657 A66-23112

Interaction of polarized plasma flows in uniform transverse magnetic field with imposed magnetic field induced by longitudinal current-carrying rods 11 p1747 A66-23303

Direction and magnitudes of electric polarization vectors for plasma moving through helical and toroidal magnetic fields 11 p1747 A66-23304

Electric polarization field components appearing in plasmoid moving in toroidal magnetic field 11 p1747 A66-23305

Dynamic stabilization of direct discharge in magnetic field 12 p1922 A66-24215

Plasma effect on dipole magnetic field and solar wind plasma-geomagnetic field interaction 12 p1943 A66-24391

Charged particle motion in time dependent axially symmetric magnetic field, using drift theory of plasma radial compression 12 p1922 A66-24462

Microwave scattering enhancement in turbulent magnetoplasma 12 p1824 A66-24810

Harmonic generation in short magnetized plasma column from helical oscillation near critical magnetic field for helical instability 12 p1925 A66-24815

Design and construction of probe measuring density of neutral atoms in quiescent alkali metal magnetoplasma, noting vacuum system, electric circuitry, etc 12 p1884 A66-24984

Nonlinear kinetic equation for waves and particles in nonisotropic plasma where anisotropy is due to magnetic field, noting probability of wave absorption-emission by particles 13 p2140 A66-25409

Helical instabilities in magnetoplasmas studied, using low-power level microwave propagation techniques 13 p2143 A66-25716

Two-fluid approach for solutions to hydromagnetic waves including pressure, viscosity, heat conduction, etc, using partial differential equations 13 p2146 A66-25741

Tenuous hydrogen plasma injection into axial magnetic cusp field at entrance of long solenoid 13 p2147 A66-25749

Radiative energy losses for charge moving in magnetoactive plasma with random electron density inhomogeneities 13 p2148 A66-26038

Surface electron density in magnetoplasmas and microwave reflection from anisotropic plasma surface 13 p2149 A66-26241

Intense radiation emission at electron gyrofrequency harmonics from magnetoplasmas, discussing resonances, dispersion relations, electron trajectory perturbations, etc 13 p2155 A66-26675

Coupled wave equation for homogeneous gyrotropic compressible warm plasma derived, using partial differential equations 14 p2340 A66-27037

Ring phenomena in ionospheric magnetoplasma as evidenced by spikes on ionograms from Alouette satellite 14 p2283 A66-27513

Geophysical laboratory simulation of solar wind-magnetosphere interaction and satellite perturbation due to motion in magnetoplasma 14 p2284 A66-27514

Quasi-linear perturbation theory of transverse electromagnetic waves from instabilities in nonthermal magnetoactive plasma, using Boltzmann equation, applied to magnetospheric MHD emissions 14 p2286 A66-27982

Possibility of determining electron concentration and magnetic field of plasma by measuring drift wave frequencies 14 p2385 A66-28073

Nonlinear conduction tensor of magnetoactive plasma, measuring effectiveness of generation of longitudinal and transverse fields during resonance merging of waves 14 p2348 A66-28469

Input impedance of small loop of uniform electric current immersed in anisotropic cold magnetoplasma calculated by induced emf method 15 p2548 A66-28593

Time-dependent behavior of diffusion of plasma inhomogeneities with or without particle drift 15 p2595 A66-29085

Ion motion effect on spectral region and energy density of Cerenkov excitation produced by charge moving in cold magnetoactive plasma 16 p2755 A66-30091

Magnetoplasma diffusion measurements in narrow discharge tube, using classical ambipolar diffusion model for weak magnetic fields 16 p2780 A66-30802

Thermal ionization for low temperature plasma confined in magnetic field, examining magnetic field effect on ionization 16 p2762 A66-31166

Quasi-linear approximation of Cerenkov and cyclotron damping of electromagnetic waves in magnetoactive plasma, considering collisions of wave-absorbing resonance particles with plasma 16 p2762 A66-31173

Quasi-linear equations for inhomogeneous plasma in magnetic field applied to pumping of energy of Langmuir oscillations 16 p2762 A66-31176

- Wave radiation of current-carrying plane of magnetoactive low density plasma layer, assuming that magnetic field is stable and normal to layer 16 p2655 A66-31545
- Stationary nonlinear waves propagating across magnetic field in cold rarefied three-component plasma consisting of electrons and light and heavy ions 17 p2964 A66-31889
- Nonstationary radial motion of infinitely long conducting gas cylinder in time-varying longitudinal magnetic field 17 p2964 A66-31891
- MHD theory of stability reduced to fourth-order differential equation with arbitrary parameter for highest order derivative 17 p2964 A66-31893
- Spectral distribution of thermal emission intensity of magnetically active plasma bounded by cylindrical surface 17 p2965 A66-32240
- Induced Raman scattering of longitudinal waves in homogeneous unbounded plasma in homogeneous magnetic field 17 p2965 A66-32324
- Circular toroidal plasma stability under average magnetic well conditions 17 p2966 A66-32424
- Convective effects role in exciting axisymmetric oscillations in plasma cylinder in magnetic field with aid of radius restricted electron beam 17 p2968 A66-32538
- Kinetic theory of electromagnetic wave propagation in confined magnetoactive plasma 17 p2968 A66-32539
- Conical induction plasma gun construction in strongly preionized regime and results of electrostatic probe measurements made with discharge camera 17 p2969 A66-32547
- Negative absorption /amplification or oscillation/ of microwaves by cylindrical cavity coaxial with plasma column along magnetostatic field 17 p2973 A66-32978
- Ambipolar potential in magnetoactive cold plasma applied to power generation and effects of electric field on diffusion coefficient 17 p2973 A66-32984
- Electromagnetic wave propagation in cylindrically stratified plasma, noting ODE describing transverse propagation of axial component 17 p2876 A66-33279
- Scaling procedure for deriving approximate closed-form expression for impedance of spherical probe immersed in cold magnetoplasma 18 p3109 A66-33546
- Dispersion relations of plane surface waves on grounded anisotropic magnetoplasma slab immersed in free space 18 p3068 A66-34084
- Reconnection velocity of oppositely directed field lines of two adjacent magnetic field regions in idealized plasma configuration 18 p3168 A66-34345
- Interstellar and intergalactic plasma instability effects on energy distribution functions, cosmic ray diffusion and direction and interspace field 18 p3169 A66-34477
- Transverse propagation of waveguide modes in conducting cylindrically stratified magnetoplasma analogous to VLF radio waves propagating in Earth-ionosphere 18 p3071 A66-34565
- Cavity natural resonant frequencies in cylindrically stratified magnetoplasma examined by exact harmonic series solution 18 p3072 A66-34566
- Dispersion characteristics of duct propagation of whistler radio waves along depressed magnetoplasma slab 18 p3072 A66-34568
- Linearized equations describing transverse waves in relativistic plasma embedded in magnetic field and in presence of nonrelativistic plasma 18 p3148 A66-34907
- Incapability of looping trajectories existing in finite amplitude hydromagnetic waves propagating across magnetic field in quasi-neutral cold collision-free plasma 18 p3148 A66-34908
- Reflection and loss of particles in collisionless plasma in one-dimensional magnetic mirror field in presence of parallel electric field 18 p3148 A66-34910
- Ion drift and diffusion of magnetically confined plasma due to inclination of conducting end-plate having electron sheath which reflects ions 18 p3149 A66-34912
- Transverse boundary effects on ionic acoustic wave propagation in magnetoplasma 18 p3150 A66-34938
- Longitudinal propagation of superlow frequency electromagnetic waves through plane-laminar magnetoactive ionospheric plasma 19 p3296 A66-35298
- Jet compression requirements for circulating working medium in closed cycle magnetoplasma dynamics /MPD/ electrical power generator [AIAA PAPER 65-466] 19 p3280 A66-35621
- Transverse propagation of electromagnetic waves in cylindrically stratified axially magnetized plasma, noting profiles of permittivity tensor 19 p3303 A66-35856
- RF propagation and absorption calorimetric measurements in magnetoplasma near electron cyclotron resonance, noting power conversion 19 p3305 A66-36420
- Rotating plasma experiments, discussing creation by discharge, boundary momentum balance and voltage 19 p3415 A66-36514
- Diffusion coefficients for transport of plasma across magnetic field calculated directly from motion of test particles 19 p3416 A66-36520
- Induced scattering of electromagnetic waves from magnetoactive plasma particles 19 p3418 A66-36533
- Acceleration, reflection and accumulation of plasma by gradients of HF and static magnetic fields at electron cyclotron resonance 19 p3426 A66-36567
- Motion of plasma stream injected transverse to magnetic field, examining stream action as it crosses region where magnetic field lines reverse direction about field null line 19 p3426 A66-36568
- Plasma jet deflection in magnetic field set up by current flowing through four bars so that directions of flow were opposite in adjacent bars 19 p3426 A66-36569
- Plasma behavior studied in general atomic toroidal octopole machine in which magnetically confined plasma is MHD stable 19 p3426 A66-36570
- Plasmoid motion in magnetic field of toroidal solenoid, examining contribution to closing currents and decontamination from heavy ions 19 p3427 A66-36571
- Plasma generating gun using coaxial electrodes, gas injection and preionization device for regulation with plasma purification by injection into magnetic field with double curvature 19 p3427 A66-36572
- Plasma electrons heating by UHF fields analyzed in DC magnetic field, varied for HF electromagnetic or plasma wave propagation 19 p3431 A66-36591
- Electromagnetic field penetration into magnetoactive plasma with calculation of total surface impedance of plasma 20 p3512 A66-37135
- Second-harmonic electron cyclotron resonance in hydrogen plasma from HF ion source with inductive coupling situated in transverse magnetic field 20 p3607 A66-37407
- Quasi-static approximation of dipolar resonance of cold homogeneous cylindrical magnetoplasma column, examining magnetic splitting of Herlofson-type resonances 20 p3528 A66-37451
- Behavior of transverse wave numbers /separation constant/ for electromagnetic wave propagation in anisotropic homogeneous cold plasma of arbitrary cross section 20 p3608 A66-37454
- Stabilizing effect of vertical uniform magnetic field on Rayleigh-Taylor instability for electrolyte solutions 20 p3608 A66-37458
- Electrodynamic properties of homogeneous magnetoactive plasmas including wave propagation, excitation, scattering, etc 20 p3608 A66-37488
- Probability equations for scattering and decay of normal waves in nonlinear interaction with plasma electrons and ions 20 p3609 A66-37658
- Macroscopic hydromagnetic equations with magnetic viscosity for collisionless plasma, determining Larmor radius ratio to characteristic length, using Vlasov equation in drift frame 20 p3610 A66-38054
- Plasma blob capture when injected perpendicular to magnetic force lines attributed to electrostatic repulsion of polarization space charge formed by interaction 20 p3610 A66-38057
- Shock waves in rarefied magnetoplasma and collisionless shock waves ahead of geomagnetic cavity in solar wind 20 p3611 A66-38221
- Electromagnetic wave propagation in plasma along weakening magnetic field, considering spatial dispersion associated with ion thermal motion 21 p3781 A66-39010
- Electromagnetic wave excitation in magnetoplasma by external currents using kinetic theory, obtaining expression for energy losses, analyzing electron and ion cyclotron resonance 21 p3782 A66-39016
- Electrical conductivity of dense plasma in strong electric field, when electron gas accelerated by field produces beam of runaway electrons 21 p3784 A66-39029
- Electric-and magnetic-field parameters measured during discharge half-cycle in coaxial plasma source 21 p3785 A66-39038
- Resonance interaction indicated by mass spectroscopic studies of energy spectra of plasmoid protons with spatially-periodic magnetic field 21 p3786 A66-39044
- Fast neutral hydrogen atom beams used to probe plasma density and time- and space-dependent plasma distribution in longitudinal magnetic field 21 p3786 A66-39046
- Plasma flux interaction with external magnetic fields, noting equations of flexible current turn correspond to MHD equations 21 p3787 A66-39047
- Fast charged particle and electromagnetic field fluctuations interaction with nonequilibrium plasma 21 p3791 A66-39155
- Refractive index equation derived for oblique wave propagation in compressible general magnetoplasma with arbitrary directed magnetostatic field 21 p3793 A66-39350
- Nonpotential Alfvén drift waves and magnetic noise in magnetosonic stationary hydrogen plasma 21 p3794 A66-39543
- Homogeneous rotating low density plasma permeated by magnetic field with anisotropic velocity distribution may exhibit hose instability as well as gravitational instability 21 p3794 A66-39562
- Current density, electron mobility, magnetoresistance, negative resistance and impact-ionization-produced solid state magnetoplasma oscillations in InSb single crystal semiconductor at high electric and magnetic fields 21 p3805 A66-39568
- Electron-collision-induced magnetoplasma instability, using Boltzmann equation for wave dispersion 21 p3794 A66-39571
- Wave theory calculation of moments of velocity change of charged particle in magnetoplasma 21 p3794 A66-39573
- Predicted plasma mode in microwave frequency range for magnetoplasma excitations in germanium, applying theory to n-type and p-type lead telluride 22 p3960 A66-39805
- Rayleigh-Taylor instability of plasma is unaffected by inclusion of Hall current and electron-inertia terms in generalized Ohm law 22 p3956 A66-40420
- Dynamic stabilization of direct discharge in magnetic field 22 p3957 A66-40579
- Cosmic radio wave, whistler and transmitted radio wave interactions with ionospheric magnetoplasma in collision-dominated, photoequilibrium and photoionization-dominated regions 22 p3916 A66-40873
- Analytical expression derived for current density of arc moving extinguishing chute by force of external magnetic field 23 p4099 A66-41057
- Finite conductivity and heat release on magnetohydrostatic equilibrium of thermodynamically ideal plasma 23 p4099 A66-41081
- Group velocity of wave packet propagating radially across plasma immersed in static axial magnetic field, examining ringing phenomena due to pulsed transmission 23 p4101 A66-41261
- External control of radial distribution of plasma density for magnetoplasma stabilization against helical instability 23 p4103 A66-41486
- Interaction models, negative energy waves and electrostatic instabilities 23 p4103 A66-41489

Reflection and propagation of electromagnetic pulses through dispersive media, degradation of step carrier in magnetoplasma analyzed by Laplace inversion technique 23 p4039 A66-41589

Nonlinear interaction of electromagnetic waves in magnetoplasma for field-parallel wave propagation 23 p4041 A66-41642

Toroidal plasma equilibrium prevailing in Q device with curved magnetic lines analyzed from two-fluid equations 23 p4106 A66-41711

Superconductor solenoid application to laser devices and development of magnetic plasma traps for research in controlled thermonuclear reactions 23 p4115 A66-41743

Exact solution for eigenfrequencies of cylindrical microwave cavity partially filled with magnetized plasma 24 p4240 A66-42303

Elimination of singularity in power radiated by point electric dipole in unbounded magnetoplasma within certain frequency range 24 p4241 A66-42373

Coupled electromagnetic and electroacoustic wave equations for propagation in stratified compressible magnetoplasmas 24 p4171 A66-42379

Drift cyclotron oscillations of inhomogeneous collision plasma propagating across magnetic field, taking into account particle collisions with aid of Landau collision integral 24 p4243 A66-42530

Electro-magnetoplasma gas dynamics /EMPGD/ equations based on single fluid continuum-theory macroscopic plasma-dynamics theory 24 p4244 A66-42834

Dispersion equation for cyclotron electromagnetic waves for magnetoactive plasma injected with charged particles 24 p4245 A66-43016

Convective processes in magnetoactive plasma flows transverse to homogeneous magnetic fields, based on multifluid equations derived from Boltzmann equation for ionization and recombination reaction 24 p4245 A66-43069

MAGNETORESISTANCE

Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor, considering electron spin and conduction band nonparabolicity 01 p0124 A66-10770

Piezomagnetoresistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 04 p0569 A66-14358

Temperature dependent component in low temperature thermoelectric power of doped n-germanium observed in liquid helium region, noting negative magnetoresistance 04 p0570 A66-14369

Measurement of negative magnetoresistance in n-type silicon 07 p1097 A66-17625

Galvanomagnetic effects in semiconductors, including Hall effect and magnetoresistivity, noting influence of carrier scattering on lattice vibrations and impurities 08 p1267 A66-18607

Electron spin effect on quantum oscillations of magnetoresistance and Hall effect in n-InSb single crystal 08 p1269 A66-18971

Weak-field magnetoresistance and impurity activation energy in n-type aluminum antimonide single crystal 08 p1275 A66-19363

Magnetoresistance measurements of germanium in strong magnetic field 08 p1277 A66-19616

Microwave power generation by multiplication of direct current and microwave magnetic field, using biased intermetallic semiconductor magnetoresistive element in cavity 08 p1198 A66-19746

Variable impedance device using galvanomagnetic effects in semiconductors 09 p1351 A66-19932

Logarithmic temperature dependence of electrical resistivity found in metallic impurity conduction in n-type germanium 09 p1430 A66-20849

Magnetoresistance of crystalline beta-rhombohedral boron and amorphous boron film as function of magnetic field, temperature, specimen purity and crystal orientation 10 p1580 A66-21725

Variation in thermoelectromotive force and magnetoresistance in quantizing magnetic field in indium antimonide semiconductor,

considering electron spin and conduction band nonparabolicity 11 p1749 A66-22281

Magnetoresistance effect on p-and n-type cadmium antimonide single crystals for various arrangements of electric and magnetic fields 11 p1756 A66-23017

Elastoresistance coefficients for n-type cadmium telluride determined at 300 and 195 degrees K 12 p1926 A66-23713

Magnetoresistance of reduced and doped strontium titanate to investigate band structure 12 p1927 A66-23722

Hall effect and galvanic magnetoresistance measurements in single crystal /mercuric manganese/ telluride solid solutions 12 p1927 A66-23729

High field magnetoresistance and random inhomogeneities in arsenic-or antimony-doped n-type germanium 12 p1931 A66-24805

Magnetoresistance effect applied to Rotatable Initial Susceptibility II films, explaining resulting hysteresis loops and torque curves 13 p2161 A66-25183

Magnetic diffusivity measurement for cylinder of type II Nb-Zr superconductor at 4.2 degrees K, using magnetoresistance probe 14 p2350 A66-26878

Uniaxial anisotropy field measurement for magnetic annealing of permalloy films 14 p2353 A66-26903

Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763

Shubnikov-de Haas oscillations in magnetoresistance of Li-diffused Te-doped n-type GaSb 14 p2366 A66-27764

Piezomagnetoresistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 14 p2368 A66-28256

Transport properties in indium antimonide under magnetic field at microwave frequency, showing effect of angular frequency times relaxation time /of electrons and holes/ 15 p2566 A66-29393

Resistance anomaly in n-type InSb at very low temperatures, noting experimental results 16 p2768 A66-30140

Hall effect and related phenomena, noting magnetic-temperature-impurity effect 16 p2785 A66-31572

Transverse reluctance of bismuth telluride in pulsed magnetic fields revealing fine structure of Shubnikov-De Haas oscillations interpreted as spin-splitting of Landau levels 16 p2786 A66-31695

Magnetoresistance effect in semiconductors applied to microwave power measurement, noting multiplying action between electric and magnetic field components of wave 17 p2885 A66-32288

Magnetoresistance measurements of germanium in strong magnetic field 17 p2983 A66-33130

Quantum oscillations in magnetoresistance, Hall coefficient and thermoelectric power in strong transverse and longitudinal magnetic fields for n-InAs polycrystals at liquid helium temperature 19 p3438 A66-35479

Quantum oscillation of transverse and longitudinal magnetothermal emf in n-type indium antimonide compared with oscillations of transverse and longitudinal magnetoresistance and Hall coefficient 20 p3618 A66-37557

N-type Ge hot carrier Hall mobility, magnetoresistance, Maxwellian energy distribution, electron-electron and intervalley electron-phonon collisions 21 p3801 A66-38997

Galvanomagnetic effects in p-type aluminum antimonide, discussing field dependence of Hall effect and magnetoresistance 21 p3801 A66-38999

Metal strength in pulsed magnetic fields at low temperatures, noting resistance of copper wire as function of number of pulses 21 p3750 A66-39064

Current density, electron mobility, magnetoresistance, negative resistance and impact-ionization-produced solid state magnetoplasma oscillations in InSb single crystal semiconductor at high electric and magnetic fields 21 p3805 A66-39568

MAGNETOSOLIDMECHANIC GENERATOR

Magnetosolidmechanic generator, direct energy conversion device similar to MHD generator except conduction medium is solid rather than fluid 07 p0994 A66-18321

MAGNETOSONIC RESONANCE

Spin-phonon interaction induced by ultrasonic wave in yttrium ferrite single crystals 08 p1278 A66-19629

Magnetoacoustic natural oscillations in solid MHD resonators 17 p2971 A66-32787

MAGNETOSPHERE

Motions of geomagnetically trapped particles and asymmetric configuration of magnetospheric trapping region caused by solar wind 01 p0060 A66-10159

Radio propagation experiment using transmitted VHF waves from OGO-A to deduce electron density in ionosphere and magnetosphere 01 p0063 A66-10892

Transfer and acceleration of particles in Earth magnetosphere effect on origin of radiation belt 02 p0283 A66-12110

Geomagnetic micropulsation periods relation to dimensions of magnetosphere, considering inverse dependence on level of magnetic activity 02 p0224 A66-12119

Particle-field interaction in magnetosphere discussing categories, properties, scale model experiments, etc 03 p0363 A66-12646

Gyroresonant interaction of electron and proton beam with electromagnetic waves in magnetosphere 03 p0419 A66-12675

Electron density distribution in magnetosphere inferred from dispersion characteristics of hydromagnetic wave propagating between hemispheres along geomagnetic field as in atmospheric whistlers 05 p0747 A66-14787

Fractional deviation of nose whistler group delay from zero-temperature model, assuming Maxwellian magnetosphere and gyrofrequency electron density distribution 05 p0631 A66-14836

Collisionless plasma theory, discussing characteristics and mechanisms of magnetosphere 05 p0674 A66-15250

Rocket and satellite data contribution to new physical description of aurora in which Earth magnetosphere acts like gigantic cathode ray tube 06 p0875 A66-16015

Disturbances caused by bodies moving through plasma and solar wind-magnetosphere interaction 06 p0869 A66-16907

Structure and variation of radiation belts during magnetic storm, including configuration of forbidden region in connection with magnetic field 06 p0951 A66-17048

Magnetospheric boundaries formation, noting neutral points on day and night sides and possible penetration of solar flux particles 06 p0877 A66-17170

Electrostatic field from E region and effect on motion of electrons trapped in magnetosphere 07 p1027 A66-17252

Radiation from Jupiter magnetospheric tail contributes to decametric noise 07 p1133 A66-17467

Approximate solution of magnetospheric free boundary for steady state interaction between field-free streaming plasma and magnetic dipole 07 p1088 A66-17952

Penetration of interplanetary plasma into magnetosphere, connected to aurorae and magnetic storms, noting that plasma need not behave like magnetofluid 07 p1138 A66-18081

Data analysis from Explorer XIV satellite, noting magnetic field measurements in tail of geomagnetic cavity 07 p1029 A66-18086

Scintillation counter satellite data on low energy electron flux and particle trapping in dark magnetosphere 08 p1218 A66-19394

Transition region magnetic field and polar magnetic disturbances, comparing Explorer XII data with ground measurements from Arctic observatories 08 p1218 A66-19399

Combined Faraday polarization and Doppler frequency measurements of lunar radar echoes of Earth magnetospheric wake 08 p1296 A66-19401

Fermi acceleration of charged particles in shock transition region beyond magnetosphere 08 p1219 A66-19407

Magnetic fields in magnetosphere, using electrostatic and electromagnetic cgs units, noting Earth field, high altitude and distant fields, etc 09 p1371 A66-20278

Satellite emission of variable frequency

signal guided by ionization irregularity
existing along force line of geomagnetic
field 09 p1374 A66-20886
Radiation belts theorized as resulting from
penetration of charged particles into
magnetosphere, accelerated by reversed
phase of magnetic storm 09 p1444 A66-21022
Formation of radiation belts attributed to
inward particle drift into interior of
magnetosphere 09 p1444 A66-21024
Simultaneous measurements of magnetic
field and positive ion fluxes in Earth
magnetosphere from Elektron II
satellite 09 p1444 A66-21025
Earth magnetosphere measurements in
radiation belt region from Elektron II
satellite 09 p1444 A66-21026
Earth magnetic field measurements with
three-component ferroprobe magnetometers
on Elektron II and Elektron III
satellites 09 p1378 A66-21027
Structure of solar corpuscular flux and
interaction with Earth
magnetosphere 09 p1444 A66-21028
Simulation of solar-wind magnetosphere
interaction
[AIAA PAPER 66-154] 10 p1559 A66-21421
Interaction of solar corpuscular stream
with geomagnetic field forming Earth
magnetosphere and particle penetration
within magnetosphere in neutral point
region 11 p1696 A66-22407
Geomagnetic field confinement by solar
wind to form magnetosphere and magnetic
tail 11 p1699 A66-23127
Existence of collisionless MHD bow shock
wave attached to
magnetosphere 11 p1699 A66-23133
Mean radial particle displacement per unit
time due to magnetic impulses for two-
dimensional transport motion of
magnetospheric trapped
particle 11 p1765 A66-23149
Magnetospheric and upper atmospheric
meteorological effects on cosmic ray
intensity variation and
streams 12 p1940 A66-24163
Forbush effect and solar cosmic ray
manifestation of effect of compression of
Earth magnetosphere 12 p1941 A66-24174
Small two-dimensional oscillations in XY
plane for isothermal magnetosphere in
uniform gravitational field, postulating
Boltzmann equilibrium density
distribution 12 p1943 A66-24282
Corpuscular intrusions into Earth
magnetosphere involving entire auroral zone
and occurring only on night
side 12 p1871 A66-24296
Ionospheric processes and measurement of
variations in ion temperature and
concentration using satellites, noting
connection with
magnetosphere 12 p1871 A66-24400
Onset patterns of PCA analysis using
corrected geomagnetic coordinates, with
results analyzed through solar cosmic
radiation, Earth magnetosphere structure
and D region 12 p1944 A66-24470
Cyclotron instabilities in hydromagnetic
waves in magnetosphere as possible origin
of geomagnetic micropulsations, stressing
ion resonance mode of waves relevant to hm
whistlers 12 p1874 A66-24842
Wave propagation during gyroresonance
interaction, noting nonlongitudinal
characteristics of waves generated in
magnetosphere between beams of charged
particles 13 p2072 A66-25462
Cyclotron radius, magnetospheric boundary
and Debye length scaling parameters for
magnetospheric cavity arising from solar
wind-induced geomagnetic storm and
visibility of quasi-Van Allen
belts 14 p2269 A66-27124
Geophysical laboratory simulation of solar
wind-magnetosphere interaction and satellite
perturbation due to motion in
magnetoplasma 14 p2284 A66-27514
Quasi-linear perturbation theory of
transverse electromagnetic waves from
instabilities in nonthermal magnetoactive
plasma, using Boltzmann equation, applied to
magnetospheric MHD
emissions 14 p2286 A66-27982
Transfer and acceleration of particles in
Earth magnetosphere effect on origin of
radiation belt 14 p2377 A66-28069

Geomagnetic micropulsation periods
relation to dimensions of magnetosphere,
considering inverse dependence on level of
magnetic activity 14 p2287 A66-28078
MHD equations applied to hypersonic flow
of solar plasma around magnetosphere and
approximation with simpler equations of gas
dynamics 15 p2483 A66-28815
Elementary geomagnetic polar
disturbances, lhp-shaped auroral ionization
patterns and existence of energetic
electrons on night side of
magnetosphere 15 p2485 A66-28909
Solar wind magnetic field as medium for
plasma-magnetosphere
interaction 15 p2575 A66-29078
Solar wind parameter variation,
magnetosphere flux interaction and
dependence of geomagnetic storm on
magnetospheric conditions and geomagnetic
field increase 15 p2575 A66-29079
Radio wave emission due to shock wave
propagation in magnetospheric boundary and
electromagnetic scattering in plasma wave
field 15 p2575 A66-29083
Solar corpuscular stream magnetic field
effect on change in orientation of
geomagnetic field related to change in
stream geoeffectiveness 15 p2575 A66-29102
Jovian rotational effects on magnetospheric
model and conditions of fluting and two-
stream instability 15 p2802 A66-29952
Solar wind particle penetration into Earth
magnetosphere
[AIAA PAPER 66-510] 16 p2793 A66-30609
Energy spectra of electrons and protons in
islands at back of magnetosphere compared
with electron fluxes observed by satellites,
noting similarity between particles in islands
and those in aurora 16 p2695 A66-30714
Measurements of geomagnetic field at
various distances using IMP-I satellite,
noting magnetically neutral sheet in tail and
observation of five magnetic
storms 16 p2695 A66-30715
Argument on Dessler hypothesis of long-
tail model of magnetosphere, based on data
from Mariner IV probe 16 p2794 A66-30724
Argument in support of Dessler long-tail
model of magnetosphere in answer to Van
Allen questions 16 p2795 A66-30725
Configuration and population of Earth
magnetosphere in solar
wind 16 p2795 A66-31702
Magnetospheric suprathermal-electron
scattering in oscillating electrostatic plasma
and diffusion of subthermal electrons across
magnetosphere, using ion-wave propagation
theory for electroconductive
plasmas 17 p2993 A66-32521
Fluid flow analysis of solar wind
interaction with
magnetosphere 18 p3168 A66-34346
Particle analysis of solar wind interaction
with magnetosphere, examining plasma
particle motion and time dependency of
fields they generate 18 p3168 A66-34347
Magnetosphere topology changes due to
solar wind interactions, geomagnetic storms
and interactions with interplanetary
magnetic field outside
magnetosphere 18 p3106 A66-34349
Computer code study of magnetospheric
trapped-particle drift under influence of
magnetic field gradient, magnetic line
curvature, electric rotational field and
electric field across tail of
magnetosphere 18 p3168 A66-34350
Magnetosphere shape and distortion of
magnetic field within
magnetosphere 18 p3106 A66-34353
Lunar magnetosphere, Moon-solar wind
interaction, X-ray flux measurement and
possible hazards to
astronauts 18 p3231 A66-34357
IMP satellite data on lunar magnetospheric
MHD wake and interaction with solar
wind 18 p3231 A66-34358
Satellite and space probe measurements
indicate continual confinement of
geomagnetic field by solar wind forming
magnetosphere and Earth magnetic
tail 18 p3235 A66-34742
High energy electron acceleration detected
in shock transition region of terrestrial
magnetosphere, using Au-Si surface barrier
solid state detector and IMP-I satellite
mounted GM counter 18 p3177 A66-34753

Plasma fluxes inside magnetosphere
detected by spherical electrostatic analyzers
mounted on Elektron II
satellite 18 p3196 A66-34871
Hypothetical mechanism of earthward
radial drift of charged particles, noting
albedo neutron decay, proton belt,
etc 18 p3197 A66-34876
Effect of compression and expansion of
magnetosphere on cut-off rigidities and
position of impact zones 18 p3198 A66-34884
Magnetospheric phenomena qualitatively
described, discussing radiation belt
dynamics 18 p3199 A66-34888
Fast variations of electromagnetic field
measured by satellites electron I and II
used as indication of state of radiation belts
and magnetosphere of
Earth 19 p3344 A66-35257
Charged particle motion and penetration of
magnetosphere in proximity of neutral point
as result of solar wind-geomagnetic field
interaction 19 p3405 A66-35281
Charged particle motion in field of
magnetic dipole situated in external
magnetic field /magnetospheric G region/,
using Stoermer method 19 p3451 A66-35282
Auroral oval, auroral substorm and
relations with internal magnetospheric
structure during growth and decay of ring
current and neutral sheet
current 20 p3549 A66-37296
Van Allen radiation belt particle motion in
spherically confined
magnetosphere 20 p3630 A66-37301
Ionospheric electric current effects on
upper atmospheric electromagnetic wave
transmission and propagation, discussing
magnetospheric effects, solar wind,
geomagnetic field, etc 20 p3550 A66-37434
Magnetosphere tail, annual magnetospheric
configurative variation and seasonal
variation in polar cap magnetic
intensity 20 p3657 A66-38229
Magnetospheric boundary phenomena,
noting dependence of charged particle
observations on character of associated
magnetic fields 20 p3641 A66-38329
Magnetospheric models, discussing role of
fast magnetospheric merging in connection
with charged particle acceleration and
magnetospheric
configuration 20 p3641 A66-38330
Shape of magnetopause determined by
solving equations for boundary of
geomagnetic field with trapped
particles 20 p3641 A66-38331
Energy transport mechanism in
magnetosphere analyzed by study of
character of three-dimensional
hydromagnetic waves in uniform cold
plasma 21 p3734 A66-39218
VLF electric fields in magnetosphere
surveyed with polar orbiting spacecraft 1964-
45A may produce large amplitude plasma
oscillations 22 p3903 A66-39937
Topside ionosphere constitution, examining
electron and ion distribution, charged
particle scale height, ion composition,
electron and ion temperatures and
magnetosphere 22 p3909 A66-39971
Acceleration of high energy electrons by
means of Parker-Wentzel version of Fermi
mechanism due to geometry and distorted
structure of interplanetary magnetic field
near magnetopause in transition
region 22 p3972 A66-40003
Magnetospheric and ionospheric plasma
wave model based on theory for MHD waves
in slightly ionized gas 22 p3912 A66-40426
Dense particle population of Van Allen
belts formed by interaction of high energy
corpuscular radiation with interplanetary
magnetic field and geomagnetic
field 23 p4123 A66-41186
Hydromagnetic wave propagation in
magnetosphere, using Explorer satellite
observations 24 p4198 A66-42434
Inner magnetosphere inflation during
geomagnetic storm observed by Explorer
XXVI, noting relation of various phases to
charged particles 24 p4200 A66-42589
Quiet and disturbed conditions of
magnetosphere, noting dynamo theory and
various geomagnetic
storms 24 p4202 A66-42831
Measurement technique for variations in
optical path of gyroelectric echoes

- generated by long wave transmitter and propagating in whistler mode 24 p4176 A66-42995
- Magnetospheric phenomena related to geomagnetic tail noting F region, polar auroras and solar Lyman alpha radiation scattering in night sky 24 p4203 A66-43029
- Distribution of active periods of magnetic disturbances during day and variation as affected by contact of solar magnetic flux with magnetosphere 24 p4204 A66-43151
- MAGNETOSPHERIC ELECTRON DENSITY**
- SA IONOSPHERIC ELECTRON DENSITY**
- Electron density and total electron content in force tubes near knee in magnetospheric ionization studied, using whistlers 10 p1527 A66-21138
- Electron densities, magnetic field strength and energetic particle fluxes in magnetosphere determined, using VLF background radiation 22 p3911 A66-39990
- MAGNETOSPHERIC INSTABILITY**
- Anisotropic electron velocity distribution for magnetosphere assumed and complex refractive indices evaluated, using cyclotron absorption explanation of whistler cut-off 05 p0631 A66-14835
- Current sheet formation on plasma magnetospheric boundary at hyperbolic null point, noting possible connection with solar flare mechanism 07 p1138 A66-18082
- Fast particle trapping by separatrix displacement in asymmetric outer boundary of magnetosphere 09 p1440 A66-20227
- Magnetospheric electric fields, noting implications of magnetic storm theories 10 p1528 A66-21149
- Energy exchange between beam of charged particles and small amplitude electromagnetic perturbation in magnetosphere 11 p1700 A66-23137
- MHD model of interface between solar wind and geomagnetic field on Earth tail, showing existence of unstable waves 16 p2695 A66-30717
- Relation between energy of geomagnetically trapped particles and disturbance field near Earth 18 p3169 A66-34516
- Electron precipitation in auroral zones caused by magnetospheric instability 20 p3609 A66-37820
- SSC rise time, discussing solar wind inhomogeneity effects, magnetopause, wave front broadening, etc 20 p3635 A66-38220
- Magnetospheric tail instabilities, auroral electron acceleration and deformation due to dipole magnetic field acceleration of plasma particles 20 p3635 A66-38222
- Sudden impulses and pc5 variations resulting from magnetospheric deformations and solar wind pressure changes 20 p3657 A66-38223
- Magnetosphere tail sheet pinch model, discussing motion of particles for cases of surface crossing 20 p3642 A66-38336
- Transmission and coupling resonance of hydromagnetic disturbances in nonuniform model magnetosphere calculated by approximate dipole coordinates valid near equatorial plane 21 p3734 A66-39217
- MAGNETOSPHERIC ION DENSITY**
- SA IONOSPHERIC ION DENSITY**
- High time-resolution measurement of knee position in magnetospheric ion density using whistlers 10 p1527 A66-21137
- MAGNETOSPHERIC PROTON DENSITY**
- Space exploration discussing terrestrial effects of electromagnetic and corpuscular solar radiation 04 p0574 A66-13805
- Particle transfer across drift shells as basic mechanism of acceleration of protons and electrons in outer radiation belt and formation of inner radiation belt 09 p1444 A66-21023
- Solar wind particle diffusion into geomagnetic tail and then down field lines to polar cap 11 p1700 A66-23142
- Space exploration, discussing terrestrial effects of electromagnetic and corpuscular solar radiation 12 p1938 A66-23638
- Precipitation of electrons and protons into atmosphere from inside magnetosphere, within auroral zone and at polar caps 20 p3640 A66-38320
- Low energy proton measurements in magnetosphere using Mariner IV spacecraft 24 p4263 A66-42602
- MAGNETOSTATIC AMPLIFIER**
- Amplification by parallel pumping of traveling magnetostatic waves in normally magnetized single-crystal disk of YIG 20 p3624 A66-38410
- MAGNETOSTATIC FIELD**
- Theoretical transit time of magnetostatic spin waves propagated at microwave frequencies in normally magnetized disk 04 p0561 A66-13735
- Circular filament of electric current in unbounded magnetoionic medium, measuring radiation resistance for constant current distribution 05 p0633 A66-15122
- Angular and magnetic dispersion of anisotropy and its effect on behavior of thin magnetic films, allowing for magnetostatic interactions 08 p1278 A66-19743
- Radiation from axially oriented electric dipole situated at center of infinitely long axially magnetized column of uniform plasma 08 p1186 A66-19747
- Stationary state of plasma in magnetostatic and HF fields used to derive solution for corresponding Vlasov equation 09 p1410 A66-20981
- Force field detection and control of objects in space, using gravitational, electrostatic or magnetostatic fields 12 p1820 A66-24677
- Magnetostatic model for perpendicular anisotropy in polycrystalline nickel-iron thin films 14 p2352 A66-26893
- Magnetostatic interaction effect on real and imaginary parts of transverse biased permeability in thin Ni-Fe films 14 p2352 A66-26896
- Longitudinal magnetostatic force and effect on magnetic ripple in thin films 14 p2352 A66-26897
- Electric field in hot plasma waveguide with infinite magnetostatic field due to harmonically varying slot and double-grid excitation 15 p2549 A66-28712
- YIG magnetostatic mode serrodyne capable of milliwatt modulation power levels through 30 mc/s 15 p2463 A66-29029
- Unstable transverse potential oscillations in plasma with beam anisotropy and initial density modulation and analogy with known electrostatic oscillations 16 p2764 A66-31365
- Electron flux induced excitation of magnetostatic oscillations of magnetized ferrite 16 p2784 A66-31549
- Negative absorption /amplification or oscillation/ of microwaves by cylindrical cavity coaxial with plasma column along magnetostatic field 17 p2973 A66-32978
- Dispersion relations of plane surface waves on grounded anisotropic magnetoplasma slab immersed in free space 18 p3068 A66-34084
- Gyroelectric and gyromagnetic rectangular waveguides compared for cases of electrostatic and magnetostatic fields transverse to EM wave propagation direction 19 p3317 A66-35719
- Nonaccelerated electron beam envelope trajectory equation reformulated and solved allowing for finite emittance, space charge and self-magnetostatic forces 19 p3319 A66-36170
- Reflection coefficient of electromagnetic wave polarized in plane normal to magnetostatic field and falling from vacuum perpendicularly on plasma boundary parallel to field 19 p3303 A66-36198
- Nonlinear thermomagnetic wave theory and amplification in case of plasma instability 21 p3792 A66-39310
- Three-dimensional electric field wave equation for homogeneous gyrotropic compressible drifting plasma derived for case having magnetostatic field and drift velocities in arbitrary directions 22 p3865 A66-40099
- Smooth particle motion in nonresonant HF and magnetostatic fields 23 p4100 A66-41141
- MAGNETOSTRICTION**
- SA ELECTROSTRICTION**
- Magnetostrictive device for light modulator control 03 p0376 A66-12424
- Perpendicular anisotropy of Ni and Fe films and saturation magnetization under various pressures 08 p1270 A66-19011
- Induced anisotropy of ferromagnetic atom pairs and magnetostriction stresses in Fe-Ni thin films subject to annealing 11 p1755 A66-22818
- Incoherent rotation of reverse magnetization in thin ferromagnetic films, allowing for internal magnetostriction and exchange interaction 11 p1755 A66-22824
- Relation between angular dispersion and grain size in evaporated permalloy films 14 p2352 A66-26892
- Static magnetic properties of zero-magnetostrictive permalloy films during vacuum deposition and substrate heating and cooling period 14 p2355 A66-26910
- Positive and negative NiFe magnetostriction film exhibits striped domain when evaporated at oblique incidence 14 p2355 A66-26912
- Dependence of magnetostriction coefficient for diamagnetic materials on change of Fermi surface with momentum and deformation parameter 16 p2777 A66-31035
- Attenuation of single- and double-section bridge filters containing one two-winding magnetostrictive resonator and one two-winding coil 22 p3875 A66-40070
- Magnetostriction constants measured at room temperature for YIG single crystals after replacing fraction of iron ions by silicon 23 p4114 A66-41626
- Magnetostriction of yttrium terbium ferrite garnets, noting absence of correlation between temperature dependences of magnetostriction and magnetization for high Tb content 24 p4256 A66-42518
- MAGNETOTELLURIC PROFILING**
- Geomagnetic storms employed in determining geoelectrical parameters via magnetotelluric sounding 12 p1868 A66-23668
- MAGNETRON**
- Inverted ion magnetron principle of gas ionization based on velocity of rotation of electron sheet on anode 05 p0723 A66-15162
- Effect of degree of coupling between resonator system and load on generation zones and regenerative amplification of pulsed magnetron, noting characteristics 09 p1353 A66-20437
- Cold cathode magnetron gauge characteristics and striking characteristics of gaseous discharge 13 p2078 A66-25647
- High power generators for studying interaction of oscillating fields with plasmas 14 p2246 A66-26818
- Anode current in cut-off smooth-bore magnetron 14 p2248 A66-27057
- Buildup and confinement of plasma with high-energy electrons in PR-5 apparatus, using magnetron injection method 19 p3412 A66-36497
- MAGNUS EFFECT**
- Sounding rocket instability, covering exact and approximate solution and Magnus moment coefficient for hypersonic rolling vehicle /Sandia Nitehawk rocket system/ [AIAA PAPER 66-62] 06 p0958 A66-16252
- Book on aerodynamics of pure subsonic flow including Earth atmospheric structure, fluid flow laws, boundary layer phenomena, subsonic wind tunnel and Magnus effect 19 p3278 A66-36730
- Linear dynamic analysis of angular motion of spinning axisymmetrical rocket or spacecraft, emphasizing rigid body with thrust misalignment and another motion caused by deflection of control surfaces or jets 22 p3988 A66-40618
- Yaw force /Magnus/ of spinning projectile at angle of attack measured, using balance device in wind tunnel [AIAA PAPER 66-753] 22 p3893 A66-40638
- Side forces and moments on Tomahawk sounding rocket with and without spin at high Reynolds number and Mach 5 [AIAA PAPER 66-754] 23 p4008 A66-41329
- MAIN SEQUENCE STAR**
- Distribution patterns of common stars in galactic plane according to spectral type, noting density gradients, main sequence, Hertzsprung-Russell diagram, etc 11 p1766 A66-22254
- Evolution of 5 solar masses star model from main sequence through core helium burning compared to 3 solar masses model, noting Hertzsprung-Russell diagram 11 p1772 A66-22780
- Lithium/calcium ratio of five F giant and six G giant stars 13 p2183 A66-25611
- Stellar rotation and position of metallic line stars in color magnitude diagram 20 p3649 A66-37328

MAINTAINABILITY

Reliability and maintainability - Annual Conference, Los Angeles, July 1965, Volume Practical techniques and application 01 p0074 A66-10048

Human factors in design criteria for maintainability and 01 p0018 A66-10077

C-9 maintainability, simplicity and rationality of design with emphasis on maintainability 01 p0129 A66-10092

F-53 gas turbine engine used to describe results of maintainability at 01 p0129 A66-10093

Reliability and maintainability concepts applied to solid propellant subsystems of ballistic missiles 01 p0129 A66-10108

Design stage maintainability analysis simplified by technique for evaluation and analysis of maintainability /TEAM/ [AA PAPER 65-733] 03 p0446 A66-12582

Amount of maintenance float determined by relation between maintainability and reliability used to estimate effects of product changes [AA PAPER 65-734] 04 p0525-A66-13634

Maintainability guidance as factor in signing for aerospace 05 p0646 A66-14634

Economic analysis of maintainability in selecting alternative maintenance resource location 13 p2210 A66-25660

C-9 maintainability, simplicity and rationality of design with emphasis on maintainability 13 p2173 A66-26231

Space system operational requirements for maintainability, noting design principles for spacecraft, boosters, support equipment, crew safety, etc 16 p2681 A66-30662

Design stage maintainability analysis simplified by technique for evaluation and analysis of maintainability /TEAM/ [AA PAPER 65-733] 16 p2683 A66-31327

Support systems utilizing maintainability prediction, examining effect of changes, modifications and complete placement 20 p3682 A66-37240

System effectiveness, Volume 5 - Reliability and Maintainability Conference, New York, July 1966 20 p3563 A66-37879

Quantification of relative contributions of various functions to performance of mission combined with availability and dependability of system effectiveness 20 p3684 A66-37883

Lockheed C-5 quantitative maintainability program and application to air-vehicle utilization and cost 20 p3495 A66-37891

ERT-type network, mathematical model and human factor approaches to maintainability and availability predictions for man-machine systems 20 p3684 A66-37892

Human factor relation to system effectiveness and human performance relation to operational reliability and maintainability 20 p3509 A66-37894

Materials problems affecting system effectiveness, reliability and maintainability aerospace industry 20 p3567 A66-37896

Economics of Ownership structure and cost effectiveness in microelectronic systems 20 p3684 A66-37904

Systems analysis for space programs, emphasizing systematic quantitative studies of reliability and 20 p3684 A66-37910

Maintainability 20 p3684 A66-37910

Reliability-maintainability cost tradeoff via dynamic and linear programming, discussing rates, alternatives within states, transition rates and expected costs 20 p3568 A66-37911

Management in applying reliability and maintainability for improved cost effectiveness by first-tier supplier 20 p3685 A66-37913

Program management at subsystem contractor level for product reliability and maintainability in developing AN/APQ-111A terrain following radar for 20 p3685 A66-37914

Qualitative analytic function-test maintainability prediction equations from regression analyses on 20 p3569 A66-37922

Graphical method for trading off systems maintainability against systems maintainability in signing system simple to maintain and pair 20 p3569 A66-37925

Maintainability program requirements of

Military Standard 470 document 20 p3569 A66-37926

Maintainability prediction procedures for systems and equipment outlined in Maintainability Prediction Handbook 20 p3570 A66-37927

MIL-STD-471 maintainability demonstration prepared by tri-service task group 20 p3570 A66-37928

Information center concept for accurate acquisition and processing of parts, materials and components reliability and maintainability information for task performance 20 p3572 A66-37947

Reliability and maintainability research program of USAF concerning measurement, control, failures etc, of equipment under various stresses and environmental conditions 20 p3573 A66-37960

Maintainability program of F-111B aircraft 20 p3574 A66-37961

Maintainability program for lunar excursion module considering prelaunch, inflight and lunar launch operations 20 p3574 A66-37962

Bayesian statistics applied to reliability and maintainability transactions 20 p3574 A66-37967

Reliability and maintainability /RAM/ interface associated with controls assuring desired RAM predictions and design requirements 23 p4073 A66-41606

Maintainability impact on redundant system design of phased array radar, presenting Monte Carlo technique for assessing availability of array portion 24 p4178 A66-42091

Minuteman weapon system maintainability, discussing fault detection and isolation, ground system, standardization, tools and system requirements 24 p4281 A66-42092

System maintainability in Back-Up Interceptor Control System /BUIC II/ using modular design of system, discussing software and failure 24 p4178 A66-42093

Operational effectiveness and maintainability verification for surveillance and control systems influence by quantitative reliability 24 p4179 A66-42094

MAINTENANCE

SA AIRCRAFT MAINTENANCE

SA SPACE MAINTENANCE

Timing of checkout in system with constant failure rate 07 p1018 A66-18150

Accessibility as factor in reducing production cost and maintenance time and increasing reliability in electronic equipment 08 p1197 A66-19526

Effect of low temperature on maintenance of vented sintered-plate nickel-cadmium batteries, noting charging methods 08 p1173 A66-19659

Integrated maintenance management specification WR-30 applied to limited development program for attitude reference system 20 p3682 A66-37187

General maintenance techniques for large digital controllers to achieve high order of system dependability 20 p3522 A66-37907

Frequency of maintenance evaluation in maintainability analysis by substituting failure rate for frequency of corrective maintenance or frequency of interruption 20 p3569 A66-37923

Learning curve theory used to explain tendency toward decreasing downtime observed in maintenance of many systems 20 p3569 A66-37924

Electronic data processing used to analyze AFM 66-1 maintenance data on USAF T-38 supersonic jet trainer for reliability monitoring 20 p3572 A66-37945

Inertial platform test station for shipboard maintenance and calibration of platform used in A6A and E2A aircraft, examining accelerometer bias and gyro drift tests 21 p3723 A66-38889

MAJORITY CARRIER

Interaction of microwave signal with semiconductor material examining attenuation, phase shift and reflection of electromagnetic wave passing through plasma 01 p0038 A66-10520

Thermoconductivity decrease of bismuth-telluride based solid solutions due to forbidden bandwidth and majority and minority carrier mobility 01 p0127 A66-11029

Nonequilibrium field effect on silicon in

region of high majority carrier depletion and nonequilibrium between energy bands 03 p0410 A66-12942

Auger recombination of majority and minority carriers by low and deep-lying centers 04 p0565 A66-14261

Electrical and radiation storage time in transistors with respect to majority carrier storage in base, calculating photocurrent 05 p0735 A66-14855

Current-voltage relationship of Au on GaAs Schottky barrier, examining introduction of single temperature independent parameter 07 p1106 A66-18399

600-mev proton irradiation effects on density and mobility of majority carriers in n-type germanium 08 p1267 A66-18647

Magnetic semiconductor efficiency determined from product of majority carrier mobility and effective magnetic permeability 13 p2163 A66-25420

Gamma radiation and fast neutron effects on dark resistance, photoconductivity, majority carrier mobility, recombination kinetics, etc, in CdS single crystal 16 p2787 A66-31765

Hall effect in poly-n-vinylcarbazole-iodine charge-transfer complex, noting sign discrepancy of majority carrier 22 p3963 A66-40109

Nonequilibrium charge carrier lifetime in indium antimonide single crystals with Ge and Au impurities 22 p3965 A66-40315

I-V characteristics of junction diode with antibarrier layer and oxide film pressed on rear contact 23 p4045 A66-41445

Metal semiconductor Schottky-barrier diode, noting small accumulation of minority carriers and switching times of diode due to diffusion of majority carriers from metal to semiconductor 24 p4182 A66-42534

MAMMAL

SA CAT

SA DOG

SA DOLPHIN

SA MONKEY

SA MOUSE

Book on physiological responses of healthy mammals to natural changes or extremes of physical environment, considering heat, cold, light, atmospheric pressure and water 20 p3505 A66-37253

MAN-MACHINE SYSTEM

SA HUMAN ENGINEERING

SA HUMAN FACTOR

Design requirements for LEM, describing stabilization and control elements of abort system 01 p0140 A66-10046

Reliability estimation procedure combines task ratings with empirically based data in derivation of regression equation 01 p0018 A66-10076

Mathematical model based on control and queueing theory for human controller for turn-round operations on airport apron 03 p0329 A66-12886

Automatic command control system using phonetic voice pattern recognition 04 p0469 A66-13496

Man-machine relationship during space flight 04 p0471 A66-14085

Psychological research relevant to human factors engineering of man-machine systems, discussing information processing 05 p0626 A66-14616

Man-powerplant reliability interface, emphasizing manned vs automatic sensing and control [SAE PAPER 650810] 05 p0627 A66-15013

Human factors in control/indicator panel design of ground support equipment [ASME PAPER 65-WA/HUF-16] 05 p0628 A66-15696

Manual control of vehicles considering aircraft handling, human dynamics, etc [ASME PAPER 65-WA/HUF-10] 05 p0628 A66-15697

Electromyography signals to control external power based upon pattern recognition [ASME PAPER 65-WA/HUF-3] 05 p0628 A66-15700

Human performance measurement capability and limitations for defining man's role in future space missions 06 p0818 A66-16244

Book on human factors evaluation in man-machine system design 06 p0972 A66-16250

Increased automation of checkout procedures and part played by man in checkouts of space vehicles 06 p0869 A66-16803

Man-machine conflict in high performance tactical fighter 07 p0998 A66-17282

Interaction of pilot capabilities and economic factors on future air transport, noting problems with SST, V/STOL, Mach 6 transport craft, etc 07 p1156 A66-17611

Airborne computer design free of navigational functions performed by humans, using Doppler equipment 07 p1067 A66-17692

Utilization of computers to reduce cockpit work load, particularly in SST aircraft 07 p1003 A66-17726

Simulator design for inclusion of man/machine interactions and human behavioral and performance considerations in system design 08 p1203 A66-19534

Man-rated booster design provides alternate manual propulsion and guidance control enabling astronaut participation in mission success [AIAA PAPER 65-251] 10 p1612 A66-21949

Human factor in design of controls and instrumentation in aircraft, discussing man-machine dynamics 10 p1494 A66-22135

Contribution of medical science to accident prevention, discussing causes, results and escape from standpoint of man and machine 10 p1495 A66-22143

Human factors engineering, discussing man-machine allocation of system functions, task equipment analysis, model and mock-up analysis and environmental analysis 11 p1647 A66-22301

Origin, setting and evolution of human factors engineering and man-made environment 11 p1648 A66-23100

Real time on-line man-computer graphics system that may obviate need for special-purpose, complex and cumbersome computations 11 p1660 A66-23176

Experimental testing effectiveness of sensor lines showing linkages between displays and controls 12 p1808 A66-23924

Existence of response-response compatibility effects in simple perceptual-motor task where simultaneous two-hand pointing responses were required 12 p1808 A66-23925

Behavior of human operator as link in servosystem in tracking and compensation regimes, determining transfer function under steady state and perturbed conditions 12 p1851 A66-24316

Ground system design, data processing, digital command and digital-human interface in flight operations problems for unmanned spacecraft on planetary exploration mission 13 p2190 A66-25257

Man-machine systems for interplanetary exploration, using functional analysis techniques for system design 13 p2013 A66-25281

Nontechnical book on extraterrestrial life including origin of life, life signs in meteorites, Moon and Mars, man-machine combinations for space purposes, etc 13 p2011 A66-26317

Information display techniques for man-machine system 14 p2229 A66-26916

Probability-statistics analytic human-operator model in control systems analysis 14 p2263 A66-27108

Man-machine systems involved in on-line man/ computer interaction, manned space systems, satellite communication and display systems 14 p2230 A66-27820

Structural dynamics/manned space flight relation, discussing man-machine dynamics, Apollo command module LF studies, pilot control of spacecraft and launch vehicle, etc 14 p2230 A66-28017

Human and man/system requirements to provide criteria for choosing alternative mission and lunar surface roving vehicles design concepts 17 p2903 A66-32170

Oxygen reclamation for manned spacecraft considering stored, nonregenerative and molten carbonate systems 17 p2864 A66-32175

Present status of human engineering field, considering relationship of specific human functions constituting subsystem to system as whole 17 p2868 A66-32875

Pilot acceptance factors in development of all-weather landing and SST navigation

systems 17 p2955 A66-33219

Control feel application to aircraft controls, noting man-machine system configurations, anthropometric and physical factors, sensory motor requirements, etc 17 p2869 A66-33446

Man-machine system in control and guidance of Saturn V launch vehicle, emphasizing participation during atmospheric phase of flight profile 18 p3242 A66-33847

Complex component design using man-computer system with graphic input/output devices, discussing application for digital computer circuit card design [SAE PAPER 660459] 18 p3116 A66-33897

Man-rating criteria in Boeing space environmental simulation chamber, discussing structural design, vacuum chambers, repressurization, manlock pumping systems, aerospace medical training, etc 19 p3289 A66-35841

Extravehicular activities interface with data recording system and economical recovery of optimum quantity of data 19 p3291 A66-35967

Controller, employing voice recognition principle, for attitude control system of astronaut maneuvering unit in various space tasks 19 p3291 A66-35973

Man/machine problems in performance of space maintenance, noting conditions for shirtsleeve and pressurized suit, glove-tool interface, etc 19 p3292 A66-35974

Limits of human performance and interaction of man and machine 19 p3292 A66-36179

Mathematical evaluation of human visual performance, discussing functions in man-machine systems, application of TV for systems monitoring, etc 19 p3294 A66-36283

Interface between aerospace systems with man, spacecraft and supporting ground stations 20 p3662 A66-37185

Computer model analysis of functional relationships of human operator information handling and control in closed loop tracking situation 20 p3509 A66-37236

PERT-type network, mathematical model and human factor approaches to maintainability and availability predictions for man-machine systems 20 p3684 A66-37892

Critical Human Performance and Evaluation /CHPAE/ Program 20 p3509 A66-37893

Human factor relation to system effectiveness and human performance relation to operational reliability and maintainability 20 p3509 A66-37894

Mechanical prediction display to improve human behavior in control system 21 p3700 A66-38454

Functional requirements for man-machine dialogue, noting voice insertion of data 22 p3871 A66-40729

Pattern recognition computer operating under automatic control and stored program control for data transfers, system operation, man-machine interface and display operations 23 p4041 A66-41056

Man-machine merger in computer aided design of circuits, examining changes in circuit parameters caused by component tolerances, simulation of component failure, feasibility and circuit optimization 23 p4072 A66-41252

Control design using force as criterion, discussing effect of varying height and handle orientation of push-pull task 23 p4029 A66-41575

Text evaluating application of human body size and mechanical capabilities to equipment design for man-machine integration 23 p4030 A66-41619

Optimization of aircraft performance, pilot performance and mission completion [ICAS PAPER 66-4] 24 p4159 A66-42492

Engineering psychology of man-machine interface and relation to spacecraft piloting and systems control 24 p4169 A66-43147

MAN OPERATED PROPULSION SYSTEM

/MOPS/

Man-rated booster design provides alternate manual propulsion and guidance control enabling astronaut participation in mission success [ATAA PAPER 65-251] 10 p1612 A66-21949

MAN POWERED FLIGHT

Optimization criteria for critical parameters for attainment of flight by man powered aircraft 12 p1801 A66-23803

MANAGEMENT

SA PROGRAM MANAGEMENT

SA WEAPON SYSTEM MANAGEMENT

Safety and management in aerospace industry, noting importance of military specification 01 p0169 A66-10075

Engineering and scientific tasks reporting in quantified data to management 18 p3268 A66-34065

Annotated bibliography on R and D management with book abstracts 20 p3683 A66-37732

Economics of airport facilities and operations, noting safety and regularity problems 20 p3687 A66-38016

MANAGEMENT PLANNING

SA PRODUCT DEVELOPMENT

Operational readiness, decision-making technique for management taking into account reliability, maintainability and safety 01 p0167 A66-10051

Evaluation and future of cost effectiveness management 01 p0167 A66-10052

AFSC 375 series of systems management manuals with emphasis on specification programs 01 p0168 A66-10060

Safety education, management process and aerospace accidents 01 p0169 A66-10073

Positive materiel reliability program as management indicator tool for supplier product control in procurement of reliable hardware 01 p0169 A66-10097

Manufacturing reliability control through practical management considering indoctrination, problem solving and measurement, noting welding performance 01 p0076 A66-10098

Cost factors in launch operations controlled by management techniques and tools used in other facets of research and development 01 p0141 A66-10105

Operational research techniques applied to procurement and capital investment programs of aviation industry 01 p0170 A66-10341

Computerized tools and constant analysis for real time experiment flight management planning system 02 p0306 A66-11638

RCAF system of aircraft fleet operations management /TC-91/ for unserviceability cost estimate 02 p0178 A66-11992

Developing, controlling and packaging approach to critical element of software schematic noting mechanical, electrical and hydraulic functions 04 p0526 A66-13798

Product reliability management as system development and production process control 05 p0794 A66-15827

Planning European space projects in industry 06 p0973 A66-16497

Development management and cost control in British defense economy 07 p1156 A66-17487

Air transport engineering, cost and reliability factors, development possibilities, new design construction phasing, etc 07 p0987 A66-17488

UK aircraft industry mergers, causes, government policies and history 07 p1156 A66-17490

Research and Development Effectiveness /RDE/ computerized planning program, utilizing analytical techniques in management of research and development resources 08 p1322 A66-19461

Mathematical simulation model of industrial situation, discussing random numbers and selection of truck time interval 10 p1539 A66-21321

Advanced Data Management computer programming to provide generalized routines for functions common to large class of command and management problems 10 p1623 A66-22050

Basic quality audit concept evaluated as effective management tool 11 p1788 A66-22181

Value analysis as cost reduction factor, using production of Bulpup A and B missiles as example 11 p1711 A66-23060

Rationale for systems effectiveness in Air Force systems command 11 p1789 A66-23435

Methodology of systems effectiveness based on reliability, maintainability, value,

Satellite Educational and Informational
elevison, noting management, market and
development problems in terms of profit,
emand and growth potential
AIAA PAPER 66-274] 12 p1981 A66-24747
Launch vehicle parameter design for
optimal support of communications satellites
AIAA PAPER 66-285] 12 p1955 A66-24756
Industrial alertness management in relation
roduction rate, quality control and
erator safety 12 p1810 A66-24957
Management of large physical systems,
etailing characteristics of mission planning
or Mars exploration including process
optimization, computer programming,
ystems engineering, etc 13 p2179 A66-25238
Research development effectiveness
valuation, with computer determining
esource allocation 13 p2058 A66-26033
Quality and reliability programs of Cessna
ircraft Commercial Division covering
ersonnel from trainees to scientists
SAE PAPER 660204] 13 p2087 A66-26384
Data processing approach for management
ontrol of aircraft manufacture
SAE PAPER 660205] 13 p2211 A66-26391
High by-pass turbofan for business aircraft,
omparing jet propulsion system efficiency
ith fan engines, cost factors and market
potentials
SAE PAPER 660221] 13 p2173 A66-26400
Titan II operational base management,
rganization and responsibilities, noting
gistic requirements, concurrency problems,
c 14 p2416 A66-27123
V/STOL aircraft for intercity travel,
cussing cost, advantages, technological
vances, etc
SAE PAPER 660318] 14 p2223 A66-27298
Commercial air transport in 1972,
cussing operating economics, management
anning, maintenance costs, etc
SAE PAPER 660321] 14 p2223 A66-27300
Value engineering and configuration
anagement in management network for
stem compatibility and mission success at
west cost 14 p2417 A66-28436
Operations research model for automation
range scheduling
unction 14 p2272 A66-28437
Traceability and configuration data system
AC/ used to determine location of
dividual parts and
sembles 15 p2506 A66-28791
Conceptual model for industrial quality
ontrol problem, noting adequacy in
atisfying management goals and customer

requirements 15 p2506 A66-28793
Quality system analysis, determining
structural soundness, requirements and
functional relationship of
components 15 p2507 A66-28794
Specified product quality through systems
quality control program, noting
determination of critical parameters,
rejection occurrence, process and capability
control and preventive
maintenance 15 p2507 A66-28802
Effect of limited quantity and short
delivery requirement orders for electronic
components in reliability and quality
control 15 p2508 A66-28803
Reliability-maintenance relationship
including accessibility, design, crew duty
cycle, and equipment failure rates, number
of restorations, etc, in long-duration manned
missions 15 p2606 A66-28804
Calibration ensuring optimal instrument
performance, using statistical quality
control, noting background of Assured
Performance Calibration
program 15 p2508 A66-28810
Role of metrology in design, manufacturing
and acceptance testing, evaluating
performance
characteristics 15 p2508 A66-28811
Weapon system design, noting variables for
manning and skill requirements, parameters
of operational readiness,
etc 15 p2618 A66-28813
New concepts in railroad management
oriented to logistics market and return on
investment 15 p2621 A66-29801
Aircraft mile cost vs seat mile cost, noting
payload estimation, profit potential,
productivity and other parameters
[SAE PAPER 660277] 15 p2427 A66-29823
Aircraft utilization and schedule planning,
optimum use of flight performance, ground
equipment, facilities and personnel
[SAE PAPER 660279] 15 p2427 A66-29824
Selection, flow and transference of
technology in large electronics aerospace
firm, noting methodology, planning, market
area selection, etc 16 p2830 A66-30400
Factors to be considered in capital
equipment and facilities for environmental
testing, including management planning,
work load reorientation,
etc 16 p2831 A66-30441
Book on systems and simulation including
mathematics of simulator, random processes,
industrial systems, traffic and cargo
problems, etc 16 p2739 A66-31739
R and D clean room complex design for
guidance and control systems, noting
contamination control, maintenance
procedures, cost factors,
etc 17 p2903 A66-32209
Coordinated management planning required
for minimizing funding escalation and
overdiversification of potential missions
[SAE PAPER 660450] 17 p3040 A66-33159
French aerospace industry, production of
aircraft, engines and missiles, research
programs, expenditures,
etc 18 p3267 A66-33915
Practical cost reduction possibilities within
aerospace industry 18 p3268 A66-33947
Independent research
management 19 p3480 A66-35534
Integrated maintenance management
specification WR-30 applied to limited
development program for attitude reference
system 20 p3682 A66-37187
Optimal support costs of weapon systems
requires contractor selection based on high
order of management
capability 20 p3682 A66-37238
Production management principles in
implementation at Nord Aviation,
considering use of electronic equipment for
data processing 20 p3562 A66-37398
System effectiveness, Volume 5 -
Reliability and Maintainability Conference,
New York, July 1966 20 p3563 A66-37879
Managerial functions related to electronic
component parts
programs 20 p3683 A66-37881
Apollo command service module /CSM/
parts management 20 p3684 A66-37882
program 20 p3684 A66-37882
Decision table for determining base depot
maintenance policy for aircraft
engines 20 p3566 A66-37888

MANEUVERABLE SPACECRAFT

Management in applying reliability and
maintainability for improved cost
effectiveness by first-tier
supplier 20 p3685 A66-37913
Management planning and profit and loss
in systems design 20 p3685 A66-37918
Naval weapons A-7A maintainability
requirement effect on management and
design and analysis of early flight test
data 20 p3496 A66-37920
Reliability education, discussing general
questions, problems, levels of education,
personnel distribution,
etc 20 p3686 A66-37971
System analysis as management tool, noting
application in aviation 20 p3686 A66-37972
Management role in NASA Space
Applications Program 20 p3687 A66-37973
System effectiveness in manned space
program through correct management
decisions 20 p3687 A66-37974
Data acquisition and analysis for
quantitative and qualitative assessment of
complex space vehicle
hardware 20 p3523 A66-37975
Zero defects program, discussing
principles, operation and results
[ASME PAPER 66-MD-26] 21 p3837 A66-38482
Configuration management outlining
requirements for change identification,
control, implementation, etc
[ASME PAPER 66-MD-69] 21 p3837 A66-38498
Selection and development of guidance
station at Gove, Australia, noting access
routes, logistics problems,
etc 21 p3721 A66-38643
Requirements, functions and equipment of
down-range guidance station for ELDO
program in Australia 21 p3721 A66-38644
Air traffic estimation, discussing
installation locations and parameters for
airport site choice 21 p3838 A66-39433
NASA management, budgetary problems,
controversy of incentives system,
etc 23 p4151 A66-41047
Design characteristics and marketing
prospects of Concorde SST 23 p4015 A66-41301
New jet transports, discussing subsonic,
SST and stretched versions of subsonic
transports 23 p4016 A66-41302
Short haul air transportation in Europe,
noting market development with helicopter
techniques and development of more
efficient rotor aircraft 23 p4151 A66-41303
Air transportation between 1980 and 2000,
noting cost limitation, possible trends,
management planning, etc 23 p4152 A66-41304
Generalized system for project control and
evaluation, considering cost, time,
performance and
reliability 23 p4152 A66-41777
British-French cooperation in aeronautics,
discussing Concorde SST, variable geometry
aircraft, Olympus 593 turbojet,
etc 23 p4016 A66-42069
Operational effectiveness and
maintainability verification for surveillance
and control systems influence by
quantitative reliability 24 p4179 A66-42094
Space project planning through detailed
knowledge and correlation of various
disciplines, noting role of universities,
industry and government 24 p4296 A66-42242
MANDREL
Robustness, axial alignment and low
friction through limited angular excursion of
pivot, noting lapping fixture and anvil
assembly 24 p4218 A66-43222
MANEUVER
S FLIGHT CONTROL
S SATELLITE MANEUVER
S SELF-MANEUVERING UNIT
S SPACE RENDEZVOUS MANEUVER
S SPACECRAFT MANEUVER
S VALSALVA MANEUVER
MANEUVERABLE SATELLITE
Requirements, simulation and design
approach of auxiliary controllable satellites
which can be operated from manned
orbiting space stations 19 p3469 A66-35970
MANEUVERABLE SPACECRAFT
Titan III building blocks, discussing vehicle
features, launch facilities, mission and
maneuver capability, payload mass ratio, etc
[SAE PAPER 660447] 18 p3245 A66-33893

MANGANESE

Cr and Mn effects on aging mechanism and anticorrosion properties of Al-Zn-Mg alloys 03 p0381 A66-12723

Fe and Mn variation in tektites, significance in identification of parent material 04 p0575 A66-13454

Manganese X-ray emission lines in compound-oxide semiconductor 07 p1105 A66-18369

Partial substitution of manganese for nickel in maraging steel and effect on mechanical properties 12 p1895 A66-24375

Magnetic and semiconducting properties of solid solutions of LaMnO sub 3 and LaCoO sub 3 14 p2353 A66-26900

Magnetic hysteresis and switching property of manganese-bismuth thin magnetic films epitaxially grown by vapor deposition technique 14 p2355 A66-26913

Laser action on several hyperfine transitions in Mn I 18 p3118 A66-34000

Effect of manganese and zirconium additions on recrystallization temperature and grain size of aluminum alloys 23 p4081 A66-41404

Induced uniaxial anisotropy energy of manganese-bearing ferrites, noting effect of metal additives 24 p4253 A66-42360

MANGANESE ALLOY

Corrosion resistance and anodic behavior of Kh18N9 steels with various nickel-manganese-carbon-titanium contents 01 p0088 A66-10987

Time decrease of initial permeability in manganese zinc ferrite, noting increase in magnetic loss due to increasing disaccommodation 13 p2166 A66-25881

Nitrogen addition effect on heat resistance of chromium-manganese-austenitic alloys 20 p3584 A66-37695

MANGANESE COMPOUND

Heat of combustion of tricarbonyl-cyclopentadienylmanganese 08 p1279 A66-18798

Spin wave sideband in absorption spectrum at low temperatures for transition of manganese ion in antiferromagnetic manganese fluoride 11 p1740 A66-22970

Low temperature behavior of manganese germanate compared to manganese titanate, showing magnetic susceptibility 12 p1931 A66-24811

Optical transition of manganese fluoride as function of temperature and magnetic field in both emission and absorption 14 p2351 A66-26886

Manganese-silicon p-type thermoelectric material for intermediate temperature application 24 p4248 A66-42113

MANGANESE OXIDE

Manganese oxide effect on kinetics and mechanics of sintering of alumina powder compacts 08 p1243 A66-18774

Electric conductance and capacity of pressed chemically-purified manganese dioxide powder at various temperatures 16 p2781 A66-31340

MANGLER TRANSFORMATION

Mangler rectilinearization of axisymmetric laminar boundary layer flows and Prandtl boundary layer hypotheses, applicability to non-Newtonian fluids 17 p2912 A66-33045

Mass transfer from cone in supersonic flow in tests performed at zero angle of attack, preserving Mangler transformation which transforms flat plate solution to cone 22 p3843 A66-40036

MANIFOLD

Pulse energy tensor and internal macroscopic interactions in gravitational field and in material media 12 p1914 A66-24008

Irreducible unitary representations of restricted Lorentz group on manifolds of time-, light-and spacelike 4-vectors, obtaining plane-wave solutions of Klein-Gordon equation 15 p2528 A66-29622

MANNED AIRCRAFT

Relative effectiveness of missiles and manned aircraft in tactical warfare 07 p0987 A66-17284

MANNED ORBITAL LABORATORY /MOL/

USAF manned space navigation experiment on Gemini and implications on MOL 02 p0255 A66-11318

Feasibility of converting nuclear energy into directed beams capable of vaporizing

offensive missiles, thus protecting our satellite systems 02 p0290 A66-12068

Manned Orbiting Laboratory experiments such as airglow, solar corona, cosmic ray, plasma, far UV image orthicon, etc 04 p0585 A66-13678

Neurophysiological aspects of manned extraterrestrial space flights such as motor responses by sensory inputs, cortical responses, etc 04 p0464 A66-14065

Military aspects of U.S. space program, reviewing work from ballistic missile to Manned Orbiting Laboratory 08 p1321 A66-18550

MOL program noting design requirements, operation, functions, etc 08 p1300 A66-18556

Titan 3C 120-inch diameter solid-propellant rocket motor 12 p1935 A66-24405

Communications requirements for manned deep space missions, using optical links, with PPM, PCM/PL and coherent reception for each link 12 p1823 A66-24782

[AIAA PAPER 66-317]

Computer oriented manned orbiting laboratory with reduced crew duties, noting computer role in navigation problems, repairs, continuous ion thrust, etc 13 p2190 A66-25245

Brayton cycle, Rankine cycle and thermoelectric systems considered as radioisotope secondary power systems for MOL [ASME PAPER 65-AV-18] 16 p2636 A66-30856

Rendezvous techniques and mission requirements involving space docking for transfer of personnel to and from manned space and lunar laboratories 16 p2812 A66-31683

Smear resolution losses in ground target photographs for maneuverable target-tracking reconnaissance cameras, noting MOL simulation 17 p2925 A66-32351

Ultrareliable six redundant sensor attitude reference system for Manned Orbiting Laboratory with limited sparing capability 21 p3767 A66-38892

MANNED ORBITAL RESEARCH LABORATORY /MORL/

Apollo hardware and technology for future manned space exploration, noting MORL spacecraft use 02 p0288 A66-11507

Apollo spacecraft for manned near-Earth orbital mission, noting Apollo command and service modules and Lunar Excursion Module 02 p0288 A66-11508

Flight crew capability determined for Manned Orbital Research Laboratory /MORL/ 06 p0818 A66-16243

Astronomical research possibilities, using manned Earth orbital spacecraft 10 p1608 A66-21531

Advanced low-thrust propulsion systems and propellants evaluation for stationkeeping and stability control of NASA Manned Orbital Research Laboratory [AIAA PAPER 66-226] 12 p1936 A66-24522

Manned Orbiting Research Laboratory design for experimental program requirements and mission flexibility 18 p3240 A66-33799

Electrical power control and conditioning subsystem for Manned Orbital Research Laboratory /MORL/, noting Brayton cycle, system optimization, alternator and frequency converter selection 20 p3497 A66-37157

Closed Brayton cycle power system for space vehicles, discussing closed loop and major components 23 p4020 A66-41750

Plutonium-238 radioisotope Brayton cycle power system design and vehicle integration 23 p4021 A66-41754

MANNED ORBITAL SPACE STATION /MOSS/

Interior design problems in artificial g spacecraft simulator 02 p0185 A66-11624

Rotating artificial gravity system for manned orbital vehicles and stations requiring no expenditure of propulsive mass to attain full vehicle rotation 02 p0294 A66-11632

Recoverable reusable space shuttle for manned space station orbiting Earth 02 p0296 A66-12072

Orbital space station development based on multimission space station module for six persons and multipurpose logistics vehicles for ferry resupply 03 p0432 A66-12904

Structural stability criteria of manned rotating space stations derived from elastic model experiments 18 p3240 A66-33820

[AIAA PAPER 65-406]

Requirements, simulation and design approach of auxiliary controllable satellite which can be operated from manned orbiting space stations 19 p3469 A66-35970

Book on rocket construction 1963-65 and winged space vehicles including manned orbital space station, design, structural schemes, reentry, etc 23 p4128 A66-41270

MANNED ORBITAL TELESCOPE /MOT/

Photometry, polarimetry and spectroscopy experiments for manned orbital telescope 05 p0682 A66-15260

Design of 120-inch Cassegrain system for manned orbital telescope 05 p0682 A66-15260

[MOT/]

Orbiting of manned astronomical telescopes, noting advantages over instruments hampered by Earth atmosphere 19 p3468 A66-35799

MANNED REENTRY

Planetary entry trajectory control of manned vehicles for Earth and Mars atmospheres 03 p0431 A66-12740

Hypersonic lift-drag ratio and landing modes in manned entry vehicle design 15 p2605 A66-28740

MANNED SPACE FLIGHT

SA SPACE FLIGHT STRESS

Reentry guidance for manned Mars mission, return considering capture and acceleration control, skip range and terminal range controls 01 p0101 A66-10040

Availability concept in attitude control system for manned Mars expedition 01 p0018 A66-10080

Methodology for numerically defining international magnitude of space rescue requirements 01 p0143 A66-10790

Problem areas in long duration manned space flight noting vehicle maintenance, extravehicular activities, visual skill performance, spacecraft control, etc [SAE PAPER 650809] 01 p0021 A66-10810

American and Soviet experience considering weightlessness, ionizing radiation, dynamic and biological factors, etc [SAE PAPER 650812] 01 p0021 A66-10810

Manned Space Navigation Conference, St Petersburg, Florida, April 1964 02 p0254 A66-11310

Navigation requirements for Empire manned interplanetary missions discussing orbit determination, path corrections, sensor selection, functional systems and man-machine roles 02 p0255 A66-11310

USAF manned space navigation experiment on Gemini and implications on MOL 02 p0255 A66-11310

Apollo extension systems, developing technology for long-term manned space mission 02 p0293 A66-11500

Manned space flight - AIAA Meeting, St Louis, October 1965 02 p0184 A66-11610

Gemini and Apollo Earth-orbital programs 02 p0185 A66-11610

Biological problems in extended manned missions caused by low g, artificial atmosphere and absence of terrestrial periodicities 02 p0185 A66-11620

Electric propulsion for manned interplanetary mission evaluated in light of new optimum planetary transfer trajectories of power-limited flight 02 p0289 A66-11620

Navigation and control simulation portions of overall manned space cabin test program [AIAA PAPER 65-277] 03 p0328 A66-12770

Markov chain with one absorbing barrier used as mission effectiveness model for manned space flight 03 p0426 A66-12900

Cybernetics role in space flight including control circuits for guidance and electronic equipment automation and development 04 p0469 A66-13490

Biological stresses of manned space flight in limiting flight duration, noting isolation effect 04 p0469 A66-13500

Scientific and industrial reasons for manned lunar missions 04 p0576 A66-13570

Data handling and telemetry requirements for manned scientific traverse, discussing MOL instrumentation and data parameters 04 p0478 A66-13590

Space travel and exploration covering biological and technical difficulties such as

- radiation, meteor impact, vehicle sterilization, etc 04 p0469 A66-13806
- Basic environmental problems of man in space - International Symposium, Paris, October 1962 04 p0463 A66-14063
- Monitoring human performance during manned orbital flight for assessment of central nervous system function, noting animal studies during simulated stresses of space flight 04 p0468 A66-14088
- Manned space flight program with biomedical data collection for integration of crewman into spacecraft operation 04 p0471 A66-14090
- Determination of cloud-top altitude by GT-5 manned space flight 05 p0712 A66-15482
- Crew survival goals in system design for manned space mission derived from comparative examination of mortality rates of overall society ASME PAPER 65-WA/HUF-18] 05 p0627 A66-15694
- Manned space flight observations include confirmation of normal airglow, Glenn effect and photographs of land and ocean areas that can be compared with lunar and planetary photographs for geologic interpretation 05 p0629 A66-15755
- Chemical radiation protection, covering long period exposure, effect of pyridoxine during supersonic and manned space flights 06 p0815 A66-16053
- Artificial gravity through slow rotation to solve weightlessness problem in long manned space flights, considering cardiovascular deconditioning and biological problems of rotating environments 06 p0817 A66-16237
- NASA aeronautics and space research including near-Earth, cislunar and interplanetary space, manned flights, meteorology and communications 08 p1321 A66-18549
- Manned interplanetary flight, emphasizing nonstop flybys past Mars and Venus, reviewing launch and departure modes, energy requirements, environmental control, navigation spacecraft power source, etc 08 p1286 A66-18561
- Extraterrestrial life detection and life support systems in manned space travel, noting electronic equipment necessary for mission 08 p1175 A66-18727
- Scientific experiments for manned orbital flight - Goddard Memorial Symposium, Washington, D.C., March 1965 10 p1607 A66-21517
- Weightlessness, radiation and chemical and biological contamination problems of future manned orbital space flight 10 p1486 A66-21530
- Venus swingby used to decelerate manned spacecraft returning from Mars 10 p1609 A66-21928
- Logbook account of Gemini VI and VII missions 11 p1777 A66-22252
- Powered manned Mars flyby departing Earth near minimum velocity point, considering required maneuver within Mars influence for valid return 11 p1768 A66-22455
- Physiological and psychological effects on man during U.S. suborbital and orbital flights from Project Mercury 11 p1642 A66-22483
- Manned space flight program management noting system efficiency, cost factors, reliability and performance reports based on Apollo project 11 p1789 A66-23437
- Space travel and exploration and relationship to scientific research, with comments on exobiology 12 p1946 A66-23635
- Space travel and exploration, biological and technical difficulties, radiation, meteor impact, vehicle sterilization, etc 12 p1807 A66-23640
- Aerosol deposition in lungs of spacemen under weightless conditions 12 p1806 A66-23920
- Weather support problems in Gemini and Apollo programs 12 p1953 A66-24475
- AIAA PAPER 66-334] Aerospace and space simulation including rendezvous and docking, lunar landing and operation of supersonic transports 12 p1858 A66-24605
- Integration of life support system and propulsion system for manned interplanetary space missions 13 p2012 A66-25246
- Shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 13 p2190 A66-25261
- Space vehicle shielding with two concentric toroidal superconducting coils providing magnetic field for deflection of charged particles 13 p2190 A66-25262
- NERVA electric manned Mars vehicle design, performance and operation for interplanetary missions 13 p2190 A66-25263
- Psychological and sociological stressors on Mars mission vehicle crews such as sensory deprivation, isolation, confinement and limited social interaction 13 p2013 A66-25280
- Gemini Voice Recording System, MRS 200 for voice-time tape recording during manned space flights 13 p2081 A66-26025
- Role of man in space exploration, noting astronauts personal reports, scientific ability, superiority over instruments, etc 14 p2229 A66-26919
- Structural dynamics/manned space flight relation, discussing man-machine dynamics, Apollo command module LF studies, pilot control of spacecraft and launch vehicle, etc 14 p2230 A66-28017
- Technical feasibility of 1975 manned flyby mission to Eros and examination of lesser bodies of solar system 14 p2390 A66-28411
- Space radiation environmental hazard to manned space flight 14 p2231 A66-28415
- Onboard testing and checkout of manned space vehicles 14 p2272 A66-28424
- Houston mission control center for flights from Gemini to Apollo program 14 p2272 A66-28441
- Apollo Manned Space Flight Network /MSFN/ tracking and communications systems for tracking lunar spacecraft 15 p2450 A66-28748
- Reliability-maintenance relationship including accessibility, design, crew duty cycle, and equipment failure rates, number of restorations, etc, in long-duration manned missions 15 p2606 A66-28804
- U.S. space research in 1965 including lunar missions, Venus and Mars projects, manned space flights, meteorological satellites, etc 15 p2599 A66-29899
- Radiation levels on Gemini IV flight including Van Allen belt and South Atlantic Anomaly 15 p2591 A66-29997
- Mars and Venus manned interplanetary flyby missions 16 p2808 A66-30368
- Problems involved in manned exploration of Mars surface 16 p2798 A66-30369
- Monograph on manned space flight, discussing environment, crew, spacecraft, navigation, guidance, control, communications, etc 16 p2809 A66-30878
- Biomedical equipment for manned space flight, noting characteristic requirements, specifications and design 17 p2862 A66-32139
- Water management system design for long duration manned space flights emphasizing hardware, flow diagram, operation and control rather than component design or selection [AICE PREPRINT 54B] 17 p2867 A66-32669
- Water electrolysis unit designed as flight prototype to support four-man crew for one-year mission with 90-day resupply intervals [AICE PREPRINT 47B] 17 p2867 A66-32671
- Manned spaceflight analytical instrumentation uses design tradeoff of reduction in size with loss of versatility 17 p2867 A66-32677
- Lifting reentry test phases and effect of pilot performance on miss distance in first manned Gemini flight, discussing spacecraft control 17 p3016 A66-32685
- Reliability, maintainability, and spacecrew safety in hypothetical manned Mars mission 17 p2930 A66-33174
- Manned Mars stopover mission employing two vehicles, analyzing rendezvous, transfer trajectories, flyby trips, etc 18 p3227 A66-33790
- Integrated mission simulation technique tests pilot reliability for seven-day manned lunar mission [AIAA PAPER 65-275] 18 p3061 A66-33792
- TRW Systems MARCO 4418, small high-speed lightweight reliable digital computer, for use in manned space missions 19 p3306 A66-35503
- Legal question of Moon ownership, discussing international implications of manned landing 19 p3480 A66-35733
- Life support requirements encountered in manned space flights, considering cycle involving oxygen, food and water in terms of process criteria 19 p3485 A66-36231
- Guidance, navigation, propulsion and course correction specifications for Mars or Venus manned flyby missions 20 p3596 A66-37226
- Optimization of operational payloads for manned Mars missions, discussing life support and environmental control systems, auxiliary power, radiation shielding, data acquisition, navigation, guidance and cost analysis 20 p3663 A66-37903
- System effectiveness in manned space program through correct management decisions 20 p3687 A66-37974
- Data acquisition and analysis for quantitative and qualitative assessment of complex space vehicle hardware 20 p3523 A66-37975
- Nuclear electric propulsion applied to manned Mars missions, presenting analytical tool to simultaneously optimize interplanetary vehicle design and trajectory [AIAA PAPER 65-414] 23 p4120 A66-41110
- Shielding of manned Mars vehicles from solar and galactic cosmic radiation and radiobiological tolerance criteria 24 p4283 A66-42785
- Safety and survival in manned space flights, discussing space suits, escape, life preservation after soft landing, etc 24 p4169 A66-43145

- Suitability of beryllium reinforced plastics

and various light metals for application in manned space stations 10 p1545 A66-21216

Reentry orbits for manned spacecraft using aerodynamic lift and drag forces for reentry 10 p1606 A66-21264

Meteorological research capability of manned Earth orbiting spacecraft with refined electromagnetic sensing instrumentation 10 p1553 A66-21526

Basic physical/biological phenomena studied under zero-g conditions in Earth orbital spacecraft 10 p1491 A66-21529

Gravity gradient sensor application to manned orbital spacecraft, noting instrumentation for various functions 10 p1535 A66-21533

Unmanned and manned satellites for communication and terrestrial navigation, noting future plans of NASA 10 p1496 A66-21534

Hypervelocity particle penetration of manned space station structure, discussing hole formation and repair 10 p1612 A66-21931

Manned space flight program management noting system efficiency, cost factors, reliability and performance reports based on Apollo project 11 p1789 A66-23437

Gamma ray spark chamber with photographic recording for manned satellites, determining energy spectrum 12 p1877 A66-23688

Reliability engineering concepts for manned spacecraft development and test program to achieve operational readiness with minimum flight tests 12 p1884 A66-23742

Manned orbiting astronomical observatories would enable astronomer astronauts to erect large sensors in space and avoid atmospheric effects 13 p2192 A66-25689

Manned Mars mission systems designed by university students 13 p2193 A66-25785

Thermal integration of electric power for use in life support system to reduce total electrical power requirements [AIAA PAPER 64-722] 13 p2004 A66-26617

Man-machine systems involved in on-line man/ computer interaction, manned space systems, satellite communication and display systems 14 p2230 A66-27820

Lubricant selection for lunar missions and manned spacecraft based on compatibility with oxygen-rich environment, propellant, anodic coatings and sliding friction behavior in vacuum [ASLE PAPER 66AM 7A2] 16 p2712 A66-30415

Space radiation monitoring systems for categorizing particle types and intensities 17 p2924 A66-32164

Human and man/system requirements to provide criteria for choosing alternative mission and lunar surface roving vehicles design concepts 17 p2903 A66-32170

Tracer dilution technique for measuring quantity of urine voided by crew members in manned spacecraft environment 17 p2870 A66-32192

Soviet program for military applications in space including artificial satellites, deep space probes and man-in-space program 17 p3040 A66-32352

Space medicine and biology studies of space flight environmental factors based on experiments with animals and manned spacecraft 18 p3056 A66-33699

Suitability of oxygen-helium atmosphere for manned space missions proven by 56-day human exposure at 258 mm Hg total pressure 18 p3057 A66-33768

Checkout criteria and requirements for manned spacecraft, specifically Apollo [AIAA PAPER 65-284] 18 p3093 A66-33791

Man-rating criteria in Boeing space environmental simulation chamber, discussing structural design, vacuum chambers, repressurization, manlock pumping systems, aerospace medical training, etc 19 p3289 A66-35841

Modular maneuvering unit for crew members providing independent propulsion, life support, power supply and communication capability 19 p3450 A66-35961

Passive wobble damping system with pendulum damper designed for manned rotating space station 20 p3664 A66-38159

Meteorological studies from manned spacecraft discussing interpretation of cloud

pictures and optical inhomogeneity of tropo- and stratosphere 21 p3760 A66-39363

Manned mission design analysis, examining spacecraft electrical power requirements, weight correlation and cost estimation 23 p4021 A66-41753

MANOMETER

Liquids used in manometers for pressure and pressure difference measurement in rarefied gases, considering cadmium boron tungstate, polymethylsiloxanes, etc, noting lack of toxicity, low viscosity, etc 03 p0371 A66-13204

Pulse ionization manometer based on open 6Zh2P pentode with oxide cathode for measuring fluctuating inactive-gas pressure 04 p0520 A66-13893

Aerodynamics of manometers and mass spectrometers used on rockets and satellites for determination of atmospheric temperature and density 09 p1383 A66-20993

Rugged micromanometer capable of reliably measuring pressure differences as low as 10 mtorr in flow of gaseous media 12 p1876 A66-23601

Stresses and displacements in manometer springs with variable wall thickness 14 p2396 A66-27360

Pulse ionization manometer based on open 6Zh2P pentode with oxide cathode for measuring fluctuating inactive-gas pressure 15 p2503 A66-29706

Manometer for measuring gas pressure from current required to heat platinum wire to certain temperature 16 p2708 A66-31359

Piston manometer calibration for precision pressure measurement 24 p4213 A66-42822

MANPOWER

Manpower projections and problems for communications satellites, discussing requirements for research, development, production and operation [AIAA PAPER 66-275] 12 p1982 A66-24748

MANUAL

SA HANDBOOK

1965 supplement to 1958 ASTM manual for rating aviation fuels by supercharge and aviation methods 14 p2370 A66-27230

MANUAL CONTROL

Manual control of vehicles considering aircraft handling, human dynamics, etc [ASME PAPER 65-WA/HUF-10] 05 p0628 A66-15697

Manual control sextant sighting performance for space navigation, using simulated and real celestial targets 10 p1554 A66-21894

Manual guidance system for atmospheric entry of lifting reentry vehicles 10 p1554 A66-21930

Man-rated booster design provides alternate manual propulsion and guidance control enabling astronaut participation in mission success [AIAA PAPER 65-251] 10 p1612 A66-21949

Manual closed-loop control systems analysis, discussing operator dynamics for permanent procedural variables 12 p1855 A66-24641

Human capability of tracking moving target while subject to pitch and roll onboard space ship [ASME PAPER 66-HUF-10] 14 p2229 A66-26968

Performance of human operators in three-state relay control system with velocity augmented displays 16 p2644 A66-31270

Combined computer and physical simulation of manual tracking system for coupled-camera photography of one space vehicle from another when wieldable viewfinder is used 20 p3597 A66-37233

Manual steering, hybrid guidance system, in-flight computations and trajectory for automatic descent and landing system for LEM 21 p3768 A66-38899

Human operator behavior following step change in controlled element, determining limitations on operator descriptions and measurement methods which might be employed 22 p3858 A66-40253

Nonlinearity and time variability dynamic models of human operators in manual control systems 23 p4029 A66-41574

Preflight consideration of astronaut performance testing program for Gemini XI flight, noting manual operations and devices used 24 p4168 A66-42742

MANUFACTURING

Manufacturing reliability control through practical management considering indoctrination, problem solving and measurement, noting welding performance 01 p0076 A66-10098

Report on transistor industry covering manufacturing techniques, materials, geometries, advantages, disadvantages, etc 03 p0347 A66-13342

Manufacturing large production quantities of precise solid propellant mixtures to meet space booster propulsion system [SAE PAPER 650766] 05 p0743 A66-15005

Manufacturing methods in space flight technology - German Symposium, Munich, November, 1964 06 p0887 A66-17068

ASTM Southeastern Engineering Conference and Tool Exposition, Atlanta, October 1965 08 p1228 A66-18685

Machine parts of complicated form manufactured from powdered materials by vibrational compacting 10 p1540 A66-21506

Estimation of manufacturing costs of low volume high-cost complex electronic subsystems [ASTME PREPRINT MM66-701] 12 p1886 A66-24411

Manufacture of scintillator in form of synthetic sheets differing in area and thickness, polymerizing styrene between metallic or glass sheet 13 p2077 A66-25325

High pressure manufacturing methods including fluid-to-fluid extrusion, tube expanding, flange forming, shell drawing, etc [ASTME PAPER MF66-107] 14 p2299 A66-26948

Advancement in manufacturing technology in aerospace industry [SAE PAPER 660324] 14 p2301 A66-27301

Traceability and configuration data system /TAC/ used to determine location of individual parts and assemblies 15 p2506 A66-28791

Standardization of optical fabrication procedures and working materials 15 p2509 A66-28821

Castable composite high energy propellants manufacturing techniques, discussing economy based on batch mixing and continuous processing 22 p3969 A66-39870

Nonmetallic solid-propellant rocket motor component manufacture and assembly, noting process control 22 p3927 A66-40284

Machine parts of complicated form manufactured from powdered materials by vibrational compacting 23 p4073 A66-41527

Manufacturing techniques for turbojets, considering metals difficult to machine and components of shapes difficult to form 23 p4074 A66-41656

Chemical and electrical energies in manufacturing noting role of numerical control, hydrostatic processes, forming, electrochemical machining, etc 24 p4217 A66-42336

MANY-BODY PROBLEM

Routh criterion concerning existence of periodic solutions around triangular libration centers is shown to be valid only at first order [AIAA PAPER 65-681] 01 p0134 A66-10235

Perturbation technique to study three-body problem of motion of close satellite [AIAA PAPER 65-690] 01 p0134 A66-10236

Motion equation for system of n bodies assuming half retarded and half advanced mass-distribution 07 p1137 A66-18053

Simple alternative derivation of conventional cluster expansion formula for matrix elements of identity and Hamiltonian for expectation value of energy of many-Fermion system 08 p1259 A66-19445

Projection operators applicable for rearrangement and exchange processes with full recoil effect for unified reaction theory of Feschbach 10 p1558 A66-21961

Book on mathematics underlying celestial mechanics, including central force problem, n-body problem, Hamilton-Jacobi and perturbation theories 11 p1776 A66-23202

Dynamic evolution of clusters of galaxies 14 p2383 A66-27707

Linearized four-body problem, which is perturbation of restricted three-body problem, solved for boundedness of solutions 17 p3006 A66-33015

perturbation technique to study three-body
 problem of motion of close satellite
 [AA PAPER 65-690] 19 p3462 A66-35896
NY-PARTICLE THEORY
 nonlinear Maxwell equation for optics of
 ny-particle system, noting Raman
 scattering from electron
 sma 05 p0695 A66-14905
 electron correlation theory in nonclosed-
 ell states, discussing orbital wave
 functions and perturbation
 13 p2130 A66-25376
 quantum theory of Q-spooled laser, noting
 statistics of number of photons in mode
 ar qualitative resemblance to Poisson
 statistics 23 p4077 A66-41373
ASTRONOMICAL MAP
CHART
LUNAR MAP
RADAR CLUTTER MAP
RADAR MAP
RELIEF MAP
 color spectrozonal photography used in
 plotting topographic maps 06 p0881 A66-16752
 design criteria and operational
 performance of Doppler-driven map display
 vice installed on Trident
 craft 07 p1077 A66-17802
 contour maps of diurnal changes in
 magnetic elements provided by observatory
 calculations of mean hourly values of mean
 monthly days 12 p1873 A66-24836
 occurrence percentage of spread F in
 world-wide maps drawn from ionosonde data
 during years of high and low sunspot
 numbers 16 p2696 A66-30818
 displays of navigation data showing
 horizontal situation against moving map,
 using use of standard charts, provision for
 permanent record, etc 19 p3398 A66-36733
P-MATCHING GUIDANCE
 charting for dynamic map displays
 eparatory to SST 07 p1068 A66-17705
 erations moving map displays for navigation
 formation portrayal, advantages and
 requirements for subsonic and SST
 liners 07 p1076 A66-17796
 charting for dynamic map displays
 eparatory to SST 13 p2125 A66-25869
PPING
CARTOGRAPHY
CONFORMAL MAPPING
FIXED POINT
FLUX MAPPING
PHOTOGRAMMETRY
TOPOGRAPHY
 look on French aerial photography,
 emphasizing methodology rather than
 production of samples 04 p0523 A66-14380
 generalized extensions of operators for
 pping everywhere dense linear set onto
 generalized set of Hilbert space
 ements 05 p0708 A66-15329
 ontinuous moving-scene display system
 output of airborne mapping sensors such
 radars, microwave radiometers and IR
 nners 06 p0878 A66-15966
 ereoscopic mapping on revolving base,
 scribing process where size of scale is
 dependent of length of
 f-base 10 p1534 A66-21282
 elocity profiles in point-to-point mapping
 compressible turbulent boundary layers
 o constant density 10 p1523 A66-21769
 ccuracy and applicability of Hilger and
 tts radial-line plotter and Morin-Secretan
 dial Plotter compared for medium-and
 ge-scale mapping 11 p1705 A66-22663
 e-age methods of implementing
 imized logic circuits entirely with NAND
 es 13 p2047 A66-25361
 ilitary aerial mapping program, noting
 era lens distortion, shutter, stabilization,
 ns, etc 16 p2703 A66-30511
 eneralized extensions of operators for
 pping everywhere dense linear set onto
 generalized set of Hilbert space
 ements 16 p2735 A66-30967
 erial mapping camera for
 otogrammetric research, examining three
 ems of correcting for film
 rtortion 18 p3110 A66-33740
 orldwide long-range navigation satellite
 avsat/, noting use with inexpensive black

box, clear-air turbulence mapping and
 position definition in relation to high
 ground 20 p3598 A66-38259
MARAGING STEEL
 Arc welding of two stainless maraging
 steels 02 p0235 A66-11468
 Constant load rupture test of susceptibility
 of Ni-Co-Mo maraging steel to delayed
 hydrogen cracking 03 p0381 A66-12541
 Maraging steel properties and application
 noting notched strength, sensitivity and
 brittleness 04 p0536 A66-14000
 Submerged arc welding of 18 percent
 maraging steel 05 p0685 A66-14516
 Fracture toughness and stress corrosion
 resistance of several heats of maraging steel
 compared with results for low-alloy and hot-
 work die steel 06 p0897 A66-16801
 Martensitic transformation kinetics and
 maraging mechanisms in Fe-Mn-Ni-Ti alloy
 observed by electron and X-ray
 diffraction 08 p1236 A66-18762
 Maraging steels for missile cases to
 withstand stress and simplify manufacturing
 processes 08 p1231 A66-18929
 Maraging steel response to heat treatment
 including formability, machinability, stress-
 corrosion resistance and cold-working
 behavior of austenitic and martensitic
 phases 08 p1239 A66-18959
 Feasibility, reliability and applicability of
 maraging steels 08 p1240 A66-18960
 Submerged arc welding of Ti-Ni-Co-Mo
 maraging steel 10 p1539 A66-21169
 Fabrication of 260-inch diameter rocket
 cases by automatic gas tungsten arc welding
 techniques, using 18 percent nickel maraging
 steel 10 p1540 A66-21767
 Partial substitution of manganese for
 nickel in maraging steel and effect on
 mechanical properties 12 p1895 A66-24375
 Melting practice, sheet thickness and
 thermal and mechanical treatments effect on
 critical stress intensity parameter and
 ductility of 18-nickel maraging
 steel 13 p2108 A66-25772
 Machining characteristics of 18 percent
 nickel maraging steel
 [ASTME PAPER EM66-163] 14 p2311 A66-26956
 18 percent nickel maraging steel properties
 suitable for welding 16 p2723 A66-30321
 Phase transformation and precipitation
 processes as function of aging treatment in
 15 percent Ni maraging
 steel 18 p3122 A66-33752
 Impact fracture toughness of brazed
 laminates of maraging steels and titanium
 alloys found to be 2 to 7.8 times greater
 than homogeneous specimens of like size
 [AIAA PAPER 65-566] 19 p3377 A66-35620
 Electron beam welding of maraging steel,
 noting tensile test results on efficiency,
 defect formation, region of fracture
 nucleation, etc 19 p3371 A66-36632
 Maraging steel properties, discussing
 composition, strengthening mechanism,
 tensile and impact toughness, mechanical
 and fatigue properties, etc 20 p3587 A66-38431
 Nickel-cobalt-molybdenum maraging steels
 mechanical properties, costs, machining,
 etc 21 p3751 A66-39236
 Maraging steels for landing gear forgings,
 noting fabrication, distortion and fatigue
 tests 21 p3751 A66-39237
MARE
S LUNAR MARE
MARINE NAVIGATION
 Synchronous navigational satellites for
 ships and planes, noting distance and
 direction measurement by satellite
 interferometers 07 p1075 A66-17785
 Satellite navigation aid for marine craft,
 objectives of ATS and ATS-A, -B and -C
 spacecraft 10 p1611 A66-21896
 Deep submergence propulsion and marine
 systems - AIAA Conference, Forest Park,
 Illinois, February-March 1966 23 p4054 A66-41205
MARINER II SPACE PROBE
 Scale of distances and masses in solar
 system, IR characteristics of Venus and
 interplanetary space fields and particles
 revealed by Mariner II
 data 03 p0425 A66-12867
 Observations of interplanetary magnetic
 field by Mariner and Imp spacecraft confirm

predictions based on behavior of cosmic
 rays 03 p0429 A66-13263
 Composition and energy spectra of primary
 cosmic radiation in low energy regions from
 observations of Mariner II and Explorer
 VII 05 p0752 A66-15384
 Mariner II solar wind measurements
 including data on Venus electromagnetic
 radiation, space magnetic fields and charged
 particles, energy spectra, solar plasma,
 etc 07 p1130 A66-18077
 Magnetic fields of terrestrial planets,
 considering Mariner II measurements of
 magnetic field of Venus and motions in
 Earth core 12 p1948 A66-24032
 Mariner spacecraft design, discussing space
 flight operations, deep space
 instrumentation, launch vehicle and
 spacecraft systems 14 p2391 A66-27469
 MHD approximation of solar plasma fluxes
 observed by Mariner II as free rotating
 jets 15 p2574 A66-29077
 Unmanned interplanetary long-duration
 Mariner space flights and instrumentation,
 guidance, control, stabilization and
 communications of Mariner II and
 IV 16 p2807 A66-30362
 Mariner II and Mariner IV space probes,
 discussing Venus and Mars observation,
 instrument testing, subsystem testing and
 design 16 p2807 A66-30363
 Mariner II space probe measurements of
 solar wind including velocity, temperature,
 time dependence of proton velocity,
 temperature and density 18 p3167 A66-34331
 Hydromagnetic wave induced variations in
 plasma velocity and magnetic field in
 interplanetary space measured by Mariner
 II 19 p3466 A66-36766
 Average properties of positive-ion
 component of solar wind observed by
 Mariner II 24 p4263 A66-42586
MARINER IV SPACE PROBE
 Mariner IV data used to reevaluate Urey
 and Brewster theory for clearing of Martian
 blue haze 01 p0137 A66-10881
 Conclusions drawn from Mars photographs
 taken by Mariner IV 01 p0138 A66-10883
 Mission profile, operations facilities and
 science subsystem of Mariner
 IV 01 p0144 A66-11110
 Function of instruments and ancillaries of
 Mariner Mars science
 subsystem 01 p0072 A66-11111
 Cosmic ray telescope /CRT/ carried on
 Mariner IV Mars probe to measure flux and
 energy of protons and alpha particles in
 interplanetary space and near
 Mars 01 p0072 A66-11112
 Mariner IV Cosmic Dust Detector
 measurement of momentum, mass
 distribution, flux densities and time
 histories of dust particles near Earth and in
 space 01 p0073 A66-11113
 Physical description, module fabrication,
 sensor construction and calibration details
 of plasma probe carried on Mariner
 IV 01 p0073 A66-11116
 Magnetometer on Mariner IV Mars probe
 for interplanetary magnetic field and Mars
 magnetic field
 measurements 01 p0073 A66-11117
 Mariner IV TV system for photographing
 Mars surface during flyby 01 p0073 A66-11118
 Data automation system /DAS/ on Mariner
 IV Mars probe involving real and nonreal
 time for experiments during cruise and
 encounter flights 01 p0034 A66-11119
 Scan system used on Mariner IV Mars
 probe to search for, acquire and track
 planets so that pictures of surface can be
 taken 01 p0073 A66-11120
 Processing technique for scientific data
 telemetered to Earth from Mariner IV Mars
 probe 01 p0034 A66-11121
 Three-axis control system of Mariner IV
 for midcourse maneuver, communication,
 scientific instruments orientation,
 etc 03 p0430 A66-12480
 Mariner IV science subsystem design and
 integration of seven scientific instruments
 and three ancillaries into
 spacecraft 04 p0519 A66-13578
 Radio, telemetry and command subsystems
 of Mariner Mars 1964 telecommunications
 system 04 p0479 A66-13604
 Impulsive emission of approximately 40-kev
 electrons from Sun observed from Mariner

IV 05 p0746 A66-14779
 Expected diffraction effects on
 electromagnetic radiation from Mariner IV
 due to Martian atmosphere and
 occultation 06 p0827 A66-16039
 Mariner IV instruments and exploration of
 interplanetary space and
 Mars 06 p0959 A66-16315
 Mariner IV thermal control in steady state
 space conditions and in short-term transient
 variations near Earth or
 Mars 06 p0959 A66-16316
 Mariner IV maneuver and attitude control
 using Sun and star Canopus for reference
 frame 06 p0959 A66-16317
 Mariner IV timing and sequencing system
 using crystal-controlled
 oscillator 06 p0837 A66-16318
 Martian ionospheric observations made by
 Mariner IV interpreted in terms of model
 show atmosphere consists mainly of carbon
 dioxide, low temperature and no
 thermosphere 06 p0953 A66-16404
 Half-scale thermal model of Mariner IV
 spacecraft tested in simulated solar
 environment
 [AIAA PAPER 66-23] 06 p0960 A66-17084
 Mariner IV occultation experiment on
 Martian atmosphere, using amplitude and
 frequency changes of tracking and telemetry
 signal
 [AIAA PAPER 66-148] 07 p1002 A66-17900
 Instrumentation and design of scientific
 payload carried by Mariner
 IV 09 p1464 A66-20181
 Disk-seal triode coupled with transmitting
 tube for establishing radio contact between
 Mariner IV space probe and
 Earth 11 p1665 A66-22682
 Telemetry and data processing systems
 and sensor equipment of Mariner IV
 including TV camera, magnetometer, ion
 chamber, plasma probe,
 etc 11 p1778 A66-23115
 Mars exploration by astronauts, considering
 Mariner IV observations, noting low
 pressure and temperature, existence of
 frozen hydrosphere, etc 12 p1952 A66-24723
 Mariner IV occultation experiment
 concerning carbon dioxide and ionospheric
 peaks in Martian
 atmosphere 13 p2185 A66-25834
 Sensor calibrations using NBS standard of
 spectral irradiance, as used for Mariner IV
 Canopus sensor 13 p2080 A66-25986
 Mariner IV photographs, detailing camera
 system and optical specifications, discussing
 constraints involved in determining what
 regions of Martian surface were to be
 photographed, etc 13 p2188 A66-26383
 Mariner spacecraft design, discussing space
 flight operations, deep space
 instrumentation, launch vehicle and
 spacecraft systems 14 p2391 A66-27469
 Instrumentation and experiments
 performed by Mariner IV 14 p2394 A66-28356
 Mariner IV spacecraft and
 mission 15 p2602 A66-29956
 Mariner IV photographs of Mars, discussing
 mission objectives, functioning of camera
 system and interpretation of
 pictures 15 p2602 A66-29957
 Radio occultation measurement of Martian
 atmosphere over two regions by Mariner IV
 space probe 15 p2602 A66-29958
 Mariner IV observation of 500-kev protons
 in interplanetary space 16 p2792 A66-30164
 Unmanned interplanetary long-duration
 Mariner space flights and instrumentation,
 guidance, control, stabilization and
 communications of Mariner II and
 IV 16 p2807 A66-30362
 Mariner II and Mariner IV space probes,
 discussing Venus and Mars observation,
 instrument testing, subsystem testing and
 design 16 p2807 A66-30363
 Craters on Mars from Mariner IV pictures,
 showing no evidence of primeval crater and
 analyzing aeolian erosion 16 p2800 A66-30629
 Mars atmosphere models based on Mariner
 IV occultation deriving electron number
 density, temperature, pressure, mass
 density, etc, noting carbon dioxide
 presence 16 p2800 A66-30713
 Argument on Dessler hypothesis of long-
 tail model of magnetosphere, based on data
 from Mariner IV probe 16 p2794 A66-30724
 Comparison of surface structure of Earth,

Moon and Mars based on analysis of
 photographs from Mariner
 IV 16 p2802 A66-31013
 Data from ground photography of Mars
 covering portions of Mariner IV path, noting
 position of oases and
 canals 17 p3005 A66-33008
 Mariner IV Mars observation data analysis
 and interpretation 18 p3236 A66-34896
 RT Data Automation System automatically
 controls and synchronizes data-gathering
 sequence of cruise instruments of Mariner
 IV spacecraft 19 p3307 A66-35668
 Mechanical design requirements, criteria
 and processes of Mariner IV spacecraft
 configuration
 [ASME PAPER 66-MD-63] 21 p3817 A66-38495
 Mariner IV temperature control subsystem
 hardware, examining thermal shields,
 thermally actuated louver system and
 flexible multilayer shields
 [ASME PAPER 66-MD-64] 21 p3818 A66-38496
 Mars exploration by astronauts, considering
 Mariner IV observations, noting low
 pressure and temperature, existence of
 frozen hydrosphere, etc 22 p3976 A66-39775
 Half-scale thermal model of Mariner IV
 spacecraft for solar simulation and high
 vacuum testing in JPL 10-ft space
 simulator 22 p3888 A66-40213
 Mariner IV models of three Mars
 atmospheric layers analogous to terrestrial
 E, F-1 and F-2 layers, considering relative
 mass densities, temperatures, carbon dioxide
 photodissociation and ionization
 profile 23 p4129 A66-41779
 Low energy proton measurements in
 magnetosphere using
 Mariner IV
 spacecraft 24 p4263 A66-42602
MARINER PROGRAM
 Deep space network /DSN/ for navigational
 and communications support to NASA lunar
 and planetary space
 programs 13 p2021 A66-25248
 Mariner program results of Venus and
 Mars exploration, discussing atmospheres,
 surfaces, exospheres, etc 16 p2798 A66-30359
 Unmanned interplanetary long-duration
 Mariner space flights and instrumentation,
 guidance, control, stabilization and
 communications of Mariner II and
 IV 16 p2807 A66-30362
 Mariner 1964 parts screening program
 including philosophy, program
 implementation, screening results and
 conclusions 24 p4178 A66-42089
MARINER SPACE PROBE
 History of Mariner space program and
 discussion of future unmanned vehicles for
 exploration of interplanetary
 space 02 p0296 A66-11677
 Mariner Mars telecommunications system
 using PCM/PSK/PM modulation-
 demodulation in combination with
 pseudorandom sync codes 03 p0335 A66-12905
 Meteor wake diffusion model used for data
 interpretation on radio wave dispersion due
 to wake produced by Mariner VI capsule
 landing 04 p0481 A66-13847
 Failure mode effect, block redundancy,
 functional redundancy and cooperative
 multichannel design for system reliability in
 Mariner spacecraft 13 p2191 A66-25284
 Variations in polarity distribution of
 interplanetary magnetic field from
 observations by Mariner II and IV and IMP
 I 17 p3002 A66-32531
 Guidance and control systems of Mariner
 planetary spacecraft, noting requirements,
 flight performance, systems configuration,
 etc 18 p3242 A66-33852
 Mariner II solar wind velocity data relation
 to solar phenomena 18 p3167 A66-34332
 Thermal scale modeling of modified
 prototype of Mariner Mars 64 spacecraft
 used to predict inside temperature of
 spacecraft
 [AIAA PAPER 65-386] 19 p3468 A66-35622
 Interplanetary medium and S-band
 telecommunications obtained from tracking
 data from Mariner II and Mariner IV
 spacecraft 20 p3520 A66-38187
 Mariner spacecraft design and flight,
 examining configuration differences and
 mission requirements for Venus and Mars
 versions 24 p4282 A66-42689

Conceptual design and parametric
 evaluation of advanced Mariner flyby
 bus/lander mission to Mars in 1969 and 1971
 launch opportunities 24 p4282 A66-42689
MARKOV CHAIN
 Missile and spacecraft countdown and
 meeting prespecified launch window
 probabilities by Markov chain
 techniques 01 p0140 A66-10087
 Markov chains, skew products and ergodic
 theorems for general dynamic
 systems 01 p0095 A66-10731
 Number of repetitions of aperiodic Markov
 chain with given phase state space and
 transition probability
 matrix 01 p0095 A66-10731
 State assignment effect on sequential
 circuit reliability represented by Markov
 chain, using iterative assignment method
 with dynamic
 programming 02 p0207 A66-11522
 Markov chain with one absorbing barrier
 used as mission effectiveness model for
 manned space flight 03 p0426 A66-12900
 Multiple Stieltjes integral representation of
 functions in form of Markov
 series 04 p0539 A66-13877
 Optimally controlling stochastic systems for
 measuring and observing state vectors,
 noting Markov properties 04 p0506 A66-14200
 Recurrent classes analogous to those of
 Markov chains for microscopic topology
 associated with Hunt
 processes 06 p0904 A66-17051
 State diagram test for Markov chain
 regularity 09 p1360 A66-19921
 Markov chains with discrete accident
 intervention forming semi-Markov process,
 considering application to single-line mass
 servicing system with
 queue 12 p1902 A66-23760
 Multiple Stieltjes integral representation of
 functions in form of Markov
 series 12 p1903 A66-24027
 Fourier representation for Markov chains
 and strong ratio theorem 12 p1905 A66-24820
 Generalized maximum likelihood estimators
 with proof of asymptotic efficiency
 considering Markov chain and stochastic
 difference equations 15 p2525 A66-28604
 Asymptotic behavior of transition
 probability matrices, analyzing limit
 theorems involving capacities in Markov
 chains 19 p3389 A66-35984
 Markov chain hill-climbing scheme for
 probable fast-time learning absorbing
 model 19 p3333 A66-36665
 Transition matrices of ergodic finite
 Markov chains and readiness models in cost
 effectiveness systems
 analysis 20 p3681 A66-37176
 Automated mission analysis by Markov
 chain techniques, examining effectiveness
 factors of reliability and
 maintainability 20 p3682 A66-37177
 Probability of recurrent event defined over
 t-state r-th-order Markov chain, specifically
 probability of events in Bernoulli
 sequence 21 p3757 A66-39103
 Free molecular flow as Markov chain
 describing motion via probability function in
 multireflection system 22 p3951 A66-40454
MARKOV PROCESS
 Optimum prognosis for random processes
 by applying asymptotically optimal
 succession of automatic
 systems 01 p0050 A66-10655
 Stochastic aspects of low mobility theory
 applied to electrical conductivity problem in
 Wannier representation 01 p0106 A66-10723
 Asymptotic solution of Dirichlet problem
 for diffusion processes and small parameter
 in elliptic equations with discontinuous
 coefficients 03 p0388 A66-12925
 Analytical design of controller for
 stabilization of linear system with random
 delay in form of intermittent Markov
 process 04 p0504 A66-13973
 Recursive procedure based on
 orthonormalization for discrete sample least
 mean square error estimation of non-
 Markovian random
 process 05 p0706 A66-14614
 Fine recurrence and recurrence on point
 in theory of Hunt processes extended to
 Markov chains, demonstrating equivalence
 for nonpolar point 05 p0708 A66-15095
 Random vibrational system, solving first

- age time via conversion to first order
Markov process
[AIAA PAPER 65-WA/APM-18]
05 p0777 A66-15440
- Monitoring of discrete state discrete
Markov source whose states are
at letters to memoryless discrete noisy
channel
06 p0860 A66-16189
- crete stepwise-proportional-search
em, discussing optimum parameter
determination
06 p0862 A66-16525
- apunov function construction, using
stochastic analog of deterministic method of
trial integration
06 p0865 A66-16745
- Herian character invariant by passage to
liect of kernels, noting separately
cessive and separately superharmonic
ctions
06 p0904 A66-17060
- rtial differential equations for
ditional Markov process distribution for
y observations
07 p1059 A66-17968
- ook on kinetic theory of simple liquids
cluding equilibrium properties, time-
pendent system, Markov processes,
wnian motion, transport coefficients,
08 p1209 A66-19463
- Optimum processes in systems with
tributed parameters described by partial
erential equations
08 p1202 A66-19710
- istence of optimal stationary policy in
Markov decision process in study of
mptotic behavior of recurrence relations
ynamic programming
09 p1397 A66-20646
- Markov direct and inverse problems
olving complex value functions on
compact Hausdorff space and polynomials,
n coefficients satisfying linearly
pendent constraints
10 p1549 A66-21235
- efficient statistics in optimum control of
stochastic systems, considering two classes
ross functions
10 p1518 A66-21925
- ests for stationary condition for discrete
permanent Markov process having finite
infinite number of possible
es
11 p1653 A66-22632
- andom vibrational system, solving first
assage time via conversion to first order
Markov process
[AIAA PAPER 65-WA/APM-18]
12 p1961 A66-23990
- Optimum prognosis for random processes
applying asymptotically optimal
ecession of automatic
tems
12 p1848 A66-24006
- ussian monograph on random processes
eering measure and probability theory,
Markov processes, limiting functions,
12 p1903 A66-24067
- orentz-invariant Markov process in
ativistic phase space
12 p1914 A66-24406
- Optimal control and stability for stochastic
tems, viewing linear diffusion models
ed upon Gaussian-Markov process as
ite dimensional linear system driven by
ite noise
12 p1854 A66-24637
- likelihood detection with multiple Markov
ocess, by expressing statistics in
tribution function
13 p2019 A66-25060
- Markov process model of Gemini
ntdown and transition probability
trix
13 p2192 A66-25505
- Markov parametric algorithm for effective
struction of minimal realizations of linear
te-variable finite-dimensional dynamical
tems from input-output
13 p2053 A66-26084
- olution of stochastic differential equation
h Markov coefficients by reduction to
andom PDE of Fokker-Planck
14 p2324 A66-27932
- noise rejection of pulsed systems for
nsmmitting random Markov
nal
15 p2449 A66-28673
- pendent random variables containing
pendent variables, m-dependent
ables, stationary and nonhomogeneous
Markov processes, etc
15 p2529 A66-29849
- small parameter problem for parabolic
ferential equations examining motion of
Markov-type random point in Euclidean
ce
16 p2733 A66-30737
- imulation of controlled diffusion-type
Markov processes applied to two stochastic
uations related to problem of
adjustment on analog
16 p2656 A66-30763
- computer
crete stepwise-proportional-search
system, discussing optimum parameter
determination
16 p2670 A66-30835
- Stochastic equation applied to investigating
second boundary value problem for
parabolic differential equations with small
parameters
17 p2946 A66-32297
- Markov direct and inverse problems
involving complex value functions on
bicomact Hausdorff space and polynomials,
with coefficients satisfying linearly
independent constraints
19 p3389 A66-36182
- Optimal feedback control of linear
discrete-time stochastic system with
quadratic performance measure for bounded
input
19 p3335 A66-36695
- Mean-square comparison of zero-order hold,
exponential hold and polygonal hold vs
linear nonrealizable interpolation procedure
for various sampling
schemes
19 p3336 A66-36702
- Langevin treatment for linear, nonlinear,
stationary and nonstationary random noise
processes compared with Markov
methods
21 p3771 A66-39107
- Local structure of continuous and diffusion
Markov processes compared with aid of M
functionals for stochastic
integrals
21 p3757 A66-39246
- Representation method for stochastic
integral and differential equations and
stochastic integrals as convenient means of
studying diffusion Markov
processes
22 p3940 A66-40532
- Mean-square error of step-wise
interpolation for various sampling schemes
on Markov process or band-limited white
noise
22 p3941 A66-40695
- Continuous nonlinear recursive filtering
based on Markov processes and state-
variable concepts for application to optimum
analog demodulation
22 p3868 A66-40717
- Trajectory stability of diffusion-type
random Markov process described by Ito
stochastic differential vector
equations
23 p4085 A66-41554
- First passage problems for lightly damped
linear oscillator excited by white noise,
discussing time probability distribution,
densities, application of computers to obtain
numerical solutions, etc
24 p4284 A66-42140
- Characteristic operator of Markov process
on smooth manifold
24 p4230 A66-42210
- Optimum detection of Markov signals
against noise background in case of discrete
time
24 p4188 A66-42474
- Unambiguous transition probability
densities describing inhomogeneous
stochastic continuous-to-right Markov
processes with finite number of
states
24 p4232 A66-43021
- MARS I SPACECRAFT**
Ionosphere and plasma in near space,
discussing Soviet rocket observations on
ionospheric structure, expansion and space
ionization
05 p0749 A66-15231
- MARS /PLANET/**
SA EARTH-MARS RENDEZVOUS
TRAJECTORY
Photographic, photometric and polarimetric
observation of Mars from 1954 to 1958 at Pic
du Midi noting seasonal variation of surface
markings, clouds, diameter,
etc
02 p0286 A66-11355
- Temperature, density and gravitational
escape on Mars, Mercury, Jupiter and Venus
atmospheres
05 p0768 A66-15759
- Secular acceleration of Phobos attributed
to tidal friction, considering effects of lower
estimate of Phobos
05 p0768 A66-15769
- Brightness temperature measurements of
Mars at 3.75 cm from February to June
1965
08 p1288 A66-18788
- Radiometric observation of Venus near
inferior conjunction and Mars near
opposition of 1965 at 430
mc/s
08 p1289 A66-18790
- Preliminary results of radar observations
of Mars
09 p1451 A66-20118
- Mariner IV photographs of planet Mars
noting topography, soil composition,
atmospheric phenomena, polar cap
migration, radiation, etc
09 p1457 A66-20660
- Black body disk temperatures of Mercury
and Mars from observations at 3.4 mm in
April 1965
11 p1773 A66-22786
- Koval method for correcting distortions in
photometric cross sections for Martian disk
brightness distribution
12 p1944 A66-23502
- Observation of Martian radio emission at 8
mm with PT-22 radio telescope in March
1965
12 p1945 A66-23514
- Stepping stones to Mars - AIAA-AAS
conference, Baltimore, March
1966
13 p2177 A66-25234
- Management of large physical systems,
detailing characteristics of mission planning
for Mars exploration including process
optimization, computer programming,
systems engineering, etc
13 p2179 A66-25238
- Trajectory characteristics of high-thrust
Mars missions and effect on other aspects
of mission planning
13 p2179 A66-25239
- Manned scientific exploration of Mars,
noting support systems on planet surface
and experiments to be carried out by two
mission designs
13 p2179 A66-25240
- Evolutionary manned interplanetary
exploration program with modular elements
used for flyby, orbital capture and Mars
landing, noting influence of Apollo
program
13 p2179 A66-25241
- Technological, economic, natural and
political considerations for manned Mars
exploration in 1981
13 p2180 A66-25242
- Link design and transmission rates for
entry and surface measurements during
space exploration to Mars
13 p2021 A66-25249
- Guidance and control of Mars orbiter-
lander mission
13 p2123 A66-25254
- Use of lift to increase payload of
unmanned Martian landing capsule,
discussing approach corridor and capsule
design
13 p2191 A66-25271
- Manned Mars entry and landing, discussing
aerobraking as feasible entry
mode
13 p2191 A66-25272
- Problem of operational flexibility in Mars
landing mission, discussing use of lifting
vehicles
13 p2191 A66-25273
- Radar observation of Mars using only
spectral analysis of
echoes
13 p2181 A66-25536
- Mariner IV spacecraft and
mission
15 p2602 A66-29956
- Pasteur Probe assay of asymmetry of D, L
amino acids in detection of Martian
life
15 p2447 A66-30025
- Mars and Venus exploration - Conference,
Virginia Polytechnic Institute, August
1965
16 p2796 A66-30350
- Orbits and gravitational fields of Mars and
Venus, including celestial mechanical
theories, perturbations, satellites, Mars
oblateness and Venus
mass
16 p2797 A66-30351

computed, using seismology, Earth mean
density and Earth moment of
inertia
16 p2797 A66-30354
- Swing-by and capture-orbit trajectories for
Mars or Venus exploration described by
numerical methods
16 p2798 A66-30358
- Mariner program results of Venus and
Mars exploration, discussing atmospheres,
surfaces, exospheres, etc
16 p2798 A66-30359
- Mars and Venus manned interplanetary
flyby missions
16 p2808 A66-30368
- Reliability, maintainability, and spacerev
safety in hypothetical manned Mars
mission
17 p2930 A66-33174
- Low energy transfer from Earth to Mars
via Venus, considering launch window and
planet orientation
[AIAA PAPER 64-647]
18 p3227 A66-33812
- Life detection on Mars by visual
techniques, discussing imaging devices,
filters, shutters and
microscopy
18 p3063 A66-34371
- Using Mars and Phobos to advance
interplanetary flight
19 p3464 A66-36315
- Near IR two-beam interferometer built for
astronomical observations by Fourier
transform spectroscopy, noting resolution of
spectra of Venus and
Mars
20 p3556 A66-36939
- Koval method for correcting distortions in
photometric cross sections for Martian disk
brightness distribution
20 p3646 A66-37015
- Observation of Martian radio emission at 8
mm with PT-22 radio telescope in March
1965
20 p3646 A66-37028
- Guidance, navigation, propulsion and course
correction specifications for Mars or Venus
manned flyby missions
20 p3596 A66-37226
- Revised MARS radius estimates and

- internal composition 21 p3810 A66-38470
 Use of lift to increase payload of
 unmanned Martian landing capsule,
 discussing approach corridor and capsule
 design 23 p4132 A66-41113
 Extraterrestrial life detection on Mars and
 limitations on terrestrial observations and
 flyby and landing 24 p4167 A66-42673
 missions
 Wolf Trap Mars microorganism detection,
 assuming photosynthetic and respiration
 cycles in inorganic biochemical
 compounds 24 p4168 A66-42676

MARS ATMOSPHERE

- Mariner IV data used to reevaluate Urey
 and Brewster theory for clearing of Martian
 blue haze 01 p0137 A66-10881
 Intensity of water vapor in atmosphere of
 planet Mars 01 p0138 A66-11087
 Orbiter injected sterilized ballistic skipout
 capsule for in-flight Martian stratosphere
 measurements, using nonablative heat shield
 and outside atmospheric propulsion
 maneuvers [AIAA PAPER 65-23] 03 p0431 A66-12764
 Structure and composition of Mars and
 Venus atmospheres 03 p0426 A66-12875
 Earth atmosphere effect on determining
 presence of CH molecule in Martian
 atmosphere, origin of quasars and stellar
 thermonuclear reactions 03 p0428 A66-12990
 Scattering particles for visual polarimetric
 and UV photometric estimates of surface
 pressure of Mars 04 p0578 A66-13896
 Carbon dioxide-R-branch lines of 5 μ sub
 3 band from integral of absorption
 coefficient of Martian
 atmosphere 05 p0763 A66-15288
 Emission and absorption of radiant energy
 in model Martian atmosphere composed of
 15 percent carbon dioxide and 85 percent
 nitrogen by volume 05 p0768 A66-15777
 Expected diffraction effects on
 electromagnetic radiation from Mariner IV
 due to Martian atmosphere and
 occultation 06 p0827 A66-16039
 Martian ionospheric observations made by
 Mariner IV interpreted in terms of model
 show atmosphere consists mainly of carbon
 dioxide, low temperature and no
 thermosphere 06 p0953 A66-16404
 Electromagnetic propagation characteristics
 of Venus and Mars derived from
 atmospheric data 06 p0831 A66-16436
 Mariner IV occultation experiment on
 Martian atmosphere, using amplitude and
 frequency changes of tracking and telemetry
 signal [AIAA PAPER 66-148] 07 p1002 A66-17900
 Long lifetime orbits about Mars affected
 by atmospheric drag, solar gravitational
 perturbations, planetary oblateness and
 other perturbations [AIAA PAPER 66-35] 08 p1289 A66-18987
 Carbon dioxide absorption bands in Mars
 atmosphere, transmission, function of carbon
 dioxide amount and effective surface
 pressure [AIAA PAPER 66-147] 08 p1290 A66-19072
 Atmospheres of Venus and Mars-
 Astrophysics Conference, Kiev, Ukrainian
 SSR, June 1964 08 p1293 A66-19322
 Mars atmospheric optical thickness and
 scattering from photometric
 observation 08 p1294 A66-19327
 Atmosphere of Mars as absorbing, ascribing
 red color to selective absorption in
 atmospheric layer 08 p1294 A66-19328
 Model of Mars atmosphere and surface
 close to terrestrial conditions, with
 scattering atmospheric spectrum and surface
 covered with limonitic
 dust 08 p1295 A66-19329
 Separation problems of gas and aerosol
 components in brightness of atmospheric
 layer for photometric data pertaining to
 Mars atmosphere 08 p1295 A66-19330
 Difference between values for atmospheric
 pressure at Martian surface when obtained
 by photometry or by spectroscopy, due to
 nonconsideration of light scattering by
 aerosol particles 08 p1295 A66-19331
 Photometric examination of brightness
 distribution along disk of
 Mars 08 p1295 A66-19332
 Spectral reflecting power curve for
 Martian disk center compared with
 terrestrial equivalent 08 p1295 A66-19333

- Optical parameters of Mars atmosphere and
 surface from photometric data for spherical
 and elongated scattering
 indicatrices 08 p1295 A66-19337
 Earth, balloon and satellite spectroscopic
 observations of Mars to determine
 atmospheric composition and pressure at
 surface level 10 p1602 A66-21065
 Mars upper atmosphere thermal structure
 from spectroscopic measurements and
 Mariner IV occultation
 experiment 12 p1947 A66-23660
 Extraterrestrial life in solar system,
 discussing equipment for Mars exploration,
 noting Gulliver program, Multivator
 automatic biochemical testing apparatus and
 TV microscope 12 p1805 A66-23794
 Mars atmosphere definition important in
 advanced landing vehicle design with
 increased payload capability and reduced
 complexity [AIAA PAPER 65-22] 12 p1952 A66-24697
 Mars atmosphere and ionosphere analyzed
 by measuring effect on radio occultation of
 planet, determining shape, atmosphere
 density profile, diurnal variations,
 etc 13 p2178 A66-25235
 Manned Mars entry and landing, discussing
 aerobraking as feasible entry
 mode 13 p2191 A66-25272
 Problem of operational flexibility in Mars
 landing mission, discussing use of lifting
 vehicles 13 p2191 A66-25273
 Mars atmospheric composition and laminar
 convective heating and ablation studied to
 predict performance of heat protection
 systems during entry 13 p2208 A66-25274
 Inviscid equilibrium gas stability
 characteristics for pointed and spherically
 blunt bodies in unsteady supersonic flight in
 Mars atmosphere 13 p2191 A66-25275
 Chemical system and reaction rates behind
 strong shock waves in mixtures of carbon
 dioxide and nitrogen used to study entry
 conditions into Mars 13 p2062 A66-25276
 Martian surface pressure and surface
 density from interpretation of observational
 data 13 p2180 A66-25291
 Design and feasibility studies of Mars
 atmosphere probe vehicle 13 p2192 A66-25292
 Light diffusion of Martian atmosphere
 measured by spectroscopic evaluation of
 polarization variation from disk center to
 edge 13 p2181 A66-25461
 Mariner IV occultation experiment
 concerning carbon dioxide and ionospheric
 peaks in Martian
 atmosphere 13 p2185 A66-25834
 Vertical temperature distribution in
 Martian atmosphere, noting insensitivity to
 surface pressure and carbon dioxide
 variations 13 p2186 A66-26132
 Micro gas chromatographic system for Mars
 atmosphere analysis during capsule
 descent 14 p2232 A66-27278
 Simulated Martian entry conditions in
 Earth test program showing requirements
 for launch vehicle, tracking, cost and
 schedule [AIAA PAPER 65-219] 14 p2392 A66-27874
 Earth reentry simulation of planetary entry
 environment with exponential atmospheres
 of Mars and Venus type [AIAA PAPER 65-218] 14 p2392 A66-27875
 Mars upper atmosphere and single-layer
 ionosphere UV photoionization, temperature
 profile and chemical
 composition 15 p2598 A66-29417
 Spectral variation in light polarization of
 Martian atmosphere for all observable phase
 angles 15 p2599 A66-29643
 Martian clouds analysis and topographical
 relationships, discussing white and yellow
 classification and frequency of
 occurrences 15 p2602 A66-29951
 Radio occultation measurement of Martian
 atmosphere over two regions by Mariner IV
 space probe 15 p2602 A66-29958
 Planetary quarantine constraints, noting
 prevention of Martian atmosphere
 contamination 15 p2441 A66-29966
 Mars atmospheric density determined from
 photoelectric measurements of eclipses of
 Phobos 15 p2604 A66-30049
 Mars atmospheric circulation, diurnal
 heating, thermal tides and effects on Earth
 atmosphere 16 p2797 A66-30353

- Weather conditions on Mars and relation to
 projected manned
 exploration 16 p2797 A66-30355
 Properties of Mars atmosphere analyzed by
 ejected capsule from spacecraft, noting
 communications system 16 p2650 A66-30556
 Mars atmosphere models based on Mariner
 IV occultation deriving electron number
 density, temperature, pressure, mass
 density, etc, noting carbon dioxide
 presence 16 p2800 A66-30713
 Dust cloud formation by thermal
 convection in Martian
 atmosphere 16 p2802 A66-30925
 Gerden type chamber for measurements of
 ion mobility spectrum in terrestrial
 mesosphere and Mars
 atmosphere 18 p3114 A66-34712
 Mariner IV Mars observation data analysis
 and interpretation 18 p3236 A66-34896
 Approximate and characteristics methods
 to predict effect of gas composition on
 forces and static stability of planetary entry
 configurations in air and assumed Martian
 atmospheres [AIAA PAPER 65-318] 19 p3275 A66-35605
 Martian atmosphere and crust analyzed,
 based on Mariner IV cloud
 photographs 20 p3655 A66-38022
 Random Elsasser band model to compute
 atmospheric transmission of Earth and Mars
 for 2-micron carbon dioxide
 bands 20 p3655 A66-38024
 Abundance and temperature of carbon
 dioxide in Martian atmosphere, noting
 implications, observation methods and
 results 21 p3816 A66-39558
 Martian wave of darkening attributed to
 soil frost phenomena 22 p3981 A66-40478
 New absorption bands in near IR spectrum
 of Mars found by Fourier spectroscopy via
 carbon dioxide absorption
 measurements 22 p3981 A66-40486
 Mariner IV models of three Mars
 atmospheric layers analogous to terrestrial
 E, F-1 and F-2 layers, considering relative
 mass densities, temperatures, carbon dioxide
 photodissociation and ionization
 profile 23 p4129 A66-41779
 Hypersonic entry vehicle measurement of
 Mars atmospheric density, pressure,
 composition, temperature and detection
 spectrometry of chemical species in shock
 layer 24 p4277 A66-42680
- MARS ENVIRONMENT**
 Trapped radiation detector designed and
 fabricated by Van Allen for measurement of
 Martian radiation belts 01 p0073 A66-11114
 Martian life possibilities discussing its
 atmosphere, clouds, violet layer,
 temperature and biological interpretation of
 dark areas 02 p0181 A66-11607
 Martian life-detection instruments and
 experiments, examining biological criteria
 and visual, organic, chemical and metabolic
 tests 02 p0183 A66-11608
 Automated life detection on Martian
 environment based on metabolism,
 reproduction and
 chemistry 06 p0818 A66-16323
 Martian life in light of Mariner IV data on
 adverse atmospheric composition,
 temperature and
 radiation 10 p1486 A66-21740
 Mars environmental conditions, life
 organism detection, evaluation and limiting
 effects 11 p1771 A66-22715
 Visual, photographic and radiometric
 observation of Mars surface and
 atmosphere 13 p2013 A66-25278
 Medical evaluation of Martian environment
 based on Mariner IV photographs and
 extrapolations from manned flight, noting
 effects of Martian gravity on
 astronauts 13 p2014 A66-25293
 Possible existence of plant life on Mars,
 judging from Mariner photograph data on
 Mars atmosphere and
 surface 16 p2798 A66-30356
 Biogenesis, chemical evolution, detection of
 extraterrestrial life and future automated
 biological laboratory to explore
 Mars 16 p2798 A66-30361
 Microorganism changes under extreme
 environmental factors, noting possible
 Martian life and meteoritic organic
 compounds 19 p3284 A66-35574
 Survival and growth of *Bacillus cereus* and

- subtilis in simulated Martian environment
diurnal temperature cycling and low
moisture and oxygen 19 p3284 A66-35576
- (McDonnell) Martian Environmental
Simulation Facility, analyzing sand and dust
storm behavior at low 22 p3891 A66-40227
- pressures
statistical petrographic analysis of
theoretical and carbonaceous chondrite
distribution on Moon and Mars from rocket
photographs 23 p4132 A66-42075
- spacecraft sterilization, discussing
hardware development, reduction of
biological loading, protection and internal
dust surface decontamination of
lander 24 p4167 A66-42672
- RS EXCURSION MODULE / MEM/
remote extraterrestrial surface navigation,
discussing image-tube based stellar field
acquisition system 04 p0543 A66-13590
- flyby landing excursion mode compared
with standard manned planetary stopover
missions 08 p1303 A66-18830
- [AIAA PAPER 66-36] 06 p0953 A66-16414
- Mars Excursion Module, considering
requirement for cross orbit capability during
entry and optimization of engine vehicle
integration 08 p1303 A66-18823
- Electric power generator selection for
Mars probe/lander 23 p4020 A66-41748
- SA MARINER SPACE PROBE
Reentry guidance for manned Mars mission
return considering capture and acceleration
control, skip range and terminal range
controls 01 p0101 A66-10041
- Availability concept in attitude control
system for manned Mars
expedition 01 p0018 A66-10084
- Spacecraft design for manned planetary
missions, emphasizing early Mars
landings 01 p0143 A66-10802
- Mission requirements for manned flyby,
orbiter and lander missions to Mars and
Venus 02 p0289 A66-11621
- Manned Venus and Mars flybys and Mars
landings using only Saturn-Apollo
hardware 02 p0290 A66-12067
- Requirements and performance
expectations of chemical and nuclear
propulsion systems for manned Mars and
Venus missions 06 p0942 A66-16499
- Mars capture probe planned for 1971 using
twilight orbit with optimization of payload,
propulsion and trajectory 08 p1303 A66-18830
- Sterilization requirements for Voyager
spacecraft to ensure that no terrestrial
organism contaminates Martian
surface 11 p1648 A66-23171
- Direct and orbit flight modes considered
for unmanned lander on Mars, noting
ballistic coefficients, flight path angles,
targeting capability, etc 13 p2180 A66-25243
- Soft landing problems for unmanned Mars
entry, noting parachute system, descent
time, sensing system constraints, extreme
wind environment, etc 13 p2190 A66-25244
- Shielding of manned Mars vehicles from
solar and galactic cosmic radiation and
radiobiological tolerance 13 p2190 A66-25261
- NERVA electric manned Mars vehicle
design, performance and operation for
interplanetary missions 13 p2190 A66-25263
- Manned Mars mission systems designed by
university students 13 p2193 A66-25785
- NASA Voyager project, discussing
planetary orbit design and selection and
Mars orbiter trajectory 16 p2808 A66-30365
- Northrop Cloverleaf steerable parachute
combined with horizontal thrust rocket
engine in descent system for manned Mars
landing vehicles [AIAA PAPER 65-385] 16 p2810 A66-30904
- Mars spacecraft guidance and navigation
requirements, noting entry trajectory,
possible guidance errors and gravitational
constant uncertainty [AIAA PAPER 66-532] 16 p2744 A66-31501
- Manned Mars stopover mission employing
two vehicles, analyzing rendezvous, transfer
trajectories, flyby trips, 18 p3227 A66-33790
- Space communication requirements using
lasers and microwaves in manned Mars
flights [AIAA PAPER 65-324] 18 p3067 A66-33794
- Engineering constraints involved in
selection of Martian landing site for lander
vehicles 18 p3232 A66-34367
- Spacecraft design requirements for
achieving successful landing on
Mars 18 p3247 A66-34954
- Mars spacecraft sterilization objectives and
requirements carried out by heat-soaking,
gas and other methods 19 p3288 A66-35578
- Optimization of operational payloads for
manned Mars missions, discussing life
support and environmental control systems,
auxiliary power, radiation shielding, data
acquisition, navigation, guidance and cost
analysis 20 p3663 A66-37903
- Nuclear electric propulsion applied to
manned Mars missions, presenting analytical
tool to simultaneously optimize
interplanetary vehicle design and trajectory
- [AIAA PAPER 65-414] 23 p4120 A66-41110
- Parts sterilization at Jet Propulsion
Laboratory 24 p4180 A66-42290
- Shielding of manned Mars vehicles from
solar and galactic cosmic radiation and
radiobiological tolerance
criteria 24 p4283 A66-42785
- MARS SURFACE
Age of craters and relative rate of
formation on Mars and
Moon 01 p0136 A66-10438
- Age of Martian craters investigated, based
on asteroid collision and certain spatial
distribution 01 p0136 A66-10439
- Martian surface age calculated from rate of
meteorite infall in analogy to lunar
case 01 p0136 A66-10440
- Conclusions drawn from Mars photographs
taken by Mariner IV 01 p0138 A66-10883
- Scan system used on Mariner IV Mars
probe to search for, acquire and track
planets so that pictures of surface can be
taken 01 p0073 A66-11120
- Spectral curves of integral Martian
radiation in visual region compared with
curves for central continents and curves of
spectral reflectivity of red-colored
terrestrial rocks 05 p0765 A66-15422
- Radar observations of Mars, discussing
surface reflecting
properties 06 p0954 A66-16731
- Atmosphere of Mars as absorbing, ascribing
red color to selective absorption in
atmospheric layer 08 p1294 A66-19328
- Model of Mars atmosphere and surface
close to terrestrial conditions, with
scattering atmospheric spectrum and surface
covered with limonitic
dust 08 p1295 A66-19329
- Indicometric measurement of Martian
surface composition, noting loamy and
dustlike limonites, terra rossa and
ferruginized soils 08 p1295 A66-19334
- Optical parameters of Mars atmosphere and
surface from photometric data for spherical
and elongated scattering
indicatrices 08 p1295 A66-19337
- Martian canals in interpretation of Mariner
photos 09 p1457 A66-20472
- Variation of IR emission from Mars surface
with Mars local time in terms of diurnal
temperature variations, including
atmosphere effect, results suggest low
thermoconductivity 10 p1604 A66-21201
- Mariner IV observations of Mars surface,
showing no detectable magnetic field or
radiation belts, suggest iron on surface
oxidized from photodissociation of water
vapor 10 p1606 A66-21211
- Mars exploration by astronauts, considering
Mariner IV observations, noting low
pressure and temperature, existence of
frozen hydrosphere, etc 12 p1952 A66-24723
- Radio astronomy studies of Venus and
Mars noting surface properties, atmospheric
structure, etc 13 p2186 A66-26031
- Mariner IV photographs, detailing camera
system and optical specifications, discussing
constraints involved in determining what
regions of Martian surface were to be
photographed, etc 13 p2188 A66-26383
- Geological data on Mars, noting effect of
wind 13 p2189 A66-26580
- Evidence that Martian maria corresponds
to elevated land areas, citing radiometric
measurement results 13 p2189 A66-26601
- Mariner IV photographs of Mars, discussing
mission objectives, functioning of camera
system and interpretation of
pictures 15 p2602 A66-29957
- Problems involved in manned exploration
of Mars surface 16 p2798 A66-30369
- Thermological aspects of Martian surface
environment based on radiometric
temperature
measurements 16 p2799 A66-30435
- Radiometric temperature measurement of
Mars surface microclimate, examining heat
flow balance, taking into account solar and
planetary radiation effects [AIAA PAPER 66-436] 16 p2799 A66-30522
- Craters on Mars from Mariner IV pictures,
showing no evidence of primeval crater and
analyzing aeolian erosion 16 p2800 A66-30629
- Comparison of surface structure of Earth,
Moon and Mars based on analysis of
photographs from Mariner
IV 16 p2802 A66-31013

Mars disk intensity, noting spectrophotometric measurements in search for limonite near IR spectral features 17 p2997 A66-31923

Data from ground photography of Mars covering portions of Mariner IV path, noting position of oases and canals 17 p3005 A66-33008

Photographic information from Mariner IV of light and dark areas of Mars surface 17 p3006 A66-33014

Volcanic origin of lunar and Martian craters, noting distribution, diameters, etc 18 p3225 A66-33625

Similarity in frequency distribution of Martian and lunar craters with terrestrial volcanic craters 18 p3226 A66-33626

Polarization and visible and IR reflectivity studies of Mars indicate that hematite is stable form on Martian surface 18 p3228 A66-34016

Mars exploration by astronauts, considering Mariner IV observations, noting low pressure and temperature, existence of frozen hydrosphere, etc 22 p3976 A66-39775

Thermal model of Martian surface suggests solid carbon dioxide composition of polar caps, studying diurnal and annual temperature variations at various latitudes 22 p3981 A66-40482

Martian surface markings, brightness along optical equator, crater erosion, asteroid collision and yellow dust 22 p3981 A66-40520

Radar observation of Mars, noting mean reflection coefficient for signals returned by near center disk sections 22 p3985 A66-40955

Impact theory of crater formation on surfaces of Moon and Mars not as consistent with evidence as endogenous cratering theory 24 p4280 A66-43028

MARTENSITIC STEEL

Martensitic transformation in alloys with aging martensite, discussing effects on molybdenum, Fe-Ni alloy, cobalt and titanium 05 p0700 A66-14859

Mechanical properties of alloys with aging martensite 05 p0701 A66-14860

Chromium nickel steel hardening as result of martensitic transformation and aging 05 p0701 A66-14861

Accelerated cooling of ferritic-martensitic steel and ferritic steel after sintering, combined with additional heat treatment, increases strength and corrosion resistance 06 p0896 A66-16690

Martensitic transformation kinetics and maraging mechanism in Fe-Mn-Ni-Ti alloy observed by electron and X-ray diffraction 08 p1236 A66-18762

Martensitic transformation in titanium alloys containing eutectoid-forming elements, noting elastic properties, shear modulus, etc 08 p1239 A66-18906

Maraging steel response to heat treatment including formability, machinability, stress-corrosion resistance and cold-working behavior of austenitic and martensitic phases 08 p1239 A66-18959

Feasibility, reliability and applicability of maraging steels 08 p1240 A66-18960

Martensite transformation in stainless steel after reversion with quenching 11 p1719 A66-23400

Stress corrosion cracking test employing precracked bar stressed in bending, noting apparatus and results on martensitic steel and titanium alloy 12 p1958 A66-23647

Age-hardening of Fe-Ni-Ti alloy martensite associated with formation of ordered Ni-Ti phase 13 p2106 A66-25331

Martensitic transformation of Ni-Fe alloy from fcc to bcc lattice, noting stress produced by chemical free energy difference between austenite and martensite structure 15 p2520 A66-28649

Austenite-martensite interface dislocations in stainless steel shown as probable pinned Shockley partials 18 p3123 A66-33927

Martensitic transformations in ferrous and nonferrous alloys, discussing kinetic and structural characteristics 19 p3380 A66-35848

Optimum alloying level defined as one beyond which net positive effect is reduced by decline in some product property, noting steels 20 p3585 A66-37697

Superconducting fluxline pinning of niobium foils by twin boundaries, resulting

in anisotropic critical current 24 p4255 A66-42429

MASER

SA GAS MASER

SA INFRARED MASER

SA LASER

SA TRAVELING WAVE MASER

Quantum RF physics text covering magnetic resonance theory, electron paramagnetic resonance, nuclear magnetic resonances, two-and three-level masers, RF gas spectroscopy and ammonia oscillator 01 p0108 A66-10954

Radiometric performance of solid state superheterodyne receiver comparable to that obtained with masers and parametric amplifiers 03 p0339 A66-12437

High power relaxation oscillation in multilevel solid state ruby maser due to magnetic field modulation 03 p0380 A66-13327

Maser preamplifier designed into X-band weather radar set increased radar sensitivity by 12.5 decibels to overall 118.5 decibels 04 p0480 A66-13688

Interaction of energetic electrons with bounded electromagnetic waves near cyclotron resonance, noting plasma diagnostics, maser and gain mechanism 04 p0530 A66-13953

NEC maser amplifier for radio astronomical observation of Cygnus A, Taurus A and Orion and Omega nebulas 05 p0697 A66-15365

Gain saturation of ruby maser by nearby interfering signal derived from motion equation of density 09 p1385 A66-19933

Cross correlation measurements of oscillator frequency stability and thermal noise and application to atomic hydrogen maser 12 p1835 A66-24128

Statistical analysis of noise quality of atomic frequency standards including masers 12 p1881 A66-24130

Low temperature techniques in satellite communications systems, noting maser, cooled parametric amplifier and trend toward closed-cycle refrigerators 13 p2042 A66-26104

Light shift, light modulation and phase pulling in optically pumped rubidium maser 13 p2101 A66-26202

Zero magnetic field millimeter maser using trivalent iron ion in host crystalline structure of rutile /titanium dioxide/ as active material 15 p2514 A66-29018

Maser material iron doped rutile, examining theoretical and experimental disagreement in spin Hamiltonian describing paramagnetic behavior 15 p2514 A66-29027

Relationship between amplification, bandwidth and noise temperature in maser amplifier, considering paramagnetic permeability and Q-factor 15 p2514 A66-29051

Atomic maser clocks rotation with Earth, deriving formula for relative drift at widely separated localities arising from local gravitational potentials 16 p2745 A66-30187

Inverted susceptibility, inversion ratio, line widths and spin-lattice relaxation times for maser operation point in chromium-doped cobalt potassium cyanate 16 p2718 A66-30934

Solid state CW optically pumped microwave maser, using divalent thulium doped calcium fluoride 18 p3117 A66-33614

Molecule reorientation and transition probability in molecular beam maser using formaldehyde 22 p3929 A66-39662

MASER OUTPUT

Aluminum nitrate powder maser doped with ferric ions operation in X-band without external DC magnetic field 02 p0239 A66-11374

Emission spectrum of ruby maser calculated, using dynamics of two-level systems 06 p0891 A66-16541

Direct frequency comparison of atomic hydrogen masers in different places and conditions by simultaneous monitoring of Loran C signals 12 p1890 A66-24145

Beam maser excitation parameter calculations including collision in beam effects and comparison with molecular formaldehyde 13 p2093 A66-26054

Emission spectrum of ruby maser calculated, using dynamics of two-level systems 15 p2519 A66-29988

Stimulated emission processes interpreting OH microwave emission from points in sky,

using anisotropic UV radiation which lead to molecule alignment and population inversion 20 p3650 A66-3734

Maser amplifier based on UV continuum pumping from nearby stars, explaining 18- α OH emission from anomalous H-2 regions 24 p4280 A66-4304

MASER RESONATOR

Oscillation of maser with sinusoidal distribution of resonator field along axis of molecular motion 02 p0241 A66-1184

Two-frequency volume resonator with independent tuning within wide frequency band 08 p1191 A66-1891

Resonator made of magnetic materials for tuning molecular generator by Zeeman modulation 09 p1357 A66-2079

Gain bandwidth and stability of solid state multicavity masers 11 p1712 A66-2276

Tuning of ammonia beam maser resonator based on frequency shift method, noting hysteresis appearance and elimination 16 p2720 A66-3189

Resonator made of magnetic materials for tuning molecular generator by Zeeman modulation 22 p3931 A66-3985

Solid state maser oscillator operating in zero field configuration, using ferric ion substituted as impurity in aluminum nitrate host crystal 24 p4221 A66-4255

Very fine-beamed maser oscillation produced in atomic hydrogen by HI discharge observed by double focus technique 24 p4225 A66-4299

MASK

S OXYGEN MASK

MASKING

Simultaneous monotonic masking of signal bursts of wideband noise of brief duration; changes and dependent upon delay of tone relative to masker onset 05 p0628 A66-1573

MASS

SA AIR MASS

SA ELECTRON MASS

SA PARTICLE MASS

SA PLANETARY MASS

SA STELLAR MASS

SA VARIABLE MASS SYSTEM

Principle of matter inexhaustibility applied to construction of finite and infinite cosmological models 14 p2379 A66-2722

Gravitational potential effects on physical properties of mass far from other mass of energy, noting Planck equation, Planck constant, etc 14 p2335 A66-2794

Generalized masses of vibrational modes of elastomechanical system determined by three methods 17 p3018 A66-3187

Apparent additive mass coefficient for three-dimensional hydrodynamic impact problem of floating sphere in incompressible fluid 20 p3548 A66-38117

MASS BALANCE

Balancing rotating parts in machines and measuring unbalance 09 p1384 A66-20488

Mathematical model of human body predicting inertial properties in any fixed body position, including location of mass center [AIAA PAPER 65-498] 12 p1810 A66-2471

MASS DISTRIBUTION

Eigenvalues of free vibration equation of simply supported beam with finite number of discrete masses, using differential equation 04 p0588 A66-13825

Index s determination from mass duration distribution of unstable radio echoes from meteor trails 05 p0759 A66-14883

Mass and energy state dependence of plasma, generated by titanium source, on electrical operating conditions of source 06 p0919 A66-16878

Graphic calculation of gravimetric effect of three-dimensional masses of arbitrary form 07 p1028 A66-17423

Motion equation for system of n bodies assuming half retarded and half advanced mass-distribution 07 p1137 A66-18053

Momentum and energy accommodation coefficients for moving gas interaction with solid surface, with attention to molecular mass and velocity flux distribution 07 p1083 A66-18135

Corrections to effective mass theory of shallow impurity states in germanium, using perturbation theory and wave functions 08 p1269 A66-19007

Anomalous rotation of Uranus explained by

- deriving expressions relating random
tation component with masses of largest
dies falling on planet 08 p1297 A66-19455
- Balancing rotating parts in machines and
asuring unbalance 09 p1384 A66-20489
- Aircraft spinning problems, noting mass
istribution and tail design factors for
tisfactory spin recovery
- aracteristics 11 p1637 A66-23077
- dealized rockets with constant rate of
ass-change and thrust 13 p2184 A66-25756
- Mass calculation for absorbing gases such
water vapor, carbon dioxide and ozone
ong oblique paths between two arbitrary
ints in atmosphere, considering vertical
istribution, refraction and Earth
rvature 14 p2284 A66-27541
- Equivalent mass matrix for rectangular
ate elements in bending, noting coordinate
stem 15 p2610 A66-29306
- Balancing of flexible rotors having
bitrary mass and stiffness
istribution 16 p2714 A66-30858
- Anomalous rotation of Uranus explained by
eriving expressions relating random
tation component with masses of largest
dies falling on planet 18 p3232 A66-34484
- Mass calculation for absorbing gases such
water vapor, carbon dioxide and ozone
ong oblique paths between two arbitrary
ints in atmosphere, considering vertical
istribution, refraction and Earth
rvature 24 p4198 A66-42326
- Linear elastic small deflection theory of
tural frequencies of vibration of
ctangular sandwich honeycomb plate with
ass attachment 24 p4292 A66-43046
- SS FILTER
- Quadrupole mass filter coupled to shock
be for analysis of reaction kinetics noting
in source, time constant, smoothness of
ak, etc 17 p2904 A66-33464
- Shock wave studies with quadrupole mass
ter, examining thermal decomposition of
trous oxide from 1800 to 3500 degrees
17 p2871 A66-33465
- Measurement of partial pressures in
travacuum, using omegatron and
adrupole mass filter 23 p4071 A66-41872
- SS FLOW
- Velocity and momentum of high current
eady state coaxial plasma noting mass
ow, exhaust velocity, thrust, arc voltage
d power 02 p0267 A66-11559
- Transition flow of nitrogen through short
rcular tubes with length-to-diameter ratios
om 0.005 to 1 and pressure ratios from 1
20 05 p0605 A66-14704
- Mass flow of nitrogen gas through circular
ifice at five Knudsen number values from
13 to 1.78 and range of upstream to
ownstream pressure 11 p1692 A66-22936
- Heat transfer and mass transfer near
agnation point during injection and suction
various gases through blunt body
urface 12 p1979 A66-24427
- Shock waves, pressure distribution and
mass flow effects on supersonic guide
urface parachute 13 p1994 A66-25589
- Gas-particle flow, particle velocity
istributions and lag loss reduction for
cket nozzles 14 p2375 A66-27893
- Efficiency of two-stage repetitively pulsed
axial plasma engine calculated from
ngine thrust and total mass flow
IAA PAPER 66-342] 17 p2990 A66-32448
- Separation streamline for massive blowing
free stream for model injected into arc
nnel flow 18 p3046 A66-33650
- IAA PAPER 66-457] 18 p3046 A66-33650
- Increasing mass flow through gas turbine
without additional work from compressor
nd consequently increasing thermal
iciency, noting combustion problem
VSCI 66-17] 18 p3164 A66-34424
- Effect of mass entrainment from vacuum
nk and electrode erosion on plasma
locity determined from mass flow and
rust of Hall accelerator
IAA PAPER 65-297] 18 p3147 A66-34585
- Shock wave instability and mass flow
ommodation for ribbon-type parachutes,
ting canopy porosity and free stream
ach number 22 p3845 A66-40594
- Probe design for mass flux, stagnation
int heat transfer and total enthalpy
easurements of high temperature
- hypersonic gas flows
[AIAA PAPER 66-750] 22 p3919 A66-40635
- MASS FLOW FACTOR
- SA NOZZLE GEOMETRY
- One-dimensional heat flow to cool wall,
discussing effects of compressibility and
variable thermal
conductivity 08 p1205 A66-18540
- MASS FLOW RATE
- Opposed jet diffusion flames subjected to
electrostatic fields, estimating volumetric
heat release rate and mass flow behavior
[ASME PAPER 65-WA/ENER-3] 05 p0789 A66-15628
- Helium II film free-convection heat
transfer, discussing mathematical analysis
for vertical flat plate and horizontal circular
cylinder
[ASME PAPER 65-WA/HT-10] 05 p0791 A66-15652
- Transition regime mass flow rate and
longitudinal pressure distribution along
short tube with bellmouth
entry 08 p1207 A66-19131
- Mass flow rate of gas evolution from
burning solid rocket propellant during
transient depressurization of combustion
chamber
[AIAA PAPER 65-104] 08 p1282 A66-19163
- Arc heating, self-magnetic acceleration and
supersonic flow in plasma thrusters
[AIAA PAPER 66-237] 11 p1760 A66-22220
- Free-molecule flow through conical tubes
noting mass transport, axial momentum,
energy, flow distribution and speed
ratio 11 p1635 A66-22938
- Opposed jet diffusion flames subjected to
electrostatic fields, estimating volumetric
heat release rate and mass flow behavior
[ASME PAPER 65-WA/ENER-3] 16 p2825 A66-30341
- Low pollution electric arc air heater of
CH9 and CH10 type, using metal electrodes
to provide air mass flow rates at 4000
degrees K 20 p3540 A66-36950
- MASS RATIO
- SA PAYLOAD MASS RATIO
- Heat capacity measurements of liquid He 3
to improve precision in determination of
effective mass ratio 09 p1392 A66-20014
- Neutral disparate mass mixtures, replacing
Boltzmann collision integrals by relaxation-
type kinetic models with model equation
terms ordered according to mass ratio,
deriving two-fluid transport
equations 10 p1523 A66-21802
- Rational approximations for lower natural
frequencies of uniform beam with
concentrated mass or rotary inertia obtained
by expanding eigenvalue equation into
power series 18 p3249 A66-33599
- MASS SPECTROMETER
- RF mass spectrometer measuring ionic and
neutral particle composition of outer
ionosphere, mounted on Elektron
satellites 02 p0229 A66-11662
- Mass spectrometer application to
measurement of chemical and ionic
composition of upper
atmosphere 05 p0676 A66-14683
- Ogo-A first results on mass spectrometry
measurements of thermal positive ion
composition at high
altitudes 05 p0746 A66-14781
- Mass spectrometer measurements of
oxygen fluorides at cryogenic
temperatures 06 p0821 A66-16156
- Mass spectrometric electron impact
ionization potentials rapidly obtained by
electronic control and automatic data
processing systems 07 p1091 A66-18489
- Data compendium on neutral composition
of atmosphere at altitudes from 100 to 200
km, noting nitrogen and oxygen
concentration values from optical and mass
spectroscopic studies 09 p1376 A66-20991
- Aerodynamics of manometers and mass
spectrometers used on rockets and satellites
for determination of atmospheric
temperature and density 09 p1383 A66-20993
- Homogeneous dissociation kinetics of gas
examined by means of adiabatic compression
apparatus attached to mass
spectrometer 13 p2079 A66-25821
- Extraterrestrial life detection based on
catalysis of oxygen exchange between
labeled oxyanlons and water, noting
equipment 15 p2441 A66-29961
- Fast ion molecule reaction in carbon
dioxide analyzed, using mass
spectrometer 16 p2645 A66-30116
- Decaying gaseous plasma ion densities,
metastable atom densities and light emission
simultaneously measured by mass
spectrometer and light
spectrometer 16 p2759 A66-30422
- Gain improvement to electron multiplier
used in mass
spectrometers 16 p2702 A66-30430
- B-L flux plots and differential energy
distributions for low energy protons in nine
energy intervals from 0.17 to 3.4 mev
measured with satellite-mounted proton
spectrometer 16 p2794 A66-30702
- Omegatron mass spectrometer for
measuring density and temperature of
nitrogen in 100 to 350 km region of upper
atmosphere 18 p3112 A66-34241
- Apparatus for teaching and research in
electron physics including emitters, cathode
ray tubes, electron multipliers and mass
spectrometer 18 p3088 A66-35033
- RF mass spectrometer with small
dimensions and power requirements and
high sensitivity designed for analysis of
upper atmosphere ion and neutral
composition 19 p3353 A66-35289
- Photoionization mass spectrometer with
180-degree magnetic analyzer with inclined
pole faces, applicability to gas
analysis 19 p3354 A66-35419
- Hydrogen and helium ions formation and
destruction, charge transfer, diffusion, role
during solar activity, using mass
spectrometry, ground radar,
etc 19 p3350 A66-36356
- Hydrogen ions detected near anode of glow
discharge at various pressures, using mass
spectrometer 19 p3410 A66-36455
- Residual gas analyzer determining
qualitative distribution of gases in ultrahigh
vacuums by using mass spectrometer for
spatial simulation 19 p3360 A66-36614
- Spectral analyses of residual gases using
mass spectrometer, noting vacuum
equipment and effects of backing and cold-
trapping 19 p3361 A66-36615
- Mass spectrometer used for analysis of
spatial distribution of molecular beams, with
data on angular distribution of magnesium
atom beam 20 p3559 A66-37522
- Instrument for continuous variation of
angle of incidence between ion beam and
axis of RF quadrupole mass spectrometer
from zero to 90 degrees 20 p3561 A66-38174
- Operation and design principles of mass
spectrometer using system of diaphragms
and modulators to extract well-constrained
ion bunch from plasma
beam 21 p3784 A66-39031
- Trollite-graphite phase from Toluca
meteorite analyzed to determine
concentration and isotopic composition of
lead using mass spectrometer, noting
radiogenic problem 22 p3976 A66-39684
- Ionization relaxation in impure shock-
heated argon studied by magnetic mass
spectrometer 22 p3899 A66-40380
- Number densities and composition of
upper atmosphere determined by
rocketborne mass spectrometers, estimating
temperature variation with
altitude 22 p3913 A66-40553
- Qualitative detection of alkyl-free radicals
generated by pyrolyzing certain organic
compounds, using modified commercial mass
spectrometer 23 p4067 A66-41246
- Vacuum system of ion microprobe mass
spectrometer noting design criteria,
operation and results 24 p4215 A66-43162
- MASS SPECTROMETRY
- Stable elementary particle detection of mass
greater than that of proton in hydrogen,
deuterium and atmospheric air samples,
using mass spectrometer 01 p0060 A66-10251
- Mass spectrometry of positive ion beam
produced by nonmagnetic emitter, using
electron beam passing through electrostatic
field for rare isotope
analysis 03 p0397 A66-12391
- Stereospecificity in hydrogen transfer
reaction characteristic of 6-keto steroids
studied by mass
spectrometry 03 p0330 A66-13086
- Mass spectrometry in structural and

stereochemical problems of 16
 Amaryllidaceae alkaloids 03 p0330 A66-13087
 Holbrook meteorite discussing abundance of lithium isotopes, measurement techniques, apparatus, and concentration pattern over surface 03 p0429 A66-13268
 Reaction of molecular hydrogen with oxygen in absence of molecular oxygen at various temperatures, using stirred reactor with mass spectrometer 04 p0473 A66-13649
 High temperature analysis of mechanism and kinetics of tetrafluoroethylene decomposition and oxidation in excess argon behind shock waves, using UV absorption and mass spectrometry 04 p0571 A66-13650
 Power transistors used for stabilization of emission current of electron bombardment ion source for mass spectrograph 04 p0498 A66-14037
 Reflex arc in lithium vapor analyzed, using spectrographic, mass spectrometric and probe measuring techniques 04 p0554 A66-14293
 Cluster ion formation by electrical retarding field, measuring spectrum and size distribution in condensed supersonic molecular beams of carbon dioxide 05 p0718 A66-14501
 Discrepancy between measured value of N-H bond dissociation energy in hydrazine and value suggested by other chemical evidence 07 p1000 A66-17463
 Canyon Diablo meteorite examined, using mass spectrometry and metallography, noting shock effects 09 p1447 A66-19880
 Critique of paper by Carter and Kennedy regarding origin of diamonds in Canyon Diablo and Novo Urei meteorite 09 p1447 A66-19881
 Composition of outer ionosphere measured, using RF mass spectrometers mounted on board Elektron I and II satellites 09 p1378 A66-21008
 Linear free energy relationship between benzoyl and acetyl ion intensities in mass spectra of benzo- and acetophenones explained by kinetic argument 10 p1495 A66-21165
 Age of Bosumtwi crater area, Ghana, determined by mass spectrometry of rubidium, strontium and strontium isotopic composition, compared to Ivory Coast tektite age 10 p1608 A66-21741
 Errors of charged-particle analyzer resulting from expansion of plasma beam within and without analyzer 11 p1744 A66-22452
 Vertical distribution of neutral composition of atmosphere between 100 and 200 km, comparing mass spectrometer with optical measurement 11 p1698 A66-23038
 Mass spectrometric fragmentation behavior of N-n-propyl and N-n-butyl pyrrolidone and N-alkyl succinimides subsequent to electron impact 11 p1651 A66-23412
 Sublimation rate of iron fluoride and identification of vapor species by Knudsen technique, using mass spectrometer 11 p1651 A66-23413
 Ion-molecule reaction rates and recombination coefficients from mass spectrometric ionospheric data 11 p1702 A66-23492
 Isolation and identification of biogenic steranes and pentacyclic triterpanes in Eocene shale 12 p1805 A66-23539
 High temperature equilibria among vapor species produced by fluorination of beryllium in Knudsen effusion cell, using mass spectrometer, deriving dissociation energy 12 p1811 A66-23621
 Hydrocarbons synthesized abiotically and those found in terrestrial samples, using gas chromatography and mass spectrometry in connection with terrestrial life 12 p1806 A66-24965
 Mass spectrometry of positive ion beam produced by nonmagnetic emitter, using electron beam passing through electrostatic field for rare isotope analysis 13 p2139 A66-25397
 Stable elementary particle detection of mass greater than that of proton in hydrogen, deuterium and atmospheric air samples, using mass spectrometer 13 p2131 A66-25968
 Proton transfer between hydrogen and methane, ethane, propane and butanes, using

high-pressure mass spectrometry, employing ion source with beta rays as ionizing medium 13 p2018 A66-26443
 Vapor composition, evaporation rate and vapor pressure above chromium carbides determined by effusion method combined with mass spectrometry 14 p2310 A66-26791
 Bethe-Born approximation and partial ionization cross sections of singly and doubly charged helium and neon ions 14 p2336 A66-26830
 Falling sphere, solar XUV radiation absorption and pressure gauge mass spectrometry for density measurements of thermosphere, comparing results and noting discrepancies 14 p2284 A66-27615
 Mass spectrometry of composition and density of neutral atmosphere, noting diffuse separation of gases 14 p2285 A66-27621
 Composition and temperature variation of thermosphere, using mass spectrometry and optical methods 14 p2285 A66-27622
 Thermal degradation of mesoporphyrin, obtaining various alkylpyrroles and hydrocarbons, noting role of controlled pyrolysis as adjunct to mass spectrometry 15 p2446 A66-28865
 Optical scanning and resolution of D, L amino acids by gas-liquid chromatography and mass spectrometry 15 p2446 A66-28870
 Tandem column gas-liquid chromatography labeling technique for mass spectrometry, noting ketones exchange and data on deuterium and oxygen compounds 15 p2446 A66-28872
 Low energy cosmic neutrino detection with radiochemical methods, noting mass spectrometric and nuclear emulsion methods based on Pontecorvo-Davis reaction 15 p2590 A66-29592
 Calorimeter bomb combustion of hydrocarbons and fluoro-substituted hydrocarbons with nitrogen trifluoride and nitrogen trifluoride-oxygen mixtures and mass spectrometric analysis 15 p2570 A66-29609
 Existence and properties of double molecules /dimers/ in unsaturated vapors 15 p2547 A66-29630
 Mass spectrometric investigations of interaction of atmospheric ions with molecules of rocket gas release 15 p2495 A66-30061
 Mass spectrometric measurements of upper atmosphere temperature 15 p2495 A66-30062
 Refrigerated mass spectrometer inlet serving also as low temperature reactor and rough separative device for compounds stable only at very low temperatures 16 p2645 A66-30420
 Mass spectra of isotopically labeled tetraboranes obtained under zero ion source contact conditions, observing parent peak and metastable transition 16 p2647 A66-31379
 Mass spectrometric analysis of Kr and Xe in silicates extracted from slab of Estherville stony iron meteorite 17 p3002 A66-32530
 Mass spectrometric analysis of contents of flow reactor in which diborane at low pressure was pyrolyzed, varying temperature, flow time, surfaces, etc 17 p2871 A66-32853
 Mass spectrometric measurement of distribution of spallation produced chromium nuclides between alloys in iron meteorite 17 p3007 A66-33282
 GLC-mass spectrometric stereoisomer discrimination as means of detecting biological processes 18 p3059 A66-34372
 Mass spectrometry and gas chromatography in analysis of organic compounds present in extraterrestrial bodies to provide information on existence of life 18 p3059 A66-34373
 Thermal dissociation of molecular fluorine in inert gas from 1650 to 2700 degrees K in shock tube coupled to time-of-flight mass spectrometer 18 p3139 A66-34501
 Hydrogen-air flame with sodium traces studied by quadrupole mass spectrometric analyzer 19 p3476 A66-35323
 Sublimation pressure of copper fluoride measured via mass spectrometry, noting dissociation energy 19 p3295 A66-36062
 Amino-acid-sequence determination in peptides using N-fatty acids, mass spectra of

peptide derivatives and computer techniques 20 p3510 A66-37057
 Positive plasma column produced by hydrogen glow discharge studied by mass spectrometer for various pressures and currents 20 p3608 A66-37459
 Ionization of oxygen examined, using charge exchange in double mass spectrometer, noting break in electron impact ionization efficiency curve and constructing breakdown graph 20 p3605 A66-38097
 Mass and energy spectra of ions in Bostik-type plasma source studied by time-of-flight mass spectrometer 21 p3784 A66-39033
 Energy spectra of plasmoids produced in conical organic-glass plasma source, establishing various ions 21 p3786 A66-39041
 Conical source plasma parameters during transverse and longitudinal motion in magnetic field examined by parabolic method and Thomson mass analyzer 21 p3786 A66-39043
 Laser vaporization and ionization of solid materials to obtain ions for time-of-flight mass spectrometer 21 p3749 A66-39385
 Free radicals and metastable molecules produced by short-duration pulsed electrical discharges studied by mass spectrometer, using collision-free molecular-beam sampling system 22 p3949 A66-39909
 Thermal energy Ar charge transfer reactions measured in pulsed-discharged flowing-afterglow system with mass spectrometer detection 22 p3860 A66-39927
 Ion mass spectrometry of D layer, using magnetic fields and cyclotron resonance principle 22 p3907 A66-39956
 Flare ion fluxes in space by mass-spectrometric measurements of solar flare rare-gas ions stopped in extraterrestrial material 22 p3973 A66-40016
 Data reduction techniques for vacuum measurements by mass spectrometry, emphasizing matrix algebra techniques 22 p3918 A66-40234
 Radiolysis applied to effects of ionizing radiation on volatile inorganic compounds of fluorine, oxygen and nitrogen, noting mass spectrometric peaks 23 p4032 A66-41235
 Ionic reactions of gaseous methane using tandem mass spectrometer, noting translational energy effects 24 p4170 A66-43035
MASS SPECTROSCOPY
 Powdered or densified nonconductive ceramic materials analyzed by spark source mass spectrography based on use of conducting probe 02 p0188 A66-11294
 Text on electron optics covering principles and application, electron lenses, cathode ray tubes, mass and beta ray spectrographs, quadrupole systems, image converters, etc 09 p1402 A66-20333
 Lanthanum hexaboride evaporation from Knudsen cell studied by mass spectrography for composition, sublimation heat and ion current 17 p2981 A66-32849
 Ionization processes in hot products of combustion processes /flame gases/ as weak plasma media, noting flame properties, mass spectroscopy, electron concentration, etc 18 p3280 A66-34106
 Elementary gas phase reactions involving atoms and radicals by mass spectroscopic and diffusion cloud methods 21 p3702 A66-38472
 Modification of conical plasma source of Azovskii design by replacing thin glass conical section with thick-walled neck section of glass bottle 21 p3785 A66-39039
 Plasmoid motion and purification in helical magnetic field and mass spectrograms of pure dense hydrogen 21 p3787 A66-39048
 Q-switch pulsed ruby laser irradiation-induced chemical dissociation and ionization in residual gases 23 p4079 A66-42076
 Mass of shaped charge accelerator generated fragments determined via high speed flash X-ray photography of projectiles in flight 24 p4209 A66-42186
MASS SPECTRUM
SA MOLECULAR SPECTRUM
 Pyrolysis of boranes using mass spectrometer at increasing temperatures, observing tetraborane, diborane, pentaboranes, etc 12 p1812 A66-23632

electron and proton differential velocity
 extra observed for low-energy relativistic
 mic rays, noting spectral neutrality of
 ation 13 p2174 A66-25570
 sive ion composition in lower
 sphere, particularly D region,
 considering sources for water ions,
 titification of metallic ions,
 19 p3350 A66-36354

TRANSFER

ENERGY TRANSFER

ext on theory of heat and mass transfer
 in viewpoint of thermodynamics of
 reversible processes 01 p0161 A66-10237
 heat and mass transfer treated by
 thermodynamics of irreversible
 processes 01 p0162 A66-10623
 parameters of internal heat and mass

 ferential equations for heat and mass

transfer on moving continuous flat surface
 with injection or suction 10 p1619 A66-21053

Mass and energy transfer characteristics of
 cathode attachment zone in high intensity
 arcs
 [AIAA PAPER 66-187] 11 p1742 A66-22215
 Heat exchange, friction and mass exchange
 in laminar multicomponent boundary layer
 during injection of extraneous
 gases 11 p1688 A66-22591

Nonuniform thermal flux for fuel elements
 and core of nuclear heat exchangers,
 determining heat transfer coefficient
 between adjacent fluid streams by mass
 transfer 12 p1973 A66-23527
 Maxwellian theory, within classical
 mechanics of fluids, adapted to material and
 thermal conductivity in turbulent flows,
 calculating mass and heat
 transfer 12 p1973 A66-23529

Mixed star evolution, mass loss and mass-
 luminosity-mean molecular weight
 relation 12 p1946 A66-23651
 Heat and mass transfer phenomena
 analyzed, using thermodynamics of
 irreversible processes and incorporating
 certain particular data of kinetic and
 statistical theories 12 p1980 A66-24910

Milne-Eddington model in heat and mass
 transfer, showing analogy between radiation
 and particle transfer and correspondence to
 simplified Boltzmann
 equation 13 p2208 A66-25162

Distribution, as function of azimuth, of
 static pressure and mass and heat transfer
 coefficients for case of interaction between
 detached shock wave on cylinder nose in
 hypersonic flow and turbulent boundary
 layer along wall 13 p1991 A66-25464

Hypersonic viscous interaction on very
 slender body of revolution having thick
 boundary layer and surface mass
 transfer 13 p1992 A66-26447

Polydispersity of particle system engaging
 in mass exchange with ambient, noting
 difficulties caused by
 nonlinearity 14 p2410 A66-26777

Transpiration cooling of hemispherical
 models in arc jet wind tunnel to obtain
 mass injection effects into boundary layer
 of aerodynamic
 configuration 14 p2412 A66-27446

Mass transfer potential in colloidal bodies,
 discussing relation between water content of
 dispersed substance and amount of moisture
 that can be absorbed by
 it 14 p2416 A66-28329

Heat and mass transfer process in reacting
 boundary layer of compressible gas in
 laminar flow along semiinfinite porous
 plate 14 p2416 A66-28484

Heat and mass transfer treated by
 thermodynamics of irreversible
 processes 14 p2416 A66-28486

Heat and mass transfer in radial flow
 between two fixed or co-rotating parallel
 disks, obtaining series expansion of Navier-
 Stokes equation 15 p2615 A66-28619

Mass transfer, friction and heat transfer
 analyzed and calculated for turbulent
 boundary layers in compressible
 flow 16 p2824 A66-30303

Hydraulic resistance, heat and mass
 transfer in vortical flow, noting power
 optimal conditions of
 operation 16 p2825 A66-30323

Text on convective heat and mass transfer
 for first-year graduate students in
 mechanical, nuclear and aeronautical
 engineering 16 p2829 A66-31315

Convective diffusion of material from
 single drop moving in liquid medium at low
 Reynolds numbers, using quasi-stationary
 approximation 16 p2689 A66-31516

Displacement thickness for boundary layers
 with surface mass
 transfer 17 p2909 A66-32491

Boundary conditions in viscous interaction
 theory, noting boundary layer growth effect
 on outer inviscid flow 17 p2909 A66-32492

Turbulent flow near boundary and
 equations for mass-or heat-transfer
 coefficient in terms of turbulent diffusion
 coefficient and thermal
 diffusivity 17 p3037 A66-33042

Mass transfer in gas-liquid dispersions,
 noting effect of flow rate, bubble size,
 etc 18 p3266 A66-34736

Mass transfer across gas-solid interface
 associated with semiconductor
 solids 18 p3087 A66-34737

Soviet bibliography on heat and mass
 transfer 18 p3267 A66-35062

Molecular-kinetic resistance effect on heat
 exchange in Nusselt-type vapor condensation
 on vertical plate and in vapor-bubble growth
 in superheated liquid 19 p3479 A66-36310

Electrically cryopumped system for liquid
 helium transfer continuously at low flow
 rates 20 p3542 A66-37105

Blasius series for heat and mass transfer
 in two-dimensional boundary layers,
 discussing velocity and concentration
 profiles 20 p3678 A66-37122

Asymptotic solutions of differential
 equations of mass transfer with chemical
 reaction without assumptions concerning
 kinematics, showing existence of five
 regimes 20 p3679 A66-37789

Boundary layers with coupled heat and
 mass transfer for large enthalpy per unit
 mass of injected material, based on linearity
 of perturbation equations 21 p3834 A66-38704

Matter exchange, period change and orbital
 element variation in close binary
 system 21 p3812 A66-38824

Mass transfer and hydrodynamics of gas jet
 injection into liquid surface, deriving
 empirical equations for hollow truncated
 point formed around injection
 point 21 p3836 A66-38958

Photography of small freely moving
 particles undergoing heat and mass transfer,
 using beam splitter to align two cameras on
 drop 22 p3917 A66-39675

Mass transfer from cone in supersonic flow
 in tests performed at zero angle of attack,
 preserving Mangler transformation which
 transforms flat plate solution to
 cone 22 p3843 A66-40036

Total boundary layer mass flow with mass
 transfer at wall 22 p3899 A66-40370

Gaseous dispersion in laminar flow through
 circular tube with mass transfer to retentive
 layer 22 p3900 A66-40411

Matrix functions and use in problems of
 heat and mass transfer 22 p4000 A66-40820

Mass transfer and first-order boundary
 layer effects on sharp cone drag
 [AIAA PAPER 66-33] 23 p4011 A66-41877

Surface mass transfer effect for supersonic
 flow over cone, examining solution of
 equations of motion for inviscid
 compressible gas with velocity field normal
 to surface of inner cone 23 p4011 A66-41898

Mass transfer into aerodynamic body flow
 fields, examining model shear flow in
 Rayleigh problem for blowing current across
 gas-solid interface 23 p4058 A66-41900

Turbulent viscous-interaction parameter in
 connection with boundary layer growth in
 presence of mass transfer, examining
 comparison of effects of strong and weak
 interactions 23 p4058 A66-41902

Homogeneous gas phase and surface
 reactions based on mass transfer mechanism
 during quenching of oxygen-nitrogen
 mixtures from high
 temperatures 24 p4170 A66-42134

Diffusion thermo effect on temperature
 field in combined heat and mass transfer
 processes, noting experiments with
 stagnation flow, turbulent boundary layer,
 etc 24 p4293 A66-42282

S TRANSLUCENT MATERIAL

S TRANSPARENT MATERIAL

S VITREOUS MATERIAL

MATERIAL REMOVAL

SA MACHINING

Erosive cutting of brittle material by normal impact of stream of solid particles [ASME PAPER 65-WA/PROD-8] 05 p0690 A66-15635

Two machining processes for eliminating unbalanced state of machine parts, using eccentric cutting and adjustment of part CG for coincidence with spindle axis 20 p3562 A66-36920

MATERIAL TESTING

SA ENVIRONMENTAL TESTING

SA FAILURE

SA FATIGUE

SA NONDESTRUCTIVE TESTING

Aluminum honeycomb sandwich structures under axial compressive loading in reliability safety margin analysis, using derived statistical strength 01 p0145 A66-10086

Statistical development testing discussing wear rate, factorial design, random balance design, evolutionary operation and component search pattern 01 p0077 A66-10116

ASTM International conference on application of advanced and nuclear physics to testing materials at Philadelphia in February 1964 01 p0090 A66-10289

Focusing and accelerating electrode materials for cesium contact ion engines, noting advantages of copper, beryllium and molybdenum [AIAA PAPER 64-684] 02 p0278 A66-11537

Nondestructive testing - Seminar, Genoa, November 1964 02 p0235 A66-11685

Multiple echoes in ultrasonic inspection of material defects reduces errors in signal reading for better reproducibility 02 p0235 A66-11686

Behavior of materials under dynamic loading - ASME Colloquium, Chicago, November 1965 02 p0299 A66-11849

Plastic deformation of metals under wide range in strain rate 02 p0245 A66-11852

Materials for use as rolling-contact bearing lubricants in liquid hydrogen environment [ASLE PREPRINT 65-LC-9] 02 p0238 A66-12255

Mechanical proof test used to reduce variability and screen out weaker elements of brittle materials with widely scattered strength values 03 p0436 A66-12754

Charring ablative materials effectiveness in combined convective and radiative heating as reentry shield 03 p0444 A66-12792

Mutual effects of vaporization, combustion and coking processes during material decomposition in high temperature gas flow 03 p0445 A66-12828

Welding technology and metal testing - Conference, Timisoara, Rumania, September 1965, Volume 1 03 p0374 A66-13116

Materials at cryogenic temperatures discussing thermal lattice effects, specific heat, electrical and thermal conductivity, thermal expansion and mechanical properties 04 p0534 A66-13371

Materials under high vacuum discussing degassing of metals, thin film deposition, food dehydration, vacuum melting and vacuum welding 04 p0534 A66-13373

Creep damage in metal, discussing future creep rupture life, exposure, mechanical properties and heat treatment for removing damage 04 p0537 A66-14466

Alloying effect on physico-mechanical properties of niobium, e.g., Young modulus, strength, plasticity and thermal expansion 05 p0699 A66-14686

Hypervelocity impacts into space radiator materials, discussing material evaluation for waste heat shield 05 p0701 A66-14931

Thermodynamic calculations and experimental measurements to illustrate material properties pertinent to ablation

process and to suggest refractory compounds as ablating materials 05 p0706 A66-15472

High tensile and tear strength and resilience of silicone rubber [ASME PAPER 65-WA/RP-3] 05 p0706 A66-15632

Mean strain cumulative damage and effect in low cycle fatigue of 2024-T351 aluminum alloy, covering strain cycling, fatigue life, residual ductility, etc [ASME PAPER 65-WA/MET-5] 05 p0703 A66-15690

Fabrication characteristics of ablative plastics prepreg reinforced tape for construction of large rocket nozzles 06 p0885 A66-16289

Insulating materials, discussing impregnated refractory ceramic foams for high energy hybrid motors 06 p0899 A66-16293

High temperature resin binders, discussing thermosetting polymer properties, functions, temperature resistivity and application 06 p0900 A66-16294

Cellular room-temperature-vulcanizing silicone-rubber, describing compound properties, application and possible structural modifications 06 p0900 A66-16295

Low density thermal insulation materials, discussing temperature control, ablation efficiency and processing qualities of materials for missile use 06 p0900 A66-16296

Elastomeric silicone for aerospace electric and thermal insulation, discussing properties, application and new developments 06 p0900 A66-16297

Strength of reinforced plastics undergoing rapid heating measured by IR pyrometry 06 p0901 A66-16303

Large diameter filament-wound structure fabrication and testing for deep submersibles 06 p0886 A66-16304

Rubber-compound fatigue resistance, examining effects of preliminary prolonged heating and cooling 06 p0901 A66-16482

Book on metal testing at high temperatures including tension, relaxation, compression, impact, nonsteady conditions, hardness, etc 06 p0966 A66-16561

Aluminum alloy surface flaw detection, discussing finishing process methods and parameters for improving penetrant response 06 p0887 A66-16798

Aluminum alloy butt fusion welds, discussing ghost lack of fusion phenomenon mechanism, characteristics and causes 06 p0887 A66-16800

Creep tests to verify validity of coincident axis and constancy of volume postulates of Alcoa 1100-0 aluminum alloy 06 p0968 A66-17178

Maraging steel response to heat treatment including formability, machinability, stress-corrosion resistance and cold-working behavior of austenitic and martensitic phases 08 p1239 A66-18959

Feasibility, reliability and applicability of maraging steels 08 p1240 A66-18960

ASTM conference, Purdue University, June 1965 08 p1241 A66-19713

Aluminum alloys, tensile properties and testing 08 p1241 A66-19715

Elongation and yield strength of wrought aluminum alloys as affected by gauge length and offset in tension and compression tests 08 p1242 A66-19717

Gas-bearing facilities for determining axial stress-strain and lateral strain of brittle materials to high temperature 08 p1242 A66-19722

Deformation modulus of airfield pavement materials 09 p1365 A66-20697

Potential radar-absorbing material /RAM/ performance and limitations in parameter determination 10 p1502 A66-21633

Feasibility of using columbium alloy B-66 and Ta-10W as regeneratively cooled nozzle materials in hydrogen fuel engine 10 p1547 A66-21782

Liquid nitrogen dilution effect on LOX impact sensitivity of selected materials 10 p1590 A66-21951

Creep testing apparatus for metals, with automatic recording of longitudinal and transverse deformations at high temperatures 11 p1780 A66-22600

Glass-resin interaction of filament-wound

composites, determining material properties and application to high performance pressure vessels 11 p1783 A66-231

Vibrocreep mechanism resulting from polymeric material heating under vibrational load, noting increase of creep rate at structural changes 12 p1958 A66-236

Tensile testing of fiberglass plastic anisotropic specimens with axis at angle reinforcing fiber direction 12 p1899 A66-240

Optimum depth, minimum area design charts for laterally supported structural beams in pure bending, discussing weight parameters, elastic buckling, material characteristics, etc 12 p1968 A66-242

Safety requirements for handling and testing unstable materials, particularly hydrazinium diperchlorate /HP sub 2/ solid propellant oxidizer 12 p1812 A66-244

High speed stress-strain testing polymers - International Symposium, Boston, March 1965 13 p2114 A66-2610

Johnston-Gilman concept of yielding and plastic flow and strain rate effect on dynamic dislocation 13 p2197 A66-2611

High speed tensile testing of materials under destructive loads at high strain rates 13 p2197 A66-2611

Stress relaxation, stress-strain curve and time-temperature-strain rate equivalence for thermoplastic and viscoelastic polymers 13 p2114 A66-2610

Impact properties of six materials compared on two falling-weight tensile impact testers, pendulum tester and high speed universal tensile tester, giving stress-strain curves 13 p2197 A66-2611

Static and high strain rate tensile behavior of epoxy, polyester and urethane resins reinforced with 181-S, 184-E and woven roving glass materials and nylon 13 p2114 A66-2611

Resin-impregnated material response in compression testing at intermediate strain rates 13 p2114 A66-2611

Apparatus for determining dynamic compressibility, creep behavior and viscoelastic properties of polymers 13 p2115 A66-2611

High speed testing to determine viscoelastic properties of composite propellant polymers, for use in solid propellant rockets 13 p2115 A66-2611

Creep compliance testing apparatus for surface penetration of low modulus viscoelastic plate by 1/4-inch steel sphere 13 p2115 A66-2626

Diffusion and flame-sprayed coatings are needed for standard tests for thermal protection coatings 13 p2111 A66-2628

Soviet monograph on elastic and plastic deformation mechanism, describing stress-strain state of materials, cyclic, variable and reversed load effects, etc 13 p2206 A66-2646

Soviet monograph on structural mechanics, describing calculation of strength, rigidity, stability and oscillations 13 p2206 A66-2646

Breaking pressure in pipes determined using plastic deformation theory, approximating stress-strain distribution curve of material 13 p2207 A66-2649

Fracture toughness of notched A-302B and Ni-Mo-V steels with various size specimens [ASME PAPER 66-MET-1] 14 p2311 A66-2696

Section size effect on room-temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 14 p2312 A66-2697

Two-phase flow and material attrition problems for Rankine cycle liquid metal power plants [ASME PAPER 66-GT/CLC-4] 14 p2224 A66-2697

Variation of LN 29546 test for determination of susceptibility of aluminum alloy sheet to coarse grain formation 14 p2313 A66-2701

ASTM-ASME Joint Committee report on high temperature properties of stainless steels such as stress-temperature, yield and rupture curves, etc 14 p2313 A66-2722

Tensile strength and deformation resistance increase with increasing test rate 14 p2401 A66-2783

Surface blistering of metals due to low

- neutron hydrogen ion bombardment, determining solar absorptance change in Al-plated specimens 14 p2316 A66-28007
- structural component reliability analysis of rocket engine propellant tanks, noting fatigue testing of hemisphere strength for statistical tolerance limits 15 p2507 A66-28795
- thermal fatigue testing of large cross-section polystyrene feedhorn window and control specimens 15 p2524 A66-28882
- elastic strain hysteresis energy required for fatigue in ferrous and nonferrous materials 15 p2609 A66-29070
- neutron irradiation effect on fracture toughness of several structural and pressure vessel steels studied by Charpy V-notch impact test and tensile 15 p2521 A66-29074
- cohesion materials behavior in high shear environment using Teflon, Pyrex, quartz and monolithic Refrasil as specimens 15 p2616 A66-29280
- combined Irradiation Facility for evaluation of selected space environments and to study optical behavior of materials 16 p2676 A66-30437
- high temperature insulating adhesives for vacuum applications tested, including degassing rate, mass spectra of evolved gases, electrical and mechanical properties 17 p2942 A66-31980
- fatigue life determination and detection of anionic contaminants of surface 17 p2870 A66-32206
- glass reinforced plastics for helicopter primary structures 18 p3124 A66-33690
- ceramic structural design, discussing laboratory specimen design, brittle material strength, boundary conditions, statistical parameters, etc 18 p3125 A66-33733
- temperature and strain rate effects on yield and flow stresses of alpha titanium determined, using continuous and differential testing 18 p3122 A66-33748
- vaporization and creep rupture behavior of type 316 stainless steel 18 p3123 A66-33755
- erosion of silt overlapped thin walled tubes, noting change in slope at point of local instability in torque-twist relationship 18 p3253 A66-33802
- fatigue damage accumulation in materials at high temperatures under variable loads, including calculation of fatigue 18 p3254 A66-34230
- contamination, viscosity, shear stability, breakdown and foaming of MIL-H-5606 hydraulic fluid and swelling effect on synthetic rubber 18 p3125 A66-34652
- stress-corrosion cracking of titanium - ASTM Meeting, Seattle, October-November 19 p3377 A66-35647
- elevated temperature stress corrosion tests in titanium alloys, noting susceptibility in presence of hot salt 19 p3377 A66-35649
- elevated temperature stress-corrosion cracking behavior of titanium alloys, noting variables and possible application to material selection 19 p3378 A66-35650
- stress corrosion in titanium alloys noting measurement techniques, crack forming effect of chlorine and surface treatment via metal coating 19 p3378 A66-35651
- hot salt cracking of titanium alloys noting stress corrosion, fracture toughness and crack propagation 19 p3378 A66-35653
- mechanism of stress corrosion mechanism of titanium during experimental conditions, results of chemical analyses, time factor, material resistance to crack formation, 19 p3378 A66-35654
- bibliography on metal fatigue in aircraft structures, 1955-1959 19 p3473 A66-35800
- materials behavior at cryogenic temperatures - ASTM meeting, Lafayette, Louisiana, June 1965 19 p3380 A66-35845
- laboratory simulation of thermal shock failure in tungsten under missile firing conditions 19 p3385 A66-36154
- mutual effects of vaporization, combustion and coking processes during material decomposition in high temperature gas flow 19 p3479 A66-36770
- mechanical construction materials behavior, discussing application of creep and plasticity 20 p3666 A66-36951
- experimental assembly for measuring true heat capacity of heat resistant insulating materials 20 p3666 A66-36951

materials during natural cooling at
temperatures from 1200 to 2400 degrees
K 20 p3556 A66-36989

High saturation core material magnetic
behavior, noting structural instability
accompanied by deteriorating magnetic
properties at high
temperatures 20 p3583 A66-37258

Thermoelectric device for semiconductor
analysis, determining whether material is of
n-or p-type conductivity 20 p3560 A66-37586

Cavitation erosion research, examining
correlation between drop impact erosion and
constricted tube and vibratory cavitation
erosion tests 20 p3588 A66-37814

Vibrocreeep mechanism resulting from
polymeric material heating under vibrating
load, noting increase of creep rate and
structural changes 22 p3988 A66-39709

Testing for mechanical properties of
materials at liquid hydrogen temperatures,
noting liquid transfer system and safety
regulations 22 p3886 A66-39890

[AICE PREPRINT 22B] 22 p3886 A66-39890

Material strength determination based on
elastoplastic and rigid-plastic theory of solid
bodies 23 p4137 A66-41006

Gas turbine blades fabricated from various
alloys tested in stationary turbine burning
diesel fuel 23 p4121 A66-41401

Laser beam effect on hydrodynamic
bearings, discussing microcracks and critical
energy, explaining
breakdowns 23 p4078 A66-41409

Heat insulation coating for Japanese SSR
/special small rocket/ and materials testing
by torch-burner method 23 p4148 A66-41426

Metal fatigue tests conducted on small-
scale models 23 p4140 A66-41851

Polymeric materials, metals and lubricant
compatibility with vacuum environment,
considering radiation damage and thermal
control effects 24 p4226 A66-42096

Compressive strain rate testing of Al, Ti,
pyrolytic graphite, lucite and mica, noting
techniques and results 24 p4227 A66-42138

Out of plane free vibrations of uniform
circular ring on elastic and torsional
foundations producing
restraints 24 p4287 A66-42165

Elastic and plastic behavior of ideal
materials with mechanical and thermal
properties of ductile structural
metals 24 p4288 A66-42275

Section size effect on room temperature
notch strength of H-11 steel, 2014-T6 and
7075-T6 aluminum alloys and Plexiglas
[ASME PAPER 66-MET-4] 24 p4228 A66-42581

MATERIALS EROSION

Corrosion control on aircraft skin,
countersinks and fasteners describing tests,
sealant coatings, chemical treatments,
mechanical barriers, platings on fasteners
and organic coatings 03 p0372 A66-12298

Erosion, oxidation, loss of strength and
reduction of ductility resulting from long-
time elevated temperature stressed
exposure of nickel alloy used in jet engine
design 03 p0381 A66-12583

[AIAA PAPER 65-744] 03 p0381 A66-12583

Two-phase flow and material attrition
problems for Rankine cycle liquid metal
power plants 14 p2224 A66-26979

[ASME PAPER 66-GT/CLC-4] 14 p2224 A66-26979

Metal erosion by airborne quartz dust
particles, using energy values as function of
material, dust size, temperature, etc,
influenced by surface layer of
material 16 p2813 A66-30442

Resistance to cavitation flow erosion and
cracking in metal alloys studied, using
rotating disk in water 17 p2915 A66-33265

[ASME PAPER 66-FE-11] 17 p2915 A66-33265

Cavitation phenomena induced by
ultrasonic waves experimentally studied,
using ultrasonic erosion tests and high
speed photography 18 p3101 A66-34645

Tungsten erosion by Co, N, Hg, alumina, H,
water vapor, carbon dioxide, etc, in rocket
exhaust of aluminized
propellant 19 p3385 A66-36152

Mechanism of electrode erosion by
supersonic flame jets during pulsed
discharge 20 p3607 A66-36981

Deformation of solids by impact of liquids
and relation to rain damage in aircraft and

missiles, to blade erosion in steam turbines
and to cavitation erosion - Meeting, London,
May 1965 20 p3546 A66-37801

High strain rate deformation of solids
under liquid impact examined via
photographic methods 20 p3588 A66-37802

Stress wave, deformation and fracture
caused by liquid impact, noting analogy with
solid and explosive impact and loading
fracture formation, propagation,
etc 20 p3588 A66-37803

Chemical etch pitting techniques,
determining dislocations in crystal structure
caused by liquid droplet impacts, calculating
stress distribution due to
collision 20 p3547 A66-37806

Solids erosion by repeated liquid impact at
relatively low velocities to determine impact
pressure and load
distribution 20 p3586 A66-37807

Water and mercury cavitation damage on
solids in cavitating venturi tunnels
consisting of single event symmetrical
craters and irregular fatigue-type
failures 20 p3586 A66-37813

Cavitation erosion research, examining
correlation between drop impact erosion and
constricted tube and vibratory cavitation
erosion tests 20 p3588 A66-37814

Intensity and scale effect of cavitation
damage investigated by closed circuit
hydrodynamic test
devices 23 p4057 A66-41850

MATERIALS SCIENCE

SA CERAMICS

SA METALLURGY

SA PLASTIC MATERIAL

Materials - ASTM International Conference,
Philadelphia, February 1964 01 p0085 A66-10291

New engineering materials - IME
Conference, Birmingham, England, October
1965 02 p0243 A66-11736

Ultrapurification discussing definition,
purification techniques, analytical techniques
/e.g. emission and mass spectroscopy/ and
role in biochemistry, metals and
materials 04 p0474 A66-13867

Book on physical
metallurgy 04 p0537 A66-14381

Insulation materials and processes for
aerospace and hydrospace applications -
SAMPE Symposium, San Francisco, May
1965 06 p0898 A66-16284

Heat capacity and thermal conductivity
related to elastic-mechanical macroscopic
physical properties, using invariance
properties of tensors 06 p0971 A66-16616

High temperature alloys for gas turbine,
examining advances in creep strength, low
cycle fatigue and wrought and cast turbine
blading alloys [SAE PAPER 650708] 06 p0898 A66-17079

Survey of composite materials and
structures 07 p1053 A66-17846

Nonlinear elasticity model for materials
with partially constrained or unconstrained
internal rotations 07 p1145 A66-18242

Papers on ceramics emphasizing
relationship between microstructure,
fabrication techniques and properties,
including review of aerospace technological
applications 07 p1050 A66-18293

Papers on beryllium properties and
metallurgy, emphasizing application as
construction material, ductility improvement
and processing 08 p1237 A66-18839

SAE handbook, 1966, supplies definitions,
testing methods, measurement methods and
data for engineering materials, machine
elements and vehicle
components 10 p1540 A66-21700

Survey and updating properties available in
commercial sintered metals, relating them to
engineering design
requirements 11 p1716 A66-22538

Design-sciences approach for evaluation
and selection of materials such as steel,
titanium, beryllium, etc, used in idealized
structures for aerospace
application 11 p1783 A66-23076

Synthesis conditions for materials of B-Al-
N system determined by sintering mixtures
of BN plus Al and AlN plus B powder in
nitrogen atmosphere 11 p1720 A66-23473

Raman laser materials selection,
emphasizing frequency shifts and excitation
power threshold 11 p1721 A66-23477

Qualities required of materials for joint sealing, particularly elastomers, noting properties and possibilities 12 p1899 A66-23818

Clad metals concept applied to low energy contact using materials system, analyzing material, mechanical and electrical properties of thin precious metal inlays 12 p1930 A66-24666

Materials for producing electric energy from heat by direct conversion 13 p1997 A66-25116

Machinability data for hard-to-machine materials, noting cost reductions, tool holder test program, cutting fluids, fixtures, productivity, etc [ASTME PAPER MM66-178] 14 p2300 A66-26958

Structures and materials - AIAA/ASME Conference, Cocoa Beach, Florida, April 1966 14 p2403 A66-27986

Structural design of components for launch, space and reentry vehicles, noting materials, mirrors and antennas for high speed flight, deceleration and landing systems 14 p2404 A66-27991

Materials for manned spacecraft with emphasis on Gemini spacecraft 14 p2406 A66-28003

Selection and processing of IR materials and differences between specification and fabrication techniques 15 p2524 A66-28829

Microscopic structure of sintered silicon carbide mechanism of material transport and effect of nitrogen doping 16 p2729 A66-30245

Materials science and technology in integrated electronics - Conference, San Francisco, September 1965 16 p2781 A66-31414

Tensor analysis of implicit constitutive equations of ideal materials 17 p2956 A66-31929

Mechanics, thermodynamics and constitutive equations of nonpolar materials under thermal effects and mechanical forces 17 p2957 A66-31930

Embedding and encapsulating processes and design of embedding materials for electronic packaging 17 p2944 A66-33525

Carbon/graphite material /carbibtex/, physical, thermal, mechanical and chemical properties 18 p3125 A66-34618

Chemical vapor deposition technique for materials for electron devices including preferred orientation, high purity material, special layer structures, etc 18 p3125 A66-34619

Design and testing of crack-notched specimens for determination of resistance of materials to unstable opening-mode crack extension under plane strain conditions 19 p3473 A66-35805

Combined nuclear radiation damage and cryogenic temperature effects on tensile and shear properties of materials in outer space 20 p3583 A66-37096

Nuclear radiation and liquid hydrogen effect on environmental mechanical properties of phenolic asbestos, glass and linen resins 20 p3587 A66-37097

Absorbing materials used in construction of anechoic chambers for electromagnetic waves 20 p3543 A66-37724

Materials problems affecting system effectiveness, reliability and maintainability in aerospace industry 20 p3567 A66-37896

Materials problems concerning structural reliability, modes of failure and load and strength distributions 20 p3567 A66-37897

Nondestructive testing for material evaluation, noting color radiography, ultrasonic imaging, transmission, attenuation, heat transfer and residual stress measurement 21 p3830 A66-39192

Joining of materials for aerospace systems - National Symposium, Dayton, November 1965 22 p3923 A66-40255

Structural materials for oxidizing environments at high temperature analyzed including nickel, cobalt and chromium alloys 23 p4080 A66-41125

Disperse material heating by simultaneous radiative and convective energy with temperatures expressed as integral equations 23 p4148 A66-41270

Relation between transfer functions and experiment in mechanics of deformable

solids, noting time factor 23 p4146 A66-41988

Thermodynamics and approximation theory of viscoelastic materials, developing Coleman-Noll theory, thermodynamic theory for fluids, etc 24 p4288 A66-42278

Material selection for linear ferrite devices including determination of internal biasing field, estimate of required saturation magnetization, etc 24 p4260 A66-43171

MATHEMATICAL MODEL

SA FLOW GRAPH

SA POISSON PROCESS

Hydraulic analogy experiments at optimum depths obtained analytically, noting surface waves in liquid 02 p0217 A66-11555

Book on probability theory covering mathematical models, randomness concepts, switching logic concepts, integration on abstract space, etc 03 p0386 A66-12369

Criticalities of system elements determining system unreliability obtained, using mathematical model [AIAA PAPER 65-735] 03 p0341 A66-12545

Physical and mathematical models in combustion theory of Zeldovich, Franck and Kamenetski 03 p0444 A66-12702

Mathematical model for predicting heat transfer in vicinity of protuberances 03 p0444 A66-12763

Mathematical model that takes into account factors involved in detecting faults as well as MTBF and MTTR for prediction of equipment availability 04 p0494 A66-13682

Canadian photogrammetry for analytical aerial triangulation, using mathematical model and matrix 04 p0516 A66-13898

Jet engine models applicable to analog and Dynasor simulation for transient performance analysis [ASME PAPER 65-WA/MD-16] 05 p0745 A66-15521

Nonlinear stability of zonal flows in two-dimensional quasi-solenoidal model when absolute eddy is monotonic function of width 06 p0905 A66-16549

Derivability of cosmological equations from first law of thermodynamics and hydrodynamics equations, without using general relativity 07 p1132 A66-17207

Mathematical formulation of lateral and longitudinal separation standards for subsonic and supersonic aircraft operation 07 p1066 A66-17680

Data analysis of experiments with open-cycle supersonic EGD generator for application as power source and comparison with mathematical model 07 p0993 A66-18314

Liquid-gas coexistence curve shape near critical point, allowing for volume and temperature deviations and for mathematical singularities 08 p1316 A66-18796

Limiting rate of decrease of harmonic function in three variables 08 p1246 A66-19711

Pontryagin rational classes as topological and homotopic invariants 08 p1246 A66-19712

Optimization of quality control procedures in searching for faults, using mathematical models 08 p1232 A66-19767

Wiener filters in phase locked loop design, noting tracking function for orbital trajectory, derivation of optimum filter and noise bandwidth 09 p1350 A66-19921

Exact determination of satellite orbital parameters by applied mathematics and mathematical model 09 p1457 A66-20584

Dynamic stability of circular elastic rods, noting iteration method analysis of nonlinear coupling effect between axial force and curvature in forced in-plane vibrations 09 p1467 A66-20638

Mathematical model of flame propagation in laminar and turbulent flow 10 p1619 A66-21072

Mathematical simulation model of industrial situation, discussing random numbers and selection of truck time interval 10 p1539 A66-21321

System reliability in terms of availability and reliability function in dynamic theory category which treats behavior of system in time domain 12 p1832 A66-24072

Mathematical model, using computer, to determine fluid and electrolyte distribution in principal body compartments of young 70-kg human male 12 p1809 A66-24229

Optimization of high resolution radar based

on mathematical results regarding line transformation of signals and ambiguous functions 12 p1819 A66-24666

Mathematical model of human body predicting inertial properties in any fixed body position, including location of mass center [AIAA PAPER 65-498] 12 p1810 A66-24777

Mathematical construction of extensive a shower based on hypotheses for nuclear phenomena, noting proton-proton interaction, pion generation, etc 13 p2174 A66-25444

Markov process model of Gemini countdown and transition probability matrix 13 p2192 A66-25555

Markov parametric algorithm for effective construction of minimal realizations of linear state-variable finite-dimensional dynamic systems from input-output data 13 p2053 A66-26000

Parameter indeterminacy in system identification for mathematical model with adjustable parameters matched to system output by feedback 13 p2054 A66-26000

Mathematical model of GaAs injection laser applied in determining maximum obtainable power output, using rate equations of electron and photon densities and thermal resistance for optimum value 13 p2105 A66-26577

Probability-statistics analytic human-operator model in control systems analysis 14 p2263 A66-27110

Mathematical models for logistics planning providing complete analysis of requirements through computer simulation 14 p2245 A66-27112

Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 14 p2360 A66-27116

Friedmann cosmological equation for noninteracting mixture of radiation and dustlike matter 14 p2380 A66-27272

Numerical integration principle in calculation of disturbing potential verified using conical Earth model 14 p2288 A66-28218

Nonlinear stability of zonal flows in two-dimensional quasi-solenoidal model when absolute eddy is monotonic function of width 14 p2327 A66-28222

Lunar astronomical research, establishment of lunar observatory and mathematical model for analysis of logistics implications 14 p2390 A66-28411

Mathematical models of system reliability, redundancy and design optimization 14 p2227 A66-28422

Probability model for defining explosive yield and spill of liquid propellant 14 p2371 A66-28444

Spherical shell weakened by several circular holes translated into infinite systems of quasi-regular algebraic equations in canonical form 15 p2608 A66-28777

Functional analysis of electromechanical control systems, noting application of mathematical methods for system reliability determination 15 p2428 A66-28779

General mathematical model of DC relay performance which includes effects of leakage path permeance and magnetic properties of core material 15 p2461 A66-28999

Systems analysis, discussing mathematical model formulation and control 15 p2472 A66-29368

Mathematical models of Mars and Venus computed, using seismology, Earth mean density and Earth moment of inertia 16 p2797 A66-30354

Shipboard tracking radar natural frequencies and mode shapes, noting resonance conditions and sensing, numerical analysis of mathematical model, etc 16 p2678 A66-30461

Frequency spectrum of FM signal for carrier modulation by any number of subcarriers 16 p2649 A66-30547

Quasi-redundant system reliability, solving differential equations for repair environment via computer 16 p2714 A66-30665

Reliability data analysis for systems, discussing confidence intervals, limits and parameters independent of mathematical models employed 16 p2714 A66-30666

Mathematical model for geomagnetic field
1965 given by internal and external
spherical harmonic
Coefficients 16 p2695 A66-30718
Solution of boundary value problems
describing two-dimensional flow in plastic
pipes 16 p2815 A66-30789
Two-dimensional dynamic analysis of probe
drogue docking concept noting design,
operation and
Performance 16 p2809 A66-30896
Motion equations, attitude and ignition
of third and fourth stage of USAF
Agena, noting solution derivation using
series constraints, accuracy,
16 p2743 A66-30908
Work on systems and simulation including
mathematics of simulator, random processes,
industrial systems, traffic and cargo
problems, etc 16 p2739 A66-31739
Mathematical problems arising in theory of
control in regular dynamic
systems 17 p2903 A66-33096
Mathematical model for predicting strength
density of material from deceleration-
history of instrumented impact
18 p3253 A66-33805
Structural dynamics research on launch
vehicles at Langley Research Center,
minimizing analytical method limitations and
for improved mathematical models for
national characteristics 18 p3240 A66-33818
Mathematical representation of latitude-
longitude point pairs for intersection of
plane of Earth and plane defined by central
of signal scattered between
communications sites 18 p3068 A66-33908
Angular detection of known signals in
active Gaussian noise for application to
mathematical models 19 p3296 A66-35334
Mathematical model of supply support for
operations 19 p3339 A66-35397
Mathematical evaluation of human visual
performance, discussing functions in man-
machine systems, application of TV for
systems monitoring, etc 19 p3294 A66-36283
Group treatment of theorems
concerning nonnegative
19 p3391 A66-36336
Nonnegative matrix analysis, discussing
operation and
Application 19 p3391 A66-36337
Mathematical model for systems comprising
man operator controlling typical
controlled elements, noting behavior
stability and performance estimation of
mean-squared error in
20 p3508 A66-36861
Analog computer method for
reconstruction of data distorted by physical
system response noise 20 p3627 A66-36888
Mathematical model of combustion
stability in solid propellant rocket engines,
noting system dynamic behavior, appearance
limit cycle and effect of large amplitude
oscillations on burning
20 p3627 A66-36889
Analytical expressions for maximum slope
fluid temperature transient response,
based on Hansen mathematical model, and
reduced time slope
20 p3678 A66-37119
Support systems utilizing maintainability
prediction, examining effect of changes,
modifications and complete
replacement 20 p3682 A66-37240
Scous thermoconductive model of solar
radiation motion, using Navier-Stokes
equations 20 p3631 A66-37335
Nonlinear calculation methods for model
representing W virginis, noting rapid
amplitude growth and luminosity-to-mass
ratio 20 p3650 A66-37338
Computation method used in pulsation of
free models extended to models of
shock variables, noting instability of
appropriate period, mass size, luminosity
velocity curves 20 p3650 A66-37339
Probabilistic model equations relating
burn height, feed location, degree of
variation and flow rates for continuous
photographic column 20 p3510 A66-37363
Product performance model for predicting
system effectiveness satisfying restrictions
time, money and input
20 p3566 A66-37884
Mathematical model used by Army Missile
Command for establishing priorities for

reliability and logistics
Improvement 20 p3684 A66-37886
PERT-type network, mathematical model
and human factor approaches to
maintainability and availability predictions
for man-machine systems 20 p3684 A66-37892
Relationship between predicted and
observed failure rates of units when parts
complement is known, noting factors and
mathematical model 20 p3573 A66-37954
Linear dynamic system synthesis from
weighting patterns 21 p3717 A66-38600
Comparison of gradient and random search
methods of empirical optimization as applied
to mathematical models 21 p3755 A66-38614
Continuous media model theory and
comparison with theory of many-dimensional
non-Euclidean manifolds, noting kinematic
characteristics of particle deformation,
variational principles, thermodynamic
equation, etc 21 p3756 A66-38627
Propellant sloshing in tanks of guided
missile, giving mathematical description and
numerical and experimental results in
Coralie stage 21 p3818 A66-38642
Symbolic factoring of multivariate
polynomial with integer coefficients, noting
application of Kronecker method and
techniques of
implementation 21 p3708 A66-38681
Mathematical model of linear guidance law
to dynamical system, noting reduction of
two-point boundary value class
error 21 p3765 A66-38870
Mathematical flow-intermittance model for
turbulent patterns, noting viscosity
effects 21 p3725 A66-38954
Explosive nature of chromospheric flares,
effect of magnetic fields and
thermoconductivity calculated, using
mathematical model 22 p3975 A66-40852
Mathematical model of cyclic stress-strain
relationship, determining hysteresis loop,
damping role, etc 23 p4140 A66-41896
Approximate solution of second-order
incompressible boundary layer equations,
using mathematical model reformulated for
application in vicinity of separation
point 23 p4058 A66-41924
Design of models of continuum media for
research in plasma physics, aerodynamics,
polymeric structures, motion, creep,
etc 23 p4096 A66-41935
Taylor vortices growth and instability using
mathematical model 23 p4062 A66-42045
Thermal convection in horizontally infinite
layer of fluid confined between rigid heat
conducting plates driven by temperature
difference 23 p4151 A66-42055
Performance modeling procedure to
determine characteristics of integrated logic
devices 24 p4177 A66-42100
Thermodynamics and approximation theory
of viscoelastic materials, developing
Coleman-Noll theory, thermodynamic theory
for fluids, etc 24 p4288 A66-42278
Frontogenetic potentialities of wind
deformation fields determined, using
mathematical model of
atmosphere 24 p4234 A66-42979
Superconductivity model with exact
solution, determining energy levels, ground
state energy, excitation spectrum, density
variations, etc 24 p4259 A66-43088
Analytic model for describing operation of
Marzolf tunnel diode 24 p4187 A66-43181
Inverter 24 p4187 A66-43181
MATHEMATICAL STATISTICS
Stochastic linear programming as activity
analysis model for determination of maximal
profit operations for
companies 09 p1349 A66-20635
Russian monograph on random processes
covering measure and probability theory,
Markov processes, limiting functions,
etc 12 p1903 A66-24067
Uniqueness of mean square approximate
systems proved by expressing weighted
mean square error in quadratic form in
normal coordinates 13 p2116 A66-25139
Asymptotically stable linear system
controlled by scalar random
input 13 p2048 A66-25849
Random variable representation of errors
in control system 14 p2263 A66-26767
Mathematical analysis of relationships
between weld strength, maximum
temperature and time at temperature of

type 2219 aluminum 14 p2302 A66-27347
Exact solutions derived for problems of
mathematical expectation and density
distribution of maxima for two types of
nonstationary random
processes 17 p2945 A66-31852
MATHEMATICAL TABLE
Cubic equations solved by tables compiled
by Shumilagskii and Herbert, Richards and
Arsham 01 p0093 A66-10408
Corrected tables and maps of geomagnetic
coordinates, covering methods of calculation
and corrected data charts 04 p0513 A66-13377
Tables of functions encountered in
resonance radiation transfer
theory 13 p2189 A66-26574
Tables for evaluation of Faxen
approximation to solution of Lamm
equation 14 p2320 A66-27115
Principle function tabulation for plane
transonic flows study by hodographic
method 16 p2686 A66-31034

Mathematical theory of optimal control -
Symposium, University of Michigan, October
1964 04 p0505 A66-13987
Dictionary of mathematical terms in
English, French, Russian, German and
Armenian, with English terms in
alphabetical order 04 p0540 A66-14003
Text for senior undergraduates, using
Fourier series and integral transforms to
discuss standard differential equations of
mathematical physics 09 p1397 A66-20917
Matrix inequality theorems, discussing
Krasnoselskii and Krein inequality and
Kantorovich inequality 10 p1549 A66-21225
Book on problems of mathematical physics
noting integral transforms, curvilinear
coordinates, integral equations and other
solution techniques 10 p1556 A66-21766
Starlike solutions of optimum transversal
contour problem treated by Young
inequality 11 p1631 A66-22519
Book on mathematics underlying celestial
mechanics, including central force problem,
n-body problem, Hamilton-Jacobi and
perturbation theories 11 p1776 A66-23202
Numerical calculus and applied
mathematics - French Colloquium, Rennes,
France, June 1963 14 p2324 A66-27835
Similarities and differences between
physical and mathematical measurement
[PST PAPER NT-148] 14 p2335 A66-27839
Limits to charge groups classified
according to structure and geometry into
linear dipole-type concentrated moments
analyzed, using generalized
functions 16 p2823 A66-31713
Book on mathematics of engineering
systems, emphasizing application of abstract
mathematical concepts to represent concrete
physical phenomena 20 p3590 A66-37254
Incorrect problems of mathematical physics
examined and illustrated by classical Cauchy
problem for Laplace
equation 20 p3591 A66-37756
Elastic shell theory, deriving two-
dimensional theory from three-dimensional
theory, noting boundary condition
contraction, stress-strain relations,
etc 23 p4141 A66-41936
MATHIEU FUNCTION
SA RAYLEIGH EQUATION
Parametric response of elastic columns
discussing longitudinal inertia effects,
analytic stability criteria and results
[ASME PAPER 65-WA/APM-13] 05 p0777 A66-15435
Parametric response of elastic columns,
discussing longitudinal inertia effects,
analytic stability criteria and results
[ASME PAPER 65-WA/APM-13] 12 p1961 A66-23985
Plane wave behavior, as deduced from
Mathieu function, analyzed in permittivity
modulated slab immersed in medium of
arbitrary constant
permittivity 14 p2240 A66-27913
RF breakdown in air studied for two
electrode configurations leading to nonlinear
Mathieu-like differential equations for
confined electron motion 19 p3296 A66-35417

- A posteriori error bounds in iterative matrix inversion 16 p2732 A66-30238
- Analytic construction of skew derivative Green matrix for system of second order elliptic PDEs in many variables 16 p2734 A66-30749
- Realization of directed graph having prescribed terminal connection matrix without self-loops and minimum number of arcs 20 p3539 A66-38284
- Distortion, fill and noise effects on pattern discrimination 23 p4030 A66-41577
- Generalized Popov criterion for stability of control system with arbitrary number of memoryless nonlinearities 24 p4187 A66-42130
- MATRIX ALGEBRA**
- Simple semigroup treatment of problems involving powers of nonnegative matrices 02 p0249 A66-11255
- Coordinate transformation for synthesizing network functions, considering matrix equation used in Foster form realization for RC driving point impedance 02 p0207 A66-11881
- Rotation of rigid body force affected, using matrix equations, noting coordinate system and differential equation 02 p0290 A66-11989
- Necessary and sufficient conditions for expansion of quadratic polynomial matrix into product of linear factors 02 p0249 A66-12007
- Spectral matrix of fourth-order differential operator on half-axis 02 p0250 A66-12107
- Impedance matrix of single three-pole and two-stage amplifier determined by Kron method 03 p0348 A66-12497
- Quadratic form as Liapunov function for linear homogeneous vector differential equation with constant coefficient matrix 04 p0539 A66-13825
- Canadian photogrammetry for analytical aerial triangulation, using mathematical model and matrix calculus 04 p0516 A66-13898
- Linear dynamical systems with weak coupling solved approximately, noting examples and definition 06 p0862 A66-16362
- Sensitivity of eigenvalue to changes in matrix calculated by formula used to investigate control systems 06 p0867 A66-16976
- Resolving matrix of normal system of ordinary linear differential equations in complex independent variable for multiply connected fields 07 p1057 A66-17835
- State diagram test for Markov chain regularity 09 p1360 A66-19928
- Matrix inversion by rank annihilation, discussing memory storage requirements, overlapping input time with computing time, number of computations, etc 09 p1395 A66-20625
- Heuristical method solving zeros of complex function, transcendental or algebraic, of complex variable, applicable to computation of eigenvalues of general matrix 10 p1548 A66-21214
- Matrix inequality theorems, discussing Krasnoselskii and Krein inequality and Kantorovich inequality 10 p1549 A66-21225
- Velocity, acceleration and static force analyses of spatial linkages, using matrix algebra [ASME PAPER 65-APMW-13] 10 p1539 A66-21487
- Control criterion for linear system with constant matrix, discussing quadratic functionals ensuring aperiodic transient 11 p1674 A66-22351
- Detection of fluctuating signal packets from noise background with unknown parameters 11 p1658 A66-23223
- Approximation methods for matrix computation, considering characteristic roots 11 p1723 A66-23361
- Linear approximation method for continuous periodic functions based on theorems concerning relation between triangular matrix and continuity modulus of subset of functions 11 p1724 A66-23365
- Matrix inversion algorithm from Cayley-Hamilton 11 p1724 A66-23407
- Distinction between concept and indicator of system effectiveness, in terms of matrix algebra, reliability, operational readiness and design adequacy 11 p1789 A66-23442
- Least squares estimator computed by method which reduces problem subject to constraints to no constraints 11 p1725 A66-23452
- Matrix algebra applications to circuit analysis, deriving transistor matrix for use in feedback amplifier 12 p1847 A66-23758
- Algebraic conditions of controllability and observability and relation between two Riccati-type matrix equations, deriving one from optimal regulation and second from optimal linear filtering 12 p1854 A66-24339
- Exact equation for phase constant obtained for rectangular waveguides partially filled with ferrite, using ABCD matrix, eliminating writing of field equations and matching boundary conditions 12 p1839 A66-24617
- Poincare series using symplectic matrix, showing that automorphic functions derived always exhibit smooth convergence 13 p2116 A66-25082
- Axissymmetric configurations of oscillations of thin conical shell, solving equations for fundamental frequency 13 p2207 A66-26497
- Existence in small of fundamental solution matrices of uniformly Petrovskii-elliptic systems with coefficients having continuity modulus satisfying Dini conditions 14 p2321 A66-27159
- Multidimensional matrix algebra and determinant operations [PST PAPER NT-148] 14 p2324 A66-27837
- Reduction of order of aeroelastic and flutter motion equations while retaining purely elastic contribution of eliminated coordinates, using quasi-static assumption and matrix algebra 14 p2405 A66-27996
- Stability of nonlinear control systems, noting Hermitian matrix for linear system of ordinary differential equations and analogous problem for difference equations 15 p2525 A66-28513
- Anisotropic vector functions of vector argument connected with crystal symmetry 15 p2526 A66-28951
- Equivalent mass matrix for rectangular plate elements in bending, noting coordinate system 15 p2610 A66-29306
- Spin-free transition density matrices, using permutation group algebra 15 p2547 A66-29620
- Algorithm from orthogonalization method for obtaining generalized inverse of matrix 15 p2529 A66-29847
- Computational photogrammetry, deriving relation between image and object space, using collinearity conditions and orientation matrix 16 p2703 A66-30513
- Integral equivalence of two given systems of square integral matrices, reducing problem to determination of principal ideal Z ring 16 p2738 A66-31563
- Generalized matrix inverse and differential operator with generalized Green function as kernel 16 p2738 A66-31719
- Stability of pulse-type automatic system described by matrix algebra 16 p2673 A66-31793
- Matrix algebra, discussing factorization, determinants, eigenvalues, polynomials, inequalities, etc 17 p2945 A66-31869
- K-orthogonality for inversion of state transition matrices 17 p2946 A66-32482
- Monograph on digital computer solution of matrix problems of elastic system vibrations 17 p2877 A66-32987
- Motion equations of rigid body, discussing transformation from Lagrange equation to Euler equation 19 p3400 A66-35831
- Transformation matrix converting phase variable form into Schwartz form for application to Liapunov function and Hurwitz criterion 19 p3392 A66-36742
- Basile hypothesis applied to diagonalization of vibration equation matrix, using phase curve 20 p3589 A66-36953
- Broken symmetry densities within current algebra arising in magnetic moment ratio, renormalization constants and unitary symmetry correction 20 p3606 A66-38293
- Local existence theorems for elliptic systems with linear matrix differential operator 21 p3754 A66-3846
- Matrix equations of rigid-body motion for general vibration isolation system, analyzing conditions for decoupling translational and rotational motions 21 p3770 A66-3865
- Comparison variables transformation of linearized perturbation initial value problems for nonlinear ordinary first-order differential equation 21 p3756 A66-3881
- Random acceleration theory using diffusion transformation of matrix equation into differential equation 22 p3947 A66-3968
- Construction of Cayley-Dickson type anticommutation type bimodules for composition algebras 22 p3939 A66-4000
- Data reduction techniques for vacuum measurements by mass spectrometry, emphasizing matrix algebra techniques 22 p3918 A66-4023
- Cylindrical shell analysis for short segments of shells of revolution with axisymmetric edge-loading and variable wall thickness, using matrix method 22 p3994 A66-4036
- Simultaneous one-dimensional heat conduction equations solved by means of matrix similarity transformations in direct computational procedure 22 p3940 A66-4048
- Matrix functions and use in problems of heat and mass transfer 22 p4000 A66-4082
- Numerical integration with aid of matrices for solving differential equations of structural mechanics 23 p4139 A66-4178
- Product form of inverses of sparse matrices, discussing geometrical interpretation and Gauss-Jordan method 24 p4233 A66-4320
- MATRIX ANALYSIS**
- Matrix analysis of response of geometrically nonlinear structures to prescribed dynamic loading and effects of thermomechanical midplane preload in prediction of natural frequencies and mode shapes 01 p0148 A66-10135
- Matrix technique to predict structural fatigue of acoustically loaded structures 01 p0150 A66-10157
- Matrix calculus and wave propagation in mechanical system, noting concepts of parameters and impedances [SAE PAPER 650822] 01 p0107 A66-10823
- Operation of three-dimensional matrices according to transformation of multilinear forms and to determinant-multiplication rules of Cayley and Scott 02 p0249 A66-12006
- Three independent systems of matrix equations for solving transfer function of multiparameter linear system handling by human operator 03 p0328 A66-12699
- Linear elastic analysis of shells of revolution by matrix displacement method [AIAA PAPER 65-142] 03 p0437 A66-12798
- Transient analysis of matrix equations of complex structural system, using finite difference method 03 p0437 A66-12815
- Inversion of correlation matrices used to obtain simple numerical algorithms and in construction of self-adjustment algorithms 03 p0338 A66-13036
- Analog simulation of operations on stochastic matrices using random transitions in automata aided by relay-contact circuits 03 p0350 A66-13037
- Dynamic matrices for natural vibrations of missile considered as beam and as thin walled shell under given boundary conditions 04 p0587 A66-13534
- Commutable matrices, decomposing determinant of general solution of AX equals XB into linear factors 04 p0539 A66-13869
- Probabilistic model for analyzing changes through time in binary dyadic relation on finite set of points 04 p0540 A66-14001
- Matrix scheme using two-way spline curves for interpolating low aspect ratio lifting surface mode deflections for use in aeroelastic calculations 05 p0774 A66-15058
- Calculation of singular values and pseudoinverse of matrix 05 p0710 A66-15474
- Matrix displacement analysis of anisotropic shells, determining bending and membrane stiffnesses of triangular element and effects of initial strains 06 p0961 A66-16005
- Interdigital band pass filters and related coupled structures, deriving exact equivalent circuits from impedance matrices 06 p0845 A66-16085

 infinite cases 10 p1550 A66-21342
 ergy band structure of germanium and
 on throughout Brillouin zone by k-p
 iltonian
 onalization 10 p1581 A66-21738
 eorems and corollaries describing
 ds for quadratic Liapunov
 tions 10 p1551 A66-21918
 al eigenvalues of complex matrices,
 g Hermitian matrix
 tions 10 p1551 A66-21926
 rator and nullator effects on nodal
 itance matrix 11 p1652 A66-22385
 trix coefficient expression for film-type
 istributed-parameter RC circuit with
 rary number of films and parameter
 istribution function 11 p1666 A66-22731
 s
 o generalized matrix forms of linear
 nates for spaceship motion derived,
 d on maximum probability

criterion 11 p1774 A66-23037
 Matrix techniques for finding geomagnetic
 field strength in solar ecliptic coordinate
 system 11 p1699 A66-23052
 Simple inequality involving expectations of
 convex functions and
 majorization 11 p1723 A66-23185
 Complex normalization of scattering
 matrices, noting application to impedance
 transformation 11 p1678 A66-23239
 Realization of circuit matrices given for
 nonoriented graphs, noting applicability to
 oriented graphs 11 p1679 A66-23246
 Matrix form of Routh algorithm and
 invariance principle used in digital computer
 construction of root locus of
 system 11 p1679 A66-23268
 Complete controllability of particular
 plant 11 p1682 A66-23455
 Mass matrix to solve rectangular plate
 vibration problems 12 p1957 A66-23610
 Computer program for teaching senior
 graduate engineering course in application
 of matrices 12 p1828 A66-23842
 Commutable matrices, decomposing
 determinant of general solution of AX
 equals XB into linear
 factors 12 p1903 A66-24025
 Matrix method for partial analysis of
 circuits, yielding algorithm for program for
 automatic digital
 computer 12 p1828 A66-24299
 Steady state alternating current analysis of
 RLC networks by computing eigenvalues and
 eigenvectors of corresponding matrix of
 coefficients 12 p1856 A66-24652
 Missile guidance systems based on p-matrix
 guidance methods
 [AIAA PAPER 64-667] 12 p1910 A66-24711
 Matrix methods for design of HF
 integrated circuit
 amplifier 12 p1844 A66-24729
 Rate of change of eigenvalues of lambda
 matrix and use in flutter
 investigation 12 p1972 A66-24978
 Monte Carlo calculations of cross section
 magnitude of electron-positive-molecular-ion
 dissociative
 recombination 13 p2130 A66-25375
 Matrix solution of limit problems of linear
 system of ordinary
 differential
 equations 13 p2117 A66-25414
 Second optical harmonic generation
 equations for steady state laser derived
 from density matrix 13 p2092 A66-25682
 Elementary matrix to analyze transistor
 circuits by contour-circuit
 method 13 p2042 A66-25955
 Multiparameter sensitivity matrix analysis
 of linear feedback multiloop
 systems 13 p2053 A66-26082
 EPr and normal EPr matrices, noting linear
 transformation on vector
 space 14 p2320 A66-27113
 Minimal prime implicant covers of
 switching functions determined, using
 connected cover term
 matrices 14 p2265 A66-27483
 Matrix reduction for n by n matrix of
 zeros and ones 14 p2323 A66-27781
 A x B of A with B where A and B are
 nonnegative matrices of orders m and
 n 14 p2324 A66-27800
 Dissipative gyroscopic force effects on
 mechanical system, noting necessary and
 sufficient conditions for stability and
 controllability 15 p2537 A66-28949
 Control system stability under external
 forces discussing Liapunov function
 construction, transfer functions and matrix
 analysis, frequency conditions of absolute
 stability, etc 15 p2470 A66-29147
 Energy from hydrogen molecule interaction
 with magnetic field and from hyperfine
 interaction expressed as products of
 irreducible spherical
 tensors 15 p2548 A66-29806
 Shipboard tracking radar natural
 frequencies and mode shapes, noting
 resonance conditions and sensing, numerical
 analysis of mathematical model,
 etc 16 p2678 A66-30461
 Spin-free derivation of Pauling rules for
 evaluating matrix elements for spin-free
 Hamiltonian over anti-symmetric Slater bond
 functions 16 p2754 A66-30860
 Minimum time control systems with
 servoloop relay for optimal error correction,

employing matrix analysis 16 p2671 A66-31061
 Mars spacecraft guidance and navigation
 requirements, noting entry trajectory,
 possible guidance errors and gravitational
 constant uncertainty
 [ATAA PAPER 66-532] 16 p2744 A66-31501
 Matrix formulation of output controllability
 conditions for dynamic
 systems 16 p2673 A66-31587
 Topological analysis and synthesis of star-
 tree equilibrium immittances, node
 conductance matrix and loop resistance
 matrix 17 p2899 A66-32050
 Critical load determination via trial and
 error method and transfer and stiffness
 matrices 17 p3023 A66-32309
 Sensitivity of eigenvalue to changes in
 matrix, noting development of computational
 formula 18 p3127 A66-34077
 Gytrator realization, discussing impedance/
 frequency characteristics of transistor
 circuit used 18 p3078 A66-34079
 Optimal solution method for linear
 program in which second member and
 several constraint matrices depend linearly
 on one parameter 18 p3127 A66-34389
 Inversion of correlation matrices used to
 obtain simple numerical algorithms and in
 construction of self-adjustment
 algorithms 18 p3073 A66-34999
 Analog simulation of operations on
 stochastic matrices using random transitions
 in automata aided by relay-contact
 circuits 18 p3073 A66-35000
 Class K matrices, discussing new methods
 and application to convergence rate of
 iteration procedures 19 p3391 A66-36335
 Subgroup treatment of theorems
 concerning nonnegative
 matrices 19 p3391 A66-36336
 Nonnegative matrix analysis, discussing
 summation and
 multiplication 19 p3391 A66-36337
 Matrix technique used for derivation of
 reflection and transmission coefficients of
 bounded plasma slab, noting wave
 propagation 19 p3305 A66-36419
 State vector determination for digital
 optimal control of system characterized by
 matrix equation 19 p3339 A66-36746
 Synthesis of constant or time-varying
 linear feedback control laws for application
 in multiple input systems with frequency
 symmetry 20 p3645 A66-36864
 Transition matrices of ergodic finite
 Markov chains and readiness models in cost
 effectiveness systems
 analysis 20 p3681 A66-37176
 Payload integration in space
 experimentation, discussing commonality,
 flight and load matrices, experiment-
 spacecraft-ground system interfaces,
 computer methods, etc 20 p3662 A66-37186
 Eigenvalues and eigenfunctions of spin
 Hamiltonian and matrix elements of spin
 operator of ruby 20 p3578 A66-37584
 Computer algorithm for recognition and
 extraction of planar graph from incidence
 matrix 20 p3523 A66-38279
 Perturbation theory analyses of network
 matrix eigenvectors and natural
 frequencies 20 p3539 A66-38282
 Theoretical interpretation of expansions in
 nonzero determinants formed from vertex
 and circuit matrices 20 p3539 A66-38283
 Linear prediction theory for maximum load
 tolerance of oscillator and lossless
 embedding required to induce
 oscillation 20 p3540 A66-38288
 Time-variable lattice network extended by
 choice of lattice arms to include
 transformless RLC nonreciprocal
 network 20 p3540 A66-38289
 Algorithms for digital computation of
 vectors and eigenvalues of
 matrix 21 p3823 A66-38564
 Matrix methods of forces and
 displacements applied to free oscillations of
 aircraft structures, proposing procedure
 yielding coherent mass
 matrix 21 p3825 A66-38582
 Block diagonalization theorem for linear
 ordinary differential equation systems and
 applications 21 p3755 A66-38597
 Matrix quadratic equation solution
 derivation applied in finding steady state
 solutions of Riccati differential equations
 with constant coefficients 21 p3755 A66-38598

Linear dynamic system synthesis from weighting patterns 21 p3717 A66-38600

Asymptotic forms exhibited by powers of nonnegative matrix, discussing index of convergence and associated values 21 p3755 A66-38602

Multiplicative and spectral properties of nonnegative space matrices 21 p3756 A66-38740

Autonomous orbital navigation by optical tracking of unknown landmarks 21 p3766 A66-38881

Necessary and sufficient conditions for matrix satisfying discrete maximum principle and difference methods for numerically solving second-order elliptic boundary value problem 21 p3757 A66-39258

Matrix displacement method applied to anisotropic plate and shell theory, including parallelogram and triangular configurations under bending, membrane forces and shear strains 21 p3831 A66-39352

Simultaneous nonlinear estimation of parameter vector via iterative procedure for known and unknown covariance matrix 22 p3939 A66-40000

Generalized constraints applied in stiffness method of structural analysis 22 p3993 A66-40341

Automated minimum weight structural design for various load conditions, integrating matrix displacement analysis and operations research 22 p3995 A66-40490

Synthesis of linear multivariable control systems in statistical dynamics, using method of factorization of spectral matrices 23 p4048 A66-41394

Geometrical theory of unitary equivalence of matrices indicating successive calculation of numerical invariants 23 p4084 A66-41407

Matrix coefficient expression for film type distributed parameter RC circuit with arbitrary number of films and parameter distribution function forms 23 p4045 A66-41469

Matrix interpretive codes including SELMA, FORTRAN and ALGOL 23 p4042 A66-41740

Displacement matrix analysis of three-dimensional anisotropic and inhomogeneous elastically deformable bodies represented as tetrahedral assemblies 23 p4146 A66-41989

Asymptotic stability of linear systems, using matrix analysis 24 p4187 A66-42375

Reliability criteria of systems with recovery, noting mean time to failure of system and mean time of system operation between failures 24 p4217 A66-42473

Matrix elements of Coulomb potential between Schechter functions and overlap integrals necessary in determining two-center acceptor states in p-type Ge and Si 24 p4255 A66-42497

Matrix analysis of complementary pair emitter-follower, examining overall circuit parameters, noting good DC quiescent stability 24 p4184 A66-42645

Structural analysis using transfer matrix method as compared with other matrix methods, considering vibration problem 24 p4291 A66-42856

Decompositions induced in completely or simple rectangular semigroup by matrix congruence 24 p4232 A66-42900

Oscillatory properties of linear matrix differential system, applying generalization of polar coordinate transformation to certain systems of second order 24 p4233 A66-43100

MATRIX STRESS CALCULATION

Elastoplastic matrix displacement of three-dimensional continua 01 p0152 A66-10343

Load displacement, elastic stability and dynamic response problems, using discrete-element stiffness matrix technique [AIAA PAPER 64-488] 02 p0297 A66-11543

Selecting stiffness matrices for plane stress problems using principles of minimum complementary energy and minimum potential energy 02 p0298 A66-11567

Triangular elements under linearly varying strain used in matrix displacement method analysis of stability of membranes of arbitrary anisotropy 03 p0437 A66-12887

Matrix application to method of initial parameters in solution of problems of elasticity and strength of materials 04 p0588 A66-13759

Matrix methods in dimensional analysis

discussing algebraic, matrix and shortcut methods [ASME PAPER 65-WA/MD-20] 05 p0710 A66-15523

Tetrahedron elements with linearly varying strain for matrix displacement method, interpreting stresses at nodal points 07 p1143 A66-17493

Transfer matrices of vibrating thin-walled open profile bars under forced, coupled bending and torsional stresses 08 p1311 A66-19342

Fiber orientation effect on ultimate tensile strength of aluminum-steel-silica fiber-reinforced metals 12 p1896 A66-24533

Arbitrary quadrilateral spar webs for matrix displacement method 12 p1971 A66-24976

Plane stress problems when yielding occurs locally, analyzing deformation using matrix notation, deriving expressions applicable with stress-strain relations 12 p1972 A66-25008

Matrix methods for stress and deformation analysis for structures subject to plasticity and creep 14 p2402 A66-27867

Shell structures solved numerically, using network of partial panels 14 p2404 A66-27990

Dynamic unified structural analysis method in computer program, calculating stiffness matrix to obtain natural frequencies and mode shapes 14 p2405 A66-27997

Flexibility matrix of structure obtained by selective inversion of stiffness matrix 15 p2614 A66-29612

Structural analysis by network theory, matrix formulation and computer programs 15 p2614 A66-29613

Matrix force analysis for calculating stresses and deflections in partitioned complex structures 16 p2820 A66-31324

Membrane parallelogram element with linearly varying edge strain for matrix displacement method 16 p2823 A66-31665

Finite element method using stability coefficient matrices in conjunction with stiffness matrices for problem of stability of plates 17 p3024 A66-32360

Computing stress resultants from element stiffness matrices at nodes devoid of concentrated forces 17 p3025 A66-32464

Stiffness matrix of thin flat triangular elements of nonzero Gaussian curvature derived by reducing geometrical idealization errors [AIAA PAPER 66-530] 17 p3028 A66-32776

Geometric stiffness matrices calculation for complex structural stability analysis 21 p3828 A66-38729

MATTER

S ANTIMATTER

S EXTRATERRESTRIAL MATTER

MAXIMUM PRINCIPLE

SA COMPLEX VARIABLE

SA PONTRYAGIN PRINCIPLE

Search theory extremal problems, considering theorems in terms of maximum principle for finding optimal strategy 01 p0051 A66-10734

Discontinuities occurring in closed loop optimal control problems when using maximum principle 02 p0207 A66-11899

Geometrical aspects of optimal processes, discussing existence of limiting surfaces in cost augmented state space, state equations, maximum principle and functional equations for optimal trajectories 04 p0505 A66-13990

Parabolic differential equations connected with optimal pursuit, discussing analysis and solution of problem of two moving points, with application of maximum principle 04 p0589 A66-13991

Theory of differential equations discussing extremal problems for generalization of optimal control problem 04 p0505 A66-13994

Optimum stage weight distribution in multistage rocket obtained by discrete maximum principle [ASME PAPER 64-WA/AV-5] 04 p0586 A66-14027

Maximum principle applied to guidance and tracking of space systems 05 p0713 A66-15193

Discrete maximum principle as restatement of constrained static variational problem 06 p0861 A66-16359

Sufficient conditions of optimality having control region dependent on phase

coordinates 10 p1518 A66-2198

Pontryagin maximum principle applied to Mayer variation problem in dynamics of point of variable mass 11 p1732 A66-2235

/rocket/ 11 p1732 A66-2235

Two generalized matrix forms of linear estimates for spaceship motion derived based on maximum probability criterion 11 p1774 A66-2303

Stochastic maximum principle with averaged constraint developed for control problems affected by stochastic process 11 p1678 A66-2318

Maximum-minimum theory of eigenvalue applied to stability in Navier-Stokes equation and to incompressible elastic body vibration 11 p1694 A66-2318

Multistage rocket trajectory optimization extending maximum principle to include Weierstrass and Jacobi conditions 11 p1733 A66-2333

Uniqueness theorems for second-order linear elliptic and parabolic equations with discontinuous boundary values 11 p1724 A66-2336

Monograph on continuous maximum principle covering design and control of industrial and process engineering systems, dynamic programming, process optimization etc 12 p1901 A66-2353

Directional convexity included in Halki derivation of maximum principle, using topological and geometrical arguments related to optimal control theory 12 p1849 A66-2425

Maximized elliptic equations, Dirichlet problem, distance function solution, maximum principle, removable singularity etc 12 p1905 A66-2440

Optimal control system geometry, discussing properties of interior points of limiting surfaces, maximum principle and separability concept 13 p2046 A66-2534

General theory of optimal processes, discussing general version of maximum principle 13 p2116 A66-2534

Maximum principle for systems described by difference equations, justifying convexity assumptions for approximation of differential equations 13 p2116 A66-2534

Signal to noise ratio maximization using Pontryagin maximum principle, solving matched filter problem and designing signal with constrained energy and amplitude requirements 13 p2048 A66-25940

General form of Rado-Cartan theorem for solution of second-order linear elliptic equations, using maximum principle 13 p2121 A66-26247

Maximum information principle applied to search for minimum of function 13 p2028 A66-26475

Nonlinear and constrained variational problems in search theory and boundary value problem construction by maximum principle 14 p2324 A66-28190

Theorem proof derived for maximal chains of reflexive and symmetric binary relations, based on Wallace formulation of Hausdorff maximality principle 15 p2529 A66-29851

Asymptotic efficiency for maximum likelihood estimator 17 p2946 A66-32295

Maximum principle application to optimal control procedure, minimizing transient response and decreasing effect of random changes in system parameters 17 p2902 A66-32577

General maximum principle and removable singularities, discussing case of arbitrary linear set of positive linear measure for which principle does not hold 18 p3128 A66-34661

Sufficient conditions of optimality having control region dependent on phase coordinates 19 p3325 A66-35858

Nonlinear optimal control problems with control appearing linearly, using Pontryagin maximum principle [AIAA PAPER 65-702] 19 p3468 A66-35905

General form of Rado-Cartan theorem for solution of second-order linear elliptic equations, using maximum principle 19 p3390 A66-36197

Estimation of Poisson kernels of elliptic operator with variable coefficients by using maximum principle and Fatou theorem 19 p3390 A66-36248

Maximum principle in optimization of

crete time systems described by
 erence equations 20 p3536 A66-36857
 neral theorems for dissociated and
 nically reacting compressible laminar
 eady two-component boundary layers
 ived, based on Nirenberg maximum

recombination processes 18 p3154 A66-33919
 Physical phenomena occurring within fluid
 devices, particularly pneumatic devices,
 considering Maxwellian distribution of
 velocities, ideal gas law and mean free
 path 18 p3098 A66-34118
 Density field calculation for collisionless
 expansion of moving cylindrical gas cloud,
 with Maxwellian random velocity
 distribution superimposed on uniform initial
 velocity 18 p3103 A66-34933
 Excitation and ionization of hydrogen
 plasma under influence of two electron
 groups with different temperatures and
 densities, using coupled system of rate
 equations 19 p3407 A66-36063
 Cosmic-ray neutron production and flux
 distribution on sea level and mountain
 altitude measured with boron fluoride
 counter for Maxwellian energy distribution
 with shifted neutron
 temperature 22 p3972 A66-39680
 Landau damping of longitudinal electron
 plasma waves in finite-diameter uniform-
 density cylindrical plasma, assuming
 Maxwellian velocity
 distribution 22 p3955 A66-40104
 Conductivity of potassium-seeded argon
 plasma, assuming variable collision cross
 sections and Maxwellian distribution for
 electrons 22 p3951 A66-40363

MAXWELL EQUATION

EH-type solutions of Maxwell equation for
 cylindrical waveguide inhomogeneously
 loaded with gyroelectric and gyromagnetic
 substances 01 p0028 A66-10559
 Second harmonic light generation, stressing
 saturation effects occurring at high laser
 power levels, solving nonlinear coupled
 Maxwell equations 02 p0239 A66-11443
 Locally Maxwellian solution of Boltzmann
 kinetic equation 02 p0251 A66-12182
 Drag on plasma cylinder from rotating
 magnetic field, solving MHD and Maxwell
 equations 03 p0397 A66-12385
 Nonlinear Maxwell equation for optics of
 many-particle system, noting Raman
 scattering from electron
 plasma 05 p0695 A66-14905
 Traveling magnetic wave plasma
 accelerator, discussing representative MHD
 equations, force and output power
 parameters and energy relations
 [AIAA PAPER 66-72] 06 p0942 A66-16253
 Maxwell equations for isotropic medium
 bounded by conductors in three-space
 dimensions solved by applying Laplace
 equations described in Minkowski
 space 06 p0851 A66-16450
 Asymptotic solutions of problems in wave
 propagation, examining electromagnetic field
 equations, hyperbolic equations, radiation
 from sources, etc 06 p0835 A66-16900
 Wave reflection and refraction across
 density discontinuity in two-fluid fully
 ionized plasma studied by coupled linearized
 hydrodynamic equations and Maxwell
 equations 07 p1088 A66-17948
 Absorption and spontaneous and stimulated
 emission for homogeneous isotropic
 nonferromagnetic Maxwellian media at
 rest 07 p1081 A66-18037
 Integration of equations, approximating
 Maxwell equations, in curvilinear
 coordinates separating scalar Laplace
 equation, with vectors representing electric
 and magnetic fields 10 p1556 A66-21994
 Validity of two approximations for
 removing corners and slope discontinuities
 from cylindrical metallic bodies in digital
 approach to Maxwell
 equations 11 p1653 A66-22563
 Surface conditions constituting front of
 electromagnetic field analyzed by Maxwell
 equations from point of view of generalized
 functions 11 p1654 A66-22636
 Response of spherical plasma probe to
 alternating potentials determined by
 Boltzmann-Vlasov equation together with
 Maxwell equations 11 p1746 A66-23070
 Relativistic electrodynamics of moving
 medium, discussing Maxwell-Minkowski
 equations, Born equations, field vector
 transformations, etc 12 p1915 A66-24650
 Nonrelativistic force in simple
 magnetizable fluid derived from
 thermodynamic information about energy
 and power 12 p1915 A66-24651

Maxwell equation as basis for studying
 multiple scattering of electromagnetic waves
 in inhomogeneous
 medium 12 p1825 A66-24886
 Gravitational field effect on
 electromagnetic field, using rotating hollow
 sphere in electric and magnetic field with
 electric charge at center 12 p1916 A66-24995
 Drag on plasma cylinder from rotating
 magnetic field, solving MHD and Maxwell
 equations 13 p2139 A66-25390
 Second harmonic generation of light
 analyzed, stressing saturation effects
 occurring at high laser power, solving
 nonlinear Maxwell
 equations 13 p2096 A66-26144
 Cylindrical wave propagation across strong
 magnetic field in cold rarefied plasma
 analyzed, using Maxwell equations, for
 experiments on plasma
 pinch 14 p2339 A66-26781
 Nonlinear optics, considering Maxwell
 equation and nonlinear material
 response 14 p2330 A66-26964
 Potential equations in homogeneous
 isotropic moving media derived, using
 Minkowski theory 14 p2340 A66-27040
 Dispersion relations for waves propagating
 along warm homogeneous isotropic plasma
 columns immersed in dielectric
 medium 15 p2549 A66-28713
 Huygen principle for electromagnetic field
 in moving, isotropic, homogeneous and
 linear medium, using Maxwell-Minkowski
 equations and Green function for field
 equation 15 p2537 A66-28783
 Nonlinear terms of electromagnetic field in
 ionized gas reduced to linear system and
 single nonlinear equation 15 p2547 A66-29648
 Collisionless Boltzmann and Maxwell
 equations for plasma instability of plasma
 without external magnetic field for
 transverse oscillation propagating
 perpendicular to streams 16 p2760 A66-30817
 Mathematical model for analysis of wave
 propagation in linearized vertically
 nonuniform partially ionized gas, proceeding
 from Maxwell and Boltzmann
 equations 16 p2761 A66-31005
 Lorentz invariant space-time gravitational
 field theory, Maxwellian gravitokinetic field
 of potential and kinetic components and
 precession of orbit of Mercury analyzed by
 Einstein restricted theory of
 relativity 16 p2802 A66-31011
 Maxwell equation solution for source
 currents in unbounded magnetoionic medium
 with uniaxial dielectric tensor, using Fourier
 transform technique 17 p2959 A66-32962
 Initial boundary value problems involving
 Maxwell equations in isotropic media solved
 numerically 18 p3065 A66-33533
 Integration of equations, approximating
 Maxwell equations, in curvilinear
 coordinates separating scalar Laplace
 equation, with vectors representing electric
 and magnetic fields 18 p3136 A66-34971
 Hydromagnetic, resistive and
 microinstabilities in plasmas, noting particle
 collisions and effect and validity of Maxwell-
 Vlasov equations with Fokker-Planck
 collision term 19 p3417 A66-36528
 Maxwell-Lorentz field equations for
 Couette flow birefringence of Rivlin-
 Ericksen viscoelastic fluid and Noll simple
 fluid 21 p3724 A66-38761
 Vector potential function solution to
 Maxwell-Minkowski equations describing cut-
 off phenomena for EM wave propagation in
 wave guide filled with homogeneous
 isotropic lossless moving
 medium 22 p3862 A66-39783
 Monochromatic wave interaction with
 isotropic electron-plasma, determining field
 and surface wave generated on basis of
 Maxwell equations 22 p3870 A66-40948
 Scattered particle intensity inside and
 outside finite medium determined from
 Maxwell and Schroedinger
 equations 22 p3975 A66-40954
 Maxwell equation as basis for studying
 multiple scattering of electromagnetic waves
 in inhomogeneous
 medium 23 p4036 A66-41093
 Monograph on kinetic theory of plasmas,
 deriving state equation, Maxwell equation
 for plasma-magnetic field interaction and
 boundary layer heat transfer

expressions 23 p4102 A66-41400
Radiation and propagation of
electromagnetic waves, noting solution to
initial value problem for moving point
source in infinite homogeneous
medium 23 p4040 A66-41635
Maxwell field equations and constitutive
equations, discussing best pedagogical
formulation for
electrodynamics 24 p4189 A66-42633

MAXWELL FLUID

Linear oscillations in relativistic
Maxwellian plasma, detailing dispersion
relations in collisionless cold electron-beam
system 01 p0110 A66-10326

Class of uniform motions of continuous
media and rarefied gases 08 p1210 A66-19575
Asymptotic solutions of Grad system of
kinetic moments in Maxwell gas and gas
consisting of molecules repelling mutually
to inverse of distance 08 p1210 A66-19576

Maxwellian theory, within classical
mechanics of fluids, adapted to material and
thermal conductivity in turbulent flows,
calculating mass and heat
transfer 12 p1973 A66-23529

Fourier transform of time-dependent
density-density correlation function
calculated from linearized Boltzmann
equation for Maxwell
molecules 12 p1917 A66-24584

Injection and extraction of hot electrons in
n-n heterojunctions with rapid
Maxwellization of electron gas, negative
resistance and semiconductor
characteristics 13 p2166 A66-25920

Surface protrusions and holes, Maxwell
kinetic gas theory and surface interaction of
current of free molecules and rigid
body 16 p2686 A66-31042

Unsteady flow of two immiscible Maxwell
fluids between two parallel plates when
upper plate is given transient velocity and
lower plate is fixed 21 p3731 A66-39605

Incompressible viscoelastic flow studied by
simple Maxwell model within rheological
reference point 23 p4054 A66-41171

MCDONNELL MILITARY AIRCRAFT

S F-4 AIRCRAFT

MEAN FREE PATH

Mean free path influence on transverse
collective excitations in strong coupling
superconducting alloys 02 p0271 A66-11481
Ginzburg-Landau parameters for type II
superconductors of short electron mean free
path 03 p0411 A66-13141

Thin electrostatic sheath near body
immersed in weakly ionized flowing gas in
mean free path regime for relatively small
Debye length

[AIAA PAPER 66-6] 06 p0921 A66-17102
Interaction mean free path of nuclear-
active particles in iron determined by
measuring number of interactions in each
iron layer in ionization

calorimeter 07 p1115 A66-17550
Nucleon passage through atmosphere and
meson production data including nuclear
cascade intensity, gamma ray production,
etc, and mean free path values for nucleon
interaction 07 p1115 A66-17553

Mean free path for nucleon-light atom
interaction changed from 75 to 90 g/sq cm
affecting air shower
characteristics 07 p1118 A66-17575

Superconductors with ferromagnetically
aligned impurities, assuming electron mean
free path due to spin-orbit interaction is
small compared to coherence
distance 07 p1108 A66-18431

Velocity and attenuation of ultrasonic
waves in thallium when product of sound
wave vector and electron mean free path is
less than unity 07 p1109 A66-18445

Thermoconductivity of annealed pyrolytic
graphite from 100 to 900 degrees K, using
phonon mean free path
characteristics 07 p1055 A66-18518

Critical fields of thin superconducting
films calculated by Bardeen generalization
of Ginzburg-Landau equation and extended
to nonzero temperatures and finite mean
free path 09 p1422 A66-20064

MEASURE THEORY

Existence theorem for trajectories of
orientor field satisfying measurability
condition 05 p0707 A66-15032
Pontryagin principle extended for

nonlinear control system whose control laws
contain Radon measures 06 p0863 A66-16618
Optimal control theory for nonlinear vector
differential equations containing
measures 06 p0863 A66-16620

Partial differential equations for
conditional Markov process distribution for
noisy observations 07 p1059 A66-17968

Boundary properties of Cauchy integrals
and harmonically conjugate functions in
regions having rectifiable
boundary 07 p1059 A66-18097

Fourier analysis of modulation products in
nonlinear device output and optimum
frequency conversion for n-frequency
input 09 p1396 A66-20639

Russian monograph on random processes
covering measure and probability theory,
Markov processes, limiting functions,
etc 12 p1903 A66-24067

Lorentz-invariant Markov process in
relativistic phase space 12 p1914 A66-24406

Space-time correlation tensor of turbulent
fields by phase space functional Lebesgue-
Stieltjes integration, statistical
hydromechanics and probability measure
theory 15 p2479 A66-29398

Generalized measures and integration in
function spaces, giving problems and
application 17 p2946 A66-32298

Stochastic processes, formulation and
solution using characteristic functionals,
transformations, and measure
theory 17 p2947 A66-33095

Random variable-dependent probability
measures induced in Borel body from
uniform catenaries and related to Lebesgue
measures 19 p3391 A66-36434

Statistical energy-and power-spectral
correlation analysis of signals with
nonintegrable spectra 20 p3512 A66-37149

Well-posed BVP for linear partial
differential system and relation of weak
solution with two Banach
spaces 21 p3754 A66-38458

Sufficient conditions for linear time
optimal control system on compact real
intervals in Euclidean n
space 23 p4049 A66-41536

 sign and construction of probe
 suring density of neutral atoms in
 scent alkali metal magnetoplasma,
 ng vacuum system, electric circuitry,
 12 p1884 A66-24984

Recording assembly for measurement of
 flexural and torsional moduli and internal
 friction at various frequencies and
 temperatures of small samples, using
 constant amplitude undamped
 oscillations 13 p2077 A66-25324
 Measuring apparatus to determining
 amplitude and phase of components of
 electromagnetic wave transmitted and
 reflected by given propagation
 medium 13 p2022 A66-25465
 Charge measurements for transistors and
 diodes 13 p2040 A66-25817
 AC, DC and pulse amplifiers including FET
 amplifiers, using semiconductor components
 and employed in measuring
 devices 13 p2079 A66-25895
 Complex dielectric constants of lossy
 liquids measured by transmission
 measurements in X-band
 waveguide 13 p2082 A66-26342
 Single sample chamber determining
 magnetothermodynamic characteristics
 including magnetic moment, heat capacity in
 magnetic fields, entropy change, free
 energy, etc 13 p2083 A66-26558
 Measurement apparatus and procedure for
 aureole scattering function in lowest layer
 of atmosphere 14 p2325 A66-27536
 Transducer-type instruments for precise
 mechanical measurements by conversion of
 physical into electrical
 signals 14 p2295 A66-27565
 Motion of slow positive potassium and
 nitrogen ions in nitrogen, measuring
 mobility and diffusion coefficients with
 apparatus whose characteristics are
 given 14 p2345 A66-28139
 Motion of potassium ions in argon, using
 apparatus for simultaneous measurement of
 mobility and diffusion
 coefficients 14 p2345 A66-28140
 Drift and diffusion of slow positive ions in
 hydrogen, using redesigned
 apparatus 14 p2345 A66-28141
 Measuring devices and observational
 methodology used in determining time
 variant and cyclic variations in cosmic ray
 occurrence 15 p2573 A66-28518
 Asperic surface polishing by driven laps
 and measurement by air
 gauge 15 p2509 A66-28825
 Plant physiological process measuring
 devices for automatic growth control in
 closed system 15 p2445 A66-29506
 Measuring device for pulsed laser output
 power using bolometer, amplifier and
 oscilloscope 15 p2503 A66-29701
 Pulse switching of thin ferromagnetic films
 in nanosecond range and operation
 characteristics of measuring
 circuit 16 p2773 A66-30681
 Construction method for rms-optimal
 digital smoothing devices, noting case of
 astatic systems 16 p2670 A66-30768
 Checkout of automatic meteorological
 measurement apparatus including
 thermograph, photoelectronic anemograph,
 etc, located on high tower of Institute of
 Applied Geophysics 16 p2704 A66-30775
 Instruments and measurements, automatic
 control - International Conference,
 Stockholm, September
 1964 16 p2706 A66-30879
 Symmetry measurements in
 communications device and systems, noting
 error 16 p2707 A66-31030
 Nonstationary aerodynamic load for
 harmonically oscillating body in fluid flow
 with constant mean velocity measured,
 determining errors as functions of system
 parameters 16 p2630 A66-31302
 Statics and dynamics of measuring devices,
 deriving equation for oscillating parameters
 via Taylor series 16 p2709 A66-31693
 Inertial navigation system theory that uses
 increased numbers of newtonometers /force
 measuring devices/ in place of gyroscopic
 sensitive elements 17 p2926 A66-32800
 Sonic boom measurement instrumentation
 noting use of frequency response, vibration
 isolation, wind screening,
 etc 17 p2926 A66-33025
 Electrostatic ion drive measuring methods,
 noting Faraday collector for ion current
 density 17 p2991 A66-33197
 Near field phase and amplitude
 measurements of small radiating structures,

using standard microwave
 equipment 18 p3075 A66-33619
 Spacecraft orbital parameter estimation
 using automated measuring
 gear 18 p3131 A66-33869
 Operational circuits found in measuring
 devices and in regulation or control systems
 for low power signal transformation for
 space application 18 p3076 A66-33882
 Complex shear modulus measuring
 apparatus for viscoelastic materials, including
 data obtained for butyl rubber and other
 elastomers 18 p3256 A66-34560
 Vertical intensity and angular distributions
 of penetrating cosmic ray muons measured
 underground by scintillators, Geiger
 counters, etc 18 p3221 A66-35205
 Survey of IR measurement techniques and
 computational methods in radiant heat
 transfer
 [AIAA PAPER 65-657] 19 p3477 A66-35595
 Instrumentation for plasma diagnostics
 noting electron density profile, temperature,
 ion-atom and electron-atom interaction,
 etc 20 p3556 A66-36964
 Experimental assembly for measuring true
 heat capacity of heat resistant insulating
 materials during natural cooling at
 temperatures from 1200 to 2400 degrees
 K 20 p3556 A66-36989
 Simplifying large cryogenic research
 tankage temperature measurement methods
 including thermocouples, resistance
 thermometers, semiconductors, piezoelectric
 probes and combinations
 thereof 20 p3556 A66-37072
 Amplitude and phase of individual modes
 propagating in overmoded waveguide
 measured by technique using phase-sensitive
 detector 20 p3524 A66-37114
 Large reflector shape measured by method
 using horn antenna illumination and small
 auxiliary reflecting
 device 20 p3527 A66-37448
 Circuitry of automatic surface tension
 measurement device 20 p3559 A66-37502
 Shipborne vibratory stress device for
 measurements on propeller blade and shaft
 by periodic data sampling 20 p3668 A66-37505
 Four-probe head sensitivity increase in
 measurement of volume and surface
 resistance of semiconductor materials by
 increasing separation of potential
 probes 21 p3709 A66-38613
 Extension of upper limit of Reynolds
 number for constant discharge coefficient of
 quadrant-edge orifice meter, noting
 performance in turbulent
 zone 21 p3724 A66-38819
 Measuring device for common emitter
 current-gain/ bandwidth product of
 transistors at various frequencies, noting
 effect of parasitic elements, assessing
 accidental error 21 p3737 A66-38966
 Device that will conveniently, rapidly and
 precisely determine position of point in
 specific perspective from space
 coordinates 21 p3745 A66-39332
 Unit for centralizing AC-carrier
 measurements onboard VTOL Hawker
 Siddeley P 1127 aircraft 21 p3741 A66-39475
 Measuring wear life and friction coefficient
 of dry film and solid film lubricants and
 plastic materials in ultrahigh
 vacuum 22 p3923 A66-40216
 Intermittency in favorable and adverse
 pressure gradients in turbulent boundary
 layer measured by modified Corrsin and
 Kistler method 22 p3900 A66-40384
 Low loss waveguide cavities measurement,
 using simple equipment suitable for high
 values of Q-factor 22 p3878 A66-40517
 Probe design for mass flux, stagnation
 point heat transfer and total enthalpy
 measurements of high temperature
 hypersonic gas flows
 [AIAA PAPER 66-750] 22 p3919 A66-40635
 Absolute power measurement at 1.2-mm
 wavelength, using gas-filled waveguide to
 measure rotational line
 absorption 22 p3921 A66-40895
 Local skin friction coefficients in turbulent
 boundary layers determined by technique
 based on wall turbulence
 theory 23 p4054 A66-41207
 Solid propellant combustion stability and
 physicochemical properties evaluated by
 measuring and calculation

- procedure 23 p4120 A66-41437
Resistance meters for heavily doped silicon and germanium
transistors 23 p4068 A66-41571
Solid state components and techniques applicable to spectrum signature measurements 23 p4047 A66-41599
Intensity and scale effect of cavitation damage investigated by closed circuit hydrodynamic test 23 p4057 A66-41850
Instrumentation in aerospace simulation facilities - International Conference, Stanford, August 1966 24 p4205 A66-42166
Measuring devices and techniques for heat-transfer rate, pressure and force in hotshot tunnels 24 p4206 A66-42168
Measurement apparatus and procedure for aureole scattering function in lowest layer of atmosphere 24 p4233 A66-42322
Biomedical monitoring systems for crews during rest and during dynamic stress testing 24 p4167 A66-42451
Laser Doppler velocimeter for gas and liquid flow velocity measurement 24 p4211 A66-42557
Precision microwave power measurement methods noting calorimetry, bolometry and thin film 24 p4184 A66-42649
Measuring devices for velocity of fluid in undefined motion, noting fluid dynamic transducers 24 p4214 A66-43013
Sporadic E layer reflection used to determine instrument constant in measuring radio wave absorption in ionosphere 24 p4205 A66-43156
Automatic double probe to determine electron temperatures in ion engine exhaust 24 p4215 A66-43208

MECHANICAL DRAWING

Precipitation in 17-7 PH stainless steels analyzed, measuring saturation magnetization, Youngs modulus and hardness as functions of aging time for material in condition T 01 p0086 A66-10412
Mechanical properties of commercial heats of air and vacuum melted steel, deriving data from impact and tensile tests, noting ways of increasing toughness 01 p0086 A66-10413
Hot plastic deformation effect on gas content, structure and mechanical properties of industrial molybdenum, niobium and titanium 01 p0086 A66-10451
Crack initiation and propagation in aluminum sheets, noting ductile fracture and load limit for design purposes 01 p0156 A66-10920
Heat treatment cycle effect on mechanical properties of corrosion resistant precipitation hardened steel AM 355 in terms of metallographic structure 02 p0242 A66-11304
Tungsten and molybdenum as engineering materials noting technology, mechanical properties, application, etc 02 p0244 A66-11738
Nucerite, ceramic-metal composite with high mechanical strength and abrasion resistance noting crystal structure, application, properties, etc 02 p0244 A66-11742
Mechanical characteristics of columbium steels and synthetic iron-carbon-niobium alloys as function of temperature at which they are converted to austenite 03 p0381 A66-12540
Zinc effect on mechanical properties and microstructure of Al-Si-Cr-Mg alloy 03 p0382 A66-12724
Internal friction measurements for studying mechanical properties due to crystal dislocations 05 p0698 A66-14550
Structural mechanics and critical conditions of fiber composite materials 05 p0773 A66-14907
Stress-strain relationships for tension, compression and shear of femoral bone loaded longitudinally and transversely [ASME PAPER 65-WA/HUF-7]

- 05 p0626 A66-15694
Deformation criteria for cold and hot working of metals applied to titanium alloys 06 p0888 A66-1707
IR polariscopy method applied to study of photo-and electromechanical effects of n type silicon films 07 p1034 A66-1787
Zone melting effect on mechanical properties of niobium on isochronal annealing after cold swagging 07 p1052 A66-18357
Fabrication, structure and properties of pyrolytic materials, particularly pyrolytic graphite, noting thermal and mechanical properties, oxidation, vaporization, etc 07 p1055 A66-18501
Mechanical properties of beryllium S-20 and I-400 QMV hot-pressed block, S-20 cross-rolled sheet and I-400 in extruded and forged condition 08 p1238 A66-18850
Effect of tantalum carbide additions on mechanical, thermal and chemical properties of WC-TiC-Co alloys 08 p1239 A66-18901
Low-temperature mechanical properties and fracture toughness of commercial and extra-low-interstitial grade Ti-6Al-6V-2Sn 08 p1242 A66-19719
Super chromium steel survey, including applications in gas turbines and aerospace industries, physical and mechanical properties, thermal stability, corrosion resistance, etc 09 p1387 A66-19952
Surface of Moon composed of solid material with different physical properties from terrestrial rock 09 p1453 A66-20173
Corrosion resistance, electrochemical and mechanical properties of alloys of titanium-niobium system 09 p1390 A66-20833
Mechanical and micromechanical behavior of bulk polycrystalline boron, emphasizing fracture stress and microstrain behavior relation to materials response 10 p1548 A66-21727
Evaluations for multiaxial-stress properties of ceramic materials including elastic and plastic strength, stiffness, ductility, resilience, etc 12 p1958 A66-23631
Partial substitution of manganese for nickel in maraging steel and effect on mechanical properties 12 p1895 A66-24375
Improvement of mechanical properties of structural adhesives and composite materials at cryogenic temperatures 12 p1899 A66-24385
Mechanical properties of lithium silicate glasses at different stages of crystallization and relation to microstructure 12 p1900 A66-24382
Density, microhardness, elastic constants and surface strength relation to microstructure of lithium aluminosilicate glass crystallized under various conditions of heat treatment 12 p1901 A66-24863
Niobium addition effect on mechanical properties of steel, noting improvement of tensile strength and cold brittleness threshold decrease 12 p1897 A66-24899
Formation of supermolecular structures and relation between characteristics and mechanical properties of polymers 13 p2112 A66-25307
Mechanical property evaluation and reproducibility in six heats of commercial Be-Al alloy 13 p2108 A66-25769
Effects of notch geometry on mechanical behavior /yield strength, tensile strength, etc/ of duplex annealed quaternary alloy at various temperatures 13 p2109 A66-25856
Mechanical properties of structural steels subjected to thermomechanical strengthening treatment 13 p2109 A66-25885
Strength and plasticity of some electron beam melted niobium alloys in cast and annealed specimens 13 p2110 A66-25886
Stress-strain relations for laminar anisotropic medium from known mechanical properties of layers for application to fiber-reinforced plastics 13 p2205 A66-26451
Aging behavior of rods produced by extrusion of manganese-containing aluminum alloy subjected to solution heat treatment, noting microstructure and mechanical properties 13 p2111 A66-26585
Forming of titanium alloy pellets which are extruded to make dense bars and composites, noting mechanical and tensile properties 14 p2310 A66-26832
Scattering mechanical properties of ternary

- creep resistant steel, emphasizing effect of heat treatment on microstructure [AIAA PAPER 66-GT-112] 14 p2312 A66-27006
- structures and materials - AIAA/ASME Conference, Cocoa Beach, Florida, April 14 p2403 A66-27986
- constitutive equation describing stress-strain behavior of metallic and nonmetallic materials for strain rate 14 p2405 A66-27993
- work on mechanical working of light alloys 14 p2302 A66-28191
- structure and mechanical properties of aluminum clad products obtained in SAP, noting microstructural 14 p2303 A66-28194
- rolling behavior of ingots of titanium with additions of Al, V, Mo and 14 p2304 A66-28201
- hydrogen effect on strength, plastic deformation and microstructure of hardened aluminum alloys 15 p2522 A66-29179
- hydrogen and hydrogen effect on microstructure, tensile and impact strength hardness of titanium 15 p2522 A66-29180
- structural changes and variations in strength at high temperatures in titanium alloys, determining aging temperatures including maximum 15 p2522 A66-29183
- effect of high temperature thermomechanical condition on structure phase composition of titanium alloys, noting deformation role in 15 p2522 A66-29184
- VT5 titanium alloy strength, plasticity and hardness with combined thermal and chemical treatment 15 p2522 A66-29187
- VT14-16 titanium alloys strength and plasticity with cold working and heat treatment 15 p2522 A66-29188
- high strength VT14 and VT15 titanium alloys in welded sheets studied for structure mechanical properties under hot 15 p2523 A66-29193
- mechanical properties of Ti-Al-Mo-Zr-Sn alloy as affected by varying cooling rate in treatment 15 p2523 A66-29194
- mechanical and metallurgical properties of tungsten single crystals useful in sheet rolling fabrication of complex components 15 p2523 A66-29286
- mechanical forces on superconducting tin in magnetic field, using torsion pendulum, noting conservative force association with currents in 16 p2770 A66-30175
- separation and mechanical properties of steel, discussing microstructure, transverse compressive strength and Youngs modulus 16 p2730 A66-30251
- mechanical behavior of three-layer panels in middle layer consisting of tumblered cavities or rods attached to outer 16 p2817 A66-31047
- structure, bending strength, impact toughness and hardness of Wc-TaC-Co alloys in various proportions of 16 p2724 A66-31234
- electrical resistance, thermal conductivity, thermal emf, elastic modulus, density and mechanical strength of Ti-Nb-Mo 16 p2724 A66-31235
- mechanical strength, toughness, elastic modulus, relaxation stability and specific ductivity of copper-titanium 16 p2727 A66-31568
- mechanical properties of Ag, Al, Ge, Cu, and Fe thin films, showing elastic deformation and strength greater in thinner 17 p2939 A66-31971
- nearby of mechanical behavior and ductibility of yield stress master curve analyzed for various crystalline-type polymers 17 p2943 A66-33004
- aging temperature ranges for tensile specimens of equiatomic niobium-zirconium alloys, noting phase diagrams, structural changes, mechanical properties, precipitation hardening, etc 17 p2940 A66-33290
- aging behavior and mechanical properties of three wrought high-strength magnesium-aluminum alloys 18 p3122 A66-33751
- oxidation-resistant coating effect on mechanical properties of notched and notched TZM Mo alloy, analyzing micrographic and microhardness data 19 p3384 A66-36145
- Room and cryogenic temperature mechanical properties and microstructure of electroformed nickel 20 p3582 A66-37090
- Cryogenic temperature effects on mechanical properties of high strength glass-reinforced plastic resins 20 p3587 A66-37095
- Nuclear radiation and liquid hydrogen effect on environmental mechanical properties of phenolic asbestos, glass and linen resins 20 p3587 A66-37097
- Titanium alloy endurance and fatigue strength compared to steel and light metals 20 p3583 A66-37306
- Hardness, toughness, stress relaxation, corrosion resistance, etc, of niobium-aluminum alloy with stable elastic modulus 20 p3583 A66-37366
- Physical and mechanical properties of cermet obtained by sintering powdered iron at high temperatures under dynamic impact compression 20 p3583 A66-37413
- Velocity and angle dependence of rain erosion for various materials, using rotating arm apparatus with high circumferential speeds 20 p3588 A66-37810
- Mechanical properties of metallic and ceramic fibers in metallic matrices and refractory fibers in ceramic matrices 21 p3751 A66-39231
- Nickel-cobalt-molybdenum maraging steels mechanical properties, costs, machining, etc 21 p3751 A66-39236
- Testing for mechanical properties of materials at liquid hydrogen temperatures, noting liquid transfer system and safety regulations [AICE PREPRINT 22B] 22 p3886 A66-39890
- Liquid rocket propulsion system weldment design and quality requirements, noting efficiency parameters 22 p3924 A66-40257
- Alloys and processes for Titan booster system fabrication, noting mechanical properties and behavior of welded joints 22 p3924 A66-40260
- Joining processes effect on mechanical properties and metallurgical structure of beryllium 22 p3925 A66-40264
- Oxidation and mechanical performance of tungsten and composite tungsten systems at high temperatures and pressures, determining surface recession rate up to 6750 degrees R 22 p3935 A66-40343
- [AIAA PAPER 65-293] 22 p3935 A66-40343
- Heat treatment effect on structure, mechanical properties and corrosion resistance of VTZ-1 alloy, noting influence of annealing 22 p3935 A66-40680
- Book on aluminum alloys covering mechanical properties, contact welding, manufacturing, cold deformation, etc 22 p3936 A66-40876
- Structural, mechanical and corrosion properties of aluminum alloy of various compositions 22 p3936 A66-40877
- Effect of technological factors on quality of semifinished pressed products of aluminum alloy 22 p3936 A66-40879
- Mechanical properties of VAD23 alloy noting tensile, compression, crushing and shearing strength and notch sensitivity and comparison with D16T alloy 22 p3936 A66-40881
- Welding capacity of high-strength alloys of Al-Zn-Mg-Cu system, noting welding techniques, composition effect on mechanical properties and remedies for cracking in welds 22 p3928 A66-40882
- Mechanical properties of semifinished products, welds and machined sections of high strength V92Ts aluminum alloy 22 p3936 A66-40883
- Mechanical properties, coefficient of linear expansion and microstructure of aluminum-based sintered-powder alloy containing silicon and nickel 22 p3937 A66-40884
- Metallic impurities effect on tensile strength of binary nickel alloys under tension 22 p3937 A66-40924
- Effect of titanium, zirconium, vanadium and cerium additions on properties and macrostructure of aluminum alloy tested in cast and heat treated states 23 p4080 A66-41271
- Temperature homogenization effect on structure of industrial aluminum, determining mechanical properties dependency on Fe/Si ratio 23 p4081 A66-41403
- Aluminum alloy tube for combustion chamber of Japanese SSR, noting mechanical properties, temperature effects, etc 23 p4081 A66-41424
- Rocket motor burning tests, discussing correlation of mechanical properties of polyurethane solid propellants to combustion characteristics 23 p4120 A66-41439
- Photoelastic analysis of stress and strain distributions of case-bonded propellant grains, calculating internal pressure and dependence on mechanical properties of grain material 23 p4120 A66-41440
- Compressive strain rate testing of Al, Ti, pyrolytic graphite, lucite and micarta, noting techniques and results 24 p4227 A66-42138
- Elastic and plastic behavior of ideal materials with mechanical and thermal properties of ductile structural metals 24 p4288 A66-42275
- Pure titanium tensile property, hardness and impact value at high temperatures, noting structural change from quenching 24 p4228 A66-42510
- Anisotropy in mechanical properties of lamellar solids due to abrasiveness, examining wear and surface damage produced by laminar solid on metal during slipping and hardness 24 p4229 A66-42701
- Mechanical properties, optical microstructure and thin foil electron microstructure of commercial pure titanium plate investigated for cause of ductility deterioration 24 p4229 A66-43105
- MECHANICAL RESONANCE**
- Torsional-coupler mechanical filters, particularly types with higher harmonic suppression and piezoelectric material, utilized with simple structure 12 p1845 A66-24852
- Proper mechanical vibrations effect on some properties of triglycine sulfate TANDEL /temperature autostabilizing nonlinear dielectric element/ 18 p3075 A66-33632
- Laser mirror transducer decoupling from mechanical resonances of laser cavity 19 p3374 A66-35813
- MECHANICAL SYSTEM**
- Periodic solutions of equation circular motions of coupled pendulums 01 p0106 A66-10405
- Stability theory for elastomechanical systems using algebraic techniques based upon Galerkin method 01 p0153 A66-10446
- Matrix calculus and wave propagation in mechanical system, noting concepts of parameters and impedances [SAE PAPER 650822] 01 p0107 A66-10823
- Steady states of mechanical system using perturbation method, assuming primary and secondary oscillators are tuned to single pulse, each involving Duffing type nonlinearity 04 p0545 A66-14169
- Synthesis of planetary screw-cam mechanism of optimum efficiency, using digital computer 06 p0886 A66-16313
- Electrical correction circuits for reducing rise time of some mechanical transducers 07 p1035 A66-18233
- Mechanical interpretation of problem of passage of light through curved light conductor 09 p1387 A66-20790
- Amplitude calculation of forced mass vibrations in damped linear mechanical system from column matrices of oscillation modes of eigenfrequencies 11 p1783 A66-23018
- Nonholonomic couplings effect on stability of mechanical system, showing weakening from asymptotic to nonasymptotic stability 12 p1967 A66-24108
- Optimal control for mechanical system ensuring optimal stabilization and maximum accuracy at terminal moment through minimization of difference between perturbed and unperturbed motion 12 p1914 A66-24239
- Motion control and stabilization of holonomic mechanical system with single cyclic coordinate via scalar force 12 p1915 A66-24785
- Response to multiple random excitation of system with multiple degrees of freedom, connecting spectral density matrix of generalized coordinates with corresponding generalized forces 12 p1972 A66-25004

Dual quadratic programming of dynamic response of frictionless mechanical system with one-sided

constraints 13 p2117 A66-25347

Theorems on interaction of parts of mechanical system with smooth holonomic constraints 13 p2128 A66-25638

Dissipative gyroscopic force effects on mechanical system, noting necessary and sufficient conditions for stability and controllability 15 p2537 A66-28949

Steady and unsteady perturbed motion effect on solid body containing cavity filled with liquid in analyzing dynamic stability of mechanical systems 15 p2539 A66-29152

Probability methods in analysis of oscillations of nonlinear mechanical systems 15 p2541 A66-29163

Seal performance optimization, noting alignment, lubrication, gasketing, balance, etc [ASLE PAPER 66AM 2C2] 16 p2711 A66-30407

Iteration method of general linear programming on digital computer, using penalty functions, compared to equilibrium problem of mechanical system 16 p2669 A66-30759

Autocorrelation functions and spectra for mechanical systems subjected to random vibrations [ONERA TP-340] 16 p2823 A66-31687

Phase characteristics and amplitude of correcting device ensuring closed loop mechanical system stability at critical frequency 18 p3092 A66-34995

Generalized Lagrange equations for rheonomic-holonomic mechanical system 20 p3602 A66-37542

Semiautomatic mechanical system for evaluation of rocket booster test stand oscillograms 20 p3561 A66-38065

Partial restraining device for rats in operant conditioning studies 20 p3508 A66-38419

Approximate method for determining damping factors of mechanical oscillatory systems with many degrees of freedom described by linear differential equations of n-th order with constant coefficients 21 p3770 A66-38971

Stability problems of solid body with liquid filler, noting small partial damping of liquid 21 p3770 A66-38972

Statistical mechanics for nonconservative mechanical system with nonpotential forces 21 p3773 A66-39370

Mechanical interpretation of problem of passage of light through curved light conductor 22 p3931 A66-39849

Galerkin based stability theory of elastic equilibrium extended to include nonconservative loads 23 p4097 A66-41983

Vanishing of sliding in mechanical systems with dry friction 24 p4218 A66-42844

Mechanical system for monitored deposition of sequential thin films on any one of five substrates from any of five independent sources and through any of five masks 24 p4218 A66-43216

MECHANICAL TWINNING

Mechanical twinning, sliding and plastic deformation of alpha and beta titanium alloys at low

temperatures 17 p2939 A66-31972

linear elastic theory of thin shells,
nsidering membrane and bending theories
open and closed cylindrical
ell 05 p0775 A66-15083
hell linear theory, discussing classical
sticity theory, bending equations, edge
ect and asymptotic
ory 06 p0962 A66-16350

Eigenvalues of vibrating homogeneous
membrane 09 p1396 A66-20631
Membrane creep and plastic deformation of
annular flat plate bounded by concentric
circles and subjected to evenly distributed
pressure 12 p1958 A66-23710
Stability of membrane solution in nonlinear
plate and shell theory 13 p2196 A66-25631
Elastic analog for geometrically nonlinear
membrane undergoing
creep 14 p2396 A66-27381
Response of spherical shell to plane
pressure wave, using Timoshenko and
membrane theories 14 p2399 A66-27612
Elastic large-deflections of annular
membrane treated by modified Foppl-von
Karman equation 17 p3024 A66-32359
Limit analysis of conical shells under
uniform internal pressure in correcting
membrane solution 18 p3259 A66-35017
Application of Rayleigh principle to obtain
sharp upper bounds for increase of first
eigenvalue of membrane submitted to
parallel and equidistant rectilinear
constraints 20 p3669 A66-37544
Membrane of constant strength subjected
to load uniformly distributed in horizontal
plane, using yield condition of maximum
principal normal stress 22 p3996 A66-40708
Material strength determination based on
elastoplastic and rigid-plastic theory of solid
bodies 23 p4137 A66-41006
Membrane theory of convex shells and
approaches to construction of general
moment theory of elastic
shells 23 p4141 A66-41938

MEMORY
SA LEARNING
SA MAGNETIC MEMORY
SA TRAINING
Distinctive features and errors in short
term memory for English
vowels 03 p0328 A66-12816
Nonlinear material with memory defined
by constitutive functional, examining fading
memory theory 19 p3438 A66-35484
Silicon-on-sapphire batch-fabrication of
computer logic and memories, describing
SOS diode matrix 19 p3314 A66-35526
High-speed complementary MOS
memories 19 p3314 A66-35527
Associative memory organizational
approaches for onboard data processing of
spacecraft 22 p3871 A66-40727
Facilitating effect of repetition on recall of
word from list of unconnected
words 23 p4025 A66-41044
Macromolecular parameters of memory and
learning and information processing in
molecular genetics, molecular immunology
and molecular neurology 24 p4162 A66-42313
Lasers applied to logic, memory, input-
output and data transmission-linkages parts
of computers 24 p4225 A66-42804
Molecular and ultrastructural correlates of
function in neuron, neuronal nets and brain
studied, using genetic and immunological
concepts 24 p4165 A66-43102

MEMORY STORAGE UNIT
Face-down ultrasonic bonding, assembly
technique to bond integrated circuit chips
to thin films 01 p0037 A66-10501
Circuit with tunnel-diode-based active
element for dynamic memory used to store
regenerated information 01 p0046 A66-11048
Information storage density reduction
techniques for magnetic recording
tape 01 p0034 A66-11132
Thin film silicon on sapphire diode matrix
fixed memory of extremely high density and
very low capacitance 01 p0049 A66-11149
Circuit application of diode matrix memory
for permanent information storage in
computers 01 p0049 A66-11150
Memory system using microelectronics with
conventional magnetic core matrices noting
diodes, transistors, resistors and sense
circuit 02 p0193 A66-11930
High density digital-storage element design
using MOS transistor, noting parallel vs
serial storage and delay line
storage 02 p0194 A66-11933
Memory units in tunnel diodes noting
signal to noise ratio, component tolerance,
switching power, reliability,
etc 04 p0489 A66-13492
Content addressable memory systems
promise increased computational capability

for Army data processing 04 p0490 A66-13686
Standing wave read-only memory based on
Lippmann color photography for information
storage 05 p0636 A66-14819
Molecules and memory, discussing role of
RNA as switching element in memory
processes 06 p0812 A66-16463
Determination of length of deductive
circuits of recycling memories and
oscillators 09 p1352 A66-20357
Matrix inversion by rank annihilation,
discussing memory storage requirements,
overlapping input time with computing time,
number of computations,
etc 09 p1395 A66-20625
Measured characteristic curves for
evaluation of memory devices, specifically
toroidal core 10 p1508 A66-21414
Superconducting continuous film store
evaluated, noting switching thresholds and
functional dependence of disturb pulse
sequences on film
parameters 10 p1509 A66-21416
Circuit with tunnel-diode-based active
element for dynamic memory used to store
regenerated information 11 p1671 A66-23295
Silicon monolithic Semiconductor Memory
Integrated Device /SMID/ memory system
and memory storage
element 12 p1827 A66-23834
Analog computer analysis of current
readout tunnel diode memory
cell 12 p1846 A66-24856
Bias-sputtering of nickel-iron thin films for
memory elements 14 p2354 A66-26909
Realization of numerical counters with
micrological elements, discussing flip-flop
and memory elements 16 p2656 A66-30964
Current-mode logic gates in building
differential amplifier for memory-core
readout 17 p2884 A66-32127
Batch fabrication of large-capacity memory
stacks, using integration of monolithic-
ferrite stack with integrated MOS
circuitry 17 p2886 A66-32515
Developmental memory using monolithic-
ferrite integrated arrays of magnetic storage
elements provides cost and power
savings 17 p2886 A66-32516
Probe and edge theorems for nonlinear
optimization algorithms using stored-program
computers 19 p3309 A66-35873
Realization of arbitrary storage structures
using newly developed pneumatic logic
system as elements 19 p3310 A66-36809
High-speed memory units for digital
computer, discussing ferrite, semiconductor
and thin magnetic or ducting film
memories 19 p3322 A66-36814
Operational reliability of superconducting
storage element of memory matrix operating
in symmetric recording regime under noise
signal influence 19 p3310 A66-36815
System comparison of magnetic matrix
memory procedure 19 p3311 A66-36816
Core-memory-programmed telemetry
system for aerospace vehicle with
application capability for deep-space probes,
orbiting spacecraft or avionic data
systems 20 p3513 A66-37199
Parallel evaluation of Boolean function in
search memory via
multiwrite 20 p3523 A66-38017
Electronic component, ferrite memory
cores, filters and inductances adapted to
integrated circuit 21 p3716 A66-39622
utilization
Magnetic memory units and memory
storage unit component design for digital
computer 21 p3708 A66-39626
Alphanumeric generator for display of
digital computer data on TV raster and
storage in memory 22 p3927 A66-40290
Statistical correlation-Fourier frequency
band analysis of coherent memory filter
applied to pulse compression radar
systems 23 p4035 A66-41023
Ferrite core memory system organization
for lower cost and higher performance,
noting diode decoded drive
system 24 p4177 A66-43182
Read-only digital computer memory
utilizing loom to braid information into wire
harness 24 p4177 A66-43183
Literature survey of content-addressable
and associative memory systems, noting
hardware, logical operations, speed, cost,
etc 24 p4177 A66-43184

Delay-line content-addressed memory with information retrieval by word association 24 p4177 A66-43185

MENTAL PERFORMANCE

SA PSYCHOMOTOR PERFORMANCE

Upper thermal tolerance limits for unimpaired mental performance 03 p0325 A66-12359
Molecules and memory, discussing role of RNA as switching element in memory processes 06 p0812 A66-16463
Abstract higher mental functioning of human operator during exposure to transverse acceleration stress 17 p2857 A66-32161

MENTAL STRESS

Degree of mental stress correlated with excretion of catecholamine, free adrenaline and noradrenaline in urine 04 p0470 A66-14081
Emotional problems of astronauts during space flight 11 p1642 A66-22488

MENTOR AIRCRAFT

S T-34 AIRCRAFT

MEPROBAMATE

Effects of meprobamate and hypoxia on psychomotor performance during bidimensional tracking, coded problem solving and response to auditory signals 24 p4164 A66-42456

MERCURY /METAL/

Eddy conductivity, eddy viscosity and dimensionless ratio of diffusivity for mercury flowing in tube 01 p0164 A66-10904
Temperature fluctuation intensity measurement in turbulent flow of mercury 03 p0356 A66-12827
Electrostatic engine with HF ion source uses mercury as fuel 04 p0573 A66-13542
Interaction of light pulse from ruby laser with mercury surface, observing mechanical impact believed to be rapid vaporization process 04 p0533 A66-14373
Mercury lubricated hybrid bearings for lubrication requirements of mercury Rankine Silent Compact Auxiliary Power /SCAP/ system [ASLE PREPRINT 65AM 3A3] 07 p1039 A66-18288

Transverse optical pumping of mercury isotope to show existence of new magnetic resonance lines 08 p1232 A66-18646
Kaufman-type mercury ion accelerator and efficiency as affected by operating parameters 08 p1281 A66-18722
Solid rotating mercury cylinder, reversibly obeying London equation when cooled through superconducting transition, at given angular velocity 09 p1419 A66-20042
Ion thruster, including mercury feed system and shielded neutralizer, designed and tested for spacecraft station keeping and attitude control [AIAA PAPER 66-247] 10 p1593 A66-21456

Pipe flow turbulent temperature fluctuation measurements in mercury and ethylene glycol with fast response thermocouple 14 p2410 A66-26936

Mercury selenium thin film transistors, measuring electric properties 15 p2560 A66-28634

Transverse magnetic field applied to high Reynolds number flow of liquid mercury in pipes and ducts inhibits convective mechanism of heat transfer [AIAA PAPER 65-539] 15 p2616 A66-29279

Turbulent velocity pulsations in mercury flow in transverse magnetic field 17 p2971 A66-32864

Transverse magnetic field effects on heat transfer in turbulent flow of mercury in circular iron tube 18 p3145 A66-34109

Temperature fluctuation intensity measurement in turbulent flow of mercury 19 p3343 A66-36769

Spatial correlation coefficients and transverse temperature perturbation scales during turbulent nonisothermal flow of mercury in circular pipe 20 p3607 A66-36982

Counting rate statistics and energy levels of optical photons in electron photon cascade in cooled mercury atoms 22 p3951 A66-40893

MERCURY /PLANET/

Radar measurement for rotation period of planet Mercury 03 p0426 A66-12891
Tidal de-spin of Mercury and Moon noting solar torque on planets 03 p0426 A66-12892

Mercury rotational period determined by Doppler-spread measurements 03 p0429 A66-13265

Planet Mercury rotation theory, applying motion of rigid system in inverse square field 06 p0955 A66-16732

Arecibo Observatory procedures to determine Mercury rotation 09 p1451 A66-20119

Muhleman radar scattering law indicates that surface of Mercury is similar to Moon in roughness 09 p1452 A66-20121

Radio observations of Mercury show brightness temperature of only 200 degrees K, with no significant variation with phase 09 p1453 A66-20182

Black body disk temperatures of Mercury and Mars from observations at 3.4 mm in April 1965 11 p1773 A66-22786

Possible luminescence effects on Mercury 12 p1945 A66-23558

Second order linear differential equation used to analyze dynamics of rotation of Mercury 12 p1949 A66-24237

Motion equation for rotation of Mercury solved by asymptotic expansion 13 p2187 A66-26287

Unmanned spacecraft trajectory and guidance considerations for close flyby of planet Mercury [AIAA PAPER 65-90] 16 p2801 A66-30885

Lorentz invariant space-time gravitational field theory, Maxwellian gravitokinetic field of potential and kinetic components and precession of orbit of Mercury analyzed by Einstein restricted theory of relativity 16 p2802 A66-31011

Geometric albedos and phase integral of planet Mercury compared with Moon 18 p3230 A66-34153

Contribution of rotating solar polytropes to perihelion advance of planet Mercury calculated as function of observable solar oblateness 18 p3233 A66-34571

Mercury rotational period as consequence of solar torques and equatorial asymmetry, based on radar data and model developing superharmonic resonance 20 p3650 A66-37337

IR observation of Mercury as evidence of nonsynchronous rotation, considering energy radiation as function of position 22 p3979 A66-40305

Mercury atmospheric temperature, composition and surface pressure and effect of nonsynchronous rotation 22 p3980 A66-40424

MERCURY ALLOY

Superconducting transition temperatures of Cd-Hg alloys covering complete composition range, considering effect of ordering 07 p1109 A66-18444

Thermodynamic analysis of Hg-Cd and Hg-Bi alloys, noting enthalpies and entropies of mixing, boiling point and phase diagrams, vapor pressure measurements, etc 17 p3037 A66-33289

Synthesis, purification, physical properties and electronic parameters of HgSe and HgTe semiconductors 19 p3445 A66-36318

Heat transfer dependence on pressure and thermal loads in bubble boiling of mercury and Hg-Mg alloys 22 p3999 A66-40295

New phase in mercury-indium alloy system established by resistance, superconductivity transition temperature and X-ray diffraction measurements 24 p4255 A66-42486

MERCURY ARC

Scattering of incident beam of microwaves by self-excited plasma waves in mercury arc column, deriving dispersion curve for plasma waves, identifying propagating electroacoustic waves as responsible for scattering 12 p1825 A66-24964

Resonant frequencies of VHF Lecher line coupled to mercury arc plasma via split cylinder coupler measured as function of electron density 23 p4100 A66-41155

MERCURY CAPSULE

Maximum temperature profile in phenolic resin-siliceous fiber heat shields on ICBM and Mercury spacecraft [AIAA PAPER 65-638] 01 p0162 A66-10596

MERCURY COMPOUND

Electron and lattice heat conductivity of mercury selenide crystals 14 p2356 A66-27066

Infrared and thermal suppression of photoconductivity in mercury sulfide crystals with copper and silver impurities 16 p2786 A66-31729

Electron and lattice heat conductivity of mercury selenide crystals 22 p3966 A66-40825

MERCURY LIGHT

Compact arc lamps, arcs in enclosed quartz glass filled with gas or vapor, most powerful and concentrated sources of Uv, near IR and visible radiation 02 p0213 A66-11231

Holograms of object illuminated with spatially incoherent light from low pressure mercury lamp, using afocal lens in interferometer for wavefront splitting 15 p2497 A66-28694

Qualitative results on transport mechanisms around dropping mercury electrode, using long path laser interferometry 18 p3110 A66-33924

Ruby laser pumping system and low cost mercury flash tube with high repetition rates used for micromachining process 22 p3933 A66-40336

MERCURY PROJECT

Evolution of navigation systems in Mercury and Apollo manned space vehicles and role astronaut plays in design of system 02 p0293 A66-11319

Physiological and psychological effects on man during U.S. suborbital and orbital flights from Project Mercury 11 p1642 A66-22483

SNAP Mercury Rankine space power conversion program and testing of Combined Rotating Unit-V /CRU-V/ 23 p4020 A66-41751

MERCURY TELLURIDE

Conductivity and Hall coefficient for zinc-mercury-telluride solid solution 07 p1105 A66-18366

Relation between surface grain structure and galvanomagnetic properties of polycrystalline mercury telluride thin films with high current-carrier mobility 20 p3624 A66-38434

Pressure deformation of band structure of HgTe-CdTe alloys determined from measurements of Hall effect and resistivity 24 p4258 A66-43009

MERCURY VAPOR

Dependence of properties of moving striations in plasma of positive column on external and internal parameters 04 p0553 A66-14178

Large-scale expansion nozzle control by heterogeneous nucleation and mercury vapor and drop growth processes in nitrogen flow [AIAA PAPER 66-85] 08 p1318 A66-18997

Transverse magnetic field effect on velocity profile of turbulent mercury flow most pronounced in suddenly expanding flow 09 p1409 A66-20834

Condensing characteristics of mercury vapor flowing in horizontal single tubes examined in crossflow-nitrogen-cooled and NaK-cooled condensers 10 p1621 A66-21463

Guarding probes in hot-cathode mercury vapor discharge 10 p1564 A66-21552

Resonant excitation by external forces, propagation and reflection of ion acoustic standing waves between electrodes in mercury vapor discharge 10 p1568 A66-21831

Low-pressure mercury vapor lamp for interferometric and spectrometric work, noting electrodes, main discharge tube, electrical circuit, etc 10 p1538 A66-22059

Lightweight flight prototype mercury ion engine system development and testing [AIAA PAPER 66-216] 13 p2172 A66-25170

Zero-gravity mercury feed system for mercury-electron bombardment spacecraft engines [AIAA PAPER 66-250] 13 p2172 A66-25176

Normal atom concentration in cesium and mercury vapors during pulse discharge 15 p2545 A66-29343

Ultrahigh-vacuum mercury-vapor unit design, noting performance characteristics 15 p2429 A66-29700

Intensity growth and decay in Ar and Hg lines after switching on mercury vapor discharge lamps filled with Ar 15 p2542 A66-29716

Standing ion acoustic waves in mercury vapor discharges 17 p2973 A66-32983

Type II collision roles in population buildup in zinc vapor and in zinc mercury vapor mixture 17 p2960 A66-33511

Dispersion of ion waves in mercury vapor discharges, carrying out spectral analysis of acoustic and plasma

- collisions 18 p3146 A66-34234
normal atom concentration in cesium and
mercury vapors during pulse
charge 20 p3604 A66-37348
standing ion acoustic waves between
mode and electrically floating auxiliary
metal electrode, noting discharges in
mercury vapor between plane oxide-coated
mode and nickel anode 22 p3954 A66-39817
- ADDITIONAL FLOW**
nocturnal auroral drift in meridional
direction 01 p0064 A66-11163
let region of laminar meridional flow in
irregularly shaped narrow gap between two
symmetrically formed
islands 02 p0217 A66-11585
pressure, density, temperature and wind
measurements in mesosphere resulted from
rocket soundings to determine
structure 07 p1027 A66-17361
macro-turbulent transfer and meridional
advection in northward drift of
mesospheric ozone 09 p1370 A66-19891
laminar circulation and thermal
equilibrium in stars generated by
spherical
perturbations 09 p1448 A66-20096
altitude distribution of combinations of
meridional gradients of pressure,
temperature and density 19 p3393 A66-35394
- ION**
BARYON
KAON
MUON
PION
analysis of 3587 tau-meson decays in
pulsed stacks, comparing experimental
energy spectra with
theory 03 p0395 A66-12697
hypothesis of two intermediate bosons to
explain K-2 meson anomalous decay,
exploring relation to gravitational and
cosmological theories 05 p0718 A66-15348
ratio of energy of electron-photon
component and energy of charged mesons in
interaction between nucleons and iron
nuclei 07 p1114 A66-17548
inelastic photonuclear process in forming
high energy meson jets recorded by nuclear
emulsion in stratosphere 07 p1116 A66-17557
multiple meson production analyzed by
formal mapping of Lobachevskii plane
to Euclidean strip 07 p1116 A66-17559
intensity variations and effective primary
spectrum for mesons observed at
approximately 40 mwe underground at Hobart,
Tasmania, Australia 07 p1122 A66-17991
atmospheric diurnal variation investigated,
using temperature controlled high-counting
neutron and meson
monitors 07 p1128 A66-18008
fluctuation of ratio of yearly average
amplitudes of meson-to-neutron diurnal
variation owing to variability of energy
dependence of cosmic ray
isotropy 07 p1128 A66-18009
cosmic ray meson intensity diurnal
variations measured, using neutron monitor
and Geiger counter 07 p1126 A66-18010
correction of cosmic ray meson intensity
monitor counting rates for atmospheric
temperature variation 07 p1127 A66-18012
effect of atmospheric temperature changes
on diurnal variation of meson component,
using temperature coefficient and crossed
telescope methods 09 p1439 A66-20219
integral multiplicity and coupling
efficient estimation of muon-meson
component of cosmic rays for case of
primary particle impinging at arbitrary
pitch angle 12 p1943 A66-24182
distorted wave one-meson-exchange
WOME/ for high-energy elementary
particle reaction analysis, leading to
different expression for transition
amplitude 13 p2131 A66-25482
meson emission asymmetry, inelastic
particle collisions and multiplicity in
high energy interactions in nuclear
emulsion 15 p2545 A66-29543
collision cross sections of high energy
neutron-nucleon interactions in nuclear
emulsion 15 p2583 A66-29545
energy and angular distribution of meson
produced by 22 gev protons in lithium
oxide with respect to secondary cosmic
radiation 15 p2585 A66-29563
Secondary cosmic radiation and meson
production at high energy, noting particle
flux regularities and
collision 15 p2586 A66-29564
Atmospheric contribution to diurnal
variation of cosmic ray meson intensity at
Deep River, Canada 17 p2994 A66-33429
Cosmic ray nucleon and meson component
intensity changes during 11-year cycle,
noting asymmetry in modulating mechanism
dissipation 18 p3181 A66-34776
Cosmic ray meson intensity close to zenith,
using telescopes of small solid
angle 18 p3185 A66-34802
Multidirectional high-counting-rate meson
counting array 18 p3114 A66-34803
Regression calculations correlating daily
average meson intensity with barometric
pressure, atmospheric temperature and
neutron monitor intensity 18 p3195 A66-34862
Daily correction of meson diurnal variation
for ground-level air temperature and
barometric pressure 18 p3195 A66-34863
High energy single meson production,
analyzing and comparing various
models 18 p3220 A66-35192
Meson properties analyzed underground by
spark calorimeter operated by telescope of
Geiger counters 18 p3220 A66-35194
Range fluctuation of high energy mesons
including effect of logarithmic increase of
ionization loss derived, using analytical
solution, considering effects of
bremsstrahlung, pair, etc 18 p3222 A66-35209
Forbush decreases using meson and
neutron component records in study of
sudden commencements during periods
between cosmic ray
storms 20 p3632 A66-38070
Cosmic ray storms, difference in Forbush
decrease recovery in nucleon and meson
component 20 p3632 A66-38072
Cosmic ray meson component distribution
with time plots of particle flux revealed
characteristic disturbances accompanying
sudden commencements of geomagnetic
storms associated with Forbush
decreases 20 p3632 A66-38074
Dynamics and symmetries of nonleptonic
hyperon decay based on assumptions of
parity-violating and parity-conserving
amplitudes, inverse associated production
amplitudes and SU 20 p3606 A66-38292
Underground telescopes confirm two-way
sidereal anisotropy in charged primary
cosmic radiation 22 p3973 A66-40534
Computer calculation of dependence of
average characteristics of extensive air
showers on adopted nucleon nuclear-
interaction model 24 p4270 A66-42926
- MESON-BARYON RESONANCE**
Dynamic calculation for 2 sigma pi
resonant system /meson-baryon/ in P 3/2
state, using Balaz type N/D
method 08 p1259 A66-19077
Dynamics of baryon-meson systems in 27-
fold representation, obtaining self-consistent
bound state and low lying resonant solutions
with Balazs method 15 p2544 A66-28945
Input and output coupling constants of
spin-2 mesons with two pseudo-scalar
mesons obtained by producing resonances at
experimentally observed
positions 15 p2544 A66-28947
- MESON-NUCLEON INTERACTION**
High energy nuclear interaction and
particle structures covering meson, baryon,
composition and dimensional
analysis 05 p0749 A66-15351
Calculation of neutron generation by mu-
mesons for various depths in
Earth 05 p0755 A66-15409
Nucleon passage through atmosphere and
meson production data including nuclear
cascade intensity, gamma ray production,
etc, and mean free path values for nucleon
interaction 07 p1115 A66-17553
High energy jets produced by heavy
primary nuclei of cosmic origin and
fragmentation products 18 p3215 A66-35160
- MESOSPHERE**
Mesospheres radiative and photochemical
response to fluctuations in UV and visible
radiation 02 p0222 A66-11821
Relativistic electron precipitation into
mesosphere at subauroral latitudes and
observations of solar proton and absorption
event 05 p0747 A66-14785
IR emission observation used to deduce
composition, temperature and energy budget
of stratosphere and
mesosphere 05 p0672 A66-15024
Air motions and physical factors affecting
general circulation in mesosphere and lower
thermosphere 05 p0711 A66-15027
Pressure, density, temperature and wind
measurements in mesosphere resulted from
rocket soundings to determine
structure 07 p1027 A66-17361
Four wind profiles analyzed for vertical
scale structure and wind shear in
mesosphere due to falling
sphere 11 p1729 A66-22564
Meteorological measurement accuracies for
use in design and operation of aerospace
vehicles
[AIAA PAPER 66-349] 12 p1953 A66-24480
High altitude mesospheric temperature
measurements, discussing air-to-sensor heat
transfer mechanism, bead thermistor and
descent rate
[AIAA PAPER 66-388] 12 p1908 A66-24510
Half-hourly variability and short-term
evolution of strato- and mesospheric winds in
autumn and summer 15 p2530 A66-28618
Rocket measurement of diurnal variation
of ozone profiles above maximum
concentration level 15 p2495 A66-30058
Small-scale wind variations in stratosphere
and mesosphere studied by high resolution
Robin falling-sphere
soundings 16 p2740 A66-30510
Stability of baroclinic axially symmetric
vortex on F plane to axially symmetric
disturbances 16 p2700 A66-31643
Gerdien type chamber for measurements of
ion mobility spectrum in terrestrial
mesosphere and Mars
atmosphere 18 p3114 A66-34712
Rocket probe measurements indicate
existence of maximum ion concentration in
stratosphere and lower ion concentration at
equator than at
midlatitudes 19 p3345 A66-35288
Meteorological rocket network observation
of gross global circulation patterns of
stratosphere and mesosphere for analysis of
vertical structure and synoptic
processes 19 p3347 A66-35644
Meteorological rocket measurements of
diurnal oscillations of pressure and density
in upper stratosphere and lower
mesosphere 20 p3551 A66-37515
Fluctuations of mesospheric winds over
equatorial region, noting quasi-periodic
oscillations 22 p3903 A66-39800
British stratospheric and mesospheric
temperature measurements compared with
valves from available atmospheric
models 22 p3913 A66-40519
Multiple air scattering in mesosphere as
function of zenith distance of Sun and
brightness of twilight sky 23 p4087 A66-41803

Crystal structure and allotropic transformation of cobalt and thermal, thermodynamic, electrical and magnetic properties 08 p1240 A66-18961

Influence of crystal-lattice defects on Youngs modulus and damping constant of aluminum 09 p1388 A66-19980

Temperature oscillations in molten metals and relation to growth striae in melt-grown crystals 10 p1572 A66-21167

Sputtering yields of aluminum, copper and titanium measured as function of cesium ion energies for use as electrodes on cesium ion engines [AIAA PAPER 66-203] 10 p1575 A66-21445

Spectral normal emittances of molybdenum, tantalum and tungsten single crystals [AIAA PAPER 65-134] 10 p1581 A66-21796

Metal structure analysis in terms of elementary electron and ion particles 10 p1547 A66-22054

Diffusion of electrolytic hydrogen through membranes of iron crystals as function of stress, temperature and dissolved hydrogen concentration 11 p1718 A66-23071

Hydrogen effect on strength, plasticity and brittleness of metals with fcc lattice at various temperatures and hydrogen concentrations 12 p1894 A66-23763

Ultrasonic stress waves effect on physical properties of metal, particularly acoustic softening and hardening, plastic deformation, photoelasticity, dislocations, etc 12 p1894 A66-24105

Age hardening response correlated with structural observations of iron-nickel-cobalt alloys 12 p1895 A66-24374

Reinforcement with whiskers of high temperature metals such as nickel, cobalt and nickel-chrome alloys 12 p1896 A66-24467

Annealing of deformed sodium, noting activation energy distribution annealing kinetics, etc 12 p1897 A66-24923

Critical analysis of Hirsch linear strain hardening theory, discussing decrease of dislocation cluster radius 12 p1898 A66-24926

Interference maxima changes in X-ray photographs of neutron irradiated metals attributed to interstitial atoms in lattice 13 p2106 A66-25332

Iron selenides of nickel arsenide structure analyzed, noting dependence of semiconductor characteristics on iron gap arrangements 13 p2164 A66-25471

X-ray method determining diameter of Guinier-Preston I zones and fraction of copper atoms contained in such zones in Al-Cu alloys 13 p2111 A66-26583

Polarization characteristics of oxidation electrochemical oxidation-reduction processes of metallic single crystals in acid chloride solution 14 p2232 A66-27311

Estimate of energy dissipation in metals, using continuous distribution of oscillating dislocations joined with Zener thermoelastic effects 14 p2315 A66-27658

General constitutive relations for incremental deformation of metal crystals by multislip 14 p2401 A66-27784

Current oscillations in germanium and silicon connected to compensated semiconductor, noting surface impurities 14 p2368 A66-28252

Recrystallization in titanium alloy strips subjected to various levels of hot rolling 15 p2522 A66-29185

Andrade creep law for metals, based on Davis law modified for variable temperature 15 p2611 A66-29420

Thermionic emission and surface ionization of Cs, K, Na, Li and In atoms on face of n-type silicon of resistivity of 150 ohm-cm for low densities of atom beams 15 p2569 A66-29883

Friction and wear of hexagonal metals and alloys as related to crystal structure and lattice parameters in vacuum [ASLE PREPRINT 65-LC-18] 16 p2713 A66-30568

Slip in single crystal tungsten deformed in tension at temperatures from 2500 to 5000 degrees F 16 p2725 A66-31453

Yield and flow stress reduction in high strength metals during ultrasonic vibration 16 p2821 A66-31462

Effect of anomalous dispersion on stimulated emission spectrum of doped cadmium fluoride crystals 17 p2977 A66-32317

Attenuation of longitudinal sound in pure crystals of superconducting lead 17 p2978 A66-32506

Amplitude dependence of energy dissipation due to internal friction in metals and alloys of various lattice types under near-resonance loading vibrations 17 p2940 A66-33228

Crystal lattice defects in metals caused by neutron irradiation 18 p3120 A66-33621

Hardness and lattice parameter increase effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750

Fermi surface shape and size determination and thermoconductivity and conduction electron properties in metals 18 p3155 A66-34135

Particle growth during coalescence of fine phases of metallic alloys 18 p3123 A66-34403

Dispersion degree of coherent scattering regions, microdeformation and packing defects probability in fcc metals determined, using approximation method 19 p3438 A66-35496

German papers on metal physics, chemical bonds in crystals and ferromagnetism 19 p3439 A66-35712

Serrated yielding by metals during tension tests at temperatures near absolute zero 19 p3380 A66-35846

Factors affecting fracture characteristics of metals at cryogenic temperatures and fracture mechanics for predicting performance of defect-containing structures 19 p3380 A66-35847

Martensitic transformations in ferrous and nonferrous alloys, discussing kinetic and structural characteristics 19 p3380 A66-35848

Nickel aluminide structure, examining arrangement of Ti, Cr and W in lattice via X-ray spectroscopy 19 p3381 A66-35928

Optical absorption edges with nearly parallel bands of aluminum analyzed for all polyvalent metals with simple structures 19 p3401 A66-36391

Crystal dislocation distribution effect on low temperature electrical transport properties in plastically deformed metals 21 p3753 A66-39587

Elastic constants and interatomic interaction parameters of niobium alloyed with tantalum, titanium and vanadium 22 p3936 A66-40788

Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 23 p4080 A66-41385

METAL CUTTING

Plasma cutting preferable on stainless steel and nonferrous materials, oxyfuel cutting advantageous when using four or more torches simultaneously on thick carbon steel 02 p0236 A66-12225

Survey of experimental studies of plasma arc cutting indicating that prevention of formation of secondary arc is essential for quality cutting 03 p0374 A66-13119

Welding technology and metal testing - Conference, Timisoara, Rumania, September 1965, Volume 2 03 p0383 A66-13156

Ductile behavior of brittle material during erosive cutting [ASME PAPER 65-WA/PROD-7] 05 p0690 A66-15634

Erosive cutting of brittle material by normal impact of stream of solid particles [ASME PAPER 65-WA/PROD-8] 05 p0690 A66-15635

Selecting proper cutting tool for machining high-strength steels and alloys 08 p1229 A66-18689

Machining technology of titanium alloys, investigating machining characteristics under controlled machine variables such as cutting speed, feed rate, tool material, tool geometry, cutting fluid, etc [ASME PAPER 65-PROD-11] 11 p1709 A66-22473

Abrasion of circular self-rotating cutters as function of blade path in material being worked 11 p1710 A66-22860

Abrasion of reverse side of cutter effect on thermal state of cutter during sharpening of steel specimens 11 p1710 A66-22860

Electrochemical machining of complex parts and comparison with electric discharge process [ASTME PAPER MR66-157] 14 p2299 A66-26950

METAL FATIGUE

SA SHOT PEENING

Fatigue failure in aircraft panels studied by determining spectral densities of response of continuous skin stringer panel under random noise excitation 01 p0147 A66-10130

Analog computer application to prediction of nonlinear response of panel structure to random forcing function 01 p0148 A66-10131

Fatigue theory and related phenomena affecting design for fatigue in metals 01 p0156 A66-10860

Comparison of materials for thermal stress application based on engine operating conditions and considering metal strength 02 p0245 A66-11790

Plastic deformation of metals under wide range in strain rate 02 p0245 A66-11850

Cyclic twinning deformation in fatigued close-packed cadmium, zinc, magnesium and titanium 04 p0537 A66-14301

Creep damage in metal, discussing future creep rupture life, exposure, mechanical properties and heat treatment for removing damage 04 p0537 A66-14460

Cyclic plastic strain energy and metal fatigue shows hysteresis loop development under cyclic conditions 05 p0772 A66-14540

Stress effect on negative creep in chromium-nickel-titanium steels, noting temperature effect and specific volume change 05 p0699 A66-14684

Breaking strength of plastic metals under impulse loading by measuring axial tensile stresses 05 p0699 A66-14685

Surface film effects on fatigue life of steels 05 p0703 A66-15483

Transmission electron microscopy to determine white etching alteration around inclusion in cyclically stressed bearing steel due to cellular grain formation [ASME PAPER 65-WA/CF-1] 05 p0703 A66-15614

Ultrasonic detection of fatigue crack formation in center-notched sheets of steel and alloys of aluminum and nickel 06 p0884 A66-15938

Slow-bend impact testing of embrittlement of zirconium by hydrogen 06 p0895 A66-16356

Fracture of metals at different loading conditions by energy analysis of plastic deformation and fracture 06 p0963 A66-16465

Stress cycle shape effect on fatigue strength of metals, noting graphical method for predicting fatigue life 06 p0965 A66-16487

Initiation and propagation of fatigue crack with reference to fish-eye pattern in ball bearing steel 06 p0965 A66-16489

Space environment effect on fatigue, tensile and creep behavior of metals 07 p1141 A66-17210

Torsional fatigue induced slip bands and crack initiation in aluminum-zinc-magnesium alloy at room temperature to 250 degrees C 07 p1048 A66-17485

Analytical derivation of formula relating plastic deformation per cycle and number of cycles to failure for metals 07 p1050 A66-18062

Aircraft design parameter development, discussing supersonic air transport, helicopter and V/STOL design problems, metal fatigue, etc 08 p1167 A66-18707

Feasibility, reliability and applicability of maraging steels 08 p1240 A66-18960

Fatigue damage of metals under mean stress investigated by X-ray diffraction 08 p1314 A66-19551

ASTM conference, Purdue University, June 1965 08 p1241 A66-19713

Temperature change effect on cumulative fatigue damage on 24S-T3 aluminum alloy and type 301 stainless steel 08 p1242 A66-19720

Test apparatus for continuous measurement of stress relaxation in metals which are plastically prestrained in compression 09 p1466 A66-19950

Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into

 of transformation to dielectric, discussing
 valence and conduction band separation
 mechanism 09 p1431 A66-20899
 Thin aluminum antimonide film fabrication
 for photoelectric cell
 application 09 p1359 A66-20927
 Tunnel effect measurements of
 superimposed aluminum and lead films used
 to determine effect of normal metal on
 superconductor 10 p1573 A66-21179
 Strength and structure of thin films of Al,
 Ag, Ge and Ni studied with electron
 microscope and electron diffraction
 technique 10 p1578 A66-21663
 Electrical conductivity of thin metallic

films with two surfaces having different probabilities of specular scattering 10 p1579 A66-21681

Vacuum deposited amorphous boron films, presenting structure, optical measurements and electrical properties 10 p1580 A66-21726

Thin film problems, discussing slow moving electron emission, electron penetration as function of energy level, etc 10 p1583 A66-22053

Hot electron emission from thin metallic films of island structure 10 p1589 A66-22171

Changes with time in coercive force of iron films and permalloy films prepared by sputtering material in magnetic field 11 p1753 A66-22802

Changes in domain structure of cobalt films as function of substrate temperature during sputtering and transformation from poly-to single-crystal structure 11 p1753 A66-22803

Epitaxial growing of iron, nickel and cobalt single crystal films on sodium chloride crystals by spraying at 200 degrees C 11 p1753 A66-22805

Domain structure of single-crystal epitaxial iron films as function of perfection of crystalline structure, using Lorentzian electron microscopy, noting two-axis anisotropy 11 p1753 A66-22806

Crystalline structure and magnetic properties of single-crystal films of iron-nickel alloys, for application as memory elements of computers 11 p1753 A66-22807

Domain structure and reverse magnetization of single crystal nickel films 11 p1754 A66-22816

Coercive force of single crystal iron films with two-axial magnetic anisotropy 11 p1754 A66-22817

Standing waves in laser resonators verified by placing thin metallic films between external mirrors of pulsed neodymium laser 11 p1713 A66-22893

Changes in mechanical and electrical properties of thin Zn, Cd and Cu films during machining and thermal treatment 11 p1758 A66-23322

Energy gap of clean superconducting thin films of tin in both parallel and perpendicular magnetic fields, using one-dimensional solution of Ginzburg-Landau equation 11 p1758 A66-23396

Phase determination by electron-probe X-ray microanalysis of nickel aluminate self-bonding coating produced by flame-spraying 12 p1892 A66-23560

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 12 p1930 A66-24459

Effect of preparation conditions on formation of carbide phases in iron-carbon thin films, using vacuum condensation 12 p1933 A66-25025

Quantum size effects in thin bismuth film and specific resistance, Hall effect and reactivity 13 p2160 A66-25107

Gold or copper diffusion effect on breakdown and multiplication characteristics of high voltage silicon p-n junctions, noting presence and formation of microplasma 13 p2161 A66-25194

Crystallites in evaporated film of CdS on Au and Al films studied by X-ray diffraction 13 p2161 A66-25196

Plasma oscillations in metallic single crystal films induced by fast electrons 13 p2139 A66-25330

Condensed nickel and iron films measured for tensile strength and microhardness 13 p2106 A66-25333

Transmission factor of rectilinearly polarized light as affected by plasma oscillations in granular films of gold 13 p2163 A66-25440

Longitudinal and transverse resistance-coefficients of thin film supporting materials, noting deformation resistance 13 p2107 A66-25460

Passive thin-film component materials, vacuum evaporation and sputtering processes 13 p2039 A66-25645

Metal film resistor preparation via vacuum evaporation, discussing structure of device, with emphasis on substrate materials, surfaces and properties 13 p2041 A66-25880

Properties of metallic recording media in

terms of physical properties of medium and geometrical dimensions of recording system 13 p2082 A66-26295

Thin tin film reflectivity and transmission factor for UV to IR 13 p2169 A66-26346

Microscopic and electron diffractational structural analysis of epitaxial growth of PbTe by sublimation on split surface of NaCl at 150 degrees C in vacuum 13 p2170 A66-26757

Uniaxial permalloy film anisotropy at cryogenic temperatures and magnetization characteristics 14 p2355 A66-26914

Chemically deposited thin ferrite and garnet films 14 p2249 A66-27104

Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 14 p2359 A66-27184

Electromagnetic transmission through thin silver film on dielectrics 14 p2364 A66-27747

Electric conductivity in thin metal films deposited on single crystal sodium chloride substrates, thermally activated with negative temperature coefficient of resistance 15 p2561 A66-28704

Double barrier transmission resonance in metal thin film triode 15 p2563 A66-28731

Hall coefficient and mobility in thin evaporated gold films on glass substrates 15 p2563 A66-28733

High quality optical pinholes of 100 to 0.08 micron diameter in metal films of arbitrary thickness 15 p2499 A66-28842

Increasing sturdiness of glass-to-metal seals in cesium vapors 15 p2429 A66-29707

Oscillating tunneling characteristics from electron interference in normal metal induced by superconducting contacts between silver and lead 16 p2769 A66-30168

Electron-spin paramagnetism effect on critical field of thin aluminum superconductor films 16 p2769 A66-30169

Magnetic coupling effect on flux pinning and flux-flow resistivity in superconducting tin film 16 p2770 A66-30170

Mechanical forces on superconducting tin film in magnetic field, using torsion pendulum, noting conservative force association with currents in film 16 p2770 A66-30175

Parallel and perpendicular magnetic transitions of superconducting lead films and foils determined from transverse magnetization and AC susceptibility measurements 16 p2770 A66-30190

Quantum size effects in thin bismuth film and specific resistance, Hall effect and reactivity 16 p2771 A66-30286

Electric contact effect and transition temperature measurement in superconducting Cu-Pb double layer films at low temperatures, using He 3 cryostat 16 p2772 A66-30322

CdSe-Au-Ge metal base transistor fabricated, based on fact that Ge-Au junction barrier is low and CdSe-Au junction is Schottky 16 p2660 A66-30615

Thin Permalloy film deposition by controlled high-vacuum ion source, noting design of apparatus 16 p2661 A66-30691

Magnetic properties of thin Permalloy films prepared in glow and arc discharge in inert gas 16 p2774 A66-30692

Metal film preparation by electron-beam melting of metal in water-cooled crucibles 16 p2661 A66-30693

Variation in photoelectric output of thin metal layers calculated as function of thickness, determining output for two light polarizations 16 p2780 A66-31211

Temperature effect on color of thin layers of gold of various thicknesses connected with anomalous absorption phenomenon in gold layers 16 p2780 A66-31212

Sputtering of aluminum thin films prepared by bell-jar vacuum systems /getter sputtering and standard diode/ for electronic application 16 p2783 A66-31423

Molybdenum films prepared by sputtering onto oxidized silicon substrates, analyzing resistivity, lattice parameter, orientation and grain size as function of substrate temperature and bias 16 p2783 A66-31424

Effect of storage in air at high temperatures on resistance, temperature coefficient of resistance of metal alloy film

resistors, noting effect of silicon oxide protective overcoating 16 p2783 A66-31426

Conduction mechanism in discontinuous metal films involving image forces, potential barrier, activation energies, saturation effect in conductivity, etc 16 p2783 A66-31427

Thin film technology in microwave power tubes noting ceramic mounted structures, secondary emitters, semiconducting and dispersion hardened thin films, etc 16 p2665 A66-31432

Discoloration in contamination area of aluminum bonds in integrated circuits noting cause and effect on interconnection bond integrity 16 p2665 A66-31434

Epitaxial growth of single crystal, impurity-free metal films using clean alkali halide surfaces in ultrahigh vacuum 16 p2784 A66-31534

Change in resistance of titanium films deposited in high vacuum from argon ion bombardment, noting dependence on energy value 16 p2789 A66-31786

Vapor deposited gold thin films to obtain adhesion and durability between film and substrate essential as lubricants in high vacuum 17 p2929 A66-31979

Electric field influence on thin metal film growth inducing coalescence of three-dimensional island-like structure 17 p2979 A66-32632

Energy gaps of Ag-Sn, Fe-Sn and Sn film studied by electron tunneling method for various temperatures 18 p3156 A66-34474

LF common-base current transfer ratio for hot electron transport in semiconductor-metal-semiconductor point-contact-transistor structures measured as function of metal film thickness and temperature 19 p3435 A66-35410

Optical absorption of island films of gold as function of island density obtained from electron micrographs and film thickness 19 p3435 A66-35416

Vacuum evaporation of metallic films on substrate 19 p3437 A66-35457

Hot electron emission from thin metallic films of island structure 19 p3441 A66-35788

Microwave absorption in normal conducting films of gold plated onto superconducting tin indicates resistivity and transition temperature of gold consistent with proximity effect 19 p3443 A66-35999

Low effective resistivity of gold film plated onto tin determined by low temperature microwave absorption measurement and explained by free-electron model and superconductivity proximity effect 19 p3443 A66-36000

Effect of chemical chromate film on high temperature oxidation behavior of beryllium 19 p3386 A66-36437

Dislocation dipoles produced by ionic bombardment of thin gold films, noting that during annealing dipoles can condense to form only one dipole 19 p3447 A66-36726

Integrated circuits, examining thin film evolution, noting advantages of size reduction, reliability and functional value 19 p3322 A66-36817

X-ray absorption edge observation by transmittance measurements through thin unbacked metal films in XUV as function of wavelength 20 p3613 A66-37275

Semiconductor-metal-semiconductor transistor performance in microwave circuits, noting current gain and impedance levels 20 p3527 A66-37402

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 20 p3620 A66-37691

Structure and properties of thin films in terms of deposition conditions, noting conditions for continuity, surface roughness, grain size, lattice defect density, crystalline orientation, purity, etc 20 p3621 A66-38087

Germanium damage due to low energy He, Ne, Ar and Kr ion bombardment 20 p3623 A66-38392

Transmission electron microscopic analysis of initial epitaxial growth stage of evaporated Au films on NaCl cleavage surfaces 21 p3798 A66-38758

Miniature assembly for obtaining thin metal and semiconductor cell films by vacuum-evaporation techniques 21 p3737 A66-38919

- diffuse boundary scattering as possible explanation for enhanced field effect in thin metallic films through polarization reversal ferroelectric 21 p3800 A66-38990
- temperature coefficient of resistance in metal films, using Sondheimer analysis vapor deposited Au, Ag and Cu 22 p3963 A66-40105
- axial germanium films on gallium nitride substrate by vacuum evaporation, considering surface 22 p3963 A66-40106
- electric resistance of amorphous iron as, noting film structure dependence on preparation parameters 23 p4110 A66-41138
- surface scattering of electrons on metallic and effect in thin layers in theory of in-free-path influences on conductance range 23 p4110 A66-41184
- enhancement of superconductivity and effect of crystallite size on transition temperatures of Al, Ga, Sn, In and Pb 23 p4111 A66-41262
- transmission coefficient and tunnel current for trapezoidal potential barrier calculated as function of applied voltage 24 p4254 A66-42385
- elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 24 p4257 A66-42732
- optical constants of triple, symmetrical absorbing thin film used with layer thickness to determine complex transmission coefficient 24 p4258 A66-42994
- thermoelectric power measurement method for thin bismuth lamella, obtaining better and Thomson coefficients 24 p4258 A66-43010
- transition temperature for superconductivity in superimposed films of tin and tin in which alloying between two metals is minimized 24 p4259 A66-43068
- MAL FOIL**
- interfacial metallic foils effect on thermal contact resistance [ASME PAPER 65-HT-44] 05 p0785 A66-14755
- neutron irradiation effect on superconductive properties of tin and tin foils at low temperatures, noting increase of critical temperature and yield strength 14 p2364 A66-27641
- laser beam energy profile determined by multiple-layer aluminum foil technique 16 p2719 A66-31217
- laser induced spontaneous electron emission from rear side of metal foils, noting electron energy vs laser energy pulse magnitude, etc 16 p2784 A66-31536
- reactive brazing alloys evaluated for aluminum alloy foil brazing in order to avoid erosion and embrittlement of conventional brazing 19 p3367 A66-36115
- thermoprotective coating of niobium-based and other refractory alloy metal 19 p3384 A66-36150
- aluminum foil and plastic film compared for wrapping aerospace hardware for moisture-vapor protection 22 p3922 A66-40038
- temperature measurements of laser sparks in relative intensity of X-ray flux transmitted through beryllium foils of different thickness 22 p3933 A66-40421
- MAL FORMING**
- EXPLOSIVE FORMING**
- plastic deformation of metals by high intensity ultrasonic waves, with application to industrial forming processes [ASME PAPER 650760] 05 p0773 A66-15003
- ultrasonic metal forming and metal and plastic assembly processes [ASME PAPER 650762] 05 p0687 A66-15004
- roll reduction diffusion bonding for sandwich structures based on solid state fusion process [ASME PAPER 650778] 05 p0687 A66-15006
- processing techniques in aircraft fabrication including explosive, electrohydraulic and magnetic forming 05 p0688 A66-15195
- estimation of die loads in impact forging of axially symmetric disks and flat slabs [ASME PAPER 65-WA-PROD-1] 05 p0691 A66-15636
- tungsten rocket nozzle manufacturing by casting, impregnation and deformation techniques 06 p0888 A66-17075
- Thin metallic end windows for pressure vessels produced by hydrostatic forming 07 p1040 A66-18493
- Fracture mechanics and amount of deformation metals can withstand subject to forming procedures 08 p1235 A66-18690
- Construction of hot forming tool made of fused silica ceramic 08 p1229 A66-18691
- Pressure forming of tungsten, molybdenum, titanium, beryllium and chromium composite 08 p1229 A66-18692
- Extrusion process for complex beryllium structures, noting die-wear problem 08 p1230 A66-18843
- Form rolling used to form L-shaped strips from L605 alloy for economical fabrication of supports for jet engine exhaust nozzles 10 p1545 A66-21220
- Microwave attenuation method of measuring parameters of motion of billet during sheet stamping 11 p1710 A66-22859
- Precision tube flaring for leakproof separable connector joints, using controlled metal displacement method, termed Dynafare [ASTME PREPRINT MF66-728] 12 p1887 A66-24424
- Forming of titanium alloy pellets which are extruded to make dense bars and composites, noting mechanical and tensile properties 14 p2310 A66-26832
- High pressure manufacturing methods including fluid-to-fluid extrusion, tube expanding, flange forming, shell drawing, etc [ASTME PAPER MF66-107] 14 p2299 A66-26948
- Ductility and production techniques of cross rolled beryllium sheet [SAE PAPER 660291] 14 p2313 A66-27287
- Stresses and rate of movement of metal during rolling of flat products 14 p2303 A66-28199
- Molten metal pressing products as affected by processing parameters 14 p2304 A66-28203
- Temperature of container heated during pressing aluminum alloy sections 14 p2304 A66-28204
- Titanium alloy sheet blanks prepared by stamping, considering gas media, temperature and preheating time 14 p2304 A66-28205
- Electroforming of large metal mirrors for aerospace application 15 p2509 A66-28823
- Powder metallurgy methods for obtaining products of complex form from sintered carbides 16 p2715 A66-31679
- Microquenched age-formed titanium alloys and titanium Bi-alloy composites, discussing production process using spherical particles produced by rotating electrode [SAE PAPER 660458] 17 p2940 A66-33164
- Equations of motion for inelastic large deformations of circular membranes subjected to blast loading, useful in metal forming 18 p3252 A66-33763
- Shape rolling applicability to refractory metals, examining effects of lubrication, pass design and temperature on reductions that can be taken 19 p3366 A66-36109
- Refractory metal forming processes including brake, roll, open and closed die forming, warm and hot forging, swaging, deep drawing, ironing, blanking and shearing 19 p3366 A66-36110
- Fabrication process for turning cast Cb-10W-10Ta alloy ingots into large-diameter rings by forging and ring rolling 19 p3366 A66-36111
- High-temperature compression process for producing VT15 titanium alloy tubes 19 p3371 A66-36448
- Mathematical engine for machining complicated shapes 20 p3563 A66-37766
- Magnetomotive forming noting strain rate effect on material deformation, applications to aerospace technology and magnetohydraulic vs electrohydraulic forming [ASME PAPER 66-MD-19] 21 p3742 A66-38480
- Critical bending angles of rollers used in shaping profiled rings and casings with titanium alloy flanges 23 p4075 A66-41794
- METAL FUEL**
- Hybrid fuel regression rate, discussing oxidizer flow rate and burner pressure interdependence
- [AIAA PAPER 66-113] 06 p0941 A66-16407
- METAL-GAS SYSTEM**
- Thermodynamics and Phase Relations, Volume 1, covering interaction of metals and gases 06 p0895 A66-16305
- Surface heat flux removal by lithium-sodium-mercury spray cooling, noting vaporization mechanism 07 p1151 A66-17586
- Spray transfer gas metal-arc welding of titanium plate, using flux backing technique 13 p2087 A66-26016
- Gas shielded metal arc welding, discussing power sources, wire feed mechanism, torch and carbon dioxide cylinders 13 p2088 A66-26764
- METAL HALIDE**
- Dissociation energies of chlorides of alkaline-earth metals determined from equilibrium reactions of metals with chlorine in flames 16 p2830 A66-31613
- METAL ION**
- Electrolytic deposition of copper and gold on germanium surface 09 p1338 A66-19896
- Meteoric atomic ions in lower ionosphere 17 p2922 A66-33355
- Positive ion composition in lower ionosphere, particularly D region, considering sources for water ions, stratification of metallic ions, etc 19 p3350 A66-36354
- METAL JOINT**
- SA SOLDERED JOINT**
- SA WELDED JOINT**
- Ultrasonic soldering and welding, noting contribution of vibrations to metal joining [SAE PAPER 650761] 01 p0078 A66-10837
- In situ ultrasonic testing of brazed hydraulic pipe joints in aircraft, noting superiority over radiography 01 p0079 A66-10973
- Correlation of microstructure, microhardness and microchemistry in resistance welded electronic leads 02 p0234 A66-11327
- Resistance microwelding process evaluated by IR energy measurements to determine mechanical strength of joint 02 p0234 A66-11328
- Laser welding evaluated with regard to performance and production application 05 p0686 A66-14692
- Thermal resistance across aluminum bolted joints in vacuum environment [ASME PAPER 65-HT-53] 05 p0785 A66-14759
- Strength of screw-connected aluminum alloys, noting screw grades, coatings, thread inserts required, etc 14 p2301 A66-27254
- Rate of setting of adhesive joints in relation to differential thermal contraction of adhesive polymers relative to metal adherend 17 p3019 A66-31986
- Microcircuit joining techniques advantages and disadvantages from viewpoints of producibility, inspectability and repairability 17 p2882 A66-32115
- Brazed lap joints between stainless steel and tantalum or Ta-10W alloy obtained with pure copper or silver-copper-base brazing alloys 19 p3367 A66-36112
- High-temperature brazing materials for niobium and tungsten with tensile-shear strengths in excess of 7000 psi at 2500 degrees F 19 p3367 A66-36114
- Joining of dissimilar metals such as molybdenum and tungsten by liquid-alloying diffusion-bonding method in which third metal is used for bonding at interface and removed by diffusion 19 p3367 A66-36116
- Exothermic brazing of refractory metals, tabulating braze filler metals that formed acceptable joints with molybdenum, tungsten and TZM alloy 19 p3367 A66-36117
- Fabrication techniques for preparation of ion emitter modules requiring high-temperature leak-free bond between porous tungsten ionizer and refractory metal plenum chamber 19 p3368 A66-36118
- Joining of 0.020-inch tungsten sheet by chemical vapor deposition, examining parameters of deposit thickness, time and absolute temperature 19 p3369 A66-36126
- Solid state bonding of molybdenum-0.5 percent titanium alloy and unalloyed molybdenum and tungsten by vacuum-hot-pressing technique, examining joint microstructure 19 p3369 A66-36127
- Electron beam welding suitable for joining tungsten sheet for fabrication of solid

rocket nozzles and nozzle accessories 19 p3369 A66-36128
 Sciaky electron beam welding equipment applications, including joining lengths of tubing for nuclear reactor 21 p3743 A66-38670
 Adhesives and joining processes in mechanical quality control 21 p3745 A66-39465
 Joining of materials for aerospace systems - National Symposium, Dayton, November 1965 22 p3923 A66-40255
 Joining processes effect on mechanical properties and metallurgical structure of beryllium 22 p3925 A66-40264
 Strength of joints made in refractory metals using brazing, welding or diffusion bonding, noting role of coating 22 p3925 A66-40265

METAL-METAL BONDING

Rhenium electrodeposition on molybdenum in study of adhesion as affected by heating, chromium codeposition and cracks 01 p0088 A66-10989
 Brazing and diffusion bonding of titanium alloys to similar and dissimilar materials in high vacuum or inert gas [SAE PAPER 650752] 05 p0687 A66-15001
 Techniques of joining aluminum to stainless steel for space vehicle application [SAE PAPER 650754] 05 p0701 A66-15002
 Thermionic converters, discussing resistant metal-bond use for collector-emitter insulation 05 p0622 A66-15590
 Aluminum alloy butt fusion welds, discussing ghost lack of fusion phenomenon mechanism, characteristics and causes 06 p0887 A66-16800
 Cobalt-vanadium-boron system, discussing phases with boron coordination number 8 07 p1047 A66-17225
 Metal-metal joining techniques for beryllium 08 p1230 A66-18846
 Surface treatment and coating for beryllium corrosion and surface damage 08 p1230 A66-18847
 Electrolytic deposition of copper and gold on germanium surface 09 p1338 A66-19896
 Tensile properties of composites of tungsten or molybdenum wire uniaxially aligned in copper matrix 09 p1393 A66-20661
 Effect of molybdenum, niobium and tungsten on structure and properties of nitrogen containing austenitic chromium-manganese steels 12 p1893 A66-23726
 Chemical behavior of metallic elements predicted by periodic table, noting formation of liquid and solid metallic solutions, binary and complex metalides and nature of chemical bond 12 p1896 A66-24897
 Fracture surfaces of metals and alloys examined, using optical and electron microscopy, noting fracture mechanisms during crack initiation and propagation 13 p2108 A66-25768
 Explosive cladding for strong metal-metal bonds [ASTME PAPER AD66-112] 14 p2299 A66-26951
 Strength of screw-connected aluminum alloys, noting screw grades, coatings, thread inserts required, etc 14 p2301 A66-27254
 Atomic site changes in cold pressure welding of metal 16 p2710 A66-30309
 Phase equilibrium of Nb-Al binary system determined via metallographic, X-ray diffraction hardness and thermal analysis techniques, noting solubility, structure, nucleation growth, etc 18 p3120 A66-33723
 Temperature, time and loading conditions for adhesion or cohesion of structural metals in vacuum 18 p3117 A66-34651
 Aluminum welding, examining internal defects such as porosity and metallurgical changes in heat effected zone [SAE PAPER 660292] 18 p3117 A66-34944
 Solution of Schrodinger equation for quantum mechanical reflection coefficient of electrons at metal semiconductor barriers 19 p3435 A66-35409
 Performance degradation and system failures in metal-metal, metal-oxide and metal-semiconductor systems 20 p3532 A66-37900
 Microbonding techniques such as thermocompression bonding, soldering, electrical resistance and ultrasonic welding, noting applicability in transistor

manufacture 23 p4043 A66-41190
 Microcircuit joints evaluated, using metallurgical process 23 p4072 A66-41192
 Thermocompression bonding, discussing aluminum wire connection to substrate material via eyelet bond 23 p4044 A66-41197
METAL OXIDE
SA ALKALINE EARTH OXIDE
 Multiband model for monoclinic and orthorhombic rhenium dioxide exhibiting Pauli paramagnetism and metallic type conductivity 01 p0127 A66-11084
 Properties of dispersion-hardened gold, copper and platinum alloys made by chemically and vapor plating metal onto particles of metal oxides 03 p0381 A66-12550
 Retardation of gallium and arsenic or phosphorus diffusion in silicon 05 p0736 A66-14976
 Insulators from high purity oxides used in nuclear thermionic power converters, tabulating refractory materials compatibility and noting thermal expansion, electrical conductivity, etc 05 p0714 A66-15592
 Fabrication and properties of translucent bodies of hot-pressed alumina, beryllia and magnesia with data on density, microstructure, thermoconductivity, etc 07 p1054 A66-18502
 Oxidation resistance enhancement in tungsten base alloys by addition of refractory metal oxide particles 10 p1547 A66-21783
 Formation of oxide films on metals using polarized light to measure film thickness and vibrating capacitor measurements of changes in Volta potential, noting extension of Mott theory 11 p1718 A66-23211
 Early interaction stages of metal oxides with carbon, using thermochromatographic method to determine temperature reaction onset 12 p1892 A66-23518
 Metal-ceramic boundary structures and reactions, considering metal-oxide and metal-glass interfaces, ionic and covalent bonds, oxidation, reduction, solution and precipitation 13 p2108 A66-25767
 Chemical composition and origin of moldavites, noting densities, refractive indices, oxide content, rubidium-strontium ratio, etc 13 p2187 A66-26234
 Thermal instability causes negative-resistance region in nonohmic point contact conduction in semimetals 16 p2769 A66-30155
 Continuous hot pressing apparatus design, operation, production economy and results with oxidic materials and metals 16 p2709 A66-30255
 Criteria for selection of mixed metal oxides that can be used as catalysts in oxygen-hydrogen batteries 17 p2871 A66-32949
 Performance degradation and system failures in metal-metal, metal-oxide and metal-semiconductor systems 20 p3532 A66-37900
 Diffusion process involving formation and subsequent migration of series of parallel shear planes within crystal for higher oxides of niobium, tungsten, molybdenum and titanium 22 p3934 A66-40011
 Cleaning and stabilization method for dispersion strengthened materials produced from mechanically produced blends of metals plus oxide powders 22 p3935 A66-40117
 CW laser action in holmium-doped erbium trioxide with dominant pumping by energy transfer between ions 24 p4222 A66-42555
 Chemical interaction among components of CdO, ZnO and PbO admixtures in ammonium perchlorate, noting effect on thermal decomposition 24 p4295 A66-43200
METAL OXIDE SEMICONDUCTOR /MOS/
 Metal oxide semiconductor /MOS/ integrated circuits 01 p0037 A66-10500
 Power dissipation as sum of quiescent power and transient power dissipation, considering n-channel metal-oxide-semiconductor and MOS complementary logic circuits 01 p0047 A66-11138
 Transient gamma radiation pulse effects on MOS field effect transistors 01 p0049 A66-11151
 Surface states at silicon-silicon dioxide interface studied by observing bias voltage dependence of differential capacitance of n-type MOS diodes 01 p0128 A66-11196

High density digital-storage element design using MOS transistor, noting parallel vs serial storage and delay line storage 02 p0194 A66-11933
 MOS transistor advantages in various digital integrated circuit applications 02 p0194 A66-11934
 Transmission-line model of insulated-gate field effect transistor /MOS transistor/ in pre-pinchoff mode, determining small signal response 02 p0205 A66-11980
 Evaluation of AC small signal impedance of semiconductor surfaces in connection with physics of MOS structures 03 p0408 A66-12443
 Capacitance-voltage characteristics of anodized InSb surface measured, using metal oxide semiconductor method 03 p0411 A66-13005
 Metal oxide semiconductor diodes as function of semiconductor parameters considering silicon, gallium arsenide, cadmium sulfide and indium arsenide 04 p0564 A66-14040
 Comparing VHF cascade circuits with double diffusion silicon planar transistors and metal oxide field effect planar transistors 04 p0501 A66-14133
 Silicon metal oxide semiconductor transistor as individual device and in integrated arrays 05 p0641 A66-14558
 Monolithic silicon integrated circuit technology noting thin film, insulating and conducting layers, microelectronics, MOS systems, etc 05 p0642 A66-14559
 Metal oxide semiconductor structures in integrated circuits as high and low resistances, inverters and AC amplifiers 05 p0643 A66-14569
 Noise in metal oxide semiconductor field effect transistors, using thermal noise activity in conducting channel 05 p0644 A66-14580
 Neutron irradiation induced changes in surface state density, substrate resistivity and carrier mobility of MOS transistor 05 p0734 A66-14851
 Instability of metal oxide silicon field effect transistors found due to sodium-ion migration 06 p0842 A66-16010
 Width of depletion region of reverse-biased silicon p-n junction 06 p0923 A66-16382
 Surface state density variations on metal oxide semiconductor capacitors due to gamma radiation 06 p0925 A66-16646
 Impurity redistribution effect on production of n-type inversion layers on surface of p-type bulk silicon during high temperature oxidation, noting tests on MOS capacitors 06 p0925 A66-16658
 Epitaxial metal-oxide-semiconductor transistor with tunable high-pass filter-type response characteristics with insertion gain in passband 06 p0857 A66-16959
 Capacitance-voltage curves in MOS devices indicating difference in relaxation time of surface states 06 p0940 A66-17163
 Ionizing irradiation effects on oxide covered silicon surface properties, measuring changes in inversion layer conductance 06 p0940 A66-17164
 MOS capacitance measurements, utilizing graphical relations between silicon surface parameters 06 p0940 A66-17165
 Radiation-induced leakage current across gate-to-substrate and drain-to-substrate semiconductor junction dominates behavior of MOS field effect transistors for small gate impedances 07 p1009 A66-18146
 Degradation of silicon dioxide coated silicon planar transistors after exposure to space-type ionizing radiation, using MOS structure 07 p1010 A66-18148
 Metal oxide semiconductor transistor noise levels between 30 and 1800 kc and 600 ohms to 100 kilohms source resistance 07 p1010 A66-18249
 MOS transistor and application to integrated circuits 07 p1012 A66-18274
 Equivalent circuit and DC characteristics derivation for MOS transistor in common-gate electrode arrangement 08 p1188 A66-18656
 Equivalent circuit and gain in single lumped approximation for MOS field effect transistor 08 p1189 A66-18660
 Small signal properties of field effect

- metal oxide semiconductor 24 p4185 A66-43030
- transistors 24 p4185 A66-43032
- Ideal curves of metal oxide semiconductor 24 p4185 A66-43032
- capacity and surface potential computed for 24 p4185 A66-43032
- silicon and oxide thickness and doping as 24 p4185 A66-43032
- parameter 24 p4259 A66-43103
- METAL PARTICLE
- Sedimentation rates of metallic particles in 24 p4259 A66-43103
- cyclohexane medium measured by light 24 p4259 A66-43103

absorption 01 p0069 A66-10750
 Photosedimentometer for recording light
 absorption along entire length of cuvette
 containing highly dispersed metal powder
 suspension 11 p1709 A66-23474

METAL PLATE

SA FLANGE

Dynamic indentation of metals with conical
 projectiles and dynamic tip flattening of
 projectiles, noting inertia and strain rate
 effect 02 p0243 A66-11691

Elastic impact and perforation of aluminum
 plates at minimal velocities by
 projectiles 05 p0775 A66-15299

Thin metallic end windows for pressure
 vessels produced by hydrostatic
 forming 07 p1040 A66-18493

Notch toughness of aluminum alloy sheet
 and plate with machine-edge and fatigue-
 cracked notches investigated according to
 ASTM practice 08 p1242 A66-19718

Oxygen and water vapor effects on
 propagation of fatigue cracks in aluminum
 alloy sheets 10 p1614 A66-21338

Electromagnetic wave scattering from 30
 degree metal wedge and thick plate over
 wide range of bistatic angles, comparing
 results with Keller geometrical theory of
 diffraction 10 p1503 A66-21644

Radar cross section of metal bodies
 covered by thin plasma calculated, using
 computer technique, noting modification of
 TE and TM mode reflection
 coefficients 10 p1503 A66-21645

Postbuckling behavior of metal plate strip
 subjected to opposing axial loads, using
 nonlinear bending theory

[ASME PAPER 65-AV-3] 11 p1780 A66-22470
 Welding characteristics of Ti-7Al-2Cu-1Ta
 plate including strength, toughness and
 cracking resistance 11 p1717 A66-22863

Self-oscillations of dielectric rods between
 two metallic plates 11 p1669 A66-23104

Heat treatment effect on structure,
 hardness, microhardness and corrosion
 resistance of VT1 titanium and OT4 titanium
 manganese-aluminum alloy
 sheets 12 p1897 A66-24900

Hydraulic resistance of air flow through
 porous steel plate 13 p2065 A66-26483

Biaxial behavior of titanium sheet,
 obtaining stress states, yield strength, burst
 strength, etc

[ASME PAPER 66-MET-6] 14 p2312 A66-26974

Underwater explosive stretch forming of
 clamped circular mild-steel blanks as
 affected by clamping ring and reflecting
 plate 16 p2709 A66-30268

RF size effect on ineffective electrons in
 magnetic field parallel to surface of
 cadmium plates studied by observing
 harmonic oscillations of
 impedance 16 p2772 A66-30289

Mechanical behavior of three-layer plates
 with honeycomb filler under longitudinal
 compression 16 p2817 A66-31049

Magnetic shielding between
 superconducting niobium tin plates in
 transverse magnetic field, noting flux jumps
 degradation and
 elimination 16 p2779 A66-31091

Electric potential method used to study
 slow crack growth in center-notched plate
 specimens 20 p3670 A66-37794

Line shape of RF dimensional effect in
 metals showing correlation with
 electromagnetic wave attenuation in skin
 layer 24 p4172 A66-42528

[ASME PAPER 66-MET-8] 14 p2312 A66-26976

Parameters in friction welding of dissimilar
 metals including armco iron, nickel, titanium
 and aluminum

[ASME PAPER 66-MET-8] 14 p2312 A66-26976

Reflectance measurements of metals
 described under ultrahigh vacuum
 conditions 15 p2499 A66-28846

Surface temperature determination
 procedure for laser heated metals based on
 heat conduction equations and ion emission
 from surface 15 p2514 A66-29035

Clean and oxygen-covered molybdenum
 /110/ surface analysis using low energy
 electron diffraction, noting various oxygen
 structures 16 p2721 A66-30109

Metal erosion by airborne quartz dust
 particles, using energy values as function of
 material, dust size, temperature, etc,
 influenced by surface layer of
 material 16 p2813 A66-30442

True contact surface of metals, examining
 dependence on macro- and microgeometric
 structure of surface

roughness 16 p2714 A66-30676
 Fast emitted and reflected particles during
 ionic bombardment of metallic surfaces,
 considering two-atom collision rules, light
 emission, ion scattering,
 etc 16 p2753 A66-30795

Effect of temperature gradient at surface
 of metal on thermionic emission
 current 16 p2778 A66-31079

Boundary conditions at interface between
 superconductor-superconductor and
 superconductor-metal 16 p2780 A66-31177

Absorbance and emittance of metal
 surfaces determined via cyclic incident
 radiation, noting error computation and
 method accuracy parameters
 [AIAA PAPER 66-416] 16 p2829 A66-31487

Metal behavior during hypervelocity
 cratering, noting momentum and energy
 equations for impulsive loading, including
 anisotropic stress and strain rate tensors,
 etc 17 p3022 A66-32013

Changes of surface optical properties of
 metal surfaces determined through
 equilibrium temperature measurements in
 space flight experiments 17 p3033 A66-32463

Transition radiation in optical region of
 spectrum for case of oblique incidence of
 nonrelativistic electrons on metal
 surface 19 p3399 A66-35593

Reduced blackness coefficients measured
 for coaxial system of tungsten-molybdenum
 surfaces by calorimetric
 method 20 p3674 A66-36984

Thin insulating Teflon film bonding to
 internal surface of space cryopanels for
 increased heat transfer and faster
 cooling 20 p3677 A66-37100

Visible and UV transition radiation,
 bremsstrahlung and plasma due to electron
 bombardment of metal
 surfaces 20 p3604 A66-37280

Electron and ion emission from
 polycrystalline surface of Be, Ti, Cr, Ni, Cu,
 Pt and type-304 stainless steel in cesium
 vapor 20 p3623 A66-38400

Vacuum thermionic work function for well-
 outgassed polycrystalline surfaces, noting
 techniques for accurate measurement of
 current, area and temperature
 values 20 p3587 A66-38401

Energies of ions generated from metal
 surface irradiated by single giant pulse
 laser 20 p3582 A66-38412

Criticism of article on microparticle impact
 effect on metal optical
 properties 21 p3818 A66-38737

Plasmods reflection from metallic surface,
 using fast particle beam-probing
 techniques 21 p3787 A66-39050

Coverage dependent evaporative lifetimes
 of various metals and oxygenated W ribbon
 filaments at high
 temperatures 22 p3934 A66-40097

Surface temperature measurement of metal
 body by electromagnetic effects,
 metallurgical techniques and miscellaneous
 techniques 23 p4067 A66-41199

Bidirectional reflectance characteristics of
 rough sintered metal and wire screen
 surface systems
 [AIAA PAPER 66-19] 23 p4150 A66-41893

Micrometeoroid environment effect on
 metal surface thermal properties, using

Strengthening metals by using oxide fibers
 as reinforcements 05 p0700 A66-14816

Metal fiber reinforced
 ceramics 05 p0705 A66-14817

Mechanical properties of alloys with aging
 martensite 05 p0701 A66-14860

Chromium nickel steel hardening as result
 of martensitic transformation and
 aging 05 p0701 A66-14861

Fiber orientation effect on ultimate tensile
 strength of aluminum-steel-silica fiber-
 reinforced metals 12 p1896 A66-24533

Metal hardening by explosive loading
 under near triaxial compression determined
 by charged power and independent of
 plastic deformation 15 p2523 A66-29599

Metallic and nonmetallic whiskers for
 reinforcing metal
 composites 21 p3752 A66-39241

Ceramic fiber reinforcement of steel,
 aluminum, nickel and titanium
 alloys 21 p3752 A66-39242

Whisker reinforcement of metals and
 effects on linear elastic stress-strain
 relations 21 p3752 A66-39367

METAL SHELL

Spherical elastoplastic waves in expansion
 of spherical cavities in impulsively loaded
 thick metal spheres 02 p0300 A66-11853

Prestressing effect on strength of glass
 fiber reinforced metal
 shells 17 p2939 A66-32048

Plastic deformation in hollow metal
 cylinder by rapidly varying axial magnetic
 field, calculating time dependence assuming
 substance is rigid and
 plastic 19 p3475 A66-36602

METAL SURFACE

Heat transfer between metallic surfaces in
 contact
 [AIAA PAPER 65-661] 01 p0086 A66-10599

Surface roughness and loading effect on
 actual contact surface of
 metals 01 p0079 A66-11062

Discharge in large radius cylindrical hollow
 cathodes with uniform plasma layer above
 flat end face investigated
 experimentally 02 p0199 A66-11812

Interfacial metallic foils effect on thermal
 contact resistance
 [ASME PAPER 65-HT-44] 05 p0785 A66-14755

Energy and intensity of ions emitted by
 metal target as function of characteristics of
 laser and nature of metal 05 p0697 A66-15109

Bidirectional reflectance characteristics of
 rough sintered metal and wire screen
 surface systems
 [AIAA PAPER 66-19] 07 p1153 A66-17884

Correlations for reflected energy based on
 bidirectional reflectance data of roughened
 surfaces
 [AIAA PAPER 66-20] 07 p1080 A66-17885

Helicon wave propagation in metals,
 discussing experimental techniques and
 results 07 p1102 A66-18208

Replica techniques and electron and optical
 microscopy to study laser irradiated metal
 surfaces 07 p1052 A66-18393

Effective boundary conditions for interface
 between superconducting and normal
 metals 08 p1269 A66-18980

Threshold and optimum conditions of
 positive surface ionization of two metal-
 layer systems, considering ion current and
 ion absorption heat 08 p1264 A66-19194

Surface plasma wave dispersion in metals,
 noting method for solving Kulik
 equation 09 p1389 A66-20615

Electron and ion emission from pulsed
 ruby laser illuminated metallic surface into
 vacuum, determining application to pulsed
 ion thruster
 [AIAA PAPER 66-230] 10 p1542 A66-21453

Analytical techniques for estimating
 backscattering cross section of metal
 spherical target 10 p1497 A66-21593

Structural changes in metal surface layers
 under boundary friction conditions in
 presence of surface active lubricant
 additives 13 p2086 A66-25884

Subsonic business aircraft manufacturing
 processes and techniques relation to
 production time and costs
 [SAE PAPER 660206] 13 p2087 A66-26395

Plasmod impact effects on metallic surface
 studied by corpuscular plasma
 diagnostics 13 p2153 A66-26527

Parameters in friction welding of dissimilar
 metals including armco iron, nickel, titanium
 and aluminum

[ASME PAPER 66-MET-8] 14 p2312 A66-26976

Reflectance measurements of metals
 described under ultrahigh vacuum
 conditions 15 p2499 A66-28846

Surface temperature determination
 procedure for laser heated metals based on
 heat conduction equations and ion emission
 from surface 15 p2514 A66-29035

Clean and oxygen-covered molybdenum
 /110/ surface analysis using low energy
 electron diffraction, noting various oxygen
 structures 16 p2721 A66-30109

Metal erosion by airborne quartz dust
 particles, using energy values as function of
 material, dust size, temperature, etc,
 influenced by surface layer of
 material 16 p2813 A66-30442

True contact surface of metals, examining

 structure of surface

roughness 16 p2714 A66-30676

Fast emitted and reflected particles during
 ionic bombardment of metallic surfaces,
 considering two-atom collision rules, light
 emission, ion scattering,
 etc 16 p2753 A66-30795

Effect of temperature gradient at surface
 of metal on thermionic emission
 current 16 p2778 A66-31079

Boundary conditions at interface between
 superconductor-superconductor and
 superconductor-metal 16 p2780 A66-31177

Absorbance and emittance of metal
 surfaces determined via cyclic incident
 radiation, noting error computation and
 method accuracy parameters
 [AIAA PAPER 66-416] 16 p2829 A66-31487

Metal behavior during hypervelocity
 cratering, noting momentum and energy
 equations for impulsive loading, including
 anisotropic stress and strain rate tensors,
 etc 17 p3022 A66-32013

Changes of surface optical properties of
 metal surfaces determined through
 equilibrium temperature measurements in
 space flight experiments 17 p3033 A66-32463

Transition radiation in optical region of
 spectrum for case of oblique incidence of
 nonrelativistic electrons on metal
 surface 19 p3399 A66-35593

Reduced blackness coefficients measured
 for coaxial system of tungsten-molybdenum
 surfaces by calorimetric
 method 20 p3674 A66-36984

Thin insulating Teflon film bonding to
 internal surface of space cryopanels for
 increased heat transfer and faster
 cooling 20 p3677 A66-37100

Visible and UV transition radiation,
 bremsstrahlung and plasma due to electron
 bombardment of metal
 surfaces 20 p3604 A66-37280

Electron and ion emission from
 polycrystalline surface of Be, Ti, Cr, Ni, Cu,
 Pt and type-304 stainless steel in cesium
 vapor 20 p3623 A66-38400

Vacuum thermionic work function for well-
 outgassed polycrystalline surfaces, noting
 techniques for accurate measurement of
 current, area and temperature
 values 20 p3587 A66-38401

Energies of ions generated from metal
 surface irradiated by single giant pulse
 laser 20 p3582 A66-38412

Criticism of article on microparticle impact
 effect on metal optical
 properties 21 p3818 A66-38737

Plasmods reflection from metallic surface,
 using fast particle beam-probing
 techniques 21 p3787 A66-39050

Coverage dependent evaporative lifetimes
 of various metals and oxygenated W ribbon
 filaments at high
 temperatures 22 p3934 A66-40097

Surface temperature measurement of metal
 body by electromagnetic effects,
 metallurgical techniques and miscellaneous
 techniques 23 p4067 A66-41199

Bidirectional reflectance characteristics of
 rough sintered metal and wire screen
 surface systems
 [AIAA PAPER 66-19] 23 p4150 A66-41893

Micrometeoroid environment effect on
 metal surface thermal properties, using

ulated space vehicle placed in solar
ce environment chamber
AA PAPER 65-138] 23 p4140 A66-41894
ysical principles of phase sensitive eddy-
ent method of detecting surface cracks
metal products 24 p4218 A66-42898
ase-sensitive eddy current method of
ecting surface cracks in metal products,
ining construction and operating
ciples of flaw 24 p4218 A66-42899
AL VAPOR
lar wind study by observing effect on
ificially produced clouds of barium and
ntium compounds 07 p1029 A66-17833
tanium vapor pressure determined from
poration rate of titanium from titanium-
plum wire electrically heated in
um 09 p1391 A66-20865
eat transfer during film condensation of
id metal vapor, discussing thermal
istance effect of condensation coefficient
ME PAPER 65-HT-29] 11 p1784 A66-22182
omic frequency standard fluctuation,
ability due to noise and atomic beam
quency stability 12 p1881 A66-24125
ngitudinal magnetic field reduction of
wth rate of gravitational type
eleration instability of liquid metal by
or 17 p2967 A66-32452
umina high temperature gas discharge
or for investigation of pulsed metal vapor
er oscillations 19 p3374 A66-35810
aser radiation effect on metals, noting
integration mechanism, indentation
mation and vapor 22 p3930 A66-39763
ransverse separation of rare gas-metal
or mixture components in positive
isothermal plasma column in plain-
metric glow discharge 22 p3958 A66-40934
ercury, cesium and rubidium vapors
ization in intense radiation flux by Q-
tched ruby laser 23 p4076 A66-41156
uzzle design using liquid metal vapor
ondensation Mach number as design
ameter 24 p4294 A66-42786
AL WORKING
BRAZING
CUTTING
FINISH
FORGING
FORMING
GRINDING
HARDENING
MELTING
SHOT PEENING
SPRAYING
train ratio measurements from uniaxial
sion tests predicting metal sheet
ormance during pressing, considering
stal deformation 01 p0086 A66-10411
ltrasonic cutting tools abrasive supply
stem modification for efficiency
crease 01 p0078 A66-10653
antalum extraction and technology
luding properties, machining, cladding
l welding, noting chemical plant
lication 02 p0244 A66-11737
eryllium technology noting fabrication
thods, physical and mechanical properties,
icity, low transverse ductility,
lication, etc 02 p0244 A66-11739
old deformability of alpha-titanium alloys
ring strip rolling, showing temperature
crease of incipient recrystallization of
anium-aluminum alloys 05 p0699 A66-14699
elation between hardness and ultimate
ength of tungsten and molybdenum over
e temperature range 06 p0897 A66-16698
eformation criteria for cold and hot
rking of metals applied to titanium
ys 06 p0888 A66-17071
agnetic-pulse working of metals based on
rent surge in coil inducing magnetic field
generate electric current in metal articles
und coil 06 p0888 A66-17073
electrochemical shaped-electrode method
machining complex shapes compared to
ventional method by three-dimensional
ying 08 p1228 A66-18624
ection, design and utilization of
ectrical discharge 08 p1229 A66-18688
chine
elting and casting techniques in
ification and production of beryllium,
cussing vacuum induction and
ots 08 p1230 A66-18841

Beryllium rolling and sheet metal
fabrication, discussing billetting and
temperature conditions in foil
manufacture 08 p1230 A66-18842
Forging techniques for vacuum hot-pressed
unclad beryllium metal billets, noting
temperature effect 08 p1230 A66-18845
Effect of conditions of fabrication of
alloyed contacts between semiconductors
and metals on dislocation structure of these
contacts 08 p1274 A66-19315
Book on compound plastic deformation of
layers of different metals during mechanical
processing 09 p1465 A66-19948
Columbium and tantalum alloy tubing
production for space power systems
including extruding, rocking, annealing, flow
diagram, etc 12 p1893 A66-23627
Ultrasonic cutting tools abrasive supply
system modification for efficiency
increase 12 p1885 A66-24013
Mechanical deformation used in fabrication
of composite made of continuous columbium
wires in copper matrix by drawing, noting
optical inspection 12 p1895 A66-24378
Hydrogen embrittlement or fatigue
strength loss avoidance in overhauling and
repairing of high strength aircraft steel
component 13 p2087 A66-26284
High speed milling of titanium alloys,
discussing cutting velocities, feed rates, tool
wear, etc
[ASTME PAPER MR66-151] 14 p2299 A66-26952
Electrochemical machining at speed and
control useful to shaping metal parts,
analyzing electrolyte composition,
temperature, pressure, voltage, penetration
rate, etc
[ASTME PAPER MS66-156] 14 p2299 A66-26954
Tooling and manufacturing technique and
requirements for controlled removal of
metal by chemical and electrochemical
processes
[ASTME PAPER MR66-165] 14 p2300 A66-26957
Electrochemical machining, discussing
relationship between total current, applied
potential, electrolyte flow rate, electrolyte
conductivity and electrode gap
[ASME PAPER 66-PROD-5] 14 p2300 A66-26978
Forging and hot working of SAP samples
containing 6-10 percent aluminum
oxide 14 p2303 A66-28192
Stamping behavior of clad sintered
aluminum powder /SAP/ sheet, obtaining
coefficients for permissible bending,
drawing and flanging, noting cold working
possibilities 14 p2303 A66-28193
Structure and mechanical properties of
rolled aluminum clad products obtained
from SAP, noting microstructural
flaws 14 p2303 A66-28194
Pressure distribution of metal on rolls
during rolling process 14 p2303 A66-28200
Hot rolling behavior of ingots of titanium
alloy with additions of Al, V, Mo and
Zr 14 p2304 A66-28201
Metal flow, friction and lubricant
performance during stamping of thin
titanium alloy blanks 14 p2304 A66-28202
Hot pressing technology applied to various
metal alloys, noting physical, thermal and
electrical properties 16 p2714 A66-30626
Extrusion spinning method for fabricating
refractory metals such as tungsten provides
maximum material yield compared to normal
tube extrusion processes 19 p3369 A66-36129
Deformation modes and wrinkling of flange
on shear spinning to determine optimum
working conditions or spinnability of sheet
metal 20 p3575 A66-38104
Quenching, annealing and high temperature
treatment effect on transverse rupture
strength of sintered tungsten carbide
[ASME PAPER 66-MD-17] 21 p3750 A66-38478
Laser machining, discussing hole drilling,
microwelding metal removal and application
to hard brittle materials
[ASME PAPER 66-MD-28] 21 p3742 A66-38484
Laser application as measuring equipment
in metal working, discussing surface-grazing
interferometer, feedback laser device and
length measuring laser

[ASME PAPER 66-MD-43] 21 p3742 A66-38491
Electrochemical machining advantages over
electrical discharge machining and
traditional machining
processes 21 p3743 A66-38669
Nickel-cobalt-molybdenum maraging steels
mechanical properties, costs, machining,
etc 21 p3751 A66-39236
Maraging steels for landing gear forgings,
noting fabrication, distortion and fatigue
tests 21 p3751 A66-39237
Titanium alloys with additions of beta
stabilizing elements for SST application,
noting fabrication
problems 21 p3751 A66-39238
Beryllium properties and application in
aerospace noting alloy sheet fabrication,
temperature effect, toxicity, impact tests,
etc 21 p3752 A66-39239
Refractory metals, noting precipitation and
dispersion hardening, oxygen, nitrogen and
hydrogen effect, machining, coating,
etc 21 p3752 A66-39240
Book on 'aluminum alloys covering
mechanical properties, contact welding,
manufacturing, cold deformation,
etc 22 p3936 A66-40876
Effect of technological factors on quality
of semifinished pressed products of
aluminum alloy 22 p3936 A66-40879
Machining conditions and techniques used
in producing tungsten jet pipe neck,
detailing equipment 23 p4074 A66-41651
Chemical and electrical energies in
manufacturing noting role of numerical
control, hydrostatic processes, forming,
electrochemical machining,
etc 24 p4217 A66-42336
Analog and digital controls used in
electron beam welding and metal working
machinery including electron beam milling
machine 24 p4217 A66-42345
Dislocation arrangement and twin fault
formation by quenching and tempering in
titanium-tantalum alloy investigated by
internal friction measurement and
microscopy 24 p4228 A66-42511
METALLIC PLASMA
Metallic plasma tube for ion lasers allows
them to run at higher current densities than
with ceramic tubes 02 p0239 A66-11373
Inhomogeneous thick plasma layer formed
above metallic surface, effect on reflection
and absorption of electromagnetic
waves 09 p1347 A66-20788
Plasma temperature determination from
emitted UV radiation in metallic plasma
formed by laser heating 13 p2154 A66-26592
Excitation of Alfvén waves in semimetal
plasma at low temperature, noting wave
propagation below plasma or cyclotron
frequency in magnetic
field 14 p2363 A66-27516
Metal plasma jet injection into vacuum,
determining mean time-dependent
parameters of motion 21 p3791 A66-39083
Inhomogeneous thick plasma layer formed
above metallic surface, effect on reflection
and absorption of electromagnetic
waves 22 p3862 A66-39847
METALLOGRAPHY
Metallographic polishing procedures used
to reveal failure modes in gold-aluminum
thermoccompression bonds 01 p0049 A66-11153
Tracer diffusion measurements in beta
titanium covering Arrhenius plots,
monovacancy and divacancy diffusions and
new data for Sc-46, Sn-113 and
P-32 03 p0382 A66-12939
Welding technology and metal testing -
Conference, Timisoara, Rumania, September
1965, Volume 2 03 p0383 A66-13156
Austenitic chromium-nickel-manganese
steel, describing temperature effects on
crystal structure and experimental
techniques 05 p0704 A66-15819
Light and electron microscopic
metallography and X-ray diffraction
microanalysis of phase reaction during heat
treatment of Ni-base
superalloy 08 p1236 A66-18757
Metallography of cadmium crystals with
copper impurities obtained by sublimation
from copper powder, noting that copper
solubility is limited 08 p1277 A66-19623
Canyon Diablo meteorite examined, using
mass spectrometry and metallography,

noting shock effects 09 p1447 A66-19880

Metallographic technique for encapsulating char layers of plastics tested under reentry conditions to preserve them for microscopic examination 10 p1545 A66-21223

Microstructure viewed on several different successive parallel planes simultaneously, using multiple positive or negative transparencies, obtaining three-dimensional photomicrograph 12 p1892 A66-23626

Carbide formation from beta-titanium and graphite 12 p1895 A66-24377

Grain growth from solution precipitation and grain coalescence in liquid phase sintering of W-Ni-Fe and W-Ni-Cu alloys 17 p2939 A66-32393

Metallography of cadmium crystals with copper impurities obtained by sublimation from copper powder, noting that copper solubility is limited 17 p2984 A66-33137

Phase equilibrium of Nb-Al binary system determined via metallographic, X-ray diffraction hardness and thermal analysis techniques, noting solubility, structure, nucleation growth, etc 18 p3120 A66-33723

Ti-Be system phase diagram, noting solubility and formation of eutectoid and eutectic 18 p3121 A66-33725

Propagation of stacking faults in fcc metals, noting effect of frictional force in cutting through attractive tree and subsequent dipole formation 18 p3258 A66-34631

State diagram structure of Ti-Cu system examined, using metallographic, thermographic, X-ray and microhardness analyses 20 p3584 A66-37419

Nondestructive ultrasonic testing in machine and boiler construction engineering, noting material properties and behavior of parts, flaw detection, etc 21 p3743 A66-38939

Vacuum system of ion microprobe mass spectrometer noting design criteria, operation and results 24 p4215 A66-43162

METALLURGY

SA FRACTOGRAPHY

SA POWDER METALLURGY

Present status of titanium research and development noting electronic structure, dislocation theory and alloy theory 02 p0242 A66-11525

Welding technology and metal testing - Conference, Timisoara, Rumania, September 1965, Volume 1 03 p0374 A66-13116

Book on physical metallurgy 04 p0537 A66-14381

Laser welding evaluated with regard to performance and production application 05 p0686 A66-14692

Fiber composite materials - ASM Seminar, Metals Park, Ohio, October 1964 05 p0700 A66-14807

Thermodynamics and Phase Relations, Volume 1, covering interaction of metals and gases 06 p0895 A66-16305

Book on metal testing at high temperatures including tension, relaxation, compression, impact, nonsteady conditions, hardness, etc 06 p0966 A66-16561

Yield strength of tungsten at various test temperatures by assessing contribution of certain treatment effects separately from carbon effects 08 p1237 A66-18763

Research trends of commercial beryllium as affected by physical and alloy properties 08 p1238 A66-18853

Metallurgical factors for materials in jet engines, considering ductility, strength loss, strain-cycling criteria, etc [SAE PAPER 660057] 09 p1388 A66-20155

SAE handbook, 1966, supplies definitions, testing methods, measurement methods and data for engineering materials, machine elements and vehicle components 10 p1540 A66-21700

Book on niobium alloys including binary and ternary alloys, physical, chemical and mechanical properties, electron structure, heat treatment, resistance, etc 12 p1893 A66-23654

Book on refractory metals and cemented carbides /hard metals/, discussing pressing and sintering techniques, testing methods, properties under stress, etc 12 p1893 A66-23739

Viscoelastic constant of four metals drawn into wire 13 p2111 A66-26754

Industrial technology and cost estimate of

chemical machining metal removal process [ASTME PAPER MR66-155]

14 p2299 A66-26953

Book on titanium covering extraction processes, commercial manufacture and fabrication, cost estimates, marketing, etc 15 p2521 A66-28883

Soviet papers on plastic deformation of metals 15 p2510 A66-29776

Stress corrosion, delayed failures, fatigue corrosion and relation between these phenomena - Commissariat on Atomic Energy, Metallurgical Colloquium, Cadarache, Rhone, France, June 1964 17 p2941 A66-33440

Refractory metals and alloys - Conference, Los Angeles, December 1963 19 p3364 A66-36104

Technological, physical, mechanical and heat resistance properties of new titanium alloy developed on titanium aluminide 23 p4082 A66-41823

METAMORPHISM

Argon diffusion from biotite of mica schist due to intrusion of dyke analyzed on basis of thermal metamorphism and isotope migration 14 p2384 A66-27848

METASTABLE ATOM

Time-resolved spectroscopic measurement of absolute intensity, spectral profiles and self-absorption for He I lines in early helium afterglow 03 p0396 A66-12307

Terrestrial helium loss by speculated reaction between helium metastables and oxygen atoms 05 p0669 A66-14940

Superconductivity of gallium metastable phase, noting transition temperature and critical field 08 p1267 A66-18649

Detection by coincidence counting techniques of two-photon decay of metastable state of singly ionized helium 09 p1404 A66-20290

Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser substance 10 p1544 A66-22027

Molecular oxygen dissociation resulting from collisions with neon and argon metastable atoms in auroral afterglow 11 p1696 A66-22419

Measurement of total cross section for excitation of metastable atoms of helium by electron bombardment 13 p2135 A66-26266

Optical pumping in ground states and metastable atomic states 14 p2305 A66-26963

Helium-neon laser afterglow and metastable helium atoms under long pulse excitation 14 p2307 A66-27335

Degree of excitation of metastable state determined, using luminescence saturation phenomenon, calculating population of working level of laser substance 16 p2718 A66-30846

Metastable phase composition diagram for alloys of titanium-chromium system 16 p2727 A66-31567

Rate of diffusion disintegration of metastable helium atoms in decaying helium plasma at very low temperatures, with excitation by electrodeless method 18 p3142 A66-33940

Individual efficiency curves for excitation of two metastable electron energy states of helium by electron impact 18 p3139 A66-34504

Retarding potential measurement of kinetic energy of electrons released in Penning ionization by excited helium atoms in metastable electron states 18 p3139 A66-34505

Auroral spectrum emission intensity in upper atmosphere used to determine densities of metastable atoms and molecules and rates of dissociation and ionization 19 p3350 A66-36353

Magnitude of Hanle effect of neon atoms emitted by laser dependence on excitation discharge intensity explained by multiple coherent diffusion at metastable level 20 p3577 A66-37409

Mechanical and physical effects of metastable phases arising during hardening of titanium alloys containing transition elements 20 p3585 A66-37699

Free radicals and metastable molecules produced by short-duration pulsed electrical discharges studied by mass spectrometer, using collision-free molecular-beam sampling

system 22 p3949 A66-39909

Quenching of metastable states by atmospheric particles on basis of rocket measurements of dayglow, noting quenching coefficients of oxygen 22 p3916 A66-40872

Fractional metastable-state population measurements of Cr ions in ruby crystal under Q-switching operation 23 p4077 A66-41288

Detecting concentration of nitric oxide in metastable state in upper atmosphere, using giant-pulse Raman laser sources 24 p4203 A66-43022

METEOR

SA ASTEROID

SA CEPHEID

SA LEONID METEOR

SA PERSEID METEOR

SA RADIO METEOR

SA SPORADIC METEOR

Radio-echo observations of sporadic meteors at 68-cm wavelength 03 p0424 A66-12677

Meteor observation over Poland pertaining to sightings from 1921 to 1937 03 p0428 A66-13033

Calculating meteor braking from theoretical and observational data, showing braking dependence on zenith distance 04 p0577 A66-13844

Meteor radiation curves showing that integral radiation calculated for nondisintegrating meteoric body is greater than observed radiation 04 p0577 A66-13845

Radar observation of individual radiants and meteoric velocities, noting two types of orbit for small meteoric bodies in solar system 04 p0577 A66-13880

Meteor photography by instantaneous exposure technique, effective tool for studying shape, dimensions and brightness distribution 05 p0759 A66-14889

Radio measurement of radiants, velocities and altitudes of meteors at inclined trajectory using transmitter and two distantly separated receivers 05 p0759 A66-14889

Improved photographic images of meteors, using method of instantaneous exposure 05 p0681 A66-15218

Meteoritic material investigation using rocket and satellite measurements 05 p0761 A66-15228

Time interval distribution of Perseid radio meteors 07 p1134 A66-17523

Instrumental effects distorting data of telescopically observed meteors analyzed by simultaneous observation with various binocular telescopes and naked eye 07 p1135 A66-17635

Connection between occurrence of auroral green line of atomic oxygen and head echo by meteors suggests common mechanism for both phenomena 07 p1135 A66-17636

Tape recording meteor diffraction characteristics from three stations by measuring velocities and orbits of individual meteors by radio 07 p1032 A66-17637

Sodium and aluminum content in Pribram meteor measured and compared with other fallen meteorites 07 p1135 A66-17639

Total duration of meteoric radio reflections and space factor at wavelength of 10 m 08 p1299 A66-19795

Lunar influence in terrestrial meteor rates investigated for unusual periodicities by spectral analysis of meteor rate data 11 p1775 A66-23140

Absolute stellar magnitude of meteor determined from duration of meteor radio echoes of unstable type 12 p1945 A66-23512

Upper atmosphere temperature, pressure and density determined by photographic observations of meteors, based on calculating height of homogeneous atmosphere 12 p1870 A66-24291

Radar observation of individual radiants and meteoric velocities, noting two types of orbit for small meteoric bodies in solar system 14 p2382 A66-27570

Pressure waves recorded in India associated with Tunguska and Sikhote-Alin meteor explosions 15 p2485 A66-29064

Meteor luminescence during atmospheric motion, obtaining radiation coefficient as function of cross sections of particle excitation and pulse transfer processes 15 p2596 A66-29143

- eaking fireball of January 14, 1965, 15 p2601 A66-29939
 zing position, motion and
 itness 15 p2601 A66-29939
 nderlike acoustic effects associated
 extinction of 16 p2796 A66-30272
 ors 16 p2796 A66-30272
 ocity dependence of meteor luminous
 iency evaluated, using statistical
 isis
 A PAPER 66-515] 16 p2805 A66-31482
 mmary of meteors and meteorites on
 n and in solar system from various
 rvational techniques 17 p2998 A66-32027

 ster micrometeoroid sampling payload
 ched during Leonid meteor shower
 ember 16, 1965 at White Sands Missile
 ge 15 p2604 A66-30066
 Aerobee rocket measurement in sampling
 of micrometeoroid debris during peak of
 Leonid meteor shower 15 p2605 A66-30068
 Effect of meteor activity on fading of
 radiowave reflected from E
 region 16 p2692 A66-30331
 Radio-echo observation of Perseid meteor
 shower during August 1962, studying
 distribution of radio magnitude as function
 of solar longitude 16 p2694 A66-30642
 Radar echo range distribution determined
 from meteor stream
 measurements 17 p3004 A66-32964
 Radio echo observations of Geminid meteor
 shower during December of 1962 and
 1963 23 p4125 A66-41065
 Meteor stream effect on atmospheric
 electric field variation 24 p4198 A66-42327
METEOR TRAIL
 Meteor wake diffusion model used for data
 interpretation on radio wave dispersion due
 to wake produced by Mariner VI capsule
 landing 04 p0481 A66-13847
 Index s determination from mass duration
 distribution of unstable radio echoes from
 meteor trails 05 p0759 A66-14883
 Photographic and radar observations of
 meteors, discussing pulse coherent
 techniques for studying ionospheric drifts
 and winds 05 p0761 A66-15227
 Amplitude and duration distribution for
 underdense echoes from lognormally
 distributed meteor trails 07 p1135 A66-17638
 Height and velocity effect on initial radii
 of ionized meteor trails from general
 amplitude-time characteristics of radio
 echoes at two
 wavelengths 08 p1290 A66-19030
 Meteor trail formation by ionization,
 examining HF radio wave reflection in
 communications field 12 p1947 A66-23795
 Meteors and meteorites, discussing swarms,
 velocities and spectra 12 p1948 A66-23909
 Continuous measurement of ionospheric
 winds based on observation of meteor
 trails 13 p2072 A66-25449
 Meteor luminosity/ionization ratio
 dependence on air density found through
 analysis of ablation rate of
 meteor 14 p2387 A66-28172
 Theoretical determination of distribution
 of duty cycle and comparison with
 experimental observations of signal
 scattering on meteor
 trails 14 p2388 A66-28340
 Specifications and component parts of 20-
 kw meteor trail detection and observation
 radar equipment 16 p2654 A66-31004
 Direct phase technique for studying
 polarization phenomena associated with
 reflections of radio waves from meteor
 trails 16 p2655 A66-31543
 Radar echo range distribution determined
 from meteor stream
 measurements 17 p3004 A66-32964
 Cometary tail phenomena interpreted,
 using plasma dynamics theory coupled with
 observed solar wind 17 p3011 A66-33390
 Solar wind and type I comet tails, noting
 solar wind and plasma velocities as
 compared with Mariner II
 measurements 17 p3012 A66-33391
 Dynamics of type II comet trails, noting
 physical analogy in head and trail with
 rarified partially ionized
 gas 17 p3012 A66-33392
 Cometary trail classification using
 Bredikhin method, noting
 spectrophotometric data on meteoritic
 microstructure 17 p3012 A66-33393
 Tail of Tomita-Gerber-Honda /1964 c/
 comet, noting importance of spacecraft
 measurement of solar wind plasma
 direction 17 p3012 A66-33394
 Comet Moorhouse III photographic analysis,
 noting tail motion, composition, angular
 motion of rays, etc 17 p3012 A66-33395
 Type I comet trail relation to interaction
 of solar wind with geomagnetic field, noting
 tail ray formation mechanism, interplanetary
 plasma measurements, 17 p3012 A66-33396
 Comet gas trail connection with
 interplanetary plasma and solar activity,
 noting agreement of results with Mariner II
 measurements 17 p3012 A66-33397
 Comet Humason photographic analysis
 noting tail movement, curvature and
 emanation of lateral jets 17 p3012 A66-33398
 IR photometric measurement of Comet
 1965f, noting absolute intensity dependence
 on distance from Sun, tail intensities and
 nature of particle
 emissions 21 p3816 A66-39557
 Initial radius of ionized meteor track,
 taking into account dependence of effective
 diffusion cross section of meteor atoms in
 atmosphere on relative
 velocity 22 p3984 A66-40765
METEORITE
 SA ACHONDRITE
 SA ASTEROID
 SA BRUDERHEIM METEORITE
 SA CARBONACEOUS METEORITE
 SA CHONDRITE
 SA ELEMENT ABUNDANCE
 SA IRON METEORITE

 Volcanic vs meteoritic origin of lunar
 craters, discussing survival advantages in
 lunar landing 22 p3980 A66-40398
 Chainpur and similar, apparently primitive,
 chondritic meteorites may be precursors of
 ordinary chondrites 22 p3981 A66-40485
 Isotopic composition of xenon extracted
 from Ca-poor achondrites, noting relation
 between enstatite achondrites and enstatite
 chondrites 22 p3983 A66-40558
 Statistical petrographic analysis of
 meteorite and carbonaceous chondrite
 evolution on Moon and Mars from rocket
 photographs 23 p4132 A66-42075
 Luminescence spectra of meteorites of
 different classes using proton excitation,
 giving estimates of radiation conversion
 efficiency 24 p4273 A66-42363
 Pegasus meteorite-detecting satellite
 design and performance and data on
 meteorites 24 p4283 A66-42741
METEORITE COLLISION
 Martian surface age calculated from rate of
 meteorite infall in analogy to lunar
 case 01 p0136 A66-10440

Expected frequency with which gravitationally-oriented Earth-pointing satellite will undergo angular deflection due to micrometeorite impact 03 p0430 A66-12737

Celestial body size, composition and impact induced changes in Earth rotation from mantle data 10 p1531 A66-21286

Ion engine arcing frequency from micrometeoroid impact [AIAA PAPER 66-205] 10 p1592 A66-21446

Tungus meteorite explosion simulation by detonation cord inclined at angle to forest mock-up 14 p2379 A66-27181

Terrestrial origin of tektites, noting possible connection with cometary collision and evidence of lunar origin for some 16 p2802 A66-30926

Meteorite impact and ejection mechanism of tektites, examining large distances traveled by tektites 17 p3007 A66-33283

Cosmic radiation age spectrum of chondrites by calculation based on interplanetary erosion rate, discussing asteroidal origin for meteorites 18 p3232 A66-34528

Radiation flux from meteoritic collision with obstacle 19 p3341 A66-35744

Tungus meteorite explosion simulation by detonation cord inclined at angle to forest mock-up 24 p4279 A66-42721

Impact of compact mass of tungsten particles on obstacles of polystyrene and steel, as meteoritic impact model 24 p4292 A66-42886

METEORITE DENSITY

Orbit calculation of 12,500 meteors in Earth vicinity based on radar observations of radiants and velocities 22 p3985 A66-40957

METEORITIC COMPOSITION

Aromatic hydrocarbons in carbonaceous chondrites investigated by time-of-flight mass spectrometry and hypothesized as formed in solar nebula under thermodynamic equilibrium 01 p0136 A66-10436

Carbonaceous chondrite in stony meteorites, noting presence of organized elements and microfossils 02 p0289 A66-11604

Holbrook meteorite discussing abundance of lithium isotopes, measurement techniques, apparatus, and concentration pattern over surface 03 p0429 A66-13268

Redetermination of isotopic composition of atmospheric neon resulting from measurements of neon in meteorites 04 p0517 A66-14323

Isotopic ratios and location of light primordial rare gases in stony meteorites and correlation with diffusion coefficients 04 p0580 A66-14482

Solar wind as source of primordial inert gases in stony meteorites 04 p0580 A66-14483

Rare gas measurements in iron meteorites and troilite and schreibersite inclusions, using mass spectrometer 04 p0580 A66-14484

Origin of anomalous xenon 129 in meteorite from decay within meteorite itself 04 p0580 A66-14485

Rare gas content of stony meteorites measured by dissolving diverse mineral fractions in solvents on step-by-step basis 04 p0580 A66-14497

Radiogenic, spallogenic and primordial noble gases in stony meteorites, determining helium and neon content 05 p0756 A66-14506

Isotrostructural and jadeite mineral called ureyite found as rare emerald-green grains in iron meteorites Coahuila, Toluca and Hex River Mountains 05 p0674 A66-15197

Cosmic ray variations sustained by effects on Zaisan chondrite 05 p0752 A66-15383

Mineral content and structure of graphite and sulfide inclusions in iron meteorites measured by reflected light and microprobe 06 p0952 A66-15940

Concentration gradients in meteoritic kamacite predicted from Fe-Ni phase diagram and diffusion analysis 06 p0955 A66-16787

Metal grains in 34 chondritic meteorites examined by electron microprobe 07 p1133 A66-17459

Chemical composition of meteorites and micropaleontological evidence of existing meteoric biological carbonaceous chondrites 08 p1287 A66-18767

Enstatite chondrites comprise well-defined group of meteorites distinct from other

chondrite groups in chemical and mineralogical composition 08 p1291 A66-19074

Chondritic meteorites shed light on role of oxidation-reduction equilibria in formation of terrestrial planets 08 p1291 A66-19075

Noble gases and isotopic abundances in Peace River, La Lande and Achilles chondrites 08 p1291 A66-19090

Rare gas evidence for paired meteorite falls of Accalana-Artracoona-Carraweena and La Lande-Melrose-Taiban 08 p1291 A66-19091

Copper and zinc abundances in carbonaceous, enstatite and ordinary chondrite determined by neutron activation techniques 08 p1291 A66-19093

Grinding technique for accurate and proportional subdivision of chondritic meteoritic specimen and separation of metallic and silicate components for chemical analysis 08 p1179 A66-19095

Polyminal contents of globular and elongated nodules in Odessa iron meteorite 08 p1292 A66-19259

Xenon, radiogenic Xe 129R and krypton contents and xenon and krypton isotopic composition of Bruderheim meteorite 08 p1297 A66-19409

Terrestrial origin of pseudometeoritic Igast objects 08 p1298 A66-19596

Canyon Diablo meteorite examined, using mass spectrometry and metallography, noting shock effects 09 p1447 A66-19880

Meteoritic composition and interaction with atmosphere 09 p1454 A66-20281

Tritium diffusion constants of stony meteorites and dependence on tritium production mechanism 09 p1456 A66-20421

Relative isotopic abundance of potassium 40 in terrestrial and meteoritic samples 11 p1770 A66-22572

Mineralogical, chemical and microscopic analyses of carbonaceous chondrites reveal presence of substances usually synthesized by living cells on Earth 11 p1771 A66-22744

Comets hypothesized to consist of antimatter, originating from parts of galaxy consisting entirely of antimatter 11 p1774 A66-23039

Organic matter in Orgueil meteorite and chemical equilibrium in solar nebula 13 p2185 A66-25837

Organic matter in carbonaceous chondrite as forming from chemical equilibrium in solar nebula 13 p2185 A66-25838

Abundance of selenium, tellurium and indium in meteorites measured by neutron activation analysis 13 p2188 A66-26363

Cosmic annealing of Chesterville meteorite 14 p2380 A66-27349

Chemical composition of meteorites and classification into siderites, siderolites and aerolites, noting method for determining age and origin 14 p2383 A66-27651

Inhomogeneties, inclusions and interbrecciation in meteoritic materials, including carbon-rich samples 14 p2384 A66-27897

Orgueil carbonaceous meteorite microstructure studied by techniques of coal petrography and electron microscopy 14 p2385 A66-27931

Bjurböle chondrite and several separated phases analyzed for rubidium-strontium age 14 p2388 A66-28338

Cometary origin of Tungusk meteorite of 1908 supported by analysis of space trajectory and observed nightglow at time of fall 15 p2595 A66-29129

Goldschmidt geochemical classification of elements into siderophile, chalcophile, lithophile and atrophile groups and pertinence to meteorite research 15 p2598 A66-29632

Silicate inclusions and surrounding metallic matrix of specimen of Campo del Cielo meteorite 15 p2598 A66-29633

Ferrous /manganous/ orthophosphates, sarcoside and graptolite found in four iron and pallasite meteorites 16 p2803 A66-31221

Isotopic abundance and content used to trace history of 20 iron and stony meteorites 16 p2803 A66-31223

Rare gases and age distributions in stony meteorites 16 p2804 A66-31353

Neutron activation analysis of K-Ar age for Barwell, England olivine-hypersthene chondrite of December, 1965 16 p2807 A66-31760

Amino acid content of carbonaceous and noncarbonaceous chondrites and possible origins 17 p2850 A66-32086

Mass spectrometric analysis of Kr and Xe in silicates extracted from slab of Estherville stony iron meteorite 17 p3002 A66-32530

Rare gases distribution in pyroxene and feldspar of Khor Temiki meteorite 17 p3007 A66-33280

Australites, external form and structure, describing specific gravity value variation, with size, effect of aerodynamic heating upon atmospheric entry, etc 17 p3007 A66-33281

Chondritic meteorite chemical composition and fractional mechanisms in study of chondrite origin 17 p3015 A66-33430

Solar nucleosynthesis of extinct isotopic iodine, noting incorporation of Nakhchik meteorite material and subsequent decay into fissionogenic xenon 18 p3225 A66-33623

Mass spectrum and abundances of trapped and spallation fission xenon in Pasamonte meteorite 18 p3225 A66-33624

Isotopic composition of silver in Canyon Diablo iron meteorite 18 p3228 A66-34017

Carbonaceous meteorite analysis, indicating possible biological substances 18 p3232 A66-34374

Isotopic changes in materials caused by high energy nuclear active particles and solar wind in interplanetary space and on Earth 18 p3176 A66-34750

Cosmic ray produced lithium and calcium in iron meteorites 18 p3236 A66-34890

Radiation age of 74 iron meteorites estimated from content of cosmogenic isotopes Ga and Ge 19 p3456 A66-35361

Chemical composition of meteorites and micropaleontological evidence of existing meteoric biological carbonaceous chondrites 19 p3459 A66-35570

Paraffinic hydrocarbons composition in Orgueil, Murray, Mokoia and other meteorites identified by gas chromatography 19 p3459 A66-35571

Plessite composition and texture, discussing possible origin in terms of meteorite thermal history 19 p3460 A66-35732

Minerals responsible for thermoluminescence of meteorites identified and radiation age derived 19 p3465 A66-36386

Determination of constancy of cosmic radiation and of terrestrial and cosmic ages, of ferrous meteorites by radioactivity of Al 26 and Be 10 20 p3651 A66-37411

Rare gas mass spectrometric analysis of He, Ne and Ar in Bursa and Canakkale chondrites 20 p3651 A66-37578

Gamma-spectroscopy determination of special reaction products of cosmic radiation in meteorites 20 p3656 A66-38060

Meteorite size prior to entering atmosphere, noting radius and use of isotope activity nomogram 21 p3812 A66-38953

Cl, Br and I contents in carbonaceous chondrites measured by activation analysis 21 p3814 A66-39261

Widmanstätten patterns for electrolytic dissolution of iron meteorites and separation of nonmetallic portions, particularly kamacite 21 p3816 A66-39493

Isotopic composition of lithium in chondrules from Bruderheim and Bjurböle meteorites 22 p3975 A66-39681

Rare gas isotope composition of Estherville mesosiderite and Haraiya, Juvinas, Shergotty and Stannern achondrites 22 p3975 A66-39682

Troilite-graphite phase from Toluca meteorite analyzed to determine concentration and isotopic composition of lead using mass spectrometer, noting radiogenic problem 22 p3976 A66-39684

Photographic data on iron meteor 36221 noting trajectory, velocity, light curve, orbit and spectral emission intensities 22 p3977 A66-39860

Primary nucleus splitting in comet Ikeya-Seki, noting mechanics and velocity of splitting process 22 p3977 A66-39861

Butler iron meteorite composition, noting unusually high cobalt and germanium content and low cooling rate 22 p3978 A66-40013

Butler iron meteorite composition, noting very high concentration of germanium,

- aluminum and nickel exhibiting Widmanstätten pattern 22 p3978 A66-40014
- origin and chemical composition of meteorites and temperature dependence of weight-percentage content 22 p3981 A66-40479
- antimony abundance in meteorites determined by neutron activation 24 p4274 A66-42432
- isotopic composition of Xe indicates that Ca-rich achondrites comprise group of oxide-olivine achondritic meteorites containing fission-produced 24 p4264 A66-42606
- amphoteritic chondrite, St. Mesmin, noting primordial rare gases associated with dark inclusions 24 p4274 A66-42610
- logical content of 17 known specimens type I and type II meteorites, noting indigenous objects are mineralized with ironite and contain residues insoluble in hydrochloric and hydrofluoric 24 p4275 A66-42655
- origin, population, orbital characteristics, surface structure and chemical composition of asteroids /meteorite type/ in solar system 24 p4276 A66-42661
- load pressures realized in early history of chondrites indicate parent body of lunar or off-lunar dimensions and formation from felditic pyroxene 24 p4279 A66-43023
- TEORITIC COMPRESSION
- structure and coherency of lunar dust layer, considering corpuscular radiation such as solar wind and meteorite bombardment 12 p1952 A66-24892
- variation in Earth-Moon distance as result of meteoritic impact 15 p2597 A66-29261
- TEORITIC CRATER
- Donner Lake depression explained by hypovolcanic activity or meteorite impact 03 p0365 A66-12721
- origin of atypical meteorites from Arizona meteorite crater 05 p0761 A66-15264
- applicability of Baldwin relation for determining causes of lunar crater formation 05 p0764 A66-15332
- discovery of new fragments of typical iron meteorite near Wolf Creek, Australia 07 p1133 A66-17457
- number density of all observable lunar craters as function of diameter and of time, examining meteoroidal impact hypothesis 15 p2598 A66-29262
- applicability of Baldwin relation for determining causes of lunar crater formation 15 p2603 A66-29974
- tektites origin and formation, noting chemical composition, age, properties, silica losses, meteoritic craters, 16 p2806 A66-31743
- fluid mechanical analysis of tektite origin, using hypothesis of material ejection from Earth surface in liquid jet form upon meteoritic impact 18 p3227 A66-33694
- peculiarities of dispersion of matter resulting from meteorite impact on lunar surface as explanation of concentric nature of structure of crater 19 p3455 A66-35284
- cutate crater, showing existence of negligible anomalies, noting hypothesis of oblique penetration 20 p3657 A66-38067
- TEORITIC DAMAGE
- hypervelocity impacts into space radiator materials, discussing material evaluation for waste heat shield 05 p0701 A66-14931
- study of protection requirements for resistance of meteorite penetration damage at various interplanetary spacecraft systems [AIAA PAPER 63059-63] 08 p1303 A66-18807
- hypervelocity particle penetration of manned space station structure, discussing formation and repair 10 p1612 A66-21931
- meteoritic penetration through obstacle theoretically considered 15 p2606 A66-28498
- meteoritic penetration through relatively thin shield 15 p2606 A66-28499
- criticism of article on microparticle impact effect on metal optical properties 21 p3818 A66-38737
- TEORITIC DIAMOND
- critique of paper by Carter and Kennedy regarding origin of diamonds in Canyon Diablo and Novo Urei meteorite 09 p1447 A66-19881
- origin of diamonds in Canyon Diablo and Novo Urei meteorites 09 p1447 A66-19882
- solar system origin, evidence of chemical physical nature, diamond content of meteorites, planetary density and gravitational instability 12 p1946 A66-23650
- METEORITIC DUST
- Deposition of black magnetic spherules from atmosphere at two stations in New Mexico believed to be of extraterrestrial origin 09 p1370 A66-19879
- Al-26 and Be-10 radioactivities in cores of Pacific sediments and implications regarding low-energy proton flux in interplanetary space over last 100,000 years 12 p1943 A66-24236
- Magnetic spherules in Silurian and Permian salt samples suggest constant meteoric influx useful in determination of lunar surface age 24 p4198 A66-42435
- METEORITIC IONIZATION
- Electrical effect of large meteorite moving in lower atmosphere 04 p0577 A66-13846
- Sporadic E layer appearance relation to meteor ionized stream 04 p0577 A66-13862
- Mount Bezovec meteor expedition /1961/ observations on luminosity function of visual Perseids and sporadic meteors 07 p1135 A66-17634
- Ionization and diffusion cross sections of Ca, Fe, Si and Mg atoms of disintegrated meteors 19 p3455 A66-35270
- METEORITIC MICROSTRUCTURE
- Organized elements of Orgueil meteorite by quantitative fluorescence microscopy, correlating morphology with chemical composition 03 p0429 A66-13353
- Mineralogy and chemistry of Farmington hypersthene chondrite, examining microtexture aspects such as metal globules, grain shapes and troilite orientation 08 p1290 A66-19073
- Canyon Diablo meteorite examined, using mass spectrometry and metallography, noting shock effects 09 p1447 A66-19880
- Bronzite and hypersthene chondrites, evaluating lunar or asteroidal origin 12 p1948 A66-23903
- Production rates of Cl 36 and Ar 39 in metallic and stone phases of Leedey chondrite 12 p1948 A66-23904
- Fe-Ni-P system and structure of iron meteorites 15 p2603 A66-29967
- Photoelectric photometry of comet Everhart 1964 h, noting density of carbon radicals and CN molecules 17 p3000 A66-32338
- Cometary trail classification using Bredikhin method, noting spectrophotometric data on meteoritic microstructure 17 p3012 A66-33393
- Comet Moorhouse III photographic analysis, noting tail motion, composition, angular motion of rays, etc 17 p3012 A66-33395
- Force action on charged spherical dust particles in cometary atmospheres, noting interaction with ions 17 p3012 A66-33399
- Friable structure of meteorites, examining disintegration under aerodynamic pressure in atmosphere 18 p3227 A66-33838
- Screening effect of meteoritic particles, ice grains and ice-coated dust particles entrained in outgoing gases of comets, determining particle size and numbers from momentum/energy balance 22 p3983 A66-40697
- METEOROID
- IR sensor detection of hypervelocity meteoroid puncture radiation emission 08 p1225 A66-19520
- Meteoritic composition and interaction with atmosphere 09 p1454 A66-20281
- Meteoroid heating, deformation and fragmentation of melted meteoroids, showing not so loose structure in connection with satellite and rocket encounter 15 p2604 A66-30055
- Spacecraft mission to libration centers of Earth-Moon system for collecting meteoroids and photographic program carried out for establishing presence of material at centers 18 p3236 A66-34955
- METEOROID CRATER
- Lunar atmosphere and hydrosphere, predicting dimensional correlation for craters and maria of primordial lunar life, noting dark and smooth appearance 02 p0181 A66-11606
- METEOROID HAZARD
- Micrometeoroid impact effect on candidate skin materials, determining change in optical properties 03 p0382 A66-12793
- Meteoroid hazard to space power plant, reevaluating particle mass, flux, density and impact [AIAA PAPER 64-759] 13 p2194 A66-26622
- Spacecraft attitude perturbation due to meteoroid impacts, anisotropy of incident flux and possibility of steady state disturbance torque 14 p2392 A66-27878
- Self-sealing shield for protection of micrometeorite penetration in propellant tank 20 p3659 A66-37077
- Micrometeoroid environment effect on metal surface thermal properties, using simulated space vehicle placed in solar space environment chamber [AIAA PAPER 65-138] 23 p4140 A66-41894
- METEOROID PROTECTION
- Meteoroid protection weight requirements effects on space exploration costs, examining environment and hypervelocity impact penetration [SAE PAPER 650786] 05 p0774 A66-15011
- Hypervelocity impact data applied to synthesis of meteoroid barriers in spacecraft design 10 p1612 A66-21954
- Meteoroid environment, meteoroid impact hazard on spacecraft structure and meteoroid shields 13 p2193 A66-25845
- Material and geometry aspects of meteoroid armor protection for space radiator tubes, discussing bumper-fin concept 14 p2407 A66-28029
- METEOROLOGICAL BALLOON
- Height, wind speed and direction errors arising from radar tracking with level balloons 04 p0541 A66-13667
- French EOLE experiment for measuring tropospheric parameters, describing balloon transponder, balloon and spacecraft electronic packages, telemetry, etc 12 p1956 A66-24934
- Degree of clustering expected from 500-mb horizontal sounding system, using stream functions and velocity potentials derived from historical tapes of National Meteorological Center 13 p2121 A66-25815
- METEOROLOGICAL FLIGHT
- Comparison of simultaneous radar and aircraft observation of upper boundary of clouds 02 p0252 A66-11265
- Probability of clear lines-of-sight estimated from sunshine and cloud cover observation 08 p1248 A66-19386
- Temperature and humidity variations in weak convection over England, noting measurement techniques and results 24 p4235 A66-43076
- METEOROLOGICAL INSTRUMENT
- SA ANEMOMETER
- SA HYGROMETER
- Clear air turbulence detection and prediction by laser, radiometer, radar and other devices [AIAA PAPER 65-800] 03 p0370 A66-13072
- Transistorized evaporation to measure vertical water vapor and heat fluxes in lower atmosphere 04 p0519 A66-13671
- Electrostatic fluxmeter measuring electrostatic field in atmosphere 04 p0523 A66-14307
- Cloud raindrop sizes and concentration measurement by airborne flow device 06 p0880 A66-16556
- Monochromatic atmospheric transluence measured, using logarithmic photometer with diode photomultiplier for remedying image displacement due to atmospheric fluctuations 07 p1034 A66-17925
- Orientation and construction of high efficiency passive radar targets, noting range and performance for trihedral and octahedral shape 10 p1503 A66-21641
- Analysis of AVCS and HRIR pictures from Nimbus I satellite 11 p1729 A66-22326
- Balloon-borne instrument for measuring downward flux of thermal radiation from atmospheric water vapor, using gold doped germanium detector 11 p1706 A66-22888
- Measurements of decay curves of stored Aiken nuclei with photoelectric nucleus counter show small nonrandom divergences from theoretical curves 11 p1707 A66-23098
- Monochromatic atmospheric transluence measured, using logarithmic photometer with diode photomultiplier for remedying image displacement due to atmospheric fluctuations 12 p1880 A66-23886

Meteorological measurement accuracies for use in design and operation of aerospace vehicles
[AIAA PAPER 66-349] 12 p1953 A66-24480
High altitude mesospheric temperature measurements, discussing air-to-sensor heat transfer mechanism, bead thermistor and descent rate
[AIAA PAPER 66-388] 12 p1908 A66-24510
High powered Q-switched ruby laser /LIDAR/ for meteorological application, noting system equations, design, operation, etc 13 p2122 A66-26548
Effect of aperture and atmospheric turbidity on readings of pyrheliometers considered, based on measurements concerning radiation intensity within solar aureole 14 p2282 A66-26930
Altitude simulator for adjustment and calibration of high altitude meteorological instruments 14 p2325 A66-27279
Electrostatic fluxmeter measuring electrostatic field in atmosphere 14 p2297 A66-28220
Cloud raindrop sizes and concentration measurement by airborne flow device 14 p2297 A66-28228
Clear air turbulence detection instrument development 15 p2500 A66-28919
Checkout of automatic meteorological measurement apparatus including thermograph, photoelectronic anemograph, etc, located on high tower of Institute of Applied Geophysics 16 p2704 A66-30775
Automatic recording, printing and punching of meteorological data from signals measured by automatic bridges and potentiometers on high tower of Institute of Applied Geophysics 16 p2704 A66-30776
Wind direction component measurement on high meteorological tower 16 p2705 A66-30777
Balloon altitude pressure-temperature measuring device using voltage-controlled oscillator 17 p2927 A66-33149
Optical rectification and gridding of satellite photographs for low and high tilt angles, describing equipment design, application and results 17 p2927 A66-33345
Readout technique for laser fog disdrometer 17 p2927 A66-33346
Omegatron mass spectrometer for measuring density and temperature of nitrogen in 100 to 350 km region of upper atmosphere 18 p3112 A66-34241
Clear air turbulence detection and prediction by laser, radiometer, radar and other devices
[AIAA PAPER 65-800] 23 p4066 A66-40981
Meteorological measurement systems in relation to aerospace problems, using flight history of rocket vehicle and root mean square accuracy 24 p4214 A66-43043
Laser system for meteorological data using oscilloscope to display return signal, translated as concentrations of matter or aerosols 24 p4226 A66-43044
Low level atmospheric flow structure resolution, noting equipment and results on wind speed variations 24 p4235 A66-43077

METEOROLOGICAL PROBE

Meteorological effects on atmospheric concentrations of radon beta activity in ground proximity, noting effects of wind, temperature, radioactive precipitation and atmospheric scavenging 11 p1731 A66-23489
Multivariate statistical analysis of wind sounding data, applying high degree of correlation between two wind parameters and empirical density function
[AIAA PAPER 66-353] 12 p1907 A66-24489
Gun-launched meteorological sounding system, describing launcher, vehicle, sensor systems and sensitivity
[AIAA PAPER 66-382] 12 p1954 A66-24506
Atmospheric exploration with lidar, noting high resolution and sensitivity 15 p2530 A66-28600
CAT detection by radiometric measurement of mm wave emission from oxygen molecules and measurement of ambient air temperature and temperature gradient 15 p2532 A66-28926
Clear air turbulence forecasting for aircraft, noting methods employed by airlines 15 p2533 A66-28932
Density, temperature and wind data of strato-and mesosphere, together with water vapor measurements in central tropical

Pacific, using rocket and balloon soundings 15 p2485 A66-28937
Barotropic atmospheric model for forecasting in tropics, discussing wind analysis area covered, accuracy, etc 17 p2948 A66-31943
Generalized vertical coordinate system for application in atmospheric dynamics 18 p3129 A66-33965
Sferics from lightning from warm cloud, noting microsecond pulse-train format and temporal duration 22 p3942 A66-39678
METEOROLOGICAL ROCKET
SA RAVEN ROCKET
SA SKUA ROCKET
SA SOUNDING ROCKET
Polish solid propellant meteorological rocket, considering methods for measuring atmospheric parameters and design 01 p0144 A66-11063
Polish Meteor 1 meteorological rocket equipment, examining gas pressure operated time-delay system used for ejecting dipole container 01 p0071 A66-11064
Electric ground system for launching Polish Meteor 1 meteorological rocket 01 p0055 A66-11065
Final range tests of Polish Meteor 1 noting tracking efficiency 01 p0144 A66-11066
Measuring Meteor 1 rocket flight parameters from ground using phototheodolites and astronomical and optical-acoustic methods 01 p0031 A66-11067
Rockets and spacecraft as tools for meteorological observations in upper atmosphere, discussing temperature variations, wind pressure patterns and demarcated zone 05 p0712 A66-15747
Evaluation of sounding rockets for meteorology for 30 to 200-km altitude range, noting role in X and gamma ray detection, sporadic E layer, etc 07 p1140 A66-17610
Mesospheric sounding rocket launchings and aims pursued 08 p1247 A66-19197
Upper atmosphere and outer space research carried out by U.S.S.R. in 1964, including cosmonaut responses and launching tables 09 p1458 A66-20691
Worldwide upper-atmosphere sounding rocket launching facilities in meteorological research 11 p1687 A66-22965
Loki Dart meteorological rocket system for temperature and wind measurement in 75,000 to 200,000 ft altitude region
[AIAA PAPER 66-383] 12 p1908 A66-24507
USAF meteorological rocket network, showing dependence on requirements expressed by design and test personnel
[AIAA PAPER 66-397] 12 p1908 A66-24512
Parachute for meteorological rockets, noting design, testing, high altitude performance, etc
[AIAA PAPER 66-399] 12 p1802 A66-24514
Canadian Black Brant research rocket program for upper atmospheric sounding 13 p2184 A66-25700
Meteorological rocket wind observations, noting diurnal oscillations and tidal characteristics 13 p2122 A66-26131
Soviet monograph on atmospheric exploration using rockets and satellites, covering meteorological and geophysical instrumentation, measurement parameters, etc 13 p2083 A66-26502
Measuring techniques of winds and temperatures in upper atmosphere with Judi-Dart and other small meteorological rockets 15 p2485 A66-29066
Catalog of sounding rocket launchings and meteorological rocket firings prepared for COSPAR 15 p2599 A66-29900
Meteorological Rocket Network observations of complex circulation system in middle and upper atmosphere 15 p2491 A66-29953
Meteorological rocket measurement of wind patterns noting velocities, turbulences, stratospheric diffusion coefficients, etc 15 p2492 A66-30028
1680 mc/s telemetry system for meteorological rockets 16 p2651 A66-30559
Diurnal oscillation in zonal and meridional winds determined, using harmonic analysis on data obtained from meteorological rocket soundings 16 p2699 A66-31641
Aerospace research programs in India 1965-1966, emphasizing equatorial aeronomy including meteorology up to 170

km 18 p3238 A66-35234
Meteorological rocket network observation of gross global circulation patterns of stratosphere and mesosphere for analysis of vertical structure and synoptic processes 19 p3347 A66-35644
Graphical determination of atmospheric pressure from rocketsonde temperature measurements 22 p3943 A66-40056
British stratospheric and mesospheric temperature measurements compared with valves from available atmospheric models 22 p3913 A66-40519
Bidirectional ascent trajectories of low altitude meteorological rocket, examining effect of wind on peak altitude attainability 23 p4086 A66-41215
METEOROLOGICAL SATELLITE
SA ESSA SATELLITE
SA NIMBUS SATELLITE
SA SYNCHRONOUS METEOROLOGICAL SATELLITE /SMS/
SA TIROS SATELLITE
Weather missions for manned spacecraft 02 p0253 A66-11616
Rockets and spacecraft as tools for meteorological observations in upper atmosphere, discussing temperature variations, wind pressure patterns and demarcated zone 05 p0712 A66-15747
Research potential of manned Earth orbiting spacecraft in meteorology 06 p0957 A66-15905
Worldwide meteorological satellite system, operation, structure and functions 06 p0957 A66-15911
Utilitarian space applications, discussing communications, weather, geodetic and navigation satellites and high speed aircraft 09 p1453 A66-20169
Aerospace and related research conducted at various universities, institutes and agencies in Israel during 1964 and 1965 09 p1458 A66-20716
Interpretation of outgoing IR radiation data from meteorological satellites, including cloud cover identification and Earth surface temperature 10 p1525 A66-21046
Meteorological research capability of manned Earth orbiting spacecraft with refined electromagnetic sensing instrumentation 10 p1553 A66-21526
Meteorological satellite data interpretation and use - Seminar, Tokyo, November-December 1964 11 p1725 A66-22305
Launch vehicle, spacecraft, command and data station and data utilization for meteorological satellite systems, satellite stabilization and orbit types 11 p1777 A66-22306
Meteorological interpretation of satellite pictures of weather systems, discussing APT and AVCS 11 p1726 A66-22307
Satellite picture interpretation of cloud patterns, emphasizing scale identification and dependence on other meteorological parameters 11 p1726 A66-22308
ITC on satellite photographs and use of photographs of cirrus for high level analysis 11 p1727 A66-22311
Maximum wind velocity in tropical storms and hurricanes estimated from cloud patterns in satellite pictures 11 p1727 A66-22313
Meteorological satellite terrestrial UV radiation and cloud formation photographic data interpretation 11 p1728 A66-22317
Incorrect input-induced errors in meteorological satellite photogrids 11 p1704 A66-22318
Meteorological interpretation of Tiros satellite photographs of Australian area 11 p1728 A66-22319
Suggested procedures for operationally integrating meteorological satellite /neph mosaic/ and conventional data for extratropical regions 11 p1731 A66-23383
Diagnostic-cycle routine, collection of computer-programmed techniques for interpretation of meteorological satellite videograph observations 11 p1731 A66-23486
Meteorological data from weather satellites equipped with TV and IR sensors, noting Automatic Picture Taking /APT/ recorder 14 p2289 A66-26806
Dielectric-tape TV camera for panoramic scanning application in meteorological satellite, discussing subject logic and control

- tem design 14 p2262 A66-28418
performance characteristics, attitude
utilization systems, power sources and
local systems of Tiros, TOS and Nimbus
other satellites 15 p2605 A66-28680
book on meteorological satellite history
design, noting Tiros and
Nimbus 16 p2809 A66-30875
graphical method by which small local
areas of meteorological satellite pictures can
identify geographical position of features in
image
[AA PAPER 66-439] 16 p2708 A66-31467
electric-tape camera borne by
meteorological satellite to provide high-
light photographs of Earth cloud
cover 20 p3557 A66-37204
APT signal reception from Nimbus and
other satellites, describing APT equipment
signal conversion
tem 20 p3518 A66-37849
utilization and control system of Tiros-
type satellite, using current-carrying coil
interaction with geomagnetic
field 21 p3821 A66-38878
digital computer processing of Tiros,
Nimbus and Essa vidicon cloud pictures for
cloud naphanalyses, discussing
identification orbital mosaics and calibration
effects for future Essa
units 22 p3943 A66-40055
satellite observation of terrestrial globe
atmosphere, using Tiros-type Essa and
Nimbus satellites 22 p3944 A66-40791
orbital plane precession due to ellipsoidal
shape of Earth, discussing effect on
meteorological and geodetic
satellites 24 p4279 A66-42963
METEOROLOGICAL SERVICE
atmospheric parameter determination by
craft measurements, noting applicability
supersonic air
ports 12 p1879 A66-23752
METEOROLOGICAL STATION
diurnal and seasonal variations in
refractive index of atmosphere near Earth
surface based on meteorological station data
Transbaikalian region 02 p0253 A66-11275
polar radiation measurements made
between 1957 and 1964 at different stations,
determining optical transparency for each
station 05 p0711 A66-14678
automatic atmospheric measuring system
Marshall Space Flight
center 05 p0661 A66-15485
stimulus modification experiment using
communication network, radiosonde and pilot
balloon stations, cameras, radar data,
etc 06 p0905 A66-16268
meteorological observations of Earth from

analog-to-digital conversion system for
automatic meteorological data collection and
transmitting system 02 p0251 A66-11259
cosmic radiation variations during passage
of cyclones agree with theory for
meteorological effects based on two-meson
exchange 02 p0282 A66-11339
quantitative description of elementary
magnetic field by orthogonal
transformations 03 p0389 A66-12931
air currents and temperature distribution
in stratosphere and mesosphere in Northern
hemisphere from rocket
observation 04 p0513 A66-13438
algorithm for mathematical expectation
and dispersion of two-dimensional random
sequences, obtaining linear estimation of
norm of meteorological elements minimizing
rms error 06 p0905 A66-16550
Correlation between solar corona and Wolf
number, examining intensity variation effect
on chemical and biological
tests 07 p1136 A66-17840
Spectral measurements of fourth and sixth
correlative moments of wind-velocity
vertical component 07 p1062 A66-17920
Total mass of Earth atmosphere computed,
using atmospheric pressure and land-height
distribution data 09 p1369 A66-19871
Time-space spectral analysis of
meteorological fields based on time-
dependent spectra of wind velocity,
temperature, pressure and turbulent pulse
and heat fluxes 09 p1397 A66-19883
Atmospheric properties important to
aviation and aerospace medicine including
composition, weather conditions, radiation,
temperature effect at various heights,
etc 10 p1553 A66-22105
Low cloud characteristics over Sea of
Japan during winter
monsoon 11 p1729 A66-22324
Modified Eliassen finite difference grid
solution of primitive hydrostatic equations
system for barotropic and baroclinic model
of atmosphere 11 p1730 A66-22946
Model simulation study of economic value
of improved methods of translating weather
information into operational
terms 11 p1731 A66-23488
Boundary value problem solutions in
meteorology 12 p1905 A66-23664

correlative moments of wind-velocity
vertical component 12 p1905 A66-23881
Report of Panel on International
Meteorological Cooperation to Committee on
Atmospheric Sciences, NAS/NRC, on global
scientific observation 14 p2326 A66-27843
Dispersion of estimates of mathematical
expectation and dispersion for connected
meteorological time
series 14 p2326 A66-27852
Algorithm for mathematical expectation
and dispersion of two-dimensional random
sequences, obtaining linear estimation of
norm of meteorological elements minimizing
rms error 14 p2327 A66-28222
National Air Meeting on Clear Air
Turbulence, Washington, D.C., February
1966 15 p2531 A66-28911
Mars atmospheric circulation, diurnal
heating, thermal tides and effects on Earth
atmosphere 16 p2797 A66-30353
Weather conditions on Mars and relation to
projected manned
exploration 16 p2797 A66-30355
Soviet papers on atmospheric boundary
layer, wind profiles, meteorological effects,
etc 16 p2741 A66-30769
Collected reports on new development of
telescopic, photometric, spectrometric,
meteorological, interferometric and
detection equipment at various solar and
stellar observatories 17 p2923 A66-32020
Statistical structure of meteorological field,
with attention to ergodic
properties 18 p3129 A66-34100
Boundary value problem solutions in
meteorology 19 p3394 A66-36194
Flight safety in Soviet civil aviation
including takeoff and landing, cruising in
airport vicinity, meteorology and
medicine 20 p3494 A66-36991
Tensor calculus applied to meteorology,
including geopotential phenomenology, zonal
and meridional directions, hydrostatic
equations, gradient and geostrophic wind,
etc 20 p3593 A66-37312
Modified Eliassen finite difference grid
solution of primitive hydrostatic equations
system for barotropic and baroclinic model
of atmosphere 20 p3593 A66-37859
Meteorological characteristics for
atmospheric boundary layer under stationary
conditions, considering thermal stability and
turbulent energy
diffusion 20 p3593 A66-38367
Solar radiation control for changing
meteorological conditions in lower
atmospheric layer 20 p3594 A66-38373
Transistorized portable UV dosimeter for
use in medicine, climatology, physiotherapy,
meteorology and stimulated plant growth
study 20 p3562 A66-38436
Meteorological studies from manned
spacecraft discussing interpretation of cloud
pictures and optical inhomogeneity of tropo-
and stratosphere 21 p3760 A66-39363
Numerical analysis of meteorological fields
investigated statistically 22 p3943 A66-40390

METHYL

- Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoro iodo methylidyne 06 p0892 A66-16771
- Spontaneous ignition of mixtures of aluminum trimethyl and oxygen shows ignition boundary as function of partial pressures of reactants 08 p1321 A66-19801
- Chemical pumped UV laser action through thermal decomposition of dimethyl peroxide 15 p2513 A66-28836
- Gas laser output and threshold in population inversion from photodissociation of methyl iodide and fluoriodo methylidyne 19 p3372 A66-35368

METHYL ALCOHOL

- Electrolyte-soluble fuels such as methanol, ammonia and hydrazine, noting electrochemical oxidation properties, power output, stored energy content, etc 07 p0996 A66-18472
- Application perspectives for dissolved fuel cells, particularly methanol and hydrazine cells 11 p1639 A66-22242

METHYL METHACRYLATE

SA POLYMETHYL METHACRYLATE

- Section size effect on room-temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 14 p2312 A66-26972
- Combustion rate of ammonium perchlorate-

- polystyrene and ammonium perchlorate-Plexiglas mixtures related to mixture ratio 18 p3260 A66-33720
- Section size effect on room temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 24 p4228 A66-42581

METHYLENE BLUE

- Focused laser coherent radiation-induced degradation of solid methylene and gas chromatographic analysis of reaction products 17 p2933 A66-31870
- Methylene blue action in reversing decaborane-mediated norepinephrine depletion 22 p3853 A66-39788

METROLOGY

- Measuring microscope in roller bearing metrology, discussing dimensional optical measurement of precision parts 01 p0065 A66-10103
- Optical metrological and alignment methods for fast and accurate rocket thrust chamber alignment [SAE PAPER 650758] 01 p0078 A66-10836
- Probable reliability of measurement accuracies and decision limits for system checkout 03 p0347 A66-13336
- Role of metrology in design, manufacturing and acceptance testing, evaluating performance characteristics 15 p2508 A66-28811
- Monogram on metrological foundations and test methods of aircraft instruments, especially navigation instruments 18 p3111 A66-34011
- Feasibility of improved accuracy in light velocity measurement in vacuum by using superconducting parallelepiped hyperfrequency cavity 19 p3360 A66-36253
- Strain gauge technology in U.S.A. emphasizing organization, education and performance 20 p3559 A66-37506
- Metrology and precision mechanics - National Conference, Warsaw, September 1966 24 p4214 A66-43011

MIAZINE

S PYRIMIDINE

MICA

- Argon diffusion from biotite of mica schist due to intrusion of dyke analyzed on basis of thermal metamorphism and isotope migration 14 p2384 A66-27848
- Chemical stability of silver graphite, molybdenum disulfide, zinc oxide, boron nitride, muscovite and phlogopite mica solid lubricants 16 p2715 A66-31675

MICHELL THEOREM

- Optimum structural design based on Michell fields 06 p0966 A66-16901
- Michell structure design of lightest framework to equilibrate system of given forces 23 p4147 A66-41998

MICHELSON INTERFEROMETER

- Interferometric measurement of large indices of refraction, noting applicability and accuracy 09 p1403 A66-20516
- IR radiation deficiency of Sun determined by interferometric measurement of solar spectrum 13 p2182 A66-25572
- Wide angle Michelson interferometer for measuring Doppler temperature from width of 5577 angstrom atomic oxygen line in nightglow and aurora 13 p2128 A66-25799
- Moving target hologram generation using modified Michelson interferometer 13 p2081 A66-26003
- Fluctuations in mean refractive index over long path through turbulent atmosphere examined, using Michelson interferometer with He-Ne laser source 17 p2948 A66-32618
- Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993
- Michelson interferometer used to study modes of red He-Ne laser 17 p2937 A66-33316
- Doppler shift and high velocity mirror translation effects on mutual optical coherence function of gas laser Michelson interferometers 19 p3354 A66-35387
- Scattering matrix analysis of single frequency Michelson type He-Ne gas laser, including frequency and amplitude stability analysis of oscillation spectrum 24 p4223 A66-42566

MICROANALYSIS

- Electron microscope using electron suffering energy loss to form images qualitative microanalysis 05 p0649 A66-15
- Selective separation of nickel titanium a nickel aluminum alloys and electrochemical behavior in various electrolytes 06 p0896 A66-16

MICROBALANCE

- Sublimation of rhenium and Langmuir method vapor pressure measurements using vacuum microbalance 17 p2938 A66-31

MICROBE

S MICROORGANISM

MICROBIOLOGY

SA CULTURE TECHNIQUE

- Martian life-detection instruments and experiments, examining biological criteria and visual, organic, chemical and metabolic tests 02 p0183 A66-11
- Microbiological attack in aircraft fuel systems and protective measures 06 p0940 A66-15
- Text on prevention of contamination of other celestial bodies by terrestrial organisms via space vehicles 08 p1177 A66-19
- Virus purification methods including density gradient centrifugation, liquid-phase partition, etc, evoke high antibody levels 09 p1333 A66-19
- Microbial accumulation on sterile steel glass and Lucite strips in industrial clean rooms 13 p2013 A66-25
- Algastron, device for life support systems in space, providing potable water, oxygen supply, stabilizing human wastes by algal photosynthesis 13 p2015 A66-25
- Number of viable aerobes and anaerobes accumulating on stainless steel surface in clean room during one year under various conditions, for spacecraft sterilization purposes 13 p2015 A66-25
- Microbiological and cytological experiments in Vostok spacecraft, noting behavior of lysogenic E coli K-12 culture and normal and cancerous human cells 15 p2436 A66-29
- Microbial contamination control of spacecraft, noting dry heat sterilization requirements 16 p2642 A66-30
- Microbial profiles of 20 men under simulated space conditions indicates that certain men can go unwashed several weeks 17 p2856 A66-32
- Microbiological decontamination of lunar spacecraft during mechanical integration assembly 22 p3857 A66-40
- Biological content of 17 known specimens of type I and type II meteorites, noting indigenous objects are mineralized with limonite and contain residues insoluble in hydrochloric and hydrofluoric acid 24 p4275 A66-42

MICROCIRCUIT

SA PRINTED CIRCUIT

- Metal oxide semiconductor /MOS/ integrated circuits 01 p0037 A66-105
- Silicon-on-sapphire integrated microcircuit and micropower concepts 01 p0048 A66-11
- Dielectric organic polymers in microcircuit communications modules 02 p0195 A66-11
- Carrier-mother board rack approach to microcircuit interconnection and packaging 02 p0195 A66-11
- Current amplification factor decrease as input resistance increase with current decrease in transistor circuits in microregime 02 p0207 A66-11
- Miniaturization in improving weapon system component availability, transportability and reliability 02 p0198 A66-11
- Microelectronic digital chronometer and frequency meter, noting design details in thin film circuits 02 p0231 A66-11
- Liquid cooling of thin film resistors including use of nucleate boiling 02 p0203 A66-11
- Microminiaturization, three-dimensional stacking, ceramic printed, thin film, hybrid and integrated circuits, discussing reduction in system size, weight and primary power requirement and improved reliability 03 p0343 A66-13
- Trimming microcircuit elements in evaporated thin-film and silk-screened cermet-film resistors attempted with CV

- pulsed lasers 05 p0692 A66-14562
- microelectronic amplifiers, emphasizing reliability improvement and decreased sensitivity to parameter changes 05 p0643 A66-14568
- reliability and fault-masking in n-variable input and multiple input NOR trees discussing system, function and signal-state ability measures 05 p0648 A66-14928
- thin film microcircuit for digital elements 06 p0856 A66-16927
- monitoring techniques for thin film position in passive microcircuit works 08 p1192 A66-18967
- methods for producing microcircuits from vacuum deposited thin film elements, discussing layout, masking and etching 08 p1192 A66-18968
- effect of voltage and film thickness on etched tantalum film resistivity when used as microcircuits 09 p1411 A66-19941
- microcircuit internal medical sensors with a electronic gain and lower sensitivity inducers 11 p1647 A66-22298
- monolithic circuit with chip of semiconductor material having diffused active and passive elements 11 p1668 A66-23056
- modular set of analog microcircuits constructed of discrete transistors and vacuum thin film resistors for satellite experiments 12 p1830 A66-23681
- lumped-element circuit model used to accurately and effectively analyze transients in thin film RC microcircuits 12 p1843 A66-24724
- silicon monolithic circuit development, discussing cost reduction and performance improvement in microcircuits 12 p1845 A66-24850
- met film microcircuit characteristics design 13 p2029 A66-25126
- helmer triode with contact rectifier for use as component of microminiature radio units, noting effect of contact modification on current-voltage characteristics and amplifying power of such devices 13 p2031 A66-25228
- open double diffused Si HF transistor design for monolithic microcircuit application 13 p2038 A66-25559
- welding technique advances and testing of die integrity for microcircuit production 14 p2298 A66-26944
- characteristic parameter selection and consistent performance capabilities of integrated logic microcircuit 17 p2880 A66-32057
- quick film techniques, discussing applications, limitations, passive elements design characteristics of cermet element 17 p2882 A66-32107
- small size and low power consumption in thin film microcircuits design 17 p2882 A66-32113
- microcircuit joining techniques advantages and disadvantages from viewpoints of ductibility, inspectability and reparability 17 p2882 A66-32115
- particle, microcircuit logic or transistor resistor logic /TRTL/ for integrated circuits 17 p2883 A66-32117
- chemical deposition fabrication techniques integrate isolated thermal and electrical film into thin film 17 p2883 A66-32118
- microcircuit design, manufacture and application, noting use of silicon monolithic integrated circuits, performance characteristics, reliability, 17 p2894 A66-33101
- microwave stripline circuit design 17 p2896 A66-33364
- electroluminescent photodiodes and diode detectors applied to microcircuit design as relays, photochoppers or multichannel couplers 19 p3320 A66-36267
- microcircuits in ground radar, emphasizing phased array techniques and digitalization of beam steering functions 21 p3710 A66-38829
- thin film microcircuit fabrication for space environment application 22 p3882 A66-40792
- face-bonding technique for attaching semiconductor chips to thin film or similar circuits 23 p4043 A66-41193
- CRACK**
- theoretical attempt to bridge gap between micro and macro crack formation, estimating plane strain transition and nominal stress for fracture 17 p2939 A66-32303
- MICRODENSITOMETER**
- MF-4 microphotometer modifications eliminating dependence of readings on brightness fluctuations of illuminating lamp and permitting negative processing in terms of intensity 08 p1224 A66-19336
- Microdensitometer for evaluating photographically recorded images for direct use as computer input 11 p1705 A66-22672
- MICROELECTRONICS**
- Microelectronic integrated circuits and thin films applied to inertial navigation systems to achieve cost reduction 01 p0034 A66-10011
- Pressure transducers using miniature semiconductor strain gauges, examining design, temperature effects, diaphragm strain and application 01 p0068 A66-10492
- Western Electronic Show and Convention, San Francisco, August 1965, Part 2, Integrated circuits 01 p0046 A66-11135
- Thin film epitaxial single crystal silicon on insulating substrate sapphire and advantages of these microelectronic devices 01 p0048 A66-11145
- Single crystal silicon films on sapphire in terms of materials properties and impact on thin film semiconductor microelectronics 01 p0048 A66-11146
- Silicon-on-sapphire integrated microcircuit and micropower concepts 01 p0048 A66-11148
- Metallographic polishing procedures used to reveal failure modes in gold-aluminum thermocompression bonds 01 p0049 A66-11153
- General approach to design of miniaturized power converters and regulators up to 100 kc 02 p0180 A66-11282
- Worst case design for high reliability welded electrical connections, emphasizing encapsulation stresses and quantitative parameter 02 p0234 A66-11325
- Pershing weapon system test stations and new microminiaturization packaging 02 p0197 A66-11458
- Miniaturization in improving weapon system component availability, transportability and reliability 02 p0198 A66-11464
- Microminiaturization applied to circuit integration techniques, outlining steps to fully integrated device including power supply and controls 02 p0199 A66-11860
- Applications of microelectronics - IEE Symposium, Southampton University, England, September 1965 02 p0201 A66-11914
- Recent trends in microelectronics manufacturing techniques emphasizing production capabilities 02 p0202 A66-11915
- Microelectronic digital chronometer and frequency meter, noting design details and thin film circuits 02 p0231 A66-11916
- Feasibility of guard channel receiver, transmitter and marker receiver system by thin film circuit techniques, noting reliability with minimum servicing 02 p0203 A66-11920
- Microelectronics technology noting integrated circuits, passive and active elements, reliability, etc 02 p0209 A66-11926
- Frequency synthesizer producing or deriving any required channel frequency from small number of crystal references 02 p0203 A66-11927
- MCS 920M airborne digital computer design, production processes and microelectronic techniques 02 p0193 A66-11931
- Microelectronic integrated system cells /MISC/ considering yield and utility 02 p0194 A66-11942
- Microelectronics and results achieved in relays, switches, variable capacitors and potentiometers 02 p0205 A66-11943
- Microminiature electronic devices noting thin film, integrated circuits and semiconductor technology 02 p0205 A66-11973
- Airborne equipment modernization through elimination of moving parts and conversion from analog to digital techniques [AIAA PAPER 65-729] 03 p0341 A66-12580
- Miniature high performance high-reliability silicon transistor preamplifier for biological use and space research 03 p0343 A66-12989
- Thin film hybrid approach to economical and time saving miniaturization of integrated electronic circuits 03 p0346 A66-13328
- Cybernetics role in space flight including control circuits for guidance and electronic equipment automation and development 04 p0469 A66-13495
- Space electronics - IEEE International Symposium, Miami Beach, November 1965 04 p0475 A66-13575
- Microelectronic PCM multicode using integrated circuits, noting power dissipation, circuit design, packaging, etc 04 p0493 A66-13599
- Microelectronic integrated circuits and functional blocks in future aerospace electronic system 04 p0493 A66-13632
- Logical and computing devices, discussing construction of homogeneous functional structure using integral circuits 04 p0494 A66-13704
- Algorithm for designing miniaturized discriminators 04 p0490 A66-13969
- Monolithic silicon integrated circuit technology noting thin film, insulating and conducting layers, microelectronics, MOS systems, etc 05 p0642 A66-14559
- Microelectronic amplifiers, emphasizing reliability improvement and decreased sensitivity to parameter changes 05 p0643 A66-14568
- LF transfer functions synthesized with microelectronic circuits 05 p0644 A66-14575
- Integrated DC differential instrumentation amplifier discussing drift, gain and common-mode rejection 05 p0646 A66-14641
- Yields, costs and reliability of monolithic integrated circuits 05 p0650 A66-15496
- Spacecraft microelectronic device failure modes and mechanisms 05 p0650 A66-15830
- Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 06 p0839 A66-15950
- Predictions of future trends of reliability engineering, with particular reference to impact of microelectronics 06 p0839 A66-15952
- One-way microelectronic airborne digital data converter intended for use in automatic carrier landings 06 p0824 A66-15969
- Direct-immersion liquid cooling of modularized microelectronic systems on system-wide basis 06 p0841 A66-15973
- European Miniature Electronic Components and Assemblies Data 1965-1966, Part I, Germany and Italy 06 p0858 A66-17158
- European Miniature Electronic Components and Assemblies Data 1965-1966, Part II, France, Netherlands, Scandinavia and Switzerland 06 p0859 A66-17159
- Microminiature element packaging and multilayer circuits, discussing design and production 07 p1010 A66-18247
- Electron devices - IEEE Symposium, San Francisco, August 1965 07 p1011 A66-18266
- Make-before-break contacts effect on degree of complexity of film and hybrid microelectronic nodes 08 p1191 A66-18921
- Thin film microelectronics including passive and active circuit element, electric properties, vacuum apparatus and instruments 08 p1192 A66-18962
- Electric properties of passive circuit thin film components in microelectronics, discussing resistors, capacitors and microcircuit interconnections on method of preparation 08 p1192 A66-18963
- Microminiaturization in control equipment and computers 08 p1194 A66-19300
- General redundant systems for microelectronics 09 p1361 A66-20494
- Ball shaped miniature transistorized transmitter for temperature measurement 09 p1381 A66-20495
- Concorde navigation system noting inertial platform, digital computer using integrated circuits and microminiaturization 09 p1401 A66-20685
- Microelectronic devices and circuits including integrated, monolithic, diffused and deposited, noting reliability and costs 10 p1507 A66-21285
- Package densities and power dissipation requirements in hybrid integrated circuits solved by modular arrays 10 p1512 A66-21760
- Solid state microelectronic differential amplifier as stable high gain and high input impedance amplifier 10 p1513 A66-21903
- Microminiature Loran-C Receiver/Indicator

for analog-to-digital conversion, using integrated circuit 10 p1555 A66-22047

Redundant microelectronic system and reliability 11 p1661 A66-22272

Miniature telemetry systems, examining AM, FM, frequency and time multiplexing, etc 11 p1658 A66-22999

Monolithic circuit with chip of semiconductor material having diffused active and passive elements 11 p1668 A66-23056

Integrated circuit gate ring counters, noting flip-flop variety comparison 11 p1677 A66-23178

N-triode, semiconductor device with negative resistance used as active element in circuits with common emitter and common base 11 p1670 A66-23227

Miniaturized AM-diode signal detector in form of solid state circuit for frequencies in excess of 450 kc 12 p1830 A66-23735

Digital and RF/linear circuits compared noting monolithic, hybrid and thin film circuit limitations, phase locked loop design, etc 12 p1830 A66-23756

Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 12 p1831 A66-23792

Electro-optical celestial guidance system with miniaturized computer and scanning sensor 12 p1909 A66-24104

Aerospace and electronic systems - IEEE International Convention, New York, March 1966 12 p1818 A66-24600

Performance characteristics of microminiaturized MTI system, using range-gated filter /RGF/ for surveillance radars 12 p1819 A66-24604

Microelectronic composite lumped-distributed transmission systems, two-port networks, voltage transfer function, root locus construction, pole and zero locations, etc 12 p1856 A66-24657

Silicon monolithic circuit development, discussing cost reduction and performance improvement in microcircuits 12 p1845 A66-24850

Thermocompression bonding applied to integrated circuits of semiconductor and thin film type, noting resistance, ultrasonic and electron beam welding 12 p1846 A66-24916

Subminiature high-performance biopotential telemetry system with inexpensive components and simple construction 13 p2015 A66-25795

Reliability assessment techniques for microelectronics, considering integrated circuits, testing procedures, etc 13 p2043 A66-26226

Approaches to microelectronics, application of microelectronics to telecommunication equipment, noting logic circuits, radio relay, etc 13 p2043 A66-26316

Microelectronics fabrication development, noting electronic effects in silicon, HF transistors in microcircuits, thin film silicon circuits, etc 14 p2252 A66-27307

Microelectronic PCM multicoder using integrated circuits, noting power dissipation, circuit design, packaging, etc 14 p2243 A66-28349

Microelectronic fuel control for gas turbine engines, discussing mechanical flow and microelectronic packages and component fabrication and assembly 15 p2571 A66-28859

Magnetic characteristics of miniature reed relays, noting greater sensitivity over other types of sealed relays 15 p2460 A66-28991

Significant environmental criteria and realistic and standard test conditions for microelectronics testing 16 p2659 A66-30451

Nomograms published in Electronic Design from 1963 to 1966 covering prototype, testing, costs, selection and avoidance of pitfalls 17 p2881 A66-32103

Microelectronic encoder design problems, considering stability in high gain amplifiers, resistors, capacitors and voltage reference source and low resistance in multiplex switch 17 p2883 A66-32120

Thick film hybrid integrated circuits 17 p2897 A66-33366

Monolithic, thin-film and hybrid integrated circuits technology 18 p3087 A66-34703

Packaging transistor and diode chip

circuits 19 p3313 A66-35483

Microelectronic airborne radar equipment operating in ground mapping, terrain avoidance and air to ground ranging, noting design, packaging, etc 19 p3313 A66-35519

Microelectronics impact on future airborne radar systems reliability, cost and performance 19 p3314 A66-35522

Microelectronics in airborne equipment, noting reliability and cost reduction 19 p3360 A66-36261

Microminiaturization in automatic control equipment and digital computers - Symposium, International Federation of Automatic Control and International Federation for Information Processing, Munich, October 1965 19 p3322 A66-36806

Optimum fabrication of microelectronic devices by interconnection of integrated circuits on ceramic substrates 19 p3323 A66-36820

Homogeneous microelectronic structures using integrated circuit technology for fabrication of logical and sequential facilities 19 p3323 A66-36821

Miniaturized TV system capable of operation in launch and flight environments of space vehicles 20 p3557 A66-37205

Miniature shaft-angle encoder with integrated-circuit encoding matrix and built-in memory potential using single static commutation ring 20 p3558 A66-37217

Microelectronics application to military maintenance and support of guidance and control systems of missile and weapon systems 20 p3567 A66-37890

Economics of Ownership structure and cost effectiveness in microelectronic systems 20 p3684 A66-37904

Biological telecommunication, discussing application of microtelemeters for measurement of physiological processes and responses in animal and human subjects [ASME PAPER 66-MD-27] 21 p3700 A66-38483

Electromagnetic interference from pulse circuits, switches and relays produced by photo-optical control systems 21 p3709 A66-38608

Miniature pressure transducer depending on change of resistance across element of conductive rubber 21 p3736 A66-38797

Silicon nitride as possible replacement for silicon dioxide in highly stable and reliable semiconductor devices, especially insulated-gate field effect transistor circuits 21 p3710 A66-38827

Assembly and packaging of microelectronic systems by integrated circuits, considering spatial configuration, maintainability, interconnection, thermal transfer and environmental resistance 21 p3710 A66-38830

Ultraminature ferrite device design parameters for application in microwave receiver systems 22 p3880 A66-40738

Microbonding - Colloquium, Sunbury-on-Thames, Middlesex, England, January 1966 23 p4043 A66-41188

Microbonding difficulties in joining flat pack circuits to printed circuit boards, examining parallel gap welding connections with board material and use of dissimilar metals 23 p4043 A66-41189

Parallel-gap joining techniques, examining electrode using copper insert and brazing application to thin films 23 p4072 A66-41191

Vacuum coating techniques for thin film layers for bonding, examining adhesion, bonding layer reinforcement and surface oxidation 23 p4043 A66-41194

Thin films and semiconductors for integrated circuits in microelectronics, for application to aeronautics and astronautics 23 p4048 A66-41657

Optimum use of microelectronic reliability data in system development, discussing relation to sources 24 p4179 A66-42099

MICROGRAPHY

SA PHOTOMICROGRAPHY

Hot wire-drawn beryllium recrystallization analyzed by hardness measurement and micrography, noting dependence on initial deformation 13 p2107 A66-25358

Berg-Barrett skew reflections applied to observation of boron diffusion-induced imperfections in silicon wafers 18 p3076 A66-33935

MICROINSTRUMENTATION

Slide-wire microbarometer with pressure changes transformed into frequency changes of output signal designed for operation on moving objects 16 p2709 A66-31798

MICROMEROGRAHY
S PARTICLE SIZE

MICROMETEORITE

Space hazards to spacecraft including extreme temperatures, micrometeorites, low pressures and electromagnetic and corpuscular radiations 03 p0425 A66-12868

Study of protection requirements for resistance of meteorite penetration damage for various interplanetary spacecraft systems [AIAA PAPER 63059-63] 08 p1303 A66-18800

Experiments for space dust collection describing rocketborne micrometeorite collection during Venus Fly Trap and Nike-Cajun flights 11 p1771 A66-22648

Self-sealing shield for protection of micrometeorite penetration in propellant tank 20 p3659 A66-37077

MICROMETEOROID

Linear accelerator for micrometeoroids operated in radially stable mode and variable frequency for hypervelocity impact studies 01 p0053 A66-10852

Acoustic detection of micrometeoroids from rockets, discussing experimental setup calibration methods and analysis of results 09 p1381 A66-20367

Ion engine arcing frequency from micrometeoroid impact [AIAA PAPER 66-205] 10 p1592 A66-21446

Aerobee rocket measurement in sampling of micrometeoroid debris during peak of Leonid meteor shower 15 p2605 A66-30068

Behavior of postulated lunar surface materials due to environmental high vacuum, examining micrometeoroid impact and solar radiation effect 21 p3810 A66-38506

Inconclusiveness of satellite measurements of micrometeoroid fluxes using piezoelectric microphone detectors in supporting hypothesis of cloud of dust surrounding Earth 23 p4128 A66-41213

MICROMETEOROLOGY

Clean Air Act in relation to toxicology and safety to evaluate atmospheric pollution [AIAA PAPER 66-375] 12 p1907 A66-24501

Ablation particulate dispersion in atmosphere estimation by calculating particle deposit concentration at Earth surface [AIAA PAPER 66-379] 12 p1951 A66-24504

Multichannel computer controlled Mobile Micrometeorological Observation System, automatic data acquisition, processing and recording system for observational analyses of turbulence of atmospheric boundary layer 22 p3943 A66-40427

MICROMETER

Measuring microscope in roller bearing metrology, discussing dimensional optical measurement of precision parts 01 p0065 A66-10103

MICROMINIATURIZATION

Problems of miniaturization of fluid mechanic components 19 p3343 A66-36807

Ultrasonic welding uses electric power of electronic generator applied to piezomagnetic transducer for converting AC electric power into mechanical vibration 19 p3372 A66-36819

Microminiaturized R-11 digital computer for real time computational requirements in radar data processing, fire and command control, automatic navigation, checkout, etc 21 p3707 A66-38675

High-speed multiplication for R-11 microminiaturized digital computer, using modified form of Booth Algorithm 21 p3707 A66-38676

Semiconductor electronics, Gunn effect in optical communications, electro-optics, optoelectronics and light coupling in microminiaturization 22 p3878 A66-40623

Microminiaturization of microwave circuits by synthesis and implementation of passive network functions in distributed parameter form, using strip transmission line as circuit element 23 p4046 A66-41585

Reliability prediction, failure rates, fail-safe design and packaging of integrated circuit and MOS-FET microminiaturized electronic equipment 24 p4179 A66-42098

Calculation method for optimum number of

film elements on substrate of module consisting of active and passive etching, resistive and dielectric 24 p4257 A66-42536
microminiature semiconductor devices for microwave communications noting germanium and its role, microcircuits, plasma effects, and zone techniques, 24 p4186 A66-43078

ORGANISM

ALGAE
BACTERIA
FUNGUS
VIRUS

with rate of microorganisms when rates change with time, using continuous culture technique 02 p0183 A66-12016
amination of carbonaceous chondrites containing viable microorganisms, isolating types of bacteria on various media 03 p0325 A66-13339
ization of microorganisms to generate electrical energy 05 p0627 A66-15478
chemical mutation, DNA, RNA and microorganisms infecting wing tanks of jet aircraft 13 p2011 A66-26546
utilization of planetary probes to free of terrestrial organisms 15 p2443 A66-28684
logical patterns of microorganisms in desert soils 15 p2441 A66-29960
rocket and balloon-borne exposure study of terrestrial microorganism survival in space 15 p2441 A66-29965
cutaneous and aerosol bacteriological contamination of astronaut exposed to oxygen-rich atmosphere at low pressure 18 p3058 A66-33778
microorganism changes under extreme environmental factors, noting possible human life and meteoritic organic compounds 19 p3284 A66-35574
vival and growth of *Bacillus cereus* and spores in simulated Martian environment during temperature cycling and low pressure and oxygen 19 p3284 A66-35576

of Mars microorganism detection, using photosynthetic and respiration systems in inorganic biochemical compounds 24 p4168 A66-42676

PARTICLE

ionized bonding or spot welding of aluminum plates by high velocity impact microparticles 02 p0242 A66-11562

ROCKET

microthruster engines used in subscale investigations of adjacent spacecraft surface heating by control rocket plume impingement and nozzle wall heating [AIAA PAPER 65-584] 19 p3449 A66-35597
microthruster technology utilizing solid, liquid and gaseous propellants for spacecraft propulsion, including performance measurement techniques [AIAA PAPER 65-620] 20 p3629 A66-38149

SCOPE

ELECTRON MICROSCOPE

ion microscope in roller bearing technology, discussing dimensional optical measurement of precision 01 p0065 A66-10103

microscope modification for time-lapse cinematography noting holding camera stand, reflecting light mirror, culture chamber, 05 p0677 A66-14865

scanning IR microscope for conductor evaluation used for engineering design analysis, reliability improvement, failure analysis, 12 p1843 A66-24676

universal tester resembling microscope to image-forming systems of mirrors and lenses by autocollimation with aluminized mirrors 15 p2499 A66-28840

SCOPE

ELECTRON MICROSCOPY

microscopy as field emission cathode microscopy specimens prepared by chemical etching and temperature field 20 p3623 A66-38393

STRUCTURE

METEORITIC MICROSTRUCTURE

relation of microstructure, hardness and microchemistry in

resistance welded electronic leads 02 p0234 A66-11327
Microstructural alterations developing with cycling stressing in rolling contact exemplified by bearing steel parts [ASME PAPER 65-WA/CF-4] 05 p0779 A66-15623

Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12] 05 p0703 A66-15686

Composite ceramic systems consisting of metallic or organic phase and ceramic phases, microstructure, mechanical strength and thermal expansion 07 p1051 A66-18299
Interrelationship among fabrication procedures, microstructure and properties of ceramic materials, noting dependencies on porosity, grain size, temperature, pressure, etc 07 p1054 A66-18500

Transmission electron microscopy observation of microhardness of shock-hardened iron and bcc iron-based alloy structures 08 p1236 A66-18758
Liquid titanium reaction with nonmetallic refractory ceramics, Ti melting behavior and electron-probe microstructural analysis 08 p1236 A66-18759

Transmission electron microscopy structural analysis of dislocations in stress-corrosion cracking of 7075 aluminum alloy 08 p1236 A66-18761

Microstructures of rapidly solidified aluminum-chromium-silicon alloys 09 p1389 A66-20804

Boundary value problem for stress concentration at spherical cavity in field of isotropic tension for deformable microstructure 11 p1781 A66-22615

Microstructure viewed on several different successive parallel planes simultaneously, using multiple positive or negative transparencies, obtaining three-dimensional photomicrograph 12 p1892 A66-23626

Phase equilibrium diagram of Ti-Co-Al system at 800 degree C, based on X-ray and microstructural analyses 12 p1893 A66-23762

Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12] 12 p1896 A66-24542

Mechanical properties of lithium silicate glasses at different stages of crystallization and relation to microstructure 12 p1900 A66-24862

Density, microhardness, elastic constants and surface strength relation to microstructure of lithium aluminosilicate glass crystallized under various conditions of heat treatment 12 p1901 A66-24863

Recrystallization diagram of high purity rhodium after cold-rolling of single crystal specimens 12 p1897 A66-24901

Widmanstätten structure in titanium diboride single crystals, noting effects of annealing at high temperatures and determining plane orientation on any surface 12 p1897 A66-24918

Microstructural response and tensile failure mechanisms in solid propellant 13 p2171 A66-26117

Scattering mechanical properties of ternary alloy creep resistant steel, emphasizing effect of heat treatment on microstructure [ASME PAPER 66-GT-112] 14 p2312 A66-27006

Cobalt and nickel eutectic alloys modification with selected elements for high temperature application, noting microstructure and tensile behavior 16 p2726 A66-31460

Surface microstructure of cathode oxide coatings using carbon replicas 16 p2789 A66-31805

Microsphere used as cell model, when produced by solution and condensation of proteinoid, for understanding of cellular life origin 17 p2852 A66-32098

Properties of microspheres from thermal proteinoid, showing emergence of complex materials and microstructures, reminiscent of cells, from simple processes 17 p2853 A66-32099

Hardness and lattice parameter increase

effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750

Room and cryogenic temperature mechanical properties and microstructure of electroformed nickel 20 p3582 A66-37090

Fog transmittance attenuation factor, comparing photometric values and values calculated from microstructural observations, using flow trap 21 p3759 A66-38917

Microstructural and superconductivity analyses of Nb-Ti-O compound as function of thermomechanical processing treatment, plotting critical current density against transverse magnetic field 22 p3960 A66-39780

Mechanical properties, coefficient of linear expansion and microstructure of aluminum-based sintered-powder alloy containing silicon and nickel 22 p3937 A66-40884

MICROTHRUST

Microthruster power conditioning and control system design and ion propulsion [AIAA PAPER 66-215] 10 p1485 A66-21449

Subliming materials chemistry determining parameters governing selection of subliming solids for microthruster engines [AIAA PAPER 65-595] 11 p1759 A66-22460

Gas dynamic problems in low pressure microthruster engines, noting parameters such as type of nozzle flow, pressure drop causes, etc 11 p1761 A66-22461

Ion thrusters in micropound range for satellite stationkeeping, with description of microthruster design [AIAA PAPER 66-212] 12 p1936 A66-24523

Microthruster ion engine system with thrust vector control, using ion beam deflection [AIAA PAPER 66-204] 12 p1937 A66-24526

MICROTRON

Microtron principles, parameters and application, including comparison with other accelerators 14 p2347 A66-28308

MICROVISION

Bendix microvision head-up display system all-weather landing aid 17 p2952 A66-33201

MICROWAVE

Microwave behavior of ferrimagnetics and plasmas - IEE Conference, London, September 1965 01 p0022 A66-10507

Microwave induced generation of DC voltage across thin n-type germanium rod in waveguide 06 p0925 A66-16678

Resonator cavity measurement of microwave Faraday effect in low resistivity semiconductors 14 p2349 A66-26799

Microwave Faraday effect in n-type germanium, discussing Faraday rotation, ellipticity, magnetoabsorption, complex conductivity tensor elements and measurement of microwave polarization anisotropy 14 p2349 A66-26826

Formulae relating 21-cm emission intensity to density of interstellar hydrogen gas 14 p2383 A66-27799

Handbook of microwave ferrite materials 16 p2787 A66-31752

Coherent optical reconstruction from microwave holograms in two-step Gabor image-formation technique 18 p3111 A66-33999

Prelonization and shock wave ionization in cylindrical crossed-field plasma source, using microwave diagnostic methods including interferometry 19 p3408 A66-36277

Space charge wave equation and impedance and stability of electron diodes, using Nyquist analysis and transit time and RF beam current 20 p3528 A66-37489

MICROWAVE ANTENNA

SA LUNEBERG LENS

SA RADAR ANTENNA

Remanent ferrite phase shifter as beam steering elements in phased array radars 01 p0042 A66-10592

Feasibility study indicates that cap-type microwave reflectors can be used as communication satellites 04 p0586 A66-13927

Electronically steerable antennas for spacecraft-to-spacecraft communication for frequencies from 1 to 35 gc, considering maximum antenna gain, bandwidth, spacecraft stabilization, etc 04 p0501 A66-14443

Space communications antennas, discussing ground to space systems, satellite relay methods, etc 05 p0651 A66-15839

High speed microwave ferrite amplitude and phase modulators in standard

rectangular waveguide systems 06 p0841 A66-15959

Antenna phase measurement by reflection method, with transmitting antenna and receiving test antenna located side by side 06 p0878 A66-16037

Multiple-feed system for microwave focusing objective, discussing array factors 06 p0827 A66-16042

Polarizer operation of rotating-polarization microwave antenna in presence of reflection from emitter 06 p0859 A66-17182

Polarization pattern dependence on phase-amplitude distribution of field at microwave antenna aperture 08 p1190 A66-18912

Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 09 p1356 A66-20771

Microwave antenna simulation at optical frequency, using neon-helium continuous gas laser 11 p1662 A66-22539

Electrical and mechanical features of millimeter-wave antenna facility, including measurement of lunar surface during eclipse of December 1963 11 p1770 A66-22551

Quasi-optical design of lens-feed millimeter-wavelength antenna combination whose radiation is of azimuthally symmetric split-beam type 11 p1663 A66-22559

Antenna theory, analyzing radio astronomical methods such as antenna axis, radiation pattern, gain, efficiency, etc 11 p1658 A66-23219

Tunnel diode used as negative conductance, frequency converter, pumped element or rectifier in microwave antenna system 12 p1831 A66-23788

Measurement accuracy of antenna test range evaluated for gain, ellipticity, polarization angle, boresight axis and ground reflected energy 12 p1836 A66-24155

Control system of microwave antenna positioning used in communication satellite tracking, noting servosystems, converter, Leonard drive, control panel, etc 12 p1817 A66-24320

Near-isotropic circularly polarized antenna 13 p2035 A66-25503

Microwave power: transmission, noting theoretical loss, power transfer, heliocomputer operation, etc 13 p2024 A66-25783

High directional antenna with variable aperture and signal processing after frequency conversion 14 p2251 A66-27237

Comparative merits and design features of millimeter wave antennas used as parabolic reflectors, Cassegrain systems and lenses 15 p2462 A66-29021

Deflection of structural members in Haystack antenna calculated, using framed structure analysis /FRAN/ program, obtaining improved grid analogy 15 p2614 A66-29616

Horn radiators with high attenuation capabilities, noting design features, application to parabolic antennas, etc 17 p2894 A66-32989

Phase error and associated cross-polarization effects in Cassegrainian-fed microwave antenna 18 p3074 A66-33528

Large steerable antenna and microwave problems in designing 18 p3086 A66-34329

Polarizer operation of rotating-polarization microwave antenna in presence of reflection from emitter 19 p3314 A66-35540

High temperature refractory alloy fabrication for microwave antennas in hypersonic glide reentry vehicles 19 p3370 A66-36158

Two-dimensional microwave lenses with large angular field for radar antenna, noting residual aberrations 20 p3527 A66-37427

Large aperture antennas, noting limitations of apertures due to wave propagation characteristics, mechanical problems and optimum gain 20 p3530 A66-37714

Microwave antenna design elements, feed equipment and performance characteristics 20 p3530 A66-37716

Rime effect on reflection efficiency of microwave reflectors, noting surface roughness irregularity and relation between icing and meteorological topographical conditions 20 p3516 A66-37726

Frequency scanned antenna with dielectric loaded waveguide, discussing experimental results 20 p3531 A66-37729

Polarization patterns of microwave antennas with sine-phase /complex/ apertures of rectangular, circular, annular or rhombic form 22 p3873 A66-39830

MICROWAVE APPARATUS

Potentialities of cylindrical plasma structures considering electron beam interaction and microwave devices, noting dispersion of waveguide containing plasma 01 p0039 A66-10526

Helicon wave propagation and related magnetoplasma effects in semiconductors, using microwave version of Rayleigh refractometer 01 p0026 A66-10541

Gyrotropic properties in simple and canted two-sublattice antiferromagnetics in small static magnetic field 01 p0122 A66-10569

Dielectric filler performance of silicon carbide, microslized glass sphere and titanium dioxide at microwave frequencies 02 p0247 A66-11285

Microwave power measuring device using p-n junction diodes and operating at 8, 4 and 2 mm 02 p0200 A66-11885

Complex permittivity of low-loss liquids measured with magic tee and variable-length cell 03 p0368 A66-12469

Noise factor, conversion loss and image frequency effects in microwave crystal mixer 03 p0344 A66-13016

Q-factor of nonlinear capacitance microwave diodes determined from standing-wave ratio and phase difference for two bias voltages on diode, using passive linear quadrupole 04 p0499 A66-14062

Precursor effects in T-tubes predominantly air-filled, using microwaves and photomultipliers, noting role of UV and plasma radiations 05 p0719 A66-14503

Frequency range of more than 60 gc obtained by introducing microwave absorber into last stage of multishaft absorber, improving reflection coefficient 05 p0648 A66-15029

Yttrium iron garnet /YIG/ delay line application to radar range and amplitude calibrator, altitude simulator, microwave memory and electronically steerable antenna array 06 p0842 A66-15983

Microwave discharge-fast flow to investigate interaction between molybdenum surface and chlorine 06 p0821 A66-16155

Optimal regime for triode amplifier of microwave output 06 p0849 A66-16373

Large signal characterization of microwave transistor amplifiers 07 p1008 A66-17511

Gunn effect oscillators including domain formation, microwave source potentialities, power transfer, efficiency, etc 08 p1193 A66-19120

Electronics methods used in laser technology and vice versa, emphasizing microwave photoelectronic devices, self-consistent gas discharges at optical frequencies, etc 09 p1386 A66-20434

Microwave optics diffraction theory, reflectors, lenses, interferometers, spectrometers, beam waveguides and millimeters wave components 09 p1402 A66-20511

Frequency stabilization method for reflex klystrons and other self-excited microwave oscillators 09 p1357 A66-20780

Reflection factors and wave amplitudes of diffraction spectra for incidence of H-p, 0 waves onto inductive obstacles in rectangular waveguides 09 p1358 A66-20808

Breadboard microwave pointing device with attached RF source comprising azimuth angle measuring system, with application in geodesy, tropospheric propagation, etc 10 p1538 A66-22048

AM and FM of transferred electron microwave generators, noting voltage dependence 10 p1515 A66-22094

Floating zone technique for preparing high purity GaAs crystals for CW microwave devices 10 p1516 A66-22099

Reflex klystrons as microwave FM detector and theoretical circuit predictions 11 p1670 A66-23160

Instrumentation for measurement of short-term frequency stability of microwave sources 12 p1816 A66-24134

Solid state microwave devices, discussing transistors, tunnel diodes, parametric amplifiers, power transistors, varactors, module systems, etc 12 p1836 A66-24154

Microwave apparatus cooling system design problems 12 p1836 A66-2415

Microwave component testing accuracy analysis of error sources 12 p1833 A66-2472

Oscillating and amplifying characteristics of degenerate microwave amplifier using ferromagnetic yttrium iron garnet 12 p1845 A66-2485

Reliability of short-haul microwave relay systems operating in common carrier bands 13 p2029 A66-2514

Noise performance of Gunn microwave generator and noise-power measurement made on Gunn oscillator in X and band 13 p2030 A66-2522

Diffused-base alloyed-emitter p-n-p type planar germanium microwave transistor 13 p2038 A66-2555

Optimal regime for triode amplifier of microwave output 13 p2042 A66-2596

Optical and microwave instrumentation for exploration of millimeter wave band determining value for deep space communications, radiometry and spectrometry 14 p2247 A66-2692

Improved performance in microwave Resonance diode oscillator with epitaxial silicon material and coaxial cavity 14 p2248 A66-2704

Gunn oscillators fabricated from ultra-thin gallium arsenide chips 14 p2248 A66-2705

Binary pulses in microwave band regenerated, using pulse regenerator with hysteresis characteristic of parametric oscillator employing variable capacitance diode 14 p2248 A66-2705

Two basic semiconductor limiters design and performance as microwave duplexing devices 14 p2253 A66-2752

Series resistance of silicon microwave varactors 14 p2254 A66-2773

Microwave L-band tunnel diode amplifier 14 p2254 A66-2773

Microwave amplification by interaction of electron beam with cesium plasma 14 p2345 A66-2804

Common emitter noise equivalent circuit to determine microwave transistor noise parameters 15 p2458 A66-2889

Theoretical calculation of effective load impedance of tunnel diode mounted in microwave structure 15 p2462 A66-29016

Noise performance of X-band microwave sources, using transistorized crystal oscillators and amplifiers and varactor frequency multipliers for application to communication systems 15 p2465 A66-29672

Propagation behavior of circular waveguide enclosing column of isotropic plasma, considering effect of glass walls for microwave device 15 p2467 A66-29859

Q-factor of nonlinear capacitance microwave diodes determined from standing-wave ratio and phase difference for two bias voltages on diode, using passive linear quadrupole 17 p2885 A66-32228

Microwave applications of semiconductors - Symposium, London, June 1965 17 p2888 A66-32901

Microwave semiconductor devices, discussing frequency multipliers, parametric amplifiers, Gunn effect microwave acoustics, hot electron devices, tunnel diodes, etc 17 p2890 A66-32902

Low temperature silicon variable capacitance diodes for use in low noise S-band parametric amplifier 17 p2890 A66-32903

Microwave tunnel-diode mixer operating at S-band frequencies, computing gain and noise figures 17 p2890 A66-32906

Silicon microwave p-i-n diode design and use as variable resistance 17 p2891 A66-32909

Germanium and silicon microwave transistor and mixer diode design for HF and low noise oscillators and amplifiers 17 p2891 A66-32912

Noise behavior of X-band microwave mixer over range of intermediate frequencies and local oscillator powers, noting variation of mixer conversion gain, etc 17 p2892 A66-32920

Wide tuning range solid state microwave source consisting of transistor oscillator and varactor diode harmonic generator chain 17 p2893 A66-32926

Structure and batch fabrication of beam lead planar Ge Esaki

17 p2895 A66-33119
 Microwave limiter device, based on impact
 ionization of deep levels in
 17 p2897 A66-33461
 Amplifier helping backward diodes as
 rectifiers and detectors in microwave
 systems 18 p3088 A66-35019
 Device for frequency translations in
 microwave range employing latching ferrite
 phase shifter and digital switching driver to
 obtain multiple step
 approximation 19 p3314 A66-35520
 Propagation and absorption calorimetric
 measurements in magnetoplasma near
 cyclotron resonance, noting power
 version 19 p3305 A66-36420
 Relay transistor, used for continuous
 microwave power output of 6.5 watts at 1
 cycle and over 1 watt at 2
 cycles 20 p3524 A66-36898
 Microwave semiconductor devices,
 passing frequency multipliers, parametric
 amplifiers, Gunn effect, microwave
 rectifiers, hot electron devices, tunnel
 diodes, etc 20 p3531 A66-37829
 Frequency stabilization method for reflex
 klystrons and other self-excited microwave
 oscillators 22 p3874 A66-39839
 Measurements of voice channel loading
 data for systems carrying video
 information and determination of
 reference noise 22 p3864 A66-40062
 Advances in HF solid state transmitter
 systems - WESCON, Los Angeles, August
 22 p3879 A66-40721
 High power microwave frequency
 multiplier matching very low varactor
 reactances 22 p3879 A66-40723
 Microwave solid state multiplier for space
 applications noting temperature variations, vibration-
 induced noise, outgassing, 22 p3879 A66-40724
 Microwave receiver devices - WESCON,
 Los Angeles, August 1966 22 p3879 A66-40734
 Low noise TWTs, low noise traveling
 wave amplifiers /LNTWA/ and suitability as
 microwave amplifiers 22 p3880 A66-40735
 Electromagnetic compatibility of
 communications satellites, tropospheric
 scatter and line-of-sight microwave systems
 operating in same frequency 23 p4040 A66-41597
 Microwave experimental technique for
 continuous velocity measurement of shock
 contact discontinuities bounding air
 plasma generated in cylindrical hypersonic
 shock tube 24 p4190 A66-42173
 Microwave airflow simulator measurements
 of hot-film and hot-wire turbulence
 resistor 24 p4211 A66-42576
 Frequency up-conversion technique with
 active mixing, noting equipment and
 results 24 p4183 A66-42630
 Microwave transistor noise measured in
 terms of parameters, comparing
 experimental and calculated
 results 24 p4183 A66-42631
 Motor without commutator, run by
 amplified RF energy from antenna pickup
 inside waveguide 24 p4182 A66-42947
 Microwave transducers for measuring
 metric dimensions and displacements in
 industrial process control 24 p4214 A66-43012
 Magnetronics - International Conference,
 Hartford, April 1966, Volume 2, covering
 microwave and semiconductor devices,
 superconductivity and magnetic
 materials 24 p4260 A66-43170
 Material selection for linear ferrite devices
 including determination of internal biasing
 field, estimate of required saturation
 magnetization, etc 24 p4260 A66-43171
MICROWAVE ATTENUATION
 Space-diversity reception with common
 antenna control over several frequency bands
 combating microwave
 fading 02 p0189 A66-11367
 Microwave permeability and permittivity
 determined by measuring RF shift in
 cylindrical resonant
 cavity 04 p0558 A66-13419
 Ultrashort wave attenuation and damping
 on long open tracks, discussing wave
 scattering and reflection in inhomogeneous
 atmosphere 04 p0482 A66-14006
 Measuring rapidly changing microwave
 power and attenuation, using swept-
 frequency bridge circuit 05 p0644 A66-14581

Microwave attenuation method of
 measuring parameters of motion of billet
 during sheet stamping 11 p1710 A66-22859
 Ultrashort wave attenuation and damping
 on long open tracks, discussing wave
 scattering and reflection in inhomogeneous
 atmosphere 12 p1813 A66-23868
 Precision DC potentiometer microwave test
 set for coaxial or waveguide insertion loss
 measurement 12 p1843 A66-24673
 Microwave attenuation characteristics of
 rocket exhaust, examining effects of
 propellant composition, motor configuration
 and missile trajectory
 [AIAA PAPER 65-181] 12 p1820 A66-24689
 Q band propagation test carried out over
 12-km path, comparing rainfall attenuation
 with rainfall rate over path, noting scatter
 of measured values 13 p2023 A66-25567
 Fine-grain structure effect on microwave
 power absorption thresholds of
 ferrimagnetic garnets and
 spinels 14 p2350 A66-26880
 Microwave rotator using hot carrier
 property of n-type
 germanium 14 p2248 A66-27056
 Electromagnetic wave interaction with
 rocket exhaust plasmas and degradation of
 guidance, telemetry and tracking
 systems 14 p2237 A66-27509
 Absorption of high power microwaves,
 using rectangular waveguide with long axial
 slot in side wall and water-filled dielectric
 tube adjacent to slot 14 p2253 A66-27530
 Measurement of ultrasonic attenuation vs
 temperature for longitudinal and transverse
 phonons in seminsulating gallium
 arsenide 15 p2563 A66-28729
 Formula derived for estimating reflection
 coefficient of cylindrical resistive-film
 attenuator for traveling wave
 tube 16 p2660 A66-30617
 P-i-n diode for microwave variable
 attenuator 17 p2891 A66-32914
 Negative absorption /amplification or
 oscillation/ of microwaves by cylindrical
 cavity coaxial with plasma column along
 magnetostatic field 17 p2973 A66-32978
 Microwave absorption in normal conducting
 films of gold plated onto superconducting
 tin indicates resistivity and transition
 temperature of gold consistent with
 proximity effect 19 p3443 A66-35999
 Low effective resistivity of gold film
 plated onto tin determined by low
 temperature microwave absorption
 measurement and explained by free-electron
 model and superconductivity proximity
 effect 19 p3443 A66-36000
 Attenuation, guide wavelength and
 characteristic impedance of rectangular
 waveguides with indium antimonide side
 wall derived for propagating
 modes 20 p3524 A66-37113
 Microwave energy attenuation by
 dissipative material consisting of epoxy
 resin loaded with fine powder of iron
 carbonyl 20 p3587 A66-37585
 Microwave attenuation magnitude
 associated with exhaust plasma of
 nonaluminized and aluminized composite
 propellant 21 p3807 A66-38687
 Induced microwave absorption in carbon
 dioxide studied at frequency of 9260 mc/sec
 over temperature range from 270 to 500
 degrees K and pressures as high as 95
 atm 22 p3985 A66-40909
 Resonance curve analysis from microwave
 absorption measurements on polycrystalline
 ferrimagnetic doped and undoped garnets at
 room and low temperatures, with application
 to low noise receivers 24 p4260 A66-43172
MICROWAVE CIRCUIT
 Design of wideband microwave delay line
 using piezoelectric semiconductor
 transducers with acoustic
 gain 01 p0038 A66-10523
 Long-distance free space microwave
 circuits noting repeater stations on
 satellites, satellite orbit, type of traffic
 handled, equipment, ground stations,
 etc 01 p0030 A66-10861
 Above resistive cut-off frequency operation
 of tunnel diode in microwave oscillator for
 series and parallel
 circuits 02 p0199 A66-11874
 Varactor circuits as source of solid state
 microwave power discussing basic theory,

varactor-multiplier chains and
 upconverters 04 p0503 A66-13728
 Protective automatic switching systems for
 high-capacity radio
 channels 04 p0495 A66-13802
 Amplitude response curves for HF circuits
 in transistorized feedback amplifier
 determined, using polar-diagram
 method 05 p0647 A66-14680
 Propagation of microwaves through circular
 cylindrical metallic guide filled with two
 different dielectrics 06 p0857 A66-16951
 Microwave all-pass circuits consisting of
 reactive networks used in conjunction with
 wideband circulators or couplers, noting
 resultant phase distortion 07 p1006 A66-17502
 Tunnel diodes for low noise amplifiers at
 microwave frequencies 07 p1009 A66-17848
 Strip transmission line for microwave
 circuit design such as varactor multiplier
 frequency sources, filters, multiple pole
 diode switches, etc 09 p1356 A66-20672
 Microwave circuit design using strip
 transmission line, noting single-sideband
 suppressed carrier modulator, tunnel diodes
 in low-noise amplifiers,
 etc 10 p1512 A66-21757
 Microwave circuit design for HF amplifiers
 and radar systems using either hybrid
 approach with germanium transistors or
 monolithic one with silicon
 transistors 10 p1512 A66-21761
 High-efficiency microwave frequency
 doublers using varactor diode design by
 technique based on Manley and Rowe
 energy relations 10 p1512 A66-21763
 P-i-n diode modulators for K and Q
 frequency bands, extending operation from
 18 to 40 gc 10 p1513 A66-21856
 High sensitivity fast-response laser
 detection system, describing microwave
 response photoelectric detector with
 amplification and mixing
 functions 10 p1544 A66-22046
 Linear microwave amplification in n-type
 gallium arsenide bulk semiconductor at
 room temperature, noting negative
 conductance and peak
 gain 10 p1515 A66-22079
 Silicon diode microwave oscillators and
 amplifiers, noting application of avalanche
 transit time for increased efficiency of p-n
 junctions 10 p1515 A66-22090
 Phase locking of two gallium arsenide
 oscillators at 2 to 4 gc under CW
 operation 10 p1516 A66-22097
 Microwave amplification in n-type
 germanium arsenide 10 p1516 A66-22098
 High-ratio multipliers and tunnel diode
 generators as solid state microwave sources
 considered in analysis of varactor
 circuits 11 p1670 A66-23196
 Basic structure of cylindrical diode
 package mounted with axis normal to
 parallel metal surfaces extending beyond
 diode package 12 p1831 A66-23905
 Bulk germanium arsenide operating
 simultaneously as microwave amplifier,
 mixer and oscillator under continuous wave
 conditions 12 p1835 A66-24144
 Antennas, microwaves, electron devices -
 IEEE International Convention, New York,
 March 1966 12 p1838 A66-24613
 Klystron and TWT, generating high powers
 at millimeter wavelengths, combined in
 single amplifier for radar
 systems 12 p1839 A66-24614
 Microwave integrated circuits in radar
 systems, detailing airborne forward-looking
 radar, using phased arrays and pulse
 compression 12 p1840 A66-24620
 Hot-carrier diode characteristics and
 application to HF and microwave devices
 such as mixers and
 detectors 13 p2031 A66-25359
 Circuits incorporating varactor diodes,
 pumped at IF, as mixers, analyzing circuit
 characteristics 14 p2236 A66-27352
 TE surface wave determined by
 propagation and external magnetic field
 directions used in microwave
 circuits 14 p2363 A66-27518
 Backward diode application to microwave
 circuit design, discussing characteristics of
 stripline mount with probe
 detector 15 p2457 A66-28886
 Microwave equivalent steady state circuit
 parameters of reverse-biased p-i-n diode as

function of process variables 15 p2458 A66-28891

Nonuniform transmission line generalization, noting application to proportional networks, exponential and Bessel lines 15 p2471 A66-29325

Measurement of sticking coefficient for thermal electrons in oxygen and air, using microwave circuits 16 p2756 A66-30101

Tunnel diode application to tunable microwave oscillators, noting coupling to high Q factor resonator for frequency stability 17 p2885 A66-32287

Noise characteristics of solid state, X-band microwave sources, using VHF crystal oscillator, amplifier and varactor multiplier 17 p2893 A66-32924

Solid state microwave source for severe vibration environment and 20 mw of power, discussing circuit design, noise performance, frequency stability 17 p2893 A66-32925

Microwave stripline circuit design 17 p2896 A66-33364

Hybrid circuits at hyperfrequencies, considering distribution matrix and oriented graph 18 p3090 A66-34397

Measurement of varactor diode characteristics for subsequent application in microwave low-noise parametric amplifiers 19 p3313 A66-35471

Semiconductor-metal-semiconductor transistor performance in microwave circuits, noting current gain and impedance levels 20 p3527 A66-37402

Electrical properties, design and construction of microwave varactor diodes with diffused p-n junctions 20 p3529 A66-37589

Performance characteristics of avalanche-breakdown transit-time GaAs varactor diodes for miniaturized microwave circuits 22 p3874 A66-39991

Ultraminiature ferrite device design parameters for application in microwave receiver systems 22 p3880 A66-40738

Solid microminiature semiconducting materials and devices for microwave communications noting germanium and silicon role, microcircuits, plasma effects, floating zone techniques, etc 24 p4186 A66-43078

MICROWAVE COUPLING

Continuously tunable microwave delay equalizer consisting of 3-db directional coupler and two equal resonators 03 p0344 A66-13023

Interdigital band pass filters and related coupled structures, deriving exact equivalent circuits from impedance matrices 06 p0845 A66-16085

Reentrant directional coupler using strip transmission, noting coaxial coupler 06 p0847 A66-16099

Pure spin and spin-acoustic delay modes of single crystal YIG 06 p0847 A66-16104

Microwave reflectometer instrumentation for Ames light-gas guns, measuring time-distance values of projectiles during acceleration 24 p4209 A66-42185

MICROWAVE FILTER

SA WAVEGUIDE

Synchronous tuning of microwave filters involving small changes in rejection bandwidth and being consistent with Chebyshev response 01 p0044 A66-10936

High power microwave filters discussing dominant mode and harmonic filters, design, parameters, application and limitation 04 p0493 A66-13677

Design of microwave filters 06 p0844 A66-16079

Microwave filters, discussing cascaded lines of cavities, band pass and band stop filters, group delay, dissipation loss, etc 06 p0844 A66-16080

Band stop filters, discussing insertion loss vs frequency characteristics for large and small dissipation and arbitrary number of resonators 06 p0845 A66-16088

Yttrium iron garnet filters, noting envelope limiting characteristics for submegacycle range modulating frequencies and response parameters 06 p0845 A66-16089

Quarter-wavelength inhomogeneous impedance transformers, discussing design parameter calculation for nearly equal-ripple performance 06 p0845 A66-16090

YIG resonator tuning for low noise

parametric amplifier 07 p1006 A66-17504

Filter with two tuned circuits and distributed coupling based on equations for complex values of tuned circuit currents, noting formulas for mutual impedance 10 p1510 A66-21673

P-i-n diode coaxial attenuators and levellers noting design, performance parameters and application 12 p1831 A66-23812

Solid state UHF telemetry converter using microwave interdigital multiplexing filter containing integrated semiconductor elements 12 p1840 A66-24622

Half-wavelength resonators as capacitive-gap strip-line bandpass-type microwave filters, discussing parameter derivation for equivalent circuit and Cohn synthesis method 18 p3087 A66-34621

Microwave general four-resonator filter, with data on filter couplings tabulated for various center frequencies 19 p3317 A66-35720

Optimum microwave filters with even number of sections, using first-order Chebyshev polynomial to obtain equivalent circuit 23 p4037 A66-41515

MICROWAVE FREQUENCY

Controlled bulk semiconductor amplification possible using n-type gallium arsenide with applied electric field greater than 3000 v/cm 01 p0038 A66-10351

Series resistance of epitaxial silicon diodes as function of bias, using transmission loss method 01 p0036 A66-10396

Doppler effects of plasmas in semiconductors in microwave field, examining beat frequency relationship to plasma velocity 01 p0120 A66-10514

Microwave permeability and permittivity measurement, knowing resonant frequency of unperturbed cavity and distribution of electric and magnetic field 01 p0025 A66-10527

Microwave oscillations in plasma-beam systems 01 p0113 A66-10595

Radar interference and attenuation in rocket exhausts, noting effect of altitude and tests at microwave bands 02 p0278 A66-11514

Magnetoelastic coupling constant in microwave frequency of ferrites and garnets 03 p0408 A66-12418

Synchronization of microwave oscillations in n-type GaAs, noting pulse spectrum 03 p0377 A66-12444

Pulsed microwave irradiation of dogs noting body weight, rectal temperature and hematologic response 03 p0326 A66-13351

Microwave power by parametric frequency multiplication in transistors, noting equivalent circuits 05 p0644 A66-14577

Microwave power generation from avalanche diffused and epitaxial silicon and gallium arsenide varactor diodes 06 p0851 A66-16462

Light modulation at microwave frequencies noting single-sideband suppressed-carrier modulation, traveling wave modulation, etc 07 p1003 A66-18328

Airborne microwave reconnaissance receiver design with almost zero IF 08 p1226 A66-19535

Microwave frequency feedthrough for vacuum systems suitable for use up to X-band, using Teflon-filled rigid type coaxial line 08 p1197 A66-19700

Microwave power generation by multiplication of direct current and microwave magnetic field, using biased intermetallic semiconductor magnetoresistive element in cavity 08 p1198 A66-19746

Plasma instability in solids occurring in microwave frequency region 10 p1576 A66-21537

Transient behavior of varactor bridge doubler examined, using direct digital integration of circuit equations 10 p1513 A66-21859

CW microwave oscillation in bulk GaAs, discussing harmonic content, linewidth, circuit and electronic tunability, etc 10 p1585 A66-22077

Threshold field dependence on intervalley separation in transferred electron GaAs oscillator 10 p1586 A66-22093

Ferrites for resonance-directional insulators and circulators, noting properties

at microwave frequencies and applicability 11 p1664 A66-22659

Microwave regenerative amplifier using reflex klystron, considering beam current, supply voltages, mismatch, input and output amplitudes, phase lead, etc 11 p1655 A66-22725

Current-voltage characteristics of CW X-band GaAs microwave Gunn generator 11 p1713 A66-23029

Longitudinal plasma oscillations excited in warm plasma column at microwave frequencies in presence of magnetic field, manifest themselves as absorption peaks near harmonics of electron cyclotron frequency 11 p1748 A66-23395

HF elastic-wave propagation and detection in study of structural properties of condensed matter 12 p1925 A66-23658

Monograph on microwave frequency space-charge waves in electron beams including electron-wave oscillators, resonators and magnetrons 12 p1813 A66-23740

Mechanisms which can introduce frequency-dependent effects, gauging importance in semiconductor microwave devices including crystal valves, diodes, etc 12 p1831 A66-23790

Overlay transistor operation characteristics in microwave field 12 p1834 A66-24102

Hologram television transmission using microwave wavelength, yielding aperture-limited resolution and aperture-size reduction method for low resolution 12 p1881 A66-24152

Stripline cavity resonator for low microwave frequency measurements of magnetic and dielectric properties of ferrites 12 p1881 A66-24156

Transverse wave FM phototube system for detection of microwave-frequency modulated light, noting design, operation and application 12 p1838 A66-24558

Deposition of cadmium selenide films for transducers of electromagnetic energy to acoustic energy at microwave frequencies, noting use of multiple film assemblies 12 p1839 A66-24616

Microwave absorption in compressed carbon dioxide between 150 and 300 gc measured, detecting no losses at 150 gc 13 p2021 A66-25383

Microwave varactor diode efficiency as waveguide frequency modulator and multiplier 13 p2039 A66-25641

Electronic components for microwave power engineering, employing electromagnetic amplifying lenses, microwave rectifiers, etc 13 p2039 A66-25784

Spatial variations in electron temperature produced in steady state plasma by electromagnetic standing wave 13 p2155 A66-26678

Magnetostrictively generated microwave acoustic pulse in thin films of Dy, Ho, Gd and Er 14 p2350 A66-26876

Hot carrier microwave detector based on thermoelectric effect of warm carriers in bulk semiconductor and assuming Maxwell-Boltzmann distribution for heated carriers 15 p2461 A66-29014

Transport properties in indium antimonide under magnetic field at microwave frequency, showing effect of angular frequency times relaxation time /of electrons and holes/ 15 p2566 A66-29393

Stable microwave oscillations in single crystal Ge alloy p-n junction diodes 15 p2567 A66-29402

Gallium arsenide varactor diode design for parametric amplifiers and multipliers, noting efficient harmonic generation at higher microwave frequency 15 p2466 A66-29677

Extension of work on ground wave propagation along two-section mixed paths to three-section paths, using microwave frequency, water and aluminum plates 15 p2452 A66-29858

Tunnel diode detectors superior to point-contact diodes because of broader linear characteristic, greater sensitivity and less temperature dependence 16 p2660 A66-30614

Fabrication of interconnections for integrated circuits operating at microwave frequencies 16 p2665 A66-31433

Low noise photodiodes with avalanche multiplication for high sensitivity, noting capability for low intensity wideband signal

ation, performance in IR region, 17 p2880 A66-31934
 speed microwave frequency
 resizer with digital 17 p2897 A66-33438
 plastic-array microwave grating quartz
 flucor creates variable delay
 characteristic with 18 p3075 A66-33608
 noise traveling wave amplifier noting
 onents, noise figures, gain, dynamic
 life test results, frequency response,

 ating shock wave as it grows to
 nation in explosive 03 p0369 A66-12795
 ocity measurements of electron front in
 romagnetically generated T-tube shock
 s made with microwave

interferometer 04 p0558 A66-14479
 Microwave phase measurement technique
 using slotted-line interferometer for
 optimum accuracy 10 p1537 A66-21874
 Fabry-Perot interferometer with mirrors in
 form of metallic strips to facilitate use in
 far IR and microwave spectral
 regions 11 p1704 A66-22347
 Probe and microwave interferometric
 measurements performed on plasma in Q
 devices for data on plasma
 losses 11 p1744 A66-22444
 Plasma wave propagation and decay
 processes studied from profiles of plasma
 density in cylindrical metal vessel and
 results compared to Stark effect and
 framing camera photographic
 results 13 p2149 A66-26240
 Microwave helicon interferometer bridge
 technique for studying helicon wave
 propagation and related transmission
 phenomena in semiconductor
 plasma 13 p2083 A66-26555
 Time resolved electron density
 measurements with microwave
 interferometer used in weak afterglow
 plasma diagnostics 13 p2083 A66-26556
 Multiple reflections in microwave
 interferometers as cause of higher number
 density of plasma 15 p2503 A66-29406
 Laser application as measuring equipment
 in metal working, discussing surface-grazing
 interferometer, feedback laser device and
 length measuring laser
 [ASME PAPER 66-MD-43] 21 p3742 A66-38491
MICROWAVE PLASMA PROBE
 Fabry-Perot resonators compared with
 cavity resonators and microwave
 interferometers for plasma diagnostics,
 noting electron density
 application 03 p0398 A66-12525
 Space shift between electron density and
 luminous intensity of plasma in stationary
 striation by microwave
 resonator 03 p0372 A66-13282
 Plasma density measurements by
 microwave cavity as affected by cavity holes
 and plasma nonuniformity 04 p0551 A66-13752
 Microwave bridge to determine electron
 density in weakly ionized decaying
 plasmas 04 p0555 A66-14321
 Plasma in accelerating waveguide
 investigated by correlating direct and
 reflected waves of two microwave
 probes 06 p0919 A66-16888
 Semiconductor surface plasma density and
 conductivity, calculating distribution and
 variation via energy band
 curvature 06 p0929 A66-16981
 Monograph on microwave and IR
 techniques to investigate
 plasmas 09 p1402 A66-20328
 Three-centimeter wavelength frequency
 multiplier using gas-discharge plasma in
 nonuniform electric field, examining
 amplitude and phase
 instability 09 p1358 A66-20793
 Plasma frequency determined by
 microwave bridge measurement of cut-off
 effect of plasma near electron cyclotron
 resonance 10 p1536 A66-21863
 Microwave plasma torch noting design,
 operation and application 12 p1857 A66-23813
 Plasma density distribution determined
 from microwave beam refraction as function
 of angle of incidence 12 p1922 A66-24217
 Helical instabilities in magnetoplasmas
 studied, using low-power level microwave
 propagation techniques 13 p2143 A66-25716
 Microwave measurement techniques for
 helium afterglow plasma 14 p2342 A66-27504
 Comparison between microwave and
 Langmuir probe plasma diagnostic
 techniques 14 p2343 A66-27506
 Multiple reflections in microwave
 interferometers as cause of higher number
 density of plasma 15 p2503 A66-29406
 Microwave scattering from large amplitude
 oscillations in cesium plasma, noting cross
 section magnitude and nonlinear
 effects 15 p2556 A66-29810
 Turnstile multiple-probe microwave
 polarimeter for anisotropic plasma
 diagnostics 20 p3609 A66-37630
 Microwave plasma diagnostics using
 longitudinal radio wave
 propagation 21 p3790 A66-39068

Spectroscopic and microwave analysis
 plasma emission spectrum, density, electron
 concentration and layer velocity in
 electrodeless induction
 discharge 21 p3790 A66-39069
 Electron density distribution in
 electromagnetic shock tube measured, using
 transverse microwave cavity and radiating
 slots in oversize plasma
 waveguide 21 p3739 A66-39382
 Three-centimeter wavelength frequency
 multiplier using gas-discharge plasma in
 nonuniform electric field, examining
 amplitude and phase
 instability 22 p3874 A66-39852
 Plasma density distribution determined
 from microwave beam refraction as function
 of angle of incidence 22 p3957 A66-40581
 Microwave discharge technique for
 depositing noncrystalline oxide films of
 silicon, germanium, boron, titanium and
 selenium on substrates by decomposing
 compounds by oxygen
 plasma 23 p4109 A66-41129
 Transient ionization levels of hypersonic
 velocity projectile wakes measured by open
 microwave resonators phase shift
 observation 24 p4209 A66-42194
 Transmission resonant cavity measurements
 of electron line densities and collision
 frequencies in ionized wakes of
 hypervelocity projectiles 24 p4191 A66-42195
 Electron number densities measured
 behind shock wave in pressure driven shock
 tube by microwave resonant cavity
 technique and by electrostatic quasi-
 Langmuir probe 24 p4191 A66-42197
 Plasma waves and oscillations, examining
 HF response of laboratory plasma to
 electromagnetic waves 24 p4246 A66-43116

MICROWAVE PROBE

Microwave diagnostics of nonperturbing
 plasma, noting wave propagation
 characteristics in various
 plasmas 04 p0522 A66-14198
 Explosive shock wave velocity
 measurement by microwave transceiver in
 waveguide 04 p0566 A66-14281
 Anisotropy of microwave conductivity and
 absorption in semiconductors with hot
 carriers, studying distribution function of
 electrons 07 p1106 A66-18380
 Anechoic chamber facility for surface field
 measurement in scattering studies using
 probes 10 p1520 A66-21638
 Electron density in shock-produced argon
 plasma measured by microwave reflection
 probe 14 p2340 A66-27025
 Microwave absorption by water vapor and
 mixtures with other gases between 100 and
 300 gc/s, noting increase in absorption
 attributed to molecular collision-induced
 polarization 15 p2450 A66-29004
 Magnetoresistance effect in semiconductors
 applied to microwave power measurement,
 noting multiplying action between electric
 and magnetic field components of
 wave 17 p2885 A66-32288
 Book on microwave spectroscopy of
 gases 18 p3065 A66-35237
 Abnormal high electron escape rate in
 Tokamak-2 toroidal chamber determined by
 microwave probe, noting plasma-loop
 equilibrium breakdown as possible
 cause 19 p3427 A66-36575
 Microwave interference measurement of
 shock velocity in shock tube, noting
 standing wave pattern 21 p3736 A66-38798
 Venus atmosphere noting pressure induced
 absorption in carbon dioxide-nitrogen
 atmosphere as indicated in decline of
 microwave brightness
 temperature 24 p4277 A66-42668
 Metrology and precision mechanics -
 National Conference, Warsaw, September
 1966 24 p4214 A66-43011

MICROWAVE RADIATION

Microwave radiation and surface patterns
 formed during application of high currents
 and magnetic fields to
 n-InSb 01 p0117 A66-10244
 Theories of damped oscillations and
 microwave radiation from InSb in
 breakdown state 01 p0112 A66-10512
 Hydrogen atom beam characteristics
 discussing signal power, generating
 frequency, radiation signal damping and
 hydrogen atom relaxation

time 03 p0380 A66-13316

Microwave emission at O-band from n-and p-type indium antimonide subjected to applied electric and magnetic fields 04 p0564 A66-14103

Airborne measurement of microwave emission from Earth surface and atmosphere for potential application of radiometry to weather satellite reconnaissance 05 p0675 A66-15765

Coherent current oscillations observed in dark conductive In-doped CdS at 77 and 300 degrees K 06 p0925 A66-16659

Ground state ESR saturation effect on ruby laser output frequency at cryogenic temperature 06 p0892 A66-16753

Slab with periodically modulated refractive index, predicting short wave radiation pattern emitted 06 p0836 A66-16983

Aerial radiation patterns, discussing determination through near field pattern processing 06 p0858 A66-16994

Microwave emission from InSb, measuring energy generated at low temperatures and intense electric and magnetic fields 07 p1103 A66-18218

Saturation of microwave impedance and occurrence of microwave emission in indium antimonide for strong longitudinal or transverse magnetic fields 08 p1270 A66-19059

Frequency components of microwave-range oscillations from pulsed avalanche diodes of Read type driven to breakdown region 09 p1350 A66-19927

Jupiter microwave emission, noting brightness distribution, Van Allen belt flux density and polarization 09 p1450 A66-20105

Characteristics of lines exhibited in structure of microwave radiation from bounded plasma column 09 p1409 A66-20850

Biological changes due to microwave absorption, examining energy losses due to ion conductivity and dielectric losses due to polarization relaxation in water molecules 09 p1336 A66-20931

Radar echoes and microwave and radio emissions from Moon and planets 10 p1601 A66-21063

Microwave emission from bulk n-type indium arsenide in presence of applied electric and magnetic fields at liquid nitrogen temperatures 10 p1572 A66-21069

Superconducting magnet for variable bandwidth traveling wave masers, noting amplifier bandwidth increase via gain reduction 10 p1542 A66-21417

Gunn effect oscillations in high resistivity gallium arsenide cease when product of conduction electron density and sample length drops below certain level 10 p1585 A66-22076

Current oscillations and microwave emission in indium antimonide subjected to high applied parallel electric and magnetic fields at 77 degrees K 10 p1585 A66-22082

Radiating mechanisms in reflector antenna system including aperture radiation, direct feed radiation and diffracted radiation 11 p1673 A66-23481

Microwave generation with conventional transistors in avalanche mode, describing circuit, mounting construction and avalanche oscillator frequency output 12 p1830 A66-23757

Microwave emission from crystal of n-type CdS illuminated by mercury lamp or laser in strong electric field 13 p2162 A66-25199

Nonthermal microwave radiation from plasma of electrodeless induction discharge, establishing correlation between microwave and X-ray radiation 13 p2143 A66-25710

Microwave radiation from inductive posts of indium antimonide in broadband spectrum occurring when placed in DC magnetic field and pulsed to average electric field, results suggest solid state plasma instabilities 14 p2363 A66-27517

Hydrogen atom beam characteristics, discussing signal power, generating frequency, radiation signal damping and hydrogen atom relaxation time 14 p2310 A66-28289

Josephson type superconducting tunnel junction for generation of microwaves and submillimeter waves 15 p2461 A66-29012

Rejection of Jones ionospheric model where Venus microwave emission is

attributed to free-free electron emission, analyzing formation of dense Cytherean ionosphere 15 p2597 A66-29255

Cosmic microwave radiation from observations of interstellar CN rotational temperature, rotational excitation by H I region H atoms and excitation by slow electrons and slow protons in H II region 16 p2793 A66-30200

Physical interpretation of type IV bursts, accounting for polarization characteristics, noting gyroresonance radiation due to lower energy electrons 16 p2794 A66-30654

Book on electronics and electron physics advances including fast ion scattering, kinetic ejection of electrons, plasma application in microwaves, etc 16 p2747 A66-30794

Optical pumping mechanism for anomalous excitation of OH microwave emissions from H II regions 16 p2807 A66-31756

Altered physiologic function of dogs produced by exposure to pulsed microwaves including study of combined effect of X-irradiation 17 p2856 A66-32156

Harmonic generation in microwave emission from InSb, attributing resonance type radiation to stimulated cyclotron radiation and plasma wave excitation 17 p2978 A66-32410

Near field phase and amplitude measurements of small radiating structures, using standard microwave equipment 18 p3075 A66-33619

Intense microwave radiation from high density plasma confined by magnetic mirror 18 p3145 A66-34114

Flute stability characteristics and cyclotron frequency microwave emission from low-energy plasma confined in magnetic mirror 19 p3426 A66-36566

Fast overlap of microwave radiation by ionization aureole of spark in laser beam 19 p3376 A66-36719

Stimulated emission processes interpreting OH microwave emission from points in sky, using anisotropic UV radiation which leads to molecule alignment and population inversion 20 p3650 A66-37343

Scanning antenna operating principles, noting adjustment of directivity to receive radio waves from long distance 20 p3530 A66-37713

Superconducting point contact diodes for observation of microwave radiation generated by bridge with and without constant voltage steps 20 p3620 A66-37776

Transhorizon microwave propagation measurements using rapidly scanning phased-array antenna 20 p3520 A66-38356

Microwave and X radiation from plasma produced by electrodeless discharge in hydrogen, showing presence of accelerated electrons leading to plasma oscillations 21 p3783 A66-39023

IR and microwave radiations associated with current controlled instability/negative resistance/ in GaAs, noting Gunn threshold and V-I characteristics 21 p3802 A66-39162

Plasma waveguide parameter changes due to additional gas ionization from microwave field 22 p3952 A66-39651

Charge transfer between water drops relevance to radiation problem and efficiency of conversion of electrostatic to electromagnetic energy 22 p3942 A66-39679

Microwave background radiation field accounted for by integrated effect of population of radio sources if CN excitation is collisional in origin 22 p3978 A66-40004

Kaufman assumption regarding universe expansion considered untenable because it requires intergalactic hydrogen temperature to remain constant while hydrogen has expanded in volume 22 p3978 A66-40008

Cosmic microwave background radiation, considering statistically homogeneous and isotropic but nonuniform distribution of matter 22 p3978 A66-40009

Microwave emission frequency shift during uniaxial stress on Si epitaxial planar and diffused mesa type diodes 23 p4044 A66-41299

Laser beams and resonators, discussing beam propagation in free space, geometrical optics application and resonator modes in view of aperture diffraction effects 24 p4225 A66-42806

MICROWAVE RADIOMETER

Continuous moving-scene display system for output of airborne mapping sensors such as radars, microwave radiometers and laser scanners 06 p0878 A66-1596

Five-channel microwave radiometer measurements of Venus near 1-cm wavelength 14 p2386 A66-2812

Radiometric measurements of atmospheric absorption at 600 gc/s by DICKE type superheterodyne receiver, using harmonic mixing 15 p2450 A66-28993

Microwave radiometry feasibility as technique for navigation data-sensing in Army aircraft 23 p4089 A66-4131

MICROWAVE REFLECTOMETRY

Stability and gain prediction of microwave tunnel diode reflection amplifier, using Smith chart 07 p1007 A66-1750

Microwave transmission and reflection coefficients of thin films in normal and superconducting states 09 p1416 A66-20027

Microwave reflection measurements for precursor in electromagnetically driven shock tube, discussing axial distribution and electron density 09 p1409 A66-20850

Range requirements in radar cross section measurements in terms of permissible variations in amplitude and phase of incident field at target 10 p1498 A66-21603

High accuracy nonspherical reflector fabricated for millimeter and submillimeter wavelength region 10 p1540 A66-21863

Surface electron density in magnetoplasma and microwave reflection from anisotropic plasma surface 13 p2149 A66-26243

Electromagnetic spectrum of upper atmosphere examined, using microwave techniques, noting molecular rotation of gases with permanent electric or magnetic dipole moments 16 p2698 A66-3104

Reflection type microwave modulator with semiconductor filled resonant cavity 17 p2896 A66-3330

Structural vibration of large microwave-steerable radio telescopes and large paraboloidal reflectors due to wind loading 18 p3255 A66-34263

Two-dimensional reflector with large angular field theoretically and experimentally studied, using geometrical optics 21 p3710 A66-38743

Microwave reflectometer instrumentation for Ames light-gas guns, measuring time-distance values of projectiles during acceleration 24 p4209 A66-42183

Electrostatic probe and VHF microwave reflectometry study of nitrogen flow around models in hotshot wind tunnels, determining plasma sheath physical characteristics 24 p4191 A66-42193

Precision DC potentiometer test for measuring microwave coaxial or waveguide insertion loss 24 p4182 A66-42577

MICROWAVE RESONANCE

Frequency stabilization for narrow band microwave oscillators, using supplementary resonator connected by transmission line with basic resonator of oscillator 04 p0496 A66-13904

Microwave molecular resonance and bremsstrahlung continuum from flames measured with maser radiometer at various pressures [AIAA PAPER 65-106] 05 p0793 A66-15780

Circular TE sub 011 mode, trapped mode band pass filters, discussing energy radiation mechanism, design, operation and test results 06 p0845 A66-16087

Plasma permittivity modulation by ion waves for thermally ionized alkali plasma in microwave resonator 08 p1266 A66-19811

Characteristics of quasi-optical conduction millimeter wave resonator with gas, showing resonance absorption 09 p1381 A66-20492

Resonant frequencies for fundamental modes in circular cylindrical and rectangular parallelepiped dielectric resonators calculated for various physical dimensions and dielectric constants 10 p1513 A66-21905

Fox and Li pattern verification in microwave open resonator 11 p1704 A66-22390

Self-oscillations of dielectric rods between two metallic plates 11 p1669 A66-23104

Ghost modes in open microwave resonator waveguides containing dielectric slabs of rectangular geometry with anisotropic

electric constant 14 p2246 A66-26796
 inverse resonance solution of uniform
 modal waveguide 14 p2258 A66-27964
 magnetic microwave resonance
 for use in 15 p2459 A66-28936
 guides 15 p2459 A66-28936
 Q open resonator using two-conical
 and capable of traveling wave
 at millimeter and submillimeter
 lengths 15 p2461 A66-29011
 tron wave resonances in bounded
 as, examining application to average
 density
 measurement 18 p3145 A66-34113
 quency stabilization for narrow band
 wave oscillators, using supplementary
 rator connected by transmission line
 basic resonator of 20 p3532 A66-37862
 resonators, oscillators and filters in
 wave design 22 p3880 A66-40737
WAVE SCATTERING
 ma scattering measurements using
 wave parallel-plate
 rometer 01 p0028 A66-10565
 wave scattering from nonequilibrium
 as where electrons have large steady
 velocity with respect to 02 p0266 A66-11479
 wave scattering by dielectric slabs of
 width and hollow wedge formed by
 dielectric slabs 03 p0331 A66-12306
 tering of microwaves from bodies
 er than one wavelength used for
 a diagnostics 04 p0487 A66-14368
 dispersion in barium titanate
 electric crystals explained as
 wave scattering 06 p0926 A66-16717
 le plasma belt trapped in permanent
 r magnetic field, measuring floating
 tial, electric and magnetic drifts,
 08 p1265 A66-19408
 wave scattering theory applied to
 dense cylindrical plasma
 urements 09 p1409 A66-20851
 wave scattering system for detection
 olds in fiberglass-honeycomb ablative
 rials causing drop in receiver signal
 09 p1385 A66-20966
 endence of mean scattered power on
 ring geometry and wavelength in
 of scale roughness and rms slope of
 onents for bistatic
 ering 10 p1499 A66-21612
 arison of microwave scaling method
 optical simulation technique for
 ring radar cross 10 p1502 A66-21630
 tering technique for measuring surface
 nt density on cylindrical
 cles 10 p1502 A66-21637
 g distance propagation of ultrashort
 waves by ionospheric scattering in
 lar region, noting graphs of signal
 changes 12 p1817 A66-24290
 rowave scattering enhancement in
 lent magnetoplasma 12 p1824 A66-24810
 tering of incident beam of microwaves
 lf-excited plasma waves in mercury arc
 n, deriving dispersion curve for plasma
 s, identifying propagating
 roacoustic waves as responsible for
 ering 12 p1825 A66-24964
 rowave transmission and scattering
 ured in laboratory plasma, noting
 g regions occulting microwave beam,
 ence of turbulence elements and
 y spectrum of uniformly scattered
 onent 13 p2143 A66-25709
 etrical and physical characteristics and
 ution density of aerosols in
 mining microwave scattering and
 ction properties in connection with
 angels 14 p2237 A66-27396
 rowave scattering from large amplitude
 ations in cesium plasma, noting cross
 on magnitude and nonlinear
 15 p2556 A66-29810
 an scattering of microwaves by plasma
 ations 16 p2758 A66-30296
 ic diffraction mechanism used in
 spheric transhorizon
 agation 17 p2876 A66-33361
 herent scattering of microwaves by HF
 resons resulting from beam-plasma
 ility 18 p3066 A66-33669
 ndral plasma beam simulation of
 t exhaust turbulence and scattering

effects on microwave
 propagation 18 p3069 A66-34253
 Microwave transmission through turbulent
 plasma of Zeta machine, examining transport
 theory by use of Boltzmann
 equation 19 p3429 A66-36584
 Interband microwave scattering of holes by
 cyclotron resonance in
 Ge 21 p3797 A66-38753
 Microwave and optical range
 electromagnetic wave scattering in plasma,
 noting frequency and power of probing
 signal 21 p3789 A66-39066
 Born approximation for phase shift of
 microwaves scattered from underdense
 cylindrical plasma used to determine plasma
 electron density 21 p3794 A66-39572
MICROWAVE SPECTRUM
SA INTERSTELLAR MICROWAVE
SPECTRUM
 Microwave oscillations from reverse-biased
 planar silicon diode chip operating at X-
 band frequencies 03 p0338 A66-12431
 Microwave rotation spectrum for GeS in
 frequency ranges from 10.7 to 11.4 and 32.1
 to 34.1 gc at temperatures between 450 and
 650 degrees C 04 p0567 A66-14336
 Microwave emission from InSb in magnetic
 fields, explaining experimental results via
 modified traveling wave helicon
 model 07 p1104 A66-18219
 Radio observations of Mercury, Venus,
 Mars, Saturn and Uranus compared with
 other observational method 09 p1450 A66-20109
 Venus cloud layer and brightness
 temperature from radiometric microwave
 observations from nocturnal side of
 planet 09 p1451 A66-20112
 Microwave radar observations of Venus,
 discussing surface thermometric
 temperatures, greenhouse effect,
 etc 09 p1451 A66-20113
 Frequency spectrum of microwave emission
 from n-type gallium
 arsenide 10 p1574 A66-21354
 Velocity and lifetime of microwave thermal
 phonons in liquids and solids determined by
 spectrum of light scattering from laser
 illuminated sample 13 p2133 A66-26166
 Electric current density in semiconductor,
 noting harmonic mixing of microwaves by
 warm electrons in
 germanium 15 p2564 A66-28875
 Microwave spectrometer technique using
 nonlinear properties of resonance saturation
 in gases for detection of absorption
 lines 15 p2501 A66-29006
 Microwave spectroscopy used to identify
 unambiguously contaminant trace gases in
 mixture and indicate amount of each
 [AICE PREPRINT 54D] 17 p2868 A66-32678
 Fractional nanosecond microwave pulse
 generation and measurement techniques,
 discussing pulse trains 18 p3075 A66-33617
 Solar extinction measurements and
 interpretation of terrestrial atmosphere
 microwave absorption spectrum near 1-cm
 wavelength 18 p3105 A66-34012
 Microwave absorption spectrometer for
 measuring absolute concentrations of free
 radicals at any point in conventional gas
 flow reaction system 18 p3112 A66-34245
 [AIAA PAPER 66-877]
 Plasma stabilization by HF electromagnetic
 fields, noting mode spectrum spacing along
 sample axis and dependence on field
 strength 24 p4242 A66-42517
MICROWAVE SWITCHING
 Microwave switching and pulse modulation
 by impact ionization, using DC electric field
 to break down n-type
 germanium 06 p0851 A66-16454
 Shielding effect on modulating microwave
 ferrite switch in applied magnetic field and
 relation between inside and outside fields
 for thin waveguide 06 p0857 A66-16952
 Magnetic material and field application to
 solid state electronics, noting amplification
 of microwaves, magnetoelastic waves,
 application of microwave ferrite
 components, low temperature circulators,
 etc 13 p2165 A66-25520
 Thermal models for microwave dissipation
 within p-i-n diode for forward and reverse
 biased states 15 p2458 A66-28890
 Microwave switching tube for rapid pulse
 transmission on microwave communication

channel, utilizing glow
 discharge 16 p2666 A66-31445
 Silicon p-i-n junction diode microwave
 switches of wide
 bandwidth 17 p2890 A66-32905
 P-i-n diode switch design including RF
 insertion loss, RF isolation and mechanical
 configuration of device 17 p2891 A66-32910
 Varactor and p-i-n diode switch and limiter
 design, detailing basic concepts of switching
 and limiting 17 p2891 A66-32911
MICROWAVE TRANSMISSION
 Microwave polarization changes during
 passage through low pressure
 plasma 01 p0110 A66-10371
 Parallel plate or circular waveguide
 geometry for analyzing plasma propagation
 in presence of magnetic
 field 01 p0039 A66-10534
 Slow wave propagation along plasma
 column imbedded in dielectric
 medium 01 p0026 A66-10542
 Whistler mode propagation in plasma in
 decreasing static magnetic
 field 01 p0026 A66-10544
 Interaction of electromagnetic fields with
 very hot plasmas using electron cyclotron
 resonance, noting microwave
 properties 01 p0026 A66-10545
 Electromagnetic waves and effect of
 plasma from vehicle exhaust on microwave
 communication link between in-flight launch
 vehicle and ground 01 p0027 A66-10549
 Coherent solutions of propagation equation
 in circular cylindrical coordinates for
 various phase velocities 01 p0027 A66-10555
 Reducing setting time of phase shifters in
 phase control of microwave signals using
 space charge sheaths 01 p0028 A66-10564
 Rectangular waveguide with diaphragm
 method for ferrimagnetic resonance
 measurements in ferrites 01 p0041 A66-10573
 Figure of merit characterizing performance
 of ferrite slabs in two high power
 microwave waveguide 01 p0042 A66-10586
 Radio search for intelligent extraterrestrial
 life, estimating civilization distribution,
 frequency of best sensitivity and aggregate
 signal detection 02 p0191 A66-11610
 Microwave propagation through metallic
 waveguides filled with dielectrics, using
 field theory, network theory, Rayleigh-Ritz
 procedure, reaction concept,
 etc 02 p0206 A66-12009
 Transmission modes in grooved guides,
 calculating cut-off frequency and
 attenuation 03 p0346 A66-13326
 Changes in apparent radio path length of
 ground-to-ground microwave links caused by
 atmospheric changes 04 p0481 A66-13730
 High electric fields effect on propagation
 of 24-GHz microwaves along surface on n-
 type indium antimonide 04 p0562 A66-13749
 Propagation characteristics of microwaves
 through dielectric loaded waveguides and
 imperfect waveguides filled with imperfect
 dielectrics 04 p0498 A66-14042
 Envelope polarity coincidence
 crosscorrelator for detection and
 identification problems involving weak
 wideband microwave
 signals 05 p0646 A66-14613
 Synthetic generation of phase coherent
 microwave signals for transient behavior of
 wideband networks and dispersive
 media 06 p0847 A66-16102
 Operation of FM microwave generator with
 external feedback connected to mismatched
 long line 06 p0852 A66-16512
 Reflex klystron as subcarrier detector for
 microwave signals modulated by RF carriers
 in 100 to 500 kc range 06 p0853 A66-16651
 Field-strength measurements at 11 gc over
 35 km near-optical path for receiving
 antenna of variable height in shadow of two
 knife edges 06 p0836 A66-16982
 Microwave theory and techniques - IEEE
 G-MTT Symposium, Clearwater, Florida, May
 1965 07 p1006 A66-17501
 Microstrip transmission on semiconductor
 dielectrics provide high quality
 interconnection between microwave
 functions 07 p1007 A66-17505
 Microwave transmission and reflection
 coefficients of thin films in normal and
 superconducting states 09 p1416 A66-20023
 Twofold phase modulation in meters of

microwave reflection and transmission coefficients 09 p1345 A66-20446

Microwave transmission tests in pure air plasma using hypersonic shock tunnel, obtaining electron density and collision frequency profiles, predicting propagation path signal loss and antenna radiation pattern distortion [AIAA PAPER 66-173] 11 p1742 A66-22211

Microwave communications, discussing radio relay techniques, carrier telephony, satellite microwave communications, television, laser light wave communication, etc 11 p1655 A66-22696

Book on microwave measuring techniques including coaxial lines, waveguides and microwave tubes 11 p1670 A66-23203

Macroscopic factors affecting performance of microwave communication systems in plasma channels including absorption, refraction, dispersion, depolarization, nonlinear and random effects 12 p1813 A66-23793

Simplified measurement of Q of microwave transmission cavities 12 p1816 A66-24148

Communications requirements for manned deep space missions, using optical links, with PPM, PCM/PL and coherent reception for each link [AIAA PAPER 66-317] 12 p1823 A66-24782

Complex longitudinal microwave magnetoconductivity and permittivity of n-type silicon at 77 degrees K, noting influence of DC magnetic field 13 p2159 A66-25066

Lincoln Experimental Terminal /LET/ signal processing system, design, operation and application 13 p2022 A66-25516

Materials for acoustic and magnetic microwave delay lines, discussing thin film piezoelectric transducers and magnetoelastic mode of microwave propagation 13 p2165 A66-25519

Phase shifter for large phased array radar, operation and performance 13 p2037 A66-25548

Microwave transmission and scattering measured in laboratory plasma, noting moving regions occulting microwave beam, existence of turbulence elements and frequency spectrum of uniformly scattered component 13 p2143 A66-25709

Ray-optic theory to determine microwave transmission through collisionless turbulent plasma in Fraunhofer and Fresnel regions 13 p2147 A66-25753

Microwave power transmission, noting theoretical loss, power transfer, helicopter operation, etc 13 p2024 A66-25783

Operation of FM microwave generator with external feedback connected to mismatched long line 13 p2041 A66-25952

Skip distance and horizontal range of microwave propagation, assuming spherical Earth and ionosphere 13 p2026 A66-26235

Emergence point of conical microwave beam transmission through nonuniform electron plasma 14 p2234 A66-26860

Spin wave excitations and surface impedance in microwave transmission through thin permalloy films 14 p2350 A66-26885

Variable efficiency harmonic with shunted varactor diode for microwave power level control 14 p2247 A66-27042

Optimum shape of multimode rectangular waveguide transition by comparing smoothed with stepwise transition 14 p2251 A66-27239

Absorption of high power microwaves, using rectangular waveguide with long axial slot in side wall and water-filled dielectric tube adjacent to slot 14 p2253 A66-27530

Experimental verification of theoretical behavior of ferrite structural discontinuity between rectangular waveguide filled with homogeneous dielectric and waveguide filled with transverse magnetized ferrite 14 p2253 A66-27585

Swept frequency antenna gain measurements, evaluating mismatch losses at feedpoint and obtaining gain-frequency curves 14 p2256 A66-27911

Quantum oscillations in damping of helicons propagating through degenerate semiconductor plasmas in presence of quantizing magnetic fields 16 p2770 A66-30185

S-band automatic tracking telemetry

antenna, using tracking mount and servosystem of T-9 radar tracker for microwave telemetry studies and other experiments 16 p2659 A66-30551

Microwave beam-powered ferry vehicle 16 p2810 A66-30918

Magnitude of DC conductivity change in CdS by microwave phonons at liquid helium temperature explained with piezoelectric polaron effect 17 p2975 A66-31886

Communication systems at microwave and optical frequencies for future Mars missions 18 p3067 A66-33793

Space communication requirements using lasers and microwaves in manned Mars flights [AIAA PAPER 65-324] 18 p3067 A66-33794

High-power microwave transmitters for deep-space communication with unmanned spacecraft 19 p3316 A66-35684

Design principles of waveguide systems applicable to electromagnetic wave transmission by reflection and refraction 19 p3319 A66-36033

Multiple diffraction of microwaves over knife-edge obstacles, obtaining path loss 19 p3304 A66-36410

Microwave diffraction over natural obstacles, stressing variation of signal level in time, space and frequency and polarization dependence and depolarization 19 p3304 A66-36411

Microwaves from gallium arsenide excited by impressed voltage 20 p3612 A66-37251

Gain, efficiency, directivity and application of reflectors, considering use of passive repeaters for increased transmission efficiency 20 p3516 A66-37715

Microwave transmission power loss for electromagnetic propagation through bounded solid state plasma waveguide in transverse magnetic field 21 p3703 A66-38755

Nonuniform line synthesis for lossless uniform segments of equal length loaded with real resistance 21 p3719 A66-39380

Book on foundations for microwave engineering 22 p3875 A66-39993

Traveling wave maser as preamplifier in ground station for satellite communication 22 p3867 A66-40658

Traveling wave tubes and klystrons, discussing microwave power generation efficiency, application for satellite communications, etc 22 p3878 A66-40701

HF amplifier design - WESCON, Los Angeles, August 1966 22 p3881 A66-40745

Semiflexible elliptical waveguide for microwave relay systems, noting design and performance characteristics 23 p4046 A66-41547

HF transmitter multicoupler for connecting several transmitters to single antenna 23 p4046 A66-41548

Pickup antennas effects on waveguide motor speed-input power relationship 24 p4179 A66-42105

Optical communication systems, discussing available equipment, transmission characteristic, lack of long distance operation reliability, etc 24 p4174 A66-42805

Tunable coupling of open waveguide type for semiconfocal Fabry-Perot cavity gives high transmission and high Q 24 p4216 A66-43221

MICROWAVE TUBE

Redesigning UHF triodes compatible with solid state devices 01 p0044 A66-10930

Periodic electrostatic focusing scheme for ungridded multicavity klystron amplifier 01 p0044 A66-10932

Microwave amplifier, electrostatically focused klystron, for spaceborne equipment used in telecommunications of deep space 04 p0493 A66-13603

Microwave tube technology noting klystrons, crossed field devices, traveling wave tubes, etc 05 p0642 A66-14560

Planar triodes for pulse and CW operation at L-band and K-u band 07 p1011 A66-18267

Small low power drain microwave triode cavities as pulsed transmitters and local oscillators for man-portable radar equipment 07 p1011 A66-18268

Klystrons, cross field devices and traveling-wave tubes, including design and application 07 p1011 A66-18269

Wide bandwidth and high power electron tube applications in face of encroachment of

solid state devices 07 p1011 A66-18271

Disk-seal triode coupled with transmitting tube for establishing radio contact between Mariner IV space probe and Earth 11 p1665 A66-22682

FM and AM noise spectra of low-noise microwave tubes, solid state klystrons and solid state chains 12 p1835 A66-24135

Thin film technology in microwave power tubes noting ceramic mounted structures, secondary emitters, semiconducting and dispersion hardened thin films, etc 16 p2665 A66-31432

Transport of AC disturbance /emission noise/ on electron beams magnetically compressed in microwave tubes, deriving power flow invariants 17 p2878 A66-31819

MICTURITION

S URINATION

MID-LATITUDE ATMOSPHERE

Statistical distribution of monthly median noon critical frequency of F-2 layer from ionospheric stations at mid-latitudes, auroral regions and at polar cap 12 p1870 A66-24286

Magnetic disturbances at midlatitudes, noting origin from locally generated currents 12 p1871 A66-24292

Ionospheric D-region electron distributions in middle latitudes deduced from reflection of long radio waves 15 p2489 A66-29631

Atomic ions of meteoric origin indicated as source of midlatitude E region in IQSY rocket measurement 15 p2492 A66-30033

Initial disturbances in F-2 layer at middle latitudes during magnetic storms which begin with sudden commencement and relation to magnetic field changes 17 p2922 A66-33353

Position of tropopause in middle latitude jet flow 18 p3108 A66-34607

Rocket probe measurements indicate existence of maximum ion concentration in stratosphere and lower ion concentration at equator than at midlatitudes 19 p3345 A66-35288

MIDCOURSE GUIDANCE

SA GUIDANCE SYSTEM

Recursive space navigation applied to navigating in near orbit of planet by measuring directions to known landmarks 01 p0100 A66-10025

Launch vehicle guidance, premidcourse orbit determination and midcourse maneuver of Ranger IX spacecraft lunar mission and merger 02 p0260 A66-12056

Navigator sighting accuracy in midcourse guidance system for manned space flight using simulated vehicle mounted space sextant [AIAA PAPER 64-651] 03 p0390 A66-12740

Optimal steering laws and thrust direction turning rate in required-velocity guidance 10 p1609 A66-21899

Sensor requirements for midcourse guidance phase of spacecraft on lunar trajectories, with attention to optical measurements and statistical combining for trajectory estimates [AIAA PAPER 64-234] 12 p1910 A66-24692

Six midcourse guidance techniques, noting Earth-Mars and Earth-Venus trajectory with small and large injection error 13 p2123 A66-25252

Interplanetary midcourse navigation by measuring differential stellar aberration, using Space Velocity Meter /SVM/ 13 p2123 A66-25255

Peaceful uses of automation in outer space - Symposium, International Federation of Automatic Control, Stavanger, Norway, June 1965 18 p3240 A66-33845

Maximum payload delivery with restricted-power propulsion system, noting trajectory optimization course-correction-time distribution, etc 18 p3242 A66-33849

Optimization of midcourse velocity corrections, applying for variable-time-of-arrival guidance and determining optimum correction time as function of miss parameter 18 p3131 A66-33850

Surveyor midcourse guidance treated by minima and maxima theory, noting terminal phase 19 p3397 A66-35600

Linear continuous time stochastic optimal control process, obtaining optimum performance achievable as function of total effort at initiation of optimization period 19 p3335 A66-36694

- public programming digital computer techniques, hardware interfacing and systems in simulation of lunar midcourse and navigation 20 p3543 A66-37250
- Te Carlo simulation for adaptive policy multiple impulse correction of trajectory aircraft 24 p4278 A66-42688
- spacecraft attitude control, noting of application [AIAA PAPER 105] 24 p4284 A66-43129
- EAR PRESSURE
- IR PRESSURE TEST
- SCATTERING FUNCTION
- temperature dependence of Mie scattering, absorption and scattering of magnetic radiation on spherical monoxide particles 05 p0718 A66-14917
- absorption and scattering by spherical solid carbon particles in length range 0.2 to 40 mu calculated by Mie theory [AIAA PAPER 66-134] 06 p0911 A66-16261
- scattering calculation to support that interstellar extinction is caused by particles 08 p1288 A66-18786
- scattering and absorption cross sections for spherical absorbing particles as a function of complex refractive index 09 p1405 A66-20512
- theory estimation of mass of dust component of cometary atmospheres derived from 1954 to 17 p3011 A66-33387
- AIRY AIRCRAFT
- weight and load factor modification of aircraft design when aircraft is as weapon system 01 p0011 A66-10186
- redundancy techniques for flight control systems applied to tactical military aircraft, monitorless channel output selection, etc 01 p1013 A66-10666
- fuels presently used in military aircraft compared with those for advanced air-breathing weapon systems at high Mach number [AIAA PAPER 65-0804] 01 p0128 A66-10846
- boundary layer control /BLC/ high lift used as integral part in design of F-104 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 01 p0013 A66-10951
- controls, systems and equipment of five recent configurations of FIAT G 222 transport aircraft for Italian Air Force 02 p0177 A66-11868
- development of F-111 swing wing aircraft in A strike and B interceptor roles for Air Force and Navy 03 p0317 A66-12534
- contractor-customer responsibilities for F-104 aircraft design in firm fixed price environment [AIAA PAPER 65-758] 03 p0320 A66-12589
- thorpe F-5 as supersonic tactical fighter [AIAA PAPER 65-778] 03 p0320 A66-12593
- SARR International program concerning fire-control systems for F-104 fighter [AIAA PAPER 65-777] 03 p0447 A66-13066
- computer-directed malfunction checkout of jets, boosters and modern military aircraft 04 p0526 A66-14020
- craft speed relation to range, endurance and maneuverability capabilities reviewed with regard to military value [AIAA PAPER 65-0797] 05 p0610 A66-15012
- light characteristics and test program of a light tilt-wing V/STOL Army support aircraft 07 p0986 A66-17271
- ary aircraft from design stage through production life, emphasizing flight characteristics 08 p1322 A66-19017
- guet 941 STOL aircraft design and performance, noting maximum lift coefficient and single-shaft power 10 p1483 A66-21716
- plane construction and technology in the Air Force 11 p1636 A66-22846
- boundary layer control /BLC/ high lift used as integral part in design of F-104 Mach 2 plus Navy interceptor [AIAA PAPER 65-714] 12 p1801 A66-24095
- ability of military aircraft from point of user 13 p1996 A66-26691
- ability assessment of reliability effect of sortie of patrolling aircraft 13 p1996 A66-26695
- relationship between military and contractors in aircraft development, noting adherence to military specifications, costs, weapons, etc 14 p2416 A66-27812
- Performance spectrum of military aircraft noting speed, range, endurance, safety, etc 17 p2843 A66-32501
- Navy angle of attack system as aid in transition from propeller airplanes to turbojets, emphasizing application to commercial aircraft 17 p2843 A66-32684
- Low-altitude control of U.S. Army rotary wing aircraft 17 p2950 A66-32722
- Military vertical replenishment and utility helicopter operational requirements and load carrying capacity 17 p2845 A66-32740
- Military aircraft procurement, discussing development production cost estimate and design 17 p3040 A66-32796
- Military aircraft procurement, discussing equipment supply, management control, development procedure and value engineering 17 p3040 A66-32797
- Mark II avionics system used in F-111A tactical fighter for navigation and weapons delivery performance 18 p3076 A66-33958
- Decision table for determining base depot maintenance policy for aircraft engines 20 p3566 A66-37888
- Project management of Jaguar Anglo-French military aircraft in design, test and production phases 23 p4151 A66-41217
- Supersonic transport production problems, discussing Concorde, Lockheed and Boeing projects, machining, shaping and assembling 23 p4073 A66-41649
- MILITARY AVIATION
- Control system 465L used by Strategic Air Command noting automated functions, data processing, integration of human and electronic elements, etc 04 p0507 A66-13687
- Astronautics education for RAF and USAF officers 06 p0972 A66-15920
- Mechanization of navigational functions for supersonic aircraft within central airborne digital computer, comparing military experience with commercial requirements 07 p1067 A66-17693
- Book on political, economic and military analysis of air transport policy and national security 09 p1472 A66-20099
- Military flying and experimental psychology, discussing screening and training of pilots, methods employed and prediction of failure based on psychosociological model 12 p1808 A66-23805
- Aerospace medical advances in Polish military aviation and pilot testing procedures and equipment, particularly low pressure chamber and centrifuge 14 p2271 A66-28365
- Military air cargo transport technology and logistic systems 15 p2620 A66-29793
- Statistical analysis of vertebral fracture in U.S. Navy during 1959-1963 period 16 p2644 A66-31132
- Military V/STOL transport aircraft design, capabilities and cost effectiveness 17 p2846 A66-32887
- Analytic thermal compensation technique eliminating thermal stabilization time, applied to inertial navigation systems operating in military environment 19 p3397 A66-35518
- Reliability and maintainability research program of USAF concerning measurement, control, failures etc, of equipment under various stresses and environmental conditions 20 p3573 A66-37960
- Microwave radiometry feasibility as technique for navigation data-sensing in Army aircraft 23 p4089 A66-41317
- Hypersonic cruise vehicles for military and civil requirements, considering air breathing propulsion and structural weight 24 p4296 A66-42241
- Airborne digital computers role in electronic warfare, navigation and guidance, considering weight, power supply, costs, etc 24 p4177 A66-42245
- MILITARY HELICOPTER
- Operation and future of helicopter noting present usefulness in light observation, light and medium transport, armed escort, war, rescue, civil and general utility 02 p0178 A66-11991
- Assault helicopter cost and system effectiveness in mission of delivering cargo from carrier to landing zone, evaluating avionics system [AIAA PAPER 64-785] 05 p0610 A66-15079
- French SA 300 military helicopter design, operating characteristics and performance capabilities 05 p0611 A66-15196
- CH-53A helicopter design, testing, reliability and flight characteristics 07 p0988 A66-17494
- CHSS-2 Haul Down and Handling System for operating large /SH-3A/ helicopter from small ships 10 p1484 A66-21891
- MILITARY SPACECRAFT
- Feasibility of converting nuclear energy into directed beams capable of vaporizing offensive missiles, thus protecting our satellite systems 02 p0290 A66-12068
- Military communications satellite system noting radio frequency, TWT amplifier, synchronous altitude, etc [AIAA PAPER 65-323] 05 p0633 A66-15170
- Civilian and Military Uses of Aerospace Conference, New York, January 1965 08 p1299 A66-18547
- Military aspects of U.S. space program, reviewing work from ballistic missile to Manned Orbiting Laboratory 08 p1321 A66-18550
- Military approach to standardized space vehicle system, specifically Titan III 08 p1301 A66-18571
- Time division method of multiple access to military communications satellite by several ground stations 08 p1180 A66-18713
- Characteristics and performance of synchronous satellite military communication system [AIAA PAPER 66-268] 12 p1859 A66-24741
- Military communications satellite developments, describing worldwide network of ground stations and 15 to 22 satellites in near-synchronous equatorial orbit 14 p2243 A66-28362
- Unclassified information concerning military communication satellite system 16 p2655 A66-31650
- Soviet program for military applications in space including artificial satellites, deep space probes and man-in-space program 17 p3040 A66-32352
- MILITARY TECHNOLOGY
- SA DEFENSE
- Criteria for evaluating military system reliability with criticism of various definitions 01 p0168 A66-10057
- Air Force specification MIL-R-26667 for reliability testing of electronic equipment, commenting on 01 p0168 A66-10058
- MIL-STD-781 01 p0168 A66-10058
- AFSC 375 series of systems management manuals with emphasis on specification programs 01 p0168 A66-10060
- Army evaluation and implementation of MIL-S-58077 in system safety engineering of aircraft to eliminate initial high accident rate 01 p0009 A66-10061
- Naval Aviation Safety Center role in reducing aircraft accidents annually, noting material and man-made accidents 01 p0009 A66-10072
- Air Force system safety management progress in issuance of new instruction manuals and in revision of system specifications 01 p0169 A66-10074
- Western Electronic Show and Convention, San Francisco, August 1965, Part 1, Military electronics 02 p0197 A66-11457
- UHF voice communications system for 412L Air Weapons Control System discussing transmitter, receiver and compliance testing 04 p0497 A66-13964
- Parts reliability in USAF and Department of Defense specifications 05 p0691 A66-15829
- Military electronics - MILECON/9, Conference, Washington, D.C., September 1965 06 p0840 A66-15954
- Relative effectiveness of missiles and manned aircraft in tactical warfare 07 p0987 A66-17284
- Defense Communication Satellite Program for reliable worldwide military communications 08 p1179 A66-18569
- U.S. military and strategic posture in aerospace, discussing intelligence and defense systems, strike capabilities and support programs 09 p1472 A66-20170
- Defense equipment reliability noting specifications, field data collection, control plan, etc 12 p1833 A66-24083

Satellite providing optimum communications to military users, noting gyroscopic stabilization of antennas, major characteristics, etc 12 p1955 A66-24740

[AIAA PAPER 66-267] 12 p1955 A66-24740

USN contributions to space communications, noting Syncom program, communications by Moon relay, design of antenna aboard Kingsport vessel, etc [AIAA PAPER 66-270] 12 p1820 A66-24743

Military pyrotechnics, discussing initiators and those producing light, smoke, gas, sound, heat and time-delays 18 p3160 A66-34185

Microelectronics application to military maintenance and support of guidance and control systems of missile and weapon systems 20 p3567 A66-37890

Statistical analysis of mechanical properties for Military Handbook 5 design allowables 20 p3567 A66-37898

Maintainability program requirements of Military Standard 470 document 20 p3569 A66-37926

Maintainability prediction procedures for systems and equipment outlined in Maintainability Prediction Handbook 20 p3570 A66-37927

MIL-STD-471 maintainability demonstration prepared by tri-service task group 20 p3570 A66-37928

Uniform design process AFSCM 375-5 implementation and operating personnel interrelationships in aircraft industry 20 p3685 A66-37929

System safety concept relation to cost and system effectiveness 20 p3685 A66-37932

Solar system exploration and Air Force participation in missile and space program 24 p4296 A66-42654

Military value of unmanned exploration of solar system, noting coordinated activities of DOD and NASA 24 p4296 A66-42656

Reliability audit in military and space electronics 24 p4218 A66-42714

U.S. strategic missile and air defense, noting Nike-X system 24 p4297 A66-42950

U.S. tactical defense systems noting SAM types, interceptors, technical problems, data handling, radar, etc 24 p4297 A66-42951

High acceleration missiles for intercepting enemy ballistic warheads, considering sprint and hibex rockets, noting problems with gap heat, gyro drift, communications, etc 24 p4284 A66-42952

Graphical comparison of military RF interference specification limits based on electric field intensity at one meter antenna spacing 24 p4176 A66-43192

MILITARY VEHICLE

Noise measurement in axial flow fans for military vehicle cooling installations 14 p2220 A66-27567

MILKY WAY

Milky Way composition and light radiation characteristics, outlining definitions, basic relations, star categories, color diagrams, etc 09 p1454 A66-20288

Galactic plane emission at 408 mc/s using Australian 210 ft radio telescope 13 p2186 A66-26030

MILLIMETER WAVE

SA MICROWAVE

Field controlled plasmas in doped semiconductors and modulation of millimeter and submillimeter waves, noting method based on Franz-Keldysh shift in intrinsic absorption edge 01 p0121 A66-10562

Conformal mapping analysis of reflections and mode conversions in tilted millimeter circular cylindrical waveguide 03 p0344 A66-13102

Earth-to-space communications using millimeter-wave region of spectrum, noting atmospheric attenuation, propagation losses, etc 04 p0479 A66-13607

Central lunar temperature measured at 1 mm wavelength as time and phase function during total eclipse 05 p0763 A66-15290

Quasi-stellar radio source 3C 273 observed with on-off and dual-beam techniques at millimeter wavelength, noting flux variation 05 p0764 A66-15292

Quasi-stellar radio sources 3C 273 and 3C 279 observed, using on-off and dual-beam techniques at 1 mm wavelength, computing flux densities 05 p0764 A66-15293

Extension into microwave region of pulse-

driven oscillators produced by biasing common diffused p-n junctions into avalanche breakdown 06 p0851 A66-16451

Difference frequency between harmonics of millimeter wave oscillators at submillimeter wavelength, using crossed waveguide harmonic generator as harmonic mixer 07 p1008 A66-17514

Formed point contact gallium arsenide backward diodes compared with conventional millimeter-wave diodes show advantage as low level baseband current detectors 08 p1189 A66-18658

Parabolic antenna design for millimeter wavelength radio telescope [AIAA PAPER 64-423] 08 p1202 A66-18814

Measurement results on frequency doublers in millimeter wave region, using unencapsulated silicon varactor diodes and gallium arsenide/ phosphor bronze point-contact varactor 08 p1198 A66-19745

Electrical contact for very small planar junctions and embodiment in millimeter-wave mixer diode 09 p1350 A66-19926

Effect of static magnetic field on millimeter wave absorption in superconducting aluminum at reduced temperature 09 p1416 A66-20025

Absorption coefficient of water vapor in relative windows of transparency for millimeter and submillimeter radio waves 09 p1343 A66-20338

Characteristics of quasi-optical conduction millimeter wave resonator with gas, showing resonance absorption 09 p1381 A66-20492

Quasi-optical design of lens-feed millimeter-wavelength antenna combination whose radiation is of azimuthally symmetric split-beam type 11 p1663 A66-22559

Dielectric layers of alternating low and high dielectric constant used as filters in millimeter wave, IR and optical regions 12 p1831 A66-23906

Beam plasma amplifier operation noting interaction region, millimeter wave operation, technological problems, etc 12 p1839 A66-24615

Coaxial-mounted silicon point-contact diode /1 N 26/ as frequency converter for millimeter waves 12 p1846 A66-24857

Noise and amplification characteristics of millimeter-wave reflex klystron amplifiers 13 p2037 A66-25549

Optical and microwave instrumentation for exploration of millimeter wave band, determining value for deep space communications, radiometry and spectrometry 14 p2247 A66-26922

Short circuited crossguide coupling used to stop oscillation of reflex klystrons and convert them into stable millimeter wave amplifiers 14 p2248 A66-27058

Atmospheric propagation of radio waves at wavelength of 3.3 mm 14 p2240 A66-27919

Dielectric material position effect on characteristics of ladder line slow wave structure of TW masers 14 p2258 A66-27960

Beam scan at millimeter wavelengths obtained from ferrite antenna aperture 15 p2455 A66-28574

CAT detection by radiometric measurement of mm wave emission from oxygen molecules and measurement of ambient air temperature and temperature gradient 15 p2532 A66-28926

Millimeter wave transmission and reception of television signals, examining picture quality and tropospheric scintillation and attenuation relative to weather 15 p2450 A66-28997

Antenna array receiving line-of-sight ground-to-ground transmissions over 28-km path, measuring amplitude and relative phase of arriving wave, noting perturbations in amplitude 15 p2461 A66-28998

Millimeter wavelength solar radiation consisting of thermal, slowly varying active and burst components and eclipse measurements of brightness distribution 15 p2594 A66-29001

Submillimeter and millimeter radar and LIDAR astronomy contribution to solar system communications, and planetary and lunar surface studies 15 p2595 A66-29002

Electric resonance molecular beam spectrometer for operation in millimeter-submillimeter wavelength

region 15 p2501 A66-29005

High power sources for millimeter wavelength oscillator and amplifier design 15 p2461 A66-29008

Conventional point-contact diodes and junction diodes with point-contact geometry, examining fabrication techniques and millimeter wave application 15 p2461 A66-29013

Equivalent circuit evaluation of theoretical, potential and limitations of millimeter wave semiconductor diode detectors, mixers and frequency multipliers 15 p2461 A66-29015

Heterodyne detection at millimeter wavelengths shown in distributed structure of bulk indium antimonide, noting conversion loss and noise properties 15 p2462 A66-29017

Zero magnetic field millimeter maser using trivalent iron ion in host crystalline structure of rutile /titanium dioxide/ as active material 15 p2514 A66-29018

Detection scheme for millimeter and submillimeter waves, utilizing system of quantum energy levels to down-convert HF radiation to microwave frequency 15 p2462 A66-29019

Comparative merits and design features of millimeter wave antennas used as parabolic reflectors, Cassegrain systems and lenses 15 p2462 A66-29021

Quasi-optical iterated-dielectric-slab rectangular waveguide filters for millimeter and submillimeter wavelengths 15 p2462 A66-29022

Microphotolithography permits definition of single-mode rectangular dielectric image-line waveguide and depletion layer waveguide structures useful in IR and millimeter region 15 p2462 A66-29023

Current-voltage characteristic for tunnel-diode millimeter wave harmonic generator in 24 to 72 gc region 15 p2462 A66-29024

Large aperture millimeter wave antenna for high resolution tracking measurements and real-time data reduction 18 p3084 A66-34303

Millimeter wavelength parabolic reflector with Cassegrain feed system 18 p3095 A66-34325

Millimeter wave solutions compared with S-band solutions in deep space telecommunication system, using typical space-to-Earth communication link 19 p3302 A66-35704

Quasi-optical measurement of Faraday rotation in oversize waveguide at 2-and 1-mm wavelengths 22 p3876 A66-40172

Wide stop bandwidths from quasi-optical filters formed from iterations of dielectric slabs demonstrated at millimeter wavelengths 22 p3877 A66-40181

Millimeter wave - WESCON, Los Angeles, August 1966 22 p3879 A66-40730

Millimeter waves applications in atmospheric research, discussing radar meteorology, forward scatter or troposcatter and passive or radiometric techniques 22 p3869 A66-40731

Millimeter wave radio astronomy, discussing solar system, galaxy and extragalactic sources 22 p3983 A66-40732

Solid state millimeter wave receivers for space vehicle environments, discussing integral mixer IF amplifiers, oscillators and varactor multipliers 22 p3879 A66-40733

Millimeter wave resonant interferometer capable of measuring spatial distribution of electrons in low density transient plasma column subject to perturbation 24 p4209 A66-42191

MILLING

S CHEMICAL MILLING

MILLING MACHINE

Introduction of programmed milling machines to production of aircraft engines for Czechoslovakian FB series 04 p0525 A66-13763

Electrochemical shaped-electrode method of machining complex shapes compared to conventional method by three-dimensional copying 08 p1228 A66-18624

Rigidity and support requirements of fixturing for titanium alloy milling operations [ASTME PREPRINT MR66-716] 12 p1887 A66-24420

High speed milling of titanium alloys,

cutting velocities, feed rates, tool
r, etc
TIME PAPER MR66-151]

14 p2299 A66-26952

EQUATION

line-Eddington model in heat and mass
transfer, showing analogy between radiation
particle transfer and correspondence to
simplified Boltzmann

13 p2208 A66-25162

THOMSON METHOD

RUNGE-KUTTA INTEGRATION

generalization of Milne-Thomson solution
Navier-Stokes equation governing motion
of viscous incompressible

terrestrial surfaces 09 p1402 A66-20510
Optimum wavelength intervals for surface
perature radiometry from total
ectance measurement of common surface
erals 15 p2498 A66-28833

tensive Chlorella culture consumption of
eral-nutrition
erals 15 p2440 A66-29510

RALOGY

PETROLOGY

ge of Bosumtwi crater area, Ghana,
etermined by mass spectrometry of
adium, strontium and strontium isotopic
osition, compared to Ivory Coast
ite age 10 p1608 A66-21741
mbination of point counting and electron
roprobe techniques in mineralogical
almetric integration
ysis 16 p2707 A66-31196
magnetic spherules in silurian and permian
samples suggest constant meteoric
ux useful in determination of lunar
face age 24 p4198 A66-42435

ATURIZATION

MICROMINIATURIZATION

ysical limits of miniaturization, noting
ment size, packing density, heat
ipation, etc, in connection with
egrated circuits 19 p3323 A66-36825
miniaturization of logic components for
dular and monolithic integrated circuits
computer design 21 p3708 A66-39624
board miniaturized telemetry system for
gnation point temperature measurements
free-flight models in ballistic
ges 24 p4209 A66-42189

MINIMUM DRAG

enter of pressure formulae for cowl
pes at zero incidence having profiles for
h drag is minimum in Newtonian
h 01 p0006 A66-10344

ree-dimensional configurations having
imum drag under assumption of base
wetted area while length and volume
free 04 p0453 A66-13459

imum drag problem of trapezoidal wing
upersonic flow determined by method of
dues in conjunction with complex
able functions 07 p0982 A66-18139
riational problems in gas dynamics,
mining vortex and vortex free motion,
imum drag conditions, 07 p0983 A66-18144

ersonic gas dynamics variational
blems concerning determination of
ymmetric minimum 08 p1166 A66-19573

Optimal contours minimizing pressure drag
ymmetric wings, assuming zero angle of
ck and sharp edges, using Ackert linear
y theory 11 p1630 A66-22503

minimization of total drag /pressure and
tion/ of two-dimensional wing with
pecified chord, finding extremal
tions which include one, two or three
arcs 11 p1630 A66-22504

ape determination of bodies of
olution minimizing pressure drag in
arized supersonic flow 11 p1630 A66-22505
minimizing pressure drag of three-
ensional wing in linearized supersonic
y with Euler equations being partial

differential equations 11 p1630 A66-22506

Optimum two-dimensional wings for
minimum drag subjected to pressure
coefficients defined by Busemann second-
order theory 11 p1630 A66-22507

Newtonian pressure law and minimum
resistance body in hypersonic
aerodynamics 11 p1688 A66-22510

Newtonian flow model minimization of
pressure drag of slender axisymmetric two-
dimensional body subjected to isoperimetric
constraints 11 p1631 A66-22511

Drag minimization in slender bodies of
revolution in hypersonic flow with
Newtonian pressure 11 p1631 A66-22512

Optimum slender body with variable skin
friction coefficient, noting minimal drag
design for hypersonic flow under Newtonian
pressure distribution 11 p1631 A66-22513

Nonslender bodies of revolution with
minimum pressure drag, noting derivation of
minimizing curves for Newtonian
flow 11 p1631 A66-22514

Minimum pressure drag for nonslender
hypersonic body calculated, using normalized
coordinates 11 p1631 A66-22515

Shape of nonslender body of revolution for
minimum total drag in viscous hypersonic
flow at Newtonian pressure distribution and
constant friction 11 p1631 A66-22516

Transversal contour of minimum pressure
drag for body with noncircular cross
section 11 p1631 A66-22517

Transversal contour of minimum total drag
of body in Newtonian
flow 11 p1631 A66-22518

Starlike solutions of optimum transversal
contour problem treated by Young
inequality 11 p1631 A66-22519

Total drag minimization for three-
dimensional body in Newtonian flow,
assuming two planes of symmetry and
constant skin-friction coefficient 11 p1632 A66-22520

Busemann correction to Newtonian
pressure law and resulting two types of
optimum shapes 11 p1632 A66-22521

Slender shapes of minimum pressure drag
in hypersonic inviscid flow characterized by
Newton-Busemann law 11 p1632 A66-22522

Nonslender shapes of minimum pressure
drag in flow characterized by Newton-
Busemann pressure law 11 p1632 A66-22523

Flow field around minimal-drag slender
body examined by Newton-Busemann theory
and gas dynamic theory 11 p1632 A66-22524

Gas flow in free-molecular regime with
negligible collision approached by diffuse
reflection model 11 p1688 A66-22525

Optimum minimal-drag shape of slender
axisymmetric body in free molecular
flow 11 p1632 A66-22526

Minimal-drag shape of nonslender body of
revolution in diffuse free molecular
flow 11 p1632 A66-22527

Idealized ground effect wing, with tips
close to ground, assumed to be semicircular
lifting line in transverse plane, considering
minimum induced drag 12 p1800 A66-25006

Minimum drag bodies with elliptical cross
section, using Newtonian flow theory and
calculus of variations 17 p2838 A66-32346

Optimum form for hypersonic profile with
minimum drag for given bending strength
solved by variational
method 20 p3491 A66-36922

Book on transonic and hypersonic flow
theory covering motion and shock equations,
application of Newtonian theory,
temperature effect, behavior of minimum
drag bodies, etc 20 p3492 A66-37495

Gyrorotor shape with minimum
aerodynamic resistance, discussing cases
with constant and varying moment of
inertia 21 p3739 A66-39327

Radial flow effects on helicopter rotor
blades, noting minimum drag
variation 22 p3843 A66-40248

MINIMUM VARIANCE ORBIT

DETERMINATION /MINIVAR/ P

Onboard lunar orbital navigation system
simulation, using minimum variance
estimation 08 p1249 A66-18818

MINIVAR

S MINIMUM VARIANCE ORBIT

DETERMINATION /MINIVAR/

MINKOWSKI THEORY

Motion of finite mass particles in external
gravitational field determined by comparison
of relativity and Minkowsky theories,
considering gravitational

radiation 04 p0545 A66-14172
Maxwell equations for isotropic medium
bounded by conductors in three-space
dimensions solved by applying Laplace
equations described in Minkowski
space 06 p0851 A66-16450

Relativistic electrodynamics of moving
medium, discussing Maxwell-Minkowski
equations, Born equations, field vector
transformations, etc 12 p1915 A66-24650

Radiation due to time-harmonic source and
field solution of electric dipole in moving
uniaxial anisotropic medium by Minkowski
theory 14 p2234 A66-26861

Potential equations in homogeneous
isotropic moving media derived, using
Minkowski theory 14 p2340 A66-27040

Time-mass dependent events during motion
of material particle, using Hamilton-Jacobi
equation of relativistic mechanics in
Minkowski continuum 21 p3772 A66-39276

Vector potential function solution to
Maxwell-Minkowski equations describing cut-
off phenomena for EM wave propagation in
wave guide filled with homogeneous
isotropic lossless moving
medium 22 p3862 A66-39783

MINOR CIRCLE TURN

Maneuvered reentry of vehicle with
aerodynamic lift into planet atmosphere,
using motion equations and considering
reentry trajectories as minor
circles 03 p0432 A66-13129

Powered reentry of vehicle into planet
atmosphere with propulsion program where
thrust equals drag and trajectory is minor
circle 03 p0432 A66-13130

Approximate atmospheric entry trajectories
on cylindrical planet, noting minor circle
turn maneuver and bank angle
schedule 21 p3811 A66-38705

MINORITY CARRIER

SA MAJORITY CARRIER

Thermoconductivity decrease of bismuth-
telluride based solid solutions due to
forbidden bandwidth and majority and
minority carrier mobility 01 p0127 A66-11029

Microplasma and avalanche diode noise
pulse rate determined by carrier generation
within space charge layer of breakdown
region 02 p0197 A66-11431

Volt-ampere characteristics and minority
carrier recombination region width in
degenerated semiconductor p-n
junction 02 p0277 A66-12085

Rotating mirror arrangement with tungsten
light source for minority carrier lifetime
measurements on
semiconductors 03 p0369 A66-12611

Uniaxial stress effect on minority carrier
concentration, mobility and lifetime in
germanium p-n junction 03 p0409 A66-12726

Current-voltage characteristics of long
diodes calculated by dividing diode base
into three regions 04 p0495 A66-13767

Auger recombination of majority and
minority carriers by low and deep-lying
centers 04 p0565 A66-14261

Minority carrier lifetime in silicon
measured by contactless method, using laser
induced modulation of IR transmission in
silicon /LIMIRIS/ effect 05 p0729 A66-14563

Measurement of diffusion length of excess
minority carriers in semiconductors in
region where carriers are
generated 06 p0924 A66-16506

Distribution function of semiconductor
minority current carriers in presence of
pronounced spatial inhomogeneity occurring
in intensively absorbing films with intensive
surface recombination 07 p1099 A66-17873

Lifetime degradation rate due to cobalt
gamma irradiation reduced in p-silicon due
to electron injection at low
temperature 07 p1106 A66-18400

Double impulse method for lifetime
measurement on pure silicon crystals, using
injecting metal-semiconductor
contacts 08 p1271 A66-19241

Annealing and diffusion processes effect
on lifetime of minority carriers in p-silicon
used in production of
rectifiers 08 p1272 A66-19245

Minority-carrier lifetimes from two-probe measurements of photoconductivity of semiconductor films 08 p1274 A66-19318

Minority carrier lifetime in junction transistors measured by three methods, noting deviations between p-n junction and transistor mode results 09 p1410 A66-19858

Minority carrier lifetime in monolithic photoconductors determined by frequency dependence of time 10 p1587 A66-22149

Minority carrier flow in base region of Graded Band Gap Base /GBGB/ transistor, determining effect of injected current level upon carrier transit time 11 p1668 A66-23024

Mechanisms which can introduce frequency-dependent effects, gauging importance in semiconductor microwave devices including crystal valves, diodes, etc 12 p1831 A66-23790

Period of constant reverse current occurring when limited-base diode is switched from forward to backward direction of current flow 13 p2028 A66-25094

Carrier concentration and minority carrier lifetime measurement in MOS epitaxial layers by capacitance method 13 p2164 A66-25489

Sensitivity and operation of IR detector using avalanche multiplication in microplasmas in silicon junctions, noting SNR at room temperature 13 p2164 A66-25490

Photoluminescence for p-and n-type gallium arsenide as function of exciting light intensity, noting minority carrier recombination mode, electron energy spectrum, etc 13 p2169 A66-26187

Minority carrier drift mobility in p-type germanium single crystal under uniaxial lattice compression 14 p2365 A66-27758

Recombination centers in gamma irradiated silicon either float-zoned or melt-pulled and doped with phosphorus, arsenic or boron 15 p2562 A66-28721

Injection of minority carriers at field-induced junction near silicon-silicon dioxide interface 15 p2459 A66-28897

Lifetime measurement for minority carriers injected into germanium by electron bombardment 15 p2567 A66-29409

Charge control analysis of transistor cut-off frequency, noting current amplification factor, transit time of minority carriers, etc 15 p2468 A66-29889

Volume recombination in transistor base for arbitrary concentrations of minority charge carriers 15 p2468 A66-29921

Entrainment effect transmitted across p-n junction noting contribution of minority carriers 16 p2785 A66-31670

Electron mobility in p-type indium antimonide, noting entrainment of minority carriers by majority 16 p2789 A66-31784

Gamma irradiation effects on minority carrier lifetime in germanium, noting temperature effect 17 p2987 A66-33321

Minimum silicon thickness for evaluating lifetime of minority carriers by photomagnetolectric effect 18 p3155 A66-34091

Diffusion and melting techniques used to determine effect of Ni, W, Ti and Ta impurities on lifetime of minority carriers in n-base of silicon p-n junctions 19 p3433 A66-35310

Excess carriers lifetime in semiconductors nonstatic measurement by photoconductive phase shift of spreading resistance under point contact 19 p3433 A66-35330

Rise and fall times of transistors in switching operation, comparing variation of lifetime of minority carriers with results obtained from cut-off frequency measurements 19 p3313 A66-35350

Steady state open-circuit photovoltage in some monocrystalline CdS samples found to be due to generation of free minority carriers 19 p3437 A66-35476

Concentration and lifetime of minority carriers in cadmium sulfide determined by method based on optically induced changes in concentration 19 p3437 A66-35477

Minority carrier lifetime in monolithic photoconductors determined by frequency dependence of time 19 p3440 A66-35763

Effective charge carrier lifetime in silicon p-i-n junction detectors determined, using

transit time for carriers produced by incident radiation 19 p3318 A66-35913

Anomalous permanent changes in transistor gain after low exposure dosage of electron and/or gamma radiation related to recombination current-component buildup 20 p3526 A66-37320

Lithium use in silicon solar cell for radiation resistance improvement, noting preservation of minority carrier lifetime 20 p3502 A66-37775

Minority carrier trapping centers introduced by irradiation of n-type germanium analyzed, particularly effect of donor species on production, recovery and annealing of defects 20 p3623 A66-38408

DC-photodecay method for investigating minority-carrier lifetimes in silicon crystals 21 p3736 A66-38747

Effective minority carrier lifetime and recombination rate determined from voltage growth curve of p-n junction 21 p3798 A66-38912

Differential minority carrier storage circuit with avalanche pulse energization and fast rise/fall adjustable length pulse output 22 p3872 A66-39717

Fission spectrum neutron damage and gamma ray damage in n-type Si, comparing results of measurements by degradation of minority carrier lifetimes 22 p3962 A66-40086

Deep centers in conducting n-type GaAs and production of Schottky layer 22 p3963 A66-40088

Nonequilibrium charge carrier lifetime in indium antimonide single crystals with Ge and Au impurities 22 p3965 A66-40315

MINUTEMAN ICBM

Contribution of reliability to logistics planning operation of Minuteman missile weapon system 01 p0052 A66-10054

Minuteman flight control system using sampled data control for steering vector thrust nozzles 01 p0105 A66-10687

Thermal compression bond failures in internal electric interconnects on circuit boards of advanced Minuteman guidance system 01 p0049 A66-11152

Operational and maintenance ground equipment, electronics and systems test concepts of Minuteman II ICBM weapons systems 02 p0216 A66-12239

Ground-based Minuteman pulse code modulation telemetry system, discussing routine and novel applications [ISA PREPRINT 1.12-4-65] 05 p0635 A66-15507

Recent developments in Minuteman ICBM system and projected improvements such as increased mobility, better site hardening and defense systems 13 p2192 A66-25687

Structural design load prediction and data collected verification of methods and magnitude by Minuteman flight testing 14 p2392 A66-28000

Calibrating geodetic and geophysical errors effect on Minuteman trajectory, noting instrument errors 14 p2390 A66-28449

Contribution of reliability to logistics planning operation of Minuteman missile weapon system 16 p2681 A66-30661

Minuteman weapon system maintainability, discussing fault detection and isolation, ground system, standardization, tools and system requirements 24 p4281 A66-42092

Minuteman first-stage or Titan III-C strap-on solid rocket motors provide additional thrust to intermediate vehicle comprised of S-II and S-IVB [SAE PAPER 660442] 24 p4281 A66-42395

t controlling it aerodynamically, noting
r, computer and navigational
11 p1734 A66-23500
sile guidance systems based on p-matrix
ance methods

A PAPER 64-667] 12 p1910 A66-24711
t on radio remote control and
metry and missile application, including
ulation and multiplex
iques 17 p2876 A66-33189
tical simulation of guidance and control
oatmospheric interceptor missiles for
y of parameter variations effect on
all mission
20 p3596 A66-37230
roelectronics application to military
tenance and support of guidance and
ol systems of missile and weapon
ms 20 p3587 A66-37890

LE DEFENSE
e strategic missile and air defense,
g Nike-X system 24 p4297 A66-42950
tactical defense systems noting SAM
e, interceptors, technical problems, data

handling, radar, etc 24 p4297 A66-42951
High acceleration missiles for intercepting
enemy ballistic warheads, considering sprint
and hibex rockets, noting problems with gap
heat, gyro drift, communications,
etc 24 p4284 A66-42952
Ground radar systems for missile defense
providing faster data processing, sensor
location optimization, computer control,
etc 24 p4175 A66-42953

MISSILE DEFENSE SYSTEM
Flexibility in strategic retaliatory weapons
offered by bombers and missiles, discussing
defense capability offered by
SAC 08 p1322 A66-18558
Reliability of missile fire distribution
facility, noting transistorization effect on
economy 11 p1668 A66-22955

MISSILE DESIGN
SA MAGNUS EFFECT
Air to ground missiles including
dimensions, weight, maximum Mach number,
propulsion, status and operational or design
problems 04 p0585 A66-13921
Air to air missiles describing guidance
systems, launching aircraft, maximum range
and contractor service 04 p0585 A66-13922
Future missile guidance capability would
permit usage against broad spectrum of
tactical targets by use of multimode sensor
array 04 p0585 A66-13923
Controlled interruption of combustion in
solid propellant engine as applied to rockets
and missiles 09 p1435 A66-20576
Aerodynamic and thermal criteria in
structural design of aircraft and
missiles 20 p3628 A66-37393
Industry government reliability program
for high density wooden round missile
which is noncheckable and associated
checkable and repairable launcher-guidance
set 20 p3570 A66-37933
Multiple reentry capability in missile
design requires new forms of hardening for
offensive missiles and support systems
geared to shorter reaction
times 22 p3886 A66-40130
High acceleration missiles for intercepting
enemy ballistic warheads, considering sprint
and hibex rockets, noting problems with gap
heat, gyro drift, communications,
etc 24 p4284 A66-42952

MISSILE LAUNCHER
SA LAUNCH VEHICLE
Protection standards for population around
missile launching sites, noting missile
malfunctions, particularly breakdowns of
guidance and control
09 p1457 A66-20554

MISSILE RANGE
Maximum range of ballistic missile with
given burnout speed and altitude, optimum
angle obtained by geometrical
means 05 p0760 A66-14891
Missile range safety problem and
control 14 p2394 A66-28440

MISSILE ROLL CONTROL
Simulation and analysis of adaptive roll
autopilot for air to air missile, using limit
cycle with small amplitude controlled by
gain changing loop 20 p3595 A66-36865

MISSILE SIMULATOR
Simulation method for confirming
computations of space vehicle motions
continuing after firing around gravity center
of vehicle 02 p0215 A66-11673
Low density thermal insulation materials,
discussing temperature control, ablation
efficiency and processing qualities of
materials for missile use 06 p0900 A66-16296
Simulation role in automatic testing system
for missiles and rocket
stages 23 p4052 A66-41135

MISSILE STABILIZATION
Square flare for stabilizing upper stages of
multistage ballistic missiles, discussing test
results and aerodynamic advantages over
conical flare 03 p0432 A66-12770
Skylark rocket describing stabilization
system and flight test 10 p1610 A66-21086

MISSILE STAGING
Optimal steering and staging of multistage
boosters using extended variational method
to include variable discontinuities at corners
[AIAA PAPER 65-62] 03 p0432 A66-12781
Missile prelaunching development stage,
detailing countdown and field test
preparation 18 p3246 A66-34043

MISSILE SYSTEM

Contribution of reliability to logistics
planning operation of Minuteman missile
weapon system 01 p0052 A66-10054
Reliability techniques applied to designing,
building and ensuring missile system
survival in nonoperating
state 01 p0141 A66-10110
Operational and maintenance ground
equipment, electronics and systems test
concepts of Minuteman II ICBM weapons
systems 02 p0216 A66-12239
Optimization of multistage ballistic missile
system operating in drag environment by
solution of physical discontinuity problems
[AIAA PAPER 66-91] 06 p0959 A66-16406
U.S. military and strategic posture in
aerospace, discussing intelligence and
defense systems, strike capabilities and
support programs 09 p1472 A66-20170
Contribution of reliability to logistics
planning operation of Minuteman missile
weapon system 16 p2681 A66-30661
Automated mission analysis by Markov
chain techniques, examining effectiveness
factors of reliability and
maintainability 20 p3682 A66-37179
Missile and space system accident potential
evaluated numerically 20 p3685 A66-37931
Optimization multistage ballistic missile
system operating drag environment by
solution of physical discontinuity problems
[AIAA PAPER 66-91] 22 p3986 A66-40362

MISSILE TEST
Evaluating air pollution hazard to
personnel from exhaust gases of Titan II
test firings 06 p0819 A66-16493
Nondestructive testing system for Polaris
missiles and service
correlation 12 p1884 A66-23649
Water entry cavity for missiles, noting
parameters, cavity development and
collapse, etc 13 p2071 A66-26722
Electromagnetic compatibility tests on
Minuteman weapon systems 133A and
133B 13 p2044 A66-26749
FM/FM and PAM/PM integrated telemetry
systems with MDI for missile evaluation
system 16 p2651 A66-30562
High speed computer technique for
simulating test design parameters for
evaluation of ballistic-weapon system
accuracy
[AIAA PAPER 65-222] 16 p2809 A66-30888
Staff flight test design velocity comparison
technique for estimating in-flight inertial
platform attitude 18 p3132 A66-34044
Star tracking tests to achieve accurate
stellar sensor positioning prior to missile
launching, considering calibration of critical
hardware 18 p3132 A66-34045
Maintenance Dependency Chart for design
checking and troubleshooting in missile and
weapon systems 20 p3566 A66-37889
Dynamic wind tunnel testing techniques
and program of advanced analysis of full-
scale free-flight missile performance data
[AIAA PAPER 66-752] 23 p4052 A66-41328

MISSILE TESTING LABORATORY
Aircraft and missile engine development at
Saclay Propulsion Test Center
/France/ 23 p4053 A66-41648

MISSILE TRACKING
SA INFRARED TRACKING
Evaluation and calibration of missile and
space tracking systems including test-by-test
analysis, lofted rockets, self-calibrating
systems, etc 01 p0053 A66-10805
Instrumentation monopulse tracking radar
AN/FPQ-10 using mainly solid state
components at Pacific Missile
Range 04 p0480 A66-13629
Optimum receiver as ideal two-dimensional
cross-correlator for any desired modulation
function 04 p0486 A66-14118
Ground-based Minuteman pulse code
modulation telemetry system, discussing
routine and novel applications
[ISA PREPRINT 1.12-4-65] 05 p0635 A66-15507
Total tactical radar system, describing
integrated system, operational functions and
computer simulation 06 p0823 A66-15955
method BRL ballistic camera system noting optical
and mechanical characteristics, measurement
and computer synchronization
methods 10 p1537 A66-21872

Data interpretation from ballistic and space missiles using telemetry, analog signal variation, voltage conversion systems, etc 13 p2022 A66-25494

Packaging design of electronics portion of missiles IR tracker 13 p2040 A66-25841

Receiving and predetection recording system with frequency translation and wideband FM for Atlantic Missile Range 16 p2648 A66-30536

MISSILE TRAJECTORY

Low cost inertial guidance system commands missile attitude so that modified ballistic trajectory is followed along direct line of sight to target 01 p0098 A66-10003

Perturbation solutions of differential equations of motion for low-thrust rocket trajectories 02 p0288 A66-11546

Two-axis pedestal tracking limitations in station vicinity such as angular acceleration, velocity and reacquisition capability [ASME PAPER 65-WA/MD-17] 05 p0635 A66-15522

Calibrating geodetic and geophysical errors effect on Minuteman trajectory, noting instrument errors 14 p2390 A66-28449

Booster rocket ascent trajectory optimization, using steepest ascent method [AIAA PAPER 64-663] 16 p2801 A66-30883

Book on ballistics of long-range guided missiles and practical methods 20 p3664 A66-38082

Spectral ballistic camera instrument providing relative intensity data and scintillation information on missiles and emissive body 21 p3735 A66-38607

Approximation of aerodynamic stability of coasting vehicle leaving atmosphere at high speeds, assuming linear theory and constant aerodynamic coefficient 22 p3986 A66-40346

Deduction procedure for generalized Clebsch necessary condition for singular extremals for which final form of accessory minimum problem is nonsingular Bolza problem 22 p3940 A66-40530

Bidirectional ascent trajectories of low altitude meteorological rocket, examining effect of wind on peak altitude attainability 23 p4086 A66-41215

MISSILE VIBRATION

Acoustic fatigue and acoustically induced vibration in Titan II and Titan III missiles studied by simulation and wind tunnel scale models 01 p0150 A66-10156

HF requirements for measuring and analyzing Polaris missile shock and vibration data [AIAA PAPER 65-223] 03 p0431 A66-12761

Dynamic matrices for natural vibrations of missile considered as beam and as thin walled shell under given boundary conditions 04 p0587 A66-13534

Quasi-linear partial differential equations of transients in liquid rocket engine propellant feed system solved, determining transient pressure ratio [ASME PAPER 65-FE-23] 06 p0942 A66-16217

Liquid rocket POGO oscillations caused by closed-loop interaction between longitudinal structural mode of vibration and propulsion system 20 p3629 A66-38154

MISSION

S FLYBY MISSION

S SPACE MISSION

MISSION PLANNING

Markov chain with one absorbing barrier used as mission effectiveness model for manned space flight 03 p0426 A66-12900

Comet mission study using space probes boosted by Atlas Agena and Atlas Centaur launch vehicles for interception from 1967 to 1975 04 p0577 A66-13579

Manned lifting body sizing, discussing system requirements, constraints and relationship to parametric vehicle design data [AIAA PAPER 66-47] 06 p0958 A66-16259

Mission success probability maximization by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 06 p0953 A66-16263

Mission requirements and system reliability of Relay communications satellite 07 p1001 A66-17440

System and mission requirements of Lunar Mobile Laboratory, noting design and

operation characteristics 09 p1364 A66-20160

Conically spiraling ascent or descent trajectory of spacecraft in application of jet lift, noting characteristic mission parameters 09 p1457 A66-20557

Management of large physical systems, detailing characteristics of mission planning for Mars exploration including process optimization, computer programming, systems engineering, etc 13 p2179 A66-25238

Trajectory characteristics of high-thrust Mars missions and effect on other aspects of mission planning 13 p2179 A66-25239

Space digital computer reliability laboratory testing by failure data collection from prototype equipment 13 p2027 A66-25507

Electric propulsion for space missions with regard to vehicle weight and mission cost, using manned Mars flight as example [AIAA PAPER 64-715] 13 p2173 A66-26609

Electric propulsion for spaceflights, discussing nuclear rocket technology, mission planning, payload optimization, etc 13 p2173 A66-26610

Houston mission control center for flights from Gemini to Apollo program 14 p2272 A66-28441

Functional analysis of electromechanical control systems, noting application of mathematical methods for system reliability determination 15 p2428 A66-28797

Gemini experiments program, examining crew integration, mission planning and prelaunch operations 15 p2606 A66-30064

Multisensor airborne reconnaissance mission planning and data acquisition 16 p2704 A66-30516

Test program philosophy of electric propulsion and power for planetary mission application [AIAA PAPER 65-67] 16 p2791 A66-30901

Human and man/system requirements to provide criteria for choosing alternative mission and lunar surface roving vehicles design concepts 17 p2903 A66-32170

Preflight planning and training stages for Gemini V, considering spacecraft test, mission simulators, planetarium, survival and parachute training, etc 17 p2868 A66-32686

Gemini VI rendezvous procedure and results, showing success dependence on presentation to flight crew of sufficient information developed on board 17 p3016 A66-32687

Coordinated management planning required for minimizing funding escalation and overdiversification of potential missions [SAE PAPER 660450] 17 p3040 A66-33159

Titan III building blocks, discussing vehicle features, launch facilities, mission and maneuver capability, payload mass ratio, etc [SAE PAPER 660447] 18 p3245 A66-33893

Mission success probability maximization by selecting trajectory parameters via approximate probability density function [AIAA PAPER 66-95] 18 p3234 A66-34597

Satellite lifetime noting orbit evolution, methods of lifetime calculation for short- and long-range missions, etc 18 p3236 A66-34900

Mission system effectiveness of avionic weapon system predicted by general-purpose computerized technique 19 p3480 A66-35528

Extravehicular activity/EVA/ mission simulation, discussing design parameters effect on operating characteristics 19 p3469 A66-35969

Extravehicular environment and mobility constraints affecting design of anthropomorphic space suit for working astronaut 19 p3291 A66-35972

Interplanetary mission planning including energy requirements, payload definition, spacecraft design, launching, cost data, etc 19 p3470 A66-36314

Automated mission analysis by Markov chain techniques, examining effectiveness factors of reliability and maintainability 20 p3682 A66-37179

System effectiveness and achievement levels, discussing difficulties in application to mission requirements 20 p3566 A66-37885

U.S. Lunar Orbiter program 20 p3663 A66-38063

Optimum launch and transfer conditions for two concentrations of orbits within meteor stream associated with Kreutz group of sun-grazing comets in space

mission 22 p3976 A66-39

Manned mission design analysis, examining spacecraft electrical power requirements weight correlation and cost estimation 23 p4021 A66-41

Optimization of aircraft performance, performance and mission completion [ICAS PAPER 66-4] 24 p4159 A66-42

MITOSIS

SA CELL DIVISION

Chromosome configuration and mitotic impairment in micropores Tradescantia paludosa due to space flight effects Voskhod I 11 p1645 A66-2

MIXED FLOW

Three-dimensional theory of incompressible and inviscid flow through mixed flow turbomachines [ASME PAPER 64-WA/GTP-1] 02 p0176 A66-11

Turbulence in free shear layer in mixing region of circular jet, comparing statistical characteristics of mathematical and physical models [AIAA PAPER 65-805] 03 p0357 A66-13

Optimum design of by-pass engine with exhaust and by-pass flow mixing, noting thrust and efficiency 04 p0572 A66-13

Automatic control of flow rate at pressure in mixing process involving several components 04 p0504 A66-13

Supersonic combustion, examining turbulent mixing zone between supersonic streams of carbon dioxide and air 05 p0662 A66-15

Effect of interaction of dissipating axisymmetric currents on flow at base region of bodies moving with hypersonic velocity 05 p0607 A66-15

Streamline curvature effect on mixing within boundary layer, deriving magnitude of concentration and pressure 05 p0665 A66-15

Excitation of oscillations in interacting flows of inhomogeneous plasma moving along external magnetic field with velocity varying over flow cross section 06 p0913 A66-16

Mixed flow of five plane turbulent air discharged into atmosphere through slot nozzles 06 p0872 A66-16

Cavitation performance testing in water mixed flow pump 07 p1039 A66-18

Losses in vaneless diffusers of centrifugal compressors and pumps due to wall friction and sudden expansion mixing at entrance [ASME PAPER 65-FE-1] 10 p1540 A66-215

Mixing processes for isothermal and nonisothermal simulation of flows combustion chambers 13 p2210 A66-264

Mixed flow of two gases through coaxial cylindrical tubes separated by perforated plate 14 p2273 A66-267

Spreading of injected miscible additive caused by convection and diffusion Poiseuille flow 14 p2278 A66-281

Excitation of oscillations in interacting flows of inhomogeneous plasma moving along external magnetic field with velocity varying over flow cross section 15 p2556 A66-298

Diffusion flame for stagnation mixing layer created by jet fuel injected into oxidizing stream at stagnation region of blunt body 17 p3033 A66-324

Frictional drag and convective heat transfer of rotating cones of arbitrary vertex angles in mixed and turbulent flow 17 p3038 A66-334

Velocity and temperature fields in mixing flow of five turbulent jets injected into means of separate nozzles into chamber 18 p3103 A66-350

Diffusion parameters for fluid stream flowing from round hole with given radius and velocity into wake flow 20 p3544 A66-365

Interface propagation in mixed laminar turbulent flow between counter-rotating concentric cylinders, noting spiral turbulence as dominant feature of Couette flow transition 20 p3547 A66-375

Equivalent problem method of heat conduction theory applied to mixed flow produced by convergence of two jets ejected from two plane-parallel nozzles with parallel axes 21 p3728 A66-395

rier coefficients of tunnel diode
activity and noise current determined
with conversion factor and amplitude

Multiple access modulation techniques
/frequency-division, time-division, spread-
spectrum and pulse-address/ for use in
communications satellites
[AIAA PAPER 66-278] 12 p1821 A66-24750
Time division multiple access /TDMA/
modulation technique for satisfying
anticipated demand by many small users for
communication satellite facilities
[AIAA PAPER 66-279] 12 p1821 A66-24751
Active transistor modulators for carrier
frequency engineering, noting noise
reduction, lower power requirements and
modulation-filter
matching 13 p2032 A66-25485
Book on modulation as applied to
information transmission, discussing
mathematical background, linear modulation
systems, FM, PM, etc 14 p2239 A66-27718
Ultrasonic modulation of laser oscillation
from neodymium glass
rod 14 p2309 A66-28044
Modulation technique for simultaneous

utilization by large number of Earth stations with satellite repeater with transfer characteristics of wide-band hard-limiting amplifier 17 p2876 A66-33102

Self-modulation in gallium arsenide oscillators, noting material and field characteristics, Gunn effect, etc 17 p2895 A66-33114

Ultrasonic cell which modulates intensity of He-Ne laser beam for communication of intelligence 18 p3118 A66-34059

Reflection coefficients of plasma waveguide measured by determining wave modulation coefficients 18 p3151 A66-35069

Self-modulation of laser with two-mode resonator 19 p3372 A66-35372

Laser communications system design, describing range equation, modulation and detection techniques, atmospheric effects, etc 20 p3515 A66-37257

Modulation transfer function shown to reduce harmonic distortion by forming positive images, provided exposure and development conditions are met 21 p3738 A66-39127

Space modulation systems characteristics, considering data flow rate, spacecraft weight and power, antenna gain, noise figure, etc 21 p3706 A66-39477

MODULATOR

SA DEMODULATOR

SA ELECTRON TUBE

SA LIGHT MODULATOR

SA OPTICAL MASER MODULATOR

Zero conversion loss obtained for certain frequency change using second-order ideal ring modulator with reactive idler circuit at normal output terminals 04 p0500 A66-14094

Proportional axisymmetric fluid-amplifying element, noting operation of three-terminal modulator and application to various amplifiers 07 p0992 A66-18027

P-i-n diode modulators for K and Q frequency bands, extending operation from 18 to 40 gc 10 p1513 A66-21856

Linearity of phase vs input signal characteristics of phase modulators improved through feedback 13 p2036 A66-25524

Pulse shape formed during discharge of chain-type artificial line 14 p2251 A66-27171

Design and operation of ferrite rectangular waveguide modulator in 5 to 7 gc/s range 14 p2258 A66-27963

Modulator resulting from application of Weikert effect in semiconductor and used in Q and E bands, obtaining conductivity variations 16 p2662 A66-30960

Double sideband capacitance and resistance modulation of systems and calculation of noise and amplification factors 16 p2666 A66-31561

Reflection type microwave modulator with semiconductor filled resonant cavity 17 p2896 A66-33301

Modulators with constant input resistance applied to FDM communications systems for simplification or elimination of filters 18 p3066 A66-33565

Low-loss series or shunt rectifier-modulator circuits as part of class of low-loss modulator circuits 18 p3090 A66-34093

FM modulator with frequency response from DC to video while maintaining crystal stability, accommodating FM narrow-and wideband with single design 19 p3316 A66-35699

VHF power modulator devised to give broadband output signals within frequency range of 66 to 184 megacycles at 2.5 mw and 50 ohms impedance 24 p4184 A66-42644

Electromagnetic propagation in slowly rotating anisotropic dielectric single band waveguide modulator 24 p4175 A66-42967

MODULE

SA COMMAND MODULE

SA ELECTRONIC MODULE

SA LANDING MODULE

SA LUNAR EXCURSION MODULE /LEM/

SA MARS EXCURSION MODULE /MEM/

SA SERVICE MODULE

Modular synthesis of sequential machines, discussing external variable dependent single memory element devices 05 p0637 A66-14927

MODULUS

S BULK MODULUS

S DYNAMIC MODULUS

S YOUNGS MODULUS

MOHR CIRCLE

Separation of principle stresses by using lines of constant shear stress in improved shear-difference method 07 p1141 A66-17212

Machine part design by limit loads and Mohr circles, using trial and error dimension minimization 14 p2397 A66-27389

MOIRE METHOD

Automatic coordinating measuring equipment using Moire fringes used to record flight paths of rockets 01 p0070 A66-10914

Moire patterns of two superposed cadmium sulfide crystals observed by Lang method of X-ray observation 01 p0126 A66-10968

Strain and deformation over extended field determined from single photograph by moire grid-analyzer method 03 p0433 A66-12314

Laminar flow heat transfer in polygonal ducts, covering analog solution by Moire and point matching method [ASME PAPER 65-HT-27] 05 p0784 A66-14746

Raster magnification effect of moire images to observe plane deformation in specimens subjected to impact 11 p1782 A66-22857

Moire fringes formed by two zonal gratings of equal or slightly different pitches 12 p1960 A66-23951

Moire data recording and processing techniques in thermal strain fields at high temperatures, comparing experimental data with elasticity theory 14 p2400 A66-27768

Laminar flow heat transfer in polygonal ducts, covering analog solution by Moire and point matching method [ASME PAPER 65-HT-27] 16 p2828 A66-30985

Improved processing of moire data by use of numerical and optical filters to eliminate noise in moire patterns 18 p3134 A66-33716

Moire fringe precision angle transducer 19 p3355 A66-35502

Elastic and elastoplastic distribution of stresses and strains around 45 degree V notch, with circular base determined by photoelastic and moire techniques 20 p3667 A66-37483

Sum determination of principal stresses in plates by measuring thickness changes, applied to frozen plates and models deformed inside frames 22 p3994 A66-40438

Second-order moire patterns obtained by superposing two identical moire fringe patterns to obtain equal strain lines experimentally 24 p4292 A66-42966

MOISTURE

Static moisture removal system developed for space power application from tests determining vapor-pressure characteristics of capillary fuel cell 01 p0012 A66-10912

Aluminum foil and plastic film compared for wrapping aerospace hardware for moisture-vapor protection 22 p3922 A66-40038

MOISTURE DETECTOR

Alpha radiation frost point hygrometer obtains stratosphere moisture profiles [AIAA PAPER 66-368] 12 p1872 A66-24496

Atmospheric moisture from balloon radiometer measurements of atmospheric profiles of long wave irradiance [AIAA PAPER 65-461] 16 p2706 A66-30910

Moisture contamination and associated water band absorption spectra recorded by balloon-borne spectrometer 20 p3554 A66-38206

MOISTURE METER

SA HYGROMETER

Moisture content determination in liquid HF based on electroconductivity 21 p3702 A66-38519

MOL

S MANNED ORBITAL LABORATORY /MOL/

MOLAB

S LUNAR MOBILE LABORATORY /MOLAB/

MOLD

S MANDREL

MOLDAVITE

Chemical composition and origin of moldavites, noting densities, refractive indices, oxide content, rubidium-strontium ratio, etc 13 p2187 A66-26234

Moldavites and Indoaustralian tektites, comparison of size, surface sculpture and origin of various

specimens 18 p3238 A66-35233

MOLDING MATERIAL

Lightweight steel and superalloy casting design, describing avoidance of shrinking, ceramic-shell molds, X-ray standards and weld repair [ASME PAPER 65-MD-3] 05 p0688 A66-15132

MOLECULAR ABSORPTION

Raman scattering and IR absorption spectra of gaseous, liquid and crystalline benzoyl benzoic acid and O-and M-toluic acids 09 p1339 A66-20941

Microwave absorption in compressed carbon dioxide between 150 and 300 gc measured, detecting no losses at 150 gc 13 p2021 A66-25383

Nonresonant absorption of radio waves in molecular oxygen 13 p2025 A66-26044

Carbon monoxide adsorption on tungsten surface as affected by temperature, noting sticking probability of molecules striking clean or covered surfaces 16 p2721 A66-30108

Atmospheric ozone absorption coefficients measurement, determining errors in extraterrestrial constant of Dobson spectrophotometer 17 p2923 A66-33359

Solar radiation passage through Earth atmosphere in triplet lines O I, considering molecular hydrogen absorption and brightness distribution of radiation 22 p3973 A66-40472

MOLECULAR BEAM

SA ATOMIC CLOCK

Velocity distributions in molecular beams of argon produced by supersonic nozzle sources, using time of flight method 04 p0548 A66-14012

Cluster ion formation by electrical retarding field, measuring spectrum and size distribution in condensed supersonic molecular beams of carbon dioxide 05 p0718 A66-14501

Beam source producing atomic and molecular hydrogen by molecular dissociation at high temperatures 07 p1084 A66-18492

Moleculochron, stable molecular beam generator using pairs of resonators coupled by molecular beam 11 p1666 A66-22726

Molecular beam approximation for plane normal shock in free stream monatomic gas flow at large Mach numbers 11 p1690 A66-22911

Pulse excitation of volume of gas to coherently radiating state applied to beam maser spectrometer 12 p1879 A66-23731

Beam maser excitation parameter calculations including collision in beam effects and comparison with molecular formaldehyde 13 p2093 A66-26054

Electric resonance molecular beam spectrometer for operation in millimeter-submillimeter wavelength region 15 p2501 A66-29005

Optimum conditions for molecular beam generation determined by measuring particle flow density and speed ratio of short beam pulses from convergent nozzle 16 p2752 A66-30384

Supersonic molecular beam apparatus, noting maximum intensity for variation of inlet stagnation pressure and nozzle-skimmer distance 16 p2746 A66-30385

Continuum source molecular beam facility, examining effect of source-skimmer distance variation on flux and spatial distribution of beam in collimation chamber downstream 16 p2746 A66-30386

Hydrogen, He, Ne and Xe high energy molecular beam scattering from gold film surfaces during evaporative deposition 16 p2752 A66-30392

Modulated molecular beam techniques used to measure spatial distribution of rare gases reflected or scattered from metal surface 16 p2753 A66-30393

Rotating target experiments on nitrogen gas molecule interaction with engineering surfaces and velocity distribution of scattered beam 16 p2753 A66-30394

Pulsed molecular nitrogen beam-ballistic pendulum measurements of normal momentum accommodation coefficients 16 p2701 A66-30395

Spatial distribution of high energy Ar atoms scattered by various surfaces 16 p2753 A66-30398

High energy argon atom interactions with

surfaces and variations in accommodation coefficient 16 p2702 A66-30399

High intensity fast molecular beams obtained by skimming and collimating core of supersonic plasma jet from arc-heated source 16 p2760 A66-30431

Magnetic anisotropy of vacuum deposited permalloy films under applied magnetic field and obliquely incident molecular beam 16 p2773 A66-30686

Steady state oscillations of molecular beam laser with inhomogeneous sinusoidal field in resonator 17 p2885 A66-32243

Effect of angular resolving power on measurement of total atomic scattering cross sections 18 p3114 A66-34707

Mass spectrometer used for analysis of spatial distribution of molecular beams, with data on angular distribution of magnesium atom beam 20 p3559 A66-37522

High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 21 p3749 A66-39336

Experimental molecular beam study of nucleation process in chemical-vapor growth of epitaxial silicon films 21 p3805 A66-39588

Transmission electron microscopic and molecular beam study of nucleation and growth in chemical vapor of epitaxial silicon films on carbon-contaminated silicon substrates 21 p3806 A66-39589

Molecule reorientation and transition probability in molecular beam maser using formaldehyde 22 p3929 A66-39662

High frequency-stability EM wave source, applying thermal excitation methods to pencil quantum generator in IR region 22 p3929 A66-39706

Change in thermionic emission current of palladium wire at 1000 degrees C due to exposure to molecular and atomic-hydrogen beams 22 p3859 A66-39913

Change in temperature conditions during growth of epitaxial germanium films from molecular beam in vacuum 22 p3961 A66-39928

Molecular beam chamber for cryopumping studies and capture coefficient 22 p3890 A66-40223

Moleculechron, stable molecular beam generator using pairs of resonators coupled by molecular beam 23 p4078 A66-41464

Focusing molecules in states losing energy with applied field, using alternate gradient technique 24 p4239 A66-43037

MOLECULAR BONDING

Cubic transition-metal carbides and binding mechanism 13 p2166 A66-25835

Interatomic interaction effect on adsorption-induced loss of strength in metals 14 p2315 A66-27599

MOLECULAR CHAIN

SA CRYSTAL LATTICE

Difference between dynamic and equilibrium tension in macromolecular chain expressed as functional of variation of nonlinear strain function, developed in kinetic elasticity theory 02 p0261 A66-11427

Equation relating sound velocity in polymer sample with angle between axes of molecules and fibers of sample 13 p2113 A66-25910

Ultrasonic wave splitting of individual fragments and isolated polypeptide chains of human gamma globulin molecule 16 p2639 A66-30793

MOLECULAR COLLISION

SA ATOMIC COLLISION

Estimates of collision cross sections for carbon dioxide and air molecules at 200 degrees K with thermal radiation field as error source 01 p0062 A66-10762

Approximation formulas for certain collision integrals of gas transport 03 p0395 A66-12836

Molecular collision cross sections discussing vibrational excitation of carbon dioxide by collision with molecular hydrogen 04 p0548 A66-13811

Satellite drag coefficient reevaluated in consideration of recent data on gas-surface interaction and atmospheric composition 05 p0760 A66-14941

Monte Carlo method solution of heat transfer in rarefied gas between infinite flat plates 05 p0787 A66-14987

Master equation for intramolecular

relaxation processes, with application to internal vibrational relaxation and isomerization reactions 06 p0911 A66-16170

Collisional transition between lower atmosphere and collisionless exosphere analyzed, using integral formulation of Boltzmann equation and collision models 09 p1459 A66-20882

Turbulent friction tensor derived for anisotropic molecular velocity distribution, considering application to stellar rotation physics 11 p1737 A66-22363

Motion yielding transition probabilities between low-lying vibrational levels of diatomic molecules 11 p1738 A66-22878

Cross sections of inelastic collisions of hydrogen and nitrogen molecular ions with hydrogen molecules 11 p1738 A66-22879

Rarefied compressible gas flow analysis by study of collisions between molecules, molecule-surface collisions and distance molecules travel between collisions 11 p1739 A66-22907

Shock wave structure in gas composed of rigid sphere molecules initially in thermal equilibrium between two infinite plane parallel specularly reflecting walls 11 p1691 A66-22913

Molecular collision effect on transitional drag on cylinder traversing rarefied gas at hypersonic Mach numbers, discussing departure from free flow 11 p1632 A66-22920

Transport properties, thermoconductivity, molecular collision and viscosity of polyatomic gas of circular cylindrical molecules with hemispherical caps 11 p1741 A66-23215

Transition probabilities of nitrogen-nitrogen collision obtained with time-dependent wave functions of forced harmonic oscillator and by numerical methods 13 p2131 A66-25384

Atmospheric observation with advanced light radar, noting equipment characteristics, molecular scattering mechanism, etc 13 p2122 A66-26133

First-collision process at sharp leading edge of flat plate aligned with hypersonic free stream 13 p1993 A66-26728

Estimates of collision cross sections for carbon dioxide and air molecules at 200 degrees K with thermal radiation field as error source 14 p2286 A66-27861

Molecular inelastic collision cross sections from radiometer force curve 15 p2543 A66-28782

Knudsen gauge designed by university sophomores, measuring molecular collision cross sections 15 p2498 A66-28787

Microwave absorption by water vapor and mixtures with other gases between 100 and 300 gc/s, noting increase in absorption attributed to molecular collision-induced polarization 15 p2450 A66-29004

Calculation of effective excitation cross sections of hydrogen atoms for collisions with nitrogen molecules and hydrogen atoms 15 p2545 A66-29211

Improved Monte Carlo method for calculating steady state monatomic rarefied-gas flows, using computer for calculating possibility of collision in given geometrical cell 16 p2753 A66-30787

Excitation of vibrational degrees of freedom in molecular collision from vibrational relaxation data and molecular beam elastic scattering experiments 16 p2755 A66-31588

Extrema-effect in total elastic molecular beam scattering cross sections for characterizing potential well 17 p2961 A66-32860

Collisions in inner region of cometary head, structure of emission bands and formation of free radicals 17 p3010 A66-33376

Quantum effects in elastic scattering of atoms and molecules, noting classical treatment 18 p3138 A66-34458

Slow electron scattering on dipolar symmetrical top molecules and quadrupolar linear molecules calculated at energies below threshold for vibrational excitation 18 p3139 A66-34510

Cross sections for vibrational excitation of water by collision with water and molecular hydrogen calculated, using radial scattering equations 19 p3403 A66-36330

Approximation formulas for certain

collision integrals of gas transport 19 p3404 A66-36778

Initial rotation effect upon vibrational excitation of diatomic molecules studied in two-dimensional collisions shows that with higher rotational energies it is increasingly difficult to excite 19 p3404 A66-36802

Vibration 19 p3404 A66-36802

Thermal escape of neutral hydrogen and distribution in Earth thermosphere, noting collision in transition regions 20 p3549 A66-37292

Steady state oscillations in semilinear gas excited by harmonically oscillating wall, using single-collision time kinetic model 20 p3605 A66-37635

Pressure broadening of microwave lines in semiclassical treatment obtained as limit of quantum impact theory and its limitations 20 p3602 A66-37640

Light emission of electron-excited molecular nitrogen with NO, noting electronic state changes 22 p3949 A66-39910

Collision frequency in E and D regions of ionosphere for electrons and neutral molecules 22 p3906 A66-39948

Vibrational energy exchange between molecules during collision behind direct shock wave front examined as function of wave velocity 23 p4010 A66-41732

MOLECULAR DIFFUSION

Laminar boundary layer of nitrogen flow over helium cooled sphere with porous wall 01 p0162 A66-10463

Evaporation as molecular diffusion from large rough surface into random-lived internal scale turbulent eddies 02 p0223 A66-11960

Hydrogen and oxygen ionization at three-phase boundary in alkaline solutions on smooth metals 08 p1171 A66-19650

Atmospheric structure in lower thermosphere, examining grenade clouds to determine density 09 p1375 A66-20892

Anomalous diffusion of zinc in indium antimonide, noting two diffusion currents 14 p2367 A66-28240

Diffusion and dissociation of CO molecules in solar atmosphere 15 p2596 A66-29139

Atomic-to-molecular oxygen concentrations ratio values in upper atmosphere used to determine strength of turbulent mixing in atmosphere, noting definition of turbopause height 16 p2694 A66-30704

Laminar electrohydrodynamic flow in plane diffusor, taking into account molecular diffusion of space charge 17 p2969 A66-32544

High temperature diffusion of potassium in single crystal and polycrystalline molybdenum 17 p2940 A66-33230

Physical structure of upper atmosphere given by pressure and density scale heights and mean molecular mass due to diffusion 19 p3349 A66-36348

Diffusion parameters for fluid stream flowing from round hole with given radius and velocity into wake flow 20 p3544 A66-36914

Statistical mechanical predictions of second virial, adiabatic Joule-Thomson, viscosity and diffusion coefficients for intermolecular potential functions 20 p3678 A66-37313

Volt-ampere characteristics and photomicrographs of p-n junctions produced by diffusion of Zn and Cd into InP 21 p3798 A66-38918

Leak specifications for gas-filled electronic enclosures, discussing molecular, slow viscous, capillary and ordinary leak patterns 24 p4182 A66-42574

MOLECULAR DISSOCIATION

SA ATOMIC RECOMBINATION

Lifetime of radiative dissociation of excited molecular hydrogen 01 p0108 A66-10311

Isobaric specific heat of equilibrium dissociating nitrogen tetroxide in wide temperature range at moderate pressure 01 p0166 A66-10996

Population inversion by thermal dissociation of molecules in shock wave 02 p0263 A66-11730

Angular distribution of fast H and H plus ion dissociation fragments on hydrogen gas, noting transverse velocity distribution 03 p0394 A66-12329

Shock tube measurements of carbon dioxide dissociation in argon mixtures at

6000 to 11,000 degrees K 03 p0443 A66-12339
 Dissociation of oxygen molecules by vibrational excitation 03 p0396 A66-13212
 Plasma formation by dissociation of molecular ions by arc discharge in apparatus for adiabatic plasma confinement 06 p0915 A66-16152
 Correlation energy effect on dissociation and binding energies of diatomic and polyatomic molecules 07 p1000 A66-18343
 Molecular oxygen dissociation resulting from collisions with neon and argon metastable atoms in auroral afterglow 11 p1696 A66-22419
 Nonequilibrium effects in recombination dissociation kinetics, using iterative perturbation procedure 11 p1738 A66-22884
 Cosmic and UV radiation effects on breakdown of DNA and production of tumors in mice 13 p2008 A66-25642
 Rate of dissociative electron capture by heavy molecular ions developed in semiclassical formalism 13 p2136 A66-26271
 Dissociation rate magnitudes and relative collision frequencies influencing relaxation profiles in diatomic gases 14 p2274 A66-27447
 Chemical kinetics of borane and diborane compounds, decomposition rates and molecular dissociation energy 15 p2447 A66-29237
 Plasma formation by dissociation of molecular ions by arc discharge in apparatus for adiabatic plasma confinement 15 p2557 A66-29882
 Diatomic gas flow past blunt bodies, noting effect of oscillation and dissociation relaxation on mean energy 16 p2627 A66-30100
 Long-range interatomic forces from thermal energy spectra, elastic scattering cross sections for atomic beams and limiting curve of dissociation 16 p2751 A66-30161
 Dissociation rate of diatomic molecular fluorine 16 p2846 A66-30863
 Nitrogen tetroxide dissociation effect on surface friction in turbulent boundary layer 16 p2686 A66-31064
 Dissociation energies of chlorides of alkaline-earth metals determined from equilibrium reactions of metals with chlorine in flames 16 p2830 A66-31613
 Accelerated sodium pyruvate decomposition in aqueous solution due to proteinoids produced by thermal condensation 17 p2849 A66-31875
 Ionization potential, dissociation energy and electron affinity for molecular oxygen 18 p3137 A66-33989
 Elementary processes in low-temperature plasma 18 p3143 A66-34029
 Dissociation and reassociation reactions of hemocyanin mixtures analyzed by electron microscopy, noting original molecular structures 18 p3060 A66-34459
 Thermal dissociation of molecular fluorine in inert gas from 1650 to 2700 degrees K in shock tube coupled to time-of-flight mass spectrometer 18 p3139 A66-34501
 Contamination, viscosity, shear stability, breakdown and foaming of MIL-H-5606 hydraulic fluid and swelling effect on synthetic rubber 18 p3125 A66-34652
 Nonequilibrium thermoconductivity coefficient for heat transfer in dissociating gas system at low pressure 19 p3477 A66-35366
 Carbon dioxide decomposition and oxygen reclamation by chemical reaction with electrochemically reduced lithium 19 p3292 A66-36234
 Dissociation of hydrogen molecules by electron impact, using first-order exchange approximation and separated atoms approximation 19 p3403 A66-36328
 Plasma formation by high energy molecular hydrogen ion injection followed by dissociation and accumulation in static magnetic mirror configuration 19 p3422 A66-36546
 Temperature dependence of dissociative recombination coefficients in argon according to hypotheses of Bates and Paigarno 19 p3404 A66-36758
 Dissociation of hypersonic airflow past circular cylinder at zero angle of incidence 21 p3695 A66-39230
 Dissociation energies of GaF, InF and TiF measured by high temperature mass-

spectrometric techniques, noting possibility of potential maxima in excited states 22 p3859 A66-39917
 EPR spectroscopic analysis of liquid oxygen difluoride, noting photolytic dissociation into paramagnetic species 23 p4097 A66-41237
 Effective recombination coefficient in lower ionosphere, deriving expression for dependence of dissociative recombination on temperature and solar distance 24 p4201 A66-42758
 Kinetics of dissociation of carbon dioxide gas molecules behind shock wave front 24 p4196 A66-42882

MOLECULAR ELECTRONICS

Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 04 p0493 A66-13601
 Solid state camera system for aerospace application incorporating monolithic phototransistor mosaic sensor, molecular digital readout system, etc 04 p0519 A66-13631
 Molecularized FM-FM telemetry system for providing more reliable FM subcarrier oscillators with reduced size, weight and power dissipation 06 p0824 A66-15968
 Pulse-radar altimeter for Saturn launch vehicle incorporating molecular and monolithic integrated circuits 08 p1225 A66-19521
 Functional electronic block used to breadboard molecular circuits of prototype lunar TV camera for Apollo Lunar Excursion Module /LEM/ 08 p1196 A66-19524
 Statistical theory of electronic energies, calculating binding energy at theoretical equilibrium separation of molecular hydrogen ion 13 p2130 A66-25370
 Potential energy surfaces on triatomic hydrogen molecule ion computed with generalized Gaussian orbitals 13 p2130 A66-25371
 Electron attachment and detachment coefficients for pure oxygen determined from current waveforms in drift tube 13 p2130 A66-25374
 Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 14 p2243 A66-28350
 Conventional VHF circuits adaptation to equivalent molecular structures, considering tuner and amplifiers 17 p2883 A66-32123

MOLECULAR ENERGY

SA NUCLEAR ENERGY

Internal and vibrational partition functions of carbon dioxide and rotational line intensities arising from transitions from ground and first excited states 06 p0907 A66-15945
 New force theorem for determining molecular energy derivatives with respect to internuclear distance derived from Hellmann-Feynman expression 11 p1741 A66-23217
 Three-body nonadditivity of repulsive forces on classical third virial coefficient 16 p2749 A66-30113
 Energy accommodation coefficient variation with energy of gas molecules impinging on clean surfaces or adsorbed monolayers 16 p2645 A66-30391
 Approximation method using sum rules for energy shift in atomic system due to interaction of electrons with vacuum electromagnetic field applied to hydrogen, helium and lithium atom ground states and hydrogen molecule 19 p3402 A66-35995
 Excitation of hydrogen molecule from ground state to B and C electronic states by electron impact, using one-center wave functions of Huzinaga together with Born approximation 23 p4098 A66-41360
 Perturbation theory of heteronuclear diatomic molecules based on isoelectronic homonuclear molecules applied to carbon monoxide and nitrogen 23 p4032 A66-41646

MOLECULAR FLOW

SA FREE MOLECULAR FLOW

Molecular transfer equations derived on basis of irreversible thermodynamics and law of conservation of matter 01 p0163 A66-10625

Two-fluid shock wave model involving Boltzmann equation and inelastic collision theory for rarefied gas 08 p1204 A66-18524
 Gas capture coefficient prediction for cryopumping based on critical velocity model in space chamber simulator 10 p1520 A66-21937
 Rate of effusion for gas flow through orifice and application to fluorine gas dissociation energy 11 p1688 A66-22880
 Iterative solution to shock wave structure in highly rarefied flows through kinetic theory and full Boltzmann equation 11 p1690 A66-22910
 Optimum ionizer structure, examining cesium transport through tungsten capillaries 12 p1922 A66-24529
 [AIAA PAPER 66-207] Monte Carlo solutions to two molecular flow problems, heat transfer between parallel walls and shock wave profile-computer programmed in Boltzmann equation analysis 16 p2686 A66-30946
 Pressure measurement for determination of speed of high vacuum pumps based on laws of molecular flow 17 p2929 A66-31976
 Aerodynamic gaseous drag torque on electromagnetically suspended isolated sphere rotating at high Mach number in rarefied transition regime from continuum to free molecule flow 20 p3492 A66-37473
 Supersonic gas flow states in transition regime, discussing change from dynamical to molecular flow, velocity and pressure distribution and conditions for freezing of translational degrees of freedom 20 p3548 A66-38084
 Space chamber molecular kinetics, noting importance of molecular flux upon simulation fidelity and effect of various gases and chamber geometry on flux profile 20 p3544 A66-38161
 Density of steady state gas flow expanding from viscous to molecular flow regime approximately calculated 21 p3723 A66-38507
 Modified Poiseuille equation for gas flow through capillaries, applicable to flow regimes extending from molecular to viscous flow 21 p3725 A66-38943
 Temperature dependence of viscosity due to molecular rotation in non-Arrhenius range of supercooled liquids 22 p3902 A66-40912

MOLECULAR FORMING

Emission and absorption lines with anomalous intensity distributions indicate hydroxyl molecule concentrations in Sagittarius A 07 p1133 A66-17462
 Text on evolution, interpreting functions of body organs in terms of chemical processes and tracing development of complex organic molecules 10 p1487 A66-22065

MOLECULAR GAS

Reaction of molecular hydrogen with oxygen in absence of molecular oxygen at various temperatures, using stirred reactor with mass spectrometer 04 p0473 A66-13649
 Vibrationally excited molecular hydrogen effect on mean polarizability 04 p0549 A66-14311
 Zenith intensity of second positive band of molecular nitrogen in dayglow calculated and compared to experimental results 05 p0668 A66-14802
 Emission spectra of nitrogen excited by electron beam of 0.1 to 20 keV and oxygen and air bombarded by 13-keV electrons 11 p1740 A66-23040
 Q-switching of carbon dioxide and nitrous oxide gas laser 11 p1714 A66-23354
 Atmospheric radio wave absorption coefficient and altitude determined and linked to effects of colliding paramagnetic oxygen molecules 13 p2020 A66-25224
 Molecular nitrogen photofixation relation to electron-donor respiratory system, activity of hydrogenase and dehydrogenases and photosynthesis 13 p2010 A66-25893
 Ionizing collisions between alkali metal atoms and gas molecules, with measured cross sections applied to physics of atomic collisions 13 p2131 A66-25966
 Charge exchange cross section increase during single collisions of alkali-metal ions with atoms of inert gases and atomic hydrogen and nitrogen molecules 14 p2336 A66-27155

Existence and properties of double molecules /dimers/ in unsaturated vapors 15 p2547 A66-29630
Thermal diffusion in isotopic gas mixtures 16 p2826 A66-30576
Breakdown by neodymium glass laser radiation in atomic and molecular gases, determining power densities, noting relation of pressure to breakdown power 16 p2718 A66-30938
Presence and detectability of hydrogen in molecular form in galaxy 17 p3001 A66-32365
Phase transition in two-dimensional lattice gas of hard-square molecules 17 p2978 A66-32505
Intermediate state peculiarities effect on Raman scattering spectra of excited gas molecules 17 p2960 A66-33508
Population inversion in adiabatic expansion of molecular gas mixture with three vibrational levels 19 p3402 A66-36068
Distorted-wave calculation from rotational excitation of molecular hydrogen and molecular deuterium in thermal collisions with atomic hydrogen, presenting angular distributions, cross sections, etc 19 p3403 A66-36329
Intensity measurements on molecular oxygen Herzberg I system emitting in afterglow of microwave discharge, noting dependence of transition moment on internuclear distance 20 p3555 A66-38208
Molecular diffusion coefficient calculated in 130-200 km region from time variation of radiance distribution from glow clouds produced by grenade detonation 21 p3734 A66-39339
Molecular hydrogen structure, considering planetary and stellar atmospheres and interstellar space 21 p3815 A66-39487
Spectroscopic electron beam diagnostic technique, examining negligible effect elevated vibrational temperatures have on measured rotational temperatures of molecular nitrogen [AIAA PAPER 66-747] 22 p3919 A66-40633
Paschen series laser lines in atomic and molecular hydrogen 22 p3933 A66-40892
Charge exchange cross section increase during single collisions of alkali-metal ions with atoms of inert gases and atomic hydrogen and nitrogen 24 p4239 A66-42975
MOLECULAR INTERACTION
Rate coefficients of ion charge exchange reaction between atomic oxygen ions and oxygen-nitrogen molecules measured at thermal energies by afterglow method 02 p0263 A66-11505
Sticking coefficients for interaction of molecular oxygen with clean semiconductor surfaces assuming immobile adsorption process 03 p0408 A66-12406
Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 04 p0510 A66-13879
Stoichiometry of reaction of cyanine dye with diverse polyionic macromolecules 06 p0821 A66-16157
Relative rate constants for energy transfer from excited argon atoms to various organic molecules 06 p0910 A66-16158
Intermolecular forces for two-, three- and four-bodies and those in liquid or condensed medium 06 p0911 A66-16169
Molecules intrinsic volume role in theory of shock broadening of spectral lines 06 p0909 A66-16629
Equilibrium properties of system of interacting molecules calculated from differential equation of state for real gas, employing classical and thermodynamic relations 06 p0912 A66-16841
Interaction energies of Ne, Ar, Kr, Xe N-2 and CH-4 near semiinfinite hexagonal boron nitride lattice at potential minimum 08 p1178 A66-18936
Specific reaction rates measured as function of ion energy for low energy ion-molecule reaction 08 p1259 A66-19698
Boltzmann equation behavior, at large Knudsen numbers, for free molecular interactions with infinite collision cross section 11 p1691 A66-22918
Ion-molecule reaction rates and recombination coefficients from mass

spectrometric ionospheric data 11 p1702 A66-23492
Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 ev 12 p1917 A66-24222
Ultrasonic measurements in studying molecular interactions in fluids, noting variation relative to pressure, volume and sound velocity variation 13 p2016 A66-25093
Hydrodynamic systems expressed by kinetic equations, deriving equations of aerodynamics without knowledge of interaction of gas molecules 14 p2275 A66-27569
Low temperature transport properties of hydrogen, deuterium and HD, noting quantal phase shift, intermolecular potentials, etc 14 p2414 A66-27973
Thermal energy exchange between gases and solid surfaces, using realistic interaction potentials of Morse type, Maxwellian velocity distribution 16 p2825 A66-30387
Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-30388
Molecular-kinetics experiments /trajectory calculation of particle interaction/ using digital computer iterative method for theoretical comparison 16 p2856 A66-30947
Core integral and electron repulsion integral for 2p-1 Slater-type orbitals of allyl radical and benzene molecule transformed to Lowdin orthogonalized basis set of atomic orbitals 16 p2754 A66-31185
Moderately long-range relativistic intermolecular forces, obtaining interaction energies 17 p2960 A66-32401
Retarded intermolecular forces, discussing Casimir and Polder retarded dipole-dipole energy of interaction between two ground state atoms in terms of trigonometric integrals 17 p2960 A66-32402
Electronic energy of interacting atoms at short range, noting Hellman-Feynman theorem for electron density in elliptic coordinates 17 p2961 A66-32550
Coupling between free electron and molecular vibrational temperatures in plasma environments, noting energy distribution, application to MHD generation, etc 18 p3145 A66-34105
Low rigidity end of differential power spectra of proton and helium components of primary cosmic radiation, considering ionization loss and interaction with interstellar hydrogen 18 p3189 A66-34830
Lennard-Jones potential application to properties of simple gases, noting values of second and third virial coefficients, molecular interaction, collision integrals, etc 18 p3140 A66-34926
Unfocused ruby laser radiation field-biphenyl compound interaction, resulting luminescence and apparent multiphoton absorption 21 p3745 A66-38528
Curves of attractive potential energy in diatomic molecules, noting calculations for Li-Li interactions in power series form 21 p3775 A66-39074
Temperature dependence of integral absorption and band half-width in IR spectra of methyl and ethyl siloxanes 21 p3802 A66-39160
Conjugation breakdown effect on properties of semiconductor polymer, showing effect of impedance on current transfer and intermolecular interaction 21 p3702 A66-39249
Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 ev 22 p3951 A66-40584
Orientation relaxation in symmetrical-top gases and binary gas mixtures, noting prediction of cross sections from kinetic theory data for molecules 22 p3860 A66-40901
Ionic reaction in nitrogen-oxygen system, discussing reactions of He and N ions 23 p4063 A66-41039
Ionization cross sections and efficiencies by electron impact and photoionization for molecular ionization at low energies 23 p4098 A66-41268
Cell model of attractive interactions between helium atoms and effect on solid-superfluid transition in He 4 at absolute

zero 23 p4090 A66-41368
Spin-spin interaction energy for large separations of two ground state hydrogen atoms 24 p4239 A66-43040
MOLECULAR ION
Rotational temperatures derived from molecular nitrogen ion in aurora along with simultaneous height measurements 02 p0223 A66-11833
Partial wave calculation of diatomic divalent molecular /HeH/ ion 04 p0547 A66-13643
Helium afterglow in HF pulse-discharge plasma at 77 K from dissociative recombination of molecular helium ion with thermal electron 10 p1572 A66-22022
Rocketborne measurements of electron precipitation and relative brightness of ionized molecular nitrogen ion and atomic oxygen auroral emissions 11 p1764 A66-23139
Ion exchange in phospholipid monomolecular films 12 p1805 A66-23917
Monte Carlo calculations of cross section magnitude of electron-positive-molecular-ion dissociative recombination 13 p2130 A66-25375
Rate of dissociative electron capture by heavy molecular ions developed in semiclassical formalism 13 p2136 A66-26271
Franck-Condon factors for ionization of hydrogen and deuterium, noting vibrational eigenenergies of D sub 2 14 p2337 A66-27972
Rate constant of ion molecular processes in ionosphere, tabulating results of laboratory analyses 15 p2495 A66-30054
Helium afterglow in HF pulse-discharge plasma at 77 degrees K from dissociative recombination of molecular helium ion with thermal electron 16 p2760 A66-30841
Ion-molecular reactions of hydrogen with inert gases caused by low energy electrons in low temperature plasmas, considering energy level populations, reaction cross sections, etc 18 p3064 A66-34026
Molecular orbital studies of ground and low lying excited states of HeH molecular ion 18 p3139 A66-34509
Rate constants for atomic and molecular hydrogen ion transfer from tri- and tetra-atomic carbon paraffins to propylene and cyclopropane molecular ions 22 p3861 A66-40905
MOLECULAR ORBIT
Optical absorption spectra of transition elements especially ruby, based on crystal field, ligand field and molecular orbital theories 03 p0408 A66-12500
Self-consistent field calculations of benzene molecule using Gaussian expansion functions, considering 42 electrons and finding interspersions of sigma and pi levels 04 p0473 A66-13648
Molecular orbitals of diborane using SCF-LCAO method, considering all electrons of molecule, calculating all integrals, with basis functions being Gaussian 06 p0940 A66-16123
Alternant molecular orbital AMO/ method compared to nonpaired spatial orbiting /NPSO/ method 06 p0910 A66-16164
Approximate natural orbitals for four electron wavefunctions for Be and LiH obtained by diagonalization of appropriate first order reduced density matrices 06 p0910 A66-16165
Nitrogen analogs of sesquifulvalene, calculating dipole moments of nitrogen anhydro bases and pyridones via modified Hueckel technique 11 p1651 A66-23411
AMO method applied to bcc crystal of hydrogen atoms, taking into account all many-center integrals 15 p2543 A66-28784
Molecular orbital method for boron hydrides from self-consistent field, analyzing dipole moments, ionization potentials, molecular charge distributions, wave functions, etc 17 p2870 A66-32851
Molecular orbital studies of ground and low lying excited states of HeH molecular ion 18 p3139 A66-34509
Temperature dependence of viscosity due to molecular rotation in non-Arrhenius range of supercooled liquids 22 p3902 A66-40912
Three-dimensional Hueckel molecular orbital calculations performed on series of molecules made from atoms of H, C, N, O, F and Cl 23 p4031 A66-41223
MOLECULAR OSCILLATION
Integrated intensity measurements on

fundamental and first overtone band systems of carbon monoxide between 2500 and 5000 degrees K 04 p0596 A66-13647
Itinerant oscillator model of liquids covering classical velocity autocorrelation function of atom and neutron scattering experiments 04 p0547 A66-13809

Cold neutron scattering by hydrogen in liquid argon, calculating scattering cross section and length for monatomic liquid 04 p0548 A66-13810

CW gas laser, measuring vibrational rotational translation frequencies of carbon monoxide 04 p0531 A66-13984

Laser action on vibrational-rotational transitions and vibration energy transfer 13 p2101 A66-26204

Slow electron excitation cross section for polar molecule rotational and vibrational transitions based on Born approximation and point-dipole interaction 15 p2545 A66-29395

Auroral excitation rates and molecular vibrational temperatures in nitrogen 2PG from Franck-Condon factors obtained from intensity measurements and high resolution absorption spectral data 16 p2692 A66-30328

Two-phonon Raman scattering in cubic crystals, noting use of polarization effect to determine active irreducible representations 17 p2981 A66-32818

Vibration-rotation interaction effect on Franck-Condon factors for band system of RbH molecule 18 p3137 A66-33923

Absorption spectra of pure and isotopic impurity crystals of naphthalene in region of first electronic and vibrational /vibron/ transition 19 p3402 A66-36067

Molecular laser action by vibrational excitation of nitric oxide during flash photolysis of nitrosyl chloride 21 p3748 A66-39166

Rotational temperatures of CO molecule oscillative-rotational bands in solar atmosphere, refuting assumed temperature nonuniformities 22 p3985 A66-40949

Molecular oscillation difference frequency generation in IR spectrum by beating together laser and laser-stimulated Raman emission 24 p4221 A66-42544

MOLECULAR OSCILLATOR

Eigenvalues and eigenvectors calculated for several low-lying autoionizing levels in helium 04 p0546 A66-13365

Emission and absorption capacity of /zero-/ band of CN violet system at high temperatures, determining parameters of oscillator system power 21 p3775 A66-39079

MOLECULAR PUMP

Theory of highly rarefied cascade flow and proposal for new axial flow molecular pump in free molecule range 06 p0803 A66-16945

New type of vacuum pump is multistage axial compressor known as /turbomolecular/ pump 16 p2715 A66-31308

Space molecular sink design to create vacuum environment, emphasizing pumping and test chamber instrumentation 18 p3093 A66-33797

Working process of axial-inflow turbomolecular pump for ultrahigh vacuum, noting pressures reached during tests 19 p3371 A66-36617

MOLECULAR ROTATION

Diatomic molecules, discussing interrelation between vibrational relaxation and thermal dissociation 04 p0597 A66-13878

Nitrogen and nitrogen-foreign gas mixtures, determining absorption profile shapes, binary and ternary absorption coefficients and molecular quadrupole moment 06 p0908 A66-16281

Laser action on rotational transitions of 10-9, 9-8, 8-7, 7-6 and 6-5 vibrational bands of ground electronic state CO 07 p1046 A66-18424

Vibrational and rotational relaxations in carbon dioxide and nitrous oxide laser systems, using Q-switching techniques 11 p1714 A66-23355

Electron spin effect of oxygen and short-range static fields of hydrogen, nitrogen and oxygen molecules upon rotational excitation of these molecules by slow electrons 11 p1741 A66-23389

Relations among vibrational frequencies of isotopically substituted molecules when only one Cartesian coordinate of any atom is involved in motion, obtaining general

valence-force-constant

matrix 14 p2336 A66-27373

Quantum mechanics calculation of transmission functions of rotational band of water vapor for 8 spectral regions at 20 to 50 micron wavelengths 14 p2326 A66-27538

Slow electron excitation cross section for polar molecule rotational and vibrational transitions based on Born approximation and point-dipole interaction 15 p2545 A66-29395

Fundamental vibration spectrum of HD in liquid argon, noting rotation-translation coupling, quantized translational energy levels and perturbation treatment of interaction 16 p2645 A66-30120

Cosmic microwave radiation from observations of interstellar CN rotational temperature, rotational excitation by H I region H atoms and excitation by slow electrons and slow protons in H II region 16 p2793 A66-30200

Electromagnetic spectrum of upper atmosphere examined, using microwave techniques, noting molecular rotation of gases with permanent electric or magnetic dipole moments 16 p2698 A66-31044

Physical mechanism of molecular lasers and vibrational rotation relation 17 p2936 A66-33246

Energy levels of rotationally hindered linear molecules calculated, using variational principle based on schroedinger-like integral equation 22 p3949 A66-39665

Perturbation theory-variational calculus analysis of optical rotatory power of molecules based on wavefunction badness 22 p3951 A66-40907

Quantum mechanics calculation of transmission functions of rotational band of water vapor for eight spectral regions at 20 to 50 micron wavelengths 24 p4234 A66-42324

MOLECULAR SIEVE

Gas adsorption on molecular sieves, discussing separation caused by electrostatic forces and electric fields 06 p0819 A66-16730

Cryosorption panels consisting of molecular sieve adsorbents bonded to refrigerated aluminum plates for pumping hydrogen at 20 degrees K 17 p2957 A66-31978

MOLECULAR SPECTROSCOPY

Mechanical and electro-optical parameters for some acetylene derivatives evaluated from IR spectra 01 p0109 A66-11004

Franck-Condon factors to high quantum numbers covering methods, results and tabulation 04 p0548 A66-13830

CW gas laser, measuring vibrational rotational translation frequencies of carbon monoxide 04 p0531 A66-13984

Elastic differential scattering of helium ions discussing energy analysis, geometry and target particle motion effects, and interference phenomena 05 p0719 A66-15767

Elastic differential scattering in low energy helium ion collisions, discussing quantal and secondary interference and two-state theory 05 p0719 A66-15768

IR spectroscopy to determine constant of self-combination of donor acceptors of protons in dilute solution 08 p1257 A66-18645

Mechanical and electro-optical parameters for some acetylene derivatives evaluated from IR spectra 09 p1404 A66-19942

Range of importance of molecular impurities on nitrogen vibrational relaxation determined, using spectroscopic sodium line reversal techniques 11 p1741 A66-23218

Nitrogen analogs of sesquifulvalene, calculating dipole moments of nitrogen anhydro bases and pyridones via modified Hueckel technique 11 p1651 A66-23411

Far-IR laser molecular spectroscopy including IR laser oscillators, photon noise, detectors and nuclear optics 13 p2100 A66-26195

Optical-and IR-maser spectroscopy of inhomogeneously broadened resonances, using gas lasers 13 p2100 A66-26196

Stimulated emission spectroscopy of hydrogen, nitrogen, oxygen and deuterium diatomic gases in 0.8 to 8 micron region 13 p2102 A66-26205

High resolution ESR spectra of acyclic semidione radical anions and single aryl substituent cations 15 p2447 A66-29817

Emission spectroscopy of halides of carbon, silicon and boron in plasma reactor 16 p2763 A66-31190

Microwave spectroscopy used to identify unambiguously contaminant trace gases in mixture and indicate amount of each [AICE PREPRINT 54D] 17 p2868 A66-32678

Laboratory work on comets, discussing spectroscopic data, incompleteness of knowledge of dissociation energies and ionization potentials, etc 17 p3012 A66-33400

Helium atoms in 2P level contribute to formation of excited helium molecules in positive column of DC discharge, noting IR portion of pumping radiation is responsible for enhancement of molecular population 22 p3950 A66-39918

Plasmoid-like RF helium plasma, noting molecular ion formation and destruction leading to evaluation of lower limit for molecular collisional-radiative recombination coefficient 22 p3957 A66-40908

MOLECULAR SPECTRUM

Oscillator strength of CN violet system from shock layer by time-of-flight scanning spectrometer 03 p0393 A66-13152

Helium afterglow discussing stability of collisional-radiative recombination of ions with electrons and neutral particles 04 p0547 A66-13652

Emission and absorption lines with anomalous intensity distributions indicate hydroxyl molecule concentrations in Sagittarius A 07 p1133 A66-17462

Temperature factors and intensities of absorption bands of molecular vibrational spectrum 07 p1082 A66-17531

Perturbation effects in differential elastic ion-atom scattering generated by crossing of molecular states from even potentials 11 p1740 A66-22972

Approximation of expectation values for nonenergy properties via perturbation theory, obtaining values for molecular polarizability 12 p1917 A66-23935

Electron correlation theory in nonclosed-shell states, discussing orbital wave functions and perturbation theory 13 p2130 A66-25376

Numerical values describing molecular rainbow scattering in Airy approximation for 12-6 potential 13 p2130 A66-25379

Electron spin resonance of gamma irradiated single crystal of barbituric acid dihydrate, noting formation and Hamiltonian parameters of free radicals 14 p2367 A66-27979

Line width and shifts in molecular spectra of gases, giving general formulas for pressure broadening, phase shift of rotation, amplitude modulation of radiation and rotationally inelastic collisions 16 p2750 A66-30118

Color centers in alkali metal azides, noting change of ion from linear to bent configuration 16 p2777 A66-31023

Electron vibration spectra of light absorption in molecular crystals, taking oscillation frequency changes as principal mechanism of exciton-phonon interaction 16 p2780 A66-31178

Electron angular distribution in copper and gold thin films attributed to individual close interaction scattering phenomena 17 p2987 A66-33314

Gas laser with generalized polarization characteristics, noting role of degenerate atomic energy levels 19 p3374 A66-36005

Intensity distribution in rotational structure of molecular spectra bands upon excitation by ion impacts 20 p3604 A66-37368

Splitting of EPR lines of trivalent Cr ion in zinc tungstate by external electric field, noting angular dependence and corresponding spin Hamiltonians 20 p3615 A66-37370

Beam foil excitation technique application in measuring mean lives of 2p and 3p levels of hydrogen 21 p3774 A66-38543

Molecular spectroscopy, measuring absorption coefficient at center of carbon dioxide band, determining vibration-rotation transition moment 23 p4076 A66-41179

MOLECULAR STRUCTURE

SA RAMAN SCATTERING

Electronic structure of molecules based on wave function called self-consistent field biorbital wave function 03 p0394 A66-12334

Crystal structure of porphine determined by X-ray diffraction analysis 04 p0473 A66-13642

Molecular anisotropy of propagation of intense light beam, noting Raman and Brillouin effects 05 p0696 A66-15106

Crystalline and molecular structure of chlorotetraammine /sulfur dioxide/ ruthenium chloride 06 p0820 A66-15939

Absorption and emission spectra pertaining to electronic transitions of short-lived molecules C sub 2 and CH present in reaction zone of low-pressure oxyacetylene flames 06 p0969 A66-16126

Molecular configuration of bis /orthododecacarborane/ determined by three-dimensional X-ray 06 p0822 A66-16631

Surface of Moon composed of solid material with different physical properties from terrestrial rock 09 p1453 A66-20173

Nonlinear creep and recovery behavior of polypropylene fibers and hereditary functionals describing nonlinear viscoelastic behavior 09 p1393 A66-20663

Linear free energy relationship between benzoyl and acetyl ion intensities in mass spectra of benzo- and acetophenones explained by kinetic argument 10 p1495 A66-21165

Molecular acentricity effect on intermolecular pair potential of n-alkane homologs and benzene 10 p1495 A66-21803

Nonpolar solutes on structure of water and hydrophobic bond in protein stability in aqueous solutions 11 p1649 A66-22988

Tri-halogen nitro-methane valence force field and vibrational spectrum, noting sensitivity of potential energy to structural variations, molecular geometry, symmetry, etc 12 p1811 A66-23622

Ring formation and expansion in cold drawn polymeric material related to oriented deformation of supermolecular structural elements 12 p1899 A66-24348

Formation of supermolecular structures and relation between characteristics and mechanical properties of polymers 13 p2112 A66-25307

Absorption spectra in optical region when laser radiation and continuous radiation are simultaneously incident on molecular medium 13 p2133 A66-26161

Radiation damage in deoxyribonucleoproteids at molecular and supermolecular levels 13 p2010 A66-26228

Atmospheric mixing time and lifetime of atomic and molecular oxygen at high altitude, noting agreement with barometric distribution law, concentration pattern, etc 15 p2486 A66-29088

Theoretical molecular mechanism of chemical radio-protection based on stabilization of defects of damaged biological structures by molecular adsorption 17 p2861 A66-32940

Polymer molecular structure, discussing concentration of primary and secondary hydroxyl groups, use of NMR to establish stereo and positional isomeric configuration, etc 17 p2871 A66-33003

Three-dimensional X-ray diffraction data to determine structure of crystal of potassium barium hexanitrocobaltate, discussing Jahn-Teller effect 17 p2871 A66-33489

Dissociation and reassociation reactions of hemocyanin mixtures analyzed by electron microscopy, noting original molecular structures 18 p3060 A66-34459

Laser action in closed molecular system with mixture of carbon dioxide, nitrogen and water vapor, noting coupling-out plate reflectivity and population inversion 19 p3373 A66-35433

Origin of constituents of nucleic acid and protein molecules, noting biological molecules synthesis under conditions similar to those prevailing in prebiotic Earth, following Oparin-Haldane hypothesis 20 p3507 A66-38029

Plastic electric conductivity, discussing conduction by fillers in plastic matrix and conduction of polymers by virtue of molecular structure [ASME PAPER 66-MD-31] 21 p3753 A66-38486

Potential functions of molecules and intramolecular forces with redundant coordinates 21 p3775 A66-38801

Solar corpuscular radiation, discussing schemes of molecular transformations in

comets for propene, water, acetylene, carbon dioxide and ammonia 21 p3809 A66-39125

Molecular hydrogen structure, considering planetary and stellar atmospheres and interstellar space 21 p3815 A66-39487

Effective diffusion cross section for meteor atoms in atmosphere, using Thomas-Fermi-Dirac and dumbbell molecule models 22 p3983 A66-40764

MOLLECULAR THEORY

Atomic and molecular quantum theory - NATO and AEC International Symposium, Sanibel Island, Florida, January 1965 06 p0910 A66-16163

Physical properties of dense supercritical fluids composed of spherical molecules, noting spatial correlation 06 p0909 A66-16700

Phase transitions theory analyzed by simple self-consistent equations including ferromagnetism, antiferromagnetism, liquid-gas condensations and melting and freezing 09 p1424 A66-20076

Maxwellian theory, within classical mechanics of fluids, adapted to material and thermal conductivity in turbulent flows, calculating mass and heat transfer 12 p1973 A66-23529

Constrained variation method in molecular quantum mechanics, presenting wave function, degree of constraint and energy loss values for lithium hydride molecule 13 p2130 A66-25372

Textbook on molecular thermodynamics, statistical mechanics and kinetic theory of gases, with applications to ideal gas, crystal, radiation field, etc 16 p2829 A66-31312

Molecular biology noting hemoglobin and enzyme cytochrome evolution, amino acid code, ribonucleic acid, etc 17 p2853 A66-32101

Bipolar angle averages and two-center two-particle integrals involving separation between two particles 22 p3947 A66-39906

Macromolecular parameters of memory and learning and information processing in molecular genetics, molecular immunology and molecular neurology 24 p4162 A66-42313

MOLLECULAR WEIGHT

Thermal degradation mechanism of polystyrene, measuring volatilization rate and molecular weight dependence on extent of pyrolysis 08 p1243 A66-19067

Mixed star evolution, mass loss and mass-luminosity-mean molecular weight relation 12 p1946 A66-23651

Oscillographic polarography to determine relation between adsorption characteristics and molecular weight of polyethylene glycol 14 p2295 A66-27655

Exospheric temperature, scale heights and mean molecular weight up to 3500 km derived from satellite accelerations in 1964 15 p2484 A66-28819

Chloride alkoxide of pentavalent tungsten, obtaining UV, IR, NMR and EPR spectra, molecular weight, etc 16 p2646 A66-30620

Thermal degradation mechanism of polyether-polyurethanes, analyzing fractionation and measuring molecular weights 17 p2943 A66-32834

Radiation, molecular orientation, crystallinity and molecular weight influences on thermoconductivity of high polymers 23 p4083 A66-41551

MOLLECULE

S DIATOMIC MOLECULE

S MACROMOLECULE

S POLYATOMIC MOLECULE

S TRIATOMIC MOLECULE

MOLLIER DIAGRAM

Flow diagram for dimensioning of jet compressors to plot irreversible mixing, noting shape of mixing channel, design guidelines, etc 16 p2632 A66-31645

MOLTEN-SALT ELECTROLYTE

Molten-salt thermocell power output as affected by hot electrode and figure of merit 07 p0992 A66-18093

Fuel cells with molten carbonate electrolytes such as matrix cells and free and paste electrolyte cells, noting construction, operation, performance 07 p0996 A66-18473

Fuel cells oxidizing saturated and unsaturated hydrocarbons at high temperatures 07 p0996 A66-18475

Molten carbonate fuel cell system

performance evaluated from engineering and economic aspects [AIAA PAPER 64-747] 13 p2007 A66-26648

Output power and thermal efficiency of molten salt thermocell, examining applicability as generator for direct conversion of heat into electric energy 16 p2636 A66-30673

MOLTEN-SALT REACTOR /MSRE/

Russian monograph on MHD of liquid metals, discussing application for transport and technological treatment of metals, molten salts and slags 08 p1266 A66-19566

MOLYBDATE

Preparation of single crystals of double molybdates of Na and La /or other rare earth elements/ doped with Nd, Tb or Pr for laser application 04 p0529 A66-13478

MOLYBDENUM

Isotopic volume shift in X-ray molybdenum K alpha 1 line 01 p0084 A66-10255

Hot plastic deformation effect on gas content, structure and mechanical properties of industrial molybdenum, niobium and titanium 01 p0086 A66-10451

Rhenium electrodeposition on molybdenum in study of adhesion as affected by heating, chromium codeposition and cracks 01 p0088 A66-10989

Tungsten and molybdenum as engineering materials noting technology, mechanical properties, application, etc 02 p0244 A66-11738

Combined effect of carbon impurity atoms and neutron radiation on structure of molybdenum studied by transmission electron microscopy 02 p0246 A66-12193

Maximum error in high-temperature hardness determination for tungsten and molybdenum with known measurement errors 02 p0233 A66-12275

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 04 p0525 A66-13434

Nature of interaction between titanium nitride and metals of iron, molybdenum and tungsten groups 04 p0535 A66-13436

Martensitic transformation in alloys with aging martensite, discussing effects on molybdenum, Fe-Ni alloy, cobalt and titanium 05 p0700 A66-14859

Microwave discharge-fast flow to investigate interaction between molybdenum surface and chlorine 06 p0821 A66-16155

Nuclear reactor radiation effect on microstructure, size of elementary cells, hardness and electrical conductivity of high-melting compounds 06 p0897 A66-16693

Vacuum diffusion welding of zirconium, niobium and tantalum carbides to high-melting niobium, tantalum, molybdenum and tungsten 06 p0887 A66-16696

Relation between hardness and ultimate strength of tungsten and molybdenum over wide temperature range 06 p0897 A66-16698

High resolution molybdenum evaporation mask fabrication by scribing and etching for use in semiconductor devices 08 p1189 A66-18662

Carbon and tungsten effects compared on tensile flow stress recovery of molybdenum 08 p1237 A66-18764

Temperature dependence of electrical conductivity in molybdenum and tungsten at 4.2 to 300 degrees K 09 p1391 A66-20862

Molybdenum single crystal dislocation redistribution and subgrain boundaries formation during annealing at high temperatures 09 p1391 A66-20873

Chromium steel strength and corrosion resistance improvement by molybdenum and tungsten addition 11 p1716 A66-22747

Molybdenum effect on properties of chromium-nickel alloy, noting hardness and strength 11 p1716 A66-22748

Recrystallization of molybdenum, examining effect of vanadium, titanium, hafnium and zirconium 11 p1718 A66-23321

Plastic flow peculiarities analysis based on X-ray diffraction effects obtained by deforming single crystal molybdenum of various orientations 12 p1898 A66-25026

Energy spectra of ions emitted by beryllium, carbon and molybdenum heated by laser 13 p2131 A66-25479

Transmission electron microscopic observations on preexisting dislocation as

sinks for neutron-irradiation-induced point defects and dislocation reaction to subsequent deformation 13 p2107 A66-25586

Isotopic volume shift in X-ray molybdenum K alpha 1 line 13 p2110 A66-25972

Chromium-vanadium alloys for brazing tungsten to molybdenum in engine application 13 p2087 A66-26020

Phase composition and nonmetallic inclusion distribution in molybdenum and its alloys determined with electron microscope and microdiffraction 14 p2315 A66-27600

Secondary emission of excited cesium atoms during bombardment of molybdenum and tantalum by fast cesium ions 14 p2338 A66-28248

Thermal diffusivity and specific heat of molybdenum at high temperatures measured, using variable heating in induction furnace 15 p2523 A66-29226

Clean and oxygen-covered molybdenum /110/ surface analysis using low energy electron diffraction, noting various oxygen structures 16 p2721 A66-30109

Rupture strength increase in tungsten and molybdenum chopped wires silicide coated by pack diffusion and incorporated in mullite matrix by vacuum hot pressing [ACS PAPER 7-C-65F] 16 p2723 A66-30949

Mechanical behavior of polycrystalline iron and single crystal molybdenum in compression over various strain rate ranges, noting temperature role 16 p2724 A66-31264

Molybdenum films prepared by sputtering onto oxidized silicon substrates, analyzing resistivity, lattice parameter, orientation and grain size as function of substrate temperature and bias 16 p2783 A66-31424

Ultrasonic attenuation changes due to dislocation formation during yielding of magnesium, molybdenum and LiF 16 p2726 A66-31458

Inter-crystalline and transcrystalline fracture in molybdenum 16 p2727 A66-31527

Lattice defect distribution effect on degradation of solid solution of interstitial impurities in cast molybdenum 16 p2727 A66-31530

High temperature diffusion of potassium in single crystal and polycrystalline molybdenum 17 p2940 A66-33230

High temperature combustion of tantalum and molybdenum in oxygen gas compared with experiments in carbon dioxide, water, argon and mixtures of these gases 18 p3264 A66-34426

Carbon content effect on brittle-to-ductile transition temperatures of molybdenum studied in search for high toughness propulsion system 19 p3382 A66-36106

Forging methods for reliably producing unalloyed molybdenum forgings with high impact strength for rocket nozzle application 19 p3366 A66-36107

Joining of dissimilar metals such as molybdenum and tungsten by liquid-alloying diffusion-bonding method in which third metal is used for bonding at interface and removed by diffusion 19 p3367 A66-36116

Solid state bonding of molybdenum-0.5 percent titanium alloy and unalloyed molybdenum and tungsten by vacuum-hot-pressing technique, examining joint microstructure 19 p3369 A66-36127

Creep-rupture strength and metallurgical properties of refractory Mo at 4000 degrees F 19 p3385 A66-36156

Vacuum arc cast molybdenum ingots prepared using powder treated in palladium diffused hydrogen and transferred to furnace without air exposure, noting test results 19 p3386 A66-36282

Stress relaxation technique applied to plastic deformation prior to yielding or fracture in molybdenum above and below ductile-brittle transition temperature 19 p3387 A66-36724

Reduced blackness coefficients measured for coaxial system of tungsten-molybdenum surfaces by calorimetric method 20 p3674 A66-36984

Molybdenum machine parts produced by plasma powdering process, noting improvement due to annealing 20 p3575 A66-38136

Nature of interaction between titanium nitride and metals of iron, molybdenum and

tungsten groups 20 p3586 A66-38138

Temperature dependence of relaxation-type ultrasound attenuation maxima in plastic deformation of molybdenum and niobium single crystals 22 p3965 A66-40322

Vanadium and molybdenum effect on properties and phase transformations of titanium chromide 23 p4082 A66-41824

Tensile testing method for tungsten and molybdenum single crystals 24 p4210 A66-42221

MOLYBDENUM ALLOY

Thermodynamic properties of cobalt-molybdenum alloys determined by emf method measured between 1170 and 1470 degrees K 01 p0088 A66-10940

High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 04 p0535 A66-13435

Oxidation, stress-to-rupture, thermal and vibration fatigue tests at various temperatures carried out on protectively coated molybdenum and titanium-molybdenum alloy 05 p0702 A66-15469

Thorium dioxide strengthened nickel and nickel molybdenum alloys, discussing production via selective reduction, strength, creep rupture, stability and ductility characteristics 06 p0893 A66-15943

Radioactive isotopes of Mo99 and W185 used to study diffusion of two components of Mo-W alloy at intervals of 100 degrees over temperature range 1500 to 2400 degrees C 09 p1389 A66-20540

Thermal and electrical conductivities of molybdenum-rhenium alloys in superconducting and normal states 10 p1573 A66-21178

Machinability of refractory metals, examining two molybdenum alloys, graphing relation between tool life and cutting speed 10 p1545 A66-21222

Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 10 p1546 A66-21239

X-ray analysis of molybdenum-nickel-silicon ternary crystal structure 13 p2108 A66-25683

Phase composition and nonmetallic inclusion distribution in molybdenum and its alloys determined with electron microscope and microdiffraction 14 p2315 A66-27600

Molybdenum recrystallization as affected by La and Y additions under various types of heat treatment 15 p2520 A66-28670

Mechanical properties of Ti-Al-Mo-Zr-Sn alloy as affected by varying cooling rate in heat treatment 15 p2523 A66-29194

Precipitation behavior of nickel-molybdenum and nickel-molybdenum-chromium alloys 16 p2722 A66-30310

Electrical resistance, thermal conductivity, thermal emf, elastic modulus, density and mechanical strength of Ti-Nb-Mo alloys 16 p2724 A66-31235

Self-diffusion of niobium in alloys with molybdenum from 1600 to 2100 degrees C 16 p2727 A66-31569

Work function of solid solutions of tungsten with molybdenum and tantalum explained by surface adsorption effects 16 p2728 A66-31772

Ti-Nb cermet production by hot pressing and microstructure and phase composition, noting Ti-N production 17 p2939 A66-32392

Hardness and microstructure of sintered alloys of molybdenum with oxides of aluminum and zirconium obtained by powder metallurgy methods 17 p2939 A66-32394

Plastic deformation by slip in Mo alloy containing 35 atomic percent Re 19 p3381 A66-35862

Chemical blanking and vibratory radiusing of Mo alloys 19 p3370 A66-36134

Chemical vapor deposited thermoprotective coatings for tungsten and molybdenum-based refractory alloys, discussing diffusion barrier selection, interfacial microhardness, high temperature diffusion-annealing tests, etc 19 p3383 A66-36142

W-3 oxidation-resistant coating effect on mechanical properties of notched and unnotched TZM Mo alloy, analyzing photomicrographic and microhardness data 19 p3384 A66-36145

High temperature oxidation resistance of zirconium boride/molybdenum disilicide alloys 20 p3586 A66-38137

Pauli spin paramagnetism and spin-orbit scattering in magnetization of superconducting Ti-Mo alloy 21 p3796 A66-38551

MOLYBDENUM COMPOUND

Addition of molybdenum to neodymium doped calcium tungstate laser material increases susceptibility to photolytic coloring and changes vacuum reduction coloring spectra 04 p0561 A66-13732

Plasma atomization of molybdenum, discussing variable process parameter effects on size grading of spherical powdered molybdenum 08 p1238 A66-18895

Gadolinium molybdenate as ferroelectric host in pulsed laser, noting light modulation and crystal domain 11 p1713 A66-23207

Structure and wear resistance of chromium-molybdenum deposits, noting parameters of electrolytic deposition, Amsler machine tests, etc [ONERA TP 319] 12 p1894 A66-24366

Molybdenum and titanium cathodes applied in getter ion pump, noting improvement of initial and average performance 13 p2078 A66-25649

Molybdenum bisulfide as lubricant in aircraft construction to combat fretting corrosion, facilitate assembly and dismantling of parts and reduce frequency of maintenance 23 p4074 A66-41658

MOLYBDENUM SULFIDE

Lubrication characteristics of dry unbonded and bonded molybdenum sulfide films for varying speed, load, humidity and metal substrate [ASLE PREPRINT 65AM 5C1] 14 p2302 A66-27773

Four-ball wear tester to evaluate solid lubricant dispersions including molybdenum disulfide 14 p2302 A66-27774

Ion bombardment damage of molybdenum sulfide lattice studied by transmission electron microscopy, noting broadening of extinction contours and dislocation lines 15 p2567 A66-29404

Idle time effect on static friction studied under boundary lubrication conditions, using compression tester and press-fit test specimens [ASLE PAPER 66AM 1C1] 16 p2710 A66-30403

Ball bearing life operating in vacuum with molybdenum disulfide and oils as lubricant [ASLE PAPER 66AM 7A3] 16 p2712 A66-30416

Chemical stability of silver graphite, molybdenum disulfide, zinc oxide, boron nitride, muscovite and phlogopite mica solid lubricants 16 p2715 A66-31675

Water vapor effect on friction of molybdenum disulfide compact sliding against rubbed film of molybdenum disulfide on copper in nitrogen atmosphere 20 p3563 A66-37700

MOMENT

S BENDING MOMENT

S DIPOLE MOMENT

S HINGE MOMENT

S INERTIA MOMENT

S LOADING MOMENT

S MAGNETIC MOMENT

S PITCHING MOMENT

S ROLLING MOMENT

MOMENT DISTRIBUTION

Structural classification of global master equation by means of projector operator formalism 01 p0105 A66-10320

Distributed parameter oscillatory system, deriving optimum control formulas via variational method 06 p0862 A66-16523

Effect of small periodic moment applied to axis of inner gimbal on gyro drift when gyro is mounted on base fluctuating about two mutually perpendicular axes 13 p2082 A66-26458

Pressures in incompressible fluid around obstacle for parabolic velocity distribution at infinite distance 16 p2627 A66-30212

Distributed parameter oscillatory system, deriving optimum control formulas via variational method 16 p2670 A66-30833

MOMENT EQUATION

General 13-moment approximation to Fokker-Planck equation for plasma 04 p0558 A66-14493

Transport coefficients derivable from 13-

moment approximation for two-component plasma in satisfying Onsager relationship 04 p0558 A66-14494

Stability of complex moment problems determined by constructing sequence of interpolation polynomials which converge uniformly to solution in bounded region 07 p1060 A66-18099

Gyroscopic device design for determining integral direction of aerodynamic moment vector, noting system and block diagrams 14 p2294 A66-27365

Macroscopic equations for nonequilibrium processes in rarefied gases by disrupting moment equations infinite chain, using function of maximum entropy distribution 14 p2336 A66-28059

Finite Larmor radius equations for plasma, noting pressure tensor modification and approximate moment equations 15 p2555 A66-29757

Moment equations from collisionless Boltzmann equation solved by transformation into polarized coordinates 15 p2555 A66-29784

Measurement of simple and central moments of one-dimensional density function applied to pattern recognition 15 p2475 A66-29864

Approximation for moment equations of kinetic theory which describe source flow expansion with application to free jet 17 p2907 A66-32412

Nonrelativistic equations of bulk motion of relativistic /cosmic ray/ gas derived by taking moments of collisionless Boltzmann equation 20 p3649 A66-37327

Third moment equation derived from Boltzmann-Vlasov equation for wave propagation in plasmas with very strong magnetic field used instead of state equation 20 p3521 A66-38363

Moments of output coordinates of nonlinear system determined by algorithm based on approximation method, noting application to automatic control system 21 p3758 A66-39283

Friction and imbalance moments relative to gimbal axes and effects on gyrovertical motion under starting conditions 21 p3739 A66-39325

MOMENT METHOD

Integral method based on method of moments to investigate compressible laminar boundary layers 05 p0607 A66-15466

Two-dimensional problems in moment theory of elasticity for multiply coupled regions weakened by finite number of arbitrarily distributed circular holes 12 p1967 A66-24106

Heat conduction in rarefied gases between concentric spheres by moment method, considering accommodation coefficients at inner sphere surface 21 p3834 A66-38708

Wave theory calculation of moments of velocity change of charged particle in magnetoplasma 21 p3794 A66-39573

Bending of isotropic thin plate in moment theory of elasticity, noting Kirchhoff-Love hypothesis from which relations for bending moment torque and shear force are obtained 22 p3991 A66-40151

Moment method in hypersonic flow of rarefied gas around bodies of arbitrary shape 23 p4054 A66-41357

MOMENTUM

SA ANGULAR MOMENTUM

Photon momentum distribution in fully ionized gas 07 p1082 A66-17466

Calculation of pressure beneath hovercraft, indicating cushion pressure could be up to 10 percent higher than previous values 12 p1971 A66-24977

Experimental data analysis of cosmic ray showers, secondary particle production by nucleon-nucleon collision at high energy, momentum distribution in pions and primary energy-inelasticity relation 15 p2583 A66-29547

Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573

Momentum measurements of muons using solid iron magnet spectrograph 15 p2546 A66-29578

MOMENTUM ENERGY

Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 04 p0512 A66-14220

Momentum spectrum of cosmic ray muons determined as function of zenith angle 08 p1286 A66-19834

Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 10 p1523 A66-21469

Energy-momentum density of gravitational field according to Ozsvath-Schuecking rigorous solution to Einstein field equations 12 p1915 A66-24994

Multimomenta neutrals produced simultaneously from monoenergetic accelerator, using ions from hydrogen and deuterium and dissociation and charge exchange 13 p2145 A66-25731

Elastic rectangular plate moment influence field calculated, using photoelastic method 13 p2198 A66-26299

Momentum spectrum of muons measured at various zenith angle ranges, using Durham horizontal spectrograph, giving estimate of K/π ratio in nucleon-air nucleus interactions for primary energies 18 p3220 A66-35197

Screening effect of meteoritic particles, ice grains and ice-coated dust particles entrained in outgoing gases of comets, determining particle size and numbers from momentum/energy balance 22 p3983 A66-40697

MOMENTUM STORAGE

Momentum deposition in wake of reentry vehicle, discussing behavior of complex materials characterized by heat of ablation 15 p2424 A66-29309

MOMENTUM THEORY

Control mechanisms in nonlinear steady flow forces of hydraulic valves [ASME PAPER 65-WA/AUT-20] 05 p0624 A66-15616

Pi-meson momentum spectra, discussing production frequency and mechanism in hundred bev range 07 p1113 A66-17537

Friction of rotating disk in revolving housing, noting parameters of dimensionless momentum coefficient, separation of fluid flow into core and secondary flow 09 p1384 A66-20486

Zhukovskii and Lagally theorems for arbitrary fluid motion derivable from momentum equations of continuous medium 13 p2067 A66-26533

Motion equations and moment of momentum of variable mass system 14 p2381 A66-27453

Momentum spectra of cosmic ray muons measured at large zenith angles with improved Ashton-Wolfendale spectrograph, comparing observed and predicted intensities 15 p2588 A66-29580

Variation of most probable muon energy loss with momentum, noting density effect and decrease in ionization loss 15 p2589 A66-29586

Pitot tube readings in viscoelastic turbulent stream, noting stress and kinetic contribution, momentum average factor, etc 17 p2906 A66-32035

Electric current density in ionizing discharge layer determined, using multifluid equations of conservation of momentum and gas mass 17 p2987 A66-32435

V-I characteristics of GaAs Schottky barrier rectifiers applied in determining relation between electron energy and complex wave vector over portion of forbidden energy gap 18 p3155 A66-34161

High resolution magnetic hodoscope performance for charged particle analysis, measuring momentum response spectrum and experimental error due to instrumental effects 18 p3115 A66-35228

Moment theory for thin spherical elastic shells under axisymmetric loading, noting role of Poisson ratio 19 p3474 A66-35851

Improvement of gyroscopic accuracy by increased kinetic moment, noting use of gyromotor with rotors placed inside each

other 21 p3739 A66-39326

Silp flow in hydrodynamic entrance region of tube and parallel plate channel determined by solving linearized momentum equation 21 p3730 A66-39459

Lorentz transformation of thermodynamic quantities, noting application of formalism of statistical mechanics, validity of Planck-Einstein equations for total energy and momentum 22 p3997 A66-39806

Energy, linear and angular momentum conservation principles for elastic body with finite number of defects 23 p4091 A66-41855

Boundary layer problems in rotating flows, noting similarity solutions and including general momentum-integral solution 23 p4061 A66-42044

Supersonic and hypersonic wake flow dependence on near wake pressure, using momentum integral method 24 p4158 A66-42775

MOMENTUM TRANSFER

Atmospheric density variations due to turbulence incorporated in analysis of nonsymmetrical tensor of turbulent momentum transfer 02 p0220 A66-11257

Orbital transfer takeoff spirals with maximum momentum change 02 p0290 A66-11988

Observed differences between lateral transport rates of heat and chemical species and of momentum in turbulent free shear flows accounted for by model [AIAA PAPER 65-810] 03 p0359 A66-13181

Ambipolar diffusion in magnetic field showing plasma equations of momentum-transfer yield unambiguous steady state solutions 05 p0669 A66-14943

Mathematical analysis of steady flow of incompressible viscous fluid in presence of magnetic field, taking flow as momentum source 07 p1089 A66-17960

Superconductivity inhibition by normal polarization, noting mechanism of second order suppressive effect 08 p1255 A66-18631

Electromagnetic momentum in relation to waveguide modes, discussing relationship between momentum transfer and mechanical forces 08 p1189 A66-18667

Momentum, heat and mass transfer in turbulent boundary layer flow of power law fluids over smooth flat plate 08 p1210 A66-19679

Wave propagation in magnetoplasmas noting momentum transfer, dispersion relations, temperature relaxation effects and collisional energy exchange 09 p1408 A66-20372

Dynamic transient response of fluid surrounding hot wire studied by analysis of basic transport equations for momentum and energy 10 p1521 A66-21055

Temporal spectra of atmospheric angular momentum transfer from wind data at various tropospheric and lower stratospheric levels 11 p1697 A66-22566

Four momentum transfer in high energy jet showers and resultant number of multifireballs 11 p1763 A66-22701

Two-center model evaluation of four momentum transfer in high energy jet showers, noting pion or boson exchange 11 p1763 A66-22702

High energy jet showers examined to obtain four momentum transfers and transverse momentum of recoiling protons 11 p1763 A66-22706

Model of high energy collision processes, based on terms of four-momentum transfer and spectra variation, used for calculation of atmospheric diffusion of heavy triplets produced by primary cosmic radiation 11 p1741 A66-23190

Northward momentum transfer across asymmetric jet in three-dimensional atmosphere analyzed, using initial value problem, noting energy transfer and transformation 13 p2064 A66-26128

Simultaneous diffusion of momentum and energy in turbulent mixing, noting static and stagnation properties, density and temperature variations, flow pattern, etc 13 p2070 A66-26721

Position, number and type of potential scattering amplitude as function of complex momentum transfer 14 p2330 A66-27018

Velocity field in turbulent flow based on momentum transfer, determining velocity

distribution for flow near solid surface 14 p2276 A66-27681
 Monte Carlo technique to examine four-momentum transfer in jets 15 p2586 A66-29566
 Atomic scattering from perfect crystal, considering effects of absorption potential, surface vibrational modes momentum and energy exchange etc 16 p2752 A66-30389
 Momentum transfer caused by focusing laser giant pulse on surface in vacuum investigated for Be, C, Al, Zn, Ag and W 19 p3373 A66-35418
 Approximation technique for analysis of two-dimensional boundary layer flows with arbitrary external velocity distribution 19 p3341 A66-36321
 Non-Newtonian viscoelastic fluids with similarity transformations for power law fluids, noting momentum, energy and heat transfer 20 p3545 A66-37510
 Semidiurnal oscillation in surface pressure as result of strong resonance amplification of small oscillations due to surface heating and gravitational tidal force of Sun 22 p3942 A66-40052
 Turbulent momentum transfer mechanism in separated flow region of rectangular cavity facing oncoming turbulent boundary layer 24 p4193 A66-42154

MONATOMIC GAS

Uniform shear motion in rarefied monatomic gases in finite space, discussing distribution function of intrinsic molecular velocity 01 p0108 A66-10472
 Electron recombination in monatomic ionized gas expanding symmetrically into vacuum, particularly triple collisions with electron capture on upper atomic level 02 p0264 A66-11383
 Infinite frequency elastic moduli of monatomic fluids related to pressure and internal energy of fluid 08 p1206 A66-18941
 Turbulent friction tensor derived for anisotropic molecular velocity distribution, considering application to stellar rotation physics 11 p1737 A66-22363
 Steady state sound disturbances induced in monatomic gas by oscillating plane boundary 11 p1737 A66-22904
 Molecular beam approximation for plane normal shock in free stream monatomic gas flow at large Mach numbers 11 p1690 A66-22911
 Shock wave structure in binary gas mixtures that are monatomic and chemically inert, using Mott-Smith method 11 p1691 A66-22914
 Shock front density distributions in Ar and He determined in shock tube, using electron beam attenuation 11 p1691 A66-22916
 Heating rates in gas mixtures of planetary atmospheres predicted by equation using transport properties of gases at lower temperatures 14 p2411 A66-27432
 Shear relaxation time of monatomic fluids for liquid and dense gas phases calculated, using LF viscosity data and estimates of HF elastic moduli 14 p2277 A66-27977
 Shock wave structure measurement in monatomic gases, applying continuum theory and kinetic theory 16 p2690 A66-31636
 Temperature associated with longitudinal thermal velocities overshoots for Mach numbers slightly higher than 1 for monatomic gases in rarefied gas flows 21 p3727 A66-39184
 Boltzmann equation for dilute monatomic gas, discussing asymptotic interpretation of Hilbert and Chapman-Enskog theories 23 p4097 A66-42011

MONITOR

SA DATA ADAPTIVE EVALUATOR AND MONITOR /DAEMO/
 SA IN-FLIGHT MONITORING
 SA RADIO FREQUENCY MONITORING
 Gemini System Interference Monitor /SIM/ for simultaneous monitoring and remote control of many widely separated test points from central location 05 p0645 A66-14592
 Monitoring device for detecting short-duration, vibration-induced electrical malfunctions, noting Gemini tests 16 p2677 A66-30454
 Intensity and uniformity monitor for solar simulators using thermopile as detector 22 p3891 A66-40229

MONKEY

Squirrel monkey physiological response to, and survival under short duration very high acceleration stress 17 p2858 A66-32187
 Hazards of macrofractionated gamma ray irradiation hazards upon Rhesus monkeys 17 p2858 A66-32189

MONOCHROMATIC RADIATION

Two-dimensional laser deflection using Fourier optics 01 p0083 A66-10897
 Thermal radiation absorption by droplet or spray during ignition and combustion of atomized liquid fuels 01 p0164 A66-10899
 Electric oscillation by monochromatic light in high resistivity gallium arsenide, noting temperature dependence 04 p0569 A66-14361
 Absorption laws for spectral-line broadening due to propagation of intense monochromatic radiation through dielectric medium 09 p1343 A66-20337
 Apparatus producing monochromatic radiation for measuring reflection and transmission coefficients composed mainly of semiconductor multiplier and quasi-optical system separating radiation of individual harmonics 11 p1708 A66-23288
 Holograms and wavefront reconstruction techniques involving prismatic refraction of monochromatic and coherent laser light causing interference pattern on photographic emulsion 13 p2076 A66-25144
 Electromagnetic oscillation by monochromatic beam moving over diffraction grating lying on shielded dielectric 13 p2049 A66-26052
 Ruby laser monochromatic radiation separation by tapered multiplex interferometer with opposition dispersion 13 p2082 A66-26471
 Laser Doppler velocimeter for measuring localized flow velocities in liquids 14 p2306 A66-27053
 Gain optimization problem for antenna arrays responding to quasi-monochromatic periodic signal 14 p2240 A66-27929
 Electric oscillation by monochromatic light in high resistivity gallium arsenide, noting temperature dependence 14 p2369 A66-28259
 High amplitude LF current and optical transmission oscillations in CdS single crystals under high electric field and monochromatic illumination near fundamental absorption edge 15 p2558 A66-28613
 Resonant absorption of monochromatic light in system with intermediate energy level 15 p2516 A66-29355
 Obtaining highly monochromatic radiation on single wave from ruby laser 17 p2933 A66-31809
 Parrent theorem in coherence theory proved, using Fourier-Stieltjes integrals 18 p3118 A66-33987
 Optical thickness effect on monochromatic directional transmittance and emittance of isothermal dielectric surrounded by air 18 p3134 A66-33991
 Dynamic photoelasticity measurements of stress concentration, using ruby laser monochromatic light source 18 p3256 A66-34557
 Resonant absorption of monochromatic light in system with intermediate energy level 20 p3604 A66-37359
 Probability densities of geometric parameters of polarization ellipse of quasi-monochromatic, partially polarized radio and noise signals in circular-and linear-base wave representations 23 p4036 A66-41051
 Monochromatic longitudinal wave amplification by charged particle beam in nonlinear plasma, noting amplitude dependence on coordinate 24 p4243 A66-42520

MONOCHROMATOR

Alternating-light monochromator with Fabry-Perot interferometer for measuring sodium and oxygen lines during twilight and at night 01 p0066 A66-10184
 Correlation of monochromator and filter radiometry determinations of spectral distribution in large solar simulators 02 p0212 A66-11224
 Photoionization and absorption coefficients of carbon oxide measured below 1000 angstroms, using Seya-Namioka scanning vacuum UV monochromator with helium continuum as background 02 p0263 A66-11834

Neutron spectrometer consisting of beryllium filter and aluminum single crystal acting as monochromator 02 p0232 A66-12084
 Rowland ghosts during movement of spectral lines in double diffraction monochromators and compensation in photoelectric spectrophotometry 05 p0681 A66-15214
 Constant structural parameters of prism monochromator 05 p0682 A66-15220
 Doppler shift measurements using low resolution monochromator to determine mass motion in plasmas [AIAA PAPER 66-177] 11 p1735 A66-22213
 Alignment of angular positions of spherical mirror and grating of Fastie-Ebert spectrometer, using bright collimated monochromatic beam of He-Ne laser 13 p2084 A66-26564
 Self-calibration and automatic correction for wavelength response of monochromator-filter-detector system 14 p2292 A66-27323
 Nonfocusing grazing incidence monochromator which utilizes planar gratings and collimating slit systems 14 p2293 A66-27326
 AFCRL grazing incidence grating monochromator used with thin window flow Geiger detector on Aerobee rocket for solar spectrum recordings between 30 and 130 angstroms 15 p2605 A66-30079
 Continuous source for atomic fluorescence flame spectrometry using 150-watt xenon arc, total consumption atomizer-burner and low resolution monochromator 17 p2870 A66-32551

MONOCOQUE CYLINDER

Fabrication, testing and experimental results for rigid-vinyl plastic monocoque domes subjected to external pressure loads 01 p0156 A66-10918
 Stiffened cylinder buckling behavior under compressive load, noting analysis methods [AIAA PAPER 65-79] 05 p0781 A66-15787

MONOCULAR VISION

Human accommodative system, investigating absence of odd-error signal mechanism under restricted monocular viewing conditions 06 p0819 A66-16850

MONOMER

Absorption coefficients for monomers of water vapor and oxygen for various altitudes, noting seasonal variation 20 p3511 A66-37133

MONOMOLECULAR LAYER

Energy accommodation coefficient variation with energy of gas molecules impinging on clean surfaces or adsorbed monolayers 16 p2645 A66-30391

MONOPOLE ANTENNA SYSTEM

Field amplitude and phase measurements close to number of driven periodic arrays of monopoles used to determine frequency dependence of propagation constant 06 p0825 A66-16016
 Equivalent capacitance, inductance, radiation resistance and Q-factor of umbrella top-loaded electrically short antennas 06 p0825 A66-16018
 Antenna gain cut-off effect at high altitude for monopole antenna 09 p1350 A66-19853
 Monopole antenna signal produced via bombardment by flux of gamma rays from nuclear explosion 11 p1663 A66-22546
 Response of thin cylindrical monopole antenna to DC pulse excitation computed, using Fourier transforms, noting correlation between empirical and theoretical values 14 p2255 A66-27906

MONOPROPELLANT

SA NUCLEAR ISOTOPE

MONOPROPELLANT

Heavy confinement cap test characterizing exothermic decomposition of liquid and solid materials subjected to heat, pressure and mechanical shock, determining monopropellant energy releases [CI PAPER WSCI-65-35] 05 p0744 A66-15152
 Quasi-steady spherically symmetric burning of monopropellant liquid droplet in stagnant atmosphere 14 p2412 A66-27560
 Ignition and controlled burning of liquid oxygen-liquid methane mixture, evaluating use as rocket monopropellants [AICE PREPRINT 28E] 22 p3969 A66-39880

MONOPULSE ANTENNA

Multimode antennas, discussing mode and mode generation, radiation sum and

- difference pattern control, discontinuity reflections, monopulse antennas, etc 08 p1191 A66-18945
- Monopulse channel phase measurement by composite radiation pattern of feed 15 p2456 A66-28589
- Boresight shift in phase sensing monopulse antennas due to reflected signal 16 p2667 A66-31647
- Four-horn and five-horn monopulse antenna system properties including illumination tapers, gain factor, temperature, etc 18 p3080 A66-34265
- Angle of arrival in amplitude-comparison monopulse antenna arrangement including thermal noise as interference and pulsed radar with ideal radar target 23 p4044 A66-41314
- MONOPULSE RADAR**
- Instrumentation monopulse tracking radar AN/FPQ-10, using mainly solid state components at Pacific Missile Range 04 p0480 A66-13629
- Linking monopulse radar antennas in aircraft tracking system 04 p0497 A66-13965
- Antenna construction, RF system, receiver and detector, information bandwidth, target modulation and efficiency points of monopulse and conical scanning system for tracking radars 04 p0487 A66-14130
- Wideband two-channel monopulse technique combining two difference channels used in three-channel technique into single difference channel 06 p0824 A66-15980
- Relationship between two- and three-channel monopulse systems, with some logical extensions to various symmetrical configurations 06 p0824 A66-15981
- Monopulse radar air-to-surface slant range measurement 17 p2872 A66-31958
- Theoretical probability densities of amplitude-comparison, and phase-comparison monopulse radars excited by Gaussian signals and Gaussian noises 17 p2872 A66-31962
- Feasibility of monopulse radar used for airborne pictorial radar display as aid to low approach aircraft landing 17 p2950 A66-31964
- MONOXIDE**
- S CARBON MONOXIDE**
- MONTE CARLO METHOD**
- Collisionless mass flow of ionized gas through channel with imposed magnetic field [AIAA PAPER 65-124] 02 p0267 A66-11535
- Monte Carlo method solution of heat transfer in rarefied gas between infinite flat plates 05 p0787 A66-14987
- Radiative heat transfer calculated by Monte Carlo method 05 p0787 A66-14988
- Consistent-field Monte Carlo method used to calculate electron and ion diode characteristics, including effect of collisions 05 p0616 A66-15539
- Monte Carlo method for radiative exchange in enclosure [ASME PAPER 65-WA/HT-51] 05 p0791 A66-15659
- Monte Carlo computer program for simulation of thermal radiation among opaque surfaces in vacuum [ASME PAPER 65-WA/HT-40] 05 p0792 A66-15668
- Single-pulse detection probability data for system with instantaneous automatic gain control and 5/1 bandwidth ratio obtained by Monte Carlo simulation 06 p0841 A66-15957
- Monte Carlo method to reveal properties of hydrogen transport near critical level of escape of Earth upper atmosphere 07 p1028 A66-17362
- Approximation for function calculated in N points randomly selected in region D 07 p1061 A66-18509
- Aerodynamic properties of simple bodies in hypersonic transition regime 08 p1164 A66-19132
- Monte Carlo method analysis of electron photon cascade 09 p1436 A66-20134
- Monte Carlo linear extrapolation of multivariable functions, introducing truncation procedure which saves on machine time and serves for variance reduction 10 p1549 A66-21215
- Monte Carlo method test of new formulae of pion emission in high energy jet showers 11 p1763 A66-22704
- Book on analog, digital and hybrid analog-digital computers for random process studies 11 p1659 A66-22864
- Radionuclide production in iron targets bombarded with 400-mev protons investigated by Monte Carlo method for cosmic ray effects on meteorites 11 p1775 A66-23145
- Statistical analysis of allowable errors in network synthesis, using moment method, worst case method and Monte Carlo method 12 p1833 A66-24076
- Monte Carlo calculations of cross section magnitude of electron-positive-molecular-ion dissociative recombination 13 p2130 A66-25375
- Monte Carlo technique to determine total energy and energy distribution in laser crystal due to optical pumping 13 p2093 A66-26028
- Monte Carlo model of elementary fracture process, noting role of energy in comminution, uneven distribution of energy vs frequency, etc 13 p2207 A66-26600
- Pearson universal random distribution generator, noting analysis of randomly chosen variables for unimodal underlying distribution 15 p2526 A66-28808
- Monte Carlo technique to examine four-momentum transfer in jets 15 p2586 A66-29566
- Electron pair production by high energy muons, noting application of Monte Carlo method for appearance of low energy with high energy partner below target plate 15 p2546 A66-29583
- Multicategory pattern recognition, noting mathematical treatment, dimensional and correlational effects, etc 15 p2453 A66-29774
- Steady flow of highly rarefied ionized gas through channel with magnetic field solved by Monte Carlo method obtaining density, energies, wall shear stress, etc 16 p2759 A66-30371
- Monte Carlo simulation studies for fatigue data analysis of rolling-contact bearings, using Weibull equation [ASLE PAPER 66AM 1B2] 16 p2710 A66-30401
- Improved Monte Carlo method for calculating steady state monatomic rarefied-gas flows, using computer for calculating possibility of collision in given geometrical cell 16 p2753 A66-30787
- Monte Carlo solutions to two molecular flow problems, heat transfer between parallel walls and shock wave profile-computer programmed in Boltzmann equation analysis 16 p2686 A66-30946
- Partial totals method of estimation for one parameter exponential model, comparing procedure with maximum likelihood, least squares and weighted least squares estimators 16 p2737 A66-31384
- Floating random walk and use in Monte Carlo solutions to partial differential equation of heat conduction 16 p2739 A66-31720
- Monte Carlo calculation of probability of free molecular conductance of cylindrical tube with wall sorption 17 p2906 A66-31977
- Analog simulation and performance prediction techniques in reliable circuit design and analysis, emphasizing programming procedures using Monte Carlo and worst-case methods 17 p2877 A66-32302
- Three-dimensional Monte Carlo simulation of nuclear cascade of extensive air showers, examining nuclear particle spatial and energy distribution 18 p3206 A66-35102
- Monte Carlo calculations on extensive air shower development, discussing nuclear active and electromagnetic multicore frequencies in terms of particle atomic number and primary baryon 18 p3212 A66-35141
- Transfer efficiency of laser pumping cavities with diffusely reflecting wall determined, based on approximately isotropic nature of light inside cavity 19 p3372 A66-35379
- Couette flow and heat transfer through hard-sphere rarefied gas enclosed between parallel walls analyzed by Monte Carlo method 19 p3478 A66-35803
- Design of digital computer program of Monte Carlo variety for analyses of self-contained orbital navigation systems for satellites, including error source categories 20 p3595 A66-36871
- Monte Carlo technique of importance sampling applied to estimating probability of occurrence of rare event in complex system by fault tree simulation 20 p3543 A66-37912
- Monte Carlo experiments on cometary origin of meteorites and asteroids in solar system and random orbits of stray bodies 21 p3812 A66-38825
- Guidance equations for positioning spin stabilized communications satellite in circular orbit, noting velocity adjustments, using Monte Carlo simulation 21 p3764 A66-38864
- Simulator for star motion in proximity of Sun consisting of sphere upon whose surface stars are uniformly distributed 22 p3977 A66-40001
- Electric microfields in plasma taken as system of charged particles moving in uniform neutralizing background, using approximations and Monte Carlo study 23 p4101 A66-41363
- Maintainability impact on redundant system design of phased array radar, presenting Monte Carlo technique for assessing availability of array portion 24 p4178 A66-42091
- Monte Carlo simulation for adaptive policy for multiple impulse correction of trajectory of spacecraft 24 p4278 A66-42688
- Monte Carlo calculations of simultaneous distribution of extensive air showers with respect to several fluctuating parameters for elementary event models 24 p4269 A66-42919
- Monte Carlo analysis of plasma of heavy ions, obtaining thermodynamic properties, potential energy and pair distribution 24 p4245 A66-43036
- Importance sampling based on estimating gradient of variance for adaptive Monte Carlo method 24 p4233 A66-43204

MORL
S MANNED ORBITAL RESEARCH LABORATORY /MORL/

MORPHOLOGICAL INDEX
Morphological method of analysis for space communications, suitable for problems with independent unknowns 09 p1345 A66-20542
Morphological analysis of daily variability of geomagnetic field regular daily changes, noting current systems in polar and nonpolar regions 10 p1526 A66-21126

MORPHOLOGY
Morphological characteristics and functional data in pilot trainees, noting anthropometric data and vital capacity, oxygen intake, heart rate, etc 08 p1175 A66-19084
Crystallization kinetics of tri-alpha-naphthyl benzene in large temperature range, noting transition in morphology, crystal growth rate and viscosity 08 p1179 A66-19595
Increased partial oxygen pressure effect on morphological composition of peripheral blood of rats and mice 15 p2439 A66-29490

MORPHOTROPISM
S CRYSTAL STRUCTURE

MORSE POTENTIAL
Molecular acentricity effect on intermolecular pair potential of n-alkane homologs and benzene 10 p1495 A66-21803
Morse potential functions for nonpolar gases determined from experimental viscosity and second virial coefficient 12 p1917 A66-23934
Thermal energy exchange between gases and solid surfaces, using realistic interaction potentials of Morse type, Maxwellian velocity distribution 16 p2825 A66-30387
Interaction between gas particles and solid surface examined, noting idealization of Morse potential and use of analog computer 16 p2655 A66-30390
Morse potential function determined from viscosity and second virial coefficient, used to approximate pair interaction potential for hydrocarbons 20 p3605 A66-37639
Values of Morse potential for interaction of atoms in diatomic molecules carbon, CO and CN 21 p3775 A66-39072
Collision integrals, effective cross sections and deflection angles for Morse potential calculated, using dimensionless relative kinetic energy of pair of atoms 21 p3775 A66-39073

MOTION EQUATION
SA BALANCE EQUATION
SA FORCED VIBRATORY MOTION EQUATION
Periodic solutions of equation circular motions of coupled Froude pendulums 01 p0106 A66-10405
Radiation conditions in terms of motion equations of classical elasticity and field equations show uniqueness of solution to wave scattering problems 01 p0153 A66-10431
Satellite orbital paths determined by particular solution of general basic equations 01 p0137 A66-10447
Laws of motion for monopolar particle in given gravitational field 01 p0107 A66-11076
Generalized dimensional analysis applied to wind distribution in planetary boundary layer, using motion equations 02 p0223 A66-11981
Dynamic system motion control analyzed by nth order system of nonlinear differential equations 03 p0392 A66-12528
First integral existence for motion of solid body about fixed point 03 p0392 A66-12530
Semigenerally covariant motion equations of particles moving in external gravitational field 03 p0392 A66-12606
First order approximation of nonlinear mechanical behavior of oscillator including derivation of second order perturbations for period and amplitude, noting motion equation 03 p0435 A66-12692
Obtaining almost periodic solutions of quasi-linear systems with quasi-cyclic coordinates and application to oscillating rotor resting on elastic bearings 03 p0373 A66-12933
Maneuvered reentry of vehicle with aerodynamic lift into planet atmosphere, using motion equations and considering reentry trajectories as minor circles 03 p0432 A66-13129
Book on motion stability using Liapunov method noting motion equations, perturbing forces effect on equilibrium, instability, Lagrange theorem, etc 03 p0393 A66-13286
Method of quadrature used for determination of perturbations in Kepler

orbit of inertia center of body moving in central field of Newtonian forces 04 p0577 A66-13819
Meshcherskii equation used to derive equations of motion and basic theorems of dynamics of system of points of variable mass 04 p0545 A66-14151
Equation of motion in relativistic gravitation theory 05 p0715 A66-14529
Blanchi identity role in obtaining motion equations without infinite self-action terms in general relativity 05 p0715 A66-14893
Approximate integration of equations for longitudinal perturbational motion of rigid body 05 p0717 A66-15316
Motion equations for deep spherical shells including effects of transverse shear deformations and rotatory inertia 05 p0781 A66-15740
Motion of charged finite mass in gravitational field 06 p0908 A66-16162
Friction corrections introduced in results obtained by differential pendulum method in measuring acceleration of gravity at sea, noting motion equations 06 p0879 A66-16418
Transformation of error ellipsoid in motion of material point, with selection of invariant parameters 06 p0954 A66-16423
Equation of motion of holonomic system governed by nonholonomic linear and nonlinear relation 06 p0903 A66-16892
Book on motion theory of several coupled rigid bodies about fixed point, particularly gyroscopes and gyrostats in Cardan suspension 06 p0910 A66-17067
Properties of linearized system of equations of perturbed motion and application to motion of center of mass of space vehicle 06 p0957 A66-17169
Equations of motion for rigid body with fixed point derived by expression of angular velocity 07 p1080 A66-17845
Motion equation for system of n bodies assuming half retarded and half advanced mass-distribution 07 p1137 A66-18053
Improving estimates of solutions of linear perturbed-motion equations of mechanical systems with variable coefficients 07 p1060 A66-18188
Stabilization of gyrostabilizer using motion equations as given by Volterra 07 p1035 A66-18193
Alfven wave propagation in incompressible inviscid infinitely conducting medium by canonical equations of motion 08 p1205 A66-18534
Two-dimensional problem of disturbance propagation in elastic plate under concentrated load moving along boundaries at constant speed, pressure and stress-strain pattern 08 p1305 A66-18598
Acceleration potentials applied to motion, at arbitrary Froude numbers, of high-aspect-ratio wing immersed in incompressible ideal fluid 08 p1205 A66-18601
Motion equations in external gravitational field for relativistic two-point model of free elementary particle neglecting particles own field 08 p1282 A66-18606
Performance of air Tesla turbine for various flows investigated by differential equation of motion 08 p1161 A66-18824
Rapidly convergent iterative unique determination of linear steering function for desired orbit conditions 08 p1289 A66-18826
Approximate reentry velocity and heating equations applied to any atmosphere satisfying hydrostatic equilibrium, noting motion equations for flight path 08 p1303 A66-18836
Equations of motion in elasticity theory for thin-walled rod in rotating inertialess system of coordinates 08 p1307 A66-18860
Reentry guidance by threshold network storage of precomputed optimum commands, using analogy of surface approximation problem in N plus one-dimensional space [AIAA PAPER 66-52] 08 p1249 A66-18989
Schlichting two-dimensional unsteady boundary layer problem results extended to three-dimensional periodic boundary layers 08 p1208 A66-19341
Resonance cases and small divisors in third integral of motion used to calculate galactic orbits on plane of symmetry of nonaxisymmetric galaxy 08 p1296 A66-19353
Simplification of equations for two-temperature plasma composed of electrons,

singly charged ions and neutral atoms, noting effect of viscosity and thermal force 08 p1265 A66-19468

Energy integral for holonomic system of points of variable mass, transforming Lagrangian form via Hamiltonian function 08 p1256 A66-19583

Motion equations and Hamilton-Ostrogradskii principle in mechanics of variable mass system dependent on time, coordinates and velocity 08 p1256 A66-19706

Equations of motion of gyrostat having fixed point and gyrostat rotating about fixed point in Newtonian force field 08 p1227 A66-19761

Necessary conditions for existence of univalent integrals in equations of motion of heavy gyrostat fixed at one point 08 p1227 A66-19762

Gain saturation of ruby maser by nearby interfering signal derived from motion equation of density matrix 09 p1385 A66-19933

Generalization of some theorems concerned with Liapunov direct method in connection with equations of perturbed motion 09 p1394 A66-20162

Laminar fully-developed flow of water between parallel flat plates examined, using motion equation with experimental values for viscosity, conductivity, specific heat and density 09 p1470 A66-20179

Nonlinear stability elimination in long term numerical integration of motion equations required for medium-range weather forecasting 09 p1399 A66-20730

Clear air turbulence, considering energy source by transfer from large to small flow in gravity wave spectra, noting shear role and motion equations 10 p1552 A66-21289

Free vibrations of initially straight elastic bar with free-free or clamped-free ends, undergoing inextensional motion, neglecting shearing effects and rotatory inertia 10 p1616 A66-21484

Laplace transform solution for small time used as complement to problem of one-dimensional propagation of stress pulse in bar with continuously nonhomogeneous elastic modulus 10 p1617 A66-21498

Cauchy problem for linearized Boltzmann equation, deriving high accuracy equations of motion of rarefied gases 11 p1735 A66-22338

Optimization of terminal state of controlled system when equations of motion contain derivatives of control parameters 11 p1674 A66-22350

Force and moment response of pneumatic tires undergoing nonstationary lateral motions, using motion equations [ASME PAPER 65-AV-2] 11 p1636 A66-22471

Amplitudes and linewidth of discrete spectrum of natural frequencies of thin magnetic films, noting motion equations, dispersion ratio and resonance peaks 11 p1752 A66-22799

Existence of forms of motion equation for material systems with nonholonomic nonlinear connections 11 p1722 A66-22847

Modified phase-plane delta method for nonlinear system phase portrait 11 p1679 A66-23270

Lifting body with controllable radial force, examining acceleration and deceleration, equation of motion, target hitting accuracy improvement via force variation, etc 11 p1733 A66-23338

Graphical-analytical method using successive approximations determines guided missile trajectory 11 p1734 A66-23344

Initial conditions determination in aircraft takeoff from mobile platform required for solution of differential equations of motions of gravity center 11 p1734 A66-23345

Integration of equations determining location coordinates of moving object on terrestrial sphere 12 p1909 A66-24358

Motion equations for stable rising balloon systems which consider effects of apparent mass and wind accelerations, using radar tracking [AIAA PAPER 66-398] 12 p1802 A66-24513

Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 12 p1915 A66-24889

Stable resonant spins for planet in

eccentric orbit, particularly Mercury rotation, analyzing motion equation for angular position of long axis relative to inertial line fixed in space 12 p1952 A66-24968

Shock wave systems in design and operation of supersonic intakes, noting motion equation describing flow and role of multiple wedges meeting at one point 12 p1800 A66-25003

Goedel universe analyzed, noting generalized Poisson equation, angular velocity in perturbed metric, equations of motion in inertial frame of reference, etc 13 p2183 A66-25609

Theorems on interaction of parts of mechanical system with smooth holonomic constraints 13 p2128 A66-25638

Motion equation for plastic deformation of simply supported beam under impulsive loading 13 p2198 A66-26113

Equations for translatory motion of lifting body moving at hypersonic speed, considering Earth sphericity, noting effect of centrifugal forces 13 p2193 A66-26448

Lifting systems and motion of slender profile at arbitrary distance from liquid or solid boundary, using kernel degeneration method to reduce singular equation to Fredholm equation 13 p2067 A66-26531

Text on dynamics of vibrations covering oscillations with variable and constant amplitude, damping, differential equations of motion, nonlinear oscillations, wave propagation in elastic solids, etc 13 p2207 A66-26573

Motion of gyroscope with variable moments of inertia on movable base, deriving motion equations 14 p2291 A66-27165

Boundary value problem of elastic/viscoplastic beams solved, using iteration method, noting wave propagation and effect of shear and inertia of axial motion of beam in motion equation 14 p2397 A66-27386

Motion equations and moment of momentum of variable mass system 14 p2381 A66-27453

Linearized motion equation of self-adaptive systems with stabilized frequency characteristics, considering effect of control and noise signals in basic control loop 14 p2265 A66-27525

Motion equations for beam with lateral surface thermally insulated, including effects of shear deformation and rotatory inertia and thermoelastic coupling in heat conduction equation 14 p2399 A66-27661

Motion equations for dynamics of aircraft control surface controlled by autopilot 14 p2328 A66-27687

Reduction of order of aeroelastic and flutter motion equations while retaining purely elastic contribution of eliminated coordinates, using quasi-static assumption and matrix algebra 14 p2405 A66-27996

Motion of solid with fixed point and cavities filled with ideal fluid, presenting three exact polynomial solutions 14 p2335 A66-28050

Axisymmetric solid motion about fixed point under constant momentum, using chain fractions and Lagrange method 14 p2336 A66-28063

Gyroscope motion on randomly shifting support described by linear inhomogeneous differential equation 14 p2297 A66-28064

Nonlinear calculations of intermediate amplitude to analyze stability of pulsating stars of varying composition, mass, luminosity, etc, using numerical integration of motion equations 14 p2385 A66-28116

Nonconducting fluid motion in infinite tube applied to violent thunderstorm dynamics, reducing current intensity to value for convection 14 p2346 A66-28268

Dynamic instability in large of elastic body with given initial velocity and displacement, noting example of curved beam subjected to impulsive loads 14 p2408 A66-28387

Singular characteristics of dynamic systems with steady state motion, noting effect of constantly acting small perturbations 15 p2537 A66-28950

Liapunov stability of motion of heavy rigid body with fixed point moving along

spherical surface 15 p2537 A66-28966

Dynamic stability differential equations and stability and instability theorems derived from them 15 p2538 A66-29044

Letov problem and analytical construction of optimal controller from motion equations of linear servosystem 15 p2469 A66-29045

Motion equation of variable mass point solved, using coordinate transformation 15 p2538 A66-29048

Differential equation of motion of two variable-mass points in central force field 15 p2538 A66-29049

Optimal control process for brachistochrone motion, discussing solution and inversion of synthesis problem 15 p2470 A66-29150

Motion equations and effect of small parameters on dynamics of nonholonomic systems 15 p2539 A66-29153

Differential equations for motion stability of systems with time delay solved, using Liapunov function 15 p2540 A66-29156

Asymptotic methods of nonlinear mechanics, involving averaging for differential equations, applied to motion equations of satellites and resonance in electric circuits 15 p2541 A66-29162

Dynamic elastic deflections of shallow circular arch under dynamic pressure loading, solving nonlinear integro-differential motion equation by Galerkin method 15 p2610 A66-29284

Spherical blast waves in weak dipole magnetic field, calculating distortion by using motion equations, noting similarity to supernovae explosions 15 p2479 A66-29304

Integrability of motion equations for rigid body motion about fixed point in Newtonian force field 15 p2542 A66-29338

Charge motion in Hf accelerator described by nonadiabatic approximation in magnetic field under action of polarized wave 15 p2553 A66-29639

Plane rotational motion of incompressible fluids in presence of homogeneous porous circular cylinder 15 p2481 A66-29856

Wind shear theory of formation of temperate zone blanketing sporadic E layers, noting motion equation for ions in ionospheric E region 15 p2490 A66-29948

Semianalytical solution of motion of satellite in lunar orbit, considering perturbations due to lunar and Earth gravity and solar attraction 15 p2604 A66-30016

Two-dimensional flow in fluids related to system of vortex coordinates, using Hamiltonian operator for characterization of motion studies 16 p2683 A66-30213

Motion equations for incompressible viscous fluid with constant vortex derived, using complex variable 16 p2683 A66-30216

Resonance phenomena in oscillator acted upon by sinusoidal external force with slowly varying frequency and amplitude 16 p2747 A66-30740

Interaction between atoms of solid surface and gas phase, obtaining closed-form solution of motion equations 16 p2753 A66-30786

Motion equations and Pontryagin maximum principle applied to space vehicle reentry trajectory optimization through independent control of lift and drag 16 p2809 A66-30884

Motion equations, attitude and ignition time of third and fourth stage of USAF Athena, noting solution derivation using Taylor series constraints, accuracy, etc 16 p2743 A66-30908

Statistical analysis of solar atmospheric motion, noting three dimensional geometry of subadjacent turbulent convection 16 p2803 A66-31257

Self-excited vibrations of infinitely long cylindrical shell, situated in flow of supersonic ideal gas, obtaining motion equations and analyzing stability conditions 16 p2820 A66-31333

Lagrange theorem extended for solution of three-body problem to regular configurations of more than three particles 16 p2804 A66-31393

Analytical solution to linearized problem of power-off terminal rendezvous when target satellite is moving in elliptical orbit of arbitrary eccentricity [AIAA PAPER 66-533] 16 p2805 A66-31486

Linearized theoretical motion equations for orthotropic cylindrical sandwich shells under initial stress, considering free vibrations 16 p2822 A66-31490

Analytic solution in terms of modified Bessel functions of synergetic turn in exponential atmosphere, using spacecraft engines only for drag cancellation and orbit trimming [AIAA PAPER 66-487] 16 p2811 A66-31493

Asymmetrical hydromechanical fluid motion equation solutions including capillary discharge, sphere in fluid motion and suspension viscosity 16 p2889 A66-31511

Adiabatic invariants and third integrals of motion in periodic potentials in periodically time-dependent Hamiltonian systems of n degrees of freedom 17 p2945 A66-32292

Invariant imbedding as basis for integration theory for canonical equations of motion with parallels to Jacobi theory 17 p2947 A66-32500

Loss of power effects on helicopter at high speeds, noting combination of blade analysis with motion equations, application of computer simulation, etc 17 p2845 A66-32735

Spacecraft longitudinal and lateral stability along reentry trajectory during deceleration period determined, using equations of motion 17 p2846 A66-32897

Sundman variable for regularization of three-body problem motion equations 17 p3004 A66-32952

Motion equations for large-amplitude transverse vibrations of tensioned string and necessary conditions for linearization 17 p2959 A66-33033

Zonal harmonics in external potential of Earth determined from secular motion of satellite orbits 17 p2921 A66-33227

Flat rigid body motion with respect to coincident fixed plane with point on body constrained to move on fixed line in plane 17 p2932 A66-33419

Rotational motion analysis, considering two distinct laws governing behavior of spinning body and obtaining total motion by superposition of vectorial movements due to laws 18 p3134 A66-33588

Analytic solutions for predicting motion of high-thrust rockets applied in guidance and real-time targeting [AIAA PAPER 66-452] 18 p3226 A66-33648

Transcendental equation describing discrete reinforcing network effect on vibrations of reinforced cylindrical shell 18 p3252 A66-33708

Equations of motion for inelastic large deformations of circular membranes subjected to blast loading, useful in metal forming 18 p3252 A66-33763

Thrust programming in central gravitational field, discussing reduction of Mayer-Bolza variational problem to boundary value problem for system of nonlinear differential equations 18 p3241 A66-33846

High speed hybrid computer simulation of aerospace vehicle motion 18 p3094 A66-34068

Fluid dynamics equations of state, motion, continuity and energy stress-strain relationship and shearing stress deformations 18 p3098 A66-34120

First transcendent integrals of motion equations of heavy solid about fixed point 18 p3135 A66-34546

Snapping of shallow simply supported sinusoidal arch under sinusoid step pressure load, using motion equations and infinitesimal stability analysis 18 p3257 A66-34591

Energy integral evaluation of higher-order terms in time history of satellite motion 18 p3234 A66-34653

Degree of agreement between cosmic ray cut-offs derived from McIlwain parameter and those from numerical integration of motion equations 18 p3198 A66-34880

Motion equation for relativistic rocket in instantaneous rest frame 18 p3237 A66-35031

Devices and operating principles for transmitting motion into vacuum 19 p3362 A66-35317

Phase-plane analysis of motion of self-excited asymmetric rigid body, examining periodic solutions of Euler equations 19 p3399 A66-35486

Guidance equations including first-order effects of Earth oblate gravitational field,

solving motion equations and evaluating downrange and crossrange miss distance and time-of-flight errors 19 p3397 A66-35599

Quasi-periodic motion theory, discussing nonlinear oscillations and perturbation theory solution to differential equations 19 p3400 A66-35828

Motion equations of rigid body, discussing transformation from Lagrange equation to Euler equation 19 p3400 A66-35831

Elliptic restricted problem of three bodies, discussing analytical determination of characteristic exponent to equilibrium solutions [AIAA PAPER 65-685] 19 p3461 A66-35892

Dynamic system parameters substituting integral equation for differential equation of motion, noting application to nonlinear, differential and PDE systems 19 p3325 A66-35987

Static nodal patterns associated with normal modes of vibration disappear at large motion amplitudes due to occurrence of traveling wave component 19 p3474 A66-36344

Growth and propagation of electrostatic waves in medium with arbitrary mobility law, solving motion equations, emphasizing case pertinent to Gunn effect 19 p3447 A66-36399

Transformation and solutions of equations of one-dimensional isentropic motion of ideal gas 19 p3342 A66-36467

Arbitrary motion of circular cylinder in ideal fluid near wall, using Fourier series 19 p3342 A66-36468

Pressure gradients in F region from model atmosphere, estimating from motion equations variation of magnitude and direction of wind with local time, season and epoch of solar cycle 19 p3352 A66-36626

Rigid body rotational attitude control in three dimensions with linear transformation as output variable, noting advantages, applications and results 19 p3471 A66-36693

Motion of hollow body filled with viscous fluid at large Reynolds numbers, determining Zhukovskii potentials and examining small oscillations 19 p3343 A66-36830

Dynamic effects on satellite motion of mechanical deformations in stabilizing system, deriving equations for rotational motion about center of inertia 19 p3472 A66-36831

Synthesis of constant or time-varying linear feedback control laws for application in multiple input systems with frequency symmetry 20 p3645 A66-36864

Linear system with given structure identified from measured input and output time histories of frequency responses including curve-fitting, equation of motion and set of equations of motion methods 20 p3537 A66-36885

Reaction forces calculated for system of connected solid bodies of various composition during accomplishment of given motion 20 p3598 A66-36908

Nonrelativistic equations of bulk motion of relativistic /cosmic ray/ gas derived by taking moments of collisionless Boltzmann equation 20 p3649 A66-37327

Acoustic oscillations in solid propellant rocket chambers, discussing cases of small amplitude perturbations and solving wave equations 20 p3628 A66-37387

Book on transonic and hypersonic flow theory covering motion and shock equations, application of Newtonian theory, temperature effect, behavior of minimum drag bodies, etc 20 p3492 A66-37495

Motion of variable mass body in resisting medium 20 p3602 A66-37676

Figure that results from disintegration of package of plates during fall through atmosphere, deriving equations for rotational motion of plates 20 p3493 A66-38118

Turbulence energy balance equation used in air mass transformation problem 20 p3594 A66-38369

Stability of particular solution to gyrostat motion in Newtonian central force field 20 p3604 A66-38424

Jump conditions at point of contact for corresponding cases of sliding and rolling contact in plane motion 21 p3769 A66-38476

Equations of transient motion of linear systems solving methods including analytical, progressive and shock-spectra for application to aircraft, packaging, etc 21 p3824 A66-38572

Matrix equations of rigid-body motion for general vibration isolation system, analyzing conditions for decoupling translational and rotational motions 21 p3770 A66-38650

Gravity gradient satellite stabilization and performance analyzed, using computer simulation of motion equations, including eddy current dampers, solar effect, orbital eccentricity, etc 21 p3819 A66-38857

Stabilization system of gravity gradient test satellite and effect on damping time and steady state accuracy, noting attitude data and solar effect 21 p3819 A66-38858

Modulation of L/D and bank angle to achieved heading, range and trajectory stabilization, using closed form equations 21 p3765 A66-38868

Airborne guidance computations using prescribed-h method, representing two-body motion in inertial space, presenting equations for target hitting, circular orbit, etc 21 p3765 A66-38869

Linearized motion equations for low-altitude flight pitching stability of aircraft with control surface 21 p3696 A66-38937

Coefficients of equations of perturbed motion of body containing ideal incompressible liquid 21 p3770 A66-38973

Metal plasma jet injection into vacuum, determining mean time-dependent parameters of motion 21 p3791 A66-39083

Finite difference analysis of viscous laminar converging flow in conical tubes, assuming parabolic inlet velocity profile and simplified motion equation 21 p3729 A66-39450

Torsional oscillations of infinite plate in elasticoviscous fluid solved by motion equation expansion of velocity profile in powers of amplitude 21 p3730 A66-39457

Eulerian finite difference method for solving time-dependent equations of motion for compressible fluid flow, noting shock wave diffraction, supersonic blunt body interaction with shock wave, etc 21 p3730 A66-39472

Pulsation in cepheid instability strip in H-R diagram, giving equations for spherically symmetric motion 21 p3816 A66-39489

Hypersonic flow, discussing heat effect on flow parameters, shock and motion equations, drag increase, etc 22 p3897 A66-39699

Hamilton principle, motion equations, natural boundary conditions and constitutive relations for finite deformation of one-dimensional curved elastica and radial motion and stability of circular ring 22 p3990 A66-40138

Constitutive equations for nonlinear elastic solid-linear viscous fluid mixture and for mixture of two nonlinear elastic solids 22 p3898 A66-40140

Dynamic stability and aerodynamic damping derivative of Apollo launch escape vehicle, using wind tunnel tests [AIAA PAPER 66-770] 22 p3895 A66-40651

Motion of solid body with rotating flywheels rotating at constant velocities relative to inertial space and body 22 p3948 A66-40682

Longitudinal wave in cylinder of viscoelastic material for case of small frequencies, obtaining propagation equations by using stress-strain relations, compatibility conditions and motion equations 22 p3996 A66-40703

Reduction principle applied to nominal stability, determining perturbation function for case where equations of perturbed motion are autonomous and characteristic equation of linear system has double zero root 22 p3941 A66-40796

Differential equations with delayed argument describing laws of motion and action of control elements upon motion in problem of trajectory with moving right hand terminus 22 p3941 A66-40800

Shell dynamical integral and integro-differential BVPs for linear deformable shells, examining reciprocity theorem and Kirchhoff-Lowe hypothesis 23 p4136 A66-40997

Analytical approximate solution of motion

- equations for ballistic vehicles during atmospheric entry, examining velocity and inclination angle error dependence on height eccentricity and apogee radius
[ICAS PAPER 66-38] 23 p4007 A66-41010
- Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 23 p4090 A66-41096
- Variational principles for viscous, incompressible hydromagnetic equations of flow including continuity equation, motion equations, etc 23 p4099 A66-41123
- General method of averaging transformed motion equations of slightly damped nonlinear oscillations of simple pendulum 23 p4090 A66-41542
- Transcendental case of dynamical asymptotic stability of motion of autonomous system with one 23 p4090 A66-41553
- Incompressible fluid motion inside cylinder rotating at constant angular velocity with generatrix forming curve 23 p4055 A66-41560
- Time of establishment of steady state mixing in plane and axially symmetrical jets determined, using self-similar motions in unsteady state boundary layer and free turbulence 23 p4010 A66-41734
- Transient discontinuous oscillation of system with two degrees of freedom and Coulomb damping 23 p4024 A66-41948
- Viscous electrically conducting liquid oscillating in laminar regime between parallel planes when applying magnetic field normal to planes and motion direction 23 p4108 A66-42047
- Drift approximation of motion equations for relativistic charged particle in electromagnetic field, adiabatic trap, HF magnetic field, etc 24 p4241 A66-42332
- Rotating body in vacuum, examining motion dependency on body configuration and kinetic energy distribution, noting effect of change in energy on motion 24 p4281 A66-42337
- Equilibrium distribution function of particles in phase space applicable to collisionless rarefied plasma confined by magnetic mirror, using first integrals of motion 24 p4242 A66-42399
- Equations of motion of continuous single loop adaptive control system with scan modulated parameters, noting stability analysis method 24 p4188 A66-42479
- Inertial motion equations of rigid body bounded by multiply connected surface in ideal infinite fluid 24 p4237 A66-42846
- Rolling motion of rigid body of revolution along fixed surface of revolution 24 p4238 A66-42847
- Perturbed motion of mass point in central force field, noting integrability of equations 24 p4238 A66-42848
- MOTION PERCEPTION**
- Mathematical model for otolithic organs used to analyze human spatial orientation 01 p0018 A66-10785
- Visual perception of real and apparent movement, noting cues and threshold 04 p0462 A66-13797
- MOTION PICTURE**
- SA CINEMATOGRAPHY**
- Motion picture equipment used in 1963 and 1964 to photograph variations of solar photosphere 01 p0071 A66-11028
- In-flight entertainment system discussing video, audio and motion picture systems 02 p0231 A66-12015
- Time-marking during high speed cinematography of details on Sun with SKS-1M camera 05 p0681 A66-15216
- Motion picture on cavitation hysteresis, details on test apparatus, noting cavitation delay time 07 p1025 A66-18178
- Motion picture projection of multiple spark camera film records 16 p2702 A66-30427
- Image distortion within cinematographic process as related to photography, noting quality estimation, visual perception criteria, etc 16 p2702 A66-30432
- Thermoanemometric and high speed motion-picture photographic experimental analysis of air vortex ring structure 24 p4196 A66-42879
- MOTION SICKNESS**
- Motion sickness history relation to attrition from flight training in Pensacola Motion Sickness Questionnaire 03 p0325 A66-12364
- Physiological problems of weightlessness discussing motion sickness, fluid volume control and chronic effects on circulatory system 04 p0465 A66-14071
- Profile of pattern of airsickness obtained for 1067 naval aviators in pre-solo and basic acrobatic phase of primary flight training 06 p0814 A66-16833
- Clinical symptoms of three types of motion sickness due to rapid acceleration, psychological factors or conflict between visual display and motion 10 p1490 A66-22127
- Irritability, by injected apomorphine, of emetic center of dogs with functioning and removed labyrinths subjected to various motions 15 p2439 A66-29495
- Vestibular training for aerospace operations, discussing function of otolith and semicircular organs, suppression, sensory control theory, spatial disorientation and motion sickness 21 p3700 A66-38634
- MOTION SICKNESS DRUG**
- Effectiveness of antimotion sickness drugs compared by using recommended and larger than recommended doses as tested in slow rotation room 12 p1807 A66-25017
- MOTION STABILITY**
- Slab motions affecting test mounts for gyroscopes and accelerometers investigated at underground and surface test locations 01 p0051 A66-10029
- Motion stability of dynamically symmetrical satellite rotating about normal to plane of elliptical orbit 02 p0295 A66-11650
- Stability problem of steady motions, using differential equations with time delay 02 p0262 A66-12167
- Motion stability of linear continuous systems noting influence of various forces 03 p0438 A66-13094
- Book on motion stability using Liapunov method noting motion equations, perturbing forces effect on equilibrium, instability, Lagrange theorem, etc 03 p0393 A66-13286
- Pursuit problem covering trajectory equations and motion stability 04 p0543 A66-13559
- Perturbed-motion damping for characteristic equation with null root or two imaginary roots 05 p0717 A66-15313
- Longitudinal motion effect on lateral vibrations of prolate body of revolution in ideal fluid 05 p0775 A66-15315
- Stability concepts of physically realistic dynamical systems which are mathematically consistent, based on Liapunov, Poincare and Lagrange principles 06 p0953 A66-16077
- Nonperturbability of direction of axis of gyropendulum toward center of attraction with respect to motion of bearing point 07 p1031 A66-17407
- Stability in small of two types of extremal systems with modulating action, using linear difference equation with periodic coefficients 07 p1013 A66-17429
- Nonlinear differential equation analysis of motion stability of plant with automatic control device 07 p1080 A66-17858
- Perturbed motion stability in critical cases, examining canonical systems 07 p1082 A66-18184
- Stabilization of steady motions of nonlinear controlled system in critical case of pair of purely imaginary root 07 p1016 A66-18185
- Sufficient conditions for stabilization of motion of nonstationary controlled system 07 p1016 A66-18186
- Stability of bodies with holonomically constrained moving parts, using method of Liapunov to demonstrate dependence of motion stability on potential function of generalized coordinates 07 p1082 A66-18457
- [AIAA PAPER 66-101] Numerical analysis of stability of periodic orbits for restricted problem of two equal masses 09 p1456 A66-20464
- Theorems and corollaries describing bounds for quadratic Liapunov functions 10 p1551 A66-21918
- Boundedness and uniform boundedness of nonhomogeneous systems, obtaining necessary and sufficient conditions for existence of solutions 10 p1551 A66-21920
- Composite motion stability for partially filled cylinder rotating at constant velocity and resting on elastic supports 11 p1779 A66-22233
- Young theory of rotor blade motion stability in powered flight 11 p1638 A66-23261
- Dynamic stability of cylindrical shell subjected to uniform radial pressure 12 p1956 A66-23585
- Overall stability of equilibrium position in critical Liapunov case, using extension of Malkin method 12 p1848 A66-24030
- Optimal control for mechanical system ensuring optimal stabilization and maximum accuracy at terminal moment through minimization of difference between perturbed and unperturbed motion 12 p1914 A66-24239
- Necessary condition for motion stability of particle moving in gravitational field of axisymmetric planet 12 p1949 A66-24247
- Motion control and stabilization of holonomic mechanical system with single cyclic coordinate via scalar force 12 p1915 A66-24785
- Countable systems of differential equations, considering differential operator theory and infinite systems 13 p2119 A66-25850
- Blade vibration simulation in helicopter trainer by applying amplitude motion to trainer 14 p2271 A66-28030
- Asymptotic stability of equilibrium states of nonholonomic systems 14 p2336 A66-28052
- Routh theorem describing motion stability of holonomic systems applied to nonholonomic systems, specifically Bobylov spherical gyroscope 14 p2297 A66-28062
- Existence and stability of periodic motions in dynamic systems applied to analysis of uniformly asymptotically stable solutions of differential equations 15 p2525 A66-28508
- Liapunov method and dynamic programming of stability of motion of variable mass point in Oxyz coordinate reference system, allowing for Earth rotation effects 15 p2538 A66-29046
- Analytical mechanics, motion stability, celestial ballistics - All-Union Conference, Moscow, January-February 1964 15 p2538 A66-29144
- Liapunov function method used simultaneously as criterion of motion stability of several Liapunov functions and of derivatives of higher order than first 15 p2539 A66-29151
- Steady and unsteady perturbed motion effect on solid body containing cavity filled with liquid in analyzing dynamic stability of mechanical systems 15 p2539 A66-29152
- Liapunov methods of studying motion stability of solid bodies with liquid-filled cavities 15 p2539 A66-29155
- Unperturbed motion for follow-up systems in critical case of double zero root, noting stability and correspondence of root to solution of first approximation equation 16 p2733 A66-30738
- Uniformly accelerated motion stability of thin elastic bar subjected to servo force at one end 16 p2822 A66-31524
- Simultaneous differential equations of perturbed motion and variational determination of sufficient conditions for stability of systems with memory 16 p2738 A66-31586
- Stability analysis for steady disk movement over rough horizontal plane, using Liapunov function method 16 p2715 A66-31616
- Basic theorems of Liapunov direct method with theory of first approximation /linearization/ and stability criteria for linear motions 17 p2946 A66-32325
- Sufficient conditions for statistical stability of motion in nonlinear systems 17 p2901 A66-32570
- Asymptotically stable rotational motions of satellites obtained by adding guidance moments to gravitational moments 18 p3244 A66-33864
- Monotonic stability of motion for neutral linear solution 19 p3400 A66-35932
- Stability of bodies with holonomically constrained moving parts, using method of Liapunov to demonstrate dependence of motion stability on potential function of generalized coordinates [AIAA PAPER 66-101] 21 p3827 A66-38695
- Motion stability of version of Cardan suspension gyro 21 p3738 A66-38988
- Differential equations of steady motions in

perturbed nonlinear autonomous systems with one degree of freedom 21 p3772 A66-39299

Movchan theorem for stability of continuous systems, considering example of vibrating string and derivation of stability criterion for nonlinear elasticity 22 p3990 A66-40134

Simultaneous differential equations of perturbed motion and variational determination of sufficient conditions for stability of systems with memory 22 p3940 A66-40448

Conservative systems motion stability, generalizing precession and nutation of gyroscope with respect to noncyclic coordinate 22 p3948 A66-40681

Motion stability described by differential equations of perturbed motion 22 p3949 A66-40691

Reduction principle applied to nominal stability, determining perturbation function for case where equations of perturbed motion are autonomous and characteristic equation of linear system has double zero root 22 p3941 A66-40796

Ionized calcium luminescence in large chromospheric flare, noting K line broadening due to nonthermal turbulent motions 23 p4126 A66-41078

Nonlinear methods to describe stability motion of solids with liquid-filled cavities 23 p4059 A66-41982

Periodic symmetric two-impacts-per-cycle motion of impact damper solved, determining asymptotically stable regions 24 p4216 A66-42146

Motion stability conditions of plant equipped with automatic control device in certain critical cases 24 p4236 A66-42213

Rotor instability factors, noting difficulty of applying linear theory to actual damping forces in rotor 24 p4287 A66-42269

Benard convection between free bounding surfaces for ranges of Rayleigh and Prandtl numbers achieving steady state with motion of single large cell, evaluating eigenfunction amplitudes 24 p4293 A66-42409

Book on dynamic stability theory using Liapunov second method 24 p4237 A66-42612

Correction of motion of two degree of freedom system with one cyclic coordinate 24 p4189 A66-42837

MOTIVATION

Importance of motivation to quality control in Department of Defense Zero Defects program 03 p0373 A66-12629

Vigilance in six-hour monitoring as affected by knowledge of results and differential monetary reward 11 p1646 A66-23377

MOTOR

S ELECTRIC MOTOR
S PULSE MOTOR
S ROCKET STEERING MOTOR
S SERVOMOTOR
S TORQUE MOTOR

MOTOR CASE

SA ROCKET MOTOR CASE
Motorized vertical rotating table used in inspection of small numbers of large turbine engine casings for avoidance of expensive receiver gauges 23 p4072 A66-41200

MOTOR SYSTEM

Hydraulic gear motor and gear backlash effects on stability of hydraulic control system 01 p0014 A66-10282

Brushless DC torque motor with unique position-sensing device based on variable magnetic reluctance 20 p3498 A66-37168

MOTOR SYSTEM /BIOL/

Existence of response-response compatibility effects in simple perceptual-motor task where simultaneous two-hand pointing responses were required 12 p1808 A66-23925

Neuron network model of oculomotor system to understand human eye movement 13 p2008 A66-25336

Physiological reactions of Russian astronauts under prolonged weightlessness, noting motor activity, heart and pulse beat, breathing rates, arterial pressure, etc 15 p2436 A66-29467

Prolonged hypokinesia effect on human resistance to transverse g-forces, detailing respiratory and circulatory systems, motor response and visual

acuity 15 p2437 A66-29473

MOUNT

S CHASSIS
S RIGID MOUNTING
S TAIL MOUNTING

MOUNTAIN

Mountain lee waves at White Sands Missile Range investigated by balloon soundings 02 p0253 A66-11970

Numerical study of initiation of cumulus clouds over mountainous terrain 07 p1062 A66-17370

Stereo pairs taken at one-and two-minute intervals in photogrammetry of initiation of cumulus clouds over mountainous terrain 07 p1062 A66-17371

Two-layer model of pressure jump produced by mountains 22 p3944 A66-40966

MOUNTAIN INHABITANT

S ALTITUDE ACCLIMATIZATION

MOUSE

Animal temperature sensing for studying effect of prolonged orbital flight on circadian rhythms of pocket mice 03 p0328 A66-12767

Chromosome injury in mouse bone marrow due to distant ionizing radiation 12 p1806 A66-24396

Preference of mice for oxygen-poor atmosphere after removal from 60 and 90 percent oxygen atmospheres 15 p2439 A66-29489

Increased partial oxygen pressure effect on morphological composition of peripheral blood of rats and mice 15 p2439 A66-29490

MOVING TARGET INDICATOR /MTI/

RADAR

Radar imperfections and pulse time error on single-delay, double-delay and higher order moving target indication radar filters 04 p0500 A66-14125

Detectability of signal in noise of range gated MTI radars, with or without pulse lengthening in conjunction with Doppler filtering 09 p1342 A66-19951

Digitalization of moving target indicator signals for adaptation of digital detectors to air surveillance radars 11 p1655 A66-22657

Performance characteristics of microminiaturized MTI system, using range-gated filter /RGF/ for surveillance radars 12 p1819 A66-24604

MSRE

S MOLTEN-SALT REACTOR /MSRE/

MTI

S MOVING TARGET INDICATOR /MTI/ RADAR

MUBIS

S MULTIPLE BEAM INTERVAL SCANNER /MUBIS/

MUFFLER

Optimum magnitude of jet-noise reduction in cylindrical muffler 13 p2056 A66-25090

Optimum magnitude of jet-noise reduction in cylindrical muffler 21 p3721 A66-38515

MULLITE

Rupture strength increase in tungsten and molybdenum chopped wires silicide coated by pack diffusion and incorporated in mullite matrix by vacuum hot pressing [ACS PAPER 7-C-65F] 16 p2723 A66-30949

MULTICHANNEL RECEIVER

Voice communication channels expansion, using mans binaural listening capability 02 p0187 A66-11828

Sampling techniques for extraction of periodic signals from background of random noise 03 p0333 A66-12470

Error probability computation for incoherent diversity reception in multichannel communications 06 p0828 A66-16111

DECTRA long range navigational aid, DECTRA airborne receiver and Omnitrac computer 07 p1068 A66-17702

Doppler equipment including planar-array antennas, varactor-multiplier sources, etc, evaluated for third generation Decca series 07 p1068 A66-17703

Comparison of detection and resolution performance of multiplicative and additive aerial array in presence of noise 08 p1193 A66-19119

Saturation currents of silicon multichannel field effect transistors /MUCH-FET/ 09 p1350 A66-19914

Automatic handling of information by analog recording on magnetic tape for

control, monitoring and maintenance of aircraft 12 p1880 A66-23817

Failure mode effect, block redundancy, functional redundancy and cooperative multichannel design for system reliability in Mariner spacecraft 13 p2191 A66-25284

Optimum multichannel system utilization for receiving regular signal against background noise 13 p2026 A66-26477

Maximum channel capacity of tandem link multichannel troposcatter systems for specified noise level 14 p2243 A66-28347

Visual monitoring of multichannel displays, noting number of channels used, operator performance characteristics, etc 16 p2644 A66-31269

Multichannel sequential detection in case of reception through independent multiple channels with noise 19 p3296 A66-35295

Optimum filtering when signals and noises are incoming on different channels, defining filtering by rectangular matrix of filters 21 p3711 A66-39149

MULTICHANNEL TRANSMITTER

HF transmitter multicoupler for connecting several transmitters to single antenna 23 p4046 A66-41548

MULTILAYER STRUCTURE

SA HONEYCOMB

SA LAMINATE

SA SANDWICH CONSTRUCTION

Electromagnetic wave propagation through multilayer isotropic and anisotropic structure 01 p0025 A66-10525

Electrical and electroluminescent properties of gallium arsenide diodes with high resistivity region flanked by low resistivity R and N regions 01 p0043 A66-10896

Settling of multilayer foundation subject to normal load 03 p0441 A66-13294

Thin walled elastic shallow shell discussing loading and heating effects, general shell equations and shear characteristics 04 p0587 A66-13561

Material distribution in multilayer structures, discussing strain energy minimization 04 p0587 A66-13562

Semiconductor devices at high injection levels, discussing electric fields and potential distribution in multilayer structures 04 p0495 A66-13769

Electrolytic titanium coating properties, covering porosity coating elimination by repeated electrolysis 04 p0536 A66-14005

Dispersion theory and multilayer structure approximation of IR reflectivity of semiconductor with n on n plus stratified structure 05 p0736 A66-14965

Vibrational characteristics, natural frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1] 05 p0776 A66-15425

Heat conductivity problems for two- and three-layer systems solved by splitting boundary conditions and dividing system into single layers 06 p0972 A66-16842

Behavior of carrier mobility in semiconductors with layered structure, with carriers acting as mobile particles in stack of independent layers 06 p0929 A66-16941

Muon detection and energy determination in multilayer system of ionization chambers and probability of finding muon in n-electron shower at depth t 07 p1117 A66-17569

Microminiature element packaging and multilayer circuits, discussing design and production 07 p1010 A66-18247

Stability of three-layer cylindrical shell in gas stream, analyzing oscillation mode and critical flutter dependence on filler resistance to transverse shear 08 p1314 A66-19581

Book on compound plastic deformation of layers of different metals during mechanical processing 09 p1465 A66-19948

Flexure of semilfinite nonsymmetric three-layer plate under steady transverse compression, using state equation to determine load values impairing equilibrium of plate 09 p1468 A66-20760

Variation in coercivity of magnetization loops of multilayer films of nickel as function of rate of rise in applied magnetic field 10 p1575 A66-21412

Vibrational characteristics, natural frequencies and associated composite loss factor of finite-length laminated beam with alternate elastic and viscoelastic layers [ASME PAPER 65-WA/APM-1]

Interaction between layers of ferromagnetic films of different composition and coercivity separated by insulating quartz layer, obtaining films by vacuum deposition

Mechanical behavior of three-layer plates with honeycomb filler under longitudinal compression

Bending problem of three-layer plates with fillers

Design equations for three-layer plate with rigid filler

Equations of three-layer nonshallow and shallow shells

Stability of three-layer cylindrical shells under compression, load and combined action

Stability of three-layer shells or plates beyond proportionality limit, obtaining critical stress

Bending equations of orthotropic three-layer plates with rigid

filler

Natural oscillations of three-layer circular cylindrical shells with freely supported and clamped edges

Gallium arsenide four-layer device doped with selenium fabricated by triple diffusion

Time domain method of relating cross coupling between transmission lines of multilayer structure to geometry in design of high speed digital

systems

Electrical resistance and Hall effect measurements in layer structures, confirming existence of interaction with optical relaxation vibration

modes

Approximate solution of unsteady thermal conductivity for plate with unlimited number of layers

Shingle attachment of multilayer insulation to cryogenic flight tanks

Compressive load effects on heat flux through multilayer

insulation

Air purging of high-performance multilayer insulation system with

helium

Transient gas-flow process in multilayer insulation systems during evacuation predicted by equations in conjunction with measured permeabilities and diffusion coefficients

Quadrupole relaxation in multilevel systems by method of kinetic

equations

Compression per stack layer varying as power of layer thickness when multilayer structures are compressed under loads of up to 5 x 10 super 3 lbf

Multilayer board and chip production techniques

Mariner IV temperature control subsystem hardware, examining thermal shields, thermally actuated louver system and flexible multilayer shields

[ASME PAPER 66-MD-64]

Four-layer p-n-p-n diodes having two separate capacitance modes enables use as controlled element in frequency keying circuits

Temperature distribution in two-layer plate during welding by laser light

flux

Electrolytic titanium coating properties, covering porosity coating elimination by repeated electrolysis

Heterojunction formation between substrate and compound semiconductor synthesized by substitution reaction during alloying process

Evaporation system for fabrication of multilayer dielectric films for mirrors or filters, obtaining thickness variation reduction and simultaneous

deposition

MULTIMODE RESONATOR

Fabry-Perot interferometer and confocal and spherical resonator, calculating integral

equations for eigenvalue and eigenfunction of lowest order TW

eigenmode

Laser deflection and scanning by means of multimode cavities with dynamic spatial filters

Light waveguide for general lens-like media, ideal lenses and continuous media with square-law index

variation

Spiking behavior of multimode ruby laser in spherical resonator, interpreting near-field patterns, frequency spectrum, etc

Two-level atom interaction with multimode gas laser cavity, obtaining stationary state and solving unique eigenvalue in special cases

Multimode ruby resonator output as affected by mode number and mode degeneracy

Phase fluctuations of multimode oscillators detected by nonlinear transformations of oscillations

Probability of spontaneous emission of particles in multimode resonator with several related types of

oscillations

Intensity and frequency equations for interband optical transitions and multimode properties in semiconductor

lasers

MULTIPACTOR

Multipactor effect in X-band waveguide slots, determining multipacting occurrence and parallel plate role

MULTIPATH PROPAGATION

Frequency diversity can increase degree of compensation for multipath fading and thus improve communication reliability of airborne UHF

communications

Exoionospheric communications system with ideal matched filter and signal processing at transmitter for increased range and secure coding

possibilities

Simultaneous measurement of multipath and Doppler spread in real time involving fading transmission media such as HF and troposcatter

[IEEE PAPER CP 65-524]

Error probability limitations caused by multipath and Doppler smear in Kathryn modem

Nonorthogonal coding in communicating through dispersive or multipath fading channels for increased data rate without increased bandwidth

Fading and multipath propagation mechanism for communication links involving satellites and aircraft with antenna beams, assuming fading models and estimating margin required for FSK teletype transmission

[AIAA PAPER 66-294]

Tropospheric induced distortion in frequency band amplitude and delay time of radio signal transmitting over wide frequency bands

Extension of work on ground wave propagation along two-section mixed paths to three-section paths, using microwave frequency, water and aluminum

plates

Laboratory environment simulation of multipath propagation interference effects on low channel capacity FM

systems

MULTIPHASE FLOW

Multiphase flow system with regard to chemical and nuclear processes, rocketry and air pollution control noting adiabatic potential, laminar and electrodynamic flow

MULTIPLE BEAM INTERVAL SCANNER

/MUBIS/

Transformation technique enables any aperture distribution of circular array to be electronically rotated by phasing techniques for linear array

MULTIPLE-DEGREE-OF-FREEDOM SYSTEM

Relation between exact and approximate solutions to equations of dynamics within finite time interval, noting stability of systems with many degrees of

freedom

Mechanism having six degrees of freedom

for flight simulation in pilot training

MULTIPLEX TRANSMISSION

Possibility of circuit designs without inductors in future multiplex technique systems

Constant bandwidth baseband with laboratory telemeter in binary configuration for RF application

Medium-capacity satellite receiving system for multiplex FM telephony

transmission

Scope display width expansion via simple switching circuit with binary counter and several resistors

Multiplex access modulation techniques /frequency-division, time-division, spread-spectrum and pulse-address/ for use in communications satellites

[AIAA PAPER 66-278]

Communications satellites for small nations, describing requirements of worldwide multiple access system

[AIAA PAPER 66-281]

Communications satellite system efficiency enhanced by using automatic adaptive voice multiplexer in ground terminal equipment

[AIAA PAPER 66-291]

Flexible commutation system for routing numerous signal-carrying leads to centrally located multiplexer for

Saturn

Multiple-access systems and characteristics in communications satellite applications, specifically frequency-division multiplex and spread-spectrum modes

Frequency-division multiplexing capable of being effectively integrated with time-division switching, examining transmission path between sideband

filters

MULTIPLEXER

SA FREQUENCY-DIVISION MULTIPLEXING

SA ORTHOGONAL WAVEFORM MULTIPLEXING

SA TIME DIVISION MULTIPLEX

Microelectronics pulse code modulation /PCM/ multiplexer-encoder for Apollo spacecraft, emphasizing packaging techniques, discussing advance circuit design techniques

Solid state time domain multiplexers using advanced devices

Multiplexer coder unit for AC carrier transducers and DC signals used in PCM flight trials system

Pulse amplitude/code modulation /PACM/ system design noting word format, synchronization methods, carrier, etc

MULTIPLIER

SA ELECTRON MULTIPLIER

SA FREQUENCY MULTIPLIER

SA LAGRANGE MULTIPLIER

SA PHOTOMULTIPLIER

Two-parabola type multiplying circuit constructed on principle of z plane consisting of linear superposition of at least two substitute planes

Analog multiplier-divider based on properties of saturated

transistors

Electronic analog computer nonlinear function generation by using silicon carbide varistors

Hall effect multiplier for noise measurement, generation of single sideband and phase-modulated signals, etc

Static errors in Hall effect multiplying devices

Digital multiplier with incremental computing system, noting series and parallel addition system and sequential multiplication with incremental values

Distribution function for probability density of random process at output of multiplier acted upon by envelopes consisting of Gaussian noise and pulse signal

MULTIPLIER PHOTOTUBE

S PHOTOMULTIPLIER

MULTIPOLAR FIELD

Formalism for determining linearized hydromagnetic wave phenomena in perfectly conducting plasma permeated by static

magnetic multipole field 05 p0720 A66-14709
 Multipole moments in Einstein gravitational theory 14 p2330 A66-27020
 Plasma injection and confinement in stellarator magnetic trap with multipolar helical field, noting magnetic surfaces and perturbation effect 19 p3429 A66-36582

MULTIPROGRAMMING
 Lockheed multiprocessor simulation system /LOMUSS I/, data processing system for computer design and analysis 12 p1827 A66-23832
 Real time ground computer for Athena system and input/output data requirements in multiprocessing jobs 12 p1827 A66-23836

MULTISTAGE COMPRESSOR
 Blade root for split disk experimental multistage air turbine, citing two-dimensional photoelastic analysis and pull-out test 08 p1281 A66-18629

MULTISTAGE ROCKET
 Plane trajectory with multistage rocket in minimum climb-time 02 p0296 A66-11703
 Square flare for stabilizing upper stages of multistage ballistic missiles, discussing test results and aerodynamic advantages over conical flare 03 p0432 A66-12770
 Optimal steering and staging of multistage boosters using extended variational method to include variable discontinuities at corners [AIAA PAPER 65-62] 03 p0432 A66-12781
 Dynamic programming applied to numerical solution of optimization problems of flight mechanics 04 p0584 A66-13523
 Optimum stage weight distribution in multistage rocket obtained by discrete maximum principle [ASME PAPER 64-WA/AV-5] 04 p0586 A66-14027
 Multistage rocket acceleration by explosive separation of individual stages, solving optimization problems connected with problem 11 p1777 A66-22456
 Multistage rocket trajectory optimization, extending maximum principle to include Weierstrass and Jacobi conditions 11 p1733 A66-23337

MULTISTAGE ROCKET VEHICLE
 Calculus of variations method used to maximize payload capability for multistage launch vehicles [AIAA PAPER 66-92] 08 p1304 A66-18998
 Aeroelastic effects due to changes in aerodynamic gain, load factor and structural stresses relative to infinitely stiffened structure in multistage slender missiles 20 p3666 A66-37430
 Guidance scheme for control of multistage rocket vehicle through ascent phase of complex space mission [AIAA PAPER 64-640] 20 p3597 A66-38156

MULTISTAGE VEHICLE
 Hybrid type two- or three-stage aerospace vehicle design to place payload in orbit, discussing recoverable stages, drives and air breathing engines 16 p2635 A66-31682
 Increased payload capability of Saturn IB launch vehicle by addition of zero stage to core vehicle which ignites before first stage [SAE PAPER 660451] 17 p3017 A66-33160
 Optimum stage initial acceleration and velocity distribution between stages for maximum payload ratio in single and multistage vehicles 19 p3470 A66-36620
 Optimization methods for preliminary cost and mass distribution assessment for multistage rocket vehicles 19 p3470 A66-36622

MULTIVIBRATOR
 Effectiveness of oscillatory circuits and delay lines for self-synchronization of polyphase multivibrators 01 p0045 A66-10992
 Tunnel diode monostable multivibrator studied by single trajectory on I-V characteristics of tunnel diode 03 p0343 A66-13013
 Transistor astable multivibrators for solid state logic elements for use in digital control and indication 05 p0647 A66-14770
 Single tunnel diode multivibrator producing stable frequency division by factors to ten 06 p0852 A66-16511
 Period of oscillation of multivibrator triggering device is nonmonotonic function of grid bias 09 p1357 A66-20783
 Effectiveness of oscillatory circuits and delay lines for self-synchronization of polyphase multivibrators 10 p1510 A66-21668

Pipeflow simulation by triggered monostable multivibrator driving chopper as logarithmic function 13 p2027 A66-25220
 Single tunnel diode multivibrator producing stable frequency division by factors to ten 13 p2041 A66-25951
 Modified slave multivibrator based on tunnel diode operating in voltage switching regime with reduced current removal from trigger circuit, achieving multivibrator monostability 14 p2251 A66-27176
 Timing range increase in multivibrators by adding circuitry which separates requirements of bias and timing 15 p2458 A66-28888
 Period of oscillation of multivibrator triggering device is nonmonotonic function of grid bias 22 p3874 A66-39842

MUON
 Momentum spectra of muon flux measured at various angles for production process and environmental influences 01 p0132 A66-10620
 Momentum spectrum of muons at large zenith angles and contribution of pion and kaon production 01 p0132 A66-10621
 Energy spectrum of cosmic ray muons measured for data on nuclear interactions and characteristics of primary cosmic radiation 03 p0417 A66-12319
 Soviet monograph on continuous measurement of cosmic ray mu component, covering experimental apparatus, data analysis, atmospheric dynamics, etc 03 p0423 A66-13287
 Cosmic radiation measurements in extensive air showers, recording high energy muon fluxes 06 p0947 A66-16577
 Energy level of mu-meson at sea level in 10 super 11 to 10 super 13 ev range 06 p0948 A66-16579
 Neutron monitor and mu-meson telescope for cosmic ray studies at Kazakh State University 06 p0880 A66-16601
 Origin of high energy pions, muons and photons studied from available spectral data 07 p1115 A66-17555
 Ionization bursts in shielded spherical chambers with burst data transformed to give integral energy distribution of muon intensity at sea level 07 p1116 A66-17563
 Muon absorption curves under ground and under water with absorption less steep at great depths under water than under ground 07 p1116 A66-17564
 Polarization of cosmic ray muons with various residual energies, using hodoscopes and Wilson chamber 07 p1117 A66-17565
 Radiation by ultrahigh energy muons in lamellar medium, noting frequency 07 p1117 A66-17566
 Accuracy of calculation of energy losses by fast muons, considering cases of bremsstrahlung, direct pair production and nuclear cascades 07 p1117 A66-17567
 Fluctuations in number of particles in electromagnetic cascade and effect on spectrum of ionization bursts produced by mu mesons 07 p1117 A66-17568
 Muon detection and energy determination in multilayer system of ionization chambers and probability of finding muon in n-electron shower at depth 07 p1117 A66-17569
 Ultrahigh-energy primary cosmic ray particle interactions cause electron photon cascades and muon emission 07 p1117 A66-17570
 Electron-photon, mu-meson and nuclear-active components of extensive air showers 07 p1117 A66-17571
 Mu-meson flux irregularities, lateral distribution and average characteristics in extensive air showers at 200 mwe depths 07 p1118 A66-17572
 Nottingham mu-meson spectrometer with air gap magnet replaced by magnetized iron block 07 p1036 A66-18234
 Momentum spectrum and charge ratio of mu-mesons at sea-level, noting theoretical and experimental data 07 p1131 A66-18235
 Momentum spectrum of cosmic ray muons determined as function of zenith angle 08 p1286 A66-19834
 Probability of high-energy cosmic ray muon undergoing electromagnetic interaction in lead with energy transfer at various ranges 08 p1286 A66-19836

Improvement of Moscow State University installation for detailed investigation of extensive air showers and high energy muons 09 p1379 A66-20237
 Mean solar time from seven years data obtained by two muon telescopes at Hobart, Tasmania 09 p1443 A66-20796
 Electromagnetic form factors of electron and muon neutrinos evaluated, using intermediate vector-boson theory, noting renormalization induced by electromagnetic interactions 15 p2544 A66-28944
 Extensive air showers core structure and muon distribution 15 p2578 A66-29519
 N and muon number and lateral distribution in various air showers, noting EAS array 15 p2578 A66-29520
 Experimental data concerning electron, photon and muon components of extensive air showers, noting scintillation counters, Geiger-Muller counters, muon detectors, etc 15 p2579 A66-29522
 Distribution of arrival directions of muon-rich air showers, using equatorial and galactic coordinate systems 15 p2579 A66-29524
 Structure of air showers, considering muon components and distribution of arrival directions of muon-rich EAS 15 p2580 A66-29530
 Multiple muon events at sea level and association with air showers detected, using Geiger and scintillation counters 15 p2580 A66-29533
 Muon distribution and irregularities in extensive air showers, noting detector triggering 15 p2581 A66-29535
 Integral number spectrum and absorption characteristics of muons in extensive air showers 15 p2581 A66-29536
 Density fluctuation of muons in extensive air showers, obtaining minimum separation of adjacent particles 15 p2581 A66-29537
 Primary proton-air nuclei interactions leading to EAS containing very few muons, noting energy transfer fluctuation and isobar production 15 p2581 A66-29538
 Cosmic rays, muons and neutrinos - International Conference, Jaipur, India, December 1963 15 p2586 A66-29570
 High energy muon energy spectrum, energy loss rate, primary nucleon energy spectrum and inelasticity fluctuations 15 p2587 A66-29571
 Cosmic ray intensities underground and energy spectrum of cosmic ray muons at sea level, tabulating depths, operation time, angular distribution, telescope aperture, etc 15 p2587 A66-29572
 Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573
 Durham horizontal spectrograph measurements of charge ratio of cosmic ray muons at sea level 15 p2588 A66-29574
 Muon charge ratio derived from inelastic collision model of pion production, considering just average multiplicities 15 p2588 A66-29575
 Electron-muon similarities and multiple pion production by high energy muons, using accelerators and cloud chamber 15 p2546 A66-29576
 Muon momentum spectrum at various zenith angles, noting pion derivation 15 p2588 A66-29577
 Momentum measurements of muons using solid iron magnet spectrograph 15 p2546 A66-29578
 Kaon decay contribution to sea level muon flux at large zenith angles, using Ashton and Wolfendale procedure 15 p2588 A66-29579
 Momentum spectra of cosmic ray muons measured at large zenith angles with improved Ashton-Wolfendale spectrograph, comparing observed and predicted intensities 15 p2588 A66-29580
 Cosmic ray muons polarization at various energies and estimation of asymmetry coefficient ratio 15 p2589 A66-29581
 Electron pair production by high energy muons, noting application of Monte Carlo method for appearance of low energy with high energy partner below target

plate 15 p2546 A66-29583
 Variation of most probable muon energy loss with momentum, noting density effect and decrease in ionization 15 p2589 A66-29586
 Sea level energy spectrum analysis of high energy cosmic ray muons generated by pi-mu decay 15 p2589 A66-29588
 Cosmic ray measurements at 9000 ft underground where atmospheric muon intensity has attenuated and signal due to neutrino interactions is detectable 15 p2589 A66-29590
 Angular distribution and energy loss of fast muons 15 p2547 A66-29594
 Statistical approach to range and energy relationship for high energy muons 15 p2590 A66-29595
 Sea-level spectra of nuclear interactions of muons over 1000 gev compared with observed underground range spectra 15 p2590 A66-29596
 Energy spectra of muons and neutrino production from cosmic gamma rays 15 p2547 A66-29597
 Delta-electron generation by muons and fluctuations in soft cosmic ray component, assuming thick absorption layer 15 p2547 A66-29598
 Most probable energy loss in silicon for pions with energies from 365 to 50 mev, examining pion beam behavior through different absorption material thicknesses 16 p2755 A66-31390
 Production rates of muons in extensive air showers determined from spatial and energy distributions 16 p2795 A66-31694
 Muon interactions in scintillator stack analyzed for average shower development, noting agreement with theories 18 p3228 A66-33917
 Coupling coefficients of directed muon component of cosmic rays calculated, noting higher energy displacement with increase of zenith angle 18 p3195 A66-34866
 Underground scintillator stacks used to study coincidence events caused by muon extensive air showers, noting muon shower energy and grouping 18 p3204 A66-35092
 Central part and core structure of muon extensive air shower studied by large area underground hodoscope 18 p3204 A66-35093
 Absolute number of ultrahigh energy muons in extensive air showers estimated by using large air shower array on ground and muon detectors far below ground 18 p3205 A66-35094
 Anisotropy of muon-rich extensive air showers examined by observation, using large area air Cerenkov detector at 60 degrees zenith angle 18 p3205 A66-35095
 Mu-triggered extensive air showers are rich in muons and have less component energy flow than electron triggered showers 18 p3205 A66-35096
 Decrease in distribution of arrival directions of muon-rich air showers between 15 h and 21 h in right ascension confirmed by analysis of EAS 18 p3205 A66-35097
 Muon-poor EAS determined from 80,000 EAS recordings, representing distribution of recorded muon multiplicities over large intervals by Polya 18 p3205 A66-35098
 Stationary aspects of cosmic ray propagation through atmosphere explained by model calculating high energy nuclear active and muonic components of extensive air showers, presenting energy spectra 18 p3206 A66-35103
 Photoproduction, lateral density distribution, energy spectrum and muon component fluctuations in electron photon cascades 18 p3208 A66-35114
 Barometric effect and density spectrum of photon-initiated EAS 18 p3208 A66-35115
 muons
 EAS mu component fluctuations in density distribution and reception spectrum recorded, using hodograph detectors 18 p3208 A66-35116
 Energy spectra of muon, electron and N components of extensive air showers /EAS/ 18 p3210 A66-35129
 Muon component of vertical and inclined extensive air showers, determining energy spectrum, lateral distribution at sea level and relation of mean height of origin and

sea level energy 18 p3211 A66-35134
 Numerical calculations of lateral distribution, energy spectrum and heights of origin of muons in extensive air showers 18 p3211 A66-35135
 Differential momentum spectrum and charge ratio of muons in EAS measured, using solid iron magnet spectrograph 18 p3212 A66-35137
 Extensive air showers with fixed muon number and fixed electron number studied, emphasizing correlation between cascade parameter and other EAS characteristics 18 p3212 A66-35138
 Muon component of air showers, discussing total number of muons relation to shower size 18 p3212 A66-35139
 Energy spectra of nucleons, muons and gamma rays for truncated power law primary energy spectra calculated, using model for nucleon and meson production 18 p3217 A66-35174
 Mu meson charge ratio variation with energy at sea level 18 p3219 A66-35186
 Positive excess of cosmic ray muons at sea level, taking into account change of ratio of proton to neutron with atmospheric depth 18 p3219 A66-35187
 Muon charge ratio change with energy at large zenith angle 18 p3219 A66-35188
 Positive excess of cosmic ray muons as function of energy from data collected by Nagoya spectrometer at large zenith angle 18 p3219 A66-35189
 Relations between primary spectrum, pion multiplicity and sea level muon spectra, using integral equations 18 p3219 A66-35190
 Bursts produced by high energy muons undergoing large energy transfers analyzed for information on muon electromagnetic interactions over region where muon spectrum is known 18 p3220 A66-35195
 Momentum spectrum of muons measured at various zenith angle ranges, using Durham horizontal spectrograph, giving estimate of K/pi ratio in nucleon-air nucleus interactions for primary energies 18 p3220 A66-35197
 Electromagnetic interactions of muons analyzed underground using scintillator stack, deducing energy of cascade shower from size 18 p3221 A66-35199
 Classification of underground electromagnetic shower events due to muon interactions in scintillator stack 18 p3221 A66-35200
 Frequencies of secondary particles and penetrating particles, using underground scintillators, Geiger counters and flash tubes 18 p3221 A66-35202
 Multiplicity distribution of secondary particles in photonuclear interactions of mesons, analyzing effect of intranuclear cascade 18 p3221 A66-35203
 Various processes leading to nuclear reactions induced by muons, finding main yield given by photonuclear interactions, with nuclear cascades playing significant role 18 p3221 A66-35204
 Vertical intensity and angular distributions of penetrating cosmic ray muons measured underground by scintillators, Geiger counters, etc 18 p3221 A66-35205
 Relationship between depth intensity curve and energy spectrum of muons at sea level, considering fluctuations in energy losses 18 p3222 A66-35207
 Energy losses of relativistic muons in electromagnetic interactions, noting influence of atomic electrons on bremsstrahlung 18 p3222 A66-35208
 Energy spectra of muons and neutrinos generated by cosmic rays in dense objects without atmosphere analyzed in connection with nebulae problems 18 p3224 A66-35221
 Muon decays arising from neutral primary in cosmic rays, using detector built of scintillating plastic and located near sea level 18 p3224 A66-35222
 Almost horizontal air shower observed from cloud chamber photography suggests nuclear interaction of muon 18 p3224 A66-35223
 Muons and neutrinos from energetic celestial objects, discussing charge ratio, rate and equipment used 18 p3224 A66-35226
 Sidereal variation of cosmic muon component at depth of 440 meters,

attributing modulation to phenomenon linked to solar period 19 p3453 A66-36257
 Direction response of meson telescopes with vertical and inclined axes used in recording of cosmic ray variations 20 p3632 A66-38073
 Latitude dependence of neutron multiplicity detected by shipborne neutron monitor, examining threshold rigidity dependence on intensity of events 20 p3632 A66-38078
 Distributions of extensive air showers with either fixed number of charged particles or muons, using Geiger counter and scintillation counter 24 p4268 A66-42914
 Central region of muon shower investigated, using Geiger counter hodoscope detector 24 p4268 A66-42915
 Angular and energy distributions of muons produced by interaction of atmospheric neutrinos with matter 24 p4270 A66-42933
 underground
 Asymptotic approximation of distribution of small ionization bursts produced by high energy muon under thick layer of matter in direct electron-pair production 24 p4271 A66-42935
 Ultrarelativistic muon electromagnetic interaction energy loss due to bremsstrahlung and pair production 24 p4271 A66-42936
 Polarization measurements of cosmic ray muons by detection of positrons from muon-to-positron decay 24 p4271 A66-42937
 Muon production in atmosphere and energy dependence of positive excess 24 p4271 A66-42938
 High energy muon flux in interference radiation incident to fast charged particle constant-speed trajectories through periodic laminar medium 24 p4271 A66-42939
 Neutron spatial asymmetry measured from reaction of cosmic ray muons on nuclei with different spins 24 p4271 A66-42940
MUSCLE
S ELECTROCARDIOGRAPHY
MUSCULAR FUNCTION
SA HEART FUNCTION
 Dynamic characteristics of muscle, discussing effect of contraction and force developed on state of activity in terms of force velocity diagrams 20 p3507 A66-38100
 Prolonged gamma-radiation induced electromyographic characteristics of vestibular reflex guinea pig hind-leg muscle 23 p4028 A66-41349
MUSCULAR STRENGTH
 Physical atrophy prevention in protracted weightlessness, discussing physical fitness maintenance during space flight 04 p0465 A66-14072
 Effect of varying strain rate on physical properties of bone and muscle tissue, measuring load and time displacement with constant-velocity compression test machine [ASME PAPER 65-WA/HUF-9] 05 p0626 A66-15699
MUSCULAR SYSTEM
SA MOTOR SYSTEM /BIOL/
 Similarity concept applied to study of work done by living creatures in various situations 01 p0017 A66-10302
MUSKHELISHVILI PRINCIPLE
 Thermal field effect on stress-strain state of infinite elastic plane with circular hole examined, using Muskhelishvili principle 13 p2204 A66-26435
MUTATION
SA GENETICS
 Proton tunneling and mutation rate of Escherichia coli B To T1 and T2 phage resistance in water 13 p2008 A66-25788
 Biochemical mutation, DNA, RNA and microorganisms infecting wing tanks of jet aircraft 13 p2011 A66-26546
MYLAR
 Nonmonotonicity in sensitivity test data, noting results of liquid oxygen impact tests on Mylar-aluminum-Mylar laminate bonded to polyester foam 12 p1958 A66-23648
 Lightweight insulations for space vehicle cryogenic storage tanks based on design principles of multilayer radiation shields 19 p3473 A66-35598
MYSTERE XX AIRCRAFT
S DASSAULT MYSTERE XX AIRCRAFT

N

N-156 AIRCRAFT

S F-5 AIRCRAFT

N-N JUNCTION

Optical modulation of current in germanium-silicon n-n heterojunctions, noting consistency of I-V, C-V and photocurrent spectra characteristics with depletion region model of material 08 p1273 A66-19253

Injection and extraction of hot electrons in n-n heterojunctions with rapid Maxwellization of electron gas, negative resistance and semiconductor characteristics 13 p2166 A66-25920

N-P JUNCTION

SA P-N JUNCTION

Temperature dependence of integral light flux of recombination radiation in indium phosphide n-p junction 09 p1431 A66-20935

N-P-N JUNCTION

Second breakdown volt-ampere characteristics in triple diffused n-p-n Si transistor 09 p1351 A66-19936

Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20 v 09 p1352 A66-20360

Double-ended transistors /n-p-n and p-n-p/ in circuit design application, explaining why transistors of opposed polarity facilitate direct interstage coupling 10 p1511 A66-21713

Localized enhanced diffusion in vacancy model to explain Emitter Dip Effect /EDE/ in n-p-n silicon transistor 11 p1671 A66-23350

P-n-p and n-p-n silicon epitaxial power transistors, noting geometry vs output for interdigitated structures 13 p2037 A66-25542

N-p-n double diffused Si HF transistor design for monolithic microcircuit application 13 p2038 A66-25559

Normalized low-level characteristics of saturated transistor 14 p2247 A66-27043

Traveling solvent technique for p-n-p or n-p-n semiconductor structures with highly doped middle layer demonstrated on indium arsenide 16 p2779 A66-31088

Transistorized switch, employing n-p-n and p-n-p silicon triodes, capable of switching voltages from 10 mv to 20 v 19 p3312 A66-35318

Isolated GaAs transistors on high resistivity GaAs substrate, noting production via epitaxial etch-refill technique, performance and isolation properties 20 p3616 A66-37405

Transistor theory approximation of DC and small signal I-V characteristics of p-n-p-n junction diodes and triodes 24 p4184 A66-42744

N-TYPE SEMICONDUCTOR

Microwave radiation and surface patterns formed during application of high currents and magnetic fields to n-InSb 01 p0117 A66-10244

Controlled bulk semiconductor amplification possible using n-type gallium arsenide with applied electric field greater than 3000 v/cm 01 p0036 A66-10351

N-type conductive cadmium selenide single crystals investigated for heat treatment and Hall effects in selenium 01 p0127 A66-11194

Surface states at silicon-silicon dioxide interface studied by observing bias voltage dependence of differential capacitance of n-type MOS diodes 01 p0128 A66-11196

Electric conductivity anisotropy of n-type silicon in range of warm and hot carriers 01 p0128 A66-11199

Dependence of barrier height of metal-semiconductor systems on metal work function, surface states and thickness of interfacial layer 02 p0271 A66-11438

Piezoelectric resistance of n-silicon as function of electric field intensity 02 p0273 A66-11713

Semiconductor characteristics of barium titanate with n-type conductivity produced after heat treatment with hydrogen and doping with lanthanum 02 p0273 A66-11716

Quantum oscillation associated with quantization of electron energy spectrum of n-type indium antimonide 02 p0274 A66-11735

Impurity bandwidth and separation from conduction band in n-type GaAs determined from electroconductivity and Hall effect data 02 p0276 A66-12077

Electron energy and momentum dissipation in n-type InSb at low temperatures, discussing collision effects on hot electron escape 02 p0276 A66-12079

Synchronization of microwave oscillations in n-type GaAs, noting pulse spectrum 03 p0377 A66-12444

Temperature dependence of input and output current-voltage characteristics of N-triode 03 p0346 A66-13320

Resistivity and Hall coefficient vs temperature in heavily doped n-type GaSb and related semiconductors 04 p0561 A66-13734

Chemical etching method useful for electron microscope observation of damage regions of high-energy neutron irradiated n-type germanium 04 p0562 A66-13738

High electric fields effect on propagation of 24-GHz microwaves along surface on n-type indium antimonide 04 p0562 A66-13749

Microwave emission at O-band from n-and p-type indium antimonide subjected to applied electric and magnetic fields 04 p0564 A66-14103

Parameters associated with inelastic polar electron scattering in indium antimonide 04 p0565 A66-14267

Donor and acceptor concentration on electrical conductivity of n-type silicon 04 p0567 A66-14341

Compensation effect on electron paramagnetic resonance spectrum of n-type silicon 04 p0567 A66-14342

Tellurium alloyed impurity on IR absorption spectrum in n-type gallium arsenide 04 p0569 A66-14360

Transport coefficients of n-indium arsenide to calculate electron concentration, mobility and three-band scattering mechanism 04 p0570 A66-14481

Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 05 p0730 A66-14644

Coulomb interaction of electrons and holes in contacts of degenerate n-and p-type semiconductors causes ground state instability relative to electron-hole pair formation 05 p0730 A66-14645

Temperature, annealing time and radiation dosage effect on electroconductivity of inversion layers generated in n-type silicon during bombardment with boron ions 05 p0730 A66-14646

Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 05 p0731 A66-14655

Isochronal annealing from 80 to 360 degrees K of defects induced by 45-mev electrons in floating zone and pulled n-type silicon 05 p0742 A66-15873

Electrically active impurities effect on germanium thermal resistivity at low temperatures measured on n-type single crystals 05 p0742 A66-15875

Compensation dependence of impurity conduction in n-type germanium containing antimony atoms 05 p0743 A66-15876

Thermionic emission and surface ionization of Cs, K, Na, Li and In atoms on face of n-type silicon of resistivity of 150 ohm-cm for low densities of atom beams 06 p0922 A66-16153

Helicon in n-type silicon and germanium, calculating collective modes of electrons in external magnetic field from frequency and wavelength-dependent conductivity tensor 06 p0923 A66-16275

Exponential band-edge tails observed experimentally in degenerate n-type germanium tunnel diode 06 p0925 A66-16654

Gunn effect n-type GaAs diode phase locked to stable frequency by injecting CW signal into circuit along with video pulse 06 p0925 A66-16671

Impurities effect on electrification of cadmium telluride dust, specifically n and p types, with electrification increasing with impurity concentration 06 p0928 A66-16891

Hot electron transfer from light mass central valley to surrounding heavy-mass satellite valleys in n-type gallium arsenide, indium phosphide and cadmium telluride 06 p0928 A66-16891

analysis based on Boltzmann equation 06 p0929 A66-17035

Hall effect and conductivity measurements of carrier removal rate in oriented specimens of n-type Si under electron irradiation at energies from 0.3 to 2.0 mev 06 p0930 A66-17049

Positions of defect energy levels in n-type germanium irradiated with fast neutrons analyzed by optical methods, measuring spectral distribution of photoconductivity and quenching curve 06 p0934 A66-17127

Hall effect and resistivity measurements on high resistance n-silicon related to formation conditions at low temperature of level placed at 160 mev from conduction band 06 p0935 A66-17128

Electron irradiation and thermal effects on electrical transport properties of n-type II-VI semiconductors 06 p0935 A66-17131

Diffusion of Li and Cu in GaAs crystals indicates reaction involving divacancies in donor-doped and undoped crystals 06 p0935 A66-17132

In-pile neutron and gamma-ray irradiation of n-type indium antimonide, isochronous annealing indicating existence of five recovery stages 06 p0936 A66-17134

Proton and electron bombardment induced defects in GaAs studied by examining spectral composition and intensity of proton and cathode luminescence 06 p0936 A66-17135

Ripening of defects induced by fast neutrons in germanium in course of low temperature annealing 06 p0937 A66-17143

Capacitance-voltage curves in MOS devices indicating difference in relaxation time of surface states 06 p0940 A66-17163

Recombination radiation of n-type germanium with various dislocation densities, emphasizing mechanism of radiative transitions 07 p1096 A66-17324

Laser action achieved in n-type indium antimonide excited by 15-kv electron beam at 20 and 4 degrees K 07 p1043 A66-17341

Efficiency of DC electroluminescence produced when minority carriers are injected into n-type ZnSe crystals depends on injection efficiency at contacts 07 p1097 A66-17342

Photoconductivity kinetics in thin n-type impurity semiconductor layers with surface capture and recombination levels 07 p1099 A66-17872

IR polariscopy method applied to study of photo- and electromechanical effects of n-type silicon films 07 p1034 A66-17875

Time dependent fluctuations in photoconductivity of Cu doped low ohmic n-type gallium arsenide exposed to IR radiation 07 p1099 A66-17876

Cyclotron resonance in Azbel-Kaner geometry in n-and p-type lead telluride, examining anisotropy of absorption under anomalous skin effect conditions 07 p1102 A66-18205

Electron gas energy scattering in n-type indium antimonide at helium temperatures under action of DC field 07 p1104 A66-18259

Hole diffusion constant dependence on electric field in n-type germanium 07 p1106 A66-18395

Single injection measurements in n-type silicon at liquid-helium temperatures under transient conditions, using pulse measurements 07 p1107 A66-18414

Photoelectric behavior of n-type Ga-As wafers having shallow zinc diffused surface layers 08 p1269 A66-18869

Electron spin effect on quantum oscillations of magnetoresistance and Hall effect in n-InSb single crystal 08 p1269 A66-18971

Saturation of microwave impedance and occurrence of microwave emission in indium antimonide for strong longitudinal or transverse magnetic fields 08 p1270 A66-19059

Behavior of high field instabilities in n-type gallium arsenide, examining device prospects related to phenomenological model for Gunn effect 08 p1270 A66-19122

High-field surface conductance of n-type germanium observed to be negative and magnitude to increase with field in high-field region 08 p1271 A66-19222

Acoustic and optical phonon drag of pure ionic n-type semiconductors having NaCl 08 p1271 A66-19222

- structure, calculating kinetic coefficients 08 p1273 A66-19252
- Electric current passage through multivalley n-germanium semiconductor plates, noting nonuniform electron distribution 08 p1273 A66-19275
- Microscopic theory of electroacoustic effect for n-type Ge and Si semiconductors of many energy minima, noting electron scattering 09 p1412 A66-19986
- Effective mass of electrons in n-type gallium arsenide deduced from measurements of Hall coefficient and thermoelectric power 09 p1426 A66-20197
- Galvanomagnetic and field effect measurements on Ge double crystals 09 p1427 A66-20419
- Logarithmic temperature dependence of electrical resistivity found in metallic impurity conduction in n-type germanium 09 p1430 A66-20849
- Electron gas energy scattering in n-type indium antimonide at helium temperatures under action of DC field 09 p1431 A66-20903
- Electrical properties, solubility and diffusion characteristics of gold in silicon, noting discrepancy between theoretical calculations and experimental measurements 09 p1432 A66-20975
- Microwave emission from bulk n-type indium arsenide in presence of applied electric and magnetic fields at liquid nitrogen temperatures 10 p1572 A66-21069
- Frequency spectrum of microwave emission from n-type gallium arsenide 10 p1574 A66-21354
- Lithium diffusion effects on electrical properties of tellurium doped n-type GaSb 10 p1578 A66-21582
- Polarization of helicons in n-type silicon and germanium 10 p1580 A66-21733
- One-sided avalanche injection in n-p-p diodes as cause of negative resistance for carrier concentrations smaller than impurity concentration 10 p1515 A66-22085
- Floating zone technique for preparing high purity GaAs crystals for CW microwave devices 10 p1516 A66-22099
- Potential fluctuation effect on electron paramagnetic resonance lines in compensated n-type semiconductor 10 p1587 A66-22151
- Electroconductivity of n-type Ge in strong SHF electrical fields 10 p1587 A66-22155
- Thermally grown silicon dioxide layers examined, noting ionic and structural changes induced by applied electric fields at different temperatures 11 p1756 A66-23023
- Volt-ampere characteristics of short semiconductor diode at high injection levels 11 p1757 A66-23229
- Potential distribution in p-type selenium layer adjacent to n-type cadmium selenide in cut-off direction 11 p1757 A66-23231
- Elastoresistance coefficients for n-type cadmium telluride determined at 300 and 195 degrees K 12 p1926 A66-23713
- Length changes and conductivity variations in electron irradiated n-and p-type germanium, noting methods of measurement, effects of isochronic annealing at liquid helium and nitrogen temperatures 12 p1926 A66-23717
- Cobalt doping effects on energy level and negative photoconductivity in n-type silicon 12 p1926 A66-23720
- High field magnetoresistance and random inhomogeneities in arsenic-or antimony-doped n-type germanium 12 p1931 A66-24805
- Radiochemical and electrical determination of sodium distribution in thermal oxide on silicon 12 p1933 A66-24829
- Complex longitudinal microwave magnetoconductivity and permittivity of n-type silicon at 77 degrees K, noting influence of DC magnetic field 13 p2159 A66-25066
- Photo emf of gallium arsenide determined as function of temperature, light intensity, external electric field and surface quality 13 p2165 A66-25679
- Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 13 p2166 A66-25917
- Coulomb interaction of electrons and holes in contacts of degenerate n-and p-type semiconductors causes ground state instability relative to electron-hole pair formation 13 p2166 A66-25918
- Temperature, annealing time and radiation dosage effect on electroconductivity of inversion layers generated in n-type silicon during bombardment with boron ions 13 p2167 A66-25921
- Relaxation oscillations in n-type epitaxial silicon with point contact, discussing generation via electrical excitation of impurity centers 13 p2167 A66-25930
- Microwave Faraday effect in n-type germanium, discussing Faraday rotation, ellipticity, magnetoabsorption, complex conductivity tensor elements and measurement of microwave polarization anisotropy 14 p2349 A66-26826
- Influence of p and n doping on electrification of dust of Ge monocrystals grown from zone-melted material 14 p2364 A66-27717
- Shubnikov-de Haas oscillations in magnetoresistance of Li-diffused Te-doped n-type GaSb 14 p2366 A66-27764
- Donor and acceptor concentration on electrical conductivity of n-type silicon 14 p2367 A66-28235
- Compensation effect on electron paramagnetic resonance spectrum of n-type silicon 14 p2367 A66-28237
- Tellurium alloyed impurity on IR absorption spectrum in n-type gallium arsenide 14 p2369 A66-28258
- Temperature dependence of input and output current-voltage characteristics of N-triode 14 p2260 A66-28294
- Electron gas electroconductivity relaxation time and energy loss in n-type InSb at cryogenic temperatures 15 p2558 A66-28611
- Field effect measurements in n-and p-type CdTe at room temperature and pressure 15 p2558 A66-28612
- Preparation, X-ray measurements and photovoltaic properties of Ge-epitaxial-PbS heterojunctions 15 p2562 A66-28710
- Oscillations in power generation of n-type GaAs at frequencies far in excess of intrinsic Gunn frequency 15 p2565 A66-29041
- New type of oscillation when n-type indium antimonide is placed in steady magnetic field at 78 degrees K and pulsed with electric field 15 p2566 A66-29392
- Thermionic emission and surface ionization of Cs, K, Na, Li and In atoms on face of n-type silicon of resistivity of 150 ohm-cm for low densities of atom beams 15 p2569 A66-29883
- Resistance anomaly in n-type InSb at very low temperatures, noting experimental results 16 p2768 A66-30140
- Coupling of electron motion to lattice longitudinal acoustic mode in n-gallium antimonide leading to variations in sound velocity 16 p2775 A66-30732
- Bulk oscillations in n-type Si compensated with either Au or Co deep level impurities 16 p2778 A66-31078
- Instability of Sb and Au-doped n-type germanium during carrier injection, examining current-voltage and frequency characteristics and illumination effects 17 p2974 A66-31858
- Secondary breakdown relaxation oscillations and I-V characteristics of point-contact n-type Ge diode 17 p2879 A66-31866
- Electrical conductivity and Hall mobility of p-and n-type semiconductors at various temperatures 17 p2975 A66-31900
- Longitudinal Hall effect in n-type germanium measured on basis of anisotropic scattering theory, taking into account tensor character 17 p2976 A66-32260
- High field V-I characteristics of n-type GaAs, noting critical field current saturation, field distribution, trapping, hysteresis, etc 17 p2978 A66-32403
- InP spontaneous and simulated emission spectra, noting separation of lines by longitudinal optical phonon energy, threshold current magnitude, etc 17 p2886 A66-32407
- Dipole phenomena in n-type GaAs caused by field perturbations, showing conditions for high and low field nucleation 17 p2983 A66-33106
- Continuous wave oscillations in n-type GaAs due to voltage controlled negative conductance 17 p2983 A66-33107
- Volt-ampere characteristics, electrical resistivity, and pressure effect on Gunn phenomena in n-type GaAs in high electric fields 17 p2985 A66-33292
- External electron emission measurement from polished n-germanium and n-silicon surfaces 17 p2986 A66-33310
- Spin-lattice relaxation rate of donor electrons in phosphorus and boron-doped silicon with various degrees of compensation 18 p3156 A66-34471
- Thermal and electric properties of InAs-GaAs alloy as function of composition, impurity additions and temperature 19 p3436 A66-35427
- Thin film transmission electron microscopy on n-type silicon irradiated with fast neutrons, noting erratic polishing process and irregular surface 19 p3436 A66-35431
- Quantum oscillations in magnetoresistance, Hall coefficient and thermoelectric power in strong transverse and longitudinal magnetic fields for n-InAs polycrystals at liquid helium temperature 19 p3438 A66-35479
- Potential fluctuation effect on electron paramagnetic resonance lines in compensated n-type semiconductor 19 p3440 A66-35765
- Electroconductivity of n-type Ge in strong SHF electrical fields 19 p3440 A66-35769
- Spontaneous LF conductivity fluctuations in n-type gallium arsenide samples at 77 degrees K 19 p3442 A66-35822
- Effective electron mass in n-type indium arsenide at high temperatures and high carrier density, noting temperature dependence of effective electron mass 20 p3616 A66-37444
- Quantum oscillation of transverse and longitudinal magnetothermal emf in n-type indium antimonide compared with oscillations of transverse and longitudinal magnetoresistance and Hall coefficient 20 p3618 A66-37557
- Thermoelectric device for semiconductor analysis, determining whether material is of n-or p-type conductivity 20 p3560 A66-37586
- Impurity concentration effect on maximum continuous wave power from gallium arsenide lasers at 77 degrees K 20 p3580 A66-37782
- Receiver with n-type indium antimonide detector for investigating absorption spectra in submillimeter wave range 20 p3561 A66-37999
- Photoresponse measurements of depletion capacitance and diffusion potential of GaP Schottky-Barrier diodes 20 p3534 A66-38390
- Minority carrier trapping centers introduced by irradiation of n-type germanium analyzed, particularly effect of donor species on production, recovery and annealing of defects 20 p3623 A66-38408
- Electron conduction and phosphorus doping effects on room temperature and cryogenic electron spin resonance in n-type silicon 21 p3797 A66-38752
- Isochronal and isothermal stage II recovery in high energy electron irradiated n-type InSb semiconductor, based on Hall coefficient and electroconductivity 21 p3800 A66-38994
- Impurity conduction effect on electron donor recombination cross section in n-type germanium and silicon at liquid helium temperatures 21 p3801 A66-39001
- Internal electric field effect on singly ionized acceptor or donor impurity diffusion in uniformly doped n-or p-type semiconductors 21 p3804 A66-39468
- IR absorption, reflectivity and transmission in n-type gallium arsenide single crystals at room temperature due to impurities and high carrier concentration 21 p3805 A66-39580
- Predicted plasma mode in microwave frequency range for magnetoplasma excitations in germanium, applying theory to n-type and p-type lead telluride 22 p3960 A66-39805
- Thermal emf of semiconductors in strong magnetic field, examining formation of spherically symmetric zone subject to arbitrary conduction-electron energy dispersion law 22 p3960 A66-39824
- Fast neutron effect on electrical properties of boron-doped n-type silicon samples with resistance, noting decrease in hole

concentration and mobility 22 p3961 A66-39829

Curve analysis of current instabilities including Gunn effect in n-type gallium arsenide 22 p3961 A66-40045

Fission spectrum neutron damage and gamma ray damage in n-type Si, comparing results of measurements by degradation of minority carrier lifetimes 22 p3962 A66-40086

Charge distribution in thermally grown silicon dioxide and silicon n-type inversion layer 22 p3962 A66-40087

Deep centers in conducting n-type GaAs and production of Schottky layer 22 p3963 A66-40088

Stable space-charge layers in two-valley semiconductors 22 p3963 A66-40101

Spontaneous and stimulated emission from GaAs diodes with three-layer structures consisting of n-n-p, n-p or n-p-p diodes 22 p3932 A66-40102

Resistivity measurement of large number of samples of bulk-grown n-type GaAs as function of temperature near 300 degrees K 22 p3977 A66-40179

Optical spectrum of normal excitons in deformed and nondeformed n-type Ge single crystal layers for four orientations 22 p3964 A66-40306

Photoionization cross section of negatively charged In atoms in n-type silicon from comparison of intrinsic photoconductivity with impurity photoconductivity 22 p3964 A66-40309

Volt-ampere characteristics of germanium and silicon diodes with p region formation by gold diffusion into n-type material 23 p4046 A66-41566

Semiconductor conductivity in strong SHF electric fields, measuring dielectric constant and Fourier component 23 p4068 A66-41620

Temperature dependence of Hall coefficient and resistivity of n-type epitaxial gallium arsenide in 4.2 to 300 degree K temperature range 24 p4254 A66-42423

Surface pinned layer-like field inhomogeneities in cadmium sulfide, investigating visibility of field layer by corresponding shift of absorption edge, using Franz-Keldysh effect 24 p4254 A66-42427

NAC-60 AIRCRAFT

S NORTH AMERICAN NAC-60 AIRCRAFT

NACELLE

Aerodynamic design of Boeing 737 covering data of analytical studies, wind tunnel and flight tests, aerodynamic parameters and drag, flap system size, efficiency, wing geometry and handling qualities [AIAA PAPER 65-739] 03 p0321 A66-13047

Integration of propulsion systems with airframe, emphasizing aerodynamic lift and drag 05 p0605 A66-14934

Engine technology including higher turbine operating temperatures, high speed fan and nacelle design, increased by-pass ratio and improved power plant efficiency 06 p0943 A66-16924

Irreversible trimmed stalls at high angles of attack for aircraft with aft-mounted engine nacelles and high-or T-tails 20 p3496 A66-38255

NAPHTHALENE

Mass transfer by sublimation from surface of stationary or rotating naphthalene cone in axisymmetric airstream 04 p0595 A66-13388

Laser-beam scattering by individually introduced charged polystyrene spherical particles and droplets of naphthalene and water in combination 07 p1043 A66-17473

Affinity and stoichiometry of binding of 1-anilino-8-naphthalene sulfonate /ANS/ to apomyoglobin and apohemoglobin 08 p1177 A66-18701

Absorption spectra of pure and isotopic impurity crystals of naphthalene in region of first electronic and vibrational /vibron/ transition 19 p3402 A66-36067

Conversion of 2-carboxy-3-keto-9-methyl-unsaturated hexahydronaphthalene into 5/7-fused products on irradiation in aqueous and nonaqueous media, observing photochemical rearrangements 24 p4170 A66-42314

2-carboxy-3-keto-9-methyl hexahydronaphthalene converted in high yield into 5/7 fused products on irradiation in

aqueous and nonaqueous media 24 p4171 A66-43101

NASA PROGRAM

NASA SPACE PROGRAM

San Marco project, joint effort of NASA and Italian Space Commission to launch satellite for atmospheric and ionospheric measurements 01 p0143 A66-10809

NASA International program including satellite experiments, sounding rocket investigations, etc 02 p0306 A66-12232

Satellite navigation systems for marine and aircraft industry global, all-weather position determination and communications noting range measurement, range rate, NASA techniques, etc 02 p0260 A66-12237

Devices on ESRO satellite to be launched in 1967 by NASA rocket, noting photometers for auroral measurements, plasma probe for electron density, scintillation counter, etc 03 p0430 A66-12484

NASA Quality Program for Space System Contractors /NPC 200-2/ serves as standard for quality control 03 p0373 A66-12628

Inspectors 03 p0373 A66-12628

NASA reliability program provisions for space system contractors, detailing program management, reliability engineering, testing and evaluation 05 p0687 A66-14960

NASA sponsored papers on space science 05 p0766 A66-15741

NASA Space Science Program, discussing flight schedules, spacecraft under development, biosciences, geophysics, astronomy, lunar and planetary program and construction of facilities 07 p1139 A66-18091

NASA aeronautics and space research including near-Earth, cislunar and interplanetary space, manned flights, meteorology and communications 08 p1321 A66-18549

NASA Space Tracking and Data-Acquisition Network, describing command telemetry, tracking handling and recording system operations 08 p1180 A66-18587

ESRO/ELDO Space Documentation Service, describing system characteristics, NASA agreement, indexing and search strategy 09 p1473 A66-20658

Space research activities in U.S. /1964 and early 1965/, condensed comprehensive report to COSPAR 09 p1458 A66-20690

NASA program, national and international participation, scientific missions, launching of manned and unmanned satellites, etc 10 p1623 A66-21518

Unmanned and manned satellites for communication and terrestrial navigation, noting future plans of NASA 10 p1496 A66-21534

Mars exploration by U.S. and U.S.S.R. 11 p1768 A66-22302

Inspection techniques for NASA, discussing control of supplier plants, Quality Requirements for Hand Soldering of Electrical Connections and personnel accountability 15 p2506 A66-28792

U.S. space science program 1965, report to COSPAR 15 p2600 A66-29903

Gemini experiments program, examining crew integration, mission planning and prelaunch operations 15 p2606 A66-30064

U.S. space sciences program, noting launch-vehicle activities, lunar/planetary exploration costs, etc 17 p3040 A66-32691

U.S. progress in space applications program including communications, geodesy, meteorology and navigation 17 p3040 A66-32692

Advanced control and guidance research at NASA 18 p3131 A66-33866

U.S. space program impact on cryogenic industry 20 p3624 A66-37060

Training seminar for reliability surveyors organized by NASA, particularly for Apollo program, noting content, participation, methodology, etc 20 p3686 A66-37957

Management role in NASA Space Applications Program 20 p3687 A66-37973

NASA management, budgetary problems, controversy of incentives system, etc 23 p4151 A66-41047

U.S. space program evaluated for Europeans, noting effects on international economics, technology and politics 24 p4297 A66-43072

NATIONAL AIR SPACE UTILIZATION SYSTEM

FAA regulation of civilian use of U.S. airspace 08 p1321 A66-18548

NATURAL FREQUENCY

Modification of Ritz equations for natural frequencies of homogeneous isotropic plates to apply to natural frequencies of laminated panels 01 p0149 A66-10150

Frequency, amplitude and stability of natural damped oscillations of bar on two hinged supports with concentrated load at one end 01 p0155 A66-10741

Prediction of stress at resonance with respect to permissible limits 01 p0156 A66-10868

Natural frequencies and modes of vibration of prestressed toroidal membrane under internal pressure 02 p0297 A66-11545

[AIAA PAPER 65-110] Oscillations in triaxial mirror ellipsoid and quantum conditions, determining natural oscillation frequency and position of acoustic surfaces 03 p0393 A66-13186

Natural oscillations of elliptic plates and membranes calculated by approximate method 03 p0441 A66-13296

Equations for natural oscillation frequency of gas-filled cylindrical shell 04 p0590 A66-14163

Natural frequency evaluation techniques for undamped mechanical elements 05 p0773 A66-14993

Spherical functions to calculate natural frequencies of resonators 06 p0849 A66-16370

Technique for extracting natural modes and frequencies from resonance tests 06 p0967 A66-16929

Interference and location of close natural frequencies in resonance testing 07 p1146 A66-18276

Displaced frequencies in vibration analysis, emphasizing close or equal natural frequencies 07 p1146 A66-18278

Thin shell theory to determine natural frequencies for cylindrical shells with any end conditions 07 p1146 A66-18279

Longitudinal and lateral natural frequencies of cantilever bars with concentrated end masses for axial and transverse excitation 09 p1468 A66-20936

Frequency spectrum of natural oscillations of cylindrical shell reinforced by longitudinal ribs 11 p1779 A66-22226

Calculation technique for eigenfrequencies of parallelepiped-shaped flexural mode vibrators with natural frequencies incalculable from elementary theory 11 p1705 A66-22651

Self-oscillations of dielectric rods between two metallic plates 11 p1669 A66-23104

Fundamental natural frequencies calculated for certain common beam configurations 11 p1784 A66-23175

Linear taper effect on lowest natural extensional frequency of clamped circular elastic arc 12 p1962 A66-24000

Integrals of system of equations describing natural oscillations of dome shaped shell 12 p1966 A66-24062

Longitudinal oscillation frequency of rod with one end fixed and other end carrying rigid load 12 p1966 A66-24065

Computation method of damped resonance frequencies for system of equal masses, spring constants and viscous damping coefficients 13 p2194 A66-25140

Effect of external or internal static pressure on natural frequencies of unstiffened, cross-stiffened and sandwich cylindrical shells 13 p2194 A66-25142

Expansion of E type symmetrical oscillations in axisymmetrical delay systems used in calculation of cylindrical resonators 13 p2031 A66-25227

Spherical functions to calculate natural frequencies of resonators 13 p2042 A66-25958

Natural modes of plane and cylindrical dielectric resonators in optical band 13 p2093 A66-26042

Natural oscillations in oscillator with three coupled circuits 13 p2044 A66-26470

Fundamental frequency of four-point-supported square elastic plate 14 p2398 A66-27436

Eigenvalue density in vibration of elastic plates and shells, noting concentration points for natural frequencies and influence

of rotational inertia and shear strain 14 p2398 A66-27455

Dynamic hinge concept for determining fundamental frequency of beam vibrations in terms of equivalent system 15 p2614 A66-29615

Shipboard tracking radar natural frequencies and mode shapes, noting resonance conditions and sensing, numerical analysis of mathematical model, etc 16 p2678 A66-30461

Natural oscillations of three-layer circular cylindrical shells with freely supported and clamped edges 16 p2818 A66-31056

Natural frequency of fluid oscillations in complex pipelines 16 p2687 A66-31296

Natural frequencies of torsional vibrations of circular cone possessing cylindrical anisotropy 16 p2823 A66-31633

Natural environmental random excitation used to measure eigenfrequencies of linear structures 17 p3018 A66-31839

Dynamic characteristics of built-up plates analyzed with modified Reissner principle, obtaining natural frequencies and mode shapes 17 p3022 A66-32014

Kohn-Kato bounds for natural frequencies of axial shear vibrations for solid circular bar, extending calculations through conformal transformations for bar with many-lobed plane curved boundary 17 p3022 A66-32014

Lumped inertia force method for obtaining mode shape and corresponding natural frequencies 17 p3023 A66-32078

True natural frequencies and modes determined from harmonic vibration test using not exactly appropriate excitation 17 p3024 A66-32332

Convective excitation of ionic oscillations in plasma by inhomogeneous electron beam as result of spatial gradient of distribution function 17 p2968 A66-32537

Natural frequencies and mode shapes of pressurized circular cylinders with flexible stringers and attached point-mass [AIAA PAPER 66-449] 17 p3028 A66-32760

Natural oscillation frequency of gyro mounted in torsional suspension, taking into account moments of inertia of sensitive element 17 p2926 A66-32799

Force resonance oscillations of one degree of freedom system with randomly time varying natural frequency 17 p2959 A66-32802

Natural frequency of thin rectangular plate for first six modes under clamped and free-edge conditions 17 p3032 A66-33526

Rational approximations for lower natural frequencies of uniform beam with concentrated mass or rotary inertia obtained by expanding eigenvalue equation into power series 18 p3249 A66-33599

Vibration analysis of CSIRO 210-ft radio telescope, discussing natural frequencies, structure resonance effects, error detection, etc 18 p3083 A66-34297

Natural vibration frequencies of rocket nozzles, accounting for anisotropic elastic behavior, internal gas dynamic pressure, boundary conditions, etc 18 p3258 A66-34601

Natural frequencies and modes for axisymmetric vibration of orthotropic shells 18 p3258 A66-34605

Polarization of pulsed radiation from GaAs laser diode to determine origin of natural oscillations of resonator 20 p3578 A66-37549

Perturbation theory analyses of network matrix eigenvectors and natural frequencies 20 p3539 A66-38282

Normal modes of vibration in aircraft design, noting mass distribution effect on calculation accuracy 21 p3823 A66-38562

Transfer matrix in calculating natural frequencies and normal modes of one-dimensional system, noting numerical stability problem in evaluating frequency determinant 21 p3823 A66-38563

Single point excitation techniques for resonance testing of structural inertia, stiffness and damping matrices 21 p3824 A66-38567

Natural frequency equations for TEM mode oscillations of coaxial resonator with moving dielectric material 21 p3713 A66-39321

Support flexibility effect on natural frequency free vibrations of uniform cantilever carried by mass supported on string 21 p3833 A66-39608

Natural frequency variations caused by thermal membrane stresses applied to circular disks for fundamental frequency increases, noting temperature distribution 22 p3989 A66-39774

Natural frequencies of all-clamped rectangular sandwich panel vibrations, using Lagrange multipliers 24 p4286 A66-42160

Linear elastic small deflection theory of natural frequencies of vibration of rectangular sandwich honeycomb plate with mass attachment 24 p4292 A66-43046

NATURAL SATELLITE

Period of revolution of Uranus satellite Miranda from plates obtained at Cassegrain focus of McDonald reflector 02 p0287 A66-11494

Spectral data of Galilean satellites of Jupiter 03 p0427 A66-12919

Simultaneous passage of shadows of two Jupiter satellites across planet disk, including tabulation of dates and times of phenomenon 05 p0758 A66-14731

Jupiter emission data re-analyzed, supporting Bigg finding of control by satellite X 05 p0760 A66-14946

Secular acceleration of Phobos attributed to tidal friction, considering effects of lower estimate of Phobos density 05 p0768 A66-15769

Possible atmosphere detection on J-II and J-III satellites revealed by excess brightness on eclipse reappearance 10 p1604 A66-21202

Numerical methods of celestial mechanics and Airy method computation of trigonometric series with numerical coefficients 12 p1950 A66-24403

Spectral data of Galilean satellites of Jupiter 14 p2380 A66-27268

Relation between RF of Jovian decametric emission bursts and modulation by Io searching for modulation by three outer Galilean satellites 15 p2597 A66-29232

Mars atmospheric density determined from photoelectric measurements of eclipses of Phobos 15 p2604 A66-30049

Review of literature on planets, natural satellites, Moon and origin of solar system 17 p2998 A66-32023

Minor planets, comets and satellites motions and positions in outline of present research 17 p2998 A66-32025

Nonsolar absorption lines in spectra of inner three Galilean satellites of Jupiter 18 p3230 A66-34155

Thermal contrast of satellite eclipse shadows and band structure during 1965 apparition of Jupiter 18 p3230 A66-34156

Using Mars and Phobos to advance interplanetary flight 19 p3464 A66-36315

Evidence for natural ephemeral Earth satellite including latitude and longitude, date, time, azimuth and elevation of observations 22 p3978 A66-40005

Jovian radio bursts containing millisecond pulses, noting effect of Io position on probability of decametric emission 22 p3982 A66-40521

Hot shadows cast on Jupiter by satellites explained in terms of freezing of supercooled ammonia droplets 23 p4128 A66-41308

Periodicities in Jupiter decametric radiation and methods of assessing statistical and physical significances, noting natural satellites effects 23 p4129 A66-41684

Tables of observational statistics on comets, minor planets and natural satellites 24 p4273 A66-42205

NAVIER-STOKES EQUATION

SA REYNOLDS EQUATION

Slow motion of sphere in compressible, viscous and heat conducting fluid analyzed, using Navier-Stokes equations 01 p0006 A66-10424

Vorticity distribution in wake of circular cylinder oscillating in unperturbed flow, using Burger linearization of Navier-Stokes equations 01 p0007 A66-10715

Numerical solution to steady compressible Navier-Stokes equation, treating steady shock tube flow as asymptotic form of time dependent flow 02 p0217 A66-11530

[AIAA PAPER 65-1] Exterior stationary problem for Navier-Stokes equations and associated perturbation problems 02 p0219 A66-12010

Mixed boundary value problem in bounded

region for Navier-Stokes equations and discontinuity equation 02 p0219 A66-12010

Iterative solution of Navier-Stokes equations for class of flows generated within rectangular cavity by surface passing over open end 03 p0356 A66-12888

Structure of steady plane shock in partially ionized gas, using three-fluid Navier-Stokes model, obtaining velocities, temperatures, electric field and potential distributions through shock 03 p0357 A66-12976

Supersonic viscous gas flow past bodies calculated by solving approximate system of Navier-Stokes equations for limited regions with great dissipative terms 03 p0359 A66-13183

Generalization of Milne-Thomson solution to Navier-Stokes equation governing motion of viscous incompressible fluids 04 p0510 A66-13827

Numerical solution of two-dimensional Navier-Stokes equations for confined wake formed by merging of two-plane Poiseuille flow streams 04 p0511 A66-13936

Laminar boundary layer on impulsively started rotating sphere, discussing viscous incompressible axially symmetric flow in terms of nonsteady partially linearized Navier-Stokes equations 04 p0513 A66-14477

Laminar boundary layer behavior of centrifugal impeller blades, discussing exact solution via perturbation technique [ASME PAPER 65-WA/FE-15] 05 p0608 A66-15612

Viscous fluid flow, examining effect of time dependent suction applied at wall of infinite extent 06 p0871 A66-16351

Coupled flow problem, comparing flow induced by steady rotation of permeable and impermeable disks 06 p0871 A66-16353

Rotationally symmetric flow of non-Newtonian fluid in presence of infinite rotating disk, solving Navier-stokes equation and determining velocity profiles 07 p1019 A66-17258

Decay of scalar quantity fluctuations in stationary isotropic turbulent velocity field studied by direct interaction approximation 07 p1020 A66-17944

Inner and outer expansions method applied to source flow model involving viscous effects in hypersonic axisymmetric free jets at large Reynolds numbers 07 p0982 A66-18122

Prandtl lifting line classical theory of high aspect ratio wings as singular perturbation problem yields asymptotic expansions of Navier-Stokes solution 07 p0982 A66-18124

Exact numerical solution of time-dependent compressible Navier-Stokes equations describing transient compressible viscous heat-conducting flow [AIAA PAPER 66-30] 08 p1207 A66-18986

Asymptotic behavior of solutions of steady state Navier-Stokes equations for viscous incompressible fluid flow in two dimensions 09 p1367 A66-20630

Accuracy of kinetic theory approximations assessed by comparison of approximate and exact solutions of Krook kinetic equation for Couette flow and shock wave structure 11 p1690 A66-22906

Electron beam measurement of shock wave thickness used to determine limits of validity of Navier-Stokes equations 11 p1691 A66-22917

Maximum-minimum theory of eigenvalues applied to stability in Navier-Stokes equation and to incompressible elastic body vibration 11 p1694 A66-23183

Simplified Navier-Stokes equations for steady hypersonic viscous flow past slender shapes with sharp leading edges 12 p1796 A66-23613

Supersonic viscous gas flow near blunt body numerically determined by equations similar to Navier-Stokes equations 12 p1796 A66-23900

Viscous fluid motions around conical surface, using Navier-Stokes equations 12 p1797 A66-24198

Mixing of laminar viscous incompressible jets expelled from equally spaced holes in vertical wall, obtaining solution by using Navier-Stokes equation 12 p1864 A66-24444

Laminar boundary layer behavior of centrifugal impeller blades, discussing exact solution via perturbation technique

[ASME PAPER 65-WA/FE-15]

- 12 p1799 A66-24543
Laminar hypersonic flow past sphere based on constant-density approximation, solving Navier-Stokes equations and comparing with values of shock Reynolds number 12 p1800 A66-24943
Numerical analysis of steady two-dimensional motion of viscous fluid past flat plate at zero incidence to uniform stream, with solutions for Navier-Stokes equations 12 p1866 A66-24949
Global solutions of Navier-Stokes equations, analyzing solution vector for nonnegative time values in three-dimensional Euclidean space for continuous initial data 12 p1867 A66-24962
Viscous hypersonic blunt body problem examined, using Newtonian thin-shock-layer theory, slip effect, Navier-Stokes shock structure, etc 13 p1990 A66-25157
Rarefied flow transition at leading edge of flat plate examined, using Navier-Stokes equation, noting new low density jump conditions, viscous layer characteristics, effect of normal pressure gradient, etc 13 p2061 A66-25164
Approximate solution of Navier-Stokes equations applicable to viscous and incompressible fluids 13 p2062 A66-25429
Net-point method determination of two finite-difference systems for systems of Navier-Stokes equations 13 p2066 A66-26504
Initial value problem for Navier-Stokes equation 14 p2273 A66-26939
Heat and mass transfer in radial flow between two fixed or co-rotating parallel disks, obtaining series expansion of Navier-Stokes equation 15 p2615 A66-28619
Motion of viscous incompressible fluid in interspace between rotating and parallel fixed permeable plane through which supplementary fluid is injected, solved by Navier-Stokes equations 16 p2687 A66-31293
Navier-Stokes equations for rotational motion of incompressible viscous fluid at small Reynolds numbers between rotational surfaces 16 p2688 A66-31298
Stationary boundary value problem of Navier-Stokes equation for incompressible viscous fluids 17 p2911 A66-32817
Finite-difference calculation of MHD flow of conducting fluid past circular cylinder in transverse magnetic field based on Navier-Stokes equation 17 p2971 A66-32862
Squeeze-film method for generating high damping coefficients with limited space based on Reynolds equation and simplified Navier-Stokes equation 17 p2930 A66-32946
Navier-Stokes equations, differences for laminar jets and turbulent jets, submerged jets and transition layer stability 18 p3099 A66-34123
Boundary value problem of Stokes equations proving branching for flow between two rotating concentric cylinders and nonexistence of singular flow 18 p3101 A66-34659
Flow of incompressible viscous fluid subject to conditions governed by Navier-Stokes equation, examining fluid velocity as time tends to infinity 18 p3101 A66-34660
Numerical solution for complete Navier-Stokes equations for one-dimensional time-dependent propagation of compressible viscous thermally conducting diatomic gas, including presence of travelling shock wave 18 p3102 A66-34918
Navier-Stokes equations solutions for incompressible fluid representing boundary layer flows with suction along corners or cylindrical bodies 19 p3341 A66-35855
Navier-Stokes equations for plane interface with stagnation point formed by expelling different gas from leading edge of airfoil opposite to main flow 19 p3277 A66-36635
Motion of hollow body filled with viscous fluid at large Reynolds numbers, determining Zhukovskii potentials and examining small oscillations 19 p3343 A66-36830
Viscous thermoconductive model of solar wind motion, using Navier-Stokes equations 20 p3631 A66-37335
Numerical integration of Navier-Stokes equation for shock reflection, supersonic flow past thin plate and shock diffraction on thick plate 20 p3546 A66-37534
Radial flow of incompressible viscous fluid between two parallel disks 20 p3548 A66-37990
Navier-Stokes equation series form of radial flow of incompressible fluid between two rotating parallel disks 20 p3548 A66-37991
Viscosity distribution within Moon analyzed, using Navier-Stokes and continuity equations, abnormal inertia moment explained, maria and continent distribution examined for understanding internal state of Moon 20 p3656 A66-38030
Tangential velocity and radial flow of unsteady viscous vortex with annular region and flow toward center 21 p3728 A66-39345
Weak plane shock waves formation by impulsive motion of piston for viscous heat conducting gas 22 p3900 A66-40383
Falling of sphere along axis of vertical tube filled with viscous liquid, examining effect of cylindrical walls by linearized Navier-Stokes equations, using successive approximations 23 p4055 A66-41446
Viscous supersonic flow near wall with large local curvature, using asymptotic solutions to Navier-Stokes equations 23 p4056 A66-41721
Approximate Navier-Stokes equations for viscous flow conditions near trailing edge of flat plate 23 p4059 A66-42001
Hydrodynamic stability of incompressible fluid based on Navier-Stokes equations including numerical calculations of boundary layer disturbances and temperature-dependent material constants 23 p4060 A66-42021
Radiation fronts in gas dynamics, examining flow through or behind aerodynamic shock 23 p4062 A66-42052
Finite difference method solution of Navier-Stokes equations and applicability to cylindrical-channel viscous flow at small Reynolds numbers 23 p4062 A66-42061
Generalized class of exact solutions to Navier-Stokes equations 24 p4193 A66-42162
Navier-Stokes equations solutions for coefficient of viscosity tending to zero become solution to Euler equations in Cauchy problem for equations of hydrodynamics 24 p4193 A66-42232
Nonstationary Navier-Stokes equations solved, using implicit difference scheme, demonstrating convergence with aid of difference analog of energy equality of hydrodynamics 24 p4231 A66-42234
Classical character of generalized solution of boundary value problem for general nonlinear Navier-Stokes equations 24 p4231 A66-42235
Net point method determination of two finite difference systems for systems of Navier-Stokes equations 24 p4195 A66-42724
Secondary steady or periodic flow generation from stability loss by laminar flow of viscous incompressible fluid, noting nonuniqueness of solution 24 p4195 A66-42840

Navigational problems arising from use of hovercraft 09 p1401 A66-20430
Integration of equations determining location coordinates of moving object on terrestrial sphere 12 p1909 A66-24358
Navigation displays for supersonic transports, discussing inductive reasoning, system performance verification, initial data verification, etc 15 p2535 A66-29625
Flight tests limitations, hi-fi simulation and other navigation display evaluation, detailing discontinuous simulator 16 p2743 A66-30668
Navigational information conversion from digital readout to pictorial display 16 p2743 A66-30670
Flight evaluation using course line computers with pictorial display as navigation aid 17 p2950 A66-32357
Manual methods of entering navigational data on cards for input into computer 17 p2956 A66-33447
Ocean platforms in North Atlantic to house radar and navigational aid for high-density commercial aircraft routes 18 p3131 A66-33559
Displays of navigation data showing horizontal situation against moving map, noting use of standard charts, provision for permanent record, etc 19 p3398 A66-36733
Visual displays to aid pilot to fly, monitor and control power plant, navigational and other equipment and communicate with ATC ground stations 20 p3508 A66-36996
Flight electronics equipment and techniques, discussing communications devices, radio navigation apparatus, all-weather landing and onboard navigation aids 21 p3709 A66-38653
Telescope field of view requirements for human recognition of navigation stars 22 p3946 A66-40860
- NAVIGATION AND GUIDANCE**
SA HOMING
Operation theory and functional elements of low cost Honeywell SIGN I Strapdown

Inertial Guidance and Navigation System 01 p0099 A66-10015

Gemini navigation problems considering launch vehicle standby guidance, post insertion orbit correction, catch-up maneuvers, rendezvous terminal guidance, orbit navigation and reentry guidance 02 p0254 A66-11315

Basic navigation concepts and techniques used by MIT Instrumentation Laboratory to design Apollo guidance and navigation system 02 p0254 A66-11316

LEM integrated guidance and control system consisting of digital computer, inertial measuring unit and various navigational sensors 02 p0255 A66-11628

Defining position fixing and navigation in air and space application 02 p0257 A66-12036

Helicopter navigation requirements for low altitude sea missions at beyond-horizon distance, from supporting ship or shore base 04 p0544 A66-14442

Mathematical formulation of lateral and longitudinal separation standards for subsonic and supersonic aircraft operation 07 p1066 A66-17680

Aircraft separation criteria applied to supersonic transport, describing standards and parameters of air traffic safety 07 p1066 A66-17682

Magnetic compensation methods which eliminate swinging aircraft 07 p1032 A66-17684

Navigation and flight instrument, discussing deficiencies of panel-mounted navigational command system 07 p1033 A66-17685

Atmospheric temperature of route of SST and influence on navigation, fuel management and operating economics 07 p0988 A66-17694

Inertial navigation and guidance systems applied to civil air transport from systems engineering viewpoint 07 p1067 A66-17695

Feasibility of using perfected gyromagnetic compass as heading reference for aircraft 07 p1033 A66-17698

Advanced airborne computer double system applied to fault detection, location, flight management and navigation 07 p1003 A66-17715

Vertime, navigation system for vertical plane control 07 p1069 A66-17716

Airborne computer-aided navigation system, utilizing letter printer and pictorial display 07 p1070 A66-17718

Position-attitude-true-heading-steering navigation system noting accuracy, reliability, maintenance, operational requirements and functional features 07 p1070 A66-17720

Compass performance improvement, discussing Sperry C-12 compass system accuracy, operational features, etc 07 p1033 A66-17721

International Air Transport Association, Technical Conference, Miami, April 1965, Volume 2 07 p1071 A66-17757

Flight trials of Bendix/Elliott Polar Path compass, discussing accuracy, stability, performance and weakness 07 p1033 A66-17758

MOA/BOAC Doppler/Loran A trials 1963-64, discussing navigational accuracy during transatlantic flights 07 p1072 A66-17759

Accuracy of navigation techniques for North Atlantic flights evaluated, based on Loran A and Doppler/GM compass automatic dead reckoning system 07 p1072 A66-17760

Operational requirements for improved worldwide navigational ability, initially applied in North Atlantic area 07 p1072 A66-17761

Air navigation operational requirements for effective air traffic control determined by ICAO Special NAT Meeting 07 p1077 A66-17803

Probability of clear lines-of-sight estimated from sunshine and cloud cover observation 08 p1248 A66-19386

Computer oriented manned orbiting laboratory with reduced crew duties, noting computer role in navigation problems, repairs, continuous ion thrust, etc 13 p2190 A66-25245

Vertime, navigation system for vertical plane control 13 p2125 A66-25863

Inertial navigation and guidance systems

applied to civil air transport from systems engineering viewpoint 13 p2125 A66-25865

Inertial navigation for commercial aviation economically justified by fuel economy due to reduced flight time 15 p2536 A66-29894

Inertial navigation application to space navigation and guidance systems, considering optimum design requirements 15 p2536 A66-29895

Mars spacecraft guidance and navigation requirements, noting entry trajectory, possible guidance errors and gravitational constant uncertainty [AIAA PAPER 66-532] 16 p2744 A66-31501

Instrument unit analysis for Saturn IB/V program, noting environmental, guidance and flight control, electrical systems and countdown procedure 19 p3354 A66-35469

Ring laser sensor parameters and characteristics, noting application to measurement of angular rate, mass flow, navigation and guidance 19 p3356 A66-35533

Antennas for electronic navigation, discussing aircraft and ground based equipment, radiation patterns, restrictions, etc 20 p3597 A66-37719

Horizon sensor data processing with compensation for statistical properties of errors, noting application of optimal filtering theory 21 p3766 A66-38882

Kalman filter divergence control, noting analytical and empirical modification methods 21 p3766 A66-38883

Computational limitations of onboard orbiting computers such as fixed point arithmetic, limited word length and solution techniques 21 p3766 A66-38884

Satellite application in geodetic surveys and navigation, noting measurement and tracking techniques 22 p3915 A66-40786

Stability, control, navigation, guidance and air traffic control of hypersonic vehicles noting inertial technology, flight planning and optimal control 24 p4235 A66-42239

Book on space navigation guidance and control covering manned lunar landing guidance, pulse torquing and inertial measurement units, computer utilization, control systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43122

Navigation, guidance and control system instrumentation for Apollo manned lunar landing mission [AGARDOGRAPH 105] 24 p4236 A66-43124

Optical measurements and navigation during midcourse and orbital phases of space mission, deriving linear equations for propagation of time dependent navigation errors [AGARDOGRAPH 105] 24 p4176 A66-43127

NAVIGATION INSTRUMENT

SA INERTIAL PLATFORM

Future sensing and information requirements and system ideas applicable to flight control 01 p0104 A66-10675

Navigation gyro design with respect to cost factors noting electrically suspended, gas bearing and other types 01 p0104 A66-10676

Microminiaturized LCT 822 P computer for general aerospace navigation 02 p0257 A66-12034

Navigator sighting accuracy in midcourse guidance system for manned space flight, using simulated vehicle mounted space sextant [AIAA PAPER 64-651] 03 p0390 A66-12740

Portable inertial navigator consisting of platform assembly, computer, power supply and mounting base that eliminates warm-up delays 04 p0544 A66-13925

Complex and hand-held instrumental devices for celestial navigation, noting Apollo scanner and sextant assembly 04 p0521 A66-14024

Electronic solid state goniometer for producing navigation information for transmission from VHF omnirange/VOR/ground station 05 p0645 A66-14582

Minimum field of view required for rapid accurate navigation star identification-acquisition established between 25 and 30 degrees 06 p0906 A66-16247

Ferranti navigation display used to monitor and update self-contained navigation system, consisting basically of compass card indicating true or magnetic heading 07 p1067 A66-17688

Airborne computer design free of

navigational functions performed by humans, using Doppler equipment 07 p1067 A66-17692

Integrated elements for aerial surveying and mapping 18 p3109 A66-33739

Monogram on metrological foundations and test methods of aircraft instruments, especially navigation instruments 18 p3111 A66-34011

Gemini VII star sightings analyzed, using handheld space sextant in Gemini VI, discussing effect of bias, timing, angle measurement and trajectory errors 21 p3767 A66-38893

Interstellar space navigation, considering problem of observables, navigation schemes and instrumentation 21 p3767 A66-38894

Navigational gyroscopes design principles, examining effects of friction in suspension system and other gyroscopic drift causes 22 p3917 A66-40018

NAVIGATION SATELLITE

SA TRANSIT SATELLITE

Navigation communication system using satellites to provide information automatically to ships and aircraft 07 p1077 A66-17800

Worldwide navigation system based on measurement of Doppler shift of stable signals transmitted from orbiting satellites, noting refraction, ship motion, air drag, timing, etc 10 p1554 A66-21512

Navy navigation satellite system developed by APL, using Doppler frequency measurements for navigation fix 15 p2536 A66-30001

Navigation satellites as monitoring device by integrating navigational hardware into communications satellite for ATC 16 p2743 A66-30667

Air traffic control and navigation system for North Atlantic and worldwide all-weather navigation satellite 17 p2956 A66-33224

NAVIGATION SYSTEM

SA DIGITAL NAVIGATION SYSTEM

Ion guidance and control - AIAA Conference, Minneapolis, August 1965 01 p0097 A66-10001

Locating low cost aircraft inertial navigation system being designed for compatibility with high performance tactical aircraft 01 p0099 A66-10010

Design philosophy for low cost inertial navigation system including subsystem characteristics 01 p0099 A66-10012

SGN-10 Inertial Navigator, pure inertial system with no damping or other external input designed for commercial aircraft 01 p0099 A66-10013

Self-contained orbital navigation system using Earth-horizon measurements in 14-16 mu carbon dioxide absorption band, using Kalman linear filter theory 01 p0100 A66-10024

Autonomous spacecraft navigation system with data processed by optimal filtering from star/local vertical observation 02 p0255 A66-11630

Navigation system for supersonic transport considering central digital computer with data processing systems with feedback 02 p0256 A66-11898

Verdan digital computer operation in aircraft noting problems of reliability 02 p0194 A66-11965

Time measurement as applied to aerial navigation noting atomic clocks, time transmission by ionospheric propagation of electromagnetic radiation, etc 02 p0257 A66-12031

Electronic systems in marine, air and space transportation noting radar, ultrasonic devices, computer techniques, etc 02 p0206 A66-12033

Loran C system and technique of ground stations for giving ships fixes 02 p0257 A66-12037

High reliability hybrid navigation system for transport aircraft using integrating subsystem and external position fixing subsystem 02 p0257 A66-12038

Satellite functions in air traffic control systems noting position determination, aircraft surveillance, etc 02 p0258 A66-12042

Loran C navigational system considering sky waves and future of Loran D system 02 p0258 A66-12043

Errors in Doppler system determination of

ground speed and improvement trends in wider application 02 p0258 A66-12044

Loran C navigation system using pulsed hyperbolic radio signals, noting factors influencing range and accuracy 02 p0258 A66-12045

Dectra system with increased power and ambiguity reduction evaluated for long range navigation in North Atlantic 02 p0258 A66-12046

Omega hyperbolic radio navigation system for aircraft using eight broadcasting stations 02 p0259 A66-12048

Worldwide navigation system using existing ground and airborne equipment and limited number of navigation satellites 02 p0259 A66-12054

Modifying ground station deployment, transmitted frequencies and bandwidths for Dectra 2 Navigation system in North Atlantic area 02 p0260 A66-12057

Satellite navigation systems for marine and aircraft industry global, all-weather position determination and communications noting range measurement, range rate, NASA techniques, etc 02 p0260 A66-12237

International Satellite Bibliography including orbital theory, lunar-satellite motion, artificial asteroids, geomagnetic field, geodesy, navigation, etc 03 p0424 A66-12457

Increased aircraft close-support mission effectiveness through optimized selection of avionics systems 04 p0458 A66-13685

Principle of recursive navigation 06 p0906 A66-15912

Modification of Dectra position fixing service in North Atlantic 07 p1063 A66-17446

Relationship between self-contained systems and fixing aids in light of recent subsonic jet and Doppler-system experience 07 p1066 A66-17679

Grid navigation method, employing Mercator chart, is suitable for high latitudes and supersonic aircraft 07 p1066 A66-17683

Supersonic commercial air transport, evaluating communication, navigation and identification systems 07 p1066 A66-17686

Navigation equipment for civil use based on miniature inertial platform, analog and digital computers, automatic chart display, etc 07 p1067 A66-17689

Automatic dynamic chart display, integrating navigation system as well as situation display and link with computer, for monitoring and updating self-contained system 07 p1067 A66-17690

Mechanization of navigational functions for supersonic aircraft within central airborne digital computer, comparing military experience with commercial requirements 07 p1067 A66-17693

Route structure and navigation system error over North Atlantic and advantages of SST inertial navigation system 07 p1068 A66-17701

Building blocks of pictorial navigation display for projection of servo-driven microfilm map onto rear projection screen 07 p1069 A66-17707

Flight testing of Phillips vertical reference inertial navigator on DC-8 07 p1069 A66-17708

Doppler-inertial system combination applied to avoid deterioration of navigational accuracy with time 07 p1070 A66-17719

Frequency pattern for transmission from ground stations providing worldwide unambiguous navigation aid for civil aircraft, noting airborne equipment 07 p1073 A66-17769

Flight tests of navigation systems including hyperbolic system, Doppler system, radio altimeter testing, deviation in gyromagnetic compasses, etc 07 p1073 A66-17770

Standardization of air navigation techniques noting equipment standardization, aircraft self-contained capability, lateral standard error, radar monitoring, etc 07 p1073 A66-17771

Self-contained and ground-based aids to integrated air navigation system noting costs, crew, display, etc, to be used in SST at VLF 07 p1074 A66-17772

Receiver for processing lane identification signals for Dectra navigation system and relation to tracking accuracy and probability

of error 07 p1074 A66-17773

Self-contained Doppler Navigation System performance over three-year operation 07 p1074 A66-17776

Long-range navigation system control/display concepts and automation for airline navigation 07 p1074 A66-17779

Operational factors in automated navigational computations, with consideration of self-contained aids, ground-based systems and astrosatellite navigation 07 p1075 A66-17780

Subsonic and supersonic aircraft navigational systems requirements, discussing pictorial presentation and effect on command function 07 p1075 A66-17788

Evaluation trials of Doppler-based primary navigation system as short-distance navigational aid 07 p1077 A66-17801

Design status of Concorde navigation system, discussing basic system, interconnection with autopilot and flight director system and optional equipment 07 p1078 A66-17805

C-141 aircraft automatic navigation system, self-contained and with redundant modes of operation, ensures all-weather mission reliability 07 p1078 A66-17806

Automatic star trackers for long range navigation, discussing associated instrumentation methods 07 p1078 A66-17808

Onboard lunar orbital navigation system simulation, using minimum variance estimation 08 p1249 A66-18818

Error analysis in supersonic transport navigation system 08 p1249 A66-19057

IEEE aerospace and navigational electronics conference at Baltimore in October 1965 08 p1250 A66-19487

Dynamic Navigation System /Dynav/ for providing aircraft velocity and position-fixing information from VLF Doppler range rates 08 p1252 A66-19507

Omega location and satellite reporting for worldwide observation and navigation systems 08 p1252 A66-19508

Autonomous navigation system for space flight in neighborhood of planets 08 p1254 A66-19677

Navigation and communication systems using satellites and ground stations economically, by digital techniques 09 p1400 A66-20425

Concorde navigation system noting inertial platform, digital computer using integrated circuits and microminiaturization 09 p1401 A66-20685

Navigational inertial system dynamic property analysis at high flight speeds, using hodographic characteristic equation for longitudinal and lateral aircraft motion error determination 09 p1401 A66-20913

Unmanned and manned satellites for communication and terrestrial navigation, noting future plans of NASA 10 p1496 A66-21534

Operation and structural components of inertial navigation system, noting accelerometers, gyroscopic platform stabilizers, error effect, etc 13 p2123 A66-25138

Doppler automatic air navigation systems, discussing basic principles, operational limitations, cost/payload factor and future development 13 p2123 A66-25200

Digital airborne computer for navigation problem solutions including inertial navigation, flight path, time-to-go and arrival time, etc 13 p2124 A66-25839

Automatic star trackers for long-range navigation, discussing associated instrumentation methods 13 p2125 A66-25867

Inertial guidance systems using three-gimbal, four-gimbal and ball-type platforms, operative control of aircraft, ships and ballistic missiles 13 p2125 A66-26140

Compass system on VC10 provides magnetic heading reference, or alternately, inertial reference for grid navigation 13 p2125 A66-26283

Orion Inertial Navigation System, detailing accelerometers, gyroscopes, computers, components, maintenance, operation, etc 13 p2125 A66-26575

Book on navigation principles including instrumentation, control, speed, radio, radar, sonar, position finding, route, etc 14 p2328 A66-26874

LF navigation and secondary surveillance radar /SSR/ used in commercial helicopters of New York airways 14 p2223 A66-27299

Statistical optimization of rate-composite inertial navigation system based on Phillips theory of servo systems 14 p2328 A66-27364

SST navigation systems as affected by shortened computation time and sensor accuracy 14 p2329 A66-28232

Inertial navigation systems, examining basic principles of operation and possible time-dependent errors 15 p2535 A66-29892

Error determination in autonomous determination of coordinates, obtaining solution for kinematic equations of navigation in near-polar region 16 p2744 A66-31146

Radio navigation including ADF, VOR, Tacan, information theory, VLF propagation, multimode radar, computers, etc, and their possible combination 17 p2950 A66-31983

Sperry Navigator Mk II navigation system for air and ground vehicle movement in conditions of zero or near zero visibility 17 p2953 A66-33207

Airport operation under low visibility conditions, discussing use of pictorial display to aid in surface movement 17 p2953 A66-33208

Loran C receiving equipment using micro-circuits, noting error 17 p2955 A66-33220

Navigational display types and requirements for civil aircraft 17 p2956 A66-33223

Peaceful uses of automation in outer space - Symposium, International Federation of Automatic Control, Stavanger, Norway, June 1965 18 p3240 A66-33845

Navigation satellite system providing precise position information of aircraft, noting flight tests 19 p3396 A66-35516

Inertial navigation technique based on least squares criteria of optimality with filter providing estimates of system errors 19 p3396 A66-35517

Analytic thermal compensation technique eliminating thermal stabilization time, applied to inertial navigation systems operating in military environment 19 p3397 A66-35518

Optimal and suboptimal design of vehicular control and proportional navigation system based on Pontryagin maximum principle 19 p3397 A66-35882

Optimum digital filters combining position and velocity information under approximate distortionless constraint for LF navigation 20 p3596 A66-37224

Symbolic programming digital computer techniques, hardware interfacing and system errors in simulation of lunar midcourse guidance and navigation systems 20 p3543 A66-37250

Autonomous navigation system for space flight in neighborhood of planets 20 p3597 A66-37269

Apollo inertial navigation system estimation, using statistical filtering to reduce computation 21 p3767 A66-38886

Electronic navigation system for marine applications, using communications satellite as data relay link 22 p3945 A66-40324

Satellite functions in air traffic control systems noting position determination, aircraft surveillance, etc 22 p3945 A66-40326

DIVIC /digital variable increment computer/ for solving hyperbolic-navigation problems, examining computational algorithms 22 p3945 A66-40335

NEAR INFRARED

Trap dominated conductivity changes and optical absorption phenomena in near IR in crystalline beta-rhombohedral boron 10 p1580 A66-21723

Image converter tube spectrophotometry of zonal variation of methane absorption bands on Jovian disk in near IR region 12 p1944 A66-23504

Solar near-IR scattering by sunlit terrestrial clouds as affected by cloud type, altitude and scattering angle 13 p2073 A66-25989

Mars disk intensity, noting spectrophotometric measurements in search for limonite near IR spectral features 17 p2997 A66-31923

Anomalous brightness of post-twilight

- evening sky in near IR, considering zodiacal light 17 p2920 A66-32998
- Image converter tube spectrophotometry of zonal variation of methane absorption bands on Jovian disk in near IR region 20 p3646 A66-37017

- Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 01 p0043 A66-10764
- Electrical and electroluminescent properties of gallium arsenide diodes with high resistivity region flanked by low resistivity R and N regions 01 p0043 A66-10896
- Book on active network synthesis covering linear active and nonreciprocal circuits, realizability conditions and negative resistance amplifiers 03 p0348 A66-12372
- Negative resistance in xenon planar triode due to Ramsauer effect 03 p0343 A66-12969
- Inductance into integrated circuit, noting techniques involving RC networks 04 p0503 A66-13765
- Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 04 p0568 A66-14351
- Qualitative interpretation of negative resistance by impact ionization of deep level impurities noting temperature, impurity concentration and energy level 05 p0735 A66-14964
- Negative impedance converters as RC active ladder units 05 p0658 A66-15123
- Negative resistance of dynatron type and oscillations in reverse current range of cesium thermionic energy converter 05 p0620 A66-15572
- Negative resistance due to avalanche multiplication in p-n junction 06 p0850 A66-16439
- Semiconductor with dependence of drift velocity on electric field and containing region of negative differential mobility 06 p0850 A66-16444
- Current oscillations in nonuniformly illuminated cadmium sulfide, examining effects of variation in parameters 06 p0925 A66-16664
- Light activated negative resistance effect, discussing VHF signal generation via semiconductor photocurrent modulation 06 p0892 A66-16680
- Hot electron transfer from light mass central valley to surrounding heavy-mass satellite valleys in n-type gallium arsenide, indium phosphide and cadmium telluride analysis based on Boltzmann equation 06 p0929 A66-17035
- Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 06 p0860 A66-17197
- YIG resonator tuning for low noise parametric amplifier 07 p1006 A66-17504
- Active network synthesis, reviewing methods of analysis for linear lumped constant parameter networks 07 p1015 A66-17755
- Volt-ampere characteristics of silicon carbide crystals with negative differential resistance 07 p1105 A66-18375
- Symmetrical negative resistance in valence-exchange reaction in semiconductor p-x-p-type glass junctions 09 p1430 A66-20847
- Transistorized two-ports circuit realizing negative impedance converters with DC coupling throughout 10 p1517 A66-21654
- Two-terminal current-controlled negative resistance devices examined, using equivalent circuit, noting stability criterion, frequency response, etc 10 p1513 A66-21860
- Growth and propagation of infinitesimal space charge waves under differential negative resistance and inhibition of dipole waves and domains in gallium arsenide, estimating thermoelectric effects 10 p1584 A66-22069
- Gunn effect in polar semiconductors described by transferred electron model that predicts bulk differential negative resistance and domain formation 10 p1585 A66-22075
- Current-controlled negative-resistance effect between nonsymmetrical ohmic contacts on opposite side of p-type indium antimonide 10 p1585 A66-22081
- One-dimensional small signal analysis of negative resistance in p-n junctions under avalanche breakdown conditions 10 p1586 A66-22083
- Small-signal impedance of space-charge region of p-n junctions under avalanche breakdown conditions, using realistic physical assumptions 10 p1586 A66-22084
- One-sided avalanche injection in n-p-p diodes as cause of negative resistance for carrier concentrations smaller than impurity concentration 10 p1515 A66-22085
- Electronic tuning effects through DC avalanche current variation in negative-resistance diode 10 p1515 A66-22088
- Model technique calculation of electrostatic domains in two-valley /GaAs/ semiconductors 10 p1586 A66-22092
- Current saturation from negative resistance and domain trapping in n-type gallium arsenide crystal 10 p1586 A66-22096
- Negative-resistance avalanche diode with small space-charge layer width in small-signal admittance measurements 10 p1516 A66-22101
- Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 11 p1661 A66-22275
- Norator and nullator effects on nodal admittance matrix 11 p1652 A66-22385
- N-triode, semiconductor device with negative resistance used as active element in circuits with common emitter and common base 11 p1670 A66-23227
- Nondestructive breakdown mechanism in silicon planar transistors between collector and base with emitter open-circuited, noting negative resistance region 12 p1837 A66-24308
- Hall reversal at negative resistance in forward biased p-Ge point contact diode 13 p2029 A66-25192
- Negative resistance in cadmium sulfide single crystal 13 p2162 A66-25198
- DC behavior of negative-impedance circuit without internal bias 13 p2045 A66-25201
- Injection and extraction of hot electrons in n-n heterojunctions with rapid Maxwellization of electron gas, negative resistance and semiconductor characteristics 13 p2166 A66-25920
- Two ohmic electrodes or one ohmic and one barrier electrode for current-voltage stable-negative characteristic of cadmium sulfide, noting IR radiation effects 14 p2368 A66-28249
- Feedback effect on current voltage characteristic of device with negative feedback and reactivity of device in negative resistance region 15 p2464 A66-29121
- Negative-impedance converter design and operation 15 p2474 A66-29763
- Thermal instability causes negative-resistance region in nonohmic point contact conduction in semimetals 16 p2769 A66-30155
- Active network synthesis, discussing parametric amplifiers and transistor circuits, noting gain and phase stability 16 p2668 A66-30519
- Current oscillations, negative resistance and high field domain transition in dark conductive cadmium sulfide crystals 17 p2975 A66-31940
- Dipole phenomena in n-type GaAs caused by field perturbations, showing conditions for high and low field nucleation 17 p2983 A66-33106
- Negative resistance in forward direction in silicon p-i-n diode 17 p2987 A66-33318
- Gate controlled threshold voltage of silicon p-i-n diode having negative resistance phenomenon in forward direction 17 p2987 A66-33323
- Microwave limiter device, based on impact ionization of deep levels in silicon 17 p2897 A66-33461
- New type of negative resistance in barrier tunneling 18 p3156 A66-34238
- Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 19 p3315 A66-35555
- Stable domain propagation for case when electrons have field-independent diffusion coefficient and follow arbitrary static velocity field characteristic exhibiting negative resistivity 19 p3446 A66-36371
- Single-stage negative resistance reflection amplifier theory based on circuit models for frequency dependent band-limited circulators and broadband negative resistance device 20 p3524 A66-37115
- Space-charge-limited current voltage-dependent behavior in gallium arsenide 20 p3616 A66-37457
- Lampert double injection theory for CdS

diodes with negative resistance I-V characteristic curve 20 p3535 A66-38435
 Negative resistance phenomena in metal oxide semiconductor /MOS/ diodes made from degenerate silicon substrate observed in course of investigating electrical characteristics 21 p3712 A66-39223
 Current density, electron mobility, magnetoresistance, negative resistance and impact-ionization-produced solid state magnetoplasma oscillations in InSb single crystal semiconductor at high electric and magnetic fields 21 p3805 A66-39568
 Negative resistance in cathode current and grid and plate current of tube in which electrodes are situated behind cathode 22 p3871 A66-39658
 Negative resistance devices using multiple number of tunnel diodes or varactors, examining stability and sideband frequency 22 p3875 A66-40064

NEODYMIUM

Pentacarbocyanine compound used to reduce monopulse duration in neodymium laser 01 p0080 A66-10262
 Laser oscillation increase in efficiency in neodymium doped glass produced through energy transfer 01 p0081 A66-10352
 Range formula calculation of neodymium ion concentration in two samples of CdS crystals after bombardment at 200 keV Nd ion energies 01 p0126 A66-10970
 Internal bubble formation and cracking in rods of Q-switched ruby and Nd-glass lasers caused by laser light, and in case of Nd-glass rods, by platinum inclusions in glass 03 p0378 A66-13002
 Polarization of light from glass laser doped with two percent positive trivalent neodymium measured with time resolution of less than microsecond 03 p0378 A66-13006
 Pentacarbocyanine compound used to reduce monopulse duration in neodymium laser 03 p0379 A66-13307
 Electro-optical shutter for Q-factor modulation in neodymium glass laser 04 p0529 A66-13431
 Regular periodic spiking in output of pulsed neodymium doped borate glass laser at pumping levels slightly above threshold 06 p0892 A66-16672
 Line narrowing of neodymium glass laser with reflection 07 p1041 A66-17291
 Q-switched optical maser synchronization, discussing experimental design, setup and performance 07 p1041 A66-17297
 Laser with neodymium-glass Q-factor modulation 08 p1233 A66-18970
 Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion 08 p1234 A66-19669
 Continuous optical quantum generator operating at room temperature on calcium tungstate doped with neodymium ions 09 p1386 A66-19956
 Neodymium doped glass laser found to oscillate in conventional random pulsating manner under mode-locked conditions 10 p1541 A66-21251
 Threshold parameters and spectral composition of radiation of neodymium-glass laser in dispersion 10 p1543 A66-21836
 Properties of production and decay of neodymium 141, examining nuclear reaction /n, 2n/ 10 p1558 A66-21962
 Dependence of beat frequency of neodymium laser axial modes on distance between mirrors and neodymium rod position within resonator 12 p1891 A66-24881
 Threshold data for ruby and neodymium laser pulse-induced breakdown in Xe, Ar, Kr, Ne, He, oxygen, nitrogen, air and carbon dioxide 13 p2100 A66-26191
 Neodymium-doped yttrium-aluminum garnet crystal laser oscillator as regenerative amplifier of noise 13 p2103 A66-26212
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 14 p2307 A66-27187
 Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 14 p2308 A66-27595
 Pulsed nuclear resonance experiment on neodymium doped calcium fluoride, determining relaxation time 14 p2336 A66-27638

Experimental observation of regular spiking in neodymium doped glass laser rod attributed to simultaneous oscillation of many transverse and longitudinal modes 15 p2513 A66-28727
 Giant pulses from neodymium glass laser pumped by giant pulses from ruby laser 16 p2719 A66-31354
 Low threshold neodymium glass laser oscillator with high repetition 17 p2937 A66-33325
 Stark components of excited states of trivalent neodymium ion in yttrium aluminum garnet and yttrium gallium garnet host lattices 18 p3157 A66-34513
 Energy level and crystal-field splitting of neodymium ion in yttrium oxide 18 p3157 A66-34514
 Second harmonic frequency generation obtained in process of optical mixing of collinear neodymium laser beams in potassium dihydrogen phosphate 20 p3578 A66-37550
 Pulsed-mode gain characteristics in neodymium-doped silicate glass laser experimentally related to giant-pulse laser energy output 20 p3582 A66-38396
 Trivalent neodymium in selenium oxychloride, inorganic liquid laser without limitations of europium chelates and matching in threshold and output neodymium-doped crystals 21 p3747 A66-39110
 Performance characteristics of room temperature liquid laser, using trivalent ion neodymium-doped selenium oxychloride 21 p3747 A66-39111
 Optical spectra of ultrashort optical pulses generated by mode-locked glass-doped neodymium lasers, considering saturable absorber cell placed parallel to Fabry-Perot reflector 21 p3747 A66-39115
 Neodymium laser oscillator using time-variable reflector, noting loading and dumping of optical cavity with nearly maximum amount of energy 21 p3747 A66-39118
 Stimulated emission, absorption spectra and luminescence of neodymium-activated YAG crystals in pulsed laser 21 p3748 A66-39306
 Neodymium doped glass laser using saturable liquid Q-switch 23 p4075 A66-41033
 Dependence of beat frequency of neodymium laser axial modes on distance between mirrors and neodymium rod position within resonator 23 p4076 A66-41088
 Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 24 p4224 A66-42729
 Radiation of giant pulses of superluminescence by highly excited active medium of Nd glass with rapid cut-in of amplification 24 p4224 A66-42755
 Glass lasers, comparing glass with crystals as hosts for laser ions, considering neodymium laser properties 24 p4224 A66-42800
 Semiconductor GaAs quantum generator with two-photon absorption of neodymium laser emission 24 p4226 A66-43085

NEODYMIUM COMPOUND

Spatial distribution of hollow-cone shaped emission of modes which are totally reflected in neodymium-glass lasers 04 p0532 A66-14291
 Giant pulse formation theory, measuring shape and duration of neodymium glass laser pulses for various values of inverse population 20 p3577 A66-37367

NEON

Ambipolar diffusion and electron-ion recombination coefficients dependence on electron temperature in afterglow of neon plasmas 04 p0554 A66-14294
 Redetermination of isotopic composition of atmospheric neon resulting from measurements of neon in meteorites 04 p0517 A66-14323
 Radiogenic, spallogenic and primordial noble gases in stone meteorites, determining helium and neon content 05 p0756 A66-14506
 K-shell photon absorption spectrum of neon gas 06 p0890 A66-16386
 Wavelength of 3s2-2p4 transition of neon measured, using helium-neon laser 06 p0890 A66-16387
 Magnetic field effect on electron

temperature, number of ionization events and potential gradient in argon and neon HF discharge 08 p1264 A66-19186
 Coherent amplification coefficients of neon lines in helium-neon mixture 08 p1234 A66-19310
 Excitation of neon levels in hollow-cathode discharge in neon-hydrogen mixture as result possibly from recombination processes involving dissociation and triple collisions 10 p1558 A66-22023
 Conductance and susceptance of neon plasma measured by Q-meter method in frequency range from 0.5 to 25 mc 11 p1745 A66-22587
 Electron-atom collision studied, using helium-neon laser to obtain energy transitions between excited states 13 p2137 A66-25106
 Output power of 6328 angstrom He-Ne gas laser as function of laser gain, cavity loss and output coupling 13 p2091 A66-25651
 Helium-neon gas laser used to study pressure effect on line shape of 2s-2p optical transitions of neon excited states 13 p2100 A66-26198
 Helium-neon gas laser used to determine electron density variation, spatial and temporal, in afterglow of Z-pinch in H at 100 mtorr 13 p2104 A66-26239
 Differential scattering of ionized helium on neon and argon and ionized argon on argon measured at various relative energies and scattering angles 13 p2135 A66-26269
 Neon level broadening under effect of laser radiation studied by observing Hanle effect on fluorescent light 15 p2517 A66-29640
 Electron-atom collision studied, using helium-neon laser to obtain energy transitions between excited states 16 p2758 A66-30285
 Excitation of neon levels in hollow-cathode discharge in neon-hydrogen mixture as result possibly from recombination processes involving dissociation and triple collisions 16 p2753 A66-30842
 High-power molecular laser based on vibrational-rotational energy level, noting carbon dioxide-neon-helium laser design 17 p2936 A66-33248
 Measuring amplification of coherent optical radiation in neon-helium filled tube 17 p2938 A66-33512
 Excitation of 3s sub 2 neon level by metastable helium atoms during He-Ne discharge 17 p2938 A66-33513
 Low temperature liquid-vapor equilibrium in neon-oxygen system at pressures up to 5000 psi from 63 to 152 degrees K 20 p3601 A66-37088
 Nonreciprocal effects associated with excitation current observed in DC-excited He-Ne ring laser, noting coupling phenomena between right and left waves 20 p3577 A66-37408
 Magnitude of Hanle effect of neon atoms emitted by laser dependence on excitation discharge intensity explained by multiple coherent diffusion at metastable level 20 p3577 A66-37409
 Schottky diffusion theory applied to calculation of coefficients of homogeneous positive column in neon, using Druyvesteyn electron-energy distribution 20 p3608 A66-37462
 Shock-tube study of ionization process in neon and coupling with axially symmetric magnetic field 22 p3955 A66-40094
 Intracavity interferometer laser measurements of power gain and output in single-frequency Ar laser and 6328-angstrom Ne isotope shift 22 p3932 A66-40110
 Precise measurement of excited-state lifetimes for radiative and collision-induced relaxation in fine structure levels of atomic neon, noting optical transitions 23 p4098 A66-41361
 Measuring amplification of coherent optical radiation in neon-helium filled tube 24 p4219 A66-42125
 Excitation of 3S sub 2 neon level by metastable helium atoms during He-Ne discharge 24 p4219 A66-42126

NEPHANALYSIS

Suggested procedures for operationally integrating meteorological satellite /neph mosaic/ and conventional data for

- extratropical regions 11 p1731 A66-23383
Vertical motion of moisture fields and saturation deficit determination from nephanalysis of Tiros cloud photographs for operational quantitative precipitation forecasting /QPF/ 22 p3943 A66-40054
Digital computer processing of Tiros, Nimbus and Essa vidicon cloud pictures for machine nephanalyses, discussing rectification orbital mosaics and calibration effects for future Essa flights 22 p3943 A66-40055
- NERNST GENERATOR**
Cross-sectional geometry of Nernst-Ettingshausen devices optimized for rectangular geometry and for Norwood spiral screw thread configuration 02 p0270 A66-11430
Influence of microinhomogeneities under magnetic field on Nernst effect in InSb 04 p0568 A66-14345
Influence of microinhomogeneities under magnetic field on Nernst effect in InSb 14 p2367 A66-28241
- NERNST HEAT THEOREM**
Random nonuniformities effect on measurements of thermal emf and Nernst coefficient in strong magnetic field 09 p1412 A66-19982
- NERVA**

Measuring equivalent circuit parameters of tunnel diode by method which forward-biased junction to valley voltage point 02 p0195 A66-1368
Equivalent networks for transversely vibrating bars under various end conditions 03 p0437 A66-12820
Nonlinear properties of complete tunnel diode equivalent circuit emphasizing conductance, susceptance and oscillatory characteristics of barrier layer 03 p0346 A66-13317
Thermal resistance and capacitance of semiconductor device components determined, using thermal equivalent circuit for plotting cooling curves 04 p0492 A66-13491
Equivalent circuits and characteristics of RC amplifier in which source of signal to be amplified, tunnel diode and load are connected in parallel 04 p0497 A66-13918
Transistor equivalent circuit parameters by inverse Laplace transform of time behavior 04 p0497 A66-13966
Frequency characteristics of single coordinate inversion photodiode in presence of low signal level, using equivalent circuit 04 p0499 A66-14056
Simple derivation of small-signal equivalent circuit for arbitrarily doped 4-terminal field effect transistors 04 p0500 A66-14098
Dielectric and metallic rod equivalent circuit, examining resonant frequency change upon placement in waveguide, using perturbation techniques 05 p0649 A66-15120
Interdigital band pass filters and related coupled structures, deriving exact equivalent circuits from impedance matrices 06 p0845 A66-16085
Thermal noise effects in field effect transistors at LF 06 p0850 A66-16440
Equivalent h parameters for n transistors connected in cascade, establishing effect of circuit impedances 06 p0854 A66-16687
HF behavior of transistors, using Giacoletto equivalent circuit 06 p0856 A66-16918
Varactor evaluation using series resonance and determination of impedance locus of coaxially mounted varactors 07 p1008 A66-17513
Equivalent circuit and DC characteristics derivation for MOS transistor in common-gate electrode arrangement 08 p1188 A66-18656
Equivalent circuit and gain in single lumped approximation for MOS field effect transistor 08 p1189 A66-18660
Distortions of linear system reactions with change in amplitude-frequency and phase-frequency characteristics 08 p1183 A66-19102
LF capacitive amplifier taking into account nonlinear-capacitance component which varies with twice heterodyne frequency, proposing equivalent circuit 08 p1193 A66-19108
Equivalent circuit diagram determination of change in quadrupole parameters in transistor due to current-induced heating 08 p1198 A66-19729
Exponential resonators in filters and matching networks, determining reactance or susceptance frequency behavior by plotting curves with analog computer 11 p1661 A66-22382
Noise characteristics, sources and bandwidths of active devices and circuits including transistors, masers, parametric amplifiers, etc, noting causes of noise 12 p1830 A66-23662
Equivalent circuit for cycloconverter valid for AC and DC outputs, noting data on voltage drops 12 p1804 A66-24659
Nonlinear properties of complete tunnel diode equivalent circuit emphasizing conductance, susceptance and oscillatory characteristics of barrier layer 14 p2260 A66-28290
Frequency characteristics of single coordinate inversion photodiode in presence of low signal level, using equivalent circuit 17 p2885 A66-32222
Radiated fields for plasma external to dielectric coating surrounding biconical antenna, equivalent circuit developed for terminating impedance 19 p3305 A66-36422
Equivalent circuits and characteristics of RC amplifier in which source of signal to be amplified, tunnel diode and load are connected in parallel 20 p3532 A66-37876
- NETWORK ANALYSIS**
Network theory - Conference, Cranfield, England, September 1965 07 p1014 A66-17744
Finite linear time-invariant passive reciprocal electrical networks including Kirchhoff generalized constraints 07 p1014 A66-17745
Properties, symmetries, code matrices and Euler paths for linear graphs used as models for physical systems, considering planar triply connected graphs 07 p1057 A66-17747
Connected nonseparable network with edges and vertices in which n-independent node pairs are chosen, noting admittance matrix 07 p1015 A66-17748
Symmetric conference matrices applied to conference telephony where lossless n-port operating between resistive terminations divides incoming power 07 p1057 A66-17749
Circuit network in designing low pass filters with minimum attenuation requirements in stopbands and optimum transient behavior, using Schussler technique and iterative process 07 p1008 A66-17751
Topological analysis of active networks and multiterminal elements, employing primary graph with nondiagonal matrices 07 p1015 A66-17753
Closed loop gain of multiple feedback circuit determined, using return-difference matrix analysis 07 p1015 A66-17754
Ferrite-based microelements as quasi-resonant RC circuits 08 p1191 A66-18914
Two-port network representations derived for general linear magnetic and electric field transducers, showing energy conversion leading to nonlinear relationships and applications to DC motor 08 p1224 A66-19298
Schussler-elliptic low pass filters, discussing solution of approximation problem for low pass filters with good transient response 08 p1198 A66-19748
Balanced and ordinary inductive-parametron circuit 09 p1353 A66-20445
Norator and nullator effects on nodal admittance matrix 11 p1652 A66-22385
Circuit of two-state pentode resonance amplifier with electronic passband control and slightly varying amplification coefficient 11 p1667 A66-22788
Linear quadrupoles, wave and operating parameters, transfer loss and phase coefficient for mismatched network 11 p1677 A66-23063
Backward-current amplification for transistors and effect on elements of Giacoletto equivalent circuit 11 p1669 A66-23102
Matrix method for partial analysis of circuits, yielding algorithm for program for automatic digital computer 12 p1828 A66-24299
Microelectronic composite lumped-distributed transmission systems, two-port networks, voltage transfer function, root locus construction, pole and zero locations, etc 12 p1856 A66-24657
Lumped-element circuit model used to accurately and effectively analyze transients in thin film RC microcircuits 12 p1843 A66-24724
Cesaro summability and Fourier transform for evaluating divergent series and integrals occurring in circuit design and analysis 12 p1856 A66-24730

Step-recovery diode in shunt configuration as frequency multiplier 13 p2030 A66-25215

Notions of one-and two-dimensional topology in network theory as applied to Kirchhoff laws and network duality 13 p2050 A66-26058

Approximate analytical solutions for distributed parameter networks with parameters as functions of spatial variable, using differential equation that reduces boundary value problem to Sturm-Liouville system 13 p2120 A66-26068

Distributional study of real frequency behavior of passive systems 13 p2055 A66-26094

Computer program with data compilation, using equivalent circuit for p-i-n diode, employed in design of coaxial wideband variable attenuator 14 p2246 A66-26833

Equivalent circuit for centipede coupled-cavity waveguide represents both passbands and is accurate within few percent 14 p2258 A66-27954

Boundary between applicability ranges of network and steepest descent methods in equation integration of Timoshenko theory in analysis of plate deformation 15 p2608 A66-28962

Correlation analysis technique for stochastic processes in RLCM circuits with random parameters in case of stochastic input functions 15 p2469 A66-29055

State variable selection for nonlinear network differential equations, uniqueness and existence theorems 15 p2471 A66-29324

Existence theorem for nonlinear ODE system with continuous monotonic differential operators over Hilbert space and application to nonlinear network analysis 15 p2528 A66-29370

Structural analysis by network theory, matrix formulation and computer programs 15 p2614 A66-29613

Power dissipation in input and output matching networks of varactor doubler for calculating true input and output powers from semiconductor bulk material, noting charge storage occurrence 15 p2466 A66-29674

Equivalent circuit analysis of switching time of dynistor with active load 15 p2468 A66-29919

Network analysis and amplitude frequency response characteristic of operational amplifier for DC analog computer 16 p2659 A66-30517

Derivation of expansion theorem of circuit algebra 16 p2670 A66-31032

Slot couplings of rectangular single-mode waveguides analyzed by equivalent circuit and concentrated parameter methods 17 p2879 A66-31856

Circuit theory - Midwest Symposium, Oklahoma State University, May 1966 17 p2899 A66-32049

Generalized star-mesh transformation in network theory obtained using fact that Kirchhoff rules, Maxwell rules, Mason rules and Coates formulas can be obtained from each other 17 p2899 A66-32053

Graph-theoretic concepts for relating Reed segs and their duals to two classes of subgraphs 17 p2900 A66-32054

Steady state circuit analysis of basic linear parametric amplifier using successive approximation 17 p2880 A66-32058

Variable-parameter network analysis using z-transformation 17 p2900 A66-32199

Bridge, transmission and microwave coaxial line measurement methods for evaluating high cut-off frequency varactor diode equivalent circuit 17 p2892 A66-32915

Accuracy analysis method for radioelectronic circuits, noting statistical-test method 17 p2897 A66-33517

Bridge, transmission and microwave coaxial line measurement methods for evaluating high cut-off frequency varactor diode equivalent circuit 18 p3074 A66-33563

Recursion method study of two thyristor circuits described by first-order recursion relations, considering stability and transient features 18 p3091 A66-34398

CRT oscilloscope tracer device for relay units and relay parameter influence on operational characteristics 19 p3358 A66-35835

Topological formulae for sensitivity

coefficients of three-terminal-pair-network functions derived by dual procedure in terms of impedance 19 p3328 A66-36020

Horowitz root-locus compensation method extended to analysis and design of high-gain linear control systems with variable coefficients 19 p3338 A66-36741

Circuit of two-state pentode resonance amplifier with electronic passband control and slightly varying amplification coefficient 20 p3525 A66-37128

Group theory of invariance of finite linear state-variable transformations generating new linear dynamic system and application to electric network 20 p3539 A66-38147

Digital programming and topological optimal filter design incorporating nonideal lossy elements 20 p3533 A66-38281

Perturbation theory analyses of network matrix eigenvectors and natural frequencies 20 p3539 A66-38282

Sensitivity function in variability analysis, noting relation concerning sensitivity sums and application to electric network 21 p3745 A66-39342

Book on boundary value problems and partial differential equations for electric circuits and other engineering problems 22 p3938 A66-39703

Frequency variations of pi-equivalent circuit parameters of junction transistor, noting expansion of hyperbolic function into Taylor series 22 p3873 A66-39815

Inverse transfer function of pulse-forming network for binary code transmission with small intersymbol interference in time domain and narrow bandwidth in frequency domain 22 p3866 A66-40182

Reflecting mirrors in laser oscillators treated as reflecting elements and transducers for coupling power from oscillator to external space 22 p3932 A66-40184

Numerical analysis of transient behavior of nonlinear transistor circuit equations 22 p3885 A66-40863

Cascaded hybrid rings as idealized model of wideband dispersive system in stripline 23 p4035 A66-41026

Propagation of nervous impulse down modulated and unmodulated fibers, obtaining expression involving ionic conductances 23 p4025 A66-41045

Three amplifier and oscillator configurations analyzed for controlling location of dominant poles of feedback circuit within possible realizable region 23 p4050 A66-41612

NETWORK SYNTHESIS

Phase shifter which includes ring potentiometer and passive network, noting possible frequency division application 01 p0043 A66-10878

Intermediate text on fields and waves in communication electronics covering basic equations, oscillating systems, transmission lines, waveguides, microwave circuits, etc 01 p0031 A66-10977

Monolithic silicon class B hearing aid push-pull amplifier with low idling current and low current drain 01 p0047 A66-11140

Silicon-on-sapphire integrated microcircuit and micropower concepts 01 p0048 A66-11148

Possibility of circuit designs without inductors in future multiplex technique systems 02 p0194 A66-11246

Automated flat pack welding design, discussing operational functions and major components 02 p0234 A66-11323

Approximation method reproducing assigned time functions by using exponential polynomials in synthesis problems of electrical circuits 02 p0207 A66-11752

Coordinate transformation for synthesizing network functions, considering matrix equation used in Foster form realization for RC driving point impedance 02 p0207 A66-11881

Gain-bandwidth limitations for physically realizable systems obtained in integral form by employing generalized representation theorem for bounded-real functions 02 p0208 A66-11904

Topological rules for impedance functions of linear reciprocal networks 02 p0208 A66-11906

Topological analysis for networks

containing nonreciprocal components and mutual inductance 02 p0208 A66-11907

Integral restrictions on time delay of linear phase low pass matching networks with prescribed parasitic loads 02 p0208 A66-11909

Figure of merit and methods of finding optimal filters for pulse-forming networks, taking into account frequency response as well as time response 02 p0208 A66-11910

Network containing only two gyrators and two capacitors sufficient to synthesize given positive real driving-point function 02 p0209 A66-11913

Integrated logic circuit design through breadboard, model assembly, system development, final layout, construction and testing 02 p0204 A66-11939

High-speed reliable cost-orientated integrated circuits, detailing element design and logic and circuit form 02 p0205 A66-11941

Book on active network synthesis covering linear active and nonreciprocal circuits, realizability conditions and negative resistance amplifiers 03 p0348 A66-12372

Active RC synthesis using operational amplifier, noting analog computer simulation of transfer function 03 p0339 A66-12434

Nomograph filter networks for control of electromagnetic interference, noting loss characteristics of element filters 03 p0341 A66-12571

Algorithm for determining number of vertices contained in single contact network corresponding to transmission function 03 p0348 A66-12574

General linear time-invariant networks analyzed in time and frequency domain 03 p0349 A66-13022

Dynamic model of multistable elements noting synchrotron and spectrotron 03 p0344 A66-13046

Synthesis of all-pass networks noting uses in signal expansion in time domain, signal phase-splitting, signal delay without FM, etc 03 p0345 A66-13273

Thin film and monolithic circuits combined to satisfy need to couple integrated circuit designer to fabrication process 03 p0347 A66-13329

Theory of poles and zeros applied to nonlinear networks, discussing shift 04 p0502 A66-13383

Varactor-tuned circuit design, noting curves for graded junctions, power in tuned circuit, etc 04 p0491 A66-13384

Temperature sensor in form of two-terminal networks with single semiconductor thermal resistance operating in linear regime 04 p0503 A66-13708

Inductance into integrated circuit, noting techniques involving RC networks 04 p0503 A66-13765

Semiconductor devices used in switching circuits at high pulse rates, emphasizing transistor and tunnel diode circuitry 04 p0497 A66-13962

Gain, bandwidth and noise characteristics of UHF parametric amplifier 04 p0498 A66-14044

Synthesis of circuits containing delay lines, considering storage elements for pulsed signals 04 p0499 A66-14053

Application of graph theory to synthesis of single contact networks and functions, noting functional and terminal transformation 04 p0506 A66-14203

High performance operational amplifier design, discussing monolithic circuit construction and performance parameters 05 p0642 A66-14567

Diffusion and film techniques combined in design and fabrication of complex integrated computer logic circuits on small die 05 p0643 A66-14571

Octave-broadband tunnel-diode amplifier design with added shunt capacitance and stabilizing circuit 05 p0643 A66-14573

LF transfer functions synthesized with microelectronic circuits 05 p0644 A66-14575

Variational techniques for synthesis of optimum nonuniform transmission lines 05 p0652 A66-14576

Synthesis of rational transfer functions by using thin film distributed RC active networks incorporating single-pole partitioned capacitance

devices 05 p0652 A66-14584
 Transient response of narrow-band networks to narrow-band signals, using Laplace transforms with positive frequencies 05 p0652 A66-14595
 Adaptive logic network structure matched to relationships in input environment, defining task network has to learn, using switching functions 05 p0653 A66-14599
 Signal flow graph for general nonlinear time-varying network 05 p0655 A66-14621
 Mathematical representation of nonlinear nonhysteretic networks by parametric approach 05 p0655 A66-14622
 Approximation formulas for minimum and maximum roots of nth order polynomials 05 p0707 A66-14624
 Natural modes of partitioned networks in analysis and synthesis of transfer functions, noting potential analog or root locus method 05 p0655 A66-14625
 Nonlinear optimal design problem reduced to linear programming problem for worst-case circuit design 05 p0656 A66-14626
 Minimum total reactances of elements needed to realize two-element driving-point function for RLC network synthesis 05 p0656 A66-14627
 Amplitude response curves for HF circuits in transistorized feedback amplifier determined, using polar-diagram method 05 p0647 A66-14680
 Practical technique for performing transformations between time and frequency domains applied to synthesis of four-terminal RLC networks 05 p0657 A66-14995
 Negative impedance converters as RC active ladder units 05 p0658 A66-15123
 Synthesis of RC active filters with prescribed pole sensitivity, noting shunt feedback solution of complex conjugate phantom zeros 05 p0658 A66-15126
 Iterative procedure for analyzing linear electrical networks by digital computer 05 p0638 A66-15127
 Split-path nonlinear filter /span filter/ for independent gain and phase to achieve control system compensation [ASME PAPER 65-WA/AUT-4] 05 p0659 A66-15705
 Reliability, life and relevance of circuit design in electromechanical switching devices 06 p0839 A66-15946
 Environmental conditions and circuit design effect on various types of resistors, examining quality of manufacture and economics of reliability 06 p0839 A66-15947
 Capacitor reliability as function of voltage and temperature of dielectric and environmental conditions 06 p0839 A66-15951
 Design charts for transient response times of thin film networks used in digital circuits 06 p0842 A66-16009
 Book on switching theory covering circuit synthesis and analysis, Boolean algebra, functional theory, relay type network, etc 06 p0861 A66-16197
 Design and construction procedures for band-passed matched filter with 200 mc center frequency 06 p0853 A66-16658
 Nonlinear control system, discussing method to obtain estimate of region of stable initial conditions 06 p0865 A66-16747
 Field effect transistor circuits used to replace bipolar transistors or thermionic devices and action as variable ohmic resistor 06 p0856 A66-16867
 Design methods for lump constant dispersive networks suitable for pulse compression radar, discussing effect of losses and parasitic components 06 p0866 A66-16956
 Linear two-port network model of intrinsic transistor accounts for nonlinear effects at emitter-base function 06 p0866 A66-16961
 Transfer matrix derived for cascade of simple commensurate uniformly distributed RC four-port unit elements 06 p0867 A66-16979
 German book on parametric systems theory and practical application, discussing noise, circuits and amplification 06 p0858 A66-17053
 Phase-correcting circuit design methods for equalizing phase characteristics of high sensitivity communication channels 07 p1001 A66-17343
 Synthesis of automation elements and finite automata in graphical

form 07 p1012 A66-17383
 Automatic realization of reactive ladder filters by digital computer, discussing classification and removal techniques, fundamental power equation and network functions 07 p1008 A66-17752
 Active network synthesis, reviewing methods of analysis for linear lumped constant parameter networks 07 p1015 A66-17755
 Popov-related stability results for feedback systems proved via bounded solutions for functional equations 07 p1015 A66-17756
 Electrical correction circuits for reducing rise time of some mechanical transducers 07 p1035 A66-18233
 Active network synthesis involving voltage amplifier with fixed voltage transfer ratio and two-terminal RC network 08 p1199 A66-18670
 Mathematical foundations of analog simulation proceeding from Laplace, diffusion and wave equations 08 p1187 A66-18861
 System reliability by analyzing reliability of components in connection with operation of logic structures 08 p1187 A66-19447
 Network design implementing solar cell array simulator, using wideband constant current source in conjunction with conventional diodes and linear resistors 08 p1169 A66-19494
 Space radiation vs MOS devices and circuits 08 p1196 A66-19497
 Oscillator design procedure incorporating circuit and equivalent AC model and transfer functions of feedback and amplifier networks 08 p1197 A66-19560
 Combinatorial problems in theory of application of graphs to networks, primarily trees of ladder 08 p1202 A66-19725
 Potential analog synthesis of linear arrays and radiation pattern representation as function of single complex variable 09 p1356 A66-20605
 Bridged-T three-terminal filter network modified to admit two same-frequency same-phase input signals of different amplitudes 09 p1381 A66-20609
 Design of circuits around off-shelf linear microcircuits including sine wave oscillator, voltage-to-frequency converter, logarithmic amplifier, etc 09 p1359 A66-20922
 Feedback control design analysis using circuit determinants for active and passive elements 10 p1516 A66-21233
 Mutual dependence of interconnection and noise immunity in transistorized digital computer circuitry 10 p1517 A66-21692
 Microwave circuit design using strip transmission line, noting single-sideband suppressed carrier modulator, tunnel diodes in low-noise amplifiers, etc 10 p1512 A66-21757
 Design problems involved in transition from discrete-component circuits to integrated microelectronic circuits, noting conversion of analog and digital circuits and system packaging 10 p1512 A66-21758
 Transient behavior of varactor bridge doubler examined, using direct digital integration of circuit equations 10 p1513 A66-21859
 Two-terminal current-controlled negative resistance devices examined, using equivalent circuit, noting stability criterion, frequency response, etc 10 p1513 A66-21860
 Linear graphs theory as part of topology solving problems in circuitry, psychology, linear programming, matrices, network theory, etc 11 p1675 A66-22627
 Circulators from lumped circuit elements examined, calculating coil properties and analyzing construction 11 p1664 A66-22660
 Graphical analysis of tunnel diode monostable circuits described by high order nonlinear differential equations 11 p1677 A66-22766
 Time to failure and mean recovery time calculated for system with recoverable elements 11 p1667 A66-22787
 Port-to-port isolation of phase detectors through use of complementary transistors in beta multiplier circuit to prevent unwanted signal reception 11 p1657 A66-23177
 Current mode technique for worst-case design analysis of electronic networks 11 p1678 A66-23179

Computer analysis of translators using diode ring modulators and dimensioning of frequency dependent networks preceding and following modulating four-pole to obtain specific response in passband, minimizing spurious signal effect 11 p1670 A66-23177
 Complex normalization of scattering matrices, noting application to impedance transformation 11 p1678 A66-23239
 Distributed RC network synthesis, determining necessary and sufficient conditions for driving point impedance frequency response of transfer functions and Foster type realizations 11 p1678 A66-23240
 Tapered distributed RC networks with similar immittances examined for poles and zeros of two-port short circuit admittance parameters 11 p1678 A66-23241
 Realization of circuit matrices given for nonoriented graphs, noting applicability to oriented graphs 11 p1679 A66-23246
 Convergence properties of exponential series expansions used as approximation in electrical network theory for real Schwartz distribution 11 p1724 A66-23423
 Circuit theory reciprocity theorem for dynamic linear systems with gyroscopic coupling for steady state response 12 p1912 A66-23611
 Jacobi elliptic functions for designing low-pass filters whose attenuation is represented by universal normalized curve 12 p1829 A66-23661
 Approximate equations for dependence of electron-drift mode over cathode-triode /tetraode/ grid spacing on parameters of UHF triode power amplifier 12 p1830 A66-23733
 Simplified formulas relating parameters and geometry of film-type two-terminal RC networks with distributed parameters 12 p1830 A66-23736
 Matrix algebra applications to circuit analysis, deriving transistor matrix for use in feedback amplifier 12 p1847 A66-23758
 Reliability, life and relevance of circuit design in electromechanical switching devices 12 p1831 A66-23791
 Equivalent circuit representation of lossless 2N-port symmetrical lattice in multimode waveguide 12 p1832 A66-23907
 Statistical analysis of allowable errors in network synthesis, using moment method, worst case method and Monte Carlo method 12 p1833 A66-24076
 Single shot transient analyzer /waveform synthesizer/ generating sinusoids with real and imaginary parts 12 p1838 A66-24598
 Steady state alternating current analysis of RLC networks by computing eigenvalues and eigenvectors of corresponding matrix of coefficients 12 p1856 A66-24652
 High performance active RC band pass filter design providing for independent adjustment of poles 12 p1843 A66-24675
 Matrix methods for design of HF integrated circuit amplifier 12 p1844 A66-24729
 Circuit design for high impedance amplifier for control systems, considering input and output impedance and amplifier gain 12 p1844 A66-24731
 Incremental design technique virtually eliminates effect of dimensional variations on tolerances of thin film resistor networks 12 p1847 A66-24953
 Cermet film microcircuit characteristics and design 13 p2029 A66-25126
 Pulse frequency multistable devices whose states differ, along with output voltage, by generated pulse rate 13 p2045 A66-25297
 Circuit design simplified by MOS technology, noting features, cost reduction, noise immunity, etc 13 p2036 A66-25533
 Multithreshold threshold element design, discussing realization based on Boolean functions, network synthesis employing transformation technique and logical design application 13 p2039 A66-25803
 Mixer cross products of mixer frequency charts to determine spurious responses with respect to desired output frequency 13 p2040 A66-25825
 Electronic circuit design handbook covering control, detection, pulse and oscillator circuits, configurations,

application, etc 13 p2042 A66-26056
 Circuit and system theory - Allerton Conference, University of Illinois, October 1965 13 p2049 A66-26057
 Functional transformations revealing topological properties of single contact /SC/ network, symplifying task of synthesis 13 p2051 A66-26064
 Method for automatically adjusting networks for best approximation to desired responses, using iterative gradient techniques, constraint equations and Carroll programming technique 13 p2051 A66-26070
 Multiparameter sensitivity matrix analysis of linear feedback multiloop systems 13 p2053 A66-26082
 Iterative approximation of rational transfer function in Laplace transform variable s, optimal with respect to given input and output time functions, and deviation from desired output-input-time functional relation 13 p2054 A66-26087
 Passband filters with three coupled circuits, determining circuit characteristics by method based on use of right angle triangles 13 p2043 A66-26315
 Passband filters with three coupled circuits 14 p2246 A66-26802
 Book on electric network theory, functions and filters 14 p2263 A66-26960
 Transistor-resistor potential element design 14 p2251 A66-27206
 Two active parallel-T circuit variations of RC networks in filter design 14 p2264 A66-27458
 Fundamental principles of circuits used by Iris telemetry stations, including narrow bandwidth locking phase loop, coherent phase demodulator and diversity combining network 14 p2238 A66-27546
 Design, power gain and stability of transistorized linear active network HF amplifier 14 p2255 A66-27801
 Relationship between power gain and HF equivalent circuit constants of diffused-base transistor 14 p2259 A66-28039
 Adaptive method for synthesis of circuit of majority decision elements which realizes given logical function 14 p2268 A66-28043
 Book on solid state communications and design of equipment using semiconductors 14 p2260 A66-28367
 HF transistor circuit design, noting effect of bias frequency and temperature on y and h parameters 14 p2261 A66-28369
 Power gain and stability of linear active two-port networks with circuit design equations based on terminal parameters 14 p2268 A66-28371
 FET in biased p-n junction controlled electric field applied to low level circuit design 14 p2261 A66-28374
 Communications circuit application, examining amplifier, oscillator, mixer converter and transmitter designs 14 p2269 A66-28385
 Temperature sensor in form of two-terminal networks with single semiconductor thermal resistance operating in linear regime 15 p2469 A66-28551
 Master-graph technique for predicting performance of amplifying and switching systems, using charts which present circuit response to basic step-function inputs 15 p2458 A66-28887
 Timing range increase in multivibrators by adding circuitry which separates requirements of bias and timing 15 p2458 A66-28888
 Formula involving two impedances leads to equations for positive real functions, for application to power gain of symmetric and antimetric filters 15 p2464 A66-29322
 Nonuniform transmission line generalization, noting application to proportional networks, exponential and Bessel lines 15 p2471 A66-29325
 RC network and ideal current negative immittance converter with unity gain used in obtaining RLC voltage transfer functions 15 p2471 A66-29326
 Closed loop active networks with distributed RC elements, noting circuit composition, parameters and application 15 p2471 A66-29327
 Transfer function realization using RC network and control source, noting constraints such as multiplicative factors,

poles, boundary frequencies, etc 15 p2471 A66-29328
 State variable determination for linear time invariant plants with known parameters, noting noise suppressing characteristics of technique 15 p2471 A66-29329
 Synthesis for driving point and transfer functions using standard components /RLC/ and single negative resistor or replacing it with tunnel diode 15 p2475 A66-29861
 Program for calculating and designing diode switching circuits consisting of AND and OR gates, where interrelationship of input variable is determined by single switching function 15 p2453 A66-29867
 Active network synthesis, discussing parametric amplifiers and transistor circuits, noting gain and phase stability 16 p2668 A66-30519
 Bit error rate improvement without source coding, using matched filters 16 p2659 A66-30548
 Theory of analysis and synthesis of quadrupoles and two-dimensional networks, defining various waves 16 p2654 A66-31025
 Internal mismatching in four-pole circuits and effect on transmission properties 16 p2663 A66-31026
 Tabulated data method for synthesizing third order linear transfer functions, using chain of inverted L-sections of passive resistor-capacitor elements in conjunction with single operational amplifier 16 p2671 A66-31203
 Tucker linear programming concept of combinatorial equivalent matrices extended to network synthesis 16 p2739 A66-31721
 Communication satellite design noting use for educational and commercial purposes, instrumentation applied, etc 17 p2872 A66-31935
 Topological analysis and synthesis of star-tree equilibrium immittances, node conductance matrix and loop resistance matrix 17 p2899 A66-32050
 Frequency transformations used in derivation of positive real and biquadratic immittance functions in three groups consisting of equivalent circuits 17 p2899 A66-32051
 Circuit design and sensitivity comparison method, based on mean square error and simple linear approximation of variance 17 p2899 A66-32052
 T-domain network synthesis problem, considering realizability of given state model as an RLC one-port network 17 p2900 A66-32056
 Nomograms published in Electronic Design from 1963 to 1966 covering prototype, testing, costs, selection and avoidance of pitfalls 17 p2881 A66-32103
 Integrated and transistor circuit design, discussing parasitic effects, diode structures, volt-ampere characteristics, capacitors and resistors, temperature and doping effect, etc 17 p2881 A66-32104
 Thin film passive devices combined with monolithic silicon techniques to produce circuits superior in electrical and environmental performance to conventional integrated circuit 17 p2882 A66-32106
 Basic guidelines, including estimate of difficulty in incorporating various components into integrated circuits design 17 p2882 A66-32110
 Integrated circuit design, examining layout, tolerances and component interactions 17 p2882 A66-32111
 Substrate layout and deposition of all thin film differential amplifier 17 p2882 A66-32112
 Small size and low power consumption in thin film microcircuits design 17 p2882 A66-32113
 Pulse duration modulator /PDM/ conversion into integrated silicon functional electronic block 17 p2883 A66-32119
 Integrated high speed diode-transistor-logic gate /DTL/ design, discussing stray capacitance, resistors, diode combination and switching transistors 17 p2883 A66-32121
 Integrated circuit design optimization, using modified direct coupled transistor logic NOR gate 17 p2883 A66-32122
 Pulse generator network synthesis and low-pass/ bandpass conversion 17 p2900 A66-32198

Synthesis of circuits containing delay lines, considering storage elements for pulsed signals 17 p2884 A66-32219
 Analog simulation and performance prediction techniques in reliable circuit design and analysis, emphasizing programming procedures using Monte Carlo and worst-case methods 17 p2877 A66-32302
 Multiport linear networks in which pumped variable capacitances shunt and interconnect several ports, exemplifying with varactor parametric amplifier, impedance transformer, coupler, etc 17 p2890 A66-32907
 Microcircuit design, manufacture and application, noting use of silicon monolithic integrated circuits, performance characteristics, reliability, etc 17 p2894 A66-33101
 Flow graph analysis of lossless nonideal 3- and 4-port junction circulators for visualizing scattering matrices and calculating coefficients of combined networks 17 p2896 A66-33277
 Design criteria for active filters using resistance and capacitance elements in feedback circuits 17 p2896 A66-33297
 Optimum complementary feedback amplifier design having high input and low output impedances, low noise and stable gain over wide frequency range 18 p3074 A66-33556
 Analog computer and logic circuitry combination for variable frequency signal production, noting application to adaptive control systems 18 p3089 A66-33561
 Precision phase meter, discussing principle of operation, design, circuit description and uses 18 p3075 A66-33832
 Operational circuits found in measuring devices and in regulation or control systems for low power signal transformation for space application 18 p3076 A66-33882
 Gyrator realization, discussing impedance/frequency characteristics of transistor circuit used 18 p3078 A66-34079
 Relative circuit gain of common-emitter antisaturation feedback circuit configurations as function of circuit parameters 18 p3090 A66-34088
 Inductorless filters, noting increased sensitivity of RC active networks to component tolerances 18 p3078 A66-34092
 Piecewise linear system modeling via topological techniques, using flowgraph method for network synthesis 18 p3090 A66-34247
 Digital multiplier with incremental computing system, noting series and parallel addition system and sequential multiplication with incremental values 18 p3073 A66-34495
 Half-wavelength resonators as capacitive-gap strip-line bandpass-type microwave filters, discussing parameter derivation for equivalent circuit and Cohn synthesis method 18 p3087 A66-34621
 Dynamic model of multistable elements, noting synchrotron and spectrotron 18 p3088 A66-35009
 Book on analysis and design of transistor circuits including transistor parameters, emitter diode equivalent circuits, FET, amplifiers, noise, etc 18 p3089 A66-35238
 Book on principles of antenna design, discussing fundamental laws of electromagnetism, Maxwell equations and practical forms 19 p3312 A66-35311
 Synthesis of HF multicircuit band filters with indirect couplings 19 p3312 A66-35324
 Quartz crystal active filters noting design and operation of multiresonator filters 19 p3312 A66-35337
 Optimal control for plant with polynomial ratio as transfer function, noting general performance index which involves output and control variables 19 p3323 A66-35341
 Conventional equivalent circuit of tunnel diode with inverse frequency stability characteristics 19 p3312 A66-35348
 Capacitance transducer for measuring capacitance ratios with minimum environmental problems, noting wide application range 19 p3355 A66-35470
 Capacitive transducer principle, describing basic circuit, performance characteristics and sensitivity factors 19 p3355 A66-35472
 Microelectronics pulse code modulation /PCM/ multiplexer-encoder for Apollo

spacecraft, emphasizing packaging techniques, discussing advance circuit design techniques 19 p3317 A66-35707

Feedback methods for conversion of electrical signals into frequencies, using oscillator with signal-current-controlled inductance 19 p3325 A66-35988

Sensitivity to variations in parameter of signals in networks of linear transfer functions and instantaneous function generators, noting relay characteristics 19 p3327 A66-36018

Transistorized optimum ratio combining circuit, noting addition of two or more input signals to obtain combined signal with improved S/N ratio 19 p3330 A66-36163

Printed circuitry, discussing fabrication, reliability, circuit board materials, electrodes and protective coatings 19 p3320 A66-36323

Lumped network theory, calculating scattering matrix of n-gate device from reference impedances of different scattering matrix 19 p3330 A66-36652

Pulse-shaping networks with frequency-band limitation, noting approximation of idealized networks with echo equalizers 19 p3306 A66-36656

Multiloop flight control system root sensitivity to open loop parameter variation, describing method of analysis 19 p3335 A66-36690

Linear optimal control in systems with uncertain parameters, noting application to design of compensating network for flexible booster for uncertain value of first bending mode 19 p3471 A66-36696

Parameter optimization using steepest descent approximation for systems subject to worst bounded disturbance in order to provide performance index minimization 19 p3337 A66-36713

Synthesis parametry of ensemble-averaged second-order polynomial approximation to performance index of optimal guidance linear feedback control system 20 p3589 A66-36858

Cascade free jet logical element interactions and application to multiple-parameter logical function synthesis 20 p3496 A66-36863

Uniqueness theorems concerning lossless birefringent networks and effects on transmittance of changing sign of crystal angles and output polarizer 20 p3599 A66-36943

Book on feedback circuit analysis covering circuit stability, closed loop transient response, frequency response, compensating networks, etc 20 p3537 A66-37047

Time to failure and mean recovery time calculated for system with recoverable elements 20 p3525 A66-37127

Noise sources analysis in electrical device, applying equivalent voltage or current spectrum 20 p3516 A66-37580

Open and closed-loop network synthesis using transient-response approximation 20 p3538 A66-37581

Time domain characteristics application to pulse amplifier design, noting correlation with results obtained via frequency method 20 p3538 A66-37582

Pulse generator for driving semiconductor laser diode, noting circuit diagram and operating characteristics 20 p3578 A66-37588

Unified approach to synthesis of orthonormal exponential functions with elements whose asymptotic order may be chosen arbitrarily and poles that may be real, complex or both 20 p3522 A66-37665

Folded antennas, discussing Franklin array and current distribution via equivalent circuit analysis and application for TV transmission and reception 20 p3530 A66-37712

Identifying critical elements /parts and components/ as criteria for system design tradeoff at system and circuit levels 20 p3568 A66-37916

Algebraic enumeration methods for sets of all-trees, two-trees, cotrees and two-cotrees used with Kirchhoff rules for network analysis 20 p3539 A66-38146

Necessary and sufficient condition derived for generating rational functions of n-port rectangular structure for distributed RC networks 20 p3540 A66-38287

Time-variable lattice network extended by choice of lattice arms to include transformless RLC nonreciprocal network 20 p3540 A66-38289

Low-pass filter characteristics, particularly phase and group delay and magnitude characteristics, considering various network types 21 p3709 A66-38671

Graphic solution for factoring higher-order polynomials of response function resulting from analysis of linear filter networks 21 p3756 A66-38672

Integrated electronic arrays, examining fabrication, logical design, application and packaging 21 p3710 A66-38828

Bandpass amplifier design by selecting peak frequencies occurring in active high- and low-pass RC filter sections 21 p3711 A66-39200

Steady state and transient response characteristics of class of low pass filters noting transmission properties, frequency and time domain considerations, etc 21 p3713 A66-39271

Waveform analysis of electronic repetitive differential analyzer solutions of nonlinear and linear systems and describing functions evaluation using vectormeter 21 p3739 A66-39275

Component characteristics in integrated circuits 21 p3716 A66-39621

Electronic component, ferrite memory cores, filters and inductances adapted to integrated circuit utilization 21 p3716 A66-39622

Design formulae and comparative tables of three n-input universal logic circuits 22 p3883 A66-39727

Transient response of narrow band networks to narrow band signals, using Laplace transforms with positive frequencies 22 p3864 A66-40063

Approximate equations for dependence of electron-drift mode over cathode-triode /tetrode/ grid spacing on parameters of UHF triode power amplifier 22 p3875 A66-40076

Simplified formulas relating parameters and geometry of film-type two-terminal RC networks with distributed parameters 22 p3876 A66-40079

Multiloop flight control system root sensitivity to open-loop parameter variation, describing method of analysis 22 p3884 A66-40360

Logical processing units and interconnection networks design noting reliability, fault diagnosis, computer coordination of data and control processes, etc 22 p3871 A66-40728

Method of characterization for germanium microwave transistors and circuit design principles for low noise performance 22 p3881 A66-40746

Book on synthesis of multiloop control systems for application to automatic control and computer circuit construction 22 p3885 A66-40854

Delay devices for pulse compression radar - IEE Conference, London, February 1966 23 p4033 A66-41013

Optimal lumped constant dispersive network design with inductors and capacitors functioning independently 23 p4034 A66-41015

Pulse compression filter synthesis using ultrasonic delay lines 23 p4034 A66-41019

Synthesis of prescribed frequency/group delay characteristics, using passive microwave components 23 p4035 A66-41027

Structural diagram for loading of potential element transistors operating in complex logic circuit 23 p4041 A66-41397

Convex programming procedure yielding algorithm for tuning out system from possible resonance zone 23 p4090 A66-41408

Optimum microwave filters with even number of sections, using first-order Chebyshev polynomial to obtain equivalent circuit 23 p4037 A66-41515

Microminiaturization of microwave circuits by synthesis and implementation of passive network functions in distributed parameter form, using strip transmission line as circuit element 23 p4046 A66-41585

Low pass elliptic function filter fabricated from RC network and low gain voltage amplifier 23 p4050 A66-41611

Feedback compensated third-order control systems analysis, using coefficient plane reference system 23 p4051 A66-41703

Horowitz minimum sensitivity decomposition does not lead to optimally sensitive networks for selected class of RC networks 24 p4181 A66-42372

HF transistor stability in common emitter configuration, examining performance of input admittance in circuit design and analysis 24 p4181 A66-42377

Harmonic linearization, estimating quality of oscillatory transients in nonsearching self-adjusting systems described by high order differential equations 24 p4188 A66-42480

FET characteristics in chopping and analog switching applications 24 p4182 A66-42500

Temperature stabilization of transistorized circuits calculated via equivalent circuit stability characteristics 24 p4185 A66-42892

NEUMANN PROBLEM

Straight lines method applied to Dirichlet and Neumann boundary value problem for certain nonself-adjoint two-dimensional second order elliptic equations 01 p0095 A66-11014

Stability of net method for elliptical problems investigated, using low variability of network operator 01 p0096 A66-11184

Existence and uniqueness of solution for second boundary value Neumann problem in linear flow theory 02 p0296 A66-11242

Interior and exterior Dirichlet and Neumann problems for LF acoustic oscillations 02 p0261 A66-12153

Couette flow, Neumann-Liouville series expansion convergence for various flow regimes and related Fredholm integral equation solutions 07 p1020 A66-17964

Numerical Neumann solution to scalar equation of transfer in homogeneous layer of optical thickness 08 p1255 A66-18780

Small axisymmetric oscillations of fluid inside elastic cylindrical shell with elastic bottom determined by reducing problem to internal Neumann problem for circular cylinder 09 p1368 A66-20756

Stability of net method for elliptical problems investigated, using low variability of network operator 12 p1903 A66-24017

Finite difference method for elliptic systems of partial differential equations subjected to natural boundary conditions /generalized Neumann problems/ 16 p2731 A66-30234

Electromagnetic analog computer for solving Dirichlet and Neumann equations for half-space and associated geophysical problems 24 p4202 A66-42763

NEURAL NET

SA ARTIFICIAL INTELLIGENCE

Convergence, oscillation, functional stability and reliability of m-by-1 homogeneous polyfunctional nets under iteration 10 p1517 A66-21891

Neural, threshold, majority and Boolean logic techniques compared for reliability and efficiency in adaptive machines and data handling systems 11 p1659 A66-22300

Neuron network model of oculomotor system to understand human eye movement 13 p2008 A66-25336

Molecular and ultrastructural correlates of function in neuron, neuronal nets and brain studied, using genetic and immunological concepts 24 p4165 A66-43102

NEUROLOGY

Holtzman strain experiments on rats, determining if electrical stimulation of various neural sites produce motivational consequences of appetitive or defensive behavior 13 p2009 A66-25790

Physicochemical processes in memory, learning, consciousness and other mental processes in man 15 p2431 A66-28671

Irritability, by injected apomorphine, of emetic center of dogs with functioning and removed labyrinths subjected to various motions 15 p2439 A66-29495

Electrode implantation in dogs and detection of action currents in vegetative nerves after ten months 15 p2444 A66-29499

Operant conditioning of single unit responses, considering hippocampus and midbrain tegmentum 20 p3506 A66-37601

Internal carotid artery insufficiency in neuro-ophthalmic and aeromedical

implications, noting ophthalmo-dynametry in flight qualification 24 p4164 A66-42457

NEURON

SA RECEPTOR

Stochastic behavior of primary auditory neurons illustrated by functional model subjected to steady HF sinusoidal tone bursts 01 p0019 A66-10400

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Electric impedance measurements in hippocampus, amygdala and midbrain reticular formation during altering, orienting and discriminative responses in cat 24 p4166 A66-43167

NEURON TRANSMISSION

Molecules and memory, discussing role of RNA as switching element in memory processes 06 p0812 A66-16463

Probability state variable device /neutron/, operation, functions and application 06 p0819 A66-16807

Mathematical theory relating neuronal geometry to parameters of excitation in unconditioned response of planarians to electric shock 10 p1486 A66-21296

Impulses originating in dendrite region in most dorsal part of dorsal horn, noting correlation between membrane potential and cell firing rate 12 p1805 A66-23567

Vestibular neuronal response to rotating linear acceleration vectors, noting generation of compensatory ocular nystagmus 17 p2858 A66-32177

Neuronal circuitry relations of cat mammillary nuclei derived from neuron population ratio computed from population data 18 p3058 A66-34067

Neuronal circuitry and neuron populations of structures in normal animal brains and brains modified by unambiguous lesion arrays 20 p3505 A66-37053

NEUROPHYSIOLOGY

SA PSYCHOPHYSIOLOGY

Information processing in auditory neural mechanism, examining synthesis operation of cortex neurons and function of centrifugal nerve paths 02 p0180 A66-11365

Neurophysiological aspects of manned extraterrestrial space flights such as motor responses by sensory inputs, cortical responses, etc 04 p0464 A66-14065

Acoustic images arising from binaural repetitive wideband acoustic transients, noting tonal harmonic images and two dominant images of impulsive character 05 p0628 A66-15734

Conduction velocity of single units, verified components of spinocervical tract and over-all conduction velocity determined in dorsal column of cat 06 p0810 A66-15941

Temperature effect on amplitude of cochlear microphonic and on latency action potential of auditory nerve 06 p0812 A66-16405

Neurologic adaptations and audiological responses in mice exposed to chronic 2X gravity field, noting development of more efficient circulatory system, growth pattern alterations, etc 07 p0998 A66-17660

Human and animal study of physiological and neurophysiological responses at different intensity levels and short periods of gravitational field 11 p1641 A66-22482

EEG and cortical and subcortical responses analysis of sensory stimulation in restricted dogs and normally reared littermates 11 p1644 A66-22950

Importance of neural site and experimental conditions in determining motivational direction /positive or negative/ produced by electrical stimulation of brain in animals 11 p1644 A66-22976

Impulses originating in dendrite region in most dorsal part of dorsal horn, noting correlation between membrane potential and cell firing rate 12 p1805 A66-23567

Responses of neuronal elements in visual cortex of unanesthetized cats shown to depend on time interval length 12 p1806 A66-24232

Probabilistic logical analysis of neurons and neurophysiological functional organization of core of reticular formation 18 p3056 A66-33761

Neuronal circuitry relations of cat

mammillary nuclei derived from neuron population ratio computed from population data 18 p3058 A66-34067

Response characteristics of lateral geniculate cells of macaque monkey, discussing hue, saturation and brightness encoding in primate color visual system 20 p3504 A66-36946

Neuronal circuitry and neuron populations of structures in normal animal brains and brains modified by unambiguous lesion arrays 20 p3505 A66-37053

Amplitude and wave shape of averaged evoked responses in awake animals including man 20 p3505 A66-37055

Connection between equivalent time-delay and LF phase lag in neuromuscular system data 22 p3854 A66-40254

Soviet papers on effect of space flight factors on functions of central nervous system 23 p4025 A66-41334

Macromolecular parameters of memory and learning and information processing in molecular genetics, molecular immunology and molecular neurology 24 p4162 A66-42313

NEUTRAL BEAM

Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 05 p0723 A66-15168

Cold quasi-neutral beams focusing in electromagnetic fields 06 p0916 A66-16347

Neutral atomic beam used to measure total ionization cross section of argon atoms incident on low density argon gas 07 p1083 A66-18421

Cold quasi-neutral beams focusing in electromagnetic fields 11 p1743 A66-22346

Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 14 p2342 A66-27411

Ionization cross sections for low energy collisions of neutral nitrogen molecules or neutral argon atoms, using asymmetric charge transfer 14 p2337 A66-27980

NEUTRAL ELEMENT

Catalog of neutral H-line profiles at 21 cm wavelength noting intensity, radial velocity, line widths, etc 19 p3460 A66-35792

NEUTRAL PARTICLE

Dispersion relation for plane longitudinal waves within macroscopic theory, considering collisions and viscosity of neutral particles, noting acoustical and ionic modes 03 p0404 A66-12983

Instability of plasma supported under gravity by magnetic field, considering collisions between charged and neutral particles dominate over charged particle interaction 06 p0915 A66-16180

Design and construction of probe measuring density of neutral atoms in quiescent alkali metal magnetoplasma, noting vacuum system, electric circuitry, etc 12 p1884 A66-24984

Multimomenta neutrals produced simultaneously from monoenergetic accelerator, using ions from hydrogen and deuterium and dissociation and charge exchange 13 p2145 A66-25731

Neutral particle densities of nitrogen, molecular and atomic oxygen and argon in upper atmosphere, noting density profile irregularities, diffusive separation altitude, etc 15 p2497 A66-30086

Energy spectrum of neutral hydrogen atoms from coaxial plasma gun 17 p2962 A66-31823

Exchange reactions of charges appearing when beam of fast ions passes into thin gas target, examining characteristics of source of high energy neutral particles 17 p2961 A66-32947

Neutral-impurity scattering and scaled electron-hydrogen-atom collision problem for hydrogenic-type impurities in semiconductor studied by method using highly spin-polarized carriers 19 p3448 A66-36763

Electron and neutral atom densities in helium and argon afterglow plasma obtained by two helium-neon laser interferometers, noting temporal dependence of electron decay 23 p4101 A66-41364

NEUTRINO

Gravitational interaction and gravitational

waves discussing Schwarzschild metric, weak interaction, spinor field and free neutrino wave 04 p0546 A66-14315

Neutrino producing cooling reaction rates indicate that discrete X-ray sources located in direction of galactic center are not neutron stars 05 p0760 A66-14895

Neutron star cooling tested by photon flux measurements indicative of effective temperature change 05 p0763 A66-15286

Stellar neutrino emission mechanism and neutrino-electron scattering 06 p0946 A66-16570

Detection of solar neutrinos via Ga-Ge reaction 06 p0951 A66-16774

Longitudinal and transverse emissivities of neutrino-pairs from stellar plasma 07 p1131 A66-18237

Effects of derivative terms in leptonic current of photon interaction yielding neutrino and antineutrino 07 p1083 A66-18239

Neutrino generation in solar interior 08 p1297 A66-19451

Neutrino detecting equipment located in South African mine, discussing theory of neutrino production 08 p1285 A66-19600

Mechanism for production of X-rays and gamma rays in galaxies, noting photon and electron spectrum 10 p1598 A66-21100

Weather forecasting from atmospheric electric conductivity measurements, noting polarization by neutrinos 11 p1729 A66-22865

Motion of magnetically charged neutrino in cosmic magnetic fields 12 p1942 A66-24181

Cosmic rays, muons and neutrinos - International Conference, Jaipur, India, December 1963 15 p2586 A66-29570

Static properties and interactions of neutrinos noting mass, spin, helicity, charge, lepton number, etc 15 p2546 A66-29582

Cosmic neutrino production and stellar evolution, prospects of observational neutrino astronomy as branch of cosmic ray physics 15 p2589 A66-29589

Cosmic ray measurements at 9000 ft underground where atmospheric muon intensity has attenuated and signal due to neutrino interactions is detectable 15 p2589 A66-29590

Large-scale underground experiment for detecting cosmic ray neutrino-induced interactions 15 p2590 A66-29591

Low energy cosmic neutrino detection with radiochemical methods, noting mass spectrometric and nuclear emulsion methods based on Pontecorvo-Davis reaction 15 p2590 A66-29592

High energy neutrino production in atmosphere contributed by pion, muon and kaon interactions 15 p2590 A66-29593

Energy spectra of muons and neutrino production from cosmic gamma rays 15 p2547 A66-29597

Energy spectra of neutrinos from secondary cosmic-ray decay in Earth atmosphere 15 p2590 A66-29646

Absorption of solar neutrinos in deuterium 16 p2792 A66-30144

Cosmic neutrinos, discussing sources and forms of existence 17 p2994 A66-32835

Neutrino generation in solar interior 18 p3232 A66-34480

Nuclear reactions in stellar interiors, calculating probabilities of various proton-proton reactions and obtaining solar neutrino fluxes at Earth for point source solar model 18 p3223 A66-35213

Detection of solar neutrinos for analysis of solar structure, using various detector types and recoil electrons in neutrino-electron elastic scattering process 18 p3223 A66-35214

Evaluation of predicted effect of elastic solar neutrino scattering on electrons of medium, using graph 18 p3223 A66-35215

Various light nuclei considered as possible solar neutrino detectors, deriving cross sections and angular distributions of electrons 18 p3223 A66-35216

Direction of collapsing star determined by detecting generated neutrino front by time delay method 18 p3223 A66-35217

Interior temperature of Sun determined, using high and low threshold solar neutrino detectors 18 p3238 A66-35218

Solar neutrino detection via neutrino-chlorine reaction, discussing energy level positions and probabilities of beta transition 18 p3223 A66-35219

Interaction between ultrahigh energy cosmic rays and neutrinos in universe, noting distortion of energy spectrum 18 p3224 A66-35220

Energy spectra of muons and neutrinos generated by cosmic rays in dense objects without atmosphere analyzed in connection with nebulae problems 18 p3224 A66-35221

Two detector elements developed for 2000-ton neutrino detector, noting cylindrical spark counter and Cerenkov counter 18 p3096 A66-35224

Interaction of high energy cosmic ray neutrinos produced in atmosphere measured with detector array operated underground 18 p3224 A66-35225

Muons and neutrinos from energetic celestial objects, discussing charge ratio, rate and equipment used 18 p3224 A66-35226

Detection of solar neutrinos via Ga-Ge reaction 19 p3452 A66-35371

Nuclear processes of stellar evolution resulting in neutrino emissions 19 p3453 A66-36085

Neutrino processes in stellar evolution, discussing pair annihilation, plasma, photoneutrino, URCA, bremsstrahlung, photo-beta, photon-photon and electron-electron bremsstrahlung processes 19 p3454 A66-36796

Solar neutrino detection, discussing energy generation processes in Sun 19 p3454 A66-36793

Neutrino flux calculation based on models of solar interior with tabulated results 19 p3454 A66-36794

Stellar evolution for high temperature, predominantly neutrino processes, noting breakdown of homology relation between density and temperature 19 p3467 A66-36795

Predicted capture rate in chlorine experimentator detecting solar neutrinos, using set of nuclear parameters, showing CNO cycle and proton-proton chain contribution to solar energy generation 21 p3809 A66-38657

Star collapse observation by detection of high energy neutrino fluxes produced by cataclysmic star contraction 22 p3975 A66-40953

Neutrino energy losses from vibrating neutron stars, noting density profiles 23 p4131 A66-41863

Plasma neutrino process of Adams, Ruderman and Woo dependent on direct electron-neutrino interaction and connected with stellar evolution 24 p4279 A66-42835

Stellar nuclear reactions and evaluation of flux and energy spectrum of solar neutrinos 24 p4270 A66-42929

Energy spectra of muonic and electronic neutrinos in atmosphere 24 p4270 A66-42930

Angular and energy distributions of muons produced by interaction of atmospheric neutrinos with matter underground 24 p4270 A66-42933

NEUTRON

SA COLD NEUTRON

SA FAST NEUTRON

SA SLOW NEUTRON

SA THERMAL NEUTRON

Calculation of neutron generation by mu-mesons for various depths in Earth 05 p0755 A66-15409

Inelastic n-p cross section at 60 gev determined from attenuation of penetrating shower-producing cosmic ray neutrons in paraffin and graphite 18 p3216 A66-35167

Various processes leading to nuclear reactions induced by muons, finding main yield given by photonuclear interactions, with nuclear cascades playing significant role 18 p3221 A66-35204

Neutron spatial asymmetry measured from reaction of cosmic ray muons on nuclei with different spins 24 p4271 A66-42940

NEUTRON ABSORBER

Chemical etching method useful for electron microscope observation of damage regions of high-energy neutron irradiated n-type germanium 04 p0562 A66-13738

Neutron radiographic techniques to solve nondestructive testing problem of pyrotechnic cartridge inspection 21 p3806 A66-39153

NEUTRON ACTIVATION

Neutron activation and cesium-aluminum sputtering in oxygenated gas atmosphere

[AIAA PAPER 66-77] 06 p0913 A66-17103

Ripening of defects induced by fast neutrons in germanium in course of low temperature annealing 06 p0937 A66-17143

Abundance of selenium, tellurium and indium in meteorites measured by neutron activation analysis 13 p2188 A66-26363

Neutron analysis techniques for determining hydrogen presence on lunar or planetary surfaces, based on measurement of gamma radiation 14 p2233 A66-28105

Neutron activation analysis of K-Ar age for Barwell, England olivine-hypersthene chondrite of December, 1965 16 p2807 A66-31760

Rare-earth element abundance patterns in Hawaiian basalts determined by neutron activation analysis 21 p3735 A66-39492

Neutron activation investigation of cesium ion sputtering of Al in rarefied oxygen atmosphere 22 p3950 A66-40082

Neutron activation analysis of sodium dopant concentrations and distributions in lead telluride thermoelectric materials during couple operation in vacuum and argon atmosphere 24 p4247 A66-42109

Antimony abundance in meteorites determined by neutron activation analysis 24 p4274 A66-42432

NEUTRON BOMBARDMENT

Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 05 p0730 A66-14644

Neutron irradiation induced changes in surface state density, substrate resistivity and carrier mobility of MOS transistor 05 p0734 A66-14851

Predicting transistor gain degradation in neutron radiation environment from variation of radiation damage constant as function of temperature and current 05 p0735 A66-14856

Neutron-induced base current component in silicon transistor which varies with integrated neutron flux and base-to-emitter voltage 05 p0735 A66-14857

Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 06 p0896 A66-16539

Thermal conductivity of neutron-irradiated silicon crystal, based on Callaway model 06 p0933 A66-17118

Rapid neutrons irradiation effect on thermal conductivity of ternary semiconducting arsenide compounds 06 p0933 A66-17119

Positions of defect energy levels in n-type germanium irradiated with fast neutrons analyzed by optical methods, measuring spectral distribution of photoconductivity and quenching curve 06 p0934 A66-17127

Increase in carrier mobility in Mg₂GeS₂ with neutron irradiation may be due to decreasing effective mass, caused by creation of internal stresses 06 p0936 A66-17136

Neutron and proton bombardment effects on exciton spectrum of cuprous oxide 06 p0937 A66-17139

Effect of irradiation of silicon by fast neutrons on switching time of alloy diode synthesized on silicon 07 p1099 A66-17929

Solar diurnal and semidiurnal variations in neutron component of cosmic rays obtained from worldwide network from 1959 to 1962 08 p1285 A66-19775

Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 10 p1587 A66-22150

Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 10 p1589 A66-22167

Neutron irradiation of InSb single crystals, noting conductivity type change in p-type and conductivity magnitude in n-type crystals 11 p1749 A66-22285

Electric conductivity and spectral distribution of impurity photoconductivity of n-and p-silicon bombarded by fast neutrons, noting role of annealing 12 p1929 A66-24450

Current-voltage characteristics of conductivity-modulated silicon p-i-n diode as affected by high-level injection and fast-neutron bombardment 13 p2158 A66-25054

Interference maxima changes in X-ray photographs of neutron irradiated metals attributed to interstitial atoms in lattice 13 p2106 A66-25332

Transmission electron microscopic observations on preexisting dislocation as sinks for neutron-irradiation-induced point defects and dislocation reaction to subsequent deformation 13 p2107 A66-25586

Beam power increase and radiation damage effect on high power accelerator components, determining permeability change 13 p2058 A66-25743

Individual and group defect contribution to variation in carrier concentration and mobility in n-type germanium irradiated with fast neutrons 13 p2166 A66-25917

Dislocation-free Si crystal defects produced by fast neutron bombardment 14 p2359 A66-27092

Neutron irradiation effect on fracture toughness of several structural and pressure vessel steels studied by Charpy V-notch impact test and tensile test 15 p2521 A66-29074

IR absorption spectrum of neutron bombarded silicon 15 p2565 A66-29202

Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 15 p2524 A66-29986

Generation recombination noise in Ge single crystals under fast neutron irradiation, using reversible technique to vary noise parameters 16 p2778 A66-31072

Oxygen defect complexes in neutron irradiated germanium 17 p2980 A66-32647

IR absorption spectrum of neutron bombarded silicon 17 p2982 A66-33051

Thin film transmission electron microscopy on n-type silicon irradiated with fast neutrons, noting erratic polishing process and irregular surface 19 p3436 A66-35431

Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 19 p3440 A66-35764

Retention of semiconductor properties by gallium arsenide after irradiation by fast-neutron flux 19 p3441 A66-35781

Dependence of Hall effect and conductivity of irradiated samples on reciprocal temperature in nuclear transmutations produced in InSb by bombardment with slow neutrons 20 p3617 A66-37485

Electric conductivity and spectral distribution of impurity photoconductivity of n-and p-silicon bombarded by fast neutrons, noting role of annealing 20 p3619 A66-37682

Solar diurnal and semidiurnal variations in neutron component of cosmic rays obtained from worldwide network from 1959 to 1962 21 p3809 A66-38771

Neutron irradiation-induced defects in vapor deposited niobium stannide and effects on current-carrying capacity 22 p3962 A66-40083

Fission spectrum neutron damage and gamma ray damage in n-type Si, comparing results of measurements by degradation of minority carrier lifetimes 22 p3962 A66-40086

Dislocation-free Si crystal defects produced by fast neutron bombardment 22 p3967 A66-40848

Phosphorus 32 and 33 produced by interactions of secondary neutrons from cosmic rays with argon in atmosphere determined radiochemically from rainwater samples 23 p4124 A66-41845

NEUTRON COUNTER

SA GEIGER COUNTER

Neutron monitor and mu-meson telescope for cosmic ray studies at Kazakh State University 06 p0880 A66-16601

Instrument errors in neutron monitor as affected by contact oxide film 06 p0881 A66-16602

Attenuation coefficients deduced in lower atmosphere near Rome, using IGY cosmic ray neutron monitor 07 p1032 A66-17465

Efficiency of scintillation neutron counter determined as function of neutron energies ranging from 20 to 70 mev 09 p1380 A66-20358

Slow neutron scintillation counter using photomultiplier with nonactivated dynodes, with low amplification factor to measure very low intensity ion

beams 09 p1380 A66-20359
 Atmospheric fast cosmic ray neutron flux measurements, using boron fluoride recoil neutron counter 15 p2584 A66-29553
 Barometric air pressure correction anomaly for nucleonic component monitors, noting time variation in attenuation coefficients 18 p3194 A66-34856
 Barometric coefficients of Leeds IGY and NM-64 neutron monitors, noting variation from solar minimum to maximum 18 p3194 A66-34857
 Multiplicity distribution measured in IGY ship-borne neutron monitor, noting dependence on latitude and geomagnetic threshold rigidity 18 p3194 A66-34858
 Attenuation and multiplicity effect used as indexes of properties of radiation recorded by IGY neutron monitors in lower atmosphere 18 p3194 A66-34859
 Modulation data for primary cosmic ray spectrum at low rigidities determined from daily latitude curves of cosmic ray nucleonic component obtained from IGY neutron monitors 18 p3194 A66-34860
 Counting rate of high latitude NM-64 neutron monitors, examining dependence on atmospheric temperature and water vapor content 18 p3195 A66-34861
 Regression calculations correlating daily average meson intensity with barometric pressure, atmospheric temperature and neutron monitor intensity 18 p3195 A66-34862
 Latitude and altitude survey in North America made by road transport carrying neutron monitor, meson telescope, mercury barometer, etc 18 p3198 A66-34879
 Uppsala IGY-neutron monitor multiplicity measurements indicate increase of attenuation coefficient with increasing multiplicity 20 p3632 A66-38079

NEUTRON CROSS SECTION
 Systematics of fission based on exponential mass formula, discussing neutron capture 02 p0263 A66-11835
 Cl 36 in stony meteorites produced by spallation reactions and neutron capture 04 p0579 A66-14318
 Inelastic neutron cross section for interaction with Pb and C nuclei near 100 gev 18 p3216 A66-35165

NEUTRON DECAY
 Average steady-state omnidirectional trapped electron flux due to beta decay from orbiting leakage reactor neutrons 05 p0747 A66-14786
 Radiation belt formation from neutron decay and geomagnetic trapping as affected by Coulomb encounters and particle diffusion 09 p1440 A66-20226
 Proton injection into radiation belts for large B-L space regions by cosmic ray and solar proton albedo neutron decay injection 11 p1764 A66-23130
 Upper bounds on steady state and pulse outflow of neutrons from Sun determined by assuming neutron-decay protons diffuse in interplanetary magnetic field 11 p1764 A66-23131
 Injection of protons into inner radiation belt caused by decay of fast cosmic ray albedo neutrons and superimposition of low-energy protons of unknown origin 20 p3639 A66-38318

NEUTRON DETECTOR
 Intercalibration of cosmic ray neutron monitors at nine European sea level stations and deduction of daily latitude effect in 1963 01 p0132 A66-10321
 Neutron and gamma sensitivities of nine detectors tested at Sandia Pulsed Reactor 05 p0734 A66-14854
 Solar particles zones of incidence during maximum and minimum solar activity 05 p0751 A66-15376
 Fast and slow neutrons detected by proportional and scintillation counters 05 p0755 A66-15408
 Cosmic ray diurnal variation near geomagnetic poles measured over declining phase of solar cycle, using neutron monitor data 07 p1127 A66-18015
 Galactic cosmic ray modulation by interplanetary plasma, deriving by method of best fit, direction and energy spectrum of anisotropy outside of geomagnetic field 07 p1128 A66-18020
 Variation spectrum stability of Forbush

decrease and small cosmic ray flare during intensity recovery, noting electric field effect, calculation methods, etc 07 p1129 A66-18023
 Intensity variation of nucleonic component of atmospheric cosmic radiation, geomagnetic threshold rigidity and calculation of cosmic ray equator 08 p1284 A66-19398
 Total counting rate and detected multiplicity spectrum of standard IGY neutron monitor analyzed on basis of neutron production and cosmic radiation components 11 p1765 A66-23144
 Directional neutron detector utilizing plastic scintillator filaments for space research 12 p1876 A66-23683
 Low-power multichannel pulse height analyzer for solar neutron detection aboard balloon or rocket 12 p1878 A66-23693
 NERVA reactor instrumentation noting core temperature thermocouples, neutron detectors, vibration and pressure transducers, strain gauges, etc 12 p1912 A66-23703
 Heavy ionizing particle path detection by thin dielectric sheets 13 p2084 A66-26561
 Cosmic ray neutron flux as function of altitude measured near Earth surface, using boron trifluoride detectors 17 p2992 A66-31974
 Rocket and balloon measurements of fast neutron intensity at high altitude from detectors flown in 1964 and 1965 18 p3188 A66-34823
 Rocket-borne neutron detector measurements of neutron albedo and intensities at various geomagnetic latitudes 18 p3199 A66-34887
 Latitude dependence of neutron multiplicity detected by shipborne neutron monitor, examining threshold rigidity dependence on intensity of events 20 p3632 A66-38078
 Steady state solar neutrons and solar neutron bursts measured by neutron detectors on Vela satellites 24 p4263 A66-42599

NEUTRON DIFFRACTION

Existence of vortex lines in superconducting niobium in mixed state demonstrated via neutron diffraction 09 p1420 A66-20050
 Neutron diffraction in ordered nickel-manganese alloys with near equilibrium distribution of atoms over lattice points 09 p1389 A66-20612

NEUTRON DISTRIBUTION

Atmospheric diurnal variation investigated, using temperature controlled high-counting neutron and meson monitors 07 p1126 A66-18008
 Fluctuation of ratio of yearly average amplitudes of meson-to-neutron diurnal variation owing to variability of energy dependence of cosmic ray anisotropy 07 p1126 A66-18009
 Diurnal intensity time variation of cosmic ray neutrons compared with relative number of sunspots observed 07 p1127 A66-18014
 Specific angular sensitivity functions for investigating spatial distribution of asymmetrical cosmic ray variation 09 p1438 A66-20217
 Integrated flux distributions in neutron capture in stars 17 p2997 A66-31924

NEUTRON EMISSION

X-ray analysis of neutron irradiated quartz crystals at various temperatures, showing atomic displacements 01 p0124 A66-10772
 Geomagnetic relationship of daily variation of cosmic ray neutron intensity corrected for barometric pressure variation at various ground stations 03 p0423 A66-13360
 Solar particle effect on daily variation in neutron component of cosmic radiation 06 p0949 A66-16585
 Average tissue dose of intermediate neutrons for irradiation of thin biological object in nuclear reactor 07 p1035 A66-18157
 Neutron and electron irradiation damage in uniform silicon avalanche junction diode and effect on avalanche pulse rate 07 p1012 A66-18410
 Irradiation of indium antimonide with slow neutron 08 p1276 A66-19614
 X-ray analysis of neutron irradiated quartz crystals at various temperatures, showing

atomic displacements 11 p1749 A66-22283
 Neutron and gamma radiation measurements during low and high power NERVA reactor tests, determining leakage and radiation environment 12 p1911 A66-23700
 High-energy neutron emission from Sun studied by balloon-borne nuclear emulsion recording of proton track colliding with neutron 13 p2175 A66-26349
 Effect of impurity atoms or neutron irradiation on X-ray diffraction intensities of silicon and germanium crystals 15 p2559 A66-28625
 Irradiation of indium antimonide with slow neutron 17 p2983 A66-33128
 Crystal lattice defects in metals caused by neutron irradiation 18 p3120 A66-33621

NEUTRON FLUX**SA ATMOSPHERIC NEUTRON FLUX**

Neutron-group fluxes and variations with solar activity during IYQS observed by Elektron II 05 p0752 A66-15385
 Radiation damage to integrated silicon circuit and individual transistors when exposed to neutron flux 06 p0853 A66-16665
 Neutron albedo measurements on polar orbiting satellites 07 p1120 A66-17981
 South latitude cosmic-ray plateau determined by measuring cosmic radiation-caused charged particle and neutron fluxes 08 p1284 A66-19415
 Solar diurnal and semidiurnal variations during Forbush decreases based on neutron recordings, noting near and distant source 11 p1762 A66-22427
 Solar wind and geomagnetic storm effects on galactic cosmic ray 11-year variations and energy spectrum, from neutron monitor data 12 p1940 A66-24160
 Variations in cosmic ray neutron component intensity and solar corpuscular flux with H-component of geomagnetic field during magnetic storm 12 p1941 A66-24166
 Neutron irradiation effect on superconductive properties of tin and indium foils at low temperatures, noting decrease of critical temperature and field 14 p2364 A66-27641
 Fast neutrons of solar origin detected by observing protons recoiling from elastic collisions of neutrons with hydrogen nuclei in nuclear emulsion 18 p3188 A66-34824
 Silicon IR absorption spectra at various wavelengths before and after irradiation with neutron fluxes 19 p3442 A66-35821
 Cosmic-ray neutron production and flux distribution on sea level and mountain altitude measured with boron fluoride counter for Maxwellian energy distribution with shifted neutron temperature 22 p3972 A66-39680
 Angular dependence of charged neutron-producing component of cosmic rays, using 15-channel counter telescope on rotating platform with neutral monitor 24 p4268 A66-42913

NEUTRON PHYSICS

High-chromium ferrite steel Kh25T brittleness at 475 degrees C investigated, using neutron structural analysis 09 p1391 A66-20872

NEUTRON SCATTERING

Basic hypothesis concerning Earth radiation belts origin, discussing neutron albedo and effects of interaction between plasma and magnetic field 02 p0283 A66-11808
 Phonon spectra in aluminum single crystals investigated by means of inelastic scattering of slow neutrons 02 p0277 A66-12083
 Itinerant oscillator model of liquids covering classical velocity autocorrelation function of atom and neutron scattering experiments 04 p0547 A66-13809
 Cold neutron scattering by hydrogen in liquid argon, calculating scattering cross section and length for monatomic liquid 04 p0548 A66-13810
 Radiographic examination through steel using cold neutrons produced by placing polycrystalline beryllium neutron filter and single crystal bismuth gamma-ray filter in beam tube 06 p0884 A66-17030
 Integral equations describing multiple neutron Bragg reflections in mosaic crystal 11 p1742 A66-23409
 Polarized-neutron scattering by tri-vanadium silicide, identifying electronic

- susceptibility and modification in passing through superconducting transition 16 p2770 A66-30174
 Thermodynamic and optical properties of Ge, Si, diamond and GaAs, obtained by inelastic neutron scattering technique, used to measure vibrational spectrum 18 p3154 A66-33922
 High energy measurement of neutron-proton elastic scattering, noting diffraction peak existence, differential cross section and secondary forward peak 18 p3166 A66-34163
 Cross section of slow neutron scattering in superconductors and polarization of scattered electrons 22 p3964 A66-40308
 Vibration modes frequencies of lead telluride propagating in certain symmetric direction determined by inelastic neutron scattering 22 p3966 A66-40405
 Flame temperature measurements by thermal neutron probe providing data on measured and computed transmission vs Cd foil thickness 23 p4148 A66-41501
- NEUTRON SOURCE**
 Total counting rate and detected multiplicity spectrum of standard IGY neutron monitor analyzed on basis of neutron production and cosmic radiation components 11 p1765 A66-23144
- NEUTRON SPECTROMETRY**
 Neutron spectrometer consisting of beryllium filter and aluminum single crystal acting as monochromator 02 p0232 A66-12084
 Energy spectrometer based on back-scattered proton technique for medium-velocity neutrons 07 p1031 A66-17306
 Solar minimum measurements of fast neutrons at high altitude using balloons and rockets carrying anthracene-plastic phoswich 24 p4262 A66-42293
- NEUTRON SPECTRUM**
 Neutron radiation effects on silicon field effect transistors 05 p0739 A66-15489
 Atomic origins of transient nuclear radiation effects in electronics such as neutron and gamma radiation 12 p1918 A66-24680
 Barometric coefficient of Leeds neutron monitor determined by method of successive differences 13 p2176 A66-26360
 Flux of primary cosmic ray heavy nuclei measured with sandwich of C.2 and G.5 emulsions at magnetic latitude 42 degrees N, noting solar modulation as shown by neutron monitor data 16 p2794 A66-30720
 Low energy fast cosmic ray neutrons, measurements of energy spectrum and primary intensity variations, using organic scintillator in field of photomultiplier tube 18 p3199 A66-34885
- NEUTRON STAR**
 Cosmic X-ray sources in Scorpius and Crab nebula, examining creation of neutron stars from supernova explosion 03 p0423 A66-13029
 Properties of neutron star at absolute zero temperature, discussing ground state, particle models and energy spectrum 05 p0760 A66-14894
 Neutrino producing cooling reaction rates indicate that discrete X-ray sources located in direction of galactic center are not neutron stars 05 p0760 A66-14895
 Neutron star cooling tested by photon flux measurements indicative of effective temperature change 05 p0763 A66-15286
 Neutron star rotational flattening after formation in supernova implosion 21 p3810 A66-38467
 Surface properties, temperature effect, cooling and detectability of neutron stars, using pure iron and pure magnesium compositions 22 p3976 A66-39803
 Neutron star structure analysis using composite state equation 22 p3976 A66-39804
 Neutrino energy losses from vibrating neutron stars, noting density profiles 23 p4131 A66-41863
- NEWCOMB DERIVATIVE**
 Convective stability in plasma with horizontal magnetic fields, obtaining stability conditions 12 p1924 A66-24591
 Motion of planet Pluto, noting first-order perturbations with respect to planetary mass and giving tables of Newcomb operator coefficients 17 p2998 A66-32046
- NEWTON-BUSEMANN LAW**
 Busemann correction to Newtonian pressure law and resulting two types of optimum shapes 11 p1632 A66-22521
 Slender shapes of minimum pressure drag in hypersonic inviscid flow characterized by Newton-Busemann law 11 p1632 A66-22522
 Nonslender shapes of minimum pressure drag in flow characterized by Newton-Busemann pressure law 11 p1632 A66-22523
 Flow field around minimal-drag slender body examined by Newton-Busemann theory and gas dynamic theory 11 p1632 A66-22524
- NEWTON PRESSURE LAW**
 Newtonian pressure law and minimum resistance body in hypersonic aerodynamics 11 p1688 A66-22510
 Optimum slender body with variable skin friction coefficient, noting minimal drag design for hypersonic flow under Newtonian pressure distribution 11 p1631 A66-22513
 Modified Newtonian-Prandtl Meyer approximation technique to determine pressure distribution over blunt body 12 p1796 A66-23600
 Static pitching moment coefficient determination from location of center of pressure in right circular cone, using Newtonian impact mechanics 17 p2840 A66-32494
- NEWTON-RAPHSON METHOD**
 Newton-Raphson algorithm as tool for extracting solutions to nonlinear problems of optimal control and inequality state constraints 06 p0864 A66-16622
 Optimal free-space fixed thrust trajectories using impulsive trajectories as starting iteratives [AIAA PAPER 66-96] 06 p0956 A66-17094
 Optimum study of anticlastic deformations of elastic strips with tapered edges, using Newton-Raphson iteration method 11 p1780 A66-22328
 Newton-Raphson method iterative solution of two-point boundary value problem and application to trajectory optimization and tubular reactor design 11 p1680 A66-23276
 Newton-Raphson method solution of variational problems with inequality restraints on control variables 19 p3388 A66-35880
 Low thrust trajectory optimization, using Newton-Raphson method to solve nonlinear two-point boundary value problem [AIAA PAPER 65-698] 19 p3462 A66-35904
 Eigenvalue problems for systems of ordinary differential equations resolved computationally by use of quasi-linearization technique 19 p3310 A66-36046
 Thermodynamics of combustion and concepts of aerothermochemistry using Newton-Raphson iteration process, noting transfer phenomena of matter, heat and momentum 20 p3680 A66-38090
 Newton iterative procedure extended to solution of nonlinear integral equations 23 p4085 A66-41556
 General method for determining real solutions of set of nonlinear simultaneous equations, using digital computer 23 p4086 A66-41923
- NEWTON THEORY**
 Einstein equations for vortical and nonvortical gravitational fields applied with relativistic approximation to Newtonian gravitational field 08 p1256 A66-19272
 Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 12 p1915 A66-24889
 Composition, state and evolution of gravitational theory, noting Newtonian, Einstein and unified field stages 14 p2331 A66-27209
 Revision of fundamental laws of Newtonian mechanics, noting condition when relativity principle is not obeyed 16 p2748 A66-31400
 Misinterpretation of theories of light, noting no clear-cut and simple distinction or opposition between theories of Newton and Huygens 16 p2749 A66-31722
 Newtonian formulas for determining pitch and roll and normal force derivatives for various types of conical and spherical bodies 17 p2838 A66-32333
 Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 23 p4090 A66-41096
- NEWTONIAN FLUID**
 Definition, equations, static and dynamic problems and normal and shear stress functions of subfluids 03 p0354 A66-12531
 Three-dimensional configurations having minimum drag under assumption of base and wetted area while length and volume are free 04 p0453 A66-13459
 Entrance region Newtonian flow analysis in tube of circular cross section for possible use in viscometry and flow stability studies [AICE PREPRINT 19D] 04 p0511 A66-13935
 Laminar flow development of incompressible Newtonian fluid in hydrodynamic entrance region of flat duct 04 p0511 A66-13939
 Free steady state jet subject to axial tension applied to Newtonian liquids, noting effect of flow variables on dimensionless criterion 04 p0512 A66-14209
 Density and viscosity changes of lubricants in contact due to pressure changes in concentrated-contact lubrication [ASME PAPER 65-LUB-4] 04 p0527 A66-14240
 Flow of orientable fluid between coaxial cones, discussing fluid behavior for low and moderate velocity gradients 04 p0512 A66-14473
 Quantitative estimation of effect on hydrodynamic resistance of adding surface-active additives to turbulent fluid flow 07 p1023 A66-18158
 Slender bodies with minimum inviscid pressure drag derived, using hypersonic small disturbance approximation to shock expansion method [AIAA PAPER 66-129] 07 p0984 A66-18463
 Newtonian flow over fixed two-dimensional body in unsteady flow, emphasizing shock layer 08 p1164 A66-19129
 Pressure drop and heat transfer to Newtonian fluids in cooled pipes for laminar flow, establishing empirical correlation 10 p1620 A66-21272
 Newtonian flow model minimization of pressure drag of slender axisymmetric two-dimensional body subjected to isoperimetric constraints 11 p1631 A66-22511
 Drag minimization in slender bodies of revolution in hypersonic flow with Newtonian pressure distribution 11 p1631 A66-22512
 Nonslender bodies of revolution with minimum pressure drag, noting derivation of minimizing curves for Newtonian flow 11 p1631 A66-22514
 Transversal contour of minimum total drag of body in Newtonian flow 11 p1631 A66-22518
 Total drag minimization for three-dimensional body in Newtonian flow, assuming two planes of symmetry and constant skin-friction coefficient 11 p1632 A66-22520
 Hydrodynamics of free steady state jet subject to axial tension, numerical computation of perturbation corrections for Newtonian jets 12 p1797 A66-24031
 Low-speed capillary jets of Newtonian liquids discharging into air in perturbation analysis and boundary layer analysis 16 p2691 A66-31662
 Derivation of constitutive equations for incompressible mixtures of Newtonian fluids using entropy production inequality 17 p2905 A66-31926
 Minimum drag bodies with elliptical cross section, using Newtonian flow theory and calculus of variations 17 p2838 A66-32346
 MHD approximation of laminar duct and channel flow of electroconductive viscous Newtonian fluid 17 p2971 A66-32861
 Iteration scheme based on Newton approximation method applied to two-dimensional and rotationally symmetric flows past obstacles 17 p2913 A66-33066
 Newton law for simple inviscid fluid using Hamilton principle, emphasizing physical interpretation of L_{in} constraint 18 p3102 A66-34922
 Stress effects on plane creeping Newtonian flows of incompressible second-order fluids 18 p3103 A66-34929
 Stability of liquid Newtonian jets ejected from circular capillary tubing into stagnant air, noting influencing factors such as nozzle

turbulence, velocity profile development and ambient medium 20 p3545 A66-37509

Two-dimensional unsteady flow of second-order incompressible fluids, noting analogies to Newtonian case 21 p3728 A66-39437

Finite difference analysis of viscous laminar converging flow in conical tubes, assuming parabolic inlet velocity profile and simplified motion 21 p3729 A66-39450

Rheology theories of material deformation and flow including classical theories of elasticity and hydrodynamics covered by nonlinear viscoelasticity 22 p3898 A66-40019

Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244

Slender bodies with minimum inviscid pressure drag derived, using hypersonic small disturbance approximation to shock expansion method 23 p4011 A66-41880

[AIAA PAPER 66-129] Contraction coefficient of Newtonian fluid ejected from capillary nozzle under high tangential stress 24 p4195 A66-42719

NICHROME

Sintered Kh20N80 nichrome powder properties and preparation by simultaneous reduction of chromium and nickel oxides 01 p0087 A66-10746

Capillary impregnation for preparing poreless materials from titanium carbide and nichrome 08 p1238 A66-18896

Temperature dependence of electrical resistance of thin nichrome films investigated by vacuum deposition on mica base 17 p2939 A66-31969

Sintered Kh20N80 nichrome powder properties and preparation by simultaneous reduction of chromium and nickel oxides 18 p3124 A66-34982

NICKEL

Stress and temperature effects on nickel creep strength after prestressing at 4.2 and 300 degrees K 03 p0383 A66-13126

Vacuum thermal etching of nickel and etch figure development by boron addition 03 p0383 A66-13127

Lattice and grain boundary self-diffusion coefficients of radioactive nickel 63 into high purity nickel measured over temperature range 650-475 degrees C 04 p0535 A66-13746

Ion-pairing process in nickel and lithium doped germanium 04 p0565 A66-14270

Matrix elements of electron-phonon interaction and electric resistance in nickel, using electronic structure of Fermi surfaces and phonon spectrum 06 p0894 A66-16175

Specific heat of iron, cobalt and nickel in high temperature range measured, using quasi-adiabatic operating calorimeter 08 p1240 A66-19255

Fe, Ni and Co in gallium arsenide determined by tunnel spectroscopy 08 p1278 A66-19624

Compositional variations in thin evaporated nickel-iron films 10 p1577 A66-21555

Nickel abundance in solar spectrum determined, based on atmospheric model 11 p1772 A66-22774

Domain structure and reverse magnetization of single crystal nickel films 11 p1754 A66-22816

Low energy electron diffraction observation of calibrated epitaxial nickel film on /111/ copper 12 p1894 A66-23912

Condensed nickel and iron films measured for tensile strength and microhardness 13 p2106 A66-25333

Equilibrium in nickel corner of nickel-titanium-borium system 13 p2109 A66-25878

Relation between angular dispersion and grain size in evaporated permalloy films 14 p2352 A66-26892

Magnetostatic model for perpendicular anisotropy in polycrystalline nickel-iron thin films 14 p2352 A66-26893

Anisotropic resistance in permalloy films based on imperfection orientation model 14 p2352 A66-26895

Magnetostatic interaction effect on real and imaginary parts of transverse biased permeability in thin Ni-Fe films 14 p2352 A66-26896

Lever mechanism for magnetization creep in nickel-iron thin films in longitudinal DC and transverse AC field 14 p2353 A66-26898

Layered film of Cr and NiFe exhibit biased hysteresis loop in easy axis direction and asymmetric hysteresis loops in hard axis direction 14 p2353 A66-26901

Anisotropy spectrum in nonmagnetostrictive permalloy films 14 p2353 A66-26902

Uniaxial anisotropy field measurement for magnetic annealing of permalloy films 14 p2353 A66-26903

Composition dependence of irradiation-induced uniaxial magnetic anisotropy energy of permalloy films 14 p2354 A66-26904

Torsional strain sensitivity and absolute compositional analysis of permalloy films 14 p2354 A66-26905

Magnetic properties of vacuum deposited iron nickel films 14 p2354 A66-26908

Bias-sputtering of nickel-iron thin films for memory elements 14 p2354 A66-26909

Positive and negative NiFe magnetostriction film exhibits striped domain when evaporated at oblique incidence 14 p2355 A66-26912

Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 14 p2359 A66-27184

18 percent nickel maraging steel properties suitable for welding 16 p2723 A66-30321

Self-lubricating properties of composites of porous nickel and nickel-chromium alloy impregnated with barium fluoride-calcium fluoride eutectic [ASLE PAPER 66AM 1C2] 16 p2710 A66-30404

Plasma arc welding of nickel and high nickel alloys 16 p2715 A66-31436

Solubility curve of tantalum in nickel, determining cause of resistance anomalies observed in nickel-tantalum systems 17 p2940 A66-32968

Program-controlled module design using strips of nickel foil for welding of flatpack assemblies 17 p2930 A66-33121

Fe, Ni and Co in gallium arsenide determined by tunnel spectroscopy 17 p2984 A66-33138

Silicon, iron and nickel in solar corona determined by method of Pottasch 18 p3233 A66-34575

Iron and nickel lines in solar UV spectrum, abundance of various metallic elements in solar atmosphere, electron collision cross sections and oscillator f-values of electron transitions 18 p3237 A66-35050

Room and cryogenic temperature mechanical properties and microstructure of electroformed nickel 20 p3582 A66-37090

Gold-plated nickel used for printed wiring in parallel-gap welding of integrated circuits to provide visual criteria for acceptable welds 20 p3582 A66-37621

Butler iron meteorite composition, noting very high concentration of germanium, gallium and nickel exhibiting Widmanstätten pattern 22 p3978 A66-40014

Mechanical properties, coefficient of linear expansion and microstructure of aluminum-based sintered-powder alloy containing silicon and nickel 22 p3937 A66-40884

Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 24 p4257 A66-42732

NICKEL ALLOY

SA INCONEL

SA PERMALLOY

Graphite content effect on antifriction properties of graphitized nickel-based copper and iron alloys 01 p0087 A66-10745

Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 01 p0087 A66-10749

Corrosion resistance and anodic behavior of Kh18N9 steels with various nickel-manganese-carbon-titanium contents 01 p0088 A66-10987

Nickel-chromium base alloys considering aircraft and industrial gas turbine application 02 p0244 A66-11740

Creep and fracture of series of nickel-cobalt alloys due to variation in stacking fault energy, noting incidence of annealing twins 02 p0245 A66-11947

Erosion, oxidation, loss of strength and

reduction of ductility resulting from long-time elevated temperature stressed exposure of nickel alloy used in jet engine design [AIAA PAPER 65-744] 03 p0381 A66-12583

High temperature nickel and cobalt superalloys for turbojet engines [AIAA PAPER 65-741] 03 p0382 A66-13052

Casting technique based on directional solidification for nickel and cobalt alloys used in gas turbine blades [AIAA PAPER 65-742] 03 p0382 A66-13053

Improvement of heat resistance of nickel by high temperature thermomechanical treatment 03 p0385 A66-13173

Effect of varying percentages of constituent elements in alumina dispersion-strengthened copper-nickel alloys, listing creep rupture properties 04 p0534 A66-13378

Postweld heat treatment on nickel alloy weld deposit noting metallography, microhardness and room temperature tests 05 p0698 A66-14515

Submerged arc welding of 18 percent maraging steel 05 p0685 A66-14516

Boron addition induced nickel heat resistance measured by internal friction as function of elastic oscillations 05 p0699 A66-14690

Short-circuiting gas metal-arc welding of high nickel alloys for manufacture of liquid rocket engine components with aerospace quality 05 p0686 A66-14691

Effects of prior low temperature deformation on subsequent creep rupture behavior of alloys [ASME PAPER 65-WA/MET-14] 05 p0703 A66-15684

Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12] 05 p0703 A66-15686

Thorium dioxide strengthened nickel and nickel molybdenum alloys, discussing production via selective reduction, strength, creep rupture, stability and ductility characteristics 06 p0893 A66-15943

Selective separation of nickel titanium and nickel aluminum alloys and electrochemical behavior in various electrolytes 06 p0896 A66-16542

Decay of K-state in Ni-Cr, Ni-Cr-Mo and Fe-Ni-Cr-Mo alloys studied in terms of electric conductivity during plastic deformation 06 p0896 A66-16606

Phase work hardening of austenitic Fe-Ni alloys in phase transformation process 06 p0896 A66-16607

Diluted nickel alloys, describing calorimetric determination of specific heat at low temperatures 06 p0897 A66-16939

Light and electron microscopic metallography and X-ray diffraction microanalysis of phase reaction during heat treatment of Ni-base superalloy 08 p1236 A66-18757

Metallographic identification of borides in Udimet 700 08 p1237 A66-18765

Iron and nickel concentrations effect on composition, quality and current yield of electrodeposition of titanium from aqueous solutions 08 p1229 A66-18794

Perpendicular anisotropy of Ni and Fe films and saturation magnetization under various pressures 08 p1270 A66-19011

Extensometer system and specimen alignment fixture for cylindrical or flat creep specimens 09 p1465 A66-19949

Effect of thermal and thermomagnetic treatment of nickel-cobalt ferrite single crystal on rotational magnetic hysteresis losses 09 p1412 A66-19983

Thermoelectric power of actual ferromagnetic metals over wide temperature range, examining effect of alloying and solute magnetic ions 09 p1425 A66-20080

Nickel alloy testing for thermal fatigue and bow evaluation, using miniature airfoil specimens, in aircraft gas turbine application [SAE PAPER 660056] 09 p1388 A66-20154

Neutron diffraction in ordered nickel-manganese alloys with near equilibrium distribution of atoms over lattice points 09 p1389 A66-20612

X-ray determination of elastic constant of

- pure nickel and alloy with aluminum 10 p1547 A66-21982
- Molybdenum effect on properties of chromium-nickel alloy, noting hardness and strength 11 p1716 A66-22748
- Nickel-chromium alloys with niobium in study of precipitation hardening and hardness 11 p1716 A66-22749
- Heat resistant nickel-based alloys for gas turbine blades and disks 11 p1716 A66-22752
- Crystalline structure and magnetic properties of single-crystal films of iron-nickel alloys, for application as memory elements of computers 11 p1753 A66-22807
- Induced anisotropy of ferromagnetic atom pairs and magnetostriction stresses in Fe-Ni thin films subject to annealing 11 p1755 A66-22818
- Creep behavior in Ni-Fe alloys at high temperatures, using one composition inside ordered regions and another outside 11 p1717 A66-22993
- Phase determination by electron-probe X-ray microanalysis of nickel aluminide self-bonding coating produced by flame-spraying 12 p1892 A66-23560
- Hardness, coercive force, saturation induction and electric conductivity during precipitation hardening of two Co-Ni alloys with Ti and Al admixtures 12 p1894 A66-23967
- Stress rupture of double extruded wrought alloy of cast nickel-base superalloys 12 p1895 A66-24373
- Age hardening response correlated with structural observations of iron-nickel-cobalt alloys 12 p1895 A66-24374
- Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12] 12 p1896 A66-24542
- Magnetoresistance effect applied to Rotatable Initial Susceptibility II films, explaining resulting hysteresis loops and torque curves 13 p2161 A66-25183
- Age-hardening of Fe-Ni-Ti alloy martensite associated with formation of ordered Ni-Ti phase 13 p2106 A66-25331
- Electrical resistance and thermoelectric power of Ni-Cu solid solutions near Curie point 13 p2162 A66-25407
- Domain boundaries and superdislocations of structure of Alnico V by thin film electron transmission microscopy 14 p2311 A66-26882
- Machining characteristics of 18 percent nickel maraging steel [ASTME PAPER EM66-163] 14 p2311 A66-26956
- Cyclic strain fatigue tests and fatigue failure curve for age-hardened nickel based alloy K-Monel [ASME PAPER 66-MET-9] 14 p2312 A66-26977
- High-temperature nickel sheet alloys as affected by composition, production methods and heat treatment [ASME PAPER 66-GT-104] 14 p2312 A66-27003
- Hardening and softening of nickel-alumina alloys 15 p2519 A66-28533
- Martensitic transformation of Ni-Fe alloy from fcc to bcc lattice, noting stress produced by chemical free energy difference between austenite and martensite structure 15 p2520 A66-28649
- Precipitation behavior of nickel-molybdenum and nickel-molybdenum-chromium alloys 16 p2722 A66-30310
- Age hardenable nickel-copper steels with strength achieved by copper phase hardening 16 p2723 A66-30319
- Cobalt doping effect on magnetic properties of nickel thin films prepared by chemical precipitation 16 p2774 A66-30694
- Effect of annealing in magnetic field on structural and magnetic properties of thin films prepared from nickel 16 p2774 A66-30695
- Plasma arc welding of nickel and high nickel alloys 16 p2715 A66-31436
- Cobalt and nickel eutectic alloys modification with selected elements for high temperature application, noting microstructure and tensile behavior 16 p2726 A66-31460
- Grain growth from solution precipitation and grain coalescence in liquid phase sintering of W-Ni-Fe and W-Ni-Cu alloys 17 p2939 A66-32393
- Element distribution in cermet alloys of W-Ni-Fe system determined by X-ray spectral analysis 17 p2940 A66-32848
- Nickel, nickel-zinc and magnesium-zinc ferrite thin films, using chemical deposition on alumina substrates for millimeter wave application 18 p3153 A66-33732
- Polycrystalline nickel aluminide lightly deformed at 77, 298 and 900 degrees K exhibit fine slip band structure with mostly screw dislocations 18 p3121 A66-33747
- Phase transformation and precipitation processes as function of aging treatment in 15 percent Ni maraging steel 18 p3122 A66-33752
- Cold working effect on room temperature tensile properties of TiNi intermetallic compound 18 p3123 A66-33756
- Heat resistance in air of dispersion hardened nickel alloys containing certain oxides prepared by powder metallurgy methods 18 p3123 A66-33785
- Spot welding conditions for nickel alloy sheet material including nimonic PK33 and Rolls Royce alloy C263 in 16 and 22 SWG thicknesses 18 p3116 A66-33914
- Structural transformations in alnico alloy with titanium studied by X-ray 18 p3123 A66-34401
- Diffusion of nickel in solid solution and two-phase alloys of nickel-titanium system 18 p3123 A66-34402
- Abnormal X-ray interference pattern change during aging of nickel-beryllium alloys 18 p3124 A66-34405
- Thermal conductivity and electrical resistivity measurements on nickel alloyed steels in cast and wrought conditions 18 p3124 A66-34895
- Graphite content effect on antifriction properties of graphitized nickel-based copper and iron alloys 18 p3117 A66-34981
- Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 18 p3124 A66-34983
- Plessite composition and texture, discussing possible origin in terms of meteorite thermal history 19 p3460 A66-35732
- X-ray determination of elastic constant of pure nickel and alloy with aluminum 19 p3381 A66-35864
- Nickel aluminide structure, examining arrangement of Ti, Cr and W in lattice via X-ray spectroscopy 19 p3381 A66-35928
- Hardening during deformation in stoichiometric nickel manganite alloy noting temperature effect, surface characteristics and electric resistance 19 p3381 A66-35930
- Phase separation from tempering of martensite in iron-nickel alloys with aluminum additions 19 p3386 A66-36426
- Long-time relaxation persistence in heat resistant nickel-chromium alloy 20 p3584 A66-37696
- Particle size effects in age hardening of high temperature Ni-based alloys 20 p3586 A66-38094
- Metallic impurities effect on tensile strength of binary nickel alloys under tension 22 p3937 A66-40924
- Casting technique based on directional solidification for nickel and cobalt alloys used in gas turbine blades [AIAA PAPER 65-742] 23 p4079 A66-40973
- Cold-drawing effect on creep behavior of nickel-aluminum alloy at various temperatures through changes in fracture, precipitates and structure 24 p4227 A66-42309
- Magnetic transformation and effect of plastic strain on shear modulus of Fe-Cr-Ni alloys 24 p4227 A66-42310
- Alpha and gamma solubility limits in Fe-Ni phase diagram at temperatures above 500 degrees C, using quench-and-anneal and diffusion-couple techniques and electron probe microanalyzer 24 p4227 A66-42365
- NICKEL-CADMIUM BATTERY**
- Rechargeable chemical batteries using nickel-cadmium and silver-cadmium electrodes and chemical reaction 01 p0014 A66-10365
- Satellite solar array systems utilizing adhydrode Ni-Cd and Ag-Cd cells and HF silicon power transistors 02 p0180 A66-11281
- Heat dissipation values for spacecraft silver oxide-zinc primary and nickel oxide-cadmium secondary batteries determined with calorimeter 03 p0323 A66-12772
- Nickel-cadmium battery development for use in D-I satellite undertaken by French CNES /National Center/ of Space Research/ 03 p0323 A66-13025
- Electric power supply for medium-sized satellite, considering onboard solar cell system, cadmium-nickel batteries, regulators and converters 07 p0991 A66-17821
- Nickel-cadmium, silver-cadmium and silver-zinc alkaline batteries for secondary spacecraft power supplies [AIAA PAPER 64-455] 08 p1168 A66-18813
- Charge current control circuit for nickel-cadmium cells with control electrodes 08 p1169 A66-19506
- Photomicrographic analysis of reactions during charging and discharging of nickel-cadmium alkaline cells 08 p1170 A66-19643
- Charging current density, electrolyte concentration and temperature during charge effects on porous cadmium electrodes in nickel cadmium cells 08 p1171 A66-19645
- Oxygen reduction in sealed nickel-cadmium cells 08 p1171 A66-19646
- Effect of low temperature on maintenance of vented sintered-plate nickel-cadmium batteries, noting charging methods 08 p1173 A66-19659
- Sealed nickel-cadmium and silver-cadmium batteries for aerospace use noting construction, electrical characteristics and life cycle tests 08 p1173 A66-19660
- Variation of mean thermal conductivity of nickel-cadmium cell determined as function of overcharge current and environmental temperature [AIAA PAPER 64-751] 13 p2007 A66-26652
- Auxiliary electrode in sealed cell to protect cell against destructive pressure rise during charging [AIAA PAPER 64-752] 13 p2008 A66-26653
- Sealed nickel-cadmium batteries for space power systems, noting 100 amp-hr cell with adhydrode and systems considerations relating to heat transfer and charge control 20 p3497 A66-37161
- Nickel-cadmium batteries commercial aircraft application and maintenance problems 20 p3497 A66-37162
- Sealed nickel-cadmium batteries for aircraft-electrical systems, noting T-39B aircraft 20 p3497 A66-37163
- Bipolar Ni-Cd cells for ruby lasers and power sources to yield high energy pulses for firing pyrotechnic devices 23 p4022 A66-41760
- Performance characteristics of sintered plate nickel-cadmium, silver-cadmium and silver-zinc batteries regarding energy output, discharge voltage, charging cycle life, etc 23 p4023 A66-41769
- NICKEL COMPOUND**
- UV optical absorption of cobalt and nickel in thin films 05 p0737 A66-15110
- Variation in coercivity of magnetization loops of multilayer films of nickel as function of rate of rise in applied magnetic field 10 p1575 A66-21412
- Thermodynamic parameters in heterogeneous reduction equilibrium of nickel titanate with CO from 1285 to 1435 degrees K 11 p1719 A66-23449
- Concave-convex growth spirals due to screw dislocation in nickel bromide 15 p2563 A66-28730
- Electrical properties of nickel ferrite in terms of Jonker model, noting magnitude of energy gap between Fe and Ni levels and mobilities of electrons and of positive holes 16 p2781 A66-31215
- Secondary mode of nucleation during sublimation growth of nickel bromide, noting formation mechanism 19 p3434 A66-35405
- Nonaqueous lithium-nickel halide batteries capabilities and limitations, explaining methods of selection and evaluation of solvent, solutes and combinations for electrolytes 23 p4021 A66-41752
- NICKEL OXIDE**
- Electroconductivity, Seebeck effect and charge carrier mobility in Li-doped NiO 14 p2366 A66-27766

Structure and electrical resistance as function of temperature for Nichrome-silicon monoxide cermet films on single crystal Si substrates 16 p2783 A66-31425

NICOTINE

Purification of enzyme responsible for degradation of nicotine to 6-hydroxynicotine 09 p1339 A66-20877

NIGHT IONOSPHERE

SA AIRGLOW

Nocturnal auroral drift in meridional direction 01 p0064 A66-11163

Excessive cosmic radiation absorption in lower nocturnal ionosphere at middle geomagnetic latitudes during Forbush effects 04 p0514 A66-13443

Ambipolar diffusion parameter calculation by Quinn and Nisbet found erroneous for night F layer 08 p1219 A66-19420

Spatial and time variations in ionospheric absorption at long wavelengths for small elevations of Sun and at nighttime 08 p1220 A66-19778

Binary transport of electrons and ions in equatorial ionosphere and effect on brightness of 6300 angstrom airglow at Huancayo 09 p1372 A66-20376

Intensity variation of 6300 angstrom night airglow and rate coefficient of ion-atom interchange reaction 09 p1372 A66-20381

Nocturnal electrical conductivity of equatorial ionosphere 09 p1373 A66-20384

Midlatitude trough in F-region ionization of night ionosphere revealed by ion trap on polar-orbiting satellite 11 p1699 A66-23134

Corpuscular intrusions into Earth magnetosphere involving entire auroral zone and occurring only on night side 12 p1871 A66-24296

Atomic ions of meteoric origin indicated as source of midlatitude E region in IQSY rocket measurement 15 p2492 A66-30033

Subsonic parachute-borne blunt probes for charged particle measurement in ionosphere 15 p2493 A66-30039

Nightglow emission from atomic oxygen caused by dissociative recombination in F region 16 p2694 A66-30707

Monte Carlo calculation of nightglow excitation and maintenance of nighttime ionosphere by low energy protons 18 p3169 A66-34518

Magnitude of vertical drifts in F-region during high and low sunspot years, considering effect of ambipolar diffusion along geomagnetic lines of force 19 p3347 A66-35923

Chemical equilibrium in nighttime ionosphere, estimating diffusion coefficients, noting role of transport processes 20 p3554 A66-38207

Spatial and time variations in ionospheric absorption at long wavelengths for small elevations of Sun and at nighttime 21 p3732 A66-38774

Negative ion associative detachment reaction with atomic oxygen in determination of nighttime D region electron density profiles at high latitudes 22 p3905 A66-39945

Nighttime F layer recombination and diffusion coefficients estimated from incoherent scatter measurements of electron densities and electron and ion temperatures 22 p3910 A66-39983

Sporadic E layer formation at night, noting ionization sources and intensity 23 p4064 A66-41645

Comparison of various geomagnetic variations associated with corpuscular precipitation at South Pole, noting day-night effect 23 p4064 A66-41688

Anomalous enhancement of ionospheric F-2 region electron density at post-sunset time in low and equatorial latitudes 24 p4198 A66-42462

Rocket photometric measurements of weak airglow emission at 6300 angstrom oxygen line 24 p4199 A66-42467

NIGHT SKY

Data concerning planetary scale of intensity variations of 5577 angstrom emission in night airglow 04 p0515 A66-13848

Night airglow intensity measured at Kerguelen Islands in 1963, rejecting observations contaminated by auroral light 05 p0672 A66-15039

Upper atmospheric research using spectroscopic study of absorption bands and night-sky radiation, celestial bodies as UV and X-ray sources and atmospheric light scattering 06 p0876 A66-16310

Night sky sources for soft X-rays, examining data obtained by Aerobee 4.70 detectors 10 p1598 A66-21102

Satellite observational data indicates that nighttime electron temperatures in upper F region are larger than neutral gas temperature 12 p1868 A66-23559

VLF anomalies on midlatitude paths during local nighttime not caused by solar flares, nuclear detonations or magnetic storms 13 p2074 A66-26365

Night sky darkness explained as limitation of background radiation by various factors in static, steady state and evolving universes 13 p2075 A66-26602

Rocketborne photometer data analysis of night sky airglow and spectrum in 6300 angstrom region 15 p2482 A66-28494

Space correlation of main emission lines for night sky emission spectra and altitude distribution of sodium luminescence 15 p2495 A66-30060

Night sky and zodiacal light polarization near 5000 angstroms over celestial sphere, noting dependence of zodiacal light distribution on angular distance from sun 16 p2698 A66-31259

Anomalous brightness of post-twilight evening sky in near IR, considering zodiacal light 17 p2920 A66-32998

Image intensifier application as aid to visual acquisition of weak luminous moving targets against night sky 23 p4071 A66-41676

Molecular nitrogen ions in nocturnal upper atmosphere at middle latitudes, noting space radiation bombardment 23 p4064 A66-41681

Magnetospheric phenomena related to geomagnetic tail noting F region, polar auroras and solar Lyman alpha radiation scattering in night sky 24 p4203 A66-43029

NIGHT VISION
Visual factors in aviation, examining night vision and dark adaptation, scanning technique to locate object, glare and dazzle from artificial source 10 p1490 A66-22132

Cialdea-Bagolini optometer investigation of far point in scotopic vision and nocturnal myopia 22 p3856 A66-40501

NIHON YS-11 AIRCRAFT
YS-11 transport aircraft fatigue testing, noting wing fatigue damage and equipment used 13 p2197 A66-26099

NIKE-CAJUN ROCKET
Experiments for space dust collection, describing rocketborne micrometeorite collection during Venus Fly Trap and Nike-Cajun flights 11 p1771 A66-22649

Nike-Cajun rocket investigation of equatorial D and E region parameters and effect on electrojet 15 p2493 A66-30035

NIKE-TOMAHAWK ROCKET
Electric analogy to derive sound laboratory test specification and procedure for testing Nike-Tomahawk payload vibration 08 p1308 A66-18928

NIKE X
S NIKE-ZEUS ROCKET
NIKE-ZEUS ROCKET
Track-while-scan automatic acquisition radar for Nike-Zeus system 03 p0331 A66-12368

NIMBUS SATELLITE
Cloud height, ground- and sea-surface temperatures, ice forms, terrain features and soil moisture information from Nimbus I satellite equipped with TV cameras and IR radiometer 03 p0360 A66-12365

Design, performance and operation of high-resolution IR radiometer mounted on Nimbus satellite 04 p0518 A66-13468

Automatic picture transmission of Nimbus I meteorological satellite, considering frequency choice, vehicle position, antenna, image reception, etc 08 p1180 A66-18612

Relative spectral response of vidicons in Nimbus satellite system 09 p1403 A66-20520

Search for terrestrial life at kilometer resolution, using Tiros and Nimbus meteorological satellite photographs 10 p1605 A66-21209

Earth atlas based on high altitude photography, Nimbus and IR imagery and high altitude radar 10 p1532 A66-21527

Analysis of AVCS and HRIR pictures from Nimbus I satellite 11 p1729 A66-22326

Ice and snow fields in polar regions as observed by high resolution camera on Nimbus satellite 11 p1729 A66-22327

Two-channel satellite-borne radiometric system to furnish temperature information for SST flight planning, discussing conceptual design, operating mode and data handling procedures [AIAA PAPER 66-372] 12 p1872 A66-24500

Performance characteristics, attitude stabilization systems, power sources and optical systems of Tiros, TOS and Nimbus weather satellites 15 p2605 A66-28680

Vacuum thermal environmental testing of Nimbus I control system 16 p2809 A66-30504

Telemetry systems of Tiros and Nimbus satellites 16 p2650 A66-30558

Book on meteorological satellite history and design, noting Tiros and Nimbus 16 p2809 A66-30875

High resolution IR radiometer on Nimbus I satellite for providing detailed night cold information 17 p2927 A66-33344

Operational geographic correlation /gridding/ of Nimbus meteorological data [AIAA PAPER 66-438] 18 p3128 A66-33645

APT signal reception from Nimbus and Tiros satellites, describing APT equipment and signal conversion system 20 p3518 A66-37849

Antarctic pack ice boundaries established from TV and IR pictures taken by Nimbus I meteorological satellite 21 p3735 A66-39491

High resolution IR scanning system and vidicon automatic picture transmission of Nimbus II and ground station printout instrumentation 21 p3821 A66-39497

Hybrid PCM telemetry system packaging for Nimbus B spacecraft 21 p3706 A66-39585

Double cloud vortex near Antarctica detected by Nimbus I high resolution IR 22 p3942 A66-40053

NIMONIC ALLOY
Nickel-chromium base alloys considering aircraft and industrial gas turbine application 02 p0244 A66-11740

Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 05 p0704 A66-15820

Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 23 p4080 A66-41385

NIOBIUM
Hot plastic deformation effect on gas content, structure and mechanical properties of industrial molybdenum, niobium and titanium 01 p0086 A66-10451

Diffusivities of oxygen in polycrystalline niobium at 600 and 815 degrees C 02 p0243 A66-11721

Nuclear spin-lattice relaxation times of V 51 and Nb 93 and nuclear magnetic resonance line profiles V 51 in Type II superconductors 02 p0276 A66-12026

High vacuum purification and effect on mechanical properties of niobium single crystals 02 p0246 A66-12196

Niobium elastic constants tabulated for various temperatures, using RF pulse-echo method 04 p0536 A66-13754

Niobium resistivity dependence on hydrogen-impurity content at various temperature ranges 05 p0699 A66-14697

Individual and combined effects of tungsten, molybdenum and zirconium additions on hardness of recrystallized niobium at various temperatures 05 p0699 A66-14698

Ultrahigh-vacuum creep behavior of columbium and tantalum alloys at high temperature and over long period 06 p0894 A66-16069

Vacuum diffusion welding of zirconium, niobium and tantalum carbides to high-melting niobium, tantalum, molybdenum and tungsten 06 p0887 A66-16696

Quantitative determination of Nb in large amounts of Zr and Ti in large amounts of Nb and Zr at high temperature, using oscillographic polarography 06 p0823 A66-16840

Phase diagram of ternary system niobium-aluminum-nickel with results of thermal, microstructural and X-ray phase analyses

- and hardness
measurements 07 p1050 A66-18063
- Oxidation kinetics of pure tungsten and tungsten alloys with various niobium content at high test temperatures 07 p1050 A66-18065
- Zone melting effect on mechanical properties of niobium on isochronal annealing after cold
swagging 07 p1052 A66-18351
- Hydrogen solubility in liquid niobium at high temperatures and partial pressures 08 p1241 A66-19377
- Anomalous densities of states in normal tantalum and niobium 09 p1417 A66-20029
- Magnetothermal effects in type II niobium rod superconductors in parallel and perpendicular magnetic field 09 p1421 A66-20056
- Superconductivity in Ag doped GeTe and monoxides of Ti and Nb 09 p1423 A66-20070
- Heat conductivity, enthalpy, entropy and isobaric-isothermal potential of niobium calculated from zero to 2740 degrees K 09 p1388 A66-20138
- Titanium vapor pressure determined from evaporation rate of titanium from titanium-niobium wire electrically heated in vacuum 09 p1391 A66-20865
- Anisotropy of Snoek relaxation measured for oxygen and nitrogen, in niobium 10 p1576 A66-21554
- Welding characteristics of Ti-7Al-2Cb-1Ta plate including strength, toughness and cracking resistance 11 p1717 A66-22863
- Mechanical deformation used in fabrication of composite made of continuous columbium wires in copper matrix by drawing, noting optical inspection 12 p1895 A66-24378
- Density of six niobium spheres which are intended for use as rotors in superconducting gyroscope 13 p2106 A66-25072
- Magnetic field-temperature relations of type II superconductor Nb upon adiabatic magnetization of superconducting state 14 p2350 A66-26877
- Kh16N15M2B steel properties and effects of grain size and Nb/C ratio 15 p2519 A66-28536
- Heat transfer coefficients between layers of thin film structure on niobium and aluminum substrates at liquid helium temperature 15 p2616 A66-28763
- Thermal conductivity coefficient and integral hemispherical degree of blackness of niobium at temperatures above 1000 degrees C 15 p2523 A66-29217
- LF resonances in mixed state of pure niobium, noting line shape and damping decrease 16 p2770 A66-30186
- Oxidation of powdered titanium, zirconium, hafnium, vanadium, niobium and tantalum 16 p2724 A66-31355
- Annealing of lightly deformed columbium single crystals with parallel twins or parallel and intersecting twins 16 p2726 A66-31461
- Tantalum and niobium powder properties effect on plastic characteristics of compacted samples, noting ductility and tensile strength dependence on particle size and chemical composition 17 p2939 A66-32391
- Pressure effect on transition temperature of niobium 18 p3152 A66-33553
- O-O and O-N clusters in niobium detected via internal friction and elastic aftereffect measurements, noting equilibrium, kinetic properties, binding enthalpy, etc 18 p3121 A66-33728
- High temperature, low pressure solubility of nitrogen /gas/ in niobium /solid metal/ 18 p3121 A66-33730
- Elastic relaxation effect due to diffusion of interstitial hydrogen in tantalum and niobium 18 p3123 A66-34058
- Niobium dissolution kinetics in iron carbide 19 p3386 A66-36447
- Niobium addition effect on solid state transformations in vanadium-tantalum alloys 19 p3387 A66-36452
- Tension and compression tests on single and polycrystalline niobium, examining twinning, slip and catastrophic flow 19 p3387 A66-36727
- Enthalpy of impure sample of niobium calculated from simultaneous measurements of magnetization and heat developed during process of magnetizing type II superconductor 20 p3616 A66-37445
- Heat conductivity, enthalpy, entropy and isobaric-isothermal potential of niobium calculated from zero to 2740 degrees K 21 p3752 A66-39410
- Temperature dependence of relaxation-type ultrasound attenuation maxima in plastic deformation of molybdenum and niobium single crystals 22 p3965 A66-40322
- Superconducting fluxline pinning of niobium foils by twin boundaries, resulting in anisotropic critical current 24 p4255 A66-42429
- Anodizing techniques used in diffusion studies of TiCb system 24 p4228 A66-42616
- Carbon solubility in Ta, Nb and V at temperatures from 1500 degrees C to eutectic temperatures 24 p4228 A66-43062
- Nb-Zr strip superconductor for stabilization of critical current anisotropy and coil degradation in magnets 24 p4186 A66-43176
- NIOBIUM ALLOY**
- Magnetic flux jumps in hard Nb3Sn and NbZr superconductors in pulsed magnetic fields 01 p0118 A66-10253
- Polythermal and isothermal cross sections of phase diagram of titanium-niobium-chromium system at high temperatures 01 p0086 A66-10453
- Superconducting properties of niobium-gallium alloys at high temperatures, high current densities and high magnetic field intensities 01 p0123 A66-10703
- Thermodynamic properties of cobalt-niobium alloys determined by emf method measured between 1275 and 1425 degrees K 01 p0088 A66-10941
- Titanium and zirconium technology, comparing physical and mechanical properties with structural metals, noting niobium in nuclear application 02 p0244 A66-11744
- Vacuum creep study of mechanical behavior of solution-hardened alloy of niobium containing tantalum, tungsten and molybdenum from 980 to 1370 degrees C 03 p0380 A66-12491
- Mechanical characteristics of columbium steels and synthetic iron-carbon-niobium alloys as function of temperature at which they are converted to austenite 03 p0381 A66-12540
- Polycrystalline niobium elastic properties and effects of alloying with chromium and iron 03 p0383 A66-13128
- Binary systems of niobium pentoxides with various oxides for improvement of oxidation behavior of niobium alloys 03 p0386 A66-13210
- Pauli paramagnetism influence on upper critical fields of Nb-Ti alloys and measurements of various properties 04 p0560 A66-13720
- Electrical resistivity of Nb-Zr alloys of four compositions determined as functions of temperature from 4.2 to 273.2 degrees K with nearly linear dependence 04 p0562 A66-13740
- Alloying effect on physico-mechanical properties of niobium, e.g., Young modulus, strength, plasticity and thermal expansion 05 p0699 A66-14686
- Variation of interdiffusion coefficient with composition for niobium-vanadium alloys determined for various diffusion temperatures 05 p0702 A66-15467
- Regularities in hardness variations in niobium binary alloy 05 p0704 A66-15821
- Binary, ternary and quaternary niobium alloy mechanical properties such as resistance to heat, plastic deformation, relation between hardness and rupture strength, etc 08 p1239 A66-18905
- Transitions to superconductivity for niobium-tin, niobium-aluminum, vanadium-silicon and vanadium-gallium systems 09 p1422 A66-20065
- Corrosion resistance and electrochemical properties of alloys of niobium-titanium system 09 p1390 A66-20838
- Corrosion resistance, electrochemical and mechanical properties of alloys of titanium-niobium system 09 p1390 A66-20839
- Feasibility of using columbium alloy B-66 and Ta-10W as regeneratively cooled nozzle materials in hydrogen fuel engine 10 p1547 A66-21782
- Superconducting properties of niobium-gallium alloys at high temperatures, high current densities and high magnetic field intensities 11 p1758 A66-23308
- Yttrium-containing columbium alloy strength, ductility and weldability 11 p1719 A66-23397
- Columbium and tantalum alloy tubing production for space power systems including extruding, rocking, annealing, flow diagram, etc 12 p1893 A66-23627
- Book on niobium alloys including binary and ternary alloys, physical, chemical and mechanical properties, electron structure, heat treatment, resistance, etc 12 p1893 A66-23654
- Strain rate and temperature changes in solution hardened niobium alloy, emphasizing behavioral difference between pure niobium and alloy, noting flow stress 12 p1894 A66-23941
- Chemical milling of columbium reentry vehicle skin panels using powdered metallurgy, vacuum processing, refractory alloy sheet rolling and electron beam welding [ASTME PREPRINT MR66-712] 12 p1886 A66-24417
- Segregation by controlled solidification of small quantities of dissolved tantalum in niobium, using titanium as third component in ternary alloy 12 p1897 A66-24917
- Strength and plasticity of some electron beam melted niobium alloys in cast and annealed specimens 13 p2110 A66-25886
- Magnetic flux jumps in hard Nb3Sn and NbZr superconductors in pulsed magnetic fields 13 p2168 A66-25969
- Oxygen addition to niobium-zirconium alloys at high temperatures, noting oxygen solubility and oxide precipitation 14 p2315 A66-27492
- Critical current dependence on external perpendicular magnetic field of Nb-Zr wires with deformation and heat treatment 15 p2569 A66-29786
- Thermoelectric power in niobium-zirconium alloys noting phonon drag peak attenuation due to Zr solute addition at very low temperatures 16 p2780 A66-31156
- Electrical resistance, thermal conductivity, thermal emf, elastic modulus, density and mechanical strength of Ti-Nb-Mo alloys 16 p2724 A66-31235
- Welding characteristics of four advanced commercial columbium base alloys using gas tungsten arc and electron beam processes 16 p2725 A66-31437
- Low temperature bend ductility and microstructure of welded columbium base alloys 16 p2725 A66-31438
- Thermal expansion and electrical resistivity measurements below 400 degrees K on niobium and two niobium alloys containing tungsten 16 p2725 A66-31454
- X-ray investigation of niobium-cobalt system 16 p2725 A66-31457
- Self-diffusion of niobium in alloys with molybdenum from 1600 to 2100 degrees C 16 p2727 A66-31569
- Thermal neutron irradiation effect on superconducting properties of niobium aluminide and vanadium silicide doped with fissionable impurities 17 p2979 A66-32630
- Aging temperature ranges for tensile specimens of equiatomic niobium-zirconium alloys, noting phase diagrams, structural changes, mechanical properties, precipitation hardening, etc 17 p2940 A66-33290
- Fabrication process for turning cast Ch-10W-10Ta alloy ingots into large-diameter rings by forging and ring rolling 19 p3366 A66-36111
- High-temperature brazing materials for niobium and tungsten with tensile-shear strengths in excess of 7000 psi at 2500 degrees F 19 p3367 A66-36114
- Reactive brazing alloys evaluated for columbium alloy foil brazing in order to avoid erosion and embrittlement of conventional brazing alloys 19 p3367 A66-36115
- Welding and postheat treatment effects on bend ductility transition temperature and strength of second-generation niobium-base alloys 19 p3368 A66-36124
- Refractory niobium alloy corrosion tests in potassium liquid at 2000 to 2200 degrees F 19 p3383 A66-36137
- Welding and annealing procedures for

fabrication of Nb alloy liquid metal loop and operation in boiling alkali 19 p3370 A66-36139

metals 19 p3370 A66-36139

Oxidation-protective coating of niobium alloy for application on reentry vehicles 19 p3384 A66-36149

Thermoprotective coating of niobium-based and other refractory alloy metal foils 19 p3384 A66-36150

Creep analysis of high temperature niobium alloys in very high vacuum 19 p3385 A66-36155

Refractory metal honeycomb structure fabrication for heat shield panels, using D-36 columbium alloys 19 p3371 A66-36161

Vanadium addition effect on critical current and transition temperature of niobium-zirconium alloy 19 p3386 A66-36449

Electric resistance and thermal expansion of Ti-Nb-Cr alloys, noting phase composition 19 p3387 A66-36450

Hardness, toughness, stress relaxation, corrosion resistance, etc., of niobium-aluminum alloy with stable elastic modulus 20 p3583 A66-37366

Niobium alloys properties noting effect of molybdenum and titanium additions 20 p3585 A66-37749

Chemical diffusion as affected by tungsten concentration in columbium-tungsten system measured, using couples prepared from polycrystalline pure metal 20 p3585 A66-37785

Superconducting properties of Nb-Zr alloy, discussing resistive transition, ultrasonic attenuation, flux jump magnetic instabilities, etc 21 p3796 A66-38550

Performance of three-component superconducting solenoid, noting optimal alloy composition 21 p3804 A66-39318

Microstructural and superconductivity analyses of Nb-Ti-O compound as function of thermomechanical processing treatment, plotting critical current density against transverse magnetic field 22 p3960 A66-39780

Neutron irradiation-induced defects in vapor deposited niobium stannide and effects on current-carrying capacity 22 p3962 A66-40083

Elastic constants and interatomic interaction parameters of niobium alloyed with tantalum, titanium and vanadium 22 p3936 A66-40788

Self-diffusion parameters of Nb in solid solutions with beta-Ti and beta-Zr at high temperatures 22 p3937 A66-40925

Regularities in hardness variations in niobium binary alloy 23 p4081 A66-41386

Superconductivity degradation in beta-tungsten structure compounds, niobium selenide and niobium aluminide, noting tin loss and transition temperature for high temperature annealing 24 p4257 A66-42614

NIOBIUM CARBIDE

Tensile testing study of hardening mechanisms when niobium carbide precipitation occurs during deformation of 18Cr/12Ni/Nb austenitic stainless steel at 650 degrees C 02 p0246 A66-12195

Magnetic and electrical transport properties of superconducting whiskers and platelets of NbC/NbN 04 p0559 A66-13716

Solubility of niobium carbide in gamma iron from carbon content of series of iron-niobium alloys equilibrated with hydrogen-methane mixtures 11 p1719 A66-23401

NIOBIUM COMPOUND

Interaction of vanadium, niobium and tantalum diborides with carbon 07 p1049 A66-17904

Superconductivity of tin diffused niobium wires, comparing obtained transition temperature changes with De Sorbo data 08 p1267 A66-18633

Existence of vortex lines in superconducting niobium in mixed state demonstrated via neutron diffraction 09 p1420 A66-20050

Sample resistance of niobium oxy-nitrides as function of temperature, using four-contact DC technique 09 p1424 A66-20073

Superconductivity of composite of fine niobium wire in copper, measuring critical temperature, transverse magnetic field, current density, etc 10 p1575 A66-21535

Annealing twins and twin-boundary intersections in niobium, noting invalidity of cause-and-effect relationship between twins

and crack formation in bcc structures 11 p1717 A66-22998

Heat treatment effect on superconducting properties of cold-worked niobium, noting results of magnetization, critical current and resistivity measurements 15 p2564 A66-28760

Magnetic shielding between superconducting niobium tin plates in transverse magnetic field, noting flux jumps degradation and elimination 16 p2779 A66-31091

Internal friction as function of temperature in cold worked tantalum and niobium containing oxygen and nitrogen 19 p3387 A66-36729

Interaction of vanadium, niobium and tantalum diborides with carbon 21 p3752 A66-39404

NIOBIUM OXIDE

Oxidation kinetics of niobium in air from 500 to 1000 degrees C 19 p3376 A66-35461

NIOBIUM STANNIDE

Knight shift for nuclear resonance lines of intermetallic Nb-Sn phase varies with transition temperature 04 p0566 A66-14289

Transition curves of high field superconductor with A-15 structure, such as niobium-tin systems, for various transverse magnetic fields 09 p1422 A66-20066

Internal field and current distributions in superconducting NbSn disks of various geometries 09 p1423 A66-20068

Effect of temperature changes on flux-jumping behavior of niobium stannide superconducting solenoids in superfluid helium 15 p2560 A66-28686

Three superconducting niobium stannide liquid level sensors tested in triple point slush or liquid hydrogen for capability of detecting liquid-vapor interface 20 p3557 A66-37076

NIP JUNCTION

Depth of lithium-doped region in silicon radiation detector determined by method based on energy loss of traversing particles 13 p2075 A66-26472

NITEHAWK ROCKET

Sounding rocket instability, covering exact and approximate solution and Magnus moment coefficient for hypersonic rolling vehicle /Sandia Nitehawk rocket system/ [AIAA PAPER 66-62] 06 p0958 A66-16252

NITRATE

SA PENTAERYTHRITOL TETRANITRATE /PETN/

SA POTASSIUM NITRATE

Densities of binary mixtures of fused alkali nitrates with alkaline earth nitrates measured by manometric densitometer and expressed as linear function of temperature 08 p1177 A66-18617

NITRATE ESTER

Nitrogen trioxide given off during low pressure combustion of typical double base propellant 02 p0303 A66-11597

Stabilizers for nitrate esters compared on basis of reactivities toward nitrogen tetroxide 19 p3449 A66-36285

NITRATION

New synthesis of o-nigrophenylacetaldehyde 16 p2646 A66-30621

NITRIC ACID

Phase diagram from thermodynamic data of complex solution of nitric acid and nitrogen tetraoxide at low temperature 01 p0163 A66-10626

Hybrid rocket motor HR 4, using fuming nitric acid as oxidizer and mixture of polyesters and acrylic plastics as other solid propellant 12 p1935 A66-23867

NITRIC OXIDE

Molecular laser action by vibrational excitation of nitric oxide during flash photolysis of nitrosyl chloride 21 p3748 A66-39166

Cross sections for charge transfer reactions of nitric oxide with atomic and molecular ions of oxygen and nitrogen 24 p4200 A66-42590

NITRIDATION

Nitriding of zirconium at 1400 to 1700 degrees C in nitrogen atmosphere 09 p1390 A66-20861

NITRIDE

SA ALUMINUM NITRIDE

SA BORON NITRIDE

SA SILICON NITRIDE

SA TITANIUM NITRIDE

SA ZIRCONIUM NITRIDE

Chemical bonds in carbides and nitrides of transition metals, obtaining atomization heat of compound and effective charges of transition atomic nuclei 19 p3386 A66-36425

NITROAMINE

Cyclomethylenetrinitramine-hexamethylphosphortriamide complex preparation 20 p3627 A66-38416

NITROBENZENE

Laser giant pulse damage to dielectric mirror coatings immersed in nitrobenzene solution 19 p3444 A66-36075

NITROCELLULOSE

Ignition of powder prepared from nitroglycerin and nitrocellulose by shock wave in sectioned low-high pressure chamber 18 p3260 A66-33721

Lead stearate effect on heat of explosion in nitro-cellulose propellant combustion at various pressure levels 20 p3626 A66-38041

NITROGEN

SA LIQUID NITROGEN

Alveolar nitrogen concentration and environmental pressure influence upon rate of gas absorption from nonventilated lung in dog 03 p0324 A66-12357

Measuring drift velocities of mixed nitrogen ion population in nitrogen gas, noting need of ionization condition control and ion mass analysis 04 p0547 A66-13714

Heat transfer to two-phase film-boiling nitrogen, discussing straight and swirl flow experimental apparatus [ASME PAPER 65-HT-37] 05 p0773 A66-14751

Zenith intensity of second positive band of molecular nitrogen in dayglow calculated and compared to experimental results 05 p0668 A66-14802

Energy flux of electron beam absorbed by atmosphere derived from resulting intensity of first negative system of molecular nitrogen 05 p0670 A66-14948

High resolution absorption spectrum of nitrogen in fourth and fifth orders from 1060 to 1520 angstroms 05 p0763 A66-15284

Potential curves and spectrum absorption of nitrogen, redetermining spectroscopic constants 05 p0763 A66-15285

Effects of nitrogen and carbon on low temperature embrittlement of vanadium, noting transition temperature increases 05 p0702 A66-15468

CW laser oscillation between 11.48 and 11.55 microns from nitrogen-carbon disulfide system 06 p0890 A66-16384

Partition functions in equilibrium chemical composition and thermodynamic properties of nitrogen and oxygen plasmas 07 p1087 A66-17936

Radiative lifetimes of strongest vacuum UV multiplets of B I, B II, C I, C II, N I and N II measured by phase shift method 07 p1083 A66-18423

Spectrum line reversal measurements of excitation temperature of Na atoms in expansion flows of shock-heated Ar and one percent nitrogen plus Ar mixtures 08 p1258 A66-18939

Large-scale expansion nozzle control by heterogeneous nucleation and mercury vapor and drop growth processes in nitrogen flow [AIAA PAPER 66-85] 08 p1318 A66-18997

Enthalpies determined from experimental heat capacity and Joule-Thomson data to prepare pressure-enthalpy diagrams for helium-nitrogen system 08 p1320 A66-19683

Wave functions and Franck-Condon factors for transitions in molecular nitrogen obtained by Numerov integration of Schroedinger equation 09 p1404 A66-20411

Pulse heights produced when argon, nitrogen and argon-nitrogen mixtures completely stop alpha particles 09 p1405 A66-20680

Data compendium on neutral composition of atmosphere at altitudes from 100 to 200 km, noting nitrogen and oxygen concentration values from optical and mass spectroscopic studies 09 p1376 A66-20991

Energy transfer by radiation and thermal conductivity in high temperature oxygen and nitrogen [AIAA PAPER 66-182] 10 p1620 A66-21432

Absorption spectrum of neutral nitrogen near 500 angstroms, noting vibrational spacings and Rydberg series 11 p1773 A66-22783

- Cross sections of inelastic collisions of hydrogen and nitrogen molecular ions with hydrogen molecules 11 p1738 A66-22879
- Mass flow of nitrogen gas through circular orifice at five Knudsen number values from 0.13 to 1.78 and range of upstream to downstream pressure ratios 11 p1692 A66-22936
- X-ray produced auroral light emission in air and excitation of second positive and first negative bands in nitrogen 11 p1765 A66-23152
- Range of importance of molecular impurities on nitrogen vibrational relaxation determined, using spectroscopic sodium line reversal techniques 11 p1741 A66-23218
- Dissociation rate of nitrogen behind strong shock waves in nitrogen-argon mixtures determined, using time-resolved interferometric measurements of gas density 12 p1861 A66-23616
- Relative intensity measurements of 50 major bands of Lyman-Birge-Hopfield /LBH/ system of nitrogen 12 p1869 A66-23919
- Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 eV 12 p1917 A66-24222
- Chemical system and reaction rates behind strong shock waves in mixtures of carbon dioxide and nitrogen used to study entry conditions into Mars atmosphere 13 p2062 A66-25276
- Nitrogen adsorption effect on thermionic emission from polycrystalline tungsten ribbon at high and low applied fields, explaining work function changes 13 p2162 A66-25381
- Transition probabilities of nitrogen-nitrogen collision obtained with time-dependent wave functions of forced harmonic oscillator and by numerical methods 13 p2131 A66-25384
- Molecular nitrogen photofixation relation to electron-donor respiratory system, activity of hydrogenase and dehydrogenases and photosynthesis 13 p2010 A66-25893
- Stimulated emission spectroscopy of hydrogen, nitrogen, oxygen and deuterium diatomic gases in 0.8 to 8 micron region 13 p2102 A66-26205
- Electromagnetic wave propagation near missiles during hypersonic atmospheric reentry and computer program for determination of dissociated and ionized particle density in nonequilibrium nitrogen-plasma flow 13 p2150 A66-26374
- Electron beam heating of alloy specimen and liquid-nitrogen cooled anvils for rapidly cooling it 13 p2084 A66-26560
- Physiological differences between air and low pressure oxygen atmospheres, discussing role of nitrogen in respiration 14 p2228 A66-27474
- Calorimetric measurement of local temperatures and velocities in weakly ionized nitrogen plasma at subsonic velocity and thermodynamic equilibrium 14 p2294 A66-27487
- Laminar jets in nitrogen from DC plasma torch analyzed, using schlieren and spectroscopic techniques, noting jet form dependency on Reynolds number 14 p2344 A66-27849
- Interaction of organosilanes with ozone 14 p2233 A66-27866
- Photochemical decomposition of carbon suboxide and spectroscopic observation of carbon atom reactions with nitrogen, hydrogen and deuterium at 4.2 degrees K 14 p2233 A66-27975
- Ionization cross sections for low energy collisions of neutral nitrogen molecules or neutral argon atoms, using asymmetric charge transfer 14 p2337 A66-27980
- Franck-Condon factors for permitted transitions in nitrogen 14 p2338 A66-28128
- Motion of slow positive potassium and nitrogen ions in nitrogen, measuring mobility and diffusion coefficients with apparatus whose characteristics are given 14 p2345 A66-28139
- Ionic drift velocity peak function for two interconverting nitrogen ion species drifting in gas in electric field 15 p2550 A66-28756
- Rotational distribution function of flowing nitrogen in low density wind tunnel using electron beam fluorescence 15 p2481 A66-29737
- Rotational energy distribution through shock waves in nitrogen measured, using electron beam fluorescence 15 p2481 A66-29738
- Microscopic structure of sintered silicon carbide mechanism of material transport and effect of nitrogen doping 16 p2729 A66-30245
- Auroral excitation rates and molecular vibrational temperatures in nitrogen 2PG from Franck-Condon factors obtained from intensity measurements and high resolution absorption spectral data 16 p2692 A66-30328
- Rotating target experiments on nitrogen gas molecule interaction with engineering surfaces and velocity distribution of scattered beam 16 p2753 A66-30394
- Interferometric study of dissociation rate of nitrogen behind shock waves 17 p2908 A66-32437
- UV radiation from shock-heated nitrogen measured by ballistic flight through nitrogen-neon mixture [AIAA PAPER 66-422] 17 p3035 A66-32751
- Vibrational and rotational nonequilibrium flow effects in hypersonic conical nozzle expansion of nitrogen flows and airflows 17 p2842 A66-33478
- Theta pinch discharge study of four times ionized nitrogen /N V/ spectrum 18 p3136 A66-33628
- High temperature, low pressure solubility of nitrogen /gas/ in niobium /solid metal/ 18 p3121 A66-33730
- Omegatron mass spectrometer for measuring density and temperature of nitrogen in 100 to 350 km region of upper atmosphere 18 p3112 A66-34241
- Liquid water and nitrogen drops vibrating in natural frequencies above hot plate on vapor cushion analyzed by photographic techniques and used to simulate atomic nuclei fission 18 p3262 A66-34377
- Nitrogen temperature and density in thermosphere region from thermosphere probe data, examining inconsistency with satellite drag estimates 19 p3349 A66-36347
- Primary and afterglow emission decay time from low temperature gaseous nitrogen excited by fast electrons explained by possible energy transfer 19 p3404 A66-36799
- P-V-T behavior of argon, nitrogen and argon-nitrogen gas mixtures 20 p3677 A66-37089
- Convective heat transfer to cryogenic nitrogen and methane from cylindrical surface by nucleate and film-boiling at high pressures and large temperature differences 20 p3677 A66-37099
- Nitrogen addition effect on heat resistance of chromium-manganese-austenitic alloys 20 p3584 A66-37695
- Stability limits of quasi-cylindrical diverging detonations in propane-oxygen-nitrogen mixtures 20 p3679 A66-37819
- Molecular elimination of nitrogen from hydrazine from single molecule and not radical-radical combination 21 p3806 A66-38531
- Supersonic nozzle flow of dissociated oxygen, nitrogen and carbon dioxide 21 p3694 A66-39089
- Peculiarities in Mach reflection of shock waves traveling in carbon dioxide gas and nitrogen at velocities of order of 2000 m/sec 21 p3726 A66-39094
- Light emission of electron-excited molecular nitrogen with NO, noting electronic state changes 22 p3949 A66-39910
- Pulsed coaxial transmission line nitrogen gas laser, noting pressure effect 22 p3932 A66-40107
- Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 eV 22 p3951 A66-40584
- Radiolysis applied to effects of ionizing radiation on volatile inorganic compounds of fluorine, oxygen and nitrogen, noting mass spectrometric peaks 23 p4032 A66-41235
- Compressibility factor chart for hydrocarbon-hydrogen and nitrogen-hydrogen gas mixtures, correlating pressure and temperature, using state equation 23 p4150 A66-41866
- Radiative lifetime and emission intensity measurements, determining oscillator strength and electron transition moment of first positive band system of nitrogen 23 p4033 A66-42082
- High density highly ionized nitrogen flow in plasma wind tunnel 24 p4191 A66-42192
- Electrostatic probe and VHF microwave reflectometry study of nitrogen flow around models in hotshot wind tunnels, determining plasma sheath physical characteristics 24 p4191 A66-42193
- Spectroscopy of IR emission and laser oscillation resulting from transient population inversions on electronic transitions in molecular nitrogen 24 p4221 A66-42550
- Gas heating in wall stabilized electric arcs with axial flow applied to nitrogen arc, obtaining highest enthalpy flux and efficiency 24 p4295 A66-43060
- Spectrum of three-times ionized nitrogen analyzed in wavelength region 300-8000 angstroms, using theta pinch discharge, connecting singlets and triplets 24 p4240 A66-43104
- Autoignition of nitromethane vapors diluted with Ar at high temperatures, determining monomolecular decomposition constant 24 p4295 A66-43199
- NITROGEN ATOM**
- Nitrogen and nitrogen-foreign gas mixtures, determining absorption profile shapes, binary and ternary absorption coefficients and molecular quadrupole moment 06 p0908 A66-16281
- Atomic concentration measurement in discharged nitrogen, oxygen and hydrogen 18 p3139 A66-34507
- Photoionization cross sections for N and O atoms and ions in state of excitation, using quantum defect method 21 p3775 A66-39076
- NITROGEN COMPOUND**
- Calorimetric measurement of local temperatures in nitrogen plasma jet at atmospheric and subatmospheric pressures [DGRR PAPER 66-002] 13 p2082 A66-26493
- IR and UV absorption spectra of solid HN sub 3 film after photolysis with unfiltered radiation from Hg lamp 18 p3064 A66-34455
- Nuclear magnetic resonance techniques applied to nitrogen tetroxide for determining proton content, noting gas chromatograph with two stainless steel columns packed with porous glass 23 p4032 A66-41240
- NITROGEN FLUORIDE**
- Reaction kinetics of tetrafluorohydrazine with fluorine to yield nitrogen trifluoride measured by colorimetric technique 04 p0472 A66-13395
- Calorimeter bomb combustion of hydrocarbons and fluoro-substituted hydrocarbons with nitrogen trifluoride and nitrogen trifluoride-oxygen mixtures and mass spectrometric analysis 15 p2570 A66-29609
- NITROGEN-FLUORINE COMPOUND**
- Hydrolytic reactions of nitrogen fluorides, noting inertness of nitrogen trifluoride to pure water and reaction with aqueous base to give nitrite and fluoride 23 p4118 A66-41242
- NITROGEN HYDRIDE**
- Nitrogen analogs of sesquifulvalene, calculating dipole moments of nitrogen anhydro bases and pyridones via modified Hueckel technique 11 p1651 A66-23411
- NITROGEN ION**
- Rotational temperatures derived from molecular nitrogen ion in aurora along with simultaneous height measurements 02 p0223 A66-11833
- Low energy nitrogen ion irradiation of germanium plates resulting in conductivity and inverse current variation 02 p0277 A66-12081
- Stark profiles of singly ionized nitrogen lines from T-tube plasma, measuring shifts and half-widths of N-ion lines, plasma temperature and electron densities 03 p0405 A66-13137
- Line intensities of first negative bands of nitrogen molecular ion measured as function of bombarding electron energy and gas pressure 09 p1404 A66-20377
- Charge transfer between nitrogen ions and oxygen atoms, calculating cross sections 09 p1405 A66-20681
- Excitation mechanism and rate of nitrogen ions in shock-heated atomic-molecular nitrogen mixtures, noting vibrational relaxation 11 p1739 A66-22885

Rocketborne measurements of electron precipitation and relative brightness of ionized molecular nitrogen ion and atomic oxygen auroral emissions 11 p1764 A66-23139

Upper atmospheric helium ion chemical loss process, distribution of nitrogen ion and rate coefficient of helium ion-molecular nitrogen reaction 11 p1701 A66-23153

Relative vibrational transition probabilities and r centroids for 36 bands of C-X system of singly ionized nitrogen molecule 14 p2337 A66-27705

Nitrogen ion charge-transfer reaction rates with CO and carbon dioxide in pulsed flowing afterglow system 21 p3774 A66-38529

Molecular nitrogen ions in nocturnal upper atmosphere at middle latitudes, noting space radiation bombardment 23 p4064 A66-41681

Cross sections for charge transfer reactions of nitric oxide with atomic and molecular ions of oxygen and nitrogen 24 p4200 A66-42590

NITROGEN OXIDE

Phase diagram from thermodynamic data of complex solution of nitric acid and nitrogen tetroxide at low temperature 01 p0163 A66-10626

Isobaric specific heat of equilibrium dissociating nitrogen tetroxide in wide temperature range at moderate pressure 01 p0166 A66-10996

Radiolysis of pure liquid nitrogen tetroxide, detailing product formation kinetics and effects of added oxygen and nitric oxide 02 p0188 A66-11593

Nitrogen trioxide given off during low pressure combustion of typical double base propellant 02 p0303 A66-11597

Spectral absorption due to parallel bands of nitrous oxide computed for temperatures of 200 and 300 degrees K 02 p0263 A66-12213

Ambipolar diffusion and electron attachment in photoionized nitric oxide by presence of negative ions, noting electron loss and electron density 03 p0394 A66-12326

Electron-ion recombination in photoionized nitric oxide neon gas mixture, noting decay of electron density and correlation factors 03 p0394 A66-12327

Absorption contour for fundamental vibration-rotation band of nitrogen oxide compared with pressure broadened spectra 04 p0473 A66-13651

Ionospheric magnetic dipole transition, noting radiative transfer equation for atomic oxygen and nitric oxide 05 p0667 A66-14793

Immiscibility and rapid interface reaction rate as cause of disruption in nitrogen tetroxide-hydrazine impinging jets [CI PAPER WSCI-65-20] 05 p0743 A66-15145

Droplet combustion fronts in hydrazine-nitrogen tetroxide system determined from kinetics of vapor decomposition, noting two-flame front model [CI PAPER WSCI-65-21] 05 p0743 A66-15146

Canned motor pump for nitrogen tetroxide or hazardous liquids, noting ball bearings, chemical materials, balancing drum and helium leak tested motor parts [ASME PAPER 65-WA/FE-3] 05 p0691 A66-15715

Experimental viscosity of dissociating system nitrogen tetroxide and nitrogen dioxide, obtaining force constants for Lennard-Jones potential having no effect on viscosity of gas mixture 06 p0823 A66-16635

Reaction rate of atomic oxygen with nitrous oxide in shock tube at high temperatures 11 p1649 A66-22881

Changes in current kinetic theory of NO-O reaction, based on observation of release of nitric oxide in E region 11 p1703 A66-23494

Photolysis of trifluoroethylene iodide in presence of nitric oxide and oxygen 12 p1812 A66-25001

Thermal dissociation rate of nitrogen oxide in shock waves measured by IR emission 13 p2208 A66-25084

Reactivity of titanium alloy oxidizer tank with nitrogen tetroxide oxidizer under vibration analyzed for LEM when subjected to impact 13 p2111 A66-26222

Calculating thermodynamic functions of dissociating nitrogen tetroxide 14 p2413 A66-27825

Thermodynamic cycles with compression in liquid phase using nitrogen tetroxide, calculating I-S diagram 14 p2413 A66-27826

Viscosity of equilibrium dissociating nitrogen tetroxide calculated from compressibility and critical parameters 14 p2371 A66-27827

Thermal conductivity of equilibrium dissociating nitrogen tetroxide 14 p2371 A66-27828

Nitrogen tetroxide dissociation equations 14 p2371 A66-27829

Nitroso rubbers, fully fluorinated elastomers for nitrogen tetroxide application 14 p2371 A66-28015

Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 15 p2542 A66-29351

Lyman alpha ionization of nitric oxide and ion molecule reactions accounting for ionic nitric oxide content of D and E regions 16 p2694 A66-30705

Nitrogen tetroxide dissociation effect on surface friction in turbulent boundary layer 16 p2686 A66-31064

Nitric oxide distribution in lower ionosphere calculated from reaction coefficients and mass spectrometric measurements of density 17 p2922 A66-33354

Shock wave studies with quadrupole mass filter, examining thermal decomposition of nitrous oxide from 1800 to 3500 degrees K 17 p2871 A66-33465

Hydrazine/nitrogen tetroxide propellant system, examining reaction mechanisms at rocket chamber conditions [AIAA PAPER 66-662] 18 p3160 A66-34223

Boundary and shock layer separation visualization, using nitric oxide in flows with massive blowing 18 p3100 A66-34602

Stability of various plastics toward hypergolic rocket fuel components aerazine and nitrogen tetroxide 18 p3125 A66-35242

Shock wave and glow cloud of nitrogen dioxide released at 110 km altitude 19 p3345 A66-35492

Stabilizers for nitrate esters compared on basis of reactivities toward nitrogen tetroxide 19 p3449 A66-36285

Aerobee rocket measurement of nitric oxide in upper atmosphere, noting fluorescence in airglow layer, emission rate factors and NO densities 19 p3349 A66-36351

Thermodynamic properties and solubilities of He molecular nitrogen, molecular oxygen, Ar and nitrogen trioxide in liquid nitrogen tetroxide 19 p3449 A66-36368

Simulation of upper atmosphere NO release in low density wind tunnel indicating light output of NO-O chemiluminescent reaction depends on O concentration 19 p3405 A66-36804

Upper atmospheric nitric oxide determined from Aerobee measurement of UV dayglow spectra 20 p3550 A66-37299

Chemiluminescent NO-O-atom reaction, determining effect of change of emission intensities and third bodies 20 p3604 A66-37309

Fluorescence of NO during photodissociation of nitrous oxide due to vacuum UV radiation 20 p3602 A66-37356

Spontaneous-emission probability and absolute intensity for IR absorption band of nitrous oxide 22 p3947 A66-39768

Light emission of electron-excited molecular nitrogen with NO, noting electronic state changes 22 p3949 A66-39910

Nitrate heat of formation value revised by re-evaluating lattice energy of cesium nitrate, considering charge distribution in anion 23 p4031 A66-41221

Enthalpy and entropy of dissociating nitrogen tetroxide, using thermodynamic dependences 23 p4148 A66-41269

Detecting concentration of nitric oxide in metastable state in upper atmosphere, using glant-pulse Raman laser sources 24 p4203 A66-43022

NITROGLYCERIN

Ignition of powder prepared from nitroglycerin and nitrocellulose by shock wave in sectioned low-high pressure chamber 18 p3260 A66-33721

Drop-weight tester/photographic apparatus for studying impact initiation-explosion process in nitroglycerin 23 p4119 A66-41243

NITROMETHANE

Equation of state and derived shock initiation critically conditions for nitromethane and liquid

TNT 12 p1934 A66-24588

Decomposition times of liquid nitromethane, liquid tetranitromethane and hexogen single crystals in shock waves 14 p2275 A66-27598

Continuous emission spectrum of detonation wave in nitromethane between 3800 and 8000 angstroms 19 p3477 A66-35747

NITRONIUM COMPOUND

Nitronium tetrafluoroborate as versatile nitrating agent for nitrogen compounds 23 p4117 A66-41224

NITRONIUM PERCHLORATE

Decomposition reaction for nitronium perchlorate involving formation of nitronium perchlorate and oxygen 23 p4031 A66-41227

NITROSO COMPOUND

Photolysis of trifluoronitrosomethane in gas phase, using red light above 6000 angstroms 06 p0821 A66-16159

Nitroso rubbers, fully fluorinated elastomers for nitrogen tetroxide application 14 p2371 A66-28015

NITROSONIUM COMPOUND

Decomposition reaction for nitronium perchlorate involving formation of nitronium perchlorate and oxygen 23 p4031 A66-41227

NITROSYL CHLORIDE

Molecular laser action by vibrational excitation of nitric oxide during flash photolysis of nitrosyl chloride 21 p3748 A66-39166

NOBLE GAS

S RARE GAS

NOBLE METAL

Anomalies in low temperature properties of noble metal alloys such as thermoelectric power and nonmonotonic behavior of resistivity with temperature 08 p1274 A66-19362

Tabulation of physical properties of noble metals 09 p1388 A66-20254

Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274

NOCTILUCENT CLOUD

Observation of noctilucent and nacreous clouds from satellites 11 p1730 A66-22944

Optical thickness of noctilucent cloud, using optical radar measurements 14 p2283 A66-26931

Annual frequency of noctilucent clouds linked to low temperatures in mesopause region 19 p3345 A66-35396

Observation of noctilucent and nacreous clouds from satellites 20 p3593 A66-37857

NODE

Static nodal patterns associated with normal modes of vibration disappear at large motion amplitudes due to occurrence of traveling wave component 19 p3474 A66-36344

NOISE

SA AERODYNAMIC NOISE

SA AIRCRAFT NOISE

SA BACKGROUND NOISE

SA BOUNDARY LAYER NOISE

SA COSMIC NOISE

SA GAUSSIAN NOISE

SA IMPULSE NOISE

SA IONOSPHERIC NOISE

SA JET NOISE

SA RADIO NOISE

SA RANDOM NOISE

SA SHOT NOISE

SA SIGNAL NOISE

SA SIGNAL TO NOISE RATIO

SA SOLAR NOISE

SA SPECTRAL NOISE

SA THERMAL NOISE

SA WHITE NOISE

Response of linear and nonlinear devices to noise calculated by constant time-varying parameters, covariance, integral transform and characteristic function methods 04 p0485 A66-14110

Feedback amplifier noise characteristics based on noisy quadrupole theory 11 p1664 A66-22650

Correlations and intensity fluctuations in light from individual lasing and nonlasing modes of CW GaAs laser and threshold noise change in laser emission 13 p2102 A66-26210

Photoelectron counts of photomultiplier illuminated by gas laser light source 13 p2102 A66-26211
Neodymium-doped yttrium-aluminum garnet crystal laser oscillator as regenerative amplifier of noise 13 p2103 A66-26212
Nonlinear quantum mechanical analysis of laser steady motion, stability under deviations and noise effect on line width and intensity fluctuations 13 p2103 A66-26213
Antenna cost, efficiency, noise, minimum detectable signal and signal temperature relationships 14 p2257 A66-27928
Causes of noise in semiconductor amplifiers, noting FET, tunnel diode and varactor 14 p2268 A66-28383
Transistor noise figure derived from thermal and shot noise for HF application 14 p2262 A66-28384
Passive frequency conversion utilizing nonlinear conductance, establishing lower bound for noise figure 17 p2881 A66-32060
Burst noise of low-level plane silicon transistors possibly caused by intermittent microplasmas creation 18 p3078 A66-34095
Three-term governor for gas turbine engine system, examining effect of internally generated pressure noise on performance of different possible hydraulic systems 22 p3972 A66-40513
Real time computer technique for least squares estimates of current system state for noisy nonlinear system, using Pontryagin maximum principle 23 p4050 A66-41615

NOISE ATTENUATION

Dispersive network system for pulse duration modulation 06 p0866 A66-16957
Feedback shift register connection using chain, discussing pseudorandom noise generator 06 p0867 A66-16987
Nonbinary codes used to improve noise rejection and reliability of telemechanical systems 09 p1361 A66-20315
Masking-level differences /MLD/ for 600-cps low-pass transient noise explored as function of interaural time difference, interaural intensity difference and combinations of both 09 p1338 A66-20956
Interference in low-level input electronic equipment design, examining minimization methods for effects of hum, noise, etc 11 p1673 A66-23484
Minimum noise factor in transistors is given by ratio of source resistance, base spread resistance and factor that depends on current-gain 12 p1837 A66-24307
Sequential Noise Output Recording Equipment /SNORE/, aircraft engine noise test facility, for jet noise and compressor noise and acoustic absorption materials test facility [ASME PAPER 66-GT/N-41] 14 p2269 A66-26986
Diode bridge variable attenuator used to overcome error signals and harmonic distortion in wide range 14 p2267 A66-27805
Attenuation of longitudinal sound in pure crystals of superconducting lead 17 p2978 A66-32506
Dispersive network with attenuation equalizing network, weighting filter for control of output side lobe level with Gaussian shaped frequency response and matching system 23 p4034 A66-41016

NOISE ELIMINATION

Noise rejection improvement of class of automatic control systems by means of nonlinear control laws 04 p0504 A66-13976
Ideal Kotelnikov receiver discussing invariant regime and noise correlation effects 04 p0483 A66-14007
Optimum incoherent receiver discussing structure, noise rejection and equations for channels with distributed input signal components 04 p0483 A66-14008
Frequency filtration method of noise suppression 06 p0849 A66-16372
Noise rejection of quasi-optimal detection system with averaging by velocity 06 p0849 A66-16374
Signal separation and phase measurement device using phase probability distribution function of signal-noise mixture 07 p1005 A66-17352
Nonlinear characteristics of optimal inertialless filter for pulse noise to guarantee minimum rms

error 07 p1014 A66-17436
Noise-rejection characteristics of signal detector based on zero counting of random process 08 p1182 A66-18909
Noise rejection properties of time discrimination method of pulsed signals improved by using exponential rather than selecting function 08 p1182 A66-18916
Semiconductor lasers, FM techniques and multiple-scatter paths used to overcome modulation noise under varying weather conditions 09 p1385 A66-19915
Effect of amplitude noise or spurious signals in varactor frequency multiplier 11 p1661 A66-22383
Variable threshold logic, integrated logic circuits which eliminate noise effects in digital equipment 11 p1676 A66-22685
Radio receiver design for precisely given signal and nonsteady Gaussian noise 11 p1658 A66-23221
Detection of fluctuating signal packets from noise background with unknown parameters 11 p1658 A66-23223
Statistical properties of receiver output under interference conditions, obtaining first order output, probability densities, second harmonic and intermodulation interference terms 11 p1658 A66-23483
Ideal Kotelnikov receiver, discussing invariant regime and noise correlation effects 12 p1813 A66-23869
Optimum incoherent receiver discussing structure, noise rejection and equations for channels with distributed input signal components 12 p1813 A66-23870
Periodically alternating noise as design problem in theory of information transmission 12 p1824 A66-24854
Frequency filtration method of noise suppression 13 p2042 A66-25960
Noise rejection of quasi-optimal detection system with averaging by velocity 13 p2024 A66-25962
Optimum potential distribution in electron gun of low noise traveling wave tube calculated, using plasma wave number changes in accelerating portion of gun 14 p2236 A66-27236
Noise-rejecting spatial filters in signal pattern recognition 14 p2242 A66-28150
Noise rejection ability of phase discrimination technique 17 p2888 A66-32708
Aerodynamic noise in wind tunnel heat exchanger 18 p3094 A66-34020
Recognition of fading signals transmitted by channels with unknown parameters, considering optimum reception technique based on arbitrary law 20 p3515 A66-37382
K-band superheterodyne electron spin resonance spectrometer with MO noise elimination by modified Gordon bridge with reflection cavity 20 p3559 A66-37538
Spaced antenna reception by quadratic addition of signals providing efficient operation at various statistical characteristics of radio channel 23 p4038 A66-41518

NOISE HAZARD

LF and infrasonic noise effects on mans cardiac rhythm, hearing, vision, motor control, spatial orientation, speech and subjective tolerance 07 p0999 A66-17656
Vigilance performance in observing light flashes analyzed for effect of noise and signal rate 11 p1646 A66-23375
Effect of sudden intense noise and near vacuum decompression on cardiac rate of anesthetized and unanesthetized dogs 19 p3286 A66-36380
Siting of static discharger to control nature and occurrence positions of coronas to minimize RF noise capable of causing hazard to aircraft navigational aid systems 19 p3282 A66-36752

NOISE INJURY

High noise levels effect on hearing damage of technical personnel of military airfield 04 p0472 A66-14386
Noise and vibration causing acoustic fatigue leading to deafness of aircrew 06 p0811 A66-16065

NOISE INTENSITY

Light and noise level, stimulus intensity and background shade variation effect on reaction time 02 p0183 A66-12076
Noise performance of antennafer and advantage when added to receiver

system 03 p0339 A66-12448
Ruby laser noise radiation consisting of increased luminescence and laterally dispersed generation determined from energy level populations 06 p0891 A66-16628
Two-dimensional theory of noise emission from magnetically shielded thermionic cathodes 06 p0858 A66-17014
German book on parametric systems theory and practical application, discussing noise, circuits and amplification 06 p0858 A66-17053
Noise coefficient of amplifier using microwave modulation-demodulation principle derived by impedance-matrix method 06 p0859 A66-17185
Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 06 p0837 A66-17190
Degenerate parametric amplifier receiving two oppositely modulated input waves, improving noise figure 07 p1010 A66-18152
Minimum noise of linear receiver in formulas of Heffner and Nyquist 08 p1183 A66-19112
Sensitivity measure for optical and IR detectors clarified by analysis of noise equivalent power for photodiode 09 p1351 A66-19940
Fluctuation noise factor of UHF tunnel-diode mixer for various loads in image frequency range 09 p1357 A66-20785
Word-intelligibility tests in presence of recorded noise from jet and propeller aircraft 09 p1338 A66-20957
Spontaneous emission noise effects on coherence properties of laser 10 p1542 A66-21550
Object identification system using multiple observations of scattering matrix, noting noise magnitude role in recognition 10 p1503 A66-21640
Noise exposure duration indicator, recording cumulative time exceeding one of five preset sound pressure levels of noise, noting amplifier, rectifier, etc 10 p1536 A66-21742
Empirical estimation of hovercraft propeller noise level, correction curves for blade number and noise correlation 10 p1484 A66-21799
LF photocurrent noise intensity, spectrum and photoresponse in CdS single crystals 10 p1588 A66-22157
Quantum mechanical nonlinear theory of intensity and phase fluctuations of homogeneously broadened laser noise 11 p1711 A66-22466
Noise characteristics, sources and bandwidths of active devices and circuits including transistors, masers, parametric amplifiers, etc, noting causes of noise 12 p1830 A66-23662
Noise figure of microwave transistors, noting effect of parasitics associated with wafer and package 13 p2038 A66-25562
Assessment of troposcatter radio relay systems in terms of CCIR /Geneva 1963/ recommendations regarding allowable noise power in radio relay systems 13 p2023 A66-25568
Solar noise in optical communications, background radiation dependence on detector aperture, noise power and application to GaAs diodes and gas lasers 13 p2024 A66-25833
Receiver noise-temperature measurement uncertainty and dependence on source impedance 14 p2238 A66-27584
Maximum channel capacity of tandem link multichannel troposcatter systems for specified noise level 14 p2243 A66-28347
Laminar, transitional and turbulent flow regions in laminar plasma jets, noting variation of noise level and mixing length with Reynolds number at 400 amp 17 p2968 A66-32460
Parametric and tunnel diode amplifiers for radio astronomy, noting diode quality, operating frequency range, noise, temperatures, etc 17 p2892 A66-32918
Asymmetrical property of binary pseudorandom noise generators, noting Gaussian probability density function in output of low pass filter 17 p2894 A66-33110
Joint maximum likelihood estimator for signal amplitude and noise power density in coherent PCM channel with white Gaussian

- noise 18 p3070 A66-34256
- Noise coefficient of amplifier using microwave modulation-demodulation principle derived by impedance-matrix method 19 p3314 A66-35543
- Impedance of growing wave in interaction region used to calculate minimum value of traveling wave tube noise coefficient 19 p3297 A66-35548
- LF photocurrent noise intensity, spectrum and photoresponse in CdS single crystals 19 p3440 A66-35771
- Input admittance, gain and noise performance in dipole antennas with Esaki diodes 20 p3531 A66-37731
- Noise factor dependence on frequency in tunnel-diode frequency mixers 20 p3533 A66-38008
- Spontaneous emission noise power added to amplified signal in laser amplifier in He-Xe gas discharge and saturation relation to population inversion 20 p3581 A66-38387
- Equivalent circuit for pyroelectric materials used in obtaining noise equivalent power for detection of electromagnetic radiation and heat transfer measurement 20 p3562 A66-38405
- Temperature variations due to noise sources via feedback paths and variations of system energy, noting influence on noise parameters of transistor 21 p3711 A66-38834
- Fluctuation noise factor of UHF tunnel-diode mixer for various loads in image frequency range 22 p3874 A66-39844
- Diurnal cyclic intensity variations of atmospheric radio noise at stations widely spaced over globe 22 p3915 A66-40782
- Search for 22.235 gc/s emission line from stratospheric water vapor, noting absence of noise temperature enhancement 22 p3916 A66-40810
- Steady state beam induced plasma parameters and behavior when affected by HF noise oscillations and effect on electron concentration in plasma 22 p3958 A66-40933
- NOISE MEASUREMENT**
- Fourier coefficients of tunnel diode conductivity and noise current determined along with conversion factor and amplitude of mixer 02 p0196 A66-11424
- Noise characteristics of semiconductor devices turned to advantage by using noise measurements for reliability analysis, noting noise types and transistor irregularities effect on noise 03 p0345 A66-13217
- Interferometric method of measuring angular sizes of discrete sources of radio emission to obtain high resolution 04 p0576 A66-13463
- Use of two reference noise sources for measurement of effective noise temperature of conventional receiver system leads to serious errors 04 p0484 A66-14096
- Antenna and receiver noise temperature effect on sensitivity of radar system 04 p0486 A66-14122
- Noise and lifetime of nonequilibrium current carriers in p-indium antimonide 04 p0566 A66-14276
- Confirmation of systematic and random variations of noise parameters in tropics by 4-year period of measurement of atmospheric radio noise 04 p0488 A66-14377
- HF noise from electron avalanches and relation to mechanism of cold cathode arc 04 p0502 A66-14480
- Lifetime of semiconductor devices determined from noise levels 06 p0860 A66-17195
- Predicting and measuring FM of reflex klystron noise performance when subjected to random acoustical and mechanical vibration 07 p1008 A66-17512
- Metal oxide semiconductor transistor noise levels between 30 and 1600 kc and 600 ohms to 100 kilohms source resistance 07 p1010 A66-18249
- Transistor noise phenomenon characterized by crenellated current forms 08 p1188 A66-18642
- Spaceborne observations of radio noise from 0.7 to 7.0 mhz and dependence on terrestrial environment 10 p1603 A66-21115
- Spontaneous emission noise properties of pair of pulsed ruby laser amplifiers 10 p1542 A66-21310
- FAA study of jet takeoff and landing noise effect on population around airport, establishing numerical value of noiseless 10 p1482 A66-21373
- Ionization threshold observation in Si Zener diodes and multiplication factor 10 p1509 A66-21586
- Brown-Twiss radiometer circuit for measuring power level of weak noise sources 10 p1503 A66-21650
- Ducted axial flow fan noise generation and noise spectrum 10 p1483 A66-21743
- Measurement of aircraft noise in vicinity of airports in connection with land-use planning 10 p1483 A66-21745
- Gc/s nitrogen-cooled nondegenerate parametric amplifier, noting design, application and operation characteristics 10 p1513 A66-21857
- Physical and psychological nature of noise and principles of noise suppression in aviation 10 p1493 A66-22129
- Component tolerance and measuring error effects on noise measurements 11 p1652 A66-22384
- Information recovery from noisy measurements, employing steady quantity measurements, known waveform detection and transfer function evaluation 11 p1656 A66-22825
- Frequency fluctuations in frequency standards, analyzing noise and finite observation time effects and atomic standard characteristics, using servocontrolled oscillator 12 p1881 A66-24123
- Statistical analysis of noise quality of atomic frequency standards including masers 12 p1881 A66-24130
- Noise performance of Gunn microwave generator and noise-power measurements made on Gunn oscillator in X and J band 13 p2030 A66-25221
- Noise factor of linear receiving systems in quantum and classical regions, noting role of dual push-pull amplifier and frequency converter 13 p2020 A66-25226
- Blade noise generation in gas turbine engines [ASME PAPER 66-GT/N-43] 14 p2372 A66-26988
- Selection of parameters of LF noise meters 14 p2237 A66-27357
- Noise measurement in axial flow fans for military vehicle cooling installations 14 p2220 A66-27567
- Narrow band LF direct-reading random noise measurement and reduction of time requirements, using integrating RC network with time-variable components 14 p2295 A66-27716
- Transistor noise figure measurement by Hewlett-Packard 342A Noise Figure Meter 14 p2262 A66-28386
- Common emitter noise equivalent circuit to determine microwave transistor noise parameters 15 p2458 A66-28893
- LF noise measurements in silicon avalanche photodiodes in 10 kc-10 mc range 15 p2459 A66-28898
- Relationship between amplification, bandwidth and noise temperature in maser amplifier, considering paramagnetic permeability and Q-factor 15 p2514 A66-29051
- Noise performance of X-band microwave sources, using transistorized crystal oscillators and amplifiers and varactor frequency multipliers for application to communication systems 15 p2465 A66-29672
- Receiver noise factor, discussing CW and dispersed signal source measurement techniques 16 p2649 A66-30549
- Generation recombination noise in Ge single crystals under fast neutron irradiation, using reversible technique to vary noise parameters 16 p2778 A66-31072
- Double sideband capacitance and resistance modulation of systems and calculation of noise and amplification factors 16 p2666 A66-31561
- Static pressure in strong noise field near turbulent mixing shear flow 17 p2905 A66-31952
- Sequential linear estimation when measurement function is nonlinear, not considering system dynamics, applied to space trajectories 17 p2946 A66-32456
- Intensity noise in multimode GaAs laser emission 17 p2935 A66-32689
- Simple diode parametric amplifier, discussing bandwidth and noise measurements, compensating circuits for gain-frequency response improvement 17 p2892 A66-32917
- Noise behavior of X-band microwave mixer over range of intermediate frequencies and local oscillator powers, noting variation of mixer conversion gain, etc 17 p2892 A66-32920
- Noise figure and optimum source impedance single and double stage transistor amplifiers with negative feedback 17 p2897 A66-33452
- External noise associated with hovercraft propeller 18 p3051 A66-33689
- Stationarity, using time averages, of laboratory electronic random noise generators 18 p3076 A66-33833
- Binary synchronous communication in additive non-Gaussian noise, discussing optimal nonlinear detector for digital data transmission through non-Gaussian channels 18 p3067 A66-33901
- Low noise traveling wave amplifier noting components, noise figures, gain, dynamic range, life test results, frequency response, etc [IEEE PAPER CP-65-467] 18 p3076 A66-33906
- Atmospheric radio noise variations at LF noting daytime increases, distribution of mean source localizations, solar activity effect, etc 18 p3104 A66-33960
- Modified Goonhilly No. 1 aerial noise-temperature, gain and figure of merit 18 p3085 A66-34316
- Lifetime of semiconductor devices determined from noise levels 19 p3315 A66-35553
- Electroacoustic assembly for determining time-dependent noise frequency characteristics in recognition and identification of noise source 19 p3356 A66-35564
- Parametric amplifier design curves to calculate gain-bandwidth product, noise temperature, pump frequency and idler loading for one-and two-port amplifiers 19 p3319 A66-36031
- Lumped network theory, calculating scattering matrix of n-gate device from reference impedances of different scattering matrix 19 p3330 A66-36652
- Acquisition phase of attitude control function of space vehicle, using noisy measurements on one state 20 p3658 A66-36867
- Noise sources analysis in electrical device, applying equivalent voltage or current spectrum 20 p3516 A66-37580
- Single cavity microwave laser amplifier analysis, determining gain, bandwidth, noise, cavity Q-factor effect and width of magnetic resonance line 20 p3578 A66-37583
- Discharge current and laser light noise measurements effect in gas discharge helium-neon laser, using equivalent circuit 20 p3580 A66-38240
- Noise-signal receiver amplitude-limitation effect on noise measurement in presence of pulsed interference 22 p3861 A66-39655
- Noise measurement in field emission vacuum diodes, interpreting excess and shot noise spectrum in terms of work function 22 p3878 A66-40696
- Method of characterization for germanium microwave transistors and circuit design principles for low noise performance 22 p3881 A66-40746
- Radiation noise effect on laser optical properties, noting density vs resonator characteristics, energy spectrum, etc 22 p3933 A66-40917
- Noise performance of MOS structures, noting parametric dependence on input voltage and current source magnitude 22 p3883 A66-40962
- Plasma fluctuation effect on gas laser noise, noting relation between modulation amplitude of light output and frequency noise and oscillation spectrum 23 p4077 A66-41294
- Microwave transistor noise measured in terms of parameters, comparing experimental and calculated results 24 p4183 A66-42631
- LF noise measurements on p-channel metal oxide semiconductor transistor operating as amplifier 24 p4211 A66-42643
- Traveling wave phototube/TWP/ theory in

theory, of modified TWT coupled mode theory, noting equivalent impedance concept and noise output 24 p4184 A66-42746

Phased array receiver compared with conventional system by defining effective input noise temperature, computing by two-port cascade form 24 p4187 A66-43193

NOISE METER

S VELA PROJECT

NOISE PROPAGATION

Simultaneous monotic masking of signal by bursts of wideband noise of brief duration changes and dependent upon delay of tone relative to masker onset 05 p0628 A66-15732

Noise generation mechanisms, discussing pressure-time histories, frequency spectra, sound pressure levels, directionality, etc 09 p1402 A66-20240

Simulation of noise transmission through structures under turbulent boundary layer flow shown to be of doubtful value 10 p1520 A66-21744

Size and position effect, baffle effect and wake and pressure interaction effect of upstream stator on ducted axial flow fan noise 10 p1483 A66-21746

HF noise signals and association with auroral disturbances analyzed, using data from IGY network of backscatter sounders 11 p1701 A66-23154

Discrete white noise used to generate discrete colored noise by means of difference equation 12 p1850 A66-24266

Noise stability for wideband analog methods of information transmission based on analysis of probability distribution density, using normal rms error and anomalous error 15 p2451 A66-29119

Equations for homogeneous transmission line with distributed noise generators 21 p3746 A66-38831

NOISE REDUCTION

SA EAR PROTECTOR

Noise problem associated with rocket boosters, possible minimization by radical change of design 02 p0293 A66-11511

Assessment of aircraft noise and relation to time duration and discrete tone components [AIAA PAPER 65-802] 03 p0319 A66-12566

Hovercraft noise due to propeller, engine and transmission, examining reduction techniques, comparing with aircraft and surface transport 04 p0457 A66-13466

Tunnel diode mixer operation expressed as bias and local oscillator voltages available gain, minimum noise figure and output conductance, carrying out numerical analysis 06 p0846 A66-16095

Paraelectrics as prospective materials for UHF amplifiers with very low noise level 06 p0854 A66-16727

Current noise of gas-discharge plasma reduced by adding grid with negative bias 06 p0837 A66-17200

Navigation precision for SST operation having due regard to performance and noise 07 p1069 A66-17709

Optimum filters for signal detection in clutter 08 p1190 A66-18716

Noise rejection properties of nonmemory discrete-data transmission systems employing information feedback, decision feedback or combined 08 p1183 A66-19096

Complex signal coding with on-off pulses of varying width and repetition period, using equal-slope approximation of signal waveforms 08 p1186 A66-19739

Pulse code modulation coder, using delay line as coding network 08 p1186 A66-19744

Noise suppression in solid state space charge limited diodes calculated, using open and short circuited output model 09 p1359 A66-20973

System controllers for signal reproduction in noise conditions, noting limitations on regular and random components, controller optimality criterion, etc 11 p1681 A66-23341

Deterministic type waveform analysis techniques for noisy repetitive transient functions, noting application to hybrid computer processing of exercise ECGs 12 p1810 A66-24233

Optimum magnitude of jet-noise reduction in cylindrical muffler 13 p2056 A66-25090

Active transistor modulators for carrier frequency engineering, noting noise reduction, lower power requirements and modulation-filter matching 13 p2032 A66-25485

High gain low-noise electronic amplifier with field effect transistor at UHF range, noting design parameters and performance 13 p2040 A66-25832

Navigation precision for SST operation having due regard to performance and noise 13 p2125 A66-25868

Method of coherent addition of signals to calculate noise resistance of diversity reception 14 p2236 A66-27170

Dual transistors for noise and drift reduction in differential direct-coupled amplifier design 14 p2262 A66-28376

Low noise linear amplifier design, noting noise voltage generator-noise current generator and direct noise figure methods 14 p2268 A66-28378

Noise rejection of pulsed systems for transmitting random Markov signal 15 p2449 A66-28673

Minimum noise temperature of parametric amplifier depends on varactor junction capacitance, spreading resistance and temperature 15 p2465 A66-29673

Douglas DC-8 super sixty series effect on airport requirements including noise level, runway problems and traffic [SAE PAPER 660281] 15 p2427 A66-29825

LF drift reduction for integrators of repetitive signals 15 p2475 A66-29863

Nonstationary problem of linear filtering in presence of additive noise solved by computer simulation 16 p2669 A66-30762

Noise coefficient minimization for traveling wave tube, with account of current interception at delay system input 17 p2879 A66-31864

Low noise photodiodes with avalanche multiplication for high sensitivity, noting capability for low intensity wideband signal detection, performance in IR region, etc 17 p2880 A66-31934

Signal to noise ratio in frequency multipliers with varactor diodes, noting relaxation oscillation type instability and techniques for minimizing noise effect on signal 17 p2894 A66-32988

Field noise-reduction measurements in school, motel and residential rooms during flyovers of aircraft 17 p2847 A66-33036

Acoustic output, turbulence in jets and noise sources in fluid amplifiers noting design, noise reduction by jet edge, input nozzle design, forced secondary flow, etc 18 p3054 A66-34132

Supersonic transport propulsion systems noting thrust requirement, noise reduction, commercial feasibility, etc [SAE PAPER 660297] 18 p3165 A66-34943

Current noise of gas-discharge plasma reduced by adding grid with negative bias 19 p3297 A66-35558

Sonic boom reduction by aircraft shape modification 19 p3279 A66-36180

Wall interaction digital stream amplifier with increased flow gain, impedance matching, outputs decoupled and noise reduction 19 p3283 A66-36812

Crystal performance and mechanical noise reduction in pressure transducer in shock tube flow 20 p3558 A66-37423

Optimum magnitude of jet-noise reduction in cylindrical muffler 21 p3721 A66-38515

Laboratory equipment protection from vibration environment, noting instrumentation and results 21 p3722 A66-38873

Parabolic reflector design modified to reduce temperature noise level by increasing diameter and extending cylindrical mantle around antenna rim 21 p3714 A66-39513

Spatial phase modulation of wavefronts used in spatial filtering and holography, examining means of preventing or reducing noise and distortion 22 p3920 A66-40888

Slip ring-strain gauge connections for transmitting supply current to rotating transducers and transmitting back signal voltage, noting noise reduction problem 23 p4017 A66-41146

NOISE SPECTRUM

Spectrum shaping of noise generated by

broadband siren is possible by introducing air by-pass system and changing rotor shape 01 p0052 A66-10145

Broadband siren spectrum test facility including acoustic chamber, horn network, siren, air supply, instrumentation and controls 01 p0052 A66-10146

Programming method for determining modulation parameters required to change siren sine wave output to random Gaussian noise 01 p0053 A66-10147

Electron beam generating plasma in tube aligned with magnetic field, measuring plasma density, beam velocity distribution and RF noise spectrum 02 p0266 A66-11442

Effect of exit velocity profile /shear/ on jet noise analyzed, considering structure of turbulence in mixing region of jets 02 p0176 A66-11587

Statistical characteristics of various uniform phase distribution processes and their envelopes 02 p0193 A66-12269

Invalidity of overall noise bandwidth for receivers using linear or square law envelope detectors for predetection of signal to noise ratio 03 p0332 A66-12430

Energy spectrum of output noise of frequency detector approximated by Nakagami m-distribution instead of generalized Rayleigh distribution 04 p0497 A66-13920

Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 04 p0499 A66-14061

Statistical description of noise waves including moments, probability distribution and density, spectral density, correlation and covariance and characteristic function 04 p0485 A66-14109

Fluctuation-dissipation theorems for relating noise current power spectrum to first and third order conductivity tensors in thermal equilibrium and pumped Raman-active media 04 p0532 A66-14310

Optimum receiver structure for detecting regular and fluctuating signals with noise sources correlated and located on surface of finite sphere 05 p0635 A66-15877

Optimum linear separation of random message from additive white noise of given spectral height realized as unity feedback system 06 p0832 A66-16449

Carrier number fluctuation in semiconductor conduction band due to generation and recombination of charge carriers 07 p1105 A66-18371

Potential noise stability of nonorthogonal signals constructed on M-sequence type codes 08 p1183 A66-19103

Noise factor of transistor in conversion regime should be twice value of this factor in amplification regime 08 p1193 A66-19109

Four-plasmon decay effects for longitudinal waves show broadening of noise spectrum 09 p1407 A66-19964

Effect of quantizing magnetic field on frequency spectrum and relative noise value associated with impurity recombination and generation in semiconductor 09 p1342 A66-19992

Intrinsic noise effect on synchronization of self-excited oscillators, determining phase diffusion coefficient, frequency fluctuation spectra and spectral line length 09 p1344 A66-20345

Spectra of amplitude and phase fluctuations in drift klystron under initial energy spectra of randomly correlated fluctuations of current and velocity 09 p1358 A66-20810

Integrated field intensity of atmospherics analysis compared to continuous wave method for data acquisition for radio systems design 10 p1496 A66-21073

Output signal and noise components determination from difference-frequency amplifier of two-channel receiver 10 p1504 A66-21671

Ducted axial flow fan noise generation and noise spectrum 10 p1483 A66-21743

Noise current spectrum of Read type avalanche diode with ideal uniform avalanche behavior in thin zone 10 p1515 A66-22086

Frequency spectra of atmospherics and atmospheric radio noise at frequencies of 1 to 100 kc from day and night observations

in Pacific Ocean 11 p1652 A66-22418
 Selection of minimum noise temperature for HF amplifiers in SHF receivers 11 p1667 A66-22795
 Magnetopause location, boundary positions and magnetic noise spectral data obtained with triaxial search coil magnetometer aboard Ogo I satellite 11 p1701 A66-23148
 Statistical characteristics of various uniform phase distribution processes and envelopes 12 p1813 A66-23873
 Statistical analysis of circuit noise effect on oscillators according to perturbation theory, discussing power spectrum, power and signal phase spectral densities, frequency stability, etc 12 p1834 A66-24127
 FM and AM noise spectra of low-noise microwave tubes, solid state klystrons and solid state chains 12 p1835 A66-24135
 Noise and amplification characteristics of millimeter-wave reflex klystron amplifiers 13 p2037 A66-25549
 Test instrumentation for threshold sensitivity and noise bandwidth measurement of narrow band phase-locked receivers, employing statistical techniques 13 p2079 A66-25659
 Noise spectrum and noise factor of semiconductor switching elements, including transistors and electron tubes, as function of bandwidth 13 p2041 A66-25897
 Amplitude probability distribution of atmospheric noise, noting effect of bandwidth change 13 p2026 A66-26567
 Absolute calibration of solar radio flux density at 1000, 2000 and 3750 mc, using newly constructed standard horns 13 p2189 A66-26568
 Flux density, polarization characteristics and position measurements for type IV bursts in meter and microwave range 14 p2378 A66-26933
 Atmospheric radio noise in tropics, noting structural characteristics such as amplitude probability, pulse rate distribution of noise envelope, effects of thunderstorms, etc 14 p2234 A66-27034
 FM telemetry Rf link performance evaluated by constructing model of subcarrier multiplex, based on predicted noise power spectrum at Rf demodulator output 16 p2649 A66-30543
 Expansion of Inter-Range Instrumentation Group FM/FM baseband, noting maintenance of system performance with added channels 16 p2649 A66-30545
 Frequency spectrum of FM signal for carrier modulation by any number of subcarriers 16 p2649 A66-30547
 Bit error rate improvement without source coding, using matched filters 16 p2659 A66-30548
 Formant frequency parameter of speech spectrum pattern by cancel method 16 p2653 A66-30800
 Thermal noise theory extended for insulated gate /MOS/ FET with gate voltage induced channel structure by including bulk charge from ionized impurities in semiconductor substrate 16 p2663 A66-31016
 Device for measurement of photocurrent noise spectra in semiconductors at 1 cps to 5 kc 16 p2664 A66-31361
 Generation-recombination and modulation noise power spectrum of high purity p-type InSb at 77 degrees K 16 p2784 A66-31449
 Noise sources in axial flow fans, including broad frequency band lift fluctuations, turbulent wakes, velocity fluctuations, etc 17 p2989 A66-31946
 Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 17 p2885 A66-32227
 Noise characteristics of solid state, X-band microwave sources, using VHF crystal oscillator, amplifier and varactor multiplier 17 p2893 A66-32924
 Book on laser receivers covering noise performance, atmospheric effects, detection techniques, hardware and systems available, optical communication in visible and IR spectrum, etc 19 p3375 A66-36060
 Ionospheric thermal radiation, discussing noise power per unit volume, spectral distribution, frequency, etc 19 p3352 A66-36631
 Frequency measurement using

autocorrelator as frequency discriminator, noting technique and high-noise sensitivity 19 p3306 A66-36657
 Selection of minimum noise temperature for HF amplifiers in SHF receivers 20 p3525 A66-37132
 Energy spectrum of output noise of frequency detector approximated by Nakagami m-distribution instead of generalized Rayleigh distribution 20 p3532 A66-37878
 Noise measurement in field emission vacuum diodes, interpreting excess and shot noise spectrum in terms of work function 22 p3878 A66-40696
 VLF measurements of flicker noise in Si planar transistors 24 p4181 A66-42376
 Visual perception threshold based on Wiener or power spectrum of noise in relation to Fourier transform of relevant image detail 24 p4165 A66-43025

NOISE SUPPRESSOR

Laser application problems in interferometry, radar and holography including mechanical stability, noise suppression, dirty laser beam restoration, etc 02 p0240 A66-11454
 Effect of nozzle geometry and jet interference on noise generation and mechanism of noise reduction of noise suppressors 02 p0177 A66-11588
 Airport suitability for delta wing commercial supersonic transport, discussing noise objectives 09 p1365 A66-20698
 Signal to noise ratio at output of frequency doubler performing nonlinear transformation by quadrature circuit 10 p1510 A66-21670
 Physical and psychological nature of noise and principles of noise suppression in aviation 10 p1493 A66-22129
 Telemetric technique based on data modulation and coding for satellite data transfer, stressing noise suppression, operation flexibility, error correction, etc 11 p1651 A66-22366
 Secondary emission effect on LF noises near carrier frequency of continuously operating high power TWT output signal 11 p1655 A66-22724
 Long chain of highly multiplexed broadband PCM regenerative repeaters, considering SNR after demodulation, error rate and jitter reducers /suppressors/ 12 p1818 A66-24595
 Noise suppression, signal reception, and polarization measurement in cross correlated antennas as function of dipoles imbedded in random field, surrounding noise field and coherency matrix of cross correlation function 13 p2044 A66-26746
 Noise suppression for jet engine 14 p2269 A66-26770
 State variable determination for linear time invariant plants with known parameters, noting noise suppressing characteristics of technique 15 p2471 A66-29329
 Noise rejecting algorithms for ODE solutions with computer, using redundancy, placement of control and feedback techniques 17 p2877 A66-32569
 Acoustic isolator-membrane structure for soundproofing V/STOL aircraft exposed to high noise levels with radical saving in space 18 p3051 A66-33688
 Analog computer method for reconstruction of data distorted by physical system response noise 20 p3627 A66-36888
 Dimensional filtering in IR technology for background noise elimination, discussing Fourier analysis treatment of system 21 p3768 A66-39646
 Pulse noise suppression systems properties and characteristics 22 p3875 A66-40072
 Secondary emission effect on LF noises near carrier frequency of continuously operating high power TWT output signal 23 p4037 A66-41462
 Mean flow refraction of self noise and generation of shear noise in jets 24 p4194 A66-42414

NOISE THRESHOLD

Threshold performance of frequency demodulator using feedback compared to phase locked loop 04 p0492 A66-13587
 Mutual dependence of interconnection and noise immunity in transistorized digital

computer circuitry 10 p1517 A66-21692
 Small signal modulation effect on photoelectron counting of He-Ne laser intensity fluctuations 16 p2719 A66-31097
 Multichannel sequential detection in case of reception through independent multiple channels with noise 19 p3296 A66-35295
 Threshold signals and optimal modulation parameters of analog methods of transmitting information under conditions of ideal reception 21 p3705 A66-39253
 Line width of well-stabilized laser operating far above threshold determined by phase random fluctuation, using interferometer 21 p3749 A66-39394
 Radar detection probability in presence of unknown parameters, covering pulse-to-pulse, partial and fully coherent cases 21 p3707 A66-39639

NOISE TOLERANCE

Principles of data communication reviewing digital systems, modulation methods and spectral shaping of data signals to achieve maximum noise tolerance 05 p0633 A66-14991
 FAA study of jet takeoff and landing noise effect on population around airport, establishing numerical value of noisiness 10 p1482 A66-21373
 Human reaction to noise under various simulated acoustical conditions of space cabin 13 p2015 A66-25890
 Residual difference between oscillator frequencies used to investigate noise immunity of phase automatic frequency control 14 p2236 A66-27245
 Damage-risk criteria for exposure to sound, including graphs of maximum steady-sound pressures and durations of exposures that can be tolerable 14 p2230 A66-27657
 Reduction of RF interference 16 p2654 A66-31199
 Noise effect on human performance 20 p3504 A66-36932
 Noise acceptability as produced by actual aircraft flyovers and recorded flyover signals judged on relative and absolute basis 21 p3721 A66-38647
 Message estimation of sample function from continuous Gaussian random process, establishing and evaluating optimal bounds for procedure 21 p3720 A66-39637

NOMENCLATURE

Mode nomenclature in general lossy inhomogeneous waveguide made unique by branch points in complex propagation constant 11 p1669 A66-23111

NOMOGRAPH

Mathematical relation between damping and amplitude of transient process in second order system, using nomogram 03 p0351 A66-13240
 Aircraft braking system, determining energy absorbed during landing or interrupted takeoff 06 p0807 A66-16970
 Engineering method of calculating Fresnel coefficients based on use of nomograms 08 p1182 A66-18917
 Nomograms for rapid calculation of maximum ground sonic-boom overpressure for different flight conditions 09 p1330 A66-20747
 Nomograms for radiometer sensitivity, predetection and postdetection gains and detector-output voltage used to accelerate Dicke radiometer design 11 p1666 A66-22689
 Nomograph for FM/FM telemetry system design 12 p1815 A66-24103
 Graph that indicates image motion effect on photographic image resolution 13 p2078 A66-25607
 Nomograph calculation for twin-T filter design 14 p2247 A66-26868
 Nomogram construction for transformation of astronomical object position from one spherical coordinate system to another, using trigonometric functions 16 p2737 A66-31398
 Coupling situations involving two flush-mounted antennas such as those used in space vehicles, noting interference problems and use of nomographs 19 p3313 A66-35514

NON-NEWTONIAN FLOW
 Flow of non-Newtonian liquids in cylindrical pipes containing cylindrical parallel cores moving longitudinally at constant speed 03 p0358 A66-13090
 Momentum, heat and mass transfer in turbulent boundary layer flow of power law

fluids over smooth flat plate 08 p1210 A66-19679

Solvent purity effects on non-Newtonian power law viscosity 09 p1368 A66-20947

Pressure drop for non-Newtonian flow in inlet length of straight channel 14 p2279 A66-28464

Approximate iterative calculation of non-Newtonian supersonic gas flow past highly blunt bodies 15 p2423 A66-28959

Motion of non-Newtonian liquid through two coaxial curved pipes, noting relation between pressure gradient and outflow rate, curvature effect and secondary flow 15 p2479 A66-29397

Shear rate at which transition from Newtonian to non-Newtonian flow occurs for polystyrene, polyethylene and polydimethylsiloxane 16 p2730 A66-31022

Finite difference method for uniform nonpermanent laminar flow of non-Newtonian fluids between plane, parallel fixed walls, for case of variable pressure gradients 17 p2911 A66-32951

Book on theory of steady viscometric flows of non-Newtonian fluids, discussing design and interpretation of experiments 17 p2912 A66-32992

Mangler rectilinearization of axisymmetric laminar boundary layer flows and Prandtl boundary layer hypotheses, applicability to non-Newtonian fluids 17 p2912 A66-33045

Two-dimensional non-Newtonian nonisothermal viscous liquid boundary layer flow in stagnation point proximity and flow deviations due to pressure gradient and shearing stress 18 p3266 A66-34637

Stability of viscoelastic liquid in Couette flow compared with non-Newtonian liquid of same limiting viscosity 21 p3729 A66-39451

Shear stress, velocity profiles, MHD and cross-viscous effects on forced non-Newtonian flow of Reiner-Rivlin liquid against rotating disk 21 p3795 A66-39576

Pitot tube technique for measuring velocity profiles, using Bernoulli equation in stress measurement in laminar viscoelastic flow 22 p3898 A66-40010

NON-NEWTONIAN FLUID

Hydromagnetic rotational instability of electrically conducting non-Newtonian fluid between two rotating cylinders 01 p0114 A66-10712

Similarity of two-dimensional and axisymmetric boundary-layer flows for purely viscous non-Newtonian fluids 02 p0218 A66-11951

Turbulence and pressure verification of equations for particular class of non-Newtonian fluids 03 p0359 A66-13245

Non-Newtonian media, parallel flow, discussing effects of two-and three-dimensional perturbations on flow stability 04 p0510 A66-13872

Rotationally symmetric flow of non-Newtonian fluid in presence of infinite rotating disk, solving Navier-stokes equation and determining velocity profiles 07 p1019 A66-17258

Rotating non-Newtonian fluid, discussing stabilizing and destabilizing effect of circular magnetic field for cross-viscous parameter variation 07 p1019 A66-17259

Parameter estimation for laminar conical flow of viscous inelastic non-Newtonian fluids 10 p1521 A66-21056

Shear stress, shear rate, inelastic thixotropic properties and speed-torque curves for time-independent non-Newtonian fluids 10 p1618 A66-21885

Heat transfer in steady flow of non-Newtonian fluid characterized by Rivlin-Ericksen constitutive equation inside wavy cylindrical tube, with momentum and energy equations solved by perturbation technique 12 p1866 A66-24960

Non-Newtonian media, parallel flow, discussing effects of two-and three-dimensional perturbations on flow stability 14 p2275 A66-27572

Pressure drop as function of flow rate for helical flow of non-Newtonian polyisobutylene solution 15 p2477 A66-28615

Turbulent flow of dilute viscoelastic non-Newtonian fluids in pipes, noting frictional characteristics, elastic fluid parameters, etc 17 p2906 A66-32036

Skin friction drag of power law fluids in

turbulent flow over flat plate shown as function of non-Newtonian Reynolds number and shear rate exponent 20 p3545 A66-37507

Non-Newtonian viscoelastic fluids with similarity transformations for power law fluids, noting momentum, energy and heat transfer 20 p3545 A66-37510

Frictional resistance of finite disks and cones rotating in power law non-Newtonian fluids 21 p3730 A66-39456

Constitutive and balance equations derived in tensorial form for incompressible fluid with nonlinear viscous characteristics 23 p4055 A66-41382

NONADIABATIC THEORY

Steady state composition mechanism of solid /heterogeneous/ propellants noting linear pyrolysis, exothermal oxidizers, fuels, etc [ONERA TP 240] 02 p0278 A66-11681

Nonadiabatic motion of particle in cusped magnetic field 13 p2143 A66-25715

NONDESTRUCTIVE TESTING

SA DESTRUCTIVE TESTING

SA FLAW DETECTION

Outline of nondestructive testing of structures, components, systems and materials 01 p0078 A66-10864

Nondestructive testing - Seminar, Genoa, November 1964 02 p0235 A66-11685

Multiple echoes in ultrasonic inspection of material defects reduces errors in signal reading for better reproducibility 02 p0235 A66-11686

Nondestructive X-ray diffraction technique for measuring flexure in single-crystal silicon wafers at different stages of integrated circuit fabrication 02 p0275 A66-11978

IR nondestructive testing system for usability analysis in production line inspection of Polaris A-3 motors 03 p0373 A66-12996

Destructive and nondestructive testing of fiber composite materials 05 p0773 A66-14815

Nonhazardous and nondestructive method for testing pressure regulating valves, using simulated gas flow and pressure [ASME PAPER 65-WA/AUT-7] 05 p0661 A66-15707

Radiographic examination through steel using cold neutrons produced by placing polycrystalline beryllium neutron filter and single crystal bismuth gamma-ray filter in beam tube 06 p0884 A66-17030

Nondestructive test method using fluorescent penetrant techniques for detecting intergranular surface attack on Inconel-X thrust chamber tubing 07 p1040 A66-18392

Nondestructive testing system for Polaris missiles and service correlation 12 p1884 A66-23649

Truncation method for determining life characteristics of electronic components such as transistors and vacuum tubes before testing to destruction 12 p1833 A66-24078

Unsharpness and contrast effect on slit detection studied by radiography 13 p2086 A66-25820

Part failure detection methods, noting interrelationship between part sampling and reliability, destructive and nondestructive component testing, etc 15 p2507 A66-28800

Nondestructive testing specifications noting equipment, personnel and acceptance criterias, radiographic ultrasonic penetrant and magnetic particle specifications, etc 15 p2508 A66-28814

Radiography and principal factors variation at energies below 400 kvp 15 p2509 A66-29318

Nondestructive metal testing in SST development, noting welded titanium structures 15 p2509 A66-29319

Eddy current nondestructive test instrument for measuring magnetic permeability, electric conductivity and thickness of materials 16 p2701 A66-30320

Nondestructive attachment of small electronic components and integrated circuits for simulated mounting in vibration and shock testing 16 p2680 A66-30481

Berg-Barrett skew reflections applied to observation of boron diffusion-induced imperfections in silicon wafers 18 p3076 A66-33935

Nondestructive testing in aircraft

maintenance, surveying radiography, ultrasonic testing and eddy current testing 18 p3116 A66-33946

Nondestructive testing of nonlinearities in passive electronic components, uncovering uneven film depositions, bad grindings, unreliable contacts, etc 18 p3088 A66-35020

Nondestructive testing of adhesive bonded structures using ultrasonic-resonant instrument, noting detection of voids and cohesive strength determination 19 p3362 A66-35329

Equilibrium photocurrents in silicon switching diodes from nondestructively measured electrical parameters 20 p3526 A66-37322

Nondestructive ultrasonic testing in machine and boiler construction engineering, noting material properties and behavior of parts, flaw detection, etc 21 p3743 A66-38939

Neutron radiographic techniques to solve nondestructive testing problem of pyrotechnic cartridge inspection 21 p3806 A66-39153

Thermal IR inspection for bond integrity in solid propellant rocket motors 21 p3808 A66-39154

Nondestructive testing for material evaluation, noting color radiography, ultrasonic imaging, transmission, attenuation, heat transfer and residual stress measurement 21 p3830 A66-39192

Nondestructive detection technique of phosphosilicate layer on semiconductor wafers, using IR spectrophotometer 24 p4181 A66-42390

NONELECTRONIC APPARATUS

Reliability of nonelectronic components in electronic system, noting failure modes, rates, mechanism, etc 13 p2085 A66-25655

NONEQUILIBRIUM

SA EQUILIBRIUM

Nonequilibrium effects in recombination dissociation kinetics, using iterative perturbation procedure 11 p1738 A66-22884

NONEQUILIBRIUM FLOW

Nonequilibrium expansion of air through hypersonic nozzle extended to higher reservoir temperatures and pressures 02 p0303 A66-11565

Numerical solutions for inviscid nitrogen gas flows over circular cylinder where nonequilibrium prevails through nose region 03 p0317 A66-13211

Ionization and recombination processes in multicomponent steady nonequilibrium flow in MPD energy converter 04 p0555 A66-14335

Chemical kinetics of nonequilibrium combustion of propane-air and ethane-air mixtures in one-dimensional flow, including ignition delay and reaction time [CI PAPER WSCI-65-19] 05 p0788 A66-15143

Book on physical gas dynamics including transport theory, kinetic theory, thermodynamics, equilibrium, fluid flow, radiative transfer, etc 05 p0666 A66-15848

Heat transfer to blunt bodies with catalytic and noncatalytic surfaces in nonequilibrium dissociated hypersonic flow [AIAA PAPER 66-3] 05 p0609 A66-15850

Simple waves in one-dimensional nonsteady nonmagnetic relaxation hydrodynamic flows of chemically reacting compressible gases 07 p1020 A66-17965

Velocity potential equation for linearized steady motion of gas mixture with multiple reactions 07 p1023 A66-18116

Supersonic airflow past blunt body with various dissociation reactions 08 p1165 A66-19192

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 08 p1179 A66-19482

Nonequilibrium inviscid flow behind blunt body shock wave analysis, using series truncation and reducing truncation error 08 p1166 A66-19816

Hypersonic flow of air past circular cylinder with nonequilibrium oxygen dissociation, including dissociation of free stream 10 p1479 A66-21375

Criterion of electron-heavy particle thermal nonequilibrium encountered in subsonic arc jet plasma at pressure of 1 atm [AIAA PAPER 66-192] 10 p1562 A66-21438

Small perturbation plane steady flows in nonequilibrium MGD, noting diffusion

effects 10 p1566 A66-21793
 Leading edge pressure distributions
 measured on circular cylinders in normal
 cross flow, obtaining data from tests in arc-
 heated perfect gas and variable atmosphere
 wind tunnels 11 p1686 A66-22845
 Nonequilibrium thermodynamics, variational
 techniques and hydrodynamic stability -
 Symposium, University of Chicago, May
 1965 12 p1974 A66-23540
 Nonequilibrium heat transfer distributions
 around blunt-nosed aerodynamic bodies,
 using analytical method, for design analyses
 of hypervelocity flight
 vehicles 12 p1799 A66-24715
 Nonequilibrium effect in two-dimensional
 steady flow of ionizing gas past magnetized
 wall, calculating velocity distribution along
 wall 12 p1924 A66-24809
 Electromagnetic wave propagation near
 missiles during hypersonic atmospheric
 reentry and computer program for
 determination of dissociated and ionized
 particle density in nonequilibrium nitrogen-
 plasma flow 13 p2150 A66-26374
 Nonequilibrium inviscid flow about
 arbitrarily shaped body with detached shock
 waves, using method with time derivative
 and bypassing boundary conditions
 [AIAA PAPER 65-24] 14 p2218 A66-27404
 Nonequilibrium laminar boundary layer of
 binary dissociating gas determined by
 solving nonlinear partial differential
 equations governing system
 [AIAA PAPER 65-129] 14 p2274 A66-27406
 Inverse problem of nonequilibrium
 dissociation and vibrational relaxation of
 diatomic duct flow 14 p2219 A66-27428
 Static pressure distributions in supersonic
 nozzle flows of dissociated hydrogen plus
 argon 14 p2219 A66-27442
 Condensation of vapor and vapor-gas
 mixtures in supersonic nonequilibrium
 nozzle flows 14 p2219 A66-27454
 Optimum profile of supersonic nozzle with
 nonequilibrium flow 16 p2687 A66-31287
 Linearized unsteady nonequilibrium flows
 produced by unsteady motion of thin foil or
 circular cylindrical shell in incompressible
 gas 16 p2687 A66-31288
 Nonequilibrium flow fields over spherically
 blunted conical entry vehicle with chemical
 reaction in shock layer
 [AIAA PAPER 66-420] 17 p2840 A66-32750
 Transonic nonequilibrium approximations
 for reacting gas mixture
 flow 17 p2913 A66-33080
 Vibrational and rotational nonequilibrium
 flow effects in hypersonic conical nozzle
 expansion of nitrogen flows and
 airflows 17 p2842 A66-33478
 Dissociational rate constants and
 vibrational relaxation times modifications,
 considering coupling of vibrational and
 dissociational nonequilibrium of expanding
 gas in nozzle
 [AIAA PAPER 66-520] 18 p3047 A66-33661
 Numerical computation of quasi-equilibrium
 nozzle flows with finite rate chemical
 kinetics
 [AIAA PAPER 66-636] 18 p3048 A66-34220
 Nonequilibrium nozzle flow expansion
 calculation techniques applicable to
 advanced propulsion systems
 [AIAA PAPER 66-635] 18 p3164 A66-34436
 Diffusion of chemically frozen partially
 dissociated gas over surfaces with
 discontinuous catalytic 18 p3266 A66-34928
 Classical/quantum views of nonequilibrium
 gas flow equations with arbitrary number of
 relaxation times 19 p3340 A66-35738
 Inviscid hypersonic nonequilibrium flow of
 three-component gas past circular cone,
 using exact reaction-rate equations to
 correct solution first obtained from
 approximate equations 21 p3693 A66-38711
 Nonequilibrium flow of chemically reacting
 gas past infinite corrugated
 cylinder 21 p3724 A66-38717
 Supersonic flow of reacting gases in de
 Laval nozzle for Mach number near
 unity 21 p3724 A66-38721
 Interferometric measurement of density
 distributions in shock layer of
 nonequilibrium flow field around
 cone 21 p3694 A66-39168
 Chemical nonequilibrium losses in solid
 propellant systems calculation based on heat

release of recombination reactions
 [AICE PREPRINT 28B] 22 p3971 A66-39883
 Weakly perturbed supersonic flows in
 presence of arbitrary number of
 nonequilibrium physicochemical
 processes 22 p3901 A66-40684
 Surface catalytic and Reynolds number
 effects on nonequilibrium hypersonic
 stagnation flow of air or diatomic gas on
 highly cooled blunt body 22 p3847 A66-40919
 Heat transfer to blunt bodies with catalytic
 and noncatalytic surfaces in nonequilibrium
 dissociated hypersonic flow
 [AIAA PAPER 66-3] 23 p4150 A66-41878
 Flows with relaxation involving very rapid
 flow processes accompanied by reactions
 without chemical or thermodynamic
 equilibrium, using characteristics
 method 23 p4014 A66-42048
 Convective processes in magnetoactive
 plasma flows transverse to homogeneous
 magnetic fields, based on multifluid
 equations derived from Boltzmann equation
 for ionization and recombination
 reaction 24 p4245 A66-43069

NONEQUILIBRIUM IONIZATION

Nonequilibrium ionization of K-seeded or
 Na-seeded argon for MHD generators, noting
 current density-electric field
 characteristics 05 p0625 A66-15811
 Theoretical performance of idealized
 infinitely segmented MHD generator with
 potassium-seeded argon working fluid under
 nonequilibrium electron heating, using
 energy dependent electron collision cross
 sections 07 p0993 A66-18312
 Spatial distributions of free electrons in
 near wakes of spheres in hypersonic flight
 [AIAA PAPER 66-55] 07 p0983 A66-18449
 Nonequilibrium radiative and collision
 ionization, photoionization and shock wave
 structure in high temperature hypervelocity
 low density gas 08 p1204 A66-18521
 Closed loop MPD power generation at low
 temperatures and analysis of nonequilibrium
 processes in magnetoactive flow
 [AIAA PAPER 66-168] 10 p1486 A66-21689
 Nonequilibrium ionization of suspension of
 solid particles expanding supersonically in
 nozzle, particularly lowering of ionization
 due to injection in flow of high work
 function 15 p2615 A66-28762

NONEQUILIBRIUM PLASMA

Radiation of finite volume of
 nonequilibrium plasma, discussing integral
 flux parameters 04 p0552 A66-13873
 Electron-ion recombination processes in
 nonequilibrium plasma, noting validity of
 commonly made
 assumptions 05 p0625 A66-15810
 Spectral distributions for current and field
 fluctuations in nonequilibrium plasma
 located in external magnetic
 field 06 p0918 A66-16868
 Kinetic equation for fast electrons in
 plasma in stationary electric field, taking
 into account electron
 interaction 09 p1407 A66-19963
 Relaxation to steady state, electron
 collision ionization, recombination and
 collision cross section uncertainties in
 conducting nonequilibrium plasma stream
 [AIAA PAPER 66-193] 10 p1562 A66-21439
 Digital computer determination of
 equilibrium conductivity effect on MHD
 plasma engine
 performance 12 p1935 A66-23604
 Electrical fluctuations in argon-potassium
 nonequilibrium plasma measured and
 correlated with theories of electrothermal
 and magnetoacoustic
 waves 13 p2149 A66-26261
 Radiation of finite volume of
 nonequilibrium plasma, discussing integral
 flux parameters 14 p2343 A66-27575
 Recombination rate, ionization in
 nonequilibrium electric
 conductivity
 prediction for dense
 seeded
 plasma 15 p2554 A66-29752
 Statistical entropy of nonequilibrium
 plasma, assuming binary correlations remain
 small and neglecting higher order
 correlations, analyzing irreversible evolution
 of simple density 16 p2763 A66-31210
 Balance equations derived from kinetic
 equations for nonequilibrium plasma,
 considering radiative processes and inelastic
 collisions between electrons and

atoms 16 p2766 A66-31603
 Electrical power dependence of ideally
 sectioned Faraday MHD generator on
 nonequilibrium plasma flow Mach
 number 16 p2637 A66-31606
 Transformation of electromagnetic and
 plasma waves at critical fluctuations of
 transverse or longitudinal field of
 nonequilibrium plasma 17 p2873 A66-32239
 Solution of Boltzmann and rate equations
 for electron distribution function and state
 populations in nonequilibrium MHD
 plasmas 19 p3406 A66-35801
 Electron velocity distribution function in
 nonequilibrium plasma having spatial
 distribution governed by electron-electron
 and inelastic collisions 20 p3606 A66-36974
 Nonequilibrium ionization phenomena
 interaction with nonuniform flow of plasma,
 reviewing nonequilibrium characteristics for
 uniform flow with electric and magnetic
 fields 20 p3610 A66-37982
 Charged particle and electromagnetic wave
 interaction with nonequilibrium plasma,
 noting conversion of transverse into
 longitudinal waves and angular distribution
 of scattered radiation 21 p3781 A66-39011
 Scattering and transformation of
 electromagnetic waves during critical
 fluctuations in nonequilibrium
 plasma 21 p3789 A66-39065
 Fast charged particle and electromagnetic
 field fluctuations interaction with
 nonequilibrium plasma 21 p3791 A66-39155
 Optimum seed concentrations of alkali
 metal in rare gas for maximum
 electroconductivity of slightly ionized
 nonequilibrium plasma 23 p4104 A66-41511
 Nonequilibrium plasmas produced in InSb
 by both impact ionization and injection,
 examining instabilities due to HF
 oscillations and negative
 resistance 23 p4114 A66-41582

NONEQUILIBRIUM RADIATION

Equilibrium and nonequilibrium stagnation
 point shock layer radiation in simulated
 planetary atmospheres of varying
 composition 10 p1481 A66-21773
 High-temperature gas radiance in simulated
 planetary atmosphere at various entry
 velocities
 [AIAA PAPER 66-183] 13 p1990 A66-25169

NONEQUILIBRIUM GEOMETRY

Expansion of Joukowski transformation
 into third-degree algebraic solution for two
 projective planes, using certain complex
 function lying between two Gaussian
 planes 01 p0092 A66-10198

NONGRAY ATMOSPHERE

SA GRAY GAS
 Radiant heat transfer from nongray
 surfaces with external radiation
 [AIAA PAPER 66-21] 07 p1153 A66-17886

NONHOLONOMIC EQUATION

Existence of forms of motion equation for
 material systems with nonholonomic
 nonlinear connections 11 p1722 A66-22847
 Nonholonomic couplings effect on stability
 of mechanical system, showing weakening
 from asymptotic to nonasymptotic
 stability 12 p1967 A66-24108
 Effect of external forces on state of stress
 and dislocation density in continuous
 medium 14 p2402 A66-27937
 Singular characteristics of dynamic systems
 with steady state motion, noting effect of
 constantly acting small
 perturbations 15 p2537 A66-28950
 Motion equations and effect of small
 parameters on dynamics of nonholonomic
 systems 15 p2539 A66-29153
 Transformation equivalency of various
 forms of partial differential equations of
 motion of nonholonomic
 systems 16 p2747 A66-31144
 New method of introducing nonholonomic
 constraints into Lagrangian formulation of
 mechanics 16 p2749 A66-31724

NONLIFTING VEHICLE

Optimum flight of axially propelled
 nonlifting vehicles through resisting medium
 calculated by calculus of variations
 [AIAA PAPER 66-485] 16 p2799 A66-30524

NONLINEAR EQUATION

SA BERNOULLI EQUATION
 SA LINEAR EQUATION
 Nonlinear kinetic equation of self-similar
 motion of rarefied collisionless electron-ion

plasma 01 p0109 A66-10260
 Random error in finite difference approximation of stochastic nonlinear equations in theory of random signals and noise 01 p0093 A66-10381
 Nonlinear field equations of elastic shell in terms of reference state subjected to strain displacement 01 p0153 A66-10444
 Parametric dependence of almost periodic solutions to nonlinear differential equations with deviating argument 01 p0094 A66-10457
 Nonlinear equations of atmospheric hydrodynamics solved, using numerical algorithm 01 p0096 A66-10751
 Difference method with smoothing of coefficients for numerical solution of Stefan problem with multidimensional phase fronts and any number of independent variables 01 p0166 A66-11010
 Exact derivative method of integrating some differential equations of nonlinear vibrations 01 p0159 A66-11173
 Nonlinear differential equations describing RC oscillator determining frequency, stable amplitude and transient response 03 p0345 A66-13238
 Nonlinear eigenvalue problem for equilibrium state of rotating rod solved by perturbation procedures and Leray-Schauder degree theory 04 p0589 A66-13948
 Forced oscillations in nonlinear relay type control system predicted via periodic solutions to nonlinear difference equation 05 p0654 A66-14606
 Boundedness of solutions of nonlinear functional equations for stability of feedback and electrical systems 05 p0658 A66-15182
 Solution method for Poincare problem concerning periodic solutions of nonautonomous systems with analytical right-hand side 05 p0708 A66-15338
 Effective transformation and asymptotic behavior of class of nonlinear differential equations 05 p0709 A66-15343
 Cauchy problem for first-order nonlinear equation 05 p0709 A66-15360
 First order nonlinear partial differential equation discussing global locally-Lipschitzian solutions via Jacoby theorem extension 06 p0901 A66-16006
 Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 06 p0970 A66-16345
 Optimal control theory for nonlinear vector differential equations containing measures 06 p0863 A66-16620
 Nonlinear differential equation stability, describing technique for Liapunov function construction 06 p0865 A66-16743
 Vector equation $F(X)$ equals zero solved by transforming nonlinear algebraic equation into nonlinear differential equation 06 p0865 A66-16746
 Reduction of nonlinear system of differential equations to integral equation of Hammerstein type 07 p1055 A66-17421
 Complete solution of problem of branching of solution of nonlinear equation in multidimensional case 07 p1056 A66-17601
 Cauchy and boundary value problem for second-order nonlinear ordinary differential equations 07 p1056 A66-17607
 Deflections and stresses of shallow shell under creep conditions, reducing problem to system of two nonlinear integro-differential equations 07 p1143 A66-17628
 Convergence of nonlinear problem solutions with respect to higher derivatives 07 p1057 A66-17853
 Two uniqueness theorems for periodic solutions of second order nonlinear differential equation describing oscillatory systems 08 p1246 A66-19709
 Change of variables for generalization of Konyukov second-order nonlinear differential equation, using Bernoulli and Riccati equations 09 p1393 A66-19917
 Proof, by degenerate kernel method of existence and uniqueness of solution for one class of nonlinear integral equations 09 p1394 A66-20455
 Heuristical method solving zeros of complex function, transcendental or algebraic, of complex variable, applicable to computation of eigenvalues of general

matrix 10 p1548 A66-21214
 Singular perturbation problems with infinite domain treated by perturbation method 10 p1550 A66-21304
 Existence theorems for nonlinear equations having indefinite and potential operators 10 p1551 A66-21977
 Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 11 p1785 A66-22340
 Quantum mechanical nonlinear theory of intensity and phase fluctuations of homogeneously broadened laser noise 11 p1711 A66-22466
 Nonlinear circuit theory, discussing invariant imbedding, dynamic programming and quasi-linearization 11 p1675 A66-22629
 Existence of forms of motion equation for material systems with nonholonomic nonlinear connections 11 p1722 A66-22847
 Limit functions of sequence of solutions in nonlinear differential system of MHD, making no convergence assumptions 11 p1746 A66-23187
 Limit functions of sequence of solutions in nonlinear differential system of MHD 11 p1746 A66-23188
 Limit cycles and global structure of integral curves of nonlinear system of differential equations in five-dimensional parameter space 11 p1724 A66-23364
 Numerical solutions of problems in gas dynamics in U.S.S.R., using computers stressing methods for solving systems of nonlinear partial differential equations 12 p1861 A66-23807
 Sufficient conditions for boundedness of solutions of nonlinear differential equations and oscillatory and asymptotically stable solutions 12 p1904 A66-24193
 Convergence of Keck-Beyer perturbation solution of nonlinear differential equation for finite-amplitude plane wave propagation in viscous fluid 13 p2060 A66-25143
 Maximum principle for systems described by difference equations, justifying convexity assumptions for approximation of differential equations 13 p2116 A66-25344
 Stability criteria of trivial solution of rheolinear differential equation verified by calculating Liapunov function for nonlinear equations 13 p2117 A66-25399
 Nonlinear theory of thin elastic shells, discussing surface geometry and deformation, equations of equilibrium and boundary conditions and stress functions 13 p2196 A66-25600
 Nonlinear differential equations in theory of electrical oscillation 13 p2118 A66-25826
 Nonlinear kinetic equation of self-similar motion of rarefied collisionless electron-ion plasma 13 p2148 A66-25977
 Finite plane strains in solid body problem, postulating arbitrary deformation law and arbitrary hydrostatic stresses dependence on volume change, solved by nonlinear equation 13 p2205 A66-26450
 Cauchy problem of first-order nonlinear partial differential equations 13 p2121 A66-26503
 Nonlinear ordinary differential equations applicable to damped oscillatory circuits with exploding wires, obtaining conservation law and approximate solutions by Picard method 13 p2129 A66-26667
 Nonlinear parabolic equations of order 2m in plane having generally nondivergent form 14 p2319 A66-26769
 Boundary problem describing plane jet steady state flow of ideal incompressible fluid, reducing solution to nonlinear integro-differential equations 14 p2272 A66-26775
 First boundary value problem for nonlinear second order differential equations 14 p2320 A66-26942
 Extension of nonlinear TWT equations to floating drift relativistic klystron, noting formulas for first harmonic of current in two- and three-cavity 14 p2250 A66-27139
 Twice continuously differentiable function satisfying nonlinear hyperbolic equation for certain initial conditions obtained, using averaging method 14 p2321 A66-27163
 Finite difference solution of nonlinear boundary value problem of Landau-Vlasov

equation for charged particle for Maxwellian distribution function 14 p2344 A66-27625
 Newton-Kantorovic method solution of Hammerstein type nonlinear integral equation, with application to elasticity theory of buckling of thin spherical shell 14 p2322 A66-27628
 Averaging error of system of nonlinear differential equations with time periodic right-hand sides 14 p2322 A66-27674
 Nonlinear equations of atmospheric hydrodynamics solved, using numerical algorithm 14 p2285 A66-27850
 Theory of physical systems governed by nonlinear functional equations such as vector nonlinear Volterra integral equation [AIAA PAPER 64-680] 14 p2375 A66-27884
 Estimation of proximity of solution for Cauchy problem of nonlinear differential equations, formulating six theorems 14 p2325 A66-28279
 Domains of attraction in large of periodic solutions of weakly nonlinear systems, using Liapunov function and differential equations 15 p2525 A66-28509
 Existence, boundedness, decay and exponential decay of solutions of classes of nonlinear systems of differential equations, using suitable Liapunov functions 15 p2525 A66-28510
 Nonlinear system of partial differential equations describing one-dimensional combustion process of gas mixture 15 p2616 A66-28961
 Unique absolutely continuous extensions of strict solutions to first-order nonlinear partial differential equations, satisfying these equations at almost all points of half-space 15 p2527 A66-29060
 Oscillating solutions of ordinary nonlinear nonautonomous differential equations, noting qualitative methods 15 p2527 A66-29168
 Existence theorem for nonlinear ODE system with continuous monotonic differential operators over Hilbert space and application to nonlinear network analysis 15 p2528 A66-29370
 Effective transformation and asymptotic behavior of class of nonlinear differential equations 15 p2530 A66-29979
 Computer program for axisymmetric nonlinear behavior of stiffened elastic shells of revolution with variable thickness, calculating collapse pressures [AIAA PAPER 66-529] 16 p2814 A66-30527
 Stresses and displacements in linearly elastic and toroidal shells of circular cross section determined by nonlinear numerical method [AIAA PAPER 65-144] 16 p2816 A66-30905
 Solution method for Poincare problem concerning periodic solutions of nonautonomous systems with analytical right-hand side 16 p2735 A66-30968
 Analog computer technique for solving nonlinear ODE system 16 p2658 A66-31263
 Volterra series analysis of aperiodic solutions to certain second order integrodifferential equations with nonlinear damping and nonlinear restoring force 16 p2737 A66-31334
 Axiomatic theory of Dirichlet problem applicable to nonlinear PDEs and to systems of PDEs 16 p2738 A66-31704
 Asymptotic behavior of nonlinear integral equations with certain conditions on kernel and nonlinearities 16 p2738 A66-31705
 Unified treatment of nonlinear partial differential equations, considering solution technique in engineering application 16 p2739 A66-31740
 Iteration methods for solution of integro-differential equations 17 p2945 A66-31807
 Stability of constant solutions for second-order nonlinear differential equation which uses Hahn notations and definitions 17 p2945 A66-31837
 Nonlinear parabolic equations, considering existence, uniqueness theorems, abstract Cauchy problem, etc 17 p2946 A66-32307
 Asymptotic methods of nonlinear mechanics applicable to nonlinear differential equations with random arguments 17 p2958 A66-32711
 Control forces in nonlinear integral equations solved by iteration method 17 p2902 A66-32816
 Existence, uniqueness and periodicity of

solutions to boundary value problems for quasi-linear ODEs on topological space of continuous mappings 18 p3127 A66-34138

Static equations for characteristic parameter in superfluid Fermi gas 18 p3147 A66-34688

Ignition conditions determined based on linearization of initial nonlinear equations 19 p3477 A66-35742

Low thrust trajectory optimization, using Newton-Raphson method to solve nonlinear two-point boundary value problem [AIAA PAPER 65-698] 19 p3462 A66-35904

Nonlinear theory for deformation of elastic directed surface, assuming existence of strain energy function and postulating virtual work governing mechanical behavior 19 p3474 A66-36167

Existence theorems for nonlinear equations having indefinite and potential operators 19 p3390 A66-36187

Nonlinear filtering theory based on invariant imbedding for orbit determination and adaptive control problems 19 p3303 A66-36244

Viscoelastic stress-strain equations for treating strong material nonlinearities, comparing experimental and theoretical results for solid propellants 19 p3449 A66-36428

Constitutive equations for elastic solids sustaining deformation for which displacement gradients are small but where nonlinearity is permitted, formulating plane elastostatic problem 19 p3475 A66-36429

Parameter-plane method analysis of nonlinear equations of asymmetric oscillations in adaptive feedback control systems 19 p3338 A66-36740

Asymptotic representation of systems of nonlinear differential equations, setting up lemmas and theorems 20 p3590 A66-37484

Quasi-periodic solutions of nonlinear ordinary differential equations containing parametric discontinuities 20 p3591 A66-37592

Class of nonlinear second-order differential equations with algebraic moving singular points, considering convergent series inversion and existence conditions 20 p3591 A66-37753

Nonlinear equations of traveling wave tube solved approximately, taking account of relativistic effects 20 p3533 A66-38000

Ablation analysis in cylindrical coordinates for axisymmetrical configuration of wall materials with temperature-dependent properties and nonlinear heat flux conditions at boundaries [AIAA PAPER 66-542] 20 p3680 A66-38034

Two-dimensional nonlinear equations of finite thermal oscillations of anisotropic thin elastic plates 20 p3673 A66-38278

Nonlinear theory of parametric excitation applied to modulated wide beams of uniform cross section, analyzing propagation in such beams of charge density oscillations 21 p3781 A66-39013

Existence conditions of solution to two-point boundary value problem for ordinary nonlinear any order differential equation 21 p3757 A66-39245

Nonlinear ODE of radial motion of body in nonlinear central force fields, considering drag effects 21 p3773 A66-39436

Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell 22 p3989 A66-39905

Cauchy problem of first-order nonlinear partial differential equations 22 p3939 A66-40439

Static stability of rolling motion of aircraft for given alleron angle when inertia cross-coupling is present, with numerical solution of nonlinear equations 22 p3848 A66-40493

Nonlinear boundary value problem for temperature distribution in convex solid with radiation boundary condition 22 p3999 A66-40565

Bifurcation of nonlinear operator equations to determine steady state axisymmetric homogeneous fluid flows between rotating cylinders 22 p3928 A66-40689

Numerical analysis of transient behavior of nonlinear transistor circuit equations 22 p3885 A66-40863

Successive approximation method for optimization of nonlinear systems of

ordinary differential equations with limitations on phase coordinates 23 p4084 A66-41352

Lienard type of differential equation for oscillatory system representing solution by Krylov-Bogoliubov method, noting inverse problem 23 p4085 A66-41545

Newton iterative procedure extended to solution of nonlinear integral equations 23 p4085 A66-41556

One- and two-sided estimates for distances between two zero points of solution of nonlinear differential equation with slowly varying parameters, comparing solutions 23 p4090 A66-41563

General method for determining real solutions of set of nonlinear simultaneous equations, using digital computer 23 p4086 A66-41923

Nonstationary Navier-Stokes equations solved, using implicit difference scheme, demonstrating convergence with aid of difference analog of energy equality of hydrodynamics 24 p4231 A66-42234

Classical character of generalized solution of boundary value problem for general nonlinear Navier-Stokes equations 24 p4231 A66-42235

Nonlinearity of governing equations of fluid mechanics, assuming fluid fluctuations are nearly normally distributed 24 p4193 A66-42283

Nonlinear integral equations formulated that are equivalent to Krook kinetic equation for steady problems in two and three space dimensions 24 p4193 A66-42407

Analytic design of optimal digital controller, resolving problem of choice of weighting coefficients of functional representing generalized rms estimate of transient 24 p4188 A66-42481

Weak and strict solution existence theorem for initial-boundary value problem for nonlinear hyperbolic equation in relativistic quantum mechanics 24 p4237 A66-42829

NONLINEAR FEEDBACK

Nonlinear analog-to-digital converter for more constant accuracy 03 p0338 A66-12988

Graphical method for determining closed-loop frequency response of nonlinear feedback control systems 03 p0349 A66-13021

Performance of delay-lock discriminator, nonlinear feedback device for continuous tracking of delay difference between two correlated waveforms 06 p0842 A66-15976

Popov-related stability results for feedback systems proved via bounded solutions for functional equations 07 p1015 A66-17756

Stability inequality for class of nonlinear feedback systems partially answered by taking into account slope of nonlinear function 12 p1849 A66-24252

Nonlinear control systems consisting of single-loop negative feedback circuit with one isolated instantaneous type nonlinear element 12 p1850 A66-24258

Functional integration analysis of exponential behavior of nonlinear feedback control systems 13 p2052 A66-26076

Nonlinear time varying open-loop feedback system design and infinitely integrable function space boundedness condition 13 p2053 A66-26085

Nonlinear feedback composed of combination of nonlinear functions of state variables separately to stabilize amplitude response and provide time optimal control 16 p2670 A66-30831

Text on random processes in nonlinear control systems, covering statistical analysis, nonlinear transformation with and without feedback, extremal systems, etc 16 p2673 A66-31753

Trial and error method for constructing closed loop harmonic response locus of control system with one nonlinear element 18 p3089 A66-34010

Stable transmission of given transient response in closed loop nonlinear servosystem under fixed initial condition and in presence of possible disturbances 23 p4048 A66-41393

NONLINEAR FILTER

Split-path nonlinear filter/span filter/ for independent gain and phase to achieve control system compensation [ASME PAPER 65-WA/AUT-4] 05 p0659 A66-15705

State of continuous nonlinear dynamical system driven by white Gaussian noise from discrete nonlinear observations corrupted by white Gaussian noise 06 p0862 A66-16412

Least squares recursive differential-correction estimation in nonlinear problems, examining equations and stochastic interpretation 06 p0903 A66-16735

Universal nonlinear Gabor filter that optimizes itself by learning process used to determine static characteristics of controlled plant 11 p1674 A66-22205

Nonlinear filters, including system analysis optimization, realization via Volterra functionals, etc 11 p1675 A66-22630

Nonlinear time-invariant filter for detecting signal pulse imbedded in nonstationary noise 13 p2023 A66-25658

Optimum signal reception against non-Gaussian noise background in presence of white Gaussian noise 14 p2241 A66-28148

Filter theory method applied in solving analytical construction problems for optimal controllers, noting existence of Fourier transform and Pally-Wiener condition 21 p3719 A66-39282

Continuous nonlinear recursive filtering based on Markov processes and state-variable concepts for application to optimum analog demodulation 22 p3868 A66-40717

NONLINEAR PROGRAMMING

SA DUAL CONTROL PROBLEM

Selection of maximum number of constraints for which solution can be obtained for problems of linear or nonlinear programming and approximation of functions 01 p0051 A66-10707

Deriving pair of symmetric nonlinear dual programs based on extension of Dorn use of duality theorem of linear programming 02 p0194 A66-12155

Fuel optimal linear control through minimization of convex function, using convex programming and steepest descent technique 04 p0505 A66-13996

Steepest descent, covering iterative methods for driving support mapping gradient to zero in convex programming 04 p0540 A66-13997

Pseudo-convex functions, discussing existence criteria, properties and application 06 p0864 A66-16621

Selection of maximum number of constraints for which solution can be obtained for problems of linear or nonlinear programming and approximation of functions 11 p1675 A66-22619

Electronic analog computer nonlinear function generation by using silicon carbide varistors 11 p1660 A66-23254

Nonohmic-resistor analog function generator, using output voltage summation of nonlinear combination channels for input range 11 p1660 A66-23255

Duoplex method applied to nonlinear programming by linearization of expressions with lambda algorithm and determining optimum point 13 p2046 A66-25345

Sufficient conditions for nonlinear system optimal control derived, imposing state and control-variable constraints and fixed initial and terminal times 13 p2046 A66-25346

Decomposition of large-scale mathematical problems in nonlinear programming 13 p2117 A66-25350

Optimal set of parameters for radioelectronic equipment automatic control, using nonlinear programming 18 p3091 A66-34986

Partial differential solutions related to concave and quadratic nonlinear programming problems over Euclidean N-space 19 p3308 A66-35870

Automated improvement of design /AID/ computer using nonlinear programming techniques to solve optimization problems 19 p3308 A66-35872

Optimization of linear control system by expressing quadratic performance index as quadratic functional of control functions 22 p3884 A66-40533

Approximation method for maximizing nonlinear separable function with two-sided limitations on unknowns, given common lower boundary for difference modulus of unknowns 23 p4088 A66-41059

Nonlinear systems including oscillators, frequency multipliers, limiters, etc, driven by periodic carrier, deriving circuit theory for small perturbations propagated throughout system 12 p1848 A66-24136

Reflection of resonance frequency monochromatic wave from half-space filled with nonlinear medium 12 p1816 A66-24226

Stability and quality evaluation of nonlinear sampled data control systems using Popov criteria for continuous nonlinear systems 12 p1852 A66-24325

Applicability and limitations of analytical methods in study of nonlinear sampled data automatic control systems 12 p1852 A66-24326

Generalization of parameter plane method for case when characteristic equation coefficients are nonlinear functions of system of adjustable parameters 12 p1855 A66-24642

Man-machine systems for interplanetary exploration, using functional analysis techniques for system design 13 p2013 A66-25281

Sufficient conditions for nonlinear system optimal control derived, imposing state and control-variable constraints and fixed initial and terminal times 13 p2046 A66-25346

Mathematical methods for examining stability of linear and nonlinear systems, with survey of stability criteria 13 p2118 A66-25581

Free oscillation amplitude increase from resonance traversal occurring when perturbation frequency passes through resonant value in weakly nonlinear system 13 p2146 A66-25740

Countable systems of differential equations, considering differential operator theory and infinite systems 13 p2119 A66-25850

Sensitivity operator as extension of time-domain sensitivity function to time-varying change of elements in nonlinear dynamic system, deriving sensitivity equations 13 p2050 A66-26060

Sufficient conditions of stability of single-loop nonlinear feedback systems 13 p2052 A66-26074

Controllability of general class of nonlinear systems describable by nth order ODE with bounded state and control spaces 13 p2052 A66-26079

Transformations for study of nonlinear systems behavior in neighborhood of phase plane infinity 13 p2054 A66-26089

Oscillation index in qualitative assessment of equilibrium converging processes in nonlinear systems 13 p2056 A66-26479

Graphical determination of phase trajectories and oscillation limits of nonlinear sampled system 13 p2056 A66-26755

Control theory of nonlinear servomechanisms, based on describing function technique, provides design data for type I servomechanisms, deriving equations 14 p2264 A66-27117

Nonlinear gyroscopic system equations solved by analog computer and verified through method of harmonic linearization 14 p2294 A66-27362

Signal distortion correlation in nonlinear element 14 p2265 A66-27479

Motion control for nonlinear system with small initial perturbation 14 p2267 A66-27673

Existence of periodic solutions of differential equations in nonlinear mechanics [PST PAPER NT-147] 14 p2323 A66-27792

Optimum control systems for plants described by ordinary nonlinear differential equations or differential equations with constant or variable delay 14 p2268 A66-28278

Stability of nonlinear control systems, noting Hermitian matrix for linear system of ordinary differential equations and analogous problem for difference equations 15 p2525 A66-28513

Control system stability under external forces discussing Liapunov function construction, transfer functions and matrix analysis, frequency conditions of absolute stability, etc 15 p2470 A66-29147

Probability methods in analysis of oscillations of nonlinear mechanical systems 15 p2541 A66-29163

Poincare small-parameter method in

constructing periodic solutions for nonlinear oscillation 15 p2541 A66-29166

Integral equations in determining periodic regimes for nonlinear dynamic systems and for linear systems with periodically varying parameters 15 p2541 A66-29167

State variable selection for nonlinear network differential equations, uniqueness and existence theorems 15 p2471 A66-29324

Canonical form for two-terminal nonlinear RLC network first-order ordinary differential equations 15 p2472 A66-29371

Evaluation of solution moduli of nonlinear contour problems pertaining to polyvibrant systems with delayed remainders and arguments 15 p2529 A66-29653

Electronic relays with bistable elements based on nonlinear circuits with p-n junction capacitance 15 p2468 A66-29923

Invariance provided for in nonlinear control systems by reducing problem to construction of inverse operator 15 p2530 A66-29977

Stability of control systems with distributed parameters and hysteresis-curve-type nonlinearity for various critical cases of system characteristic equation 16 p2668 A66-30750

Approximate analysis of nonlinear systems similar to harmonic oscillators, using Chaplygin theory of differential inequalities 16 p2705 A66-30781

Nonlinear stochastic system, determining distribution law for variables 16 p2670 A66-30834

Nonlinear automatic control system, discussing optimum tuning via parametric stability region 16 p2670 A66-30838

Sufficient conditions for containing modulus of Fourier indices of almost periodic solution of nonlinear almost periodic system 16 p2735 A66-30971

Parameterized feedback control of nonlinear dynamic system 16 p2672 A66-31337

Optimal trajectories of nonlinear discrete-time systems determined by second-order gradient method for use in dynamic programming 16 p2672 A66-31341

Stability of synchronous one-frequency regime for system of nonlinear unidentical objects with one degree of freedom under action of mutual couplings 16 p2748 A66-31503

Nonlinear system position in phase space determined from approximate solution of integral equations yielding initial values 16 p2748 A66-31519

Text on random processes in nonlinear control systems, covering statistical analysis, nonlinear transformation with and without feedback, extremal systems, etc 16 p2673 A66-31753

Nonlinear automatic systems analyzed by reduction to first and second order systems by linear nonsingular transformation of variables 17 p2901 A66-32250

Sufficient conditions for statistical stability of motion in nonlinear systems 17 p2901 A66-32570

Necessary condition for optimal control in nonlinear automatic control system determined, using method of successive approximations 17 p2902 A66-32574

Random delay effect on excitation of vibrations in nonlinear systems, using Krylov-Bogoliubov method 17 p2958 A66-32710

Almost periodical oscillations of nonlinear systems containing quasi-cyclic coordinates 17 p2959 A66-32803

Periodic solutions of nonlinear oscillations of autonomous system 17 p2960 A66-33420

General synchronization theory and application 17 p3032 A66-33423

Nonlinear spring-mass system with many degrees of freedom subjected to periodic exciting forces, deducing steady state forced vibrations equal to forcing function [ASME PAPER 66-APMW-30] 18 p3249 A66-33591

Pulse-type nonlinear automatic systems and systems with single nonlinear element 18 p3091 A66-34548

Dynamics of nonlinear control systems by constructing cross sections of parameter space 18 p3091 A66-34989

Synthesizing nonlinear converter in

presence of random input signals with normal distribution 18 p3092 A66-34991

Absolute stability criteria of control system with one nonlinear element, using Liapunov functions 18 p3092 A66-35016

Nonlinear material with memory defined by constitutive functional, examining fading memory theory 19 p3438 A66-35484

Information theory criterion applied to nonlinear processing antenna systems yielding optimum system, considering SNR 19 p3318 A66-35885

Structural rules determining sensitivity functions of nonlinear nonstationary systems obtained from sensitivity structure, using analog computer 19 p3327 A66-36016

Sensitivity analysis for relative stability of self-excited oscillations and transient response of nonlinear control systems 19 p3328 A66-36019

Necessary and sufficient condition of existence of extremal trajectories of nonlinear system within framework of optimal control theory 19 p3330 A66-36251

Nonlinear and nonstationary finite differential system identification by quasilinearization and differential approximation 19 p3335 A66-36701

Functional polynomial fitting of continuous functional, using Laplace transforms to reduce number of measured records for identifying kernels of second-degree approximation 19 p3391 A66-36703

Generalizations of functional Lagrange expansion to multivariable nonlinear systems such as state space and functional equations in s domain for control problems application 19 p3391 A66-36704

Describing function for analysis of feedback control systems with time-invariant nonlinear elements, simplifying derivation by taking derivative of output of nonlinear element with respect to input 19 p3336 A66-36705

Graph techniques used in connection with nonharmonic series representation of stationary Gaussian signals for analysis of nonlinear systems 19 p3392 A66-36706

Ordinary differential equations experimentally determined for describing performance of existing lumped-parameter time-invariant nonlinear physical systems 19 p3392 A66-36710

Sampled data nonlinear system design for three axes acceleration measurement, noting effect of limit cycle trajectory and parameter choice on system velocity output error 19 p3361 A66-36715

Pontryagin principle extended to control systems, computing optimal control laws 19 p3337 A66-36735

Input-output stability conditions of time-varying nonlinear feedback systems obtained, using concepts of loop gain, concavity and positivity 19 p3338 A66-36739

Quadratic and linear friction effects on time-weighted fuel-optimal singular control of nonlinear systems 19 p3338 A66-36744

Generalized Lur coordinates used in canonical forms for controllable systems, with applications to optimal nonlinear feedback 20 p3535 A66-36848

Wiener filtering theory for stationary ergodic inputs with known spectral densities and optimal control transfer functions of random-input nonlinear saturating systems with random unwanted disturbances 20 p3536 A66-36859

Control algorithms synthesis for analytical adaptive control systems with nonlinear plants investigated with hybrid computer 20 p3536 A66-36876

Monograph on approximate analysis of randomly excited nonlinear controls, discussing feedback system performance, functional and quasi-functional representation, zero mean systems, etc 20 p3538 A66-37577

Algorithm for rapid damping of multidimensional system 20 p3670 A66-37675

Statistical linearization of nonsingle valued nonlinearities considered as multidimensional inertialess functions of dependent variables 20 p3539 A66-37747

Response data for uniform beam supported on nonlinear springs and subjected to shock, demonstrating usefulness of shock spectra in design situations 20 p3671 A66-37976

- Morse potential functions for nonpolar gases determined from experimental viscosity and second virial coefficient 12 p1917 A66-23934
- NONUNIFORM MAGNETIC FIELD**
- Spin wave generation in nonuniform magnetic fields with application to magnetic delay lines 03 p0332 A66-12417
- NONUNIFORM PLASMA**
- Asymptotic methods for hydrodynamic stability of slightly nonuniform plasma 05 p0727 A66-15261
- Variational method for dispersion curve of electromagnetic slow wave propagation in nonuniform plasma 06 p0836 A66-16988
- Magnetic field effect on gravity and sound waves in nonuniform plasma 06 p0956 A66-17046
- Longitudinal and transverse waves transformation in nonuniform plasma 17 p2969 A66-32543

- Oscillations of nonuniform plasma column 17 p2969 A66-32545
- NONVISCOUS FLOW**
- Steady nonviscous flow in field with sources of energy, force and mass investigated under assumption of small perturbations 01 p0057 A66-10430
- Wave solutions to linearized quasi-hydrostatic equations for adiabatic nonviscous flow on equatorially oriented beta plane 02 p0254 A66-11982
- Quasi-one-dimensional unsteady hydromagnetic wave flow of ideal inviscid compressible conducting fluid in nonuniform ducts 07 p1089 A66-17962
- Hydrodynamic problem of nonviscous liquid flow past two spheres solved, using new method of solution 10 p1525 A66-21919
- NORADRENALINE**
- S NOREPINEPHRINE**
- NORD 600 AIRCRAFT**
- Nord 600 Aerobus, short and medium range transport designed for 250 passengers, mixed freight and passengers or freight only 09 p1329 A66-20329
- NORD 1500 AIRCRAFT**
- Griffon 02 delta-winged aircraft with composite air breathing turboramjet engine, noting achievements and prospects 11 p1761 A66-23248
- NOREPINEPHRINE**
- Degree of mental stress correlated with excretion of catecholamine, free adrenaline and noradrenaline in urine 04 p0470 A66-14081
- Correlation between survival time of rats under acceleration stress and cerebral level norepinephrine 17 p2855 A66-32145
- Methylene blue action in reversing decaborane-mediated norepinephrine depletion 22 p3853 A66-39788
- NORMAL DISTRIBUTION**
- Approximate solution of equation with normally distributed operators 12 p1902 A66-23899
- Data analysis on probability papers for gamma, normal and Weibull /including exponential/ distributions 24 p4230 A66-42088
- NORMAL FORCE DISTRIBUTION**
- Membrane of constant strength subjected to load uniformly distributed in horizontal plane, using yield condition of maximum principal normal stress 22 p3996 A66-40708
- Secondary jets investigated on sharp nosed 9 degree half-angle cone at Mach 6, noting effect on ratio of jet interaction normal force coefficient to jet reaction normal force coefficient 24 p4158 A66-42791
- NORMAL SHOCK WAVE**
- Nonequilibrium radiative and collision ionization, photoionization and shock wave structure in high temperature hypervelocity low density gas 08 p1204 A66-18521
- Turbulent radial channel flow without swirl between parallel disks having both supersonic and subsonic regions, determining pressure distribution and normal shock [ASME PAPER 65-FE-11] 12 p1799 A66-24547
- NORTH AMERICA**
- Latitude and altitude survey in North America made by road transport carrying neutron monitor, meson telescope, mercury barometer, etc 18 p3198 A66-34879
- NORTH AMERICAN MILITARY AIRCRAFT**
- S T-39 AIRCRAFT**
- NORTH AMERICAN NAC-60 AIRCRAFT**
- SST navigation and air traffic control equipment for NAC-60 aircraft, noting climbout, cruise, position, landing, etc 07 p1067 A66-17687
- NORTHERN HEMISPHERE**
- Air currents and temperature distribution in stratosphere and mesosphere in Northern Hemisphere from rocket observation 04 p0513 A66-13438
- Positions of monthly mean troughs and ridges in Northern Hemisphere from 1949 to 1963 05 p0711 A66-14939
- Malkevich atmospheric transfer function calculation for Northern Hemisphere in order to correct satellite radiation measurements 09 p1435 A66-19887
- Critical ionization frequencies in F-2 layer in near-polar region observed at Northern Hemisphere high latitude stations 15 p2487 A66-29107
- Annual frequency of noctilucent clouds linked to low temperatures in mesopause region 19 p3345 A66-35396
- NORTHROP MILITARY AIRCRAFT**
- S F-5 AIRCRAFT**
- S T-38 AIRCRAFT**
- NORWAY**
- Electron density in E-and D-regions above Kjeller, Norway, from rocket measurements of absorption and height of reflection of radio waves 16 p2692 A66-30332
- NOSE**
- S OLFATORY PERCEPTION**
- NOSE CAP**
- Radiative cooling of uniform gas flow to determine reduction of heat flux incident on space vehicle surface, considering nose cap radiation during reentry 23 p4150 A66-41905
- NOSE CONE**
- SA ABLATING NOSE CONE**
- SA ROCKET NOSE CONE**
- Cermet ablatives for thermal shields in fabrication of nozzles and nose cones [SAE PAPER 650767] 01 p0078 A66-10838
- Homogeneous isotropic cone with surface loadings and internal temperature distributions 08 p1309 A66-19142
- Optimum nose form determination for minimum drag in free-molecule flow of asymmetric body 11 p1635 A66-22937
- Pressure distribution and heat flux on surface of nose cone 14 p2217 A66-27337
- NOTCH**
- Stress concentration factors at notches, fillets and circular holes in plates under uniaxial load obtained from equations for elastic stress distribution 20 p3667 A66-37481
- Photoelastic determination of stress concentration factor for flat strips notched on both sides under tension 23 p4140 A66-41852
- NOTCH SENSITIVITY**
- Frequency sensor and roving notch filter for control system, discussing parasitic signals with time-varying frequencies 05 p0645 A66-14603
- Fracture characteristics of welds in aluminum alloys evaluated by tear and notch tensile tests 13 p2197 A66-25776
- Notched and unnotched bending fatigue strength of machined work hardened AISI type 305 stainless steel affected by cold worked surface layer with high compressive residual stresses 15 p2521 A66-29073
- Cobalt addition to titanium alloy, discussing effect on tensile strength, thermal stability fatigue strength, ductility and notch sensitivity 20 p3582 A66-37049
- Mechanical properties of VAD23 alloy noting tensile, compression, crushing and shearing strength and notch sensitivity and comparison with D16T alloy 22 p3936 A66-40881
- Regenerative heat treatment for increasing creep life of high temperature alloys used in turbines 24 p4227 A66-42508
- NOTCH STRENGTH**
- Notch-tough high-strength butt welds in alloy titanium plate with gas metal-arc welding, using spray type or short circuiting metal transfer 02 p0236 A66-12228
- Chemical surface hardening effects on brittle fracture characteristics of machine component steels under dynamic impact, covering mathematical relations for strength improvement 03 p0383 A66-13157
- Maraging steel properties and application noting notched strength, sensitivity and brittleness 04 p0536 A66-14000
- Notched structure load analysis, discussing planar stress distribution in flat bar for various points of application of force 06 p0964 A66-16478
- Four-point loading bend test on specimen of full plate thickness with sharp notch to 20 percent depth, with ductility criterion as fully plastic angle of bend before fracture 06 p0965 A66-16492
- Notch toughness of aluminum alloy sheet and plate with machine-edge and fatigue-cracked notchings investigated according to ASTM practice 08 p1242 A66-19718
- Stress concentration at semicircular notch in semiinfinite plate calculated by Savin complex-variable method 10 p1616 A66-21494
- Tensile, static notch, stress rupture, creep and salt stress corrosion tests at appropriate temperatures, evaluating effect of solution annealing temperatures of Ti-8Al-1Mo-IV 12 p1892 A66-23625
- Plastic deformation of Charpy specimens under plane stress-strain conditions, noting low temperature brittle fracture behavior, effects of notch geometry and loading, etc 12 p1969 A66-24532
- Effects of notch geometry on mechanical behavior /yield strength, tensile strength, etc/ of duplex annealed quaternary alloy at various temperatures 13 p2109 A66-25856
- Section size effect on room-temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 14 p2312 A66-26972
- Shell resistance of metal adhesive joints, noting notch strength and plastic deformation 14 p2301 A66-27253
- Stress distribution of notched half-disk with uniform loading of bottom of notch 19 p3474 A66-36303
- Section size effect on room temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 24 p4228 A66-42581
- Notch and heat treatment effect on compressive buckling of WC/Co alloys 24 p4228 A66-43063
- NOTCHED METAL**
- Elastic-plastic stress and strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 05 p0689 A66-15442
- Load cycle prediction for crack initiation and propagation in notched fatigue specimens 06 p0961 A66-15936
- Stress concentration and distribution in statically loaded tension bar with U-shaped grooves studied photoelastically 08 p1315 A66-19804
- Formation of fatigue cracks in center notched sheet specimens of various metals ultrasonically tested for axial tensile fatigue 12 p1957 A66-23630
- Elastic-plastic stress-strain distribution in solid or hollow shaft containing external or internal hyperbolic notches [ASME PAPER 65-WA/APM-20] 12 p1885 A66-23977
- Plastic behavior of notched bars pulled in tension 13 p2199 A66-26378
- Cyclic plastic stresses at notch roots in aluminum alloy sheet specimens under constant-amplitude repeated tension and reversed loading 17 p3023 A66-32074
- Notched fatigue strength improvement shot-peening through mechanism of compressive residual stress 21 p3831 A66-39197
- Notched plates stress distribution solution under conditions of plane stress in elastoplastic domain of straining 23 p4146 A66-41994
- NOTCHED STEEL**
- Effect of structure and volume cold-working related to structural factors on notched samples of steels subjected to cyclic stresses 07 p1048 A66-17441
- Fracture toughness of notched A-302B and Ni-Mo-V steels with various size specimens [ASME PAPER 66-MET-1] 14 p2311 A66-26969
- Fatigue crack propagation in low-alloy heat-treated notched steels with high yield strength [ASME PAPER 66-MET-2] 14 p2311 A66-26970
- Section size effect on room-temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4] 14 p2312 A66-26972
- Limit load of flat notched bars subject to tension, discussing rupture force magnitude, plastic strain occurrence, rupture stress and yield limit curves, etc 14 p2398 A66-27394
- 100-200 ksi yield-strength notched steels for high-toughness weldments, discussing quenched and tempered steels, maraging steels, heat treatment effects, etc 21 p3751 A66-39193
- Notched bar impact testing machine with solid slab pendulum and no material protruding beyond striking edge 22 p3988 A66-39670

Section size effect on room temperature notch strength of H-11 steel, 2014-T6 and 7075-T6 aluminum alloys and Plexiglas [ASME PAPER 66-MET-4]

24 p4228 A66-42581

NOVA

SA SUPERNOVA

Historical summary of nova and supernova outbursts, considering resonance theory of novas and possibility that supernovas are due to chain reaction 09 p1448 A66-20093
Electrical discharge theory of cosmic atmospheric phenomena, relating lightning, novae and quasars 12 p1950 A66-24394
Temperature and radii of nova photospheres 16 p2800 A66-30640

Nozzle guide vanes of ZrS-6K alloy in thermal stress induction of surface layer crystal structure changes 16 p2727 A66-31531
Cavitation effect on discharge coefficient of standard flow nozzles [ASME PAPER 66-FE-12] 17 p2915 A66-33266

NOZZLE EFFICIENCY

Feasibility of using columbium alloy B-66 and Ta-10W as regeneratively cooled nozzle materials in hydrogen fuel engine 10 p1547 A66-21782

Atomization of fluids by using nozzles and rotating disks, comparative analysis between these methods and applications 13 p2059 A66-25076

Nozzle cooling and infiltrant loss from infiltrated refractory metal composites at high gas propellant temperature 19 p3385 A66-36157

NOZZLE EXPANSION

Condensation in underexpanded jet issuing from sonic orifice into quiescent atmosphere 01 p0007 A66-10617

Air condensation in hypersonic wind tunnel strongly related to flow expansion rate 01 p0059 A66-10808

Combination of spontaneous nucleation theory equations with steady one-dimensional diabatic flow equations for computer analysis of vapor expansion in two-dimensional nozzle 02 p0302 A66-11528

Supersonic flow at exit of radial-inflow turbine flat-vane nozzle ring [ASME PAPER 65-WA/GTP-5]

05 p0608 A66-15720

Spectrum line reversal measurements of excitation temperature of Na atoms in expansion flows of shock-heated Ar and one percent nitrogen plus Ar 08 p1258 A66-18939

Large-scale expansion nozzle control by heterogeneous nucleation and mercury vapor and drop growth processes in nitrogen flow [AIAA PAPER 66-85] 08 p1318 A66-18997

Spectroscopic and optical studies of high pressure underexpanded jet produced by expanding DC arc plasma generator through sonic orifice

[AIAA PAPER 66-164] 10 p1565 A66-21688

Condensation in underexpanded jet issuing from sonic orifice into quiescent atmosphere 13 p1990 A66-25178

Effect of degree of expansion of ionized gas in nozzle on specific power of MHD generator 16 p2637 A66-31377

Ionization of low temperature supersonic plasma jets, noting kinetics of elementary processes, gas dynamic parameters and effects of combustion and alkali metal admixtures 18 p3143 A66-34030

Nonequilibrium nozzle flow expansion calculation techniques applicable to

advanced propulsion systems [AIAA PAPER 66-635] 18 p3164 A66-34436
Nozzle design using liquid metal vapor condensation Mach number as design parameter 24 p4294 A66-42786

NOZZLE FLOW

Transonic flow in throat of plane axisymmetric nozzle determined by taking velocity potential in form of power series and determining coefficients of series from set of recurrence equations 01 p0007 A66-10714

Flow field about subsonic jet exhausting into quiescent and low velocity air stream [AIAA PAPER 65-704] 01 p0008 A66-10942

Temperature fields in pipe filled with Raschig rings with internal heat source during gas flow calculated by electrical analogy method 01 p0166 A66-10999

Steady state irrotational flow of perfect gas in plane and axisymmetric Laval nozzles 01 p0008 A66-11015

Hydrodynamic equations for one-dimensional, adiabatic, frictionless, ideal-gas flow and general matrix form equations for coupled chemical reaction kinetics of C-H-O /N/ systems 02 p0303 A66-11533

Nonequilibrium expansion of air through hypersonic nozzle extended to higher reservoir temperatures and pressures 02 p0303 A66-11565

Performance of vortex-stabilized arc radiation source in which arc current, gas pressure, gas flow rate and nozzle diameter are prime variables 02 p0270 A66-12209

Difference in properties of constituents of stratified multicomponent ideal gas and effect on nozzle flow

[AIAA PAPER 64-266] 03 p0315 A66-12747

Attraction switching through use of parallel secondary injection in Coanda-effect nozzle 03 p0355 A66-12775

Performance of supersonic bypass nozzle with small and large secondary flow evaluated theoretically and experimentally [ONERA TP 287] 03 p0316 A66-12897

Water-vapor condensation zones of moist air expansions in Laval type nozzles with thermal choking 03 p0317 A66-12948

Characteristics of jet ejector with faired inlets as augmenters treated by continuity and momentum equation 04 p0456 A66-14388

Most probable discharge coefficient for ASME flow nozzles [ASME PAPER 65-WA/FM-1]

05 p0663 A66-15516

Nonstandard approach section effects on flow coefficients for venturi and orifice meters

[ASME PAPER 65-WA/FM-5]

05 p0684 A66-15519

Local heat transfer coefficients in nozzle under conditions of cold-wall low density high speed laminar flow 05 p0609 A66-15774

Thrust measurement for calibrating nozzle flow coefficients by direct primary method [ASME PAPER 64-WA/FM-3]

06 p0871 A66-16220

Metallized propellant and gas-solid suspension flow through nozzle in high energy systems 06 p0803 A66-16912

Experimental data compared to theory for expansion of high temperature air in equilibrium and nonequilibrium flow through Mach number 10 contoured nozzle [AIAA PAPER 66-2] 06 p0803 A66-17089

Gas flow dissipation in transonic plane-symmetric nozzle, obtaining asymptotic solutions for flow parameter

07 p0979 A66-17264

Steady flow interactions of supersonic airstream and jet blown from hemispherical and flat body noses 07 p0982 A66-18137

Jet inducer with multiple nozzles calibrated in liquid mercury and water to minimize feed pump performance

degradation due to off-design operation and cavitation 07 p1025 A66-18170

Flow of thin jets in vicinity of solid walls with diverging profiles 07 p1026 A66-18230

Analogy between gas flow through convergent/ divergent nozzles and open side-contracted channel 08 p1205 A66-18628

Recombination effects in nozzle flows of hydrogen/ fluorine rocket engines 08 p1279 A66-19152

Arc heating, self-magnetic acceleration and supersonic flow in plasma thrusters

[AIAA PAPER 66-237] 11 p1760 A66-22220

Gas dynamic problems in low pressure microthruster engines, noting parameters such as type of nozzle flow, pressure drop causes, etc 11 p1761 A66-22461

Quasi-steady compressible fluid flow and thrust analysis in accelerating nozzles and channels subject to constant axial acceleration or gravitation

[ASME PAPER 65-AV-44] 11 p1629 A66-22469

Fluid dynamic behavior of system predicted by performing measurements on model of system 11 p1693 A66-23173

Inviscid flow of compressible conducting gas with aligned magnetic field through axially symmetric Laval nozzle in various transition regions 11 p1636 A66-23256

Chemical relaxation effects in nozzle flow by measuring high temperatures created by detonation waves in shock tube, using hydrocarbon mixtures 12 p1977 A66-23748

Similar solution of differential equations for compressible laminar boundary layers in case of insulated walls 12 p1862 A66-23861

Equilibrium flow of ideal gas and condensing vapor mixture from nozzle, using basic equations to describe process 12 p1863 A66-24368

Discharge rate of multicomponent gas mixtures through de Laval nozzle from chamber containing adsorbent bed 12 p1979 A66-24587

Anisotropic grid-generated turbulence passed through axisymmetric nozzle of small contraction ratio followed by straight section 12 p1866 A66-24947

Static pressure distributions in supersonic nozzle flows of dissociated hydrogen plus argon 14 p2219 A66-27442

Jet boundary determination of underexpanded two-phase carbon dioxide supersonic nozzle flow 14 p2219 A66-27445

Condensation of vapor and vapor-gas mixtures in supersonic nonequilibrium nozzle flows 14 p2219 A66-27454

Maintaining of flow similarity in calibration of nozzle type water meters for study of working processes of pumps 14 p2225 A66-27698

Gas-particle flow, particle velocity distributions and lag loss reduction for rocket nozzles 14 p2375 A66-27893

Plane or axisymmetric hypersonic ideal gas flow in divergent nozzle with parabolic wall shape 14 p2221 A66-28056

Gas rate control of given Laval nozzle when asymptotic gas flow of unvariable type is maintained continuously near nozzle center 14 p2221 A66-28281

Expansion of supersonic flow of air with suspended solid particles during passage through Laval nozzle 14 p2279 A66-28325

Nonequilibrium ionization of suspension of solid particles expanding supersonically in nozzle, particularly lowering of ionization due to injection in flow of high work function 15 p2615 A66-28762

One-dimensional flow through nozzle and stability of weakly ionized plasma with induced Hall current 15 p2550 A66-28958

Unsteady flow during starting process in hypersonic nozzle, discussing initial pressure effect and behavior of secondary shock wave 15 p2425 A66-29684

Supersonic molecular beam apparatus, noting maximum intensity for variation of inlet stagnation pressure and nozzle-skimmer distance 16 p2746 A66-30385

Expression derived for vibrational relaxation in recombining expanding nozzle-exhaust gas, assessing effect of chemical reactions on this mechanism 16 p2687 A66-31164

Optimum profile of supersonic nozzle with nonequilibrium flow 16 p2687 A66-31287

Mixed sub-and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction 16 p2630 A66-31289

Particle velocity in gas particle two-phase nozzle expansion using gas laser and Fabry-Perot interferometer for rocket engine propulsion [AIAA PAPER 66-522] 16 p2708 A66-31500

Critical flow rate, critical pressure ratio and critical mass flow of dissipative adiabatic nozzle and pipeflow of ideal gas 16 p2690 A66-31635

Vortex structure of internal flow upstream of nozzles of various models of solid propellant rockets 17 p2838 A66-32330

Nozzle precombustion chamber base pressure for sudden pulsating sonic flow propagation 17 p2909 A66-32582

Hypersonic argon beam flow past cylindrical thermal nozzle 17 p2974 A66-33287

Short duration simulation of rocket exhaust products, flow duration through nozzle and effect on recirculation flow fields 17 p2904 A66-33475

Dissociational rate constants and vibrational relaxation times modifications, considering coupling of vibrational and dissociational nonequilibrium of expanding gas in nozzle [AIAA PAPER 66-520] 18 p3047 A66-33661

Numerical computation of quasi-equilibrium nozzle flows with finite rate chemical kinetics [AIAA PAPER 66-636] 18 p3048 A66-34220

One-dimensional theory of compound-compressible nozzle flow [AIAA PAPER 66-663] 18 p3049 A66-34440

Free-air thrust vector control using secondary injection of air into nozzle flow to reduce weight, cost and complexity applied to rocket engine 18 p3247 A66-34953

Scattering of ultrasonic waves from turbulence produced by flow through grid in 6 x 6-inch nozzle 18 p3136 A66-35024

Velocity and temperature fields in mixed flow of five turbulent jets injected by means of separate nozzles into chamber 18 p3103 A66-35051

Liquid high-velocity jets dispersion from variable-rugosity injector nozzles, considering effect of roughness of nozzle walls near orifice 19 p3340 A66-35579

Model study of aerodynamic oscillations in ramjet diffuser and combustion chamber prior to booster separation in ramjet missile indicates that venting may solve problem 19 p3468 A66-35630

Coolant passage wall temperature measurement in nuclear rocket nozzle during chemical stimulation testing by radiometry without affecting hot gas or coolant flow or disrupting heat flow 19 p3356 A66-35632

Performance calculations for propellants in terms of composition and enthalpy and principles of rocket engines 19 p3449 A66-36287

Laval points in ideal gas expansion with energy losses in nozzle or turbine-blade cascade 19 p3276 A66-36305

Simultaneous passage of two unmixed gas flows through joint two-circuit turbojet nozzle into ambient medium 20 p3627 A66-36917

Flow coefficient of nozzle calculated by thickness of quantity of motion of laminar boundary layer at nozzle exit 20 p3545 A66-37412

Plasma velocity measurements in and outside plasmatron nozzle and free stream from combustion chamber as function of flow rate of stabilizing gas and combustion chamber 20 p3609 A66-37567

Combustion efficiency measurement of jet-engine systems, noting role of static pressure in outflow 20 p3681 A66-38443

High-pressure supersonic fluid amplifier design and performance, noting effect of nozzle expansion ratio on design operating pressures [ASME PAPER 66-MD-29] 21 p3697 A66-38485

Transonic flow in axisymmetric nozzles with nearly sharp wall curvatures, extending Friedrich equations 21 p3693 A66-38685

Nozzle-like exact solutions for subsonic and supersonic compressible axisymmetric flow 21 p3723 A66-38701

Transverse velocity component effect on nonlinear behavior of short nozzle, with application to T burner 21 p3807 A66-38702

Supersonic flow of reacting gases in de Laval nozzle for Mach number near unity 21 p3724 A66-38721

Operating characteristics of pneumatic bistable element using Coanda effect, examining correlation between outlet flow and pressure and feed

pressure 21 p3697 A66-38802

Nonisentropic nonequilibrium lithium plasma flow through nozzle with allowance for friction and heat 21 p3694 A66-39088

Supersonic nozzle flow of dissociated oxygen, nitrogen and carbon dioxide 21 p3694 A66-39089

Recombination rate of diatomic gases determined from Mach number of supersonic nozzle outlet 21 p3694 A66-39090

Equivalent problem method of heat conduction theory applied to mixed flow produced by convergence of two jets ejected from two plane-parallel nozzles with parallel axes 21 p3728 A66-39256

Integration of near equilibrium flows in propulsive nozzles, estimating length of transition region from equilibrium condition to kinetic solution [AICE PREPRINT 28C] 22 p3971 A66-39884

Strouhal number effect on sound-excited laminar-turbulent transition in separated boundary layers formed by round or plane nozzle 22 p3899 A66-40382

Longitudinal viscosity effect in equation for plane transonic flow for initial stages of shock formation downstream in nozzle 22 p3844 A66-40387

Wind tunnel test program for simulation of gas-particle rocket exhaust plume, separated flow around nozzle and base recirculation [AIAA PAPER 66-767] 22 p3895 A66-40648

Optimization of supersonic portion of three-dimensional flow geometry in rocket motor nozzle for maximum thrust [AIAA PAPER 65-568] 23 p4007 A66-41108

Transonic flow in throat of convergent-divergent nozzle for continuous fluid acceleration from subsonic to supersonic velocities 23 p4013 A66-42015

Laminar turbulent transition in freestream boundary layer behind axisymmetric and plane nozzle 23 p4061 A66-42036

Contraction coefficient of Newtonian fluid ejected from capillary nozzle under high tangential stress 24 p4195 A66-42719

Analytical method for studying pattern of flow from nozzle into vacuum used to calculate plume shape for rocket exhausting into hypersonic stream 24 p4158 A66-42790

Thermal emission in subsonic and supersonic nozzles based on energy equation solution and laws of heat transfer 24 p4295 A66-42878

NOZZLE GEOMETRY

Effect of nozzle geometry and jet interference on noise generation and mechanism of noise reduction of noise suppressors 02 p0177 A66-11588

Flow coefficient through nozzle with circular cross section and elliptical cylindrical profile supplied from container with static pressure equal to stagnation pressure 03 p0314 A66-12695

Throat area variation in expansion-deflection nozzle to obtain thrust modulation, noting increased coefficient of thrust 04 p0574 A66-14390

Axisymmetric integral nozzle design with subsonic /contraction/ and supersonic /effuser/ parts for compressible flow 06 p0801 A66-16003

Design considerations, materials and problems of De Laval nozzle as applied to liquid and solid propellant rocket engines 07 p1040 A66-18306

Performance correlation of conical and contoured nozzles for gas-particle flows, defining differences between particle effects for such nozzles 08 p1165 A66-19157

Construction of shockless nozzle with weak discontinuities 09 p1367 A66-20457

Optimum rocket nozzles with maximum thrust for given nozzle length treated by one-dimensional procedure 11 p1630 A66-22508

Optimum maximum-thrust rocket nozzles subjected to isoperimetric constraints 11 p1630 A66-22509

Performance of simple diffusers of fixed geometry in flow regimes with viscous and compressibility influence involving free-jet test sections, conical and contoured nozzles and gas flows at high Mach numbers 11 p1686 A66-22844

Limited nozzle throat area variation for

combustion termination in rocket motor [AIAA PAPER 65-194] 12 p1937 A66-24701

Rotationally-symmetric intake nozzles manufactured by low cost technique for wind tunnels from glass fibers and plastics, using wooden pattern 13 p2085 A66-25080

Nonrotating MHD liquid-metal power system, noting nozzle and separator configuration 13 p1998 A66-25527

Vortex tube with double row nozzle discussing energy separation efficiency, velocity profile, temperature characteristics, etc 16 p2685 A66-30801

Gas-film-cooled nozzle extension application to large rocket engines, discussing operational parameters, advantages, etc [SAE PAPER 660455] 17 p2991 A66-33163

Liquid film cooling of small diameter throat tubes 18 p3263 A66-34385

Optimization analysis for axisymmetric rocket motor nozzle design based on assumptions for gas particle flow [AIAA PAPER 66-538] 19 p3277 A66-36598

Optimum thrust nozzle contours for chemically reacting gas flows, obtaining set of partial differential equations for gas dynamic properties [AIAA PAPER 66-638] 19 p3277 A66-36599

Engineering method to determine combined effects of entry and combustion heating on total char regression of ablative nozzle as function of distance from exit plane [ASME PAPER 66-MD-72] 21 p3806 A66-38500

Two-phase cold-flow modeling analysis for rocket nozzle, noting deviations from one-dimensional flow for static pressures on nozzle shape [AICE PREPRINT 44F] 22 p3971 A66-39881

Arc heated impulse wind tunnel facility, including Mach 16 contoured nozzle [AIAA PAPER 66-759] 22 p3894 A66-40642

Annular nozzle shapes established via method of straight line characteristics, noting flow patterns at various regions 23 p4009 A66-41731

NOZZLE INSERT

Fabrication of ablative liners for solid propellant rocket motor nozzles [AIAA PAPER 65-167] 14 p2375 A66-27872

Porosity zoning and matrix material effect on performance of self-cooled nozzle throat inserts 19 p3450 A66-35629

Evolution of tungsten forging processes, discussing warm-forming, ring-rolling and combination forging methods 19 p3366 A66-36108

Fabrication process parameters for producing solid-rocket nozzles by shear and conventional spinning of tungsten plate 0.250-inch thick and thicker 19 p3369 A66-36130

Thermally induced circumferential-longitudinal cracking of refractory metal inserts in solid propellant rocket engine nozzles 19 p3885 A66-36153

NOZZLE THRUST COEFFICIENT

Boundary layer effect on thrust of small rocket engines with high expansion ratio nozzles 01 p0130 A66-10791

Throat area variation in expansion-deflection nozzle to obtain thrust modulation, noting increased coefficient of thrust 04 p0574 A66-14390

Suppression of random transverse thrust components in combustion phase of rockets by varying nozzle profile in region of throat 14 p2220 A66-27488

Pressure distribution on nozzle block of oblique-exit-plane nozzle with supersonic turbulent flow and calculation of thrust, thrust vector and torques 24 p4157 A66-42774

NOZZLE WALL

Base heating scaling criteria for four-engine rocket cluster operating at high altitude [AIAA PAPER 65-826] 05 p0771 A66-15851

Secondary injection control of single rocket nozzle roll 17 p3017 A66-33078

Liquid high-velocity jets dispersion from variable-rugosity injector nozzles, considering effect of roughness of nozzle walls near orifice 19 p3340 A66-35579

Throat erosion rates of carbon chokes in rocket motor nozzle predicted, using mathematical approach combined with experimental result

AIAA PAPER 65-351] 24 p4261 A66-42772
X-A REACTOR
 NUCLEAR ENGINE FOR ROCKET
 VEHICLE /NERVA/
CLEAR AIRCRAFT
 Current status of technology of using
 liquid hydrogen in manned aircraft systems
 AIAA PAPER 66-671] 18 p3162 A66-34443
CLEAR AUXILIARY POWER
 SNAP PROGRAM
CLEAR CHEMISTRY
 Nuclear engineering - AICE Conference,
 Chicago, December 1962 07 p1079 A66-17298
 Nucleosynthesis of D, Li, Be and B by
 high-energy solar particles during early
 history of solar system in nuclear spallation
 model 08 p1291 A66-19092
CLEAR DEFORMATION
 Effective mass in nuclear deformational
 Hamiltonian calculated by asymptotic
 approximation method which is two orders
 of magnitude better than liquid drop
 model 22 p3951 A66-40422
CLEAR-ELECTRIC POWER SUPPLY
 Radioisotope-fueled thermoelectric
 generator for long life and
 reliability 07 p0994 A66-18319
 Gamma-electric cell, solid state device for
 direct conversion of gamma-ray energy into
 electrical energy 07 p1079 A66-18323
 Electric propulsion in 1965, discussing
 electron bombardment and contact ionization
 thrusters, nuclear and solar-electric power
 systems, etc 09 p1434 A66-20246
 Electric propulsion systems development,
 discussing ion beam neutralization, nuclear
 power sources, contact ionization engine,
 etc 09 p1434 A66-20248
 Nuclear-electric power supply for manned
 space stations using radioactive isotopes
 AIAA PAPER 64-711] 13 p2004 A66-26605
 Nuclear power supply adapted as electrical
 power source for manned space stations
 AIAA PAPER 64-713] 13 p2068 A66-26607
 SNAP 2, 8 and 10A nuclear-electric space
 power plant reactor
 programs 13 p2126 A66-26619
 Recuperative Brayton cycle for nuclear-
 electric spacecraft power supplies
 AIAA PAPER 64-757] 13 p2005 A66-26620
 SNAP-50/SPUR nuclear-electric space
 power plant program and potential
 application 13 p2126 A66-26624
 Iterative process used in parametric
 studies and preliminary designs of advanced
 nuclear thermionic space power plants
 AIAA PAPER 64-766] 13 p2005 A66-26629
 Nuclear reactor-thermoelectric power
 converter for unmanned satellite
 application 23 p4020 A66-41749
NUCLEAR-ELECTRIC PROPULSION
 Electrostatic ion propulsion and
 electromagnetic engine experiments in
 Germany for application to space travel,
 noting nuclear energy power
 source 08 p1281 A66-18614
 Payloads and characteristic velocities for
 unmanned planetary and solar missions
 using nuclear electric propulsion spacecraft
 AIAA PAPER 64-714] 13 p2193 A66-26608
 Weight criteria for integration of nuclear-
 electric power supply with electric thruster
 system as primary spacecraft propulsion
 AIAA PAPER 64-765] 13 p2173 A66-26611
 Nuclear electric propulsion applied to
 manned Mars missions, presenting analytical
 tool to simultaneously optimize
 interplanetary vehicle design and trajectory
 AIAA PAPER 65-414] 23 p4120 A66-41110
NUCLEAR EMULSION
 Flux of alpha component of primary
 cosmic radiation determined at top of
 atmosphere, using nuclear emulsion stack
 exposed near geomagnetic
 equator 05 p0756 A66-15529
 Beta-electron in nuclear photoemulsion
 study of primary cosmic ray
 properties 06 p0880 A66-16600
 Nuclear emulsions exposed for several days
 in recoverable satellite scanned for ending
 tracks of cosmic ray particles, obtaining
 energy spectra for various
 nuclei 07 p1111 A66-17464
 Angular distribution of secondary particles
 from interactions in nuclear emulsions,
 determining energy release ratio in electron
 photon cascade 07 p1113 A66-17541
 Identification of charged fast particles in

nuclear emulsions, measuring multiple
 scattering of protons and mesons along
 track with various kinetic
 energies 07 p1114 A66-17543
 Inelastic photonuclear process in forming
 high energy meson jets recorded by nuclear
 emulsion in stratosphere 07 p1116 A66-17557
 Cosmic radiation particle detection by
 nuclear emulsion aboard Sputnik V and
 classification according to ionizing
 power 09 p1440 A66-20228
 Intensities and ratios of intensities of Be,
 B and S nuclei determined near geomagnetic
 equator in India, using nuclear emulsion
 stack 10 p1600 A66-21844
 Photometric measurements of tracks of
 heavy primary particles found in emulsion
 stack near geomagnetic equator, noting ratio
 of C and N nuclei to O
 nuclei 11 p1762 A66-22654
 Energy distribution of secondary particles
 emitted in proton stars for tev energy range
 proton interactions 15 p2583 A66-29542
 Meson emission asymmetry, inelastic
 particle collisions and multiplicity in
 ultrahigh energy interactions in nuclear
 emulsion 15 p2545 A66-29543
 Electromagnetic cascades in Sydney 20-liter
 stack of nuclear emulsion 15 p2583 A66-29544
 Nuclear radii for electromagnetic
 interactions of primary cosmic ray particles
 in nuclear emulsions 15 p2545 A66-29546
 High energy primary cosmic radiation
 research at Bristol, England, including
 energy spectra for nuclear interactions,
 nuclear emulsion stack measurements, alpha
 production, etc 15 p2583 A66-29550
 Energy spectra of atmospheric alpha rays
 at balloon altitude and of alpha rays from
 graphite nuclear
 interactions 15 p2583 A66-29551
 Particle energy measurements in high
 energy jets with large stacks of nuclear
 emulsion 15 p2584 A66-29557
 Grain density, scattering and range
 measurements on 22 proton, neutron and
 alpha jets in 22-liter emulsion stack analyzed
 to identify nature of particles emitted in
 extreme backward center of mass angle
 cone 15 p2585 A66-29561
 Low energy cosmic neutrino detection with
 radiochemical methods, noting mass
 spectrometric and nuclear emulsion methods
 based on Pontecorvo-Davis
 reaction 15 p2590 A66-29592
 Flux of low energy heavy primary nuclei
 obtained by slicing emulsion method, using
 recoverable satellite during minimum solar
 activity period 15 p2592 A66-30077
 Fragmentation probabilities, charge
 spectrum and interaction mean free paths of
 relativistic heavy nuclei in primary cosmic
 radiation investigated in stack of nuclear
 emulsions 16 p2795 A66-31010
 Center-to-center collisions of cosmic
 radiation nuclei with heavy nuclei of Ag, Br
 plasma emulsions 18 p3170 A66-34578
 Electron component of primary cosmic
 radiation at energies greater than or equal
 to 15 gev studied, using nuclear emulsion
 stack 18 p3187 A66-34818
 Abundance of isotopic helium 3 nuclei in
 primary cosmic radiation, using nuclear
 emulsion stack 18 p3189 A66-34828
 Low energy galactic cosmic radiation
 studies by high altitude balloon flights
 carrying nuclear emulsions, including solar
 activity, energy and intensity spectra,
 etc 18 p3189 A66-34829
 Detection of low energy multiply charged
 primary cosmic ray nuclei in nuclear
 emulsions and relation of nuclei to solar
 cycle 18 p3190 A66-34834
 Activated emulsion camera detection of
 low energy very-heavy multiply-charged
 scarce cosmic ray nuclei 18 p3190 A66-34835
 Balloon-borne nuclear emulsion detection
 of solar cosmic ray heavy nuclei during
 solar burst 18 p3190 A66-34836
 Nuclear emulsion stack investigation of
 composition and differential energy spectra
 of primary cosmic ray heavy nuclei
 fluxes 18 p3191 A66-34837
 Balloon-borne nuclear emulsion detection
 of finite fluxes of low energy cosmic ray
 heavy nuclei and interstellar cosmic
 radiation propagation 18 p3191 A66-34838
 Tracks of nuclei of primary cosmic rays

that ended within nuclear emulsions and
 possibility of separating
 isotopes 18 p3192 A66-34842
 Relative abundance of carbon isotopes in
 primary cosmic radiation estimated by
 separation of isotopes method in nuclear
 emulsion 18 p3192 A66-34843
 COSPAR research on heavy primary cosmic
 ions in nuclear emulsions exposed in polar
 satellite 18 p3192 A66-34846
 Neon hodoscope study of energy and
 production heights of high energy EAS
 electron-photon cascades, comparing results
 to nuclear emulsion study
 findings 18 p3207 A66-35109
 Extremely high energy nuclear interactions
 observed by emulsion chamber, deriving
 inelasticity of nucleons and mesons and
 transverse momentum of
 fireball 18 p3215 A66-35158
 High energy nuclear
 interactions in
 graphite 18 p3140 A66-35159
 High energy cosmic ray jets studied in
 large nuclear emulsion stacks at
 Krakow 18 p3215 A66-35161
 High energy interaction studied on
 Norikura Mountain and Mount Chacaltaya,
 using large area emulsion
 chamber 18 p3216 A66-35170
 Stack of nuclear emulsion exposed
 underground to analyze fast neutrons,
 obtaining energy spectrum of neutrons from
 measurements on hydrogen
 recoils 18 p3222 A66-35211
 Radiation doses measured by onboard
 dosimeters and those fastened to space suits
 of crews of Voskhod I and Voskhod II
 compared, noting radiation composition
 analysis by means of nuclear
 emulsions 22 p3855 A66-40473
 Flux and energy spectrum of low energy
 heavy nuclei of primary cosmic radiation
 measured by balloon-mounted nuclear
 emulsion stacks 24 p4264 A66-42608
NUCLEAR ENERGY
 Guillemin-Zener energy of ionized
 hydrogen molecule 04 p0546 A66-13455
 Electron and ion emission of material in
 presence of cesium vapor, noting use as
 emitters 05 p0622 A66-15579
 Three Sun-mass star evolution from main
 sequence to helium exhaustion in core,
 noting chronology of
 process 08 p1288 A66-18778
 Computation of nuclear energy generation
 rate during stellar evolution depends on
 cross sections of causative nuclear
 events 09 p1448 A66-20092
 Simplified method of evaluating thermal
 and ionizing energies from fission of
 uranium atoms 16 p2744 A66-30436
NUCLEAR ENGINE FOR ROCKET VEHICLE
 /NERVA/
 Nerva nuclear core rocket engine using
 graphite reactor operating at 1000 mw and
 providing 50,000 lb of thrust at greater than
 700 sec specific impulse 08 p1254 A66-18574
 Neutron and gamma radiation
 measurements during low and high power
 NERVA reactor tests, determining leakage
 and radiation
 environment 12 p1911 A66-23700
 NERVA reactor control systems, using
 limiter circuits to protect nuclear subsystem
 from controller malfunctions and for
 pressure control 12 p1912 A66-23701
 Clustering of multiple identical solid-core
 nuclear engines in polygon arrangement for
 space propulsion, evaluating reactivity
 coupling effect 12 p1912 A66-23702
 NERVA reactor instrumentation noting
 core temperature thermocouples, neutron
 detectors, vibration and pressure
 transducers, strain gauges,
 etc 12 p1912 A66-23703
 Titanium pressure vessel for NERVA
 engine
 [AIAA PAPER 65-590] 12 p1970 A66-24714
 NERVA electric manned Mars vehicle
 design, performance and operation for
 interplanetary missions 13 p2190 A66-25263
NUCLEAR EXPLOSION
 SA HIGH ALTITUDE NUCLEAR
 DETECTION STUDIES /HANDS/
 SA SEDAN PROJECT
 SA STAR FISH PROJECT
 SA UNDERGROUND NUCLEAR
 EXPLOSION

SA VELA PROJECT

- Artificial aurora, describing time delays between intensity variations of high altitude nuclear explosion generated spectral lines 05 p0667 A66-14789
- Analysis of data obtained from satellites concerning artificial radiation belt formed by July 9, 1962 high-altitude nuclear explosion 07 p1131 A66-18083
- Digital simulation of Vela satellite system for detection of nuclear detonations in space 09 p1349 A66-19971
- VLF phase perturbations produced by Soviet high altitude nuclear explosion of November 1, 1962 10 p1496 A66-21153
- Effect of Soviet atmospheric nuclear explosions on D and F-2 ionospheric layers, particularly observing enhancement of atmospheric noise 10 p1600 A66-22058
- Monopole antenna signal produced via bombardment by flux of gamma rays from nuclear explosion 11 p1663 A66-22546
- Physical pattern of high altitude fission cloud and motion of gamma and beta fission fragments captured by geomagnetic field and observed by Cosmos satellite 11 p1764 A66-23043
- High-altitude nuclear explosion-induced geomagnetic micropulsations in analysis of sudden commencement data and Alfvén velocity-altitude profile 11 p1700 A66-23143
- Plasma due to high-altitude nuclear explosion and effect on radar 14 p2237 A66-27510
- Solar simulation testing of thermal control systems for nuclear test detection spacecraft [AIAA PAPER 64-209] 16 p2682 A66-30890
- Worldwide geomagnetic disturbances generated by Starfish high altitude nuclear detonation, July 9, 1962 17 p2918 A66-32527
- Ionospheric effects over Delhi of Russian high altitude nuclear explosions in Central Asia and of U.S.A. explosions at Johnston Island, autumn 1962 17 p2918 A66-32695
- Star Fish radiation belt discrepancy between theoretical and experimental values may be due to explosion in belt of naturally trapped protons 18 p3170 A66-34530
- Artificial radiation belt sources, noting positrons and alpha particles, nuclear explosion, etc 20 p3643 A66-38338
- Spatial distribution and time decay of intensities of geomagnetically trapped electrons from high altitude nuclear burst 20 p3643 A66-38339
- High altitude nuclear detonations, discussing data on trapped radiation, values of empirical and theoretical spectra and artificial radiation belts 20 p3643 A66-38344
- Traveling disturbance in ionosphere due to nuclear detonation detected as acoustic-gravity wave modes, noting range-time diagrams 24 p4200 A66-42594

NUCLEAR FUEL

SA FUEL ELEMENT

SA REACTOR FUEL

- Fission heated generator using cesium ion space charge neutralization for operation in-plate 05 p0620 A66-15568
- Uranium dioxide fueled molybdenum emitter of nuclear heater thermionic converter for use in construction of cylindrical thermionic diode 05 p0620 A66-15569
- Uranium oxide as nuclear fuel when in contact with tungsten, molybdenum and tungsten-25 percent rhenium thermionic emitter 05 p0713 A66-15586
- Fabrication methods for production of uranium-zirconium monocarbide spherical particles for thermionic emitters 05 p0714 A66-15587
- Isotope power systems for lunar roving vehicles noting fuel, radiation shielding, performance, weight, etc 23 p4024 A66-41770

NUCLEAR FUSION

- Nuclear processes of stellar evolution resulting in neutrino emissions 19 p3453 A66-36085
- Electrical breakdown in beams of hydrogen and nitrogen produced by expanding H or N gas out of Laval nozzle cooled by liquid hydrogen or nitrogen in high vacuum 20 p3605 A66-38055
- Increasing plasma density in Ogra 1 20 p3610 A66-38056
- Plasma physics and problems of controlled

thermonuclear fusion - Conference, Kharkov, Ukrainian SSR, May 1963 21 p3777 A66-39002

NUCLEAR HEAT

- Atomic heat of titanium, vanadium and chromium in high temperature range, discussing parameters and experimental techniques 05 p0698 A66-14511
- First stage of program for implementation of converters heated by nuclear reactor, consisting of cylindrical converters for endurance tests without reactor 05 p0617 A66-15548

NUCLEAR INTERACTION

- Energy spectrum of cosmic ray muons measured for data on nuclear interactions and characteristics of primary cosmic radiation 03 p0417 A66-12319
- Effect of fluctuations on systematic error in determination of energy characteristics of nuclear interactions in photoemulsion in presence of energy threshold 05 p0755 A66-15407
- Coupling coefficients in high energy region of Earth atmosphere, considering interactions between primary nucleons and nuclei of air atoms 06 p0950 A66-16594
- Jet characteristics considered from viewpoint of formation of shower particles resulting from intermediate p-l-p interaction 07 p1113 A66-17542
- Coefficients of inelasticity of interactions between cosmic ray particles with iron and carbon nuclei 07 p1114 A66-17544
- Fraction of energy transferred to photon-electron component during interactions of particles with graphite nuclei at energies exceeding 100 bev 07 p1114 A66-17545
- Ratio of energy of electron-photon component and energy of charged mesons in interaction between nucleons and iron nuclei 07 p1114 A66-17548
- Interaction characteristics of nuclear-active cosmic ray particles with carbon nuclei at mountain altitudes 07 p1114 A66-17549
- Energy distribution of particles produced in elementary interaction expressed in terms of shower characteristics derived from cascade theory 07 p1116 A66-17562
- Mean free path for nucleon-light atom interaction changed from 75 to 90 g/sq cm affecting air shower characteristics 07 p1118 A66-17575
- Formula for energy deposition from charged particle beams used in techniques for shielding nuclear particles from space 08 p1259 A66-19124
- Coupling coefficient for different components of cosmic rays based on interaction of primary nucleon with air nuclei 09 p1440 A66-20224
- New force theorem for determining molecular energy derivatives with respect to internuclear distance derived from Hellmann-Feynman expression 11 p1741 A66-23217
- Ionization calorimeter for measuring primary cosmic ray components, discussing nuclear interactions, energy spectra, EM cascades, etc 13 p2175 A66-26011
- Nucleon-initiated air shower fluctuations and random variations in FA approximation theory 15 p2581 A66-29539
- U.S.S.R. accelerator experiments in high energy nuclear interaction cross section and inelasticity, primary and secondary cosmic ray particle energies, charged nuclear-active particle energy spectra, momenta measurements, etc 15 p2545 A66-29549
- Energy spectra of atmospheric alpha rays at balloon altitude and of alpha rays from graphite nuclear interactions 15 p2583 A66-29551
- High energy mountain-altitude nuclear interactions produced by pions and nucleons, pion/proton and neutral/charged interacting particle ratios studied, using multiplate cloud chamber with air Cerenkov counter and absorption spectrometer 15 p2584 A66-29554
- Electron-photon cascades caused by nuclear active component in atmosphere and on gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556
- Extremely collimated nuclear interactions in carbon induced by collisions of charged cosmic ray particles in energy region 20-100 gev 15 p2585 A66-29559

- Nuclear interaction characteristics in brass and carbon, noting production by neutral and charged cosmic ray particles, observation methods, energy spectrum, etc 15 p2585 A66-29560
- Energy and angular distribution of meson created by 22 gev protons in lithium hydride with respect to secondary cosmic radiation 15 p2585 A66-29563
- Sea-level spectra of nuclear interactions of muons over 1000 gev compared with observed underground range spectra 15 p2590 A66-29596
- Center-to-center collisions of cosmic radiation nuclei with heavy nuclei of Ag, Br plasma emulsions 18 p3170 A66-34578
- High energy particle interaction research, noting that within eight years accelerators will be capable of beams of 28 plus 28 bev protons 18 p3204 A66-35091
- Stationary aspects of cosmic ray propagation through atmosphere explained by model calculating high energy nuclear active and muonic components of extensive air showers, presenting energy spectra 18 p3206 A66-35103
- Component composition and photonuclear interactions of photon-initiated EAS 18 p3209 A66-35121
- High primary energy EAS composition, energy spectrum of nuclear active particles and high energy collisions 18 p3210 A66-35128
- Numerical calculations of lateral distribution, energy spectrum and heights of origin of muons in extensive air showers 18 p3211 A66-35135
- Direct measurement of attenuation length of extensive air showers through water 18 p3212 A66-35136
- Comparison of various models of EAS development with experimental data and prospects of cosmological and nuclear aspects of EAS investigation 18 p3212 A66-35140
- Monte Carlo calculations on extensive air shower development, discussing nuclear active and electromagnetic multicore frequencies in terms of particle atomic number and primary baryon 18 p3212 A66-35141
- Inverse problem in cascade theory of showers to derive information about nuclear interaction 18 p3213 A66-35144
- Time lags of nuclear interacting particles in extensive air showers 18 p3214 A66-35148
- Experimental search for heavy mass particles in air showers with total absorption spectrometer 18 p3214 A66-35149
- Tien-Shan high altitude installation for studying strong interactions at 100-1000 gev of cosmic ray nucleons and pions 18 p3214 A66-35152
- Balloon experiment using spark chambers and ionization spectrometer to measure flux, composition, time variation and properties of individual interactions of cosmic rays above 100 gev 18 p3215 A66-35153
- Airborne equipment for study of nucleon interactions at energies in excess of 10 trillion ev 18 p3214 A66-35155
- Nuclear active component of cosmic rays studied with arrangement consisting of ionization calorimeter, Geiger counter hodoscope and two large spark chambers 18 p3215 A66-35156
- Multiplicity distribution of secondary particles in photonuclear interactions of mesons, analyzing effect of intranuclear cascade 18 p3221 A66-35203
- Almost horizontal air shower observed from cloud chamber photography suggests nuclear interaction of muon 18 p3224 A66-35223
- Interaction of high energy cosmic ray neutrinos produced in atmosphere measured with detector array operated underground 18 p3224 A66-35225
- Nuclear polarization by hot carrier flow in homogeneous semiconductor, taking into account effect of strong electric field on spin lattice relaxation time 19 p3437 A66-35474
- Cosmic ray nucleon interaction with high energies, estimating transition probability and interaction cross section of baryon in passive state 24 p4263 A66-42519
- Elementary particles interaction with

- atomic nuclei with energies from tens to thousands of bev 24 p4267 A66-42903
- Errors effect in determining primary energy on measurement of characteristics of nuclear interactions in cosmic radiation, considering energy spectrum 24 p4267 A66-42906
- Interaction of 1000 bev particles by ionization calorimeter technique suggests free path of nuclear active particles in atmosphere decreases as particle energy increases 24 p4267 A66-42908
- Inelasticity in carbon particle nuclei interactions evaluated by variation with depth of energy of electron photon shower in thick absorber 24 p4268 A66-42910
- Cross section for lambda, kappa and sigma particle production in cosmic ray interaction with C, Cu and Pb nuclei dependent on atomic weight of target material 24 p4268 A66-42911
- Density fluctuations of penetrating particles in extensive air showers at various distances from shower axis 24 p4268 A66-42916
- Ratio of energy flux in nuclear active component to energy flux in electron photon component in extensive air showers with given numbers of particles 24 p4269 A66-42918
- Computer calculation of dependence of average characteristics of extensive air showers on adopted nucleon nuclear-interaction model 24 p4270 A66-42926
- NUCLEAR ISOTOPE MONOPELLANT**
- Design concepts, operating constraints and performance of radioisotope propulsion systems for space probes 14 p2330 A66-27885
- NUCLEAR MAGNETIC RESONANCE**

Advances in nuclear science and technology, Volume 3 23 p4111 A66-41210
Processes for producing electromagnetic radiation including applications of spectroscopic methods, noting relation to plasma physics 24 p4238 A66-43117

NUCLEAR POWER

Correlating mean-to-surface flux ratio for highly enriched fuel rods of in-pile diodes of similar composition and geometry 05 p0620 A66-15567
Insulators from high purity oxides used in nuclear thermionic power converters, tabulating refractory materials compatibility and noting thermal expansion, electrical conductivity, etc 05 p0714 A66-15592
SNAP-10A ground test and flight system reactors [ASME PAPER 65-WA/NE-6] 05 p0714 A66-15681

Auxiliary power devices using solar, chemical and nuclear sources 07 p0992 A66-18305
Nuclear power systems for future communications satellites, noting reactor, radioisotope, power system and thermoelectric power conversion equipment [AIAA PAPER 66-305] 12 p1804 A66-24772
MHD nuclear electric space power systems using noble gases seeded with alkali metal vapors as working fluid 13 p1998 A66-25526
Nuclear power systems using radioisotope and reactor power sources 22 p3946 A66-40127

Nuclear reactor as power source in remote location 23 p4089 A66-41608
Gas dynamic calculations of power generator with closed circulation of fissionable gas supported by nuclear reaction behind supersonic diffuser 23 p4022 A66-41763

NUCLEAR POWER CONVERSION

Thermionic electrical power generation - European Nuclear Energy Agency and IEE International Conference, London, September 1965 05 p0613 A66-15532
Plasma diode analog, determining behavior of unsteady state series-parallel systems for thermionic reactor control 05 p0615 A66-15537
Emitter materials for nuclear thermionic converters, discussing /Uzr/C, fuel life and performance parameters, material compatibility, etc 05 p0713 A66-15584
Thermodynamic conversion of reactor thermal energy into mechanical, using Carnot and Stirling cycles applicable for space 22 p3853 A66-40795
Prebreakdown currents, conditioning rates and ultimate voltage capability of vacuum gaps and solid insulation, analyzing data on large-gap concentric cylinder configuration 23 p4042 A66-41041

SNAP Mercury Rankine space power conversion program and testing of Combined Rotating Unit-V /CRU-V/ 23 p4020 A66-41751

NUCLEAR POWER PLANT

Brayton cycle nuclear space power systems and heat transfer components 01 p0016 A66-10913
Simulated nuclear power plant gamma radiation effects on magnetic film-insulated magnetic wire 02 p0248 A66-11293
Thermionic converters used in combination with core reactor for auxiliary propulsion of spacecraft 04 p0573 A66-13548
Refractory material cermet fabrication, discussing techniques of preparation, fuel-metal compatibility and fuel canning 05 p0713 A66-15585
Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 05 p0689 A66-15611

Liquid-metal heat transport fluid circulation, discussing molten lithium pump development and testing for high performance mobile nuclear plants [ASME PAPER 65-WA/FE-18] 10 p1539 A66-21502

SNAP 10a/Agenda Space System, noting interrelationship of several subsystems and integration with nuclear power unit 12 p1857 A66-23677

Nuclear lunar base power plant based on SNAP-8 components

[AIAA PAPER 64-712] 13 p2004 A66-26606
Medium power reactor experiment /MPRE/ feasibility study to obtain mechanically simple high performance power plant [AIAA PAPER 64-763] 13 p2126 A66-26623
Compact Ackeret-Keller closed cycle thermodynamic nuclear turbine power plant [ASME PAPER 66-GT/CLC-6] 14 p2329 A66-26980

Lunar base nuclear power plant and communications and command requirements, noting alternative power source 16 p2649 A66-30537
Feasibility analysis of very high temperature uranium-bearing liquid alloy heat exchanger for hydrogen gas, considering several ternary component liquid alloy systems [AIAA PAPER 66-622] 19 p3476 A66-35358
Plutonium-238 radioisotope Brayton cycle power system design and vehicle integration 23 p4021 A66-41754

NUCLEAR PROPULSION

Liquid hydrogen flow system startup of full scale simulated nuclear rocket engine 03 p0391 A66-12350
Nuclear power systems for spaceflight considering isotope batteries, energy source reactors and nuclear drives 04 p0544 A66-13547

Requirements and performance expectations of chemical and nuclear propulsion systems for manned Mars and Venus missions 06 p0942 A66-16499
Advanced high-thrust nuclear propulsion development, noting Nerva and Phoebus 07 p1079 A66-17616
Nuclear reactors for space and near-Earth propulsion 07 p1111 A66-18304

Microthruster power conditioning and control system design and ion propulsion [AIAA PAPER 66-215] 10 p1485 A66-21449
U.S. nuclear rocket propulsion program costs, technology and application, noting empirical law of space nuclear program economics 11 p1734 A66-23078
Space power systems engineering - Conference Philadelphia, September 1964 13 p2002 A66-26604

Design characteristics and status of SNAP Mercury Rankine nuclear power plant system 13 p2005 A66-26625
SNAP-9A, significant development factors and launch approval 13 p2126 A66-26626
Impact of propellant heating on nuclear spacecraft insulation and pressurization systems design 18 p3240 A66-33816
Absorption of thermal radiation from gaseous fuel by transparent wall of nuclear light bulb rocket engine [AIAA PAPER 66-619] 18 p3134 A66-34434

NUCLEAR RADIATION

SA GAMMA RADIATION
High dosage nuclear radiation tests of hydraulic systems and components for space vehicle use 01 p0014 A66-10113
Gamma ray and neutron irradiation and temperature effects on wear-life of solid lubricants for aerospace application [ASLE PREPRINT 65AM 5C4] 04 p0524 A66-13398

Nuclear and space radiation effects - IEEE Conference, University of Michigan, Ann Arbor, July 1965 05 p0733 A66-14844

Nuclear reactor radiation effect on microstructure, size of elementary cells, hardness and electrical conductivity of high-melting compounds 06 p0897 A66-16693

Thermonuclear reaction rates in medium and heavy nuclei determined from statistical properties 09 p1404 A66-20368

Atomic origins of transient nuclear radiation effects in electronics such as neutron and gamma radiation 12 p1918 A66-24680

Shock and blast, thermal radiation and nuclear radiation as basic elements of nuclear weapon environment, analyzing effect on personnel and materiel 16 p2745 A66-30440

Nuclear radiation hardened telemetry transmitter in L-band, noting tests and radiation effect problems 16 p2650 A66-30554

Graphite lubricant physical and chemical combinations with other materials for improved high temperature friction and wear, discussing nuclear irradiation for graphite lattice

modification 17 p2929 A66-31933
Nuclear radiation anticollision instrumentation for guidance systems of helicopters and other vehicles, both air and surface 17 p2926 A66-33097
Electrons, hydrogen and helium nuclei of cosmic radiation as observed in 1964 at average residual pressure of 2.4 mb compared with 1.8 mb obtained in 1963 18 p3187 A66-34819

Combined nuclear radiation damage and cryogenic temperature effects on tensile and shear properties of materials in outer space 20 p3583 A66-37096

Nuclear radiation and liquid hydrogen effect on environmental mechanical properties of phenolic asbestos, glass and linen resins 20 p3587 A66-37097

Cryogenic, flame and nuclear radiation temperature effects on pressure transducers, noting zero and sensitivity shifts and thermal gradients 21 p3740 A66-39427

NUCLEAR REACTION

SA FISSION
SA FUSION
SA INELASTIC SCATTERING
SA RESONANCE SCATTERING
SA SPALLING

Properties of dense matter in nuclear statistical equilibrium analyzed at high densities and temperatures in connection with stellar evolution 04 p0549 A66-14372

Nucleosynthesis in stars including light element reactions, helium and carbon burning, neutrino processes, etc 05 p0719 A66-15764

Nonresonant nuclear reaction calculation method for stellar temperature 09 p1456 A66-20413

Properties of production and decay of neodymium 141, examining nuclear reaction /n, 2n/ 10 p1558 A66-21962

Linear and nonlinear oscillators randomly perturbed, using Fokker-Planck equation, with application to nuclear reactors 11 p1721 A66-22628

Distorted wave one-meson-exchange /DWOME/ for high-energy elementary particle reaction analysis, leading to different expression for transition amplitude 13 p2131 A66-25482

Angular distribution of outgoing gamma radiation associated with giant dipole resonance in Si super 28 nucleus 16 p2750 A66-30147

Element creating processes in interior of stars discussing combustion of carbon hydrogen, neon, neutron absorption, etc 16 p2796 A66-30271

Nuclear cascade particles ionization at various depths in iron compared with experimental data in ionization calorimeter 18 p3214 A66-35154

Various processes leading to nuclear reactions induced by muons, finding main yield given by photonuclear interactions, with nuclear cascades playing significant role 18 p3221 A66-35204

Nuclear reactions in stellar interiors, calculating probabilities of various proton-proton reactions and obtaining solar neutrino fluxes at Earth for point source solar model 18 p3223 A66-35213

Range of atoms recoiling from photonuclear reactions in solids measured by foil-sandwich irradiations followed by radiochemical detection methods 19 p3402 A66-36002

Stellar evolution of stars between 1 and 3 solar masses, noting nuclear reactions and chemical composition 19 p3467 A66-36792

Stellar evolution for high temperature, predominantly neutrino processes, noting breakdown of homology relation between density and temperature 19 p3467 A66-36795

Stellar nuclear reactions and evaluation of flux and energy spectrum of solar neutrinos 24 p4270 A66-42929

NUCLEAR REACTOR**S REACTOR****NUCLEAR ROCKET**

Refractory metals for use in nuclear rocket nozzles to improve cycle life [AIAA PAPER 65-602] 05 p0702 A66-15133

Autoradiography of components of disassembled nuclear reactor as final phase in evaluating performance of experimental

Kiwi rocket engine 06 p0907 A66-16430
 Behavior of Kiwi-and Nerva-type nuclear rocket reactors under induced failure conditions to determine validity of theoretical prediction of total energy released 09 p1401 A66-20585
 Radiological prediction and monitoring of tests at Nuclear Rocket Development Station 12 p1911 A66-23671
 Liquid hydrogen flow system performance during startup transient of nuclear rocket measured in full-scale simulated engine system, approximating in-flight exhaust conditions 12 p1911 A66-23699
 Electric propulsion for spaceflights, discussing nuclear rocket technology, mission planning, payload optimization, etc 13 p2173 A66-26610
 Plasma core nuclear rocket utilizing MHD driven vortex [AIAA PAPER-65-583] 14 p2329 A66-27409
 MHD species separation of U 235 from hydrogen in gaseous nuclear rocket using time varying traveling wave electromagnetic field [AIAA PAPER 66-499] 16 p2745 A66-30606
 Random noise effects and optimal control of nuclear rocket start-up for rapid and precise attainment of full power 16 p2745 A66-30881
 Irradiation system for experiments with Plum Brook Reactor in nuclear rocket program, noting cryogenic system, dynamic testing, etc 17 p2956 A66-32045
 Solid core nuclear engine clustering and effect of system tradeoffs on vehicle performance 18 p3133 A66-33810
 Automatic starter for nuclear reactor rocket engine with automatic power control system 18 p3133 A66-33875
 Coupled radiative and convective heat fluxes in high temperature hydrogen propellant rocket nozzles with shape and temperature variations [AIAA PAPER 65-557] 19 p3449 A66-35612
 Coolant passage wall temperature measurement in nuclear rocket nozzle during chemical stimulation testing by radiometry without affecting hot gas or coolant flow or disrupting heat flow 19 p3356 A66-35632
 Ground testing of large nuclear rockets, discussing decontamination requirements to maintain safety level with longer running times and higher reactor levels 19 p3398 A66-36177
 Parameter adjustment model reference adaptive control of nuclear rocket engine, noting design parameters, system performance, propellant savings estimates and dynamic stability 19 p3398 A66-36699
 Delayed energy produced by fission product decay when restart of nuclear rocket engine is considered, noting effects of cooldown requirements [AIAA PAPER 66-551] 22 p3946 A66-39676
 Specific impulse limitations of advanced nuclear rocket engines due to hydrogen transpiration coolant flows in exhaust nozzle 24 p4261 A66-42777

NUCLEAR SCATTERING
S RESONANCE SCATTERING
NUCLEAR SHIELDING
 Dipole matrix elements for helium in first order shielding approximation as function of screening parameter 12 p1918 A66-24865

NUCLEAR SPECTROSCOPY
SA ISOTOPE SHIFT
 Isotopic volume shift in X-ray molybdenum K alpha 1 line 01 p0084 A66-10255
 Mean lives of 3s, 3d, 4s, 4p and 4d states in hydrogen and relative initial radiation intensities 07 p1083 A66-18420
 Nuclear instrumentation for lunar surface and subsurface measurements in Apollo Extensions System 12 p1878 A66-23695
 Isotopic volume shift in X-ray molybdenum K alpha 1 line 13 p2110 A66-25972
 Far-IR laser molecular spectroscopy including IR laser oscillators, photon noise, detectors and nuclear optics 13 p2100 A66-26195
 Evaluation of energy resolution of Li-drifted Ge detectors and preamplifiers using FETs in nuclear spectrometry 16 p2660 A66-30625
 Atomic Zeeman patterns using strong pulsed magnetic fields for electronic

transitions for Si, Cu, C, O, Ca, Mg and B 18 p3137 A66-33990
 Background gamma and electron fluxes reduction in charged-particle spectroscopy with fast-gated electronics 19 p3359 A66-35918
 Nuclear spectroscopy and solar neutrino astrophysics 20 p3653 A66-37733

NUCLEAR SPIN
 Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanism and hyperfine relaxation frequency 04 p0567 A66-14340
 Polarization of nuclear spins in semiconductor in strong electric and magnetic fields, noting relaxation mechanism and hyperfine relaxation frequency 14 p2367 A66-28234
 Chirp-radar pulse compression by proton-spin echoes, noting leakage and attenuation 22 p3861 A66-39721
 Transient resonant response of inhomogeneously broadened nuclear spin system to pulsed electromagnetic field represented as series of Bessel functions modulated by time-varying coefficients 22 p3950 A66-40093
 Neutron spatial asymmetry measured from reaction of cosmic ray muons on nuclei with different spins 24 p4271 A66-42940

NUCLEAR STRUCTURE
 Equation of state of matter at supernuclear density 08 p1258 A66-18783
 Giant-resonance characteristics of silicon isotopes calculated, using Balashov magic nucleus model 21 p3798 A66-38913

NUCLEAR SUBMARINE
 Polaris nuclear powered submarine defense capability, noting mobility advantages and command communications 08 p1322 A66-18559

NUCLEAR WEAPON
 Shock and blast, thermal radiation and nuclear radiation as basic elements of nuclear weapon environment, analyzing effect on personnel and materiel 16 p2745 A66-30440

NUCLEATE BOILING
SA HEAT TRANSFER
 Liquid cooling of thin film resistors including use of nucleate boiling 02 p0203 A66-11921
 Liquid cooling on semiconductor devices noting natural convection, nucleated boiling, forced convection and forced convection with boiling 02 p0203 A66-11922
 Nucleate boiling instability of alkali metals noting effects of surface material, chemical treatment, heat flux and cavity geometry [ASME PAPER 65-HT-22] 05 p0783 A66-14743
 Transient quenching method of determining critical heat flux and transfer coefficients in film and nucleate boiling liquid metals, specifically magnesium [ASME PAPER 65-HT-49] 05 p0785 A66-14757
 Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes, noting surface finish effects [ASME PAPER 65-HT-51] 05 p0785 A66-14758
 Discrete bubble regime to merging bubble regime transition in nucleate boiling of methanol and water 07 p1152 A66-17594
 Annular flow and two-dimensional forced convective boiling heat transfer to hydrogen in nucleate and film boiling regimes 08 p1316 A66-18832
 Nucleate boiling heat transfer considered as heat transfer into liquid near front of flow past blunt nosed body 09 p1471 A66-20824
 Nucleate saturated pool boiling over horizontal plate, noting bubble development relation to boiling through heat exchange 12 p1973 A66-23528
 Bubble boiling model of nucleation and growth of bubble on heating 14 p2411 A66-27138
 Gravity effect on nucleate boiling heat transfer 16 p2825 A66-30486
 Nucleate boiling instability of alkali metals noting effects of surface material, chemical treatment, heat flux and cavity geometry [ASME PAPER 65-HT-22] 16 p2828 A66-30986
 Commercial grade sodium boiling from horizontal disk at various pressures and temperatures attaining high heat fluxes,

noting surface finish effects [ASME PAPER 65-HT-51] 16 p2828 A66-30987
 Electrostatic field influence on nucleate boiling of Freon 113, noting improvement of peak heat flux 19 p3477 A66-35407
 Heat release mechanism of developed nucleate boiling process 19 p3478 A66-35940
 Data correlations on forced-convective heat transfer to cryogenic fluids by nucleate, film and transition region boiling 20 p3677 A66-37098
 Convective heat transfer to cryogenic nitrogen and methane from cylindrical surface by nucleate-and film-boiling at high pressures and large temperature differences 20 p3677 A66-37099
 Mechanism of nucleate boiling from superheated surface studied fluid-dynamically and thermodynamically 22 p4000 A66-40918

NUCLEATION
 Combination of spontaneous nucleation theory equations with steady one-dimensional diabatic flow equations for computer analysis of vapor expansion in two-dimensional nozzle 02 p0302 A66-11528
 Nucleation of ice formation in supercooled clouds as result of lightning-initiated sound waves 04 p0542 A66-13674
 Nucleation and boiling liquids phenomena, using Clapeyron equation in expressing saturation curve 07 p1154 A66-18029
 Large-scale expansion nozzle control by heterogeneous nucleation and mercury vapor and drop growth processes in nitrogen flow [AIAA PAPER 66-85] 08 p1318 A66-18997
 Laser simulated nucleation in bubble chamber, comparing sensitivity with radioactively stimulated nucleation 10 p1557 A66-21583
 Nucleation during pulse remagnetization of thin films, showing domain structure of formation, growth of nuclei, etc 11 p1752 A66-22797
 Urea effective ice nucleant in supercooled clouds due to endothermic heat of solution and high solubility 13 p2122 A66-26125
 Growth kinetics and structure of evaporated tin thin films on amorphous carbon film, noting three stages after nucleation, archipelago, labyrinth and closing 14 p2359 A66-27102
 Condensation of vapor and vapor-gas mixtures in supersonic nonequilibrium nozzle flows 14 p2219 A66-27454
 Vibrational nucleation of zirconium droplets burning in free fall, noting supercooling participation in formation of spearpoints 14 p2414 A66-28175
 Effect of electrical charge on surface of glass substrate on nucleation density and initial growth structure of thin films of gold prepared by evaporation under ultrahigh vacuum 15 p2466 A66-29683
 Structural defects in epitaxial films noting nucleation mechanism, stacking faults, growth defects, etc 17 p2985 A66-33157
 Phase equilibrium of Nb-Al binary system determined via metallographic, X-ray diffraction hardness and thermal analysis techniques, noting solubility, structure, nucleation growth, etc 18 p3120 A66-33723
 Secondary mode of nucleation during sublimation growth of nickel bromide, noting formation mechanism 19 p3434 A66-35405
 Homogeneous nucleation of liquid drops in supersaturated vapors, noting kinetic treatment for heating of growing clusters and irreversible thermodynamics of nonisothermal nucleation 19 p3477 A66-35566
 Freezing of supercooled water drops to determine dependence of heterogeneous nucleation on temperature and on duration of supercooling 19 p3394 A66-36384
 Dislocation motion in silicon crystals measured by Lang X-ray technique, noting dislocation nucleation and growth with increasing stress below macroscopic yield stress 19 p3447 A66-36725
 Formation of cleavage crack in crystalline solid, examining crack stability by study of equilibrium dislocation distribution in terms of operative stresses 19 p3475 A66-36728
 Thin film research in Great Britain, discussing vacuum deposition techniques, electrical properties, nucleation and growth, stress, applications, etc 20 p3621 A66-38086

Reactions between silica and graphite studied in vacuum from 1445 to 1765 degrees C by continuously measuring amount of carbon monoxide formed 21 p3753 A66-38593

Experimental molecular beam study of nucleation process in chemical-vapor growth of epitaxial silicon films 21 p3805 A66-39588

Transmission electron microscopic and molecular beam study of nucleation and growth in chemical vapor of epitaxial silicon films on carbon-contaminated silicon substrates 21 p3806 A66-39589

Transitions between phases and states of crystallographic order in films, noting conditions for preferential nucleation and analogies between two- and three-dimensional phase diagrams 24 p4251 A66-42305

NUCLEIC ACID

SA CHROMOSOME

SA DEOXYRIBONUCLEIC ACID /DNA/

Nucleic acid molecule reproduction discussing probability of life development under favorable environmental circumstances 06 p0952 A66-15915

Text on evolution, interpreting functions of body organs in terms of chemical processes and tracing development of complex organic molecules 10 p1487 A66-22065

Synthesis of constituents of nucleic acid and protein molecule for artificial production of life 14 p2227 A66-26866

Nucleic acid constituents synthesis from methane-ammonia-water mixture, hydrogen cyanide and formaldehyde in thermal-radiation environment 17 p2851 A66-32091

Origin of constituents of nucleic acid and protein molecules, noting biological molecules synthesis under conditions similar to those prevailing in prebiotic Earth, following Oparin-Haldane hypothesis 20 p3507 A66-38029

Pressure gradient elution technique for rapid and quantitative chromatographic separation of purine and pyrimidine bases 22 p3860 A66-40402

NUCLEON

High energy interaction of nucleons with complex nuclei described by model of cascade-type nucleon and pion multiplication within nucleus 05 p0755 A66-15406

Mean free path for nucleon-light atom interaction changed from 75 to 90 g/sq cm affecting air shower characteristics 07 p1118 A66-17575

Electron-photon cascades caused by nuclear active component in atmosphere and on gamma rays, atmospheric absorption spectrum of primary nucleons and generation of pions 15 p2584 A66-29556

Cosmic ray nucleon and meson component intensity changes during 11-year cycle, noting asymmetry in modulating mechanism dissipation 18 p3181 A66-34776

High energy particle interaction research, noting that within eight years accelerators will be capable of beams of 28 plus 28 bev protons 18 p3204 A66-35091

Stationary aspects of cosmic ray propagation through atmosphere explained by model calculating high energy nuclear active and muonic components of extensive air showers, presenting energy spectra 18 p3206 A66-35103

Comparison of total number of nuclear active particles in cosmic ray shower measured at very high altitudes, examining discontinuities in dependence of number on shower size 18 p3206 A66-35104

New solution method for nuclear cascade equation for nucleons and charged pions 18 p3206 A66-35105

Production spectra and arrival time distributions of heavy cosmic ray particles in air showers 18 p3210 A66-35127

Airborne equipment for study of nucleon interactions at energies in excess of 10 trillion ev 18 p3214 A66-35155

Energy spectra of nucleons, muons and gamma rays for truncated power law primary energy spectra calculated, using model for nucleon and meson production 18 p3217 A66-35174

Charge distributions in systems of nucleons and pions with given total isotopic spin and charge 18 p3219 A66-35191

Forbush decreases using meson and

nucleon component records in study of sudden commencements during periods between cosmic ray storms 20 p3632 A66-38070

Cosmic ray storms, difference in Forbush decrease recovery in nucleon and meson component 20 p3632 A66-38072

Solar cycle effects on random variation in attenuation length of primary cosmic ray nucleon component 20 p3632 A66-38080

Solution method for nuclear cascade equation representing process of propagation of pions through atmosphere 24 p4270 A66-42925

Computer calculation of dependence of average characteristics of extensive air showers on adopted nucleon nuclear-interaction model 24 p4270 A66-42926

NUCLEON-NUCLEON SCATTERING

High energy photons from discrete sources of cosmic radiation, verifying radio source electron production through proton-nucleon-matter interaction 06 p0947 A66-16572

K meson and hyperon production cross sections, discussing primary energy dependence and upper limit determination 07 p1113 A66-17539

Nucleon-nucleon collisions at high energies, describing statistically independent successive interactions of incident particles with target nucleus 07 p1113 A66-17540

Interaction characteristics of nuclear-active cosmic ray particles with carbon nuclei at mountain altitudes 07 p1114 A66-17549

Interaction characteristics calculated for Feynman diagram of nucleon-nucleon scattering at 300 bev 07 p1115 A66-17556

High energy cosmic ray collisional pion production spectrum and pion energy and angle distributions in CMS and laboratory frames from Landau-Milekhin hydrodynamic model of very high energy nucleon 13 p2176 A66-26763

Collision cross sections of high energy nucleon-nucleon interactions in nuclear emulsion 15 p2583 A66-29545

Experimental data analysis of cosmic ray showers, secondary particle production by nucleon-nucleon collision at high energy, momentum distribution in pions and primary energy-inelasticity relation 15 p2583 A66-29547

Atmospheric high-energy cosmic ray cascade, using fire ball and gev-range nucleon isobars in model 15 p2586 A66-29565

Inelastic n-p cross section at 60 gev determined from attenuation of penetrating shower-producing cosmic ray neutrons in paraffin and graphite 18 p3216 A66-35167

Two-fireball and CKP models of ultrahigh energy interactions 18 p3217 A66-35177

Flux of elementary triplets of unitary symmetry in cosmic radiation, noting production via nucleon-nucleon collision, particle interaction, etc 18 p3225 A66-35232

Cosmic ray nucleon interaction with high energies, estimating transition probability and interaction cross section of baryon in passive state 24 p4263 A66-42519

NUCLEON POTENTIAL

Young air electron-photon showers at 3200 m altitude, noting average nucleon energy and inelasticity coefficient 15 p2583 A66-29552

NUCLEOSIDE

SA RIBONUCLEIC ACID /RNA/

Solar UV synthesis of nucleoside phosphates from terrestrial atmosphere, discussing irradiation of adenine-ribose-phosphoric acid solution 17 p2851 A66-32090

Nucleosides and polynucleotides synthesis from sugars and heterocyclic bases by metaphosphate esters 17 p2852 A66-32095

NUCLEOSYNTHESIS

Nucleosynthesis in stars including light element reactions, helium and carbon burning, neutrino processes, etc 05 p0719 A66-15764

Nuclear reaction and beta decay rates for silicon 28, considering conditions for nuclear statistical equilibrium in stars 12 p1917 A66-24117

Solar nucleosynthesis of extinct isotopic iodine, noting incorporation of Nakhilic meteorite material and subsequent decay into fissionogenic xenon 18 p3225 A66-33623

NUCLEOTIDE

SA RIBONUCLEIC ACID /RNA/

Behavior of synthetic polyribonucleotides in cell-free amino-acid-incorporating systems from E coli, noting release of polypeptide chains into supernatant 12 p1805 A66-23538

Nucleosides and polynucleotides synthesis from sugars and heterocyclic bases by metaphosphate esters 17 p2852 A66-32095

Polymerization of nucleotides from ADP, noting separation of polymer particles from solution as coacervate drops and relation to life origin 17 p2852 A66-32097

NUCLEUS

SA HEAVY NUCLEUS

SA ICE NUCLEUS

Photometry of nuclear condensation used to determine dimensions of cometary nuclei 17 p3009 A66-33369

Comet flares and cometary nuclear structure, specifically considering Schwassman-Wachmann I 17 p3009 A66-33371

Evolution of gases from cometary nuclei by sublimation or desorption 17 p3009 A66-33372

OH production by sublimation and gas hydrate occurrence in cometary nuclei 17 p3009 A66-33373

Physicochemical quantitative analysis of cometary nucleus-coma buildup relationship, discussing gas liberation, entropy and enthalpy variation, change of state and gross energy balance 17 p3010 A66-33374

He-3-He-4 isotopic composition of primary cosmic ray helium flux in terms of energy, rigidity and solar modulation 18 p3192 A66-34841

Tracks of nuclei of primary cosmic rays that ended within nuclear emulsions and possibility of separating isotopes 18 p3192 A66-34842

Balloon-borne scintillation counter measurements of isotopic composition, energy/nucleon and rigidity spectra of primary cosmic helium nuclei 18 p3193 A66-34848

NUCLIDE

S RADIOACTIVE NUCLIDE

NULL HYPOTHESIS

Third-order spherical wavefront deformation due to refraction by spherical surface, optical path difference calculation and design of null tests 19 p3354 A66-35391

NUMBER

S FROUDE NUMBER

S KNUDSEN NUMBER

S LAVAL NUMBER

S LEWIS NUMBER

S MACH NUMBER

S NUSSELT NUMBER

S PECLET NUMBER

S RAYLEIGH NUMBER

S REYNOLDS NUMBER

S RICHARDSON NUMBER

S SIMILARITY NUMBER

S STROUHAL NUMBER

NUMBER THEORY

Twin prime problem solution depends only upon nontrivial L-zeros of Dirichlet L-functions 07 p1057 A66-17861

Numbers theory for lead sulfide photoconducting films, noting balancing of n and p-type impurities, various activation energies, etc 10 p1578 A66-21574

Theoretical methods for reliable machine design, comparing redundant residue number system code with linear codes and majority voting techniques 23 p4042 A66-41603

Digital computer program for handling algebraic expressions in complex numbers 23 p4042 A66-41739

NUMERICAL ANALYSIS

Numerical solution to problems with spatial variables, using partial differential equations of gas dynamics 01 p0055 A66-10169

Local variations method for numerical solution of variational problems 01 p0050 A66-10171

Economical difference scheme of continuous computation for numerical solution to Stefan problem having multiple spatial dimensional variables and phases 01 p0166 A66-11009

Difference method with smoothing of coefficients for numerical solution of Stefan problem with multidimensional phase fronts and any number of independent variables 01 p0166 A66-11010

Numerical analysis of behavior of very large number of constant volume particle trajectories 02 p0253 A66-11822

Numerical solution to equation of radiative transfer for plane parallel horizontal homogeneous medium 02 p0304 A66-11827

Numerical objective analysis for stratospheric constant pressure data at various levels 02 p0254 A66-11983

Text on aerodynamics of wings and bodies, emphasizing matched asymptotic expansion methods for boundary value problems and numerical techniques for loading predictions via computers 03 p0313 A66-12297

Controlling instabilities in numerical representation of diurnal and geographic variation of ionospheric data 03 p0361 A66-12501

Number theoretic method to approximate solution of linear integral equations 04 p0539 A66-13488

Numerical technique to determine vibration characteristics of disk-like structures in turbine engine [ASME PAPER 65-WA/GTP-8] 05 p0639 A66-15723

Tunnel diode mixer operation expressed as bias and local oscillator voltages available gain, minimum noise figure and output conductance, carrying out numerical analysis 06 p0846 A66-16095

Numerical solution to Laplace equation in two dimensions, subject to boundary conditions imposed by conducting surfaces and dielectrics, applied to transmission line problems 06 p0846 A66-16097

Numerical experiment where conditionally unstable environment was present for study of cumulus-like circulations developed from initial state 06 p0905 A66-16267

Numerical attempts to estimate determination accuracy of finite difference method for geopotential field 06 p0905 A66-16551

Numerical representation of controlled quantity expressed by linear frequency signal 07 p1005 A66-17405

Chebyshev approximation for function in equation of thermogravimetric data plot 07 p1149 A66-17470

Rapidly convergent iterative unique determination of linear steering function for desired orbit conditions 08 p1289 A66-18826

Axisymmetric and spherical symmetric elastic stresses and deformations in cylindrical and spherical shells determined by direct numerical analysis 08 p1309 A66-19141

Extrapolation and interpolation formulas for numerical solution of differential equation 08 p1245 A66-19167

Stability of set of Jeffery-Hamel profiles, approximating profiles in two-dimensional divergent channels, investigated by numerical solution of Orr-Sommerfeld problem 08 p1212 A66-19823

Numerical analysis of stability of periodic orbits for restricted problem of two equal masses 09 p1456 A66-20464

Power series drawbacks as tool in numerical solution of differential equations 09 p1395 A66-20620

Deriving interpolatory type quadrature formula by inverting linear systems of differentiation formulas 09 p1395 A66-20622

Globally convergent iteration function for solution of polynomial equations according to certain algorithms 09 p1395 A66-20624

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 09 p1357 A66-20775

Numerical solution of laminar boundary layer momentum, energy and diffusion differential equations for heat and mass transfer on moving continuous flat surface with injection or suction 10 p1619 A66-21053

FAA study of jet takeoff and landing noise effect on population around airport, establishing numerical value of noisiness 10 p1482 A66-21373

Cylindrical Poiseuille flow of rarefied gas for inverse Knudsen number from zero to 10 10 p1524 A66-21806

Numerical method for calculating flow, including gas reactions and nonequilibrium, behind given axisymmetric detached shock wave 10 p1481 A66-21892

Numerical solution to first geodetic problem of ellipsoid of rotation, using iterative application of Runge-Kutta method to differential equations of geodetic line 11 p1698 A66-22767

Numerical analysis of thin cylindrical shell under action of external forces for small deformations, using first-order theory 11 p1783 A66-23016

Modified phase-plane delta method for nonlinear system phase portrait 11 p1679 A66-23270

Optimal control systems and numerical analysis of error effect on sensitivity 11 p1680 A66-23274

Numerical dynamic predictor for control systems disturbed by random noise, discussing Fokker-Planck equation, Crank-Nicolson difference model, etc 11 p1680 A66-23279

Numerical optimization techniques applied to state variable inequality restraints 12 p1901 A66-23602

Numerical solutions of problems in gas dynamics in U.S.S.R., using computers stressing methods for solving systems of nonlinear partial differential equations 12 p1861 A66-23807

Numerical methods of celestial mechanics and Alry method computation of trigonometric series with numerical coefficients 12 p1950 A66-24403

Nonuniformly spaced antenna array synthesis using lambda function via Chebyshev-Gauss quadrature and Hankel transform 12 p1841 A66-24629

Numerical analysis of steady two-dimensional motion of viscous fluid past flat plate at zero incidence to uniform stream, with solutions for Navier-Stokes equations 12 p1866 A66-24949

Short-period Trojan orbits in restricted three-body problem numerically determined, using Jupiter and Sun as principal masses 13 p2185 A66-25807

Numerical-analytical method of obtaining periodic solutions to T systems 14 p2321 A66-27160

Electronic whistlers for calculation of proton density at satellite heights, based on symmetry existing in expressions containing two time and frequency variables 14 p2376 A66-27623

Numerical solution of partial differential equation for convection of scalar or vector 14 p2323 A66-27780

Numerical calculus and applied mathematics - French Colloquium, Rennes, France, June 1963 14 p2324 A66-27835

Numerical attempts to estimate determination accuracy of finite difference method for geopotential field 14 p2327 A66-28223

Numerical solution of integral equation for diffraction by soft strip applied in wave scattering by obstacles with dimensions comparable to wavelength 14 p2325 A66-28399

Numerical analysis of infinite phased array of thick-walled rectangular waveguides 15 p2456 A66-28584

Linear initial value problems involving first order differential equations transformed into higher order systems and treated as boundary value problems, using numerical techniques 15 p2529 A66-29773

Swing-by and capture-orbit trajectories for Mars or Venus exploration described by numerical methods 16 p2798 A66-30358

Radiative heat transfer configuration factor in multisurface enclosure filled with emissive gas 16 p2827 A66-30814

Approximating values of analytic function in form of power series, when region of interest is outside convergence domain of series, using numerical methods, noting detached shock problem 16 p2735 A66-30944

Numerical analysis of stress-strain rate of siphon bellows, using differential equations 16 p2820 A66-31145

Numerical problems in application of Urabe results in considering periodic nonlinear differential systems, obtaining Galerkin approximations 16 p2737 A66-31231

Numerical differentiation by differential quotients, interpolations, Richardson-Romberg algorithm and other methods, including analysis of approximation errors 16 p2658 A66-31347

Finite difference estimation of boundary value problem errors 17 p2945 A66-31878

Numerical calculations for Stokes flow about deformed spheroids 17 p2905 A66-31931

Aids in converging particular numerical process, noting similar technique for isentropic expansions in thermochemical equilibrium air 17 p2946 A66-32475

Numerical methods applied to class of flowing fluid thermal problems in space radiators for life support and auxiliary power systems [AIAA PAPER 66-431] 18 p3097 A66-33644

Numerical solution of problems on discontinuity at junction between homogeneous and inhomogeneous waveguides 18 p3078 A66-34094

Gomory all-integer linear programming algorithm based on lexicographical ordering principle and relation to cost function 19 p3309 A66-35876

Fortran program for finding minimum value of monotonic function defined on ordered sets of positive integers 19 p3309 A66-36044

Fourth-order multipoint iterative methods for solving equations which cost one function and two derivative evaluations per iteration, for use in root finding 19 p3392 A66-36786

Numerical calculations of parameters of steady state HF high pressure vortical discharge of argon in air 20 p3607 A66-36975

Numerical analysis of safety level of fail-safe structure with method applicable to multiload path structures with discrete elements 20 p3666 A66-37001

Energy integral study of geopotential harmonic variation effects on satellite motion near critical inclination 20 p3653 A66-37763

Computer program for numerical solution of ODE systems, noting generation of symbolic solutions via Taylor series expansion 21 p3707 A66-38679

Unconditional stability of Houbolt method for determining dynamic response of structures 21 p3828 A66-38713

Approximate solution of two-dimensional boundary layer problem using Rayleigh-Ritz method, coordinate functions and interpolation 21 p3831 A66-39351

Implosion experiment, discussing methods for detonation and shock wave propagation phase calculation 21 p3837 A66-39503

Iterative linear-elastic analysis of plane pin-jointed frames and space ball-jointed frames, accounting for temperature and geometrical changes 21 p3833 A66-39537

Transient processes in vacuum tube oscillator synchronized by small harmonic signal with random initial phase in presence of noise 22 p3873 A66-39834

Numerical method of solving optimum control problems through reduction to solution of simple minimization problems by constructing suitable sequence of auxiliary functionals 22 p3938 A66-39900

Numerical differentiation formulas for coefficients of given characteristic function, using tabulated Stirling numbers 22 p3938 A66-39904

Heat transfer equation solution for ablating solid, assuming exponential temperature profile with numerical solution on digital computer by Runge-Kutta method 22 p3998 A66-40035

Heat transfer from gray fin-tube radiators with numerical results for diffuse surfaces, noting fin and tube emissivities 22 p3998 A66-40037

Numerical analysis of meteorological fields investigated statistically 22 p3943 A66-40390

Optimum trajectories between material points moving along same orbit in gravitational field of spherically symmetric central body, obtaining numerical solutions for circular initial orbit 22 p3980 A66-40462

Static stability of rolling motion of aircraft for given aileron angle when inertia cross-coupling is present, with numerical solution of nonlinear equations 22 p3848 A66-40493

Book on numerical processes in differential equations including initial value and boundary value problems 22 p3941 A66-40620

Numerical analysis methods in elasticity theory for constructing models, approximate problems and analytical

solutions 23 p4135 A66-40993
 Numerical solution via digital computer of nonlinear transient heat conduction with phase changes 23 p4149 A66-41697
 Finite resistivity instabilities of sheet pinch examined, using numerical analysis in terms of normal modes 23 p4106 A66-41709
 Stresses in shells under arbitrarily concentrated loads calculated numerically 23 p4142 A66-41958
 Griffith and bond fracture with singular stresses near crack point examined via numerical analysis 24 p4288 A66-42276
 Optimum control problems solved by numerical methods based on variation in state space 24 p4231 A66-42471

NUMERICAL CONTROL

Simple method of numerical contouring control of machine tool, noting role of tangent rule and shift 01 p0050 A66-10283
 Introduction of programmed milling machines to production of aircraft engines for Czechoslovakian FB 04 p0525 A66-13763
 CRT control display console models, console selection pointers, computer programming requirements, etc 07 p1003 A66-17879
 Numerical control using computer-aided design/CAD/ equipment 08 p1228 A66-18686
 Machining capability and economy of preset rotary cutting tools for numerically controlled machine tools [ASTME PREPRINT MR66-723] 12 p1887 A66-24421

Selection of parts for numerically controlled manufacturing, noting periodical necessity of intermixing with conventional machining operations [ASTME PREPRINT MM66-724] 12 p1887 A66-24422

Point-to-point contouring systems noting procedures, codes and cost savings [ASTME PREPRINT MS66-725] 12 p1887 A66-24423

Asymmetric instability and charge motion in metal-silicon oxide-silicon structures 12 p1932 A66-24823
 Dynamic optimization and minimizing kernel function for dual control problem 13 p2117 A66-25348
 Numerical control for inspection of machine tools and parts 15 p2506 A66-28790
 General processor and postprocessor elements of numerical control computer system 17 p2930 A66-33090

NUMERICAL INTEGRATION

SA RUNGE-KUTTA INTEGRATION
 Approximate calculation of Wiener integration 01 p0092 A66-10317
 Potential energy curves for bound states of diatomic molecules from spectroscopic constants, using Rydberg-Klein-Rees method 01 p0108 A66-10600

Numerical solution to steady compressible Navier-Stokes equation, treating steady shock tube flow as asymptotic form of time dependent flow [AIAA PAPER 65-1] 02 p0217 A66-11530
 Quasi-linearization used to determine orbits from observational data such as angular data, range and range rate 02 p0288 A66-11547

Numerical integration of heat propagation equation, calculating temperature field in fluid flow with variable physical parameters 04 p0596 A66-13659
 Digital and numerical method solution of transient heat flow problems 07 p1150 A66-17577

Two-tangents method for numerical solution of Cauchy problem for system of ordinary differential equations 07 p1058 A66-17911

Numerical computer solutions for several nonlinear gas flow problems in high speed aerodynamics 07 p0983 A66-18143

Numerical method applied to inviscid compressible two-dimensional or axisymmetrical fluid flows for problems involving subsonic, transonic and supersonic flow regions 08 p1207 A66-19127

Convergence of numerical solutions of ODE initial value problems 09 p1394 A66-20616
 Numerical solution of first order first-degree two-variable for ODE for self-adjusting nonpolynomial

interpolant 09 p1395 A66-20617
 Runge-Kutta fourth order formula used to obtain approximate solution to differential equations 09 p1395 A66-20618
 Numerical integration of coupled first order ODE of greatly differing time constant 09 p1395 A66-20619
 Nonlinear stability elimination in long term numerical integration of motion equations required for medium-range weather forecasting 09 p1399 A66-20730
 Transient loading of rectangular and right circular cylinders by shock waves in air numerically determined by time dependent Eulerian method [AIAA PAPER 65-4] 12 p1860 A66-23581
 Dynamic response of cylindrical shell subjected to time-varying load treated by explicit and implicit method of timewise integration 12 p1956 A66-23584

Optimum design and error analysis of digital integrators for discrete system simulation via quasi-linearization 12 p1828 A66-23840
 Monotonic two-point system for numerical integration of ordinary differential equations, for case of solutions of constant sign 12 p1902 A66-23902

Numerical integration of second order differential equations 12 p1904 A66-24189

Numerical integration of differential equation using exterior node quadrature formulas of Ionescu 12 p1904 A66-24190

Numerical method of calculating unsteady flow past arbitrary thin wing moving in ideal incompressible fluid 12 p1797 A66-24430

Explicit approximate solution for distribution of constraints along wall of revolution assuming limiting equilibrium and for case of system with discontinuity line 13 p2195 A66-25443

Solution of reactor kinetics equation numerically unconditionally stable for all values of reactivity or integration step size 13 p2126 A66-25791

Numerical integration method for digital computer analysis of structural frameworks 13 p2198 A66-26223

Flight trajectory analysis of body in vertical ascent from planet under constant thrust, by numerical integration of motion equations 13 p2188 A66-26292

Numerical integration methods requiring least computation time for truncation error when applied to ordinary differential equations, comparing Butcher with Runge-Kutta, Adams, etc 13 p2121 A66-26324

Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 14 p2381 A66-27534
 Numerical calculus and physical calculus - Colloquium, Henri Poincare Institute, Paris, May 1963 [PST PAPER NT-147] 14 p2323 A66-27790

Indirect measuring methods for connected quantities using Cracovian expansion [PST PAPER NT-147] 14 p2323 A66-27793

Nonlinear calculations of intermediate amplitude to analyze stability of pulsating stars of varying composition, mass, luminosity, etc, using numerical integration of motion equations 14 p2385 A66-28116

Numerical integration principle in calculation of disturbing potential verified, using conical Earth model 14 p2288 A66-28211

Numerical solution of nonlinear integro-differential boundary value problems with parabolic operators and retarded argument 15 p2525 A66-28519

Algorithms for numerical determination of asymptotically stable solutions for ordinary differential equations 15 p2526 A66-28734

Numerical solution of partial differential equations - Symposium, University of Maryland, May 1965 16 p2731 A66-30233

Numerical analysis of stabilization of one-component conducting plasma in two-dimensional coaxial duct 16 p2763 A66-31307

Highly stable predictor-corrector methods for solving systems of differential equations 16 p2658 A66-31348

Flow properties behind spherical detonation wave in Taylor and Zeldovich solution 17 p2913 A66-33071

Textbook on numerical solution of initial value problems and approximate numerical

integration 17 p2948 A66-33436
 Degree of agreement between cosmic ray cut-offs derived from McIlwain parameter and those from numerical integration of motion equations 18 p3198 A66-34880
 Plasma model permitting numerical solution of nonlinear interpenetration problem of two rarefied plasma clouds 19 p3406 A66-35734

Numerical integration of boundary layer equations for dissociating gas flows, determining heat flow near stagnation point 19 p3341 A66-35739

Partial step integration equation for use with Adams or Adams-Bashforth method of integration of differential equations 19 p3309 A66-36045

Numerical integration of primitive equations by simulated backward difference method, using two-step iteration for divergent barotropic model of atmosphere 19 p3393 A66-36057

Numerical integration scheme for oscillatory equations with second-order accuracy and sharp cut-off for high frequencies 19 p3389 A66-36058

Numerical approximation of Riemann integration for plane gas flow at supersonic speeds 19 p3276 A66-36475

Extrapolation methods for numerical integration using digital computers, comparing convergence with conventional methods 19 p3310 A66-36650

Numerical computation of optimal control bypassing two-point boundary problem, considering aircraft landing and boiler control 19 p3334 A66-36678

Richardson extrapolation applied to estimate accumulated truncation error for one-step method with variable step size for integrating system of ordinary differential equations 19 p3392 A66-36780

Step size for numerical solution of differential equation without violating stability region constraint 19 p3392 A66-36785

Quantum mechanical calculations for Lennard-Jones potential show dependence of barrier penetration and resonance effects on phase shifts 19 p3404 A66-36798

Subdominant solutions of linear differential equations calculated by numerical method 20 p3589 A66-36902

Damping coefficient measurement in transient regime by numerical integration process 20 p3599 A66-36956

Numerical integration of Navier-Stokes equation for shock reflection, supersonic flow past thin plate and shock diffraction on thick plate 20 p3546 A66-37534

Restricted three-body problem integrated by Steffensen recurrence formulas using power series 20 p3602 A66-37540

Numerical extrapolation solution of kernel-characterized integral equations for apparent emissivity of conical and cylindrical cavities 20 p3681 A66-38298

Charged particle motion in magnetic traps of acute geometry, examining particle trajectories by numerical integration 21 p3788 A66-39056

False reflection of computational mode waves at boundary due to use of finite differences 21 p3759 A66-39207

Necessary and sufficient conditions for matrix satisfying discrete maximum principle and difference methods for numerically solving second-order elliptic boundary value problem 21 p3757 A66-39258

Relativistic electron layer formation by injecting electrons into cylindrical region of Astron, using difference methods in integrating Vlasov-Maxwell equations 21 p3793 A66-39470

Nonlinear computational instability and long-term numerical integration of two-dimensional incompressible flow equation 21 p3730 A66-39473

Numerical solution of full-wave equation with mode coupling governing electromagnetic wave propagation in horizontally stratified inhomogeneous anisotropic medium 22 p3863 A66-39938

Algorithms for numerical determination of asymptotically stable solutions for ordinary differential equations 22 p3939 A66-40442

Calculating method for parachute opening forces, system velocity, cloth pressure loading and filing time for horizontal and

- vertical deployment
conditions 22 p3844 A66-40590
Numerical analysis of transient behavior of
nonlinear transistor circuit
equations 22 p3885 A66-40863
Numerical solution of BVP for optimal
control parameters in trajectory
analysis 23 p4051 A66-41617
Numerical integration with aid of matrices
for solving differential equations of
structural mechanics 23 p4139 A66-41786
Numerical solution of continuity equation
for transient compressible flow in closed
vessel 24 p4193 A66-42135
Numerical calculation of periods of natural
oscillations and corresponding eigenfunctions
of planetary atmospheres as function of
planets rotational speed 24 p4273 A66-42320
Reverse flow and deformation optimization
theories applied to subsonic aeroelasticity of
lifting surface in harmonic oscillation, using
numerical integration and computer
programs 24 p4157 A66-42343
Numerical solution of Boltzmann kinetic
equation for weakly ionized plasma in
thermoelectronic converter 24 p4239 A66-42871
Numerical solution of linear boundary
value problems 24 p4233 A66-43201
- NUSSLETT NUMBER**
Condensation in variable acceleration field,
especially linear variation occurring in
constant cross section rotating
thermosyphon
[ASME PAPER 64-WA/GTP-2]
02 p0304 A66-11764
Approximation method for limit Nusselt
number for channels of nonuniform
geometrical configuration and linearly
variable wall temperature 16 p2684 A66-30677
Mass transfer and hydrodynamics of gas jet
injection into liquid surface, deriving
empirical equations for hollow truncated
point formed around injection
point 21 p3836 A66-38958
Heat transfer from enclosed rotating disk,
analyzing effects of radial outflow and
inflow on temperature profile and Nusselt
numbers on rotor and
stator 24 p4294 A66-42705
- NUTRITIONAL OSCILLATION**
Fluid-sphere nutation sensor for
determining stability of rotating
satellite 08 p1224 A66-19490
Nutation constant for absolutely solid
Earth from recent astronomical unit and
lunar mass measurements 12 p1867 A66-23513
Classical theory of tidal oscillations of
plumb line acting under solar and lunar
tidal forces 15 p2596 A66-29142
Random variation of Earth rotation relation
to amplitude of free
nutation 16 p2693 A66-30589
Nutation constant for absolutely solid
Earth from recent astronomical unit and
lunar mass measurements 20 p3549 A66-37027
Dynamical effects of liquid nucleus of
Earth in diurnal terrestrial
tides 20 p3553 A66-38068
Conservative systems motion stability,
generalizing precession and nutation of
gyroscope with respect to noncyclic
coordinate 22 p3948 A66-40681
- NUTRITION**
Human waste nutrient assimilation by
Chinese cabbage plants grown in air-
moisture medium in closed
system 15 p2440 A66-29507
Intensive Chlorella culture consumption of
mineral-nutrition
elements 15 p2440 A66-29510
- NUTRITIONAL REQUIREMENT**
Bite-size foods included in feeding study of
man exposed for 56 days to oxygen-helium
atmosphere 18 p3061 A66-33775
Nutritional evaluation of feeding bite-size
foods to man exposed for 56 days to
oxygen-helium
atmosphere 18 p3061 A66-33776
Analogies between nutritional requirements
of aircrew and cosmonauts, evaluating
physiological factors
involved 23 p4029 A66-41204
- NYLON**
SA POLYAMIDE
Ty-Block injection-molded nylon cable-
anchoring device with adjustable nylon strap
for clamping cables 11 p1709 A66-22674
- Friction and lubrication of
polymers 13 p2087 A66-26304
Compression of anisotropic fiber
monofilaments extended to measurements of
expansion of horizontal diametral plane and
contact widths for polyethylene
terephthalate and nylon, as function of
load 13 p2115 A66-26306
- NYSTAGMUS**
SA EYE MOVEMENT
Hypoxic hypoxia and hyperventilation
effect on nystagmus induced by angular
acceleration 03 p0326 A66-13356
Threshold of feeling data by generating
sensation of rotation and nystagmic reaction
by rotating subject and abruptly halting
rotation 06 p0811 A66-16066
1 g rotating linear acceleration vector
producing compensatory nystagmus, noting
effects when rotation axis was vertical and
horizontal 11 p1643 A66-22579
Barany hypothesis tested to clarify
mechanism of caloric nystagmus by use of
zero gravity environment 17 p2857 A66-32168
Manually imposed angular accelerations
during weightlessness period of parabolic
flight, obtaining electrooculographic
recordings for analyzing nystagmic
response 19 p3286 A66-36382
Labyrinthine nystagmus and sensation of
turning evoked by impulsive stimuli in yaw,
pitch and roll compared for subjects in
plane of rotation and in tilted
position 24 p4163 A66-42448
- O**
- O-RING SEAL**
New materials in compression packings and
O rings such as fibers, metals, plastics and
homogeneous materials 04 p0525 A66-13782
Mechanical end face seals covering design,
operation, parameters, materials used,
advantages and
limitations 04 p0525 A66-13784
- OAO**
OAO program designed to perform
experiments from stabilized
platforms 08 p1301 A66-18565
Power supply system of OAO consisting of
solar cells, energy storage device, power
controller, etc, and simulation program via
digital computer 08 p1168 A66-19493
Solar cell powered resistojets in
conjunction with momentum flywheels for
attitude control and orbit maintenance of
OAO
[AIAA PAPER 66-225] 10 p1593 A66-21452
Orbiting eye/space telescope/ construction
featuring membrane optics with smooth and
symmetric surfaces, inflatable body and
laser transceiver 12 p1876 A66-23646
Orientation control of orbital astronomical
observatory examined, using dynamic model
consisting of three independent subsystems,
each with one degree of
freedom 12 p1829 A66-24318
Manned orbiting astronomical observatories
would enable astronomer astronauts to erect
large sensors in space and avoid
atmospheric effects 13 p2192 A66-25689
Tradeoff for high reliability program,
discussing development of satellite
equipment for Celestscope
project 15 p2507 A66-28796
Frequency, dynamic response and jettison
analyses for payload shrouds, with
application to OAO 16 p2808 A66-30468
Space systems for astronomical
observations including OAO, rocket and
balloon programs and manned space
observatories 19 p3466 A66-36648
Digital video system for measuring
broadband spectral intensity of stars and
coordinates onboard OAO 20 p3557 A66-37202
Telesopic magnification and observation
time effect on target identification in
simulated orbital
reconnaissance 21 p3701 A66-39424
- OBLATENESS**
Gravitational potential of oblate planet,
expressed in terms of oblate spheroidal
coordinates, generalized by means of
transformation of associated Cartesian
system 14 p2378 A66-27111
Poincare-von Ziepel procedure in celestial
mechanics applied to satellite motion about
oblate Earth 16 p2796 A66-30263
Satellite orbit stability discussing proof of
Haseltine formal stability theorem, doubly
periodic expansions, satellite motion around
oblate curve, etc 17 p2999 A66-32065
Guidance equations including first-order
effects of Earth oblate gravitational field,
solving motion equations and evaluating
downrange and crossrange miss distance and
time-of-flight errors 19 p3397 A66-35599
- OBLIQUE SHOCK WAVE**
Sweeping conditions for oblique and
conical shock waves and transonic
flows 07 p1020 A66-17868
Transitions of steady flows of conducting
gases through two successive oblique MHD
shock waves 18 p3147 A66-34726
Multistep axisymmetrical supersonic exit
cones optimum geometry design diagram
based on external oblique and normal
compression shock 20 p3628 A66-36927
Jet impact on plane surface at oblique
angle, noting transformation from jet to thin
sheet and role of stagnation
pressure 20 p3546 A66-37805
Oblique detonation impacts in pentolite on
iron treated by methods of plane steady
compressible flow, discussing regular and
shock Mach reflection and
expansion 21 p3727 A66-39172
Refractive index equation derived for
oblique wave propagation in compressible
general magnetoplasma with arbitrary
directed magnetostatic
field 21 p3793 A66-39350
Field, mass, momentum and energy
conservation, entropy and evolution
conditions for steady MHD oblique shock
discontinuities in perfectly conducting gas
flow with Mach and Alfvén number
parameters 21 p3795 A66-39577
Oblique shock wave formal determination
of aerodynamic forces and pressure
distribution on delta wings in supersonic or
moderately hypersonic
flow 21 p3695 A66-39602
Flow pattern of three-dimensional
interaction of oblique shock with boundary
layer obtained when shock generated by
wedge spanning supersonic wind tunnel
interacts with side wall 22 p3901 A66-40491
Direct determination of oblique incidence
coefficients in birefringent coatings and
models, eliminating error
sources 24 p4292 A66-42863
- OBSERVATION**
S CELESTIAL OBSERVATION
S RADAR OBSERVATION
S RADIO ECHO OBSERVATION
S RADIO OBSERVATION
S SATELLITE OBSERVATION
S SOLAR RADIATION OBSERVATION
S VISUAL OBSERVATION
- OBSERVATORY**
S ASTRONOMICAL OBSERVATORY
S GEOPHYSICAL OBSERVATORY
S LUNAR OBSERVATORY
S SOLAR OBSERVATORY
- OCCULTATION**
SA LUNAR OCCULTATION
SA STELLAR OCCULTATION
Occultation of Tau A radio source by solar
corona, noting interaction of radio source
with corona irregularities 05 p0749 A66-15128
Expected diffraction effects on
electromagnetic radiation from Mariner IV
due to Martian atmosphere and
occultation 06 p0827 A66-16039
Mariner IV occultation experiment on
Martian atmosphere, using amplitude and
frequency changes of tracking and telemetry
signal
[AIAA PAPER 66-148] 07 p1002 A66-17900
Mars atmosphere and ionosphere analyzed
by measuring effect on radio occultation of
planet, determining shape, atmosphere
density profile, diurnal variations,
etc 13 p2178 A66-25235
Mars atmosphere models based on Mariner
IV occultation deriving electron number
density, temperature, pressure, mass
density, etc, noting carbon dioxide
presence 16 p2800 A66-30713
Source distributions of UV and X-ray
emission in corona and chromosphere
determined from flight of spacecraft-borne
instruments into Earth

- shadow 17 p3001 A66-32465
- OCEAN**
- SA ATLANTIC OCEAN
- SA PACIFIC OCEAN
- Ocean current effects on geomagnetic field and aurora borealis 02 p0221 A66-11344
- Possible effects of oceans on atmospheric lunar tide 07 p1061 A66-17363
- Phase difference between atmospheric large-scale disturbances and heating due to sea-surface evaporation and turbulent exchange 11 p1694 A66-22199
- Time variation of ocean temperatures and relation to internal waves and oceanic heat flow measurements from four stations 14 p2289 A66-28337
- Atmospheric optical properties and directional reflectances of ocean water and other surfaces, for unobscured low Sun 15 p2531 A66-28832
- OCEANOGRAPHY**
- Spectral albedo of deep body of water from 4800 to 6100 angstroms by Sobolev approximate method 05 p0674 A66-15418
- High resolution radar correlometer measurement of spatial correlation radius of RF radiation scattered by disturbed ocean surface 09 p1343 A66-20340
- Specular returns and diffuse scattering from Moon and ocean bottom 16 p2653 A66-30932
- Aircraft instrumentation for oceanographic measurement platform including radiation thermometer, wave meter and expendable bathythermograph [AIAA PAPER 66-695] 20 p3496 A66-38036
- OCULAR CIRCULATION**
- Rheographic regional method for evaluation of cerebral and ocular circulation in cardiac and cerebrovascular disease 04 p0463 A66-14002
- OCULAR CONVERGENCE**
- Slow waveform of eye position change relative to head oscillating sinusoidally about vertical axis 24 p4163 A66-42449
- OCULOGRAPHIC ILLUSION**
- Measurement of oculographic illusion in subjects with or without labyrinthine defects, showing validity as specific response to stimulation of otolith organs 06 p0813 A66-16828
- Physiological reactions to long periods of weightlessness beyond operational possibilities 11 p1642 A66-22484
- Otolith organ activity within Earth standard, one-half standard and zero gravity environments and effect of extralabyrinthine factors effect upon counterrolling 15 p2431 A66-28664
- Ogee WING**
- Flight experience with Ogee wing at low speed [AIAA PAPER 65-782] 03 p0318 A66-12556
- F5D-1 aircraft delta wing modification, describing wind tunnel and flight test results with ogee wing 06 p0802 A66-16805
- Delta and ogee planforms with nose planes, both with and without stabilizers 17 p2837 A66-31988
- OGIVE**
- SA ELLIPSOID
- Wind tunnel study of protecting ogive of satellite and flight test confirmation 02 p0293 A66-11209
- Tangent cone method extended to determine pressure coefficients of yawed circular cones and ogives at angle of attack 18 p3048 A66-33820
- OGO**
- Magnetic design of OGO and Pioneer solar probe including data on instrumentation, mechanical equipment, permanent magnets, test methods, etc 06 p0958 A66-15919
- Orbiting Geophysical Observatory /OGO/ program to study Earth and Earth-Sun relationship 08 p1301 A66-18567
- Data systems requirement for geographic research, noting use of orbiting sensors to obtain information on terrain, vegetation, human and animal activities, etc 10 p1532 A66-21522
- Attitude control system for OGO, discussing design principles, space environment effects, reliability, etc 18 p3242 A66-33853
- OGO-A**
- Radio propagation experiment using transmitted VHF waves from OGO-A to deduce electron density in ionosphere and magnetosphere 01 p0063 A66-10892
- Ogo-A first results on mass spectrometry measurements of thermal positive ion composition at high altitudes 05 p0746 A66-14781
- Magnetopause location, boundary positions and magnetic noise spectral data obtained with triaxial search coil magnetometer aboard Ogo I satellite 11 p1701 A66-23148
- OGO-B**
- Airglow lines measured through photometers on OGO-II satellite, noting nadir and zenith airglow 15 p2494 A66-30044
- OGO-E**
- Triaxial electron spectrometer, mounted on OGO-E spacecraft, measures flux and energy distributions of electrons, noting electron multiplier 12 p1877 A66-23689
- Electron and proton spectrometer detector mounted on OGO-E, measurements cover seven differential energy channels 12 p1877 A66-23690
- OHM LAW**
- Ohm law for partially ionized gases and plasmas 03 p0403 A66-12974
- Current voltage characteristics of cadmium sulfide semiconductors showing departures from Ohm law associated with ultrasonic amplification, crystal length and increasing conductivity 06 p0923 A66-16183
- Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 10 p1582 A66-21968
- Ohm law in partially ionized inhomogeneous plasmas in presence of magnetic field derived, accounting for electron, ion and fluid motion 13 p2140 A66-25418
- Ohm law for nonisothermal plasma, considering thermal diffusion forces, obtaining expressions for electric conductivity and Hall coefficient 16 p2761 A66-31085
- Volt-ampere and current carrier mobility characteristics of semiconductors with electron-phonon bonds proportional to applied field 21 p3805 A66-39547
- Rayleigh-Taylor instability of plasma is unaffected by inclusion of Hall current and electron-inertia terms in generalized Ohm law 22 p3956 A66-40420
- OHMIC LOSS**
- Loss rates of charged particles from ohmically-heated discharges in C-Stellarator, showing confinement time parameters 10 p1568 A66-21825
- Channel flow of inviscid fluid with tensor conductivity considered when flow leaves transverse magnetic field, noting spatial distribution and ohmic power loss for application in MHD generators 14 p2346 A66-28302
- Electric field in MHD generator channel under mixed boundary conditions solved by Wiener-Hopf technique, evaluating ohmic losses 20 p3500 A66-37491
- OIL**
- SA LUBRICATING OIL
- Superhigh vacuum obtained with oil vapor diffusion vacuum pumps, including oil vapor traps in pump design 11 p1710 A66-22804
- Motion equation of viscous oil flow under action of electric forces caused by surface charge 13 p2070 A66-26709
- Liquid nitrogen-cooled shield against oil vapor contamination of proton accelerator in vacuum chamber 19 p3281 A66-35814
- Purification of turbine oil by hydrogenation, using Al-Co-Mo catalyst 20 p3575 A66-38382
- Column chromatography used to determine hydrocarbons present in Moonie crude oil from Queensland, Australia, that is two hundred million years old 24 p4170 A66-43024
- OIL ADDITIVE**
- Additives effect on antioxidant stability and antiabrasion characteristics of lubricating oils used in jet and turboprop engines 20 p3575 A66-38445
- OLEFIN**
- Mercury photosensitized decomposition of perfluoropropene to gain information about reactive species produced 02 p0188 A66-11595
- Mercury photosensitized oxidation of perfluoropropene to study postulated excited molecule mechanism 02 p0188 A66-11596
- Polyolefin fluids with wide viscosity range compared with petroleum oils and existing synthetic lubricants for extreme temperature application [ASLE PREPRINT 65-LC-1] 02 p0238 A66-12259
- Polyolefin fluids with wide viscosity range compared with petroleum oils and existing synthetic lubricants for extreme temperature application [ASLE PREPRINT 65-LC-1] 12 p1888 A66-24986
- OLFACTORY PERCEPTION**
- Experimental research into olfactory code, noting psychological and physiological analysis, suggesting specific chemically sensitive molecules role 15 p2441 A66-29650
- OMICRON CETI STAR**
- IR spectral study of water deficiency in S stars and water abundance variation with Mira phase 11 p1771 A66-22771
- OMNIDIRECTIONAL ANTENNA**
- Small lightweight 10-gc horizontally polarized omnidirectional rectangular wave guide slot antenna 02 p0196 A66-11369
- Near-isotropic circularly polarized omnidirectional antenna for space vehicles, discussing theoretical design and experimental tests 06 p0843 A66-16019
- Spherical radar reflectors with high-gain omnidirectional response, noting structure, efficiency and achievement of isotropic response 10 p1503 A66-21642
- Effect of transition of telemetry frequencies from VHF /215-260 mc/ to 2200-2300 mc range on aerospace vehicle telemetry antennas of general purpose omnidirectional type 14 p2253 A66-27533
- Array of circumferential slots on large cylinder as omnidirectional antenna 18 p3074 A66-33544
- Noncoherent low power spacecraft communication system with 1 watt transmitted power and omnidirectional spacecraft antenna 24 p4173 A66-42683
- ON-LINE PROGRAMMING**
- On-line and off-line self-organizing control systems for space vehicle application 19 p3333 A66-36661
- Algorithm for learning without external supervision and application to learning control systems 19 p3333 A66-36666
- On-line-learning and off-line-learning self-organizing control systems 21 p3720 A66-39431
- ONBOARD NAVIGATION**
- Fast time modeling technique for simulating predictor display for onboard orbital rendezvous optimization 05 p0626 A66-14617
- Data processing procedures of Apollo onboard navigation system for determination of position and velocity 05 p0712 A66-14640
- Flight electronics equipment and techniques, discussing communications devices, radio navigation apparatus, all-weather landing and onboard navigation aids 21 p3709 A66-38653
- Computational limitations of onboard orbiting computers such as fixed point arithmetic, limited word length and solution techniques 21 p3766 A66-38884
- Onboard calculation for navigation and guidance of Apollo mission vehicle [AGARDOGRAPH 105] 24 p4236 A66-43125
- Optical measurements and navigation during midcourse and orbital phases of space mission, deriving linear equations for propagation of time dependent navigation errors [AGARDOGRAPH 105] 24 p4176 A66-43127
- Apollo guidance computer, discussing memory storage, central processing unit and sequence generator [AGARDOGRAPH 105] 24 p4236 A66-43128
- ONE-DIMENSIONAL FLOW**
- One-dimensional flow of plasma in magnetic field perpendicular to direction of flow 01 p0111 A66-10433
- Combination of spontaneous nucleation theory equations with steady one-dimensional diabatic flow equations for computer analysis of vapor expansion in two-dimensional nozzle 02 p0302 A66-11528
- Equations for one-dimensional flow of ideal compressible polytropic fluid obtained by transforming dynamical equation for

- longitudinal vibrations of nonlinear model string 02 p0219 A66-12160
- Transformation of unknown functions and independent variables entering into differential equations for motion of nonviscous nonheat-conducting gas 02 p0220 A66-12178
- Numerical application of generalized method for study of quasi-one-dimensional flows 03 p0358 A66-13132
- One-dimensional plasma flow in crossed electric and magnetic fields covering subsonic, transonic and supersonic flow 05 p0720 A66-14508
- Stability of two-phase unidimensional flow, relating hydrodynamic response to that of servomechanism 05 p0723 A66-15098
- Chemical kinetics of nonequilibrium combustion of propane-air and ethane-air mixtures in one-dimensional flow, including ignition delay and reaction time [CI PAPER WSCI-65-19] 05 p0788 A66-15143
- Group properties of PDE system for one-dimensional gas flows with plane waves, using external Cartan forms 07 p1019 A66-17859
- Quasi-one-dimensional unsteady hydromagnetic wave flow of ideal inviscid compressible conducting fluid in nonuniform ducts 07 p1089 A66-17962
- Simple waves in one-dimensional nonsteady nonmagnetic relaxation hydrodynamic flows of chemically reacting compressible gases 07 p1020 A66-17965
- One-dimensional heat flow to cool wall, discussing effects of compressibility and variable thermal conductivity 08 p1205 A66-18540
- Two-fluid approximation of one-dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes 08 p1265 A66-19466
- Conducting gas flow in Hall MHD generator reduced to quasi-one-dimensional problem 09 p1331 A66-20145
- Shock wave discontinuity of steady one-dimensional viscoelastic flow 09 p1466 A66-20261
- Bimodal formulation applied to chemical reactions in turbulent wake flow behind hypersonic spheres, using quasi-one-dimensional model 10 p1480 A66-21771
- Time dependent stability of one-dimensional laminar flames with distributed heat losses 10 p1621 A66-21809
- Diffusion and propagation phenomena in air-water and water-steam emulsions in one-dimensional flow 12 p1973 A66-23524
- Digital calculation of transient one-dimensional heat flow confirms accuracy of small and large Fourier number approximations 12 p1981 A66-24998
- Handbook of generalized gas dynamics including one-dimensional gas dynamics, compressible flow tables, gamma function, isentropic flow, etc 13 p2063 A66-25694
- One-dimensional gas flow in tube with heat transfer 13 p2066 A66-26488
- One-dimensional flow through nozzle and stability of weakly ionized plasma with induced Hall current 15 p2550 A66-28958
- One-dimensional plasma flow across confining magnetic field 16 p2760 A66-30804
- Optimum profile of supersonic nozzle with nonequilibrium flow 16 p2687 A66-31287
- Theory of unsteady one-dimensional motion of ideal incompressible fluid, discussing equation of state 16 p2688 A66-31300
- Optimum operation modes of MHD converter 16 p2637 A66-31368
- General solutions of MHD equations for linear nonsteady and plane steady motions of ideally conducting gas 16 p2764 A66-31369
- Steady-state axially-symmetric channel flow of ionized gas in external electromagnetic field in one-dimensional approximation 17 p2971 A66-32867
- Geometric, gasdynamic and electromagnetic parameters of one-dimensional flow of conducting gas with Hall effect for maximum power tapping from channel electrodes 17 p2972 A66-32869
- Magneto-Fanno flow shock tube experiments to determine one-dimensional MGD interactions between partially ionized gas flow and external magnetic field 18 p3145 A66-34111
- Friction and heat exchange effects on one-dimensional flow profile of ideal gases 18 p3098 A66-34122
- Existence of dense and dilute distinct phases in one-dimensional classical fluids consisting of finite particles obeying Boltzmann statistics and potential wells of finite range 18 p3099 A66-34203
- One-dimensional theory of compound-compressible nozzle flow [AIAA PAPER 66-663] 18 p3049 A66-34440
- Numerical solution for complete Navier-Stokes equations for one-dimensional time-dependent propagation of compressible viscous thermally conducting diatomic gas, including presence of traveling shock wave 18 p3102 A66-34918
- Transformation and solutions of equations of one-dimensional isentropic motion of ideal gas 19 p3342 A66-36467
- One-dimensional heat flow equation for liquid nitrogen end-cooled ruby laser rod 20 p3581 A66-38386
- Weak shock wave structure in viscous heat-conducting fluid, accounting for dissipation of energy during one-dimensional flow 21 p3723 A66-38587
- Stability of one-dimensional steady detonations for periodic disturbances of small transverse wavelength 21 p3727 A66-39171
- Conducting gas flow in Hall MHD generator reduced to quasi-one-dimensional problem 21 p3698 A66-39416
- Steady state equations for one-dimensional flow of conducting medium through channel of MHD generator in homogeneous magnetic field 22 p3952 A66-39692
- Two-phase cold-flow modeling analysis for rocket nozzle, noting deviations from one-dimensional flow for static pressures on nozzle shape [AICE PREPRINT 44F] 22 p3971 A66-39881
- Equation for calculating entrainment ratio of ejectors as function of velocity numbers of two frictionless one-dimensional streams flowing side by side in pressure equilibrium 22 p3899 A66-40371
- Partition function for tunnel model of rigid disks evaluated in asymptotic limit of reduced volume, including close-packed value of closed systems area 22 p3949 A66-40913
- Plasma flow processes in slip type traveling wave accelerator investigated to determine degree to which one-dimensional channel flow is used in design and scaling laws 23 p4053 A66-41917
- ONSAGER PHENOMENOLOGICAL COEFFICIENT**
- Statistical correlation theory for extending Onsager symmetry relationship to nonisolated systems, discussing equilibrium and reversibility conditions 18 p3117 A66-33554
- Thermodynamics problems when applied to continuum mechanics deformations, noting Onsager theory 23 p4096 A66-41942
- OPERATION**
- S EXTRAVEHICULAR OPERATION**
- S PREFLIGHT OPERATION**
- OPERATIONAL CALCULUS**
- Multiplier operators and quotient algebra 05 p0707 A66-15031
- Complete solution of problem of branching of solution of nonlinear equation in multidimensional case 07 p1056 A66-17601
- Asymptotic behavior of solutions of boundary value problem for second-order elliptic equations 07 p1056 A66-17602
- Operational calculus for finite rings employing Galois fields for periodic sequences via transfer function 11 p1678 A66-23242
- Operational calculus in determining strength and deflection of materials [PST PAPER NT-147] 14 p2401 A66-27791
- Series expansion of inversion of n-dimensional Laplace transforms in terms of ultraspherical polynomials having coefficient computed recursively 19 p3392 A66-36784
- OPERATIONAL HAZARD**
- Operational safety analysis techniques according to MIL-S-38130 for aerospace systems 01 p0169 A66-10070
- Aid to air navigation problem discussing reliability and accuracy, hybrid system, redundancy and credibility, display, operational environment and navigation technique 02 p0256 A66-11966
- In-flight monitoring of advanced aircraft, discussing system requirements and constraints [ISA PREPRINT 1.3-2-65] 05 p0684 A66-15512
- OPERATIONAL PROBLEM**
- Assault helicopter cost and system effectiveness in mission of delivering cargo from carrier to landing zone, evaluating avionics system [AIAA PAPER 64-785] 05 p0610 A66-15079
- Ground system design, data processing, digital command and digital-human interface in flight operations problems for unmanned spacecraft on planetary exploration mission 13 p2190 A66-25257
- Space system operational requirements for maintainability, noting design principles for spacecraft, boosters, support equipment, crew safety, etc 16 p2681 A66-30662
- Operational methods of semiconductor switching circuits in pulsed powered circuit /PPC/ mode for reduced power consumption 18 p3090 A66-34070
- Built-in tests and periodic testing at field shop level applied to avionic systems operational readiness 19 p3339 A66-35504
- Oscillation of oscillator with elastically hereditary and weakly nonlinear characteristics, applying operational method to analysis in terms of hereditary creep theory 19 p3476 A66-36840
- Digital computer processing of Tiros, Nimbus and Essa vidicon cloud pictures for machine nephanalyses, discussing rectification orbital mosaics and calibration effects for future Essa flights 22 p3943 A66-40055
- Operational effectiveness and maintainability verification for surveillance and control systems influence by quantitative reliability 24 p4179 A66-42094
- OPERATIONS RESEARCH**
- Operational research techniques applied to procurement and capital investment programs of aviation industry 01 p0170 A66-10341
- Response of hypersonic aircraft to abrupt control displacements, determining vehicle characteristics, design and operational parameters 09 p1330 A66-20739
- Past and future of cost effectiveness, noting actions needed to implement growth 11 p1790 A66-23446
- Mathematical models for logistics planning providing complete analysis of requirements through computer simulation 14 p2245 A66-27122
- Titan II operational base management, organization and responsibilities, noting logistic requirements, concurrency problems, etc 14 p2416 A66-27123
- Commercial air transport in 1972, discussing operating economics, management planning, maintenance costs, etc [SAE PAPER 660321] 14 p2223 A66-27300
- Operations of CNES station network including work program, controlling development and data collection and verification received from satellites 14 p2270 A66-27551
- Reliability-maintenance relationship including accessibility, design, crew duty cycle, and equipment failure rates, number of restorations, etc, in long-duration manned missions 15 p2606 A66-28804
- Systems integration in helicopters, discussing design history, equipment used, operational features, etc 17 p3040 A66-32729
- Mathematical model of supply support for space operations 19 p3339 A66-35397
- Systems phenomena representation by time-phased sequence of complementary activities 19 p3467 A66-35398
- Alternate mode of operation for minimizing occurrence of delays caused by launch support equipment failures for Saturn manned missions 20 p3542 A66-37243
- Annotated bibliography on R and D management with book abstracts 20 p3683 A66-37732
- Product performance model for predicting system effectiveness satisfying restrictions on time, money and input data 20 p3566 A66-37884
- System effectiveness and achievement levels, discussing difficulties in application to mission requirements 20 p3566 A66-37885

VTOL operational availability computer simulation model, studying initial and tradeoff design, maintenance, logistics, manpower and flight operational requirements 20 p3543 A66-37909

OPERATOR

SA BERGMAN OPERATOR
SA DIFFERENTIAL OPERATOR
SA HAMILTONIAN
SA INTEGRAL OPERATOR
SA LAPLACE OPERATOR
SA RAYLEIGH-RITZ METHOD
SA STURM-LIOUVILLE OPERATOR

Generalized extensions of operators for mapping everywhere dense linear set onto generalized set of Hilbert space elements 05 p0708 A66-15329

Invariance provided for in nonlinear control systems by reducing problem to construction of inverse operator 05 p0709 A66-15342

Properties of n-pl operators and np operators 06 p0903 A66-16905

Complete resolution of concentrated load of limiting contour, determining spectrum of functional linear operator attached to interior region 06 p0967 A66-17061

Discreteness and continuity conditions for spectrum of self-adjoint operator generated by differential equations system 08 p1245 A66-19371

Existence theorems for nonlinear equations having indefinite and potential operators 10 p1551 A66-21977

Green function of high degree of self-adjoint expansion of elliptic operator generated by differential expression is smooth inside domain and on smooth part of boundary 14 p2321 A66-27161

Regularity properties of functions from domains of definition of minimum and maximum operators for general elliptic problem with inhomogeneous boundary conditions 14 p2321 A66-27162

Invariance provided for in nonlinear control systems by reducing problem to construction of inverse operator 15 p2530 A66-29977

Harmonic analysis of accuracy of reproduction in digital form of operators selecting period of time quantization, duration of analog-to-digital conversion, etc 16 p2669 A66-30758

Generalized extensions of operators for mapping everywhere dense linear set onto generalized set of Hilbert space elements 16 p2735 A66-30967

Fractional powers of linear operators role in linear and nonlinear elliptic and parabolic equations, Fourier series in eigenfunctions of elliptic operators, etc 16 p2736 A66-30978

Discreteness and continuity conditions for spectrum of self-adjoint operator generated by differential equations system 16 p2736 A66-30979

Perturbation function expansion in power series of eccentricities in elliptical three-body problem, describing algorithm for numerical values of Newcomb operators of arbitrary order and giving tables for Ljach series expansions 17 p2995 A66-31850

Existence theorems for nonlinear equations having indefinite and potential operators 19 p3390 A66-36187

Elliptic singular integro-differential operators on smooth compact manifold without and with boundary 21 p3756 A66-38626

Eigenvalue problems with monotonic operators and error estimation for operator equations with continuous homogeneous operators in semilordered normalized vector space 21 p3757 A66-38942

Integral equation solution through Jacobi polynomials employed as eigenfunctions of certain operators 22 p3941 A66-40798

Analog of Galerkin method for solving boundary value problems and quasi-linear operator equations 23 p4086 A66-41569

OPERATOR PERFORMANCE

SA ASTRONAUT PERFORMANCE
SA PILOT PERFORMANCE

Optimal control display relationships in general tracking including piloting and radar tracking operation 03 p0329 A66-13349

Performance sharing when two audio visual vigilance tasks are performed concurrently 11 p1646 A66-23374

Existence of response-response compatibility effects in simple perceptual-motor task where simultaneous two-hand pointing responses were required 12 p1808 A66-23925

Behavior of human operator as link in servosystem in tracking and compensation regimes, determining transfer function under steady state and perturbed conditions 12 p1851 A66-24316

Manual closed-loop control systems analysis, discussing operator dynamics for permanent procedural variables 12 p1855 A66-24641

Information display techniques for man-machine system 14 p2229 A66-26916

Human capability of tracking moving target while subject to pitch and roll onboard space ship [ASME PAPER 66-HUF-10] 14 p2229 A66-26968

Probability-statistics analytic human-operator model in control systems analysis 14 p2263 A66-27108

Performance of human operators in three-state relay control system with velocity augmented displays 16 p2644 A66-31270

Quantitative identification of situational variables affecting system operator-control performance 17 p2865 A66-32184

Mathematical model for systems comprising human operator controlling typical controlled elements, noting behavior variability and performance estimation of mean-squared error in tracking 20 p3508 A66-36861

Computer model analysis of functional relationships of human operator information handling and control in closed loop tracking situation 20 p3509 A66-37236

Mechanical prediction display to improve human behavior in control system 21 p3700 A66-38454

Human operator transfer function capability bounds and system stability characteristics and performance 22 p3858 A66-40252

Human operator behavior following step change in controlled element, determining limitations on operator descriptions and measurement methods which might be employed 22 p3858 A66-40253

Vigilance training for signal detection 22 p3858 A66-40858

Psychomotor test equipment, describing Two-hand Device, Reaction Sensing Device and Rudder Control Test 23 p4029 A66-41042

Nonlinearity and time variability dynamic models of human operators in manual control systems 23 p4029 A66-41574

INTERNAL CAROTID ARTERY INSUFFICIENCY IN NEURO-OPHTHALMIC AND AEROMEDICAL IMPLICATIONS, NOTING OPHTHALMO-DYNAMETRY IN FLIGHT QUALIFICATION 24 p4164 A66-42457

INDIRECT TRANSITION AND TEMPERATURE DEPENDENCE OF ABSORPTION LIMIT IN SINGLE CRYSTAL CADMIUM SULFIDE 01 p0128 A66-11006

Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 05 p0731 A66-14656

UV optical absorption of cobalt and nickel in thin films 05 p0737 A66-15110

Electric field effect on optical absorption edge, discussing exponential tail influence on magnitude of absorption coefficient 05 p0741 A66-15869

Shift of optical absorption edge toward longer wavelengths under strong electric field in silicon p-n junction 06 p0923 A66-16184

Optical absorption of metal films in region of transformation to dielectric, discussing valence and conduction band separation mechanism 06 p0924 A66-16518

Photoabsorption cross section of atomic hydrogen obtained by flowing molecular hydrogen through discharge tube 06 p0913 A66-17042

Multisource thermally evaporated III-V semiconductor films and applicability to optical component control layers and interference filters 07 p1092 A66-17289

Intrinsic optical absorption in indium phosphide single crystals mechanically polished and plotted vs photon energy 07 p1095 A66-17318

Optical absorption in germanium in region of forward transition with spectral transmission curve having structure in form of two minima 08 p1274 A66-19316

Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 09 p1411 A66-19944

Effect of electric field and crystalline dimensions on position of optical absorption edge in cadmium sulfide thin films obtained by vacuum deposition 09 p1412 A66-19995

Optical radiation absorption and attenuation by atmosphere polluted with carbon dust, including transmission coefficient calculation 09 p1402 A66-20313

Optical absorption of metal films in region of transformation to dielectric, discussing valence and conduction band separation mechanism 09 p1431 A66-20899

Optical absorption and photoemission of cubic potassium antimonide 10 p1576 A66-21548

Optical properties of indium oxide, noting direct and indirect transitions in thin films and crystal plates, absorption coefficient as function of photon energy, etc 10 p1577 A66-21560

Boron, Volume 2, Preparation, properties and application 10 p1579 A66-21718

Semiconductor properties including conductivity, resistivity, band gap, optical absorption, etc, analyzed on very pure and doped beta-rhombohedral boron 10 p1579 A66-21719

Trap dominated conductivity changes and optical absorption phenomena in near IR in crystalline beta-rhombohedral boron 10 p1580 A66-21723

Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 10 p1587 A66-22150

Optical interstellar absorption lines and galactic structure, noting observational data and comparison with 21 cm studies 11 p1767 A66-22258

Optical constants of thin films deposited on nonabsorbing window obtained by Kramers-Kronig method 11 p1755 A66-22871

Constant electric field effect on transverse dielectric constant of semiconductor 12 p1926 A66-23714

Optical absorption and dielectric loss measurements in KCl doped SrCl sub 2 single crystals, determining involvement of impurity vacancy dipolar complexes in optical conversion of F centers to Z centers 12 p1926 A66-23718

Coupling of ordinary and extraordinary electromagnetic waves in CdS induced by external magnetic field or stress 12 p1926 A66-23719

Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 13 p2167 A66-25931

Absorption spectra in optical region when laser radiation and continuous radiation are simultaneously incident on molecular medium 13 p2133 A66-26161

Electrical breakdown of gases by optical frequency radiation, noting laser beam attenuation and subsequent energy absorption by plasma 13 p2134 A66-26190

Inverse variation of external efficiency of incoherent radiation in GaAs diode with temperature due to increased absorption, noting constancy of quantum efficiency 13 p2105 A66-26570

UV absorption and dispersion of cadmium sulfide crystals and energy band structure 14 p2356 A66-27064

Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 14 p2356 A66-27067

Optical absorption, energy level structure and exchange interactions of cobalt and sodium cobalt fluoride ions 14 p2357 A66-27075

Optical absorption in semiconductors with impurity center participation in external magnetic field 14 p2358 A66-27082

Field-effect-modulated optical absorption spectrum for various values of Ge surface potential 14 p2366 A66-27765

polished and plotted vs photon energy 07 p1095 A66-17318

Optical absorption in germanium in region of forward transition with spectral transmission curve having structure in form of two minima 08 p1274 A66-19316

Indirect transition and temperature dependence of absorption limit in single crystal cadmium sulfide 09 p1411 A66-19944

Effect of electric field and crystalline dimensions on position of optical absorption edge in cadmium sulfide thin films obtained by vacuum deposition 09 p1412 A66-19995

Optical radiation absorption and attenuation by atmosphere polluted with carbon dust, including transmission coefficient calculation 09 p1402 A66-20313

Optical absorption of metal films in region of transformation to dielectric, discussing valence and conduction band separation mechanism 09 p1431 A66-20899

Optical absorption and photoemission of cubic potassium antimonide 10 p1576 A66-21548

Optical properties of indium oxide, noting direct and indirect transitions in thin films and crystal plates, absorption coefficient as function of photon energy, etc 10 p1577 A66-21560

Boron, Volume 2, Preparation, properties and application 10 p1579 A66-21718

Semiconductor properties including conductivity, resistivity, band gap, optical absorption, etc, analyzed on very pure and doped beta-rhombohedral boron 10 p1579 A66-21719

Trap dominated conductivity changes and optical absorption phenomena in near IR in crystalline beta-rhombohedral boron 10 p1580 A66-21723

Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 10 p1587 A66-22150

Optical interstellar absorption lines and galactic structure, noting observational data and comparison with 21 cm studies 11 p1767 A66-22258

Optical constants of thin films deposited on nonabsorbing window obtained by Kramers-Kronig method 11 p1755 A66-22871

Constant electric field effect on transverse dielectric constant of semiconductor 12 p1926 A66-23714

Optical absorption and dielectric loss measurements in KCl doped SrCl sub 2 single crystals, determining involvement of impurity vacancy dipolar complexes in optical conversion of F centers to Z centers 12 p1926 A66-23718

Coupling of ordinary and extraordinary electromagnetic waves in CdS induced by external magnetic field or stress 12 p1926 A66-23719

Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 13 p2167 A66-25931

Absorption spectra in optical region when laser radiation and continuous radiation are simultaneously incident on molecular medium 13 p2133 A66-26161

Electrical breakdown of gases by optical frequency radiation, noting laser beam attenuation and subsequent energy absorption by plasma 13 p2134 A66-26190

Inverse variation of external efficiency of incoherent radiation in GaAs diode with temperature due to increased absorption, noting constancy of quantum efficiency 13 p2105 A66-26570

UV absorption and dispersion of cadmium sulfide crystals and energy band structure 14 p2356 A66-27064

Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 14 p2356 A66-27067

Optical absorption, energy level structure and exchange interactions of cobalt and sodium cobalt fluoride ions 14 p2357 A66-27075

Optical absorption in semiconductors with impurity center participation in external magnetic field 14 p2358 A66-27082

Field-effect-modulated optical absorption spectrum for various values of Ge surface potential 14 p2366 A66-27765

Absorption bands in thin lead films, vacuum prepared, considering general analysis of elements in group IVA of periodic table 14 p2369 A66-28271

Absorption coefficient change due to electric field measured for indirect absorption edges of silicon and germanium, determining energies of phonons taking part in indirect optical absorption 16 p2775 A66-30728

Model potential consisting of Coulomb potential and linear terms in electric field potential, obtaining eigenfunctions of model and deriving optical absorption coefficient for electric field excitons 16 p2775 A66-30729

Interband optical absorption in germanium in crossed electric and magnetic fields, noting band perturbation theory, differential spectra, Stark broadening, experimental techniques, etc 16 p2776 A66-30736

Paramagnetic iron and chromium ion impurities effect on absorption spectrum and microhardness of rutile single crystals 16 p2786 A66-31733

Optical absorption and reflectivity of single crystals of strontium fluoride and cadmium fluoride in far UV 17 p2974 A66-31844

Optical transition probability and broadening cross section obtained from absorption measurements in carbon dioxide and mixtures with other gases 17 p2933 A66-31938

Radiation pressure on vanes of rotary actuator of spacecraft radiation orientation system 19 p3467 A66-35293

Optical absorption of island films of gold as function of island density obtained from electron micrographs and film thickness 19 p3435 A66-35416

Indium antimonide optical absorption shift, forbidden band narrowing and tin alloying induced by neutron bombardment 19 p3440 A66-35764

Optical absorption edges with nearly parallel bands of aluminum analyzed for all polyvalent metals with simple structures 19 p3401 A66-36391

Weak field effective mass approximation calculations of absorption coefficient in presence of electric field for transitions at normal threshold extended to arbitrary orientation of electric field in solid 19 p3447 A66-36397

Superconductor electromagnetic absorption in energy gap region, examining gap anisotropy, multiple gaps, precursor absorption and magnetic perturbation effect on optical absorption spectrum 20 p3615 A66-37281

Optical absorption spectra of cobalt ion in magnesium aluminate crystal 20 p3621 A66-37822

Temperature-modulated optical absorption in Si, GaAs, CdS and potassium tantalate semiconductors 20 p3623 A66-38389

Light scattering influence on effective value of extinction coefficient considered as function of optical parameters of medium and of angular characteristics of source and receiver 21 p3760 A66-39361

Absorption and scattering effects on measurements of optical rotation in polarimeters studied to account for optical activity in Orgueil meteorite 21 p3816 A66-39490

UV absorption and dispersion of cadmium sulfide crystals and energy band structure 22 p3966 A66-40823

Spectral distribution of photosensitivity of gallium arsenide p-n junctions in near UV region 22 p3966 A66-40826

Optical absorption in semiconductors with impurity center participation in external magnetic field 22 p3967 A66-40838

Optical depths of titanium I absorption lines in solar spectrum 22 p3984 A66-40853

Parallel and transverse magnetic field effects on electric field induced optical absorption at photon energies below direct gap in Ge 23 p4109 A66-41036

OPTICAL AMPLIFIER

Selective saturation of organic dyes by monochromatic light for high speed switches and optical pulse amplifier 04 p0533 A66-14329

Ruby laser amplifier at liquid-nitrogen temperature treated as three-medium transmission system, noting gain change

with negative attenuation 11 p1712 A66-22867

Spatial variation of electric field in amplifying CdS measured, using electro-optic effect to study acoustic flux from thermal noise 11 p1758 A66-23356

Ruby laser amplifier dynamics, noting amplification in energy gain regimes and correlation to theoretical equations 13 p2089 A66-25049

Electronic components for microwave power engineering, employing electromagnetic amplifying lens, microwave rectifiers, etc 13 p2039 A66-25784

Amplification of interaction of atoms and of pulsed or periodic cooling of transparent media produced by laser beam, noting changes in kinetic energy of atoms 13 p2093 A66-26021

Steady state variation of light intensity with distance for monochromatic light, noting dependence of absorption coefficient on degree of excitation of electronic system 13 p2099 A66-26183

Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 14 p2307 A66-27195

Single cavity microwave laser amplifier analysis, determining gain, bandwidth, noise, cavity Q-factor effect and width of magnetic resonance line 20 p3578 A66-37583

Spontaneous emission noise power added to amplified signal in laser amplifier in He-Xe gas discharge and saturation relation to population inversion 20 p3581 A66-38387

Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 24 p4226 A66-43093

OPTICAL BEAM SCANNING

Parametric fluctuations of spatially restricted light beam in turbulent atmosphere 02 p0191 A66-11838

Angular scanning of laser beam forming multiple beam phased array, making use of time coherence 03 p0377 A66-12445

Measurements of maser beam propagated through atmosphere, emphasizing beam broadening and signal fluctuation due to clear air turbulence 15 p2448 A66-28581

Perspective rendering of field intensity diffracted at circular aperture with reference to laser-scanning technique 15 p2499 A66-28843

Acquisition and reacquisition in spacecraft-spacecraft and spacecraft-to-Earth communications using laser systems 18 p3067 A66-33795

Optical deflection of light beams via Kerr effect, ultrasonic waves, piezoelectric crystals and mirror 22 p3877 A66-40293

Laser beam deflection and scanning techniques 24 p4175 A66-42817

OPTICAL CORRECTION PROCEDURE

SA LENS DESIGN

Interferometry with holographically reconstructed comparison beam discussing principles, techniques and error sources 04 p0521 A66-13985

Optical heterodyne system, discussing angular alignment reduction by signal beam focusing to Airy pattern 05 p0695 A66-14912

Optical system of RM-700 astronomical telescope, analyzing prime focus and Cassegrain focus 05 p0680 A66-15206

Deformation calculation of RM-700 telescope mounting 05 p0680 A66-15207

Three-directional optical square, used with alignment telescope, establishes three mutually perpendicular lines-of-sight in one instrument setting 06 p0878 A66-16014

Computer method calculation of minimum time track, using quasi-optical law of refraction 07 p1066 A66-17681

Adjustment procedure for laser with polygonal resonator, noting spatial mirror adjustment in addition to angular adjustment 13 p2090 A66-25323

Optical system correction through coefficient selection of aspheric surface, computing vector sums of all aberration orders to give spot diagrams and light distribution in image 14 p2334 A66-27317

Spherical aberration correction by grinding concave mirror to generate aspheric contour 15 p2498 A66-28826

Aspheric and other irregular curve generation, using ordinary

machinery 15 p2509 A66-28827

Geometrical quality of elements of exterior orientation after double and single point resection in space, noting position determining characteristics of linear and angular parameters 16 p2704 A66-30515

Optical rectification and gridding of satellite photographs for low and high tilt angles, describing equipment design, application and results 17 p2927 A66-33345

OPTICAL COUPLING

GaAs optically coupled transistor structure with lasing emitter 03 p0377 A66-12442

Fused silica output coupling component for laser system, using frustrated total internal reflection configuration 07 p1040 A66-17287

Optically coupled linear circuit techniques, discussing GaAs p-n junction diode, noncoherent light emitters and silicon p-n junction photosensors 13 p2036 A66-25521

Phase locking of one laser to another by direct injection of first laser beam into second laser cavity 13 p2105 A66-26593

Fabry-Perot etalon use for interferometry and laser control, noting low angle scattering, laser oscillation, thermal tuning sensitivity, etc 17 p2925 A66-32619

Moire fringe precision angle transducer 19 p3355 A66-35502

Nonreciprocal effects associated with excitation current observed in DC-excited He-Ne ring laser, noting coupling phenomena between right and left waves 20 p3577 A66-37408

Optical coupling using gallium arsenide laser for variation of frequency of diode emission through small change in current density 21 p3746 A66-38920

Time dependency of phase difference of two weakly coupled nonlinear optical oscillators, considering coupling of two traveling waves in laser 24 p4220 A66-42257

Radiation interaction between laser oscillators with different active materials and frequencies 24 p4221 A66-42549

Mode coupling in ruby laser with reactance placed within cavity resonator with modulation frequency close to separation of axial modes, examining electric field envelope 24 p4223 A66-42565

OPTICAL DENSITY

Gamma irradiation intermediates of polyamide MXD-6 examined, using electron spin resonance and optical spectroscopy 08 p1243 A66-19065

Source function of inhomogeneous optically dense plasma layer determined, using Ritz method 08 p1265 A66-19309

Multiparametric diagnostic technique for optically dense plasma 23 p4102 A66-41451

Laser system for meteorological data using oscilloscope to display return signal, translated as concentrations of matter or aerosols 24 p4226 A66-43044

OPTICAL EMISSION

Sunspots, plages, coronal activity, flares, prominences and emission of coronal rays in solar center activity 03 p0420 A66-12842

Optical solar flare characteristics and observation by spectroheliograph 03 p0421 A66-12843

Modes of emission-vs-time spectrum, optical emission spectrum and superposition spectrum of short confocal ruby laser in near field 04 p0532 A66-14290

Light flow amplification in inhomogeneous layer taking nonlinearity into account 05 p0692 A66-14725

Time dependent emission behavior of ruby laser discussing rate equations, Q-value, output power, steady state values, etc 05 p0696 A66-14981

Inverse stimulated Raman spectra during Stokes absorption in terms of stimulated emission of optical phonons 05 p0697 A66-15108

Intensity distribution of radiation immediately after leaving laser and after focusing within lens, noting optimum focusing conditions 05 p0698 A66-15853

Optical emission induced in gallium arsenide samples by bombardment with high energy electron pulses 07 p1096 A66-17338

Time dependent emission behavior of single axial mode of diffraction limited ruby laser at room temperature 09 p1386 A66-20420

Radiated power from modulated electron

beam passing near diffraction grating surface 10 p1557 A66-21567

Optical excitation due to impact of very slow helium ions on Ar and Kr attributed to transfer of kinetic energy into internal electron energy 11 p1740 A66-22971

Optical excitation in indium arsenide and gallium antimonide yielding laser radiation 13 p2090 A66-25438

Optical emission from ruby induced by short pulses of relativistic electrons in which electron-hole recombination produces excitation of emission 13 p2098 A66-26173

Electrical breakdown of gases by optical frequency radiation, noting laser beam attenuation and subsequent energy absorption by plasma 13 p2134 A66-26190

Ruby phosphorescence under intense optical excitation, inferring possible recombination characteristics from initial brightness decay 15 p2558 A66-28607

Nonlinear coefficients of refraction for self-trapping of optical beams in all media including vacuum 15 p2514 A66-29031

Steady state distribution functions for photoexcited carriers in semiconductors bands determined by competition between intraband intercarrier collisions and recombination processes 18 p3154 A66-33919

Transition radiation in optical region of spectrum for case of oblique incidence of nonrelativistic electrons on metal surface 19 p3399 A66-35593

Optical phonon production, showing existence of electric field strength range at low temperature scattering in which phonon emission results in electron stoppage 20 p3577 A66-37376

Stimulated two quantum radiation in optical range for transitions occurring between discrete levels of impurity crystals or free atoms 20 p3577 A66-37377

Optical emission energy of solar flare and plasma cloud acceleration producing geomagnetic storm 20 p3635 A66-38215

Cryogenic optically excited recombination emission in single crystal InSb semiconductor and transitions involving phonon creation, acceptor impurities and band-to-band emissions 21 p3800 A66-38996

Invariant imbedding and scattering of light in one-dimensional medium with moving boundary, noting relaxation of photon emission and Doppler frequency shift 23 p4087 A66-41540

Photographic measurement on optical radiation associated with hypervelocity impact of projectile on target 23 p4091 A66-41909

OPTICAL EMISSION SPECTROSCOPY

Laser oscillations and self Q-switching, discussing pulsed flash-lamp excitation experiments with triply activated confocal barium crown glass etalon 04 p0531 A66-13980

Electron density measurements in transient plasma using resolution repeater rapid-scan spectrograph 05 p0677 A66-14914

Slab with periodically modulated refractive index, predicting short wave radiation pattern emitted 06 p0836 A66-16983

Fast-acting nonselective light emission receiver for wavelengths from 250 to 800 millimicrons 08 p1223 A66-19286

Optical laser pumps, high power CW laser operation by cathodoluminescence and suitable selection of phosphors 08 p1234 A66-19546

Lifetimes of orientation and alignment of excited atomic states examined in level crossing and optical double resonance experiments employing polarized light 11 p1740 A66-22969

Light output of shock wave interacting with metallic powder in oxidizing atmosphere 13 p2016 A66-25058

Atomic ionization by intense optical field, noting ruby laser-pulse effect on inert gas between electrodes 13 p2134 A66-26189

INP spontaneous and simulated emission spectra, noting separation of lines by longitudinal optical phonon energy, threshold current magnitude, etc 17 p2886 A66-32407

Spectral characteristics of two-photon optical excitation and light emission from CdSe semiconductor laser with modulated Q-factor 20 p3578 A66-37565

OPTICAL EQUIPMENT

Automatic coordinating measuring equipment using Moire fringes used to record flight paths of rockets 01 p0070 A66-10914

Electroless nickel plating using hypophosphite as means of producing coatings with smooth hard surface for metal mirror blanks for solar simulation 02 p0233 A66-11235

Design and fabrication methods of semiconductor optoelectronic devices, noting junction emitter outputs into visible spectrum 04 p0494 A66-13764

Periodic gas lenses, discussing structure ray optics properties of alternating gradient focusing systems 05 p0717 A66-15180

Optical systems with improved aperture ratios, noting concentric optical system with corrected chromatic aberrations for photographing meteors, satellites, auroras, etc 05 p0679 A66-15203

Applied Optics and Optical Engineering, Volume 2 06 p0909 A66-16557

Multisource thermally evaporated III-V semiconductor films and applicability to optical component control layers and interference filters 07 p1092 A66-17289

Microwave antenna simulation at optical frequency, using neon-hellum continuous gas laser 11 p1662 A66-22539

Apparatus producing monochromatic radiation for measuring reflection and transmission coefficients composed mainly of semiconductor multiplier and quasi-optical system separating radiation of individual harmonics 11 p1708 A66-23288

Orbiting eye /space telescope/ construction featuring membrane optics with smooth and symmetric surfaces, inflatable body and laser transceiver 12 p1876 A66-23646

Optical guides stressing lens type beam waveguide 13 p2022 A66-25538

Progress in optics, Volume 5 14 p2330 A66-26962

Optical beam deflection technique using interferometer cavity illuminated by gas laser beam 15 p2512 A66-28689

High quality optical pinholes of 100 to 0.08 micron diameter in metal films of arbitrary thickness 15 p2499 A66-28842

Photographing of satellites, using optical system and image converter for determining coordinates 15 p2453 A66-30002

Optical-electronic components for signal transmission, considering light emission diodes and silicon control switches 19 p3283 A66-36813

Monograph on TV transmissions from space covering application to space missions, geodetical studies and existing and planned facilities 20 p3561 A66-38031

OPTICAL FILTER

SA INFRARED FILTER

IR spectroscopic instrument modifications and innovations, noting filter grating permitting measurement in far IR 02 p0230 A66-11794

Multiple light filter narrowing emission bands of ruby laser with multiplex resonator 03 p0378 A66-12627

Optical ultrasonic delay lines as correlators and variable code matched filters to achieve large time-bandwidth products and high data rates 05 p0631 A66-14821

New optics techniques including interference filters, lasers and optical fibers 08 p1255 A66-19118

IR planet horizon sensor design, noting filter for uniform radiance, wide angle lens and special detector 11 p1706 A66-22891

Hybrid narrow band filter compared with Lyot filter, noting long-term instability and need for temperature control 11 p1706 A66-22892

Self-calibration and automatic correction for wavelength response of monochromator-filter-detector system 14 p2292 A66-27323

Selection and processing of IR materials and optical glass, discussing similarities and differences between specification and fabrication techniques 15 p2524 A66-28829

Airglow continuum measurement with birefringent filter 15 p2484 A66-28837

Calibration of birefringent filter photometer 15 p2499 A66-28845

Quasi-optical iterated-dielectric-slab

rectangular waveguide filters for millimeter and submillimeter wavelengths 15 p2462 A66-29022

Laser operated with saturable filter for Q-switching, noting two modes of excitation /soft and hard regime/ 17 p2934 A66-32314

Transmission characteristics of Fabry-Perot aluminum-magnesium fluoride-aluminum interference filters in far UV region, noting preparation methods, optical properties, etc 17 p2958 A66-32617

Improved processing of moire data by use of numerical and optical filters to eliminate noise in moire patterns 18 p3134 A66-33716

Computer programs for generalized orthonormal optimization problems and variations such as multilayer optical filter design 19 p3308 A66-35869

Electromagnetic interference from pulse circuits, switches and relays produced by photo-optical control systems 21 p3709 A66-38608

Gallium arsenide crystal properties for use in optical filter 22 p3959 A66-39773

Wide stop bandwidths from quasi-optical filters formed from iterations of dielectric slabs demonstrated at millimeter wavelengths 22 p3877 A66-40181

Pulse compression using diffraction gratings and frequency sweeps of 30 mc in quartz crystal ultrasonic transducer 23 p4034 A66-41017

Liquid filter cell for telescopes, using half-saturated solution of cupric sulfate to block red leak of UG filter glass 23 p4071 A66-41927

OPTICAL GENERATOR

Multiphonon absorption in laser GaAs and ruby crystal of optical generator 02 p0241 A66-11727

CdS single crystal optical generator during excitation by ruby laser, discussing two-photon absorption coefficient at 300 degrees K for radiation flux densities 04 p0529 A66-13874

Second harmonic light generated on reflection of giant-pulse laser beam from surface of silver mirror 06 p0921 A66-16072

Generation in cadmium sulfide during two-photon optical excitation by ruby laser with modulated Q-factor 08 p1277 A66-19620

Optical second harmonic generation in focus of lowest transverse mode of continuous wave Gaussian gas laser beam 10 p1541 A66-21175

Consistent theory of nonlinear optical effects in bounded light beams by extending parabolic equations to nonlinear problems 12 p1891 A66-24888

Second optical harmonic generation equations for steady state laser derived from density matrix 13 p2092 A66-25682

Neodymium-doped yttrium-aluminum garnet crystal laser oscillator as regenerative amplifier of noise 13 p2103 A66-26212

Density operator of optical maser quantized by radiation, with application to laser oscillators 13 p2103 A66-26215

Vector synchronism and second-harmonic light generation in focused beams 14 p2307 A66-27191

CdS single crystal optical generator during excitation by ruby laser, discussing two-photon absorption coefficient at 300 degrees K for radiation flux densities 14 p2308 A66-27576

Generation in cadmium sulfide during two-photon optical excitation by ruby laser with modulated Q-factor 17 p2936 A66-33134

Coherent laser-type light generators with capability of adjusting frequency over visible spectrum 19 p3375 A66-36265

Coherent radiation generation in IR region by nonlinear optics method 20 p3582 A66-38429

Coherent radiation generation in IR region by nonlinear optics methods 21 p3746 A66-38962

Consistent theory of nonlinear optical effects in bounded light beams by extending parabolic equations to nonlinear problems 23 p4076 A66-41095

Vector synchronism and second-harmonic light generation in focused beams 24 p4226 A66-43089

OPTICAL HETERODYNE

Light scattering theory and generation of second harmonic in plasma in external

magnetic field 04 p0555 A66-14333
Automatic frequency control of laser local oscillator for heterodyne detection of laser signal and use of 2.5 gc frequency offset to permit retrieval of microwave 05 p0633 A66-14908
Optical heterodyne system, discussing angular alignment reduction by signal beam focusing to Airy pattern 05 p0695 A66-14912
Beat signal dependence on angular spread of oscillations in light waves heterodyning with incoherent light source 06 p0889 A66-15898
Power loss of optical-heterodyne system with angle tracking in signal propagation through turbulent medium 08 p1185 A66-19701
Optical signal reception, considering use of HF subcarrier superimposed on light signal and bias-sensitive crystal detector for mixing process between subcarrier and local oscillator, deriving signal to noise ratios 09 p1346 A66-20567
Carbon and ethylene tetrachloride ultrasonic modulators applied to IR laser heterodyne experiments on InAs photodiode 11 p1714 A66-23353
Parameter dependence of intermediate frequency voltage indicated during establishment of optimum conditions for optical receivers and merit of subcarrier mixing 12 p1832 A66-23960
Balanced mixer for heterodyning light of two different frequencies from independent sources to obtain intermediate frequency in microwave region 12 p1890 A66-24143
Balanced mixer action for optical heterodyning, using Magic-T optical mixer 12 p1890 A66-24153
FM laser and optical heterodynes in optical communication systems 13 p2093 A66-26004
Light frequency multipliers for nonlinear optical effects at various wavelengths, considering focusing, laser beam finite divergence, air breakdown, stimulated Raman emission, etc 13 p2096 A66-26146
Extension of three-field mixing theory to include effects of convective nonlinearities on excitation in plasma, using correlation function of spectral densities for interpretation of thermally enhanced light-by-light scattering 13 p2132 A66-26151
Nonlinear optical effects in plasma, optical mixing of three light beams and scattering of light-by-light, noting dominant Raman scattering 13 p2132 A66-26152
Optimum processing of photocell output to produce Poisson photoelectron flux 14 p2242 A66-28156
Laser application for vibration measurement utilizing Doppler shift produced on wave reflected from surface vibrating normal to beam 19 p3356 A66-35673
Second harmonic frequency generation obtained in process of optical mixing of collinear neodymium laser beams in potassium dihydrogen phosphate 20 p3578 A66-37550
Energy-and heterodyne-detection techniques compared in pulsed optical radar applications 23 p4037 A66-41311
Laser Doppler velocimeter for gas and liquid flow velocity measurement 24 p4211 A66-42557
Optical heterodyne receiver antenna properties, noting effective aperture of capture cross section vs directional tolerance and detection of doppler shifts in liquid scattered coherent light 24 p4174 A66-42809
OPTICAL ILLUSION
Visual contours in homogeneous space, describing Julesz figure application to problems of stereoscopic vision 06 p0811 A66-16348
Illusion theory to explain difference between true motion of figure and apparent motion, emphasizing geometric effect in changes in retinal images 20 p3504 A66-36945
OPTICAL IMAGE
SA IMAGE CONTRAST
SA RETINAL IMAGE
Determination of contrast range of optical images obtained in aerial camera as function of atmospheric and optical factors 03 p0368 A66-12504
Effect obtained by rotating holograms,

noting image inversion when rotating hologram 180 degrees about vertical axis in hologram plane 06 p0881 A66-16676
Photoelectric storage tube capable of long term integration of faint optical images, employing as storage target low density layer of KCl for increased charge multiplication 06 p0883 A66-17017
Scanning slit across point or line spread function in determination of radial irradiance distribution 07 p1081 A66-18041
Lens centering errors effect on optical image quality and wave front aberration 08 p1255 A66-19220
Concentric circular grid method of testing for aberrations in image-forming optical system and comparison with Ronchi test 09 p1403 A66-20515
Combination of geometrical and physical optics with modern system design such as computers, cameras for aerial use, space tracking, etc 09 p1403 A66-20918
Hologram-generated ghost image experiments to verify fragment displacement theory and diffuse light waveforms 10 p1534 A66-21249
Two-beam interferometry by wavefront reconstruction from hologram recorded with coherent background successively interfere in same latent image 11 p1708 A66-23204
Occipital evoked potential correlated with visual anomaly under stimulus of incoherent succession of randomly patterned optical images 12 p1806 A66-24393
Graph that indicates image motion effect on photographic image resolution 13 p2078 A66-25607
Universal tester resembling microscope to test image-forming systems of mirrors and lenses by autocollimation with aluminized flat 15 p2499 A66-28840
Optical art, discussing mechanism of visual perception, necessity of stimulation of visual cortex, etc 15 p2443 A66-28844
Influence of object contrast upon partially coherent image formation 15 p2501 A66-28979
Solar X-ray images obtained, using grazing incidence optics from Aerobee rocket at time of solar minimum 15 p2605 A66-30080
Bibliography of holograms 16 p2702 A66-30433
Laser illuminated electro-optical imaging noting energy variation parameters, equipment used and results obtained in TV reception 19 p3355 A66-35531
Imaging performance of error-free optical system limited by deviations in optical imaging surfaces, discussing aperture efficiency 21 p3773 A66-39395
Dependence of complex optical transfer function of image forming system on horizontal range through turbulent atmosphere 22 p3949 A66-40890
OPTICAL INSTRUMENT
SA ENDSCOPE
SA INFRARED DETECTOR
SA INTERFEROMETER
SA MICROSCOPE
SA PERISCOPE
SA PHOTOELECTRIC APPARATUS
SA REFLECTOMETER
SA TELESCOPE
IR spectroscopic instrument modifications and innovations, noting filter grating permitting measurement in far IR 02 p0230 A66-11794
Book on modern optics including laser and coherent light, geometrical optics, lens systems, instruments, etc 03 p0392 A66-12623
Optical interferometry theory, application and verification in plasma study 04 p0522 A66-14197
Optical determination of Soret coefficient by direct measurement 04 p0524 A66-14488
Iris microphotometer on MF-2 base 05 p0681 A66-15215
Wave front shearing interferometer applied to chromatic and monochromatic aberration testing 06 p0878 A66-16117
Lens primary aberration evaluation using Twyman interferometer, developing exact equations for high-order lens defects 06 p0879 A66-16118
Practical electro-optical devices which give electrical signal in response to incident light 06 p0852 A66-16558
MF-4 microphotometer modifications eliminating dependence of readings on

brightness fluctuations of illuminating lamp and permitting negative processing in terms of intensity 08 p1224 A66-19336
Combination of geometrical and physical optics with modern system design such as computers, cameras for aerial use, space tracking, etc 09 p1403 A66-20918
BRL ballistic camera system noting optical and mechanical characteristics, measurement and computer synchronization methods 10 p1537 A66-21872
Electro-optic device with nonreciprocal properties which does not depend on Faraday magneto-optic effect 12 p1837 A66-24313
Optical system for schlieren recording, deflection mapping, shadowgraphy and interferometry achieved for laser light, used in recording of refractive index fields 13 p2082 A66-26307
Optical and microwave instrumentation for exploration of millimeter wave band, determining value for deep space communications, radiometry and spectrometry 14 p2247 A66-26922
Lateral shearing interferometer with gas-laser light source for testing large optical systems 14 p2307 A66-27320
Vacuum UV instrumentation for optical studies of solids 14 p2293 A66-27333
Human eye, capabilities as optical instrument, particularly spatial filtering effects, visual acuity, eye movement and light receptors 14 p2228 A66-27650
Standardization of optical fabrication procedures and working materials 15 p2509 A66-28821
Aerospace thermal environments, examining effects on components of large aperture photographic catadioptric systems 15 p2498 A66-28822
Electronic device for converting one-dimensional optical image into electronic image with subsequent conversion of electronic image into electrical image in time 16 p2709 A66-31609
Collected reports on new development of telescopic, photometric, spectrometric, meteorological, interferometric and detection equipment at various solar and stellar observatories 17 p2923 A66-32020
Photoelectric Rotating Slit Elevation and Azimuth Sensor design, operation and performance 17 p2925 A66-32614
Integrating sphere for IR noting efficiency parameters construction, application, etc 17 p2958 A66-32626
Propagation of optical-waveguide modes in dielectric slab bisected by metal sheel 18 p3118 A66-34002
Grille spectrometer, noting greater signal to noise ratio than that of scanning Fabry-Perot spectrometer for arglow observations 19 p3353 A66-35378
Multicolor laser display, discussing components and future application 19 p3355 A66-35532
Lunar facsimile camera, noting large angular field coverage and electromechanical scanning system with optically narrow instantaneous field 19 p3356 A66-35675
Longitudinal acoustic wave generation by electrostrictive mixing of two light beams in single crystals of strontium titanate, rutile and z-cut quartz 19 p3400 A66-36073
Reduced-scale models for predicting image degradation due to nonuniform temperatures and resulting deformations of structural and optical elements in large spaceborne telescopes 22 p3889 A66-40215
Vacuum optical bench /VOB/ spacecraft testing facility for calibration of telescopes, radiometers, spectrographs and monochromators and measurement of intensity distribution, radiation source and contamination 22 p3891 A66-40232
Semiconductor electronics, Gunn effect in optical communications, electro-optics, optoelectronics and light coupling in microminiaturization 22 p3878 A66-40623
Free flight model technique in hypervelocity shock tunnel for aerodynamic force and moment measurement by optical instrumentation [AIAA PAPER 66-771] 22 p3847 A66-40652
Design of simplified noneclipse coronagraph, describing optical system and basic performance characteristics of

instrument 22 p3921 A66-40958
 Soret Zone Plate simulation by
 longitudinally distributed coaxial aperture
 system, noting system activation and
 operation 23 p4068 A66-41622
 Split angle, total internal reflection and
 Wollaston prism-digital light deflection
 techniques 24 p4174 A66-42815

OPTICAL MASER MODULATOR
SA LIGHT MODULATOR
 Powerful pulse of ruby laser emission
 generated by ultrasonic traveling wave
 diffraction modulator 05 p0698 A66-15861

OPTICAL MEASUREMENT
SA ELECTRONIC PHOTOGRAPHY
 Measurement schedules effect on work
 load of astronaut performing navigation
 function, stressing tradeoff between number
 of measurements and accuracy
 level 01 p0102 A66-10044
 Measuring microscope in roller bearing
 metrology, discussing dimensional optical
 measurement of precision
 parts 01 p0065 A66-10103
 Organic matter connected with biological
 activity in Orgueil meteorite, discussing
 optical rotation 01 p0134 A66-10249
 Effect of thermal instability in shop areas,
 static and dynamic loading and floor
 movement on precision fabrication and
 assembly
 [SAE PAPER 650759] 05 p0688 A66-15274
 Instrumentation techniques for new type
 of gas density measuring system using light
 scattered from laser beam as measured
 quantity 05 p0698 A66-15794
 Three-angle method of measuring optical
 constants of metals at high temperatures,
 detailing instrumentation, precision and
 physical basis 07 p1081 A66-18038
 Cross section measurement for
 electromagnetic backscattering of laser
 beams from rough aluminum and magnesium
 oxide surfaces 08 p1182 A66-18930
 Absolute energy and power measurements
 from electromagnetic pressure in optical
 wavelength range 08 p1256 A66-19285
 Indicatometric measurement of Martian
 surface composition, noting loamy and
 dustlike limonites, terra rossa and
 ferruginized soils 08 p1295 A66-19334
 Optical parameters of Mars atmosphere and
 surface from photometric data for spherical
 and elongated scattering
 indicatrices 08 p1295 A66-19337
 Optical methods of temperature
 measurement and law of thermal
 radiation 09 p1381 A66-20503
 Vacuum deposited amorphous boron films,
 presenting structure, optical measurements
 and electrical properties 10 p1580 A66-21726
 Measurement schedules effect on work
 load of astronaut performing navigation
 function, stressing tradeoff between number
 of measurements and accuracy
 level 10 p1554 A66-21953
 Optical diffraction velocimeter, using
 backscattered laser light to measure relative
 velocity between light source and
 surface 11 p1706 A66-22958
 Sensor requirements for midcourse
 guidance phase of spacecraft on lunar
 trajectories, with attention to optical
 measurements and statistical combining for
 trajectory estimates
 [AIAA PAPER 64-234] 12 p1910 A66-24692
 Interferometry methods using scatter plate
 and plane mirror to test long focus optical
 systems 13 p2080 A66-25992
 Intensity distribution at focus of high
 power laser, noting measuring
 method 15 p2513 A66-28834
 Optical scanning and resolution of D, L
 amino acids by gas-liquid chromatography
 and mass spectrometry 15 p2446 A66-28870
 Pasteur Probe assay of asymmetry of D, L
 amino acids in detection of Martian
 life 15 p2447 A66-30025
 Decaying gaseous plasma ion densities,
 metastable atom densities and light emission
 simultaneously measured by mass
 spectrometer and light
 spectrometer 16 p2759 A66-30422
 Combined Irradiation Facility for
 simulation of selected space environments
 used to study optical behavior of
 materials 16 p2676 A66-30437
 Amplitude and phase of complex Kerr

magneto-optic coefficients measured,
 describing technique and
 results 17 p2958 A66-32623
 Small-order vibration displacements
 measurement by Michelson interferometer,
 using CW laser source 17 p2926 A66-33037
 Measuring amplification of coherent optical
 radiation in neon-helium filled
 tube 17 p2938 A66-33512
 Optical system for measurement of aerial
 profile accuracy of large parabolic reflector
 noting design principles, instrument
 composition and experimental
 results 18 p3113 A66-34276
 Indentation damage and subsequent
 annealing effect on etch-polished Ge
 surfaces at room temperature examined
 with optical microscope, using interference
 contrast techniques 19 p3434 A66-35401
 Laser application survey 19 p3374 A66-35798
 Implosion of fast nonpreionized theta pinch
 studied, using first and second harmonic of
 ruby laser light 20 p3609 A66-37638
 Laser application as measuring equipment
 in metal working, discussing surface-grazing
 interferometer, feedback laser device and
 length measuring laser
 [ASME PAPER 66-MD-43] 21 p3742 A66-38491
 Quasi-optical measurement of Faraday
 rotation in oversize waveguide at 2-and 1-
 mm wavelengths 22 p3876 A66-40172
 Measuring amplification of coherent optical
 radiation in neon-helium filled
 tube 24 p4219 A66-42125
 Horizontal deflection in TV display
 produced by Bragg reflection of laser light
 by ultrasonic waves in
 water 24 p4212 A66-42816
 Optical measurements and navigation
 during midcourse and orbital phases of
 space mission, deriving linear equations for
 propagation of time dependent navigation
 errors
 [AGARDOGRAPH 105] 24 p4176 A66-43127

OPTICAL METHOD
 Accurate and permanent data obtained for
 true-north referencing, using
 photography 01 p0065 A66-10030
 Effect of incomplete and inaccurate optical
 information on particle size distribution
 function, considering transparency and
 scattering pattern 01 p0097 A66-10758
 Optical metrological and alignment
 methods for fast and accurate rocket thrust
 chamber alignment
 [SAE PAPER 650758] 01 p0078 A66-10836
 Linear filtering concepts in imaging and
 optical data processing systems, including
 three-dimensional photography obtained by
 wave front reconstruction 02 p0240 A66-11453
 Standardization of characters for optical
 character recognition, class B, using merit
 curve technique 02 p0193 A66-11598
 Optical data processing techniques
 considering storage, manipulation,
 holography and pattern recognition using
 matched filters 03 p0378 A66-12997
 Optical and electro-optical information
 processing technology - Symposium, Boston,
 November 1964 05 p0636 A66-14818
 All-optical computer techniques, noting
 semiconductor laser digital devices for near
 future 05 p0637 A66-14824
 Light interaction effects potentially useful
 in optical logic functions, emphasizing fiber
 lasers 05 p0693 A66-14825
 Single-sideband optical correlator using
 ultrasonic transducer for variable reference
 function 06 p0881 A66-16641
 Micromachining with pulsed helium-neon
 gas laser, noting experimental techniques,
 operation and application 08 p1232 A66-19734
 Communications requirements for manned
 deep space missions, using optical links,
 with PPM, PCM/PL and coherent reception
 for each link
 [AIAA PAPER 66-317] 12 p1823 A66-24782
 Optical techniques for satellite tracking
 and star identification, describing ASTRO II
 theodolite with photoelectric data
 recording 12 p1883 A66-24933
 Optical ray tracing to predict focusing
 characteristics of laser light in refractive
 targets, calculating heating effects in target,
 noting target geometry, refractive index,
 thickness of skin layers,
 etc 13 p2090 A66-25531

Composition and temperature variation of
 thermosphere, using mass spectrometry and
 optical methods 14 p2285 A66-27622
 Effect of incomplete and inaccurate optical
 information on particle size distribution
 function, considering transparency and
 scattering pattern 14 p2326 A66-27857
 Optical beam scattering of gas laser for
 measurement of photoelastic constants and
 application to lithium
 niobate 15 p2512 A66-28692
 Portion of human vestibular system
 response determined through eyeball
 counterroll measurement, noting
 experimental techniques and methods of
 computing results 16 p2639 A66-30807
 Coherent optical transducer for optical
 information processing 16 p2657 A66-31244
 Far IR radiation detected at visible
 frequency, using nonlinear optical mixing
 with lasers 17 p2959 A66-33322
 Coherent optical system for simplifying
 signal processing from antenna arrays by
 simultaneous beam forming and cross
 correlation 18 p3069 A66-34248
 Incidence of cylindrical /spherical/ local-
 plane electromagnetic wave on weak plasma,
 using ray-optics methods, leading to field
 peculiarities 20 p3512 A66-37139
 Collision effects on full-wave and ray-
 optics virtual height computations for LF
 radio waves reflected from stratified
 ionosphere 20 p3521 A66-38360
 Signal processing by coherent and
 incoherent light systems for application in
 seismology, radar, speech recognition,
 etc 22 p3862 A66-39734
 Direct determination of oblique incidence
 coefficients in birefringent coatings and
 models, eliminating error
 sources 24 p4292 A66-42863

OPTICAL MODULATION
 Optical phase modulator using ferroelectric
 barium titanate crystal
 plate 01 p0117 A66-10240
 Choice of modulation for transmission of
 binary signals in optical
 range 02 p0190 A66-11408
 Laser beam modulation methods assessed
 for making use of capability of laser for
 carrying multitude of signals
 simultaneously 02 p0191 A66-11692
 Crystalline semiconducting materials for
 detection, modulation and generation of
 optical and submillimeter wave
 radiation 02 p0272 A66-11697
 Periodic automodulation of radiation and
 possibility of generating giant pulses in
 three-level laser with inhomogeneously
 excited active medium 02 p0241 A66-11842
 Fabry-Perot interferometric modulator for
 laser beam, noting error of precise
 alignment of reflecting surfaces and
 Gaussian type of
 imperfections 02 p0232 A66-12202
 Electro-optical shutter for Q-factor
 modulation in neodymium glass
 laser 04 p0529 A66-13431
 Periodic variation of quality factor of He-
 Ne gas laser cavity by vibrating quartz-
 modulation of light beam 04 p0529 A66-13477
 FM laser oscillation theory discussing
 effect of arbitrary atomic line shape,
 saturation, mode pulling, power output,
 sideband amplitude, distortion,
 etc 04 p0530 A66-13954
 Distance measurement by modulating
 linearly polarized light with respect to plane
 of polarization 04 p0546 A66-14393
 Transistor pulse amplifier for use with
 optical modulator, delivering 1.1-amp 11-nsec
 pulse at 80-mc rate into 15-ohm
 load 05 p0649 A66-15176
 Transistor CW amplifier delivering 14
 watts into 15-ohm load over frequency band
 from 46 to 90 mc for use with FM optical
 modulator 05 p0649 A66-15177
 HF optical modulator using Pockel effect
 in ammonium and potassium
 dihydrophosphate single
 crystals 06 p0889 A66-15899
 Transmission of large number of
 instrumentation channels over parallel pulse-
 modulated light beams, using electro-optical
 mosaic sources and
 detectors 06 p0824 A66-15970
 Self-modulation of laser with two-mode
 resonator 06 p0893 A66-16775

Coherent interference rejection, discussing noise and modulator-leakage pickup rejection in laser communications experiments 07 p1001 A66-17217

Gas laser direct modulation 07 p1045 A66-18355

Intensity fluctuations in output of four-level CW laser oscillators by linearized rate equations 07 p1047 A66-18434

Optical modulation of current in germanium-silicon n-n heterojunctions, noting consistency of I-V, C-V and photocurrent spectra characteristics with depletion region model of material 08 p1273 A66-19253

Automodulation of emission from solid state laser 13 p2093 A66-26041

Retardation produced by 45 degree y-cut low voltage light-amplitude modulator and effect of wave-normal ordinary and extraordinary ray 14 p2334 A66-27588

Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 14 p2308 A66-27595

Q-factor modulation of ruby-laser resonator by phthalocyanine series 15 p2516 A66-29353

Laser Q-factor modulation by spectral absorption filters with inverse bleaching 15 p2516 A66-29354

Spectral composition of laser light within framework of theory of nonlinear optical effects 15 p2542 A66-29356

Small signal modulation effect on photoelectron counting of He-Ne laser intensity fluctuations 16 p2719 A66-31097

Giant coherent light pulse generation by Q-factor-modulated laser 16 p2719 A66-31183

Internal phase modulation in He-Ne laser using electro-optic effect in crystal quartz, observing spectrum and RF mode beats 17 p2934 A66-32621

Optical modulation in bulk gallium arsenide, using Gunn effect 18 p3152 A66-33606

Reversible light-modulated electrolytic cell for use as real-time spatial filter 18 p3077 A66-33995

Self-modulation of laser with two-mode resonator 19 p3372 A66-35372

Q modulation of laser theory and application, presenting giant pulse production, phenomenological theory, output response to step function change, electro-optic and mechanical modulators 20 p3576 A66-36971

Q-factor modulation of ruby-laser resonator by phthalocyanine series 20 p3576 A66-37358

Spectral composition of laser light within framework of theory of nonlinear optical effects 20 p3602 A66-37360

Laser mode-locking during resonator Q-factor modulation 21 p3748 A66-39303

Fast-acting fluid seal for Q-factor modulation of neodymium glass laser 24 p4224 A66-42729

Laser mode control and stabilization using internal time-varying perturbation 24 p4174 A66-42813

Electro-optic modulators for IR region 0.9 to 16 microns constructed by using large single crystals of high resistivity gallium arsenide 24 p4258 A66-42957

OPTICAL PATH

Optical path length change measured through laser rods within pumping period by interferometric technique 02 p0239 A66-11376

Optical scintillation frequency noting propagation of electromagnetic and acoustic waves in turbulent atmosphere 02 p0262 A66-12207

Free photon path distribution during passage through thick plane-parallel light scattering layer 04 p0541 A66-13416

Plasma electron concentration, using nonlinear light scattering on geometrical optical path 04 p0554 A66-14295

Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 04 p0542 A66-14302

Wave propagation for LF radio waves analogous to geometrical optics with path integral describing effects of Earth conductivity, curvature and reflection

height 05 p0632 A66-14841

Source function models and modified mean values of solar photosphere, accounting for limb-darkening and intensity fluctuation data 05 p0763 A66-15283

Multiple internal-reflection folded-path rectangular laser configuration for obtaining length of active media between Fabry-Perot reflectors 06 p0891 A66-16652

Laser radiation absorbed along slant paths, spectral line overlapping and center line shift with pressure variation 07 p1041 A66-17295

Interferometric measurement of large indices of refraction, noting applicability and accuracy 09 p1403 A66-20516

Thermally-induced optical path distortions in laser rods measured by obtaining time resolved interferograms, using Mach-Zehnder interferometer and Q-switched laser 13 p2092 A66-25994

Light intensity in homogeneous turbid medium for unresolved absorption bands calculated from distribution of photon optical paths in absence of absorption, considering atmospheric scattering 14 p2327 A66-28216

Effects and parameters influencing optical path length within pumping process in ruby and doped glass laser rods 16 p2719 A66-31443

Absorption lines and bands in scattering and absorbing medium elucidated by study of distribution of photon optical paths in scattering atmosphere 18 p3230 A66-34148

Third-order spherical wavefront deformation due to refraction by spherical surface, optical path difference calculation and design of null tests 19 p3354 A66-35391

Measurement technique for variations in optical path of gyroelectric echoes generated by long wave transmitter and propagating in whistler mode 24 p4176 A66-42995

OPTICAL POLARIZATION

Barium titanate single crystals at infrared frequencies investigated for polarization, effective permittivity and coercive field 06 p0926 A66-16713

Higher order calculation of laser output, noting approximation method for linewidth parameter and Lamb dip shape accuracy 08 p1233 A66-19063

Solar corona emission line polarization resulting from anisotropic effect of photospheric radiation 09 p1442 A66-20463

Light diffusion of Martian atmosphere measured by spectroscopic evaluation of polarization variation from disk center to edge 13 p2181 A66-25461

Nonlinear optical polarization of gases and liquids, stressing second degree contribution in macroscopic electric field 13 p2132 A66-26147

Intense light pulse propagation in optical media, noting polarized nature of transient oscillations, phase and amplitude distortion and two-level composition of medium 13 p2098 A66-26171

Rayleigh scattering intensities in upper atmosphere 13 p2075 A66-26737

Polarization and damping rate of emission lines of ruby single crystal in strong excitation 15 p2515 A66-29207

Spectral variation in light polarization of Martian atmosphere for all observable phase angles 15 p2599 A66-29643

Ground reflection effect on polarization of radiation scattered from top of Rayleigh atmosphere, using Fresnel and Lambert models [AIAA PAPER 66-514] 16 p2699 A66-31498

Polarization and damping rate of emission lines of ruby single crystal in strong excitation 17 p2936 A66-33056

GLC-mass spectrometric stereoisomer discrimination as means of detecting biological processes 18 p3059 A66-34372

Uniqueness theorems concerning lossless birefringent networks and effects on transmittance of changing sign of crystal angles and output 20 p3599 A66-36943

Vectorial photoelectric effect and quantum efficiency measurement in thin gold films for two light polarizations, using Lallemand electronic camera 20 p3614 A66-37279

Wavelength dependence of polarization by small graphite flakes with anisotropic dielectric constant 20 p3649 A66-37324

Stereoselective synthesis of optically active amino acids from menthyl esters and alpha-keto acids 23 p4032 A66-41378

Zodiacal light, airglow and falling atmospheric dust measurements and observations in terms of solar orbiting small diameter particle clouds 24 p4276 A66-42663

OPTICAL PROPERTY

Optical constants of CdSb determined for photon energies up to 2 eV from reflectivity measurements and Kramers-Kronig dispersion relation 02 p0275 A66-11967

Optimum sastrugi ion optical engine design for uniform emission, considering permeance and electrode clearance [AIAA PAPER 65-69] 03 p0416 A66-12765

Micrometeoroid impact effect on candidate skin materials, determining change in optical properties 03 p0382 A66-12793

Optical properties of light scattering layer with negative absorption coefficient, discussing layer reflection and transmission 05 p0715 A66-14726

Optical properties of semiconductors by measuring spectral emittance of transparent and opaque solids and measurements on materials used in IR optics [AIAA PAPER 65-654] 05 p0678 A66-15164

Optical properties of spacecraft temperature control coatings under simulated geomagnetically trapped electron bombardment [AIAA PAPER 65-137] 05 p0706 A66-15792

Optical properties of polycrystalline InSb films noting index of refraction, absorption coefficient and transmission curves 05 p0741 A66-15852

Physical, thermal, electrical and optical properties of beryllium 08 p1238 A66-18849

Group II-VI semiconductors, examining theory of bound exciton complexes, lattice vibrations, phonon-assisted edge emission and higher energy bands 08 p1271 A66-19239

Green function method in theory of dispersion and absorption of electromagnetic radiation in semiconductors, considering resonance line shapes 09 p1411 A66-19961

Nonlinear optical effects of third order in crystals, specifically in Hamiltonian of system containing electrons, nuclei and radiation field 09 p1387 A66-20928

Optical and electrical constants of beta-rhombohedral boron 10 p1579 A66-21721

Absolute measurement of optical-rectification coefficient in ammonium dihydrogen phosphate 12 p1912 A66-23715

Effects of recombination in semiconductor with thermal-neutron-absorption cross section, measuring changes in luminescence and conductive properties of CdS 13 p2166 A66-25792

Thermal optical behavior of glasses and other potential laser materials and thermal distortion in air, water, benzene, ethanol and toluene 13 p2092 A66-25996

Thin tin film reflectivity and transmission factor for UV to IR range 13 p2169 A66-26346

Instrument for checking optical properties of uniform field magnetic spectrometers 13 p2083 A66-26550

Optical and electrical characteristics of n-type indium oxide films prepared by spraying, noting relation between carrier mobility and particular impurity used 15 p2559 A66-28623

Anodic oxide film growth on sputtered tantalum films in dilute sulfuric acid, noting ionic conductivity, dielectric constant and optical properties 15 p2562 A66-28718

Optical inhomogeneities in n-type gallium arsenide crystals containing growth axis examined in transmission, using IR image converter, noting band gap changes 15 p2562 A66-28720

Atmospheric optical properties and directional reflectances of ocean water and other surfaces, for unobscured low Sun 15 p2531 A66-28832

Objections to Gehrels model explaining observations on wavelength dependence of optical properties of lunar surface 15 p2597 A66-29260

Optical properties of complex compounds

of divalent platinum, noting absorption spectra, forbidden transitions, etc 15 p2569 A66-29730

Optical and magneto-optical phenomena in CdSnAs sub 2, discussing reflection and absorption spectrum, optical activity, double refraction, dielectric constant, etc 16 p2788 A66-31775

Optical coherence functions and properties from statistical viewpoint for application to spectroscopy and stellar interferometry 17 p2957 A66-31987

Changes of surface optical properties of metal surfaces determined through equilibrium temperature measurements in space flight experiments 17 p3033 A66-32463

Lanthanum oxide as crystal growth modifier, noting habit modifications, optical quality, etc 17 p2982 A66-33060

Thermodynamic and optical properties of Ge, Si, diamond and GaAs, obtained by inelastic neutron scattering technique, used to measure vibrational spectrum 18 p3154 A66-33922

Relation between optical and electrical properties of interplanetary dust in upper atmosphere and comparison with twilight-optical and ionospheric parameters 18 p3105 A66-33961

Optical photometric properties of lunar surface, discussing brightness effects, solar wind, albedo, reflectivity, backscatter, chemical composition, ion bombardment effects, etc 19 p3457 A66-35444

Optical constants in far UV, using reflectometer permitting measurement at various incidence angles 19 p3361 A66-36618

Metal and alloy optical properties and electronic structure - International Colloquium, Paris, September 1965 20 p3612 A66-37271

Ultrahigh vacuum optical measurements on mirrorlike surfaces of Na, K, Rb and Cs prepared in ultrahigh vacuum in wavelength region from 3000 to 25,000 angstroms 20 p3613 A66-37272

Optical absorption of K, Cs and Na 20 p3613 A66-37273

Fermi surface interpretation of band structure, electron energy levels, optical properties and ferromagnetic structure of transition and noble metals 20 p3613 A66-37274

Optical properties and complex dielectric constants of transition metals 20 p3614 A66-37276

Theoretical band structure, Fermi surface, electronic structure, magnetic and optical properties of rare earth metals 20 p3614 A66-37277

Electronic energy band structure and optical properties of heavy rare earth metals 20 p3614 A66-37278

Optical constants of silver and gold in various energy regions, measuring relative refractivities of polarized light, analyzing collective motions of conduction electrons 20 p3615 A66-37283

Effect of emulsion thickness on optical characteristics of reconstructed images, noting sensitivity to incidence angle 20 p3558 A66-37287

Identification of radio source 05 21-36 with N-galaxy, noting high optical luminosity and tabulated spectrogram 20 p3650 A66-37342

Absorption spectra, reflection index and photoelectric emission of tellurium 20 p3618 A66-37566

Optical characteristics of hexagonal reflecting film membrane obtained, using analytical method combined with electrical simulation 20 p3503 A66-38440

Optical characteristics of solar concentrators fabricated by inflation method, noting asymmetric shape of focal spot 20 p3503 A66-38441

Criticism of article on microparticle impact effect on metal optical properties 21 p3818 A66-38737

Electrical and photoconductivity properties of high-resistivity gallium phosphide in intrinsic and near IR region, noting electron trap effect 21 p3800 A66-38992

Optical properties of plane and aspherical diffraction gratings having unequal spacings of ruling, examining possible use in 50 to 500 angstrom wavelength 21 p3771 A66-39128

Absorption and dispersion spectrum of laminar gallium selenide crystal 21 p3802 A66-39159

Optical charge exchange in silicon carbide analyzed, using electron paramagnetic resonance 22 p3964 A66-40311

Infinite plate consisting of monopolar semiconductor of given thickness under effect of electric field results in change in galvanomagnetic, piezoresistance and optical properties 22 p3965 A66-40317

Airborne spectrozonal telephotometer used in calculation of photographic brightness coefficient of Earth surface 22 p3919 A66-40621

Radiation noise effect on laser optical properties, noting density vs resonator characteristics, energy spectrum, etc 22 p3933 A66-40917

Quasi-stellar radio sources correlated for prediction of Lyman lines relative strengths and optical depth of nebulas beyond Lyman continuum, using simple models 23 p4130 A66-41807

Optical hydrogen-line profiles in Orion nebula compared to radio profile obtained from antenna response and weighting factors of brightness temperature 23 p4131 A66-41820

Optical properties and energy structure parameters calculation for CdS-CdTe crystals 24 p4253 A66-42362

Transmittance of gaseous air components for 1850 angstrom radiation 24 p4234 A66-42818

Optical transmission of plasma column generated by ionized gas explosion determined, using laser beam 24 p4245 A66-42998

OPTICAL PUMPING

Kinetic equation of laser optimum emission, determining pumping efficiency, value of losses in special modes, etc 01 p0084 A66-11058

Population inversion requirements in paramagnetic amplifiers and generators with optical lighting for steady state and pulsed operation 02 p0239 A66-11403

Excitation of ruby lasers using double-pumped high-intensity helical flash tubes, obtaining time-resolved spectra of electrical discharges and plasma temperatures 02 p0240 A66-11446

Output power and pulse duration of ruby laser 03 p0378 A66-12602

Pinch effect in pumping of lasers, using neodymium-ion glass or ruby 04 p0529 A66-13433

Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 05 p0697 A66-15352

Energy losses in ruby laser due to heat evolution during optical pumping, noting relation between energy absorption and population inversion 05 p0698 A66-15858

Pumping power formula for determining characteristics of continuous wave and pulsed lasers 06 p0889 A66-15900

Highly sensitive optically pumped helium magnetometer measuring static magnetic fields of 10 to 100 oe at temperatures from 300 to 1.5 degrees K 07 p1032 A66-17471

Oscillation spikes in quasi-continuous operation of ruby laser at room temperature, noting threshold pumping energy 07 p1043 A66-17532

Quasi-Fermi level, frequency, threshold pumping value and particular mode in radiative intraband transition 07 p1045 A66-18361

Stimulated Raman effect in gaseous plasma analyzed by coupled-mode method, noting plasma optical pumping 07 p1091 A66-18427

Peak irradiance of optical pump and total pump-energy incident upon laser crystal determined, accounting for temperature variation effects 07 p1047 A66-18487

Transverse optical pumping of mercury isotope to show existence of new magnetic resonance lines 08 p1232 A66-18646

Laser development, discussing basic theory, pumping methods and laser types 08 p1233 A66-18700

Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating

prism 08 p1234 A66-19376

Intense UV pumping effect on ruby laser output 09 p1387 A66-20519

Optical double resonance in ruby, discussing absorption transitions from lowest excited state of chromium ion effected by laser pumping 09 p1387 A66-20556

Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 09 p1387 A66-20893

Pump power dependence of ruby laser starting and stopping time predicted via rate equation analysis 10 p1541 A66-21309

Surface finish effect on radial temperature distributions in optically pumped neodymium trivalent ion glass laser rod by observing thermal stress birefringence 11 p1714 A66-23358

Efficient conversion of electrical energy into laser radiation, using coaxial optical pump 11 p1715 A66-23479

Laser application and techniques noting amplification, modulation, interferometry, scattering, plasma diagnostics, nonlinear optics, etc 12 p1889 A66-23931

Optically pumped rubidium 87 maser oscillator 12 p1890 A66-24124

Depopulation of ground state chromium ions in ruby under optical pumping explained via rate equations 13 p2089 A66-25188

Laser pumping by intense noble gas discharge in zeta-pinch geometry 13 p2092 A66-25995

Spectroscopy of lithium fluoride crystals activated with uranium trioxide for laser action, showing anomalous fluorescent decay under high intensity pumping 13 p2092 A66-25997

Optical length variations in laser amplifiers determined during pumping and amplification, using interferometry 13 p2092 A66-25999

Monte Carlo technique to determine total energy and energy distribution in laser crystal due to optical pumping 13 p2093 A66-26028

Effect of fluctuating laser pump on stimulated Raman scattering, noting growth of coupled Stokes-anti-Stokes waves in presence of two-mode pump 13 p2096 A66-26158

Nonlinear quantum effect in solid state lasers using paramagnetic crystals, noting Raman effect and gain dependence on pumping power 13 p2098 A66-26172

Absorption behavior of optically pumped ruby rod, noting amplification at room temperature and absorption at cryogenic temperature 13 p2098 A66-26174

Q-switched lasers, interaction of high power light pulse with matter and semiconductor lasers pumped with optical radiation and electron beams investigated, using quantum oscillator and amplifier 13 p2099 A66-26180

Excitation in electron beam pumped /EBP/ GaAs lasers including electron scattering, energy dissipation pattern, phonon emission, pair production, etc 13 p2099 A66-26181

Photoluminescence and stimulated emission of gallium arsenide and indium antimonide obtained by optical pumping, noting effect of applied magnetic field on laser and diode emissions 13 p2099 A66-26182

Self-pumping chemical laser theory and operation, noting chemical pumping 13 p2104 A66-26382

Optical pumping in ground states and metastable atomic states 14 p2305 A66-26963

Pumping neodymium lasers through use of coherent emission of ruby lasers, finding threshold energy 14 p2308 A66-27605

Axial and transverse mode selection, emission spectrum and transient emission behavior of confocal ruby laser operated in ellipsoidal pumping system 14 p2308 A66-27606

Solar pumping and modulation of various laser materials for deep space communication, noting TV picture transmission 15 p2513 A66-28971

Resonance signal inversion in Rb optical pumping and relation of mixing of excited state sublevels 15 p2517 A66-29410

Resonator transients used to shorten giant light pulses generated in Q-switched laser

oscillators to pump secondary laser oscillator with suitable absorption band 16 p2718 A66-31077

Nonuniform pumping effects on near-axial low-order transverse mode structure in solid state laser cavity 16 p2719 A66-31087

Beam divergence and far field patterns in ruby lasers 16 p2719 A66-31098

Effects and parameters influencing optical path length within pumping process in ruby and doped glass laser rods 16 p2719 A66-31443

Optical pumping mechanism for anomalous excitation of OH microwave emissions from H II regions 16 p2807 A66-31756

Stability conditions of two-photon processes, analyzing combination and double radiation by matter placed in resonator cavity 17 p2874 A66-32242

Parametric amplification by monochromatic pumping of electromagnetic oscillations of substances contained in resonator 17 p2885 A66-32244

Sun pumped continuous wave one-watt YAG crystal laser, noting equipment setup and output duration 17 p2934 A66-32620

Solid state CW optically pumped microwave maser, using divalent thulium doped calcium fluoride 18 p3117 A66-33614

Laser regime with giant pulses generated in dysprosium doped cadmium fluoride under continuous pumping by xenon lamps, obtaining Q factor modulation by rotating prism 18 p3119 A66-34178

Decay cross section of pumped metastable He atoms in He-Ne laser 18 p3119 A66-34695

Radiation from high-energy-level transitions excited in He-Ne laser during optical pumping with He lamp 18 p3120 A66-34697

Optical pumping of rubidium atoms, describing design and operation of equipment, concepts of resonance, atomic orientation, nuclear magnetic moments, etc 18 p3120 A66-35028

Optical pumping of rubidium atoms, treating oriented atoms as magnetized macroscopic gyroscope 18 p3120 A66-35029

Transfer efficiency of laser pumping cavities with diffusely reflecting wall determined, based on approximately isotropic nature of light inside cavity 19 p3372 A66-35379

Light energy measurements made with argon bomb used as chemically powered laser pump 19 p3373 A66-35388

Pumping energy distribution of ruby laser, discussing existence of trapped modes and effect of partially filled water jacket surrounding ruby rods 19 p3373 A66-35389

Relaxation of optically pumped Rb atoms on paraffin-coated walls, using Franzen sequence, analyzing physical meaning of optical signal 19 p3374 A66-35992

Pulsed ruby lasers, considering pumping and threshold, output, quantum mechanics and variation on basic device 20 p3575 A66-36968

Fluorescence of rare earth, actinide and transition metal ions in insulating crystals as result of optical excitation, discussing spectroscopic properties and operating characteristics 20 p3575 A66-36969

Ground-state spin memory in excited state of ruby under broadband optical pumping, observing change in relative populations of Zeeman components 20 p3578 A66-37596

Pulsed operation of electron-beam pumped zinc oxide laser emitting radiation in UV at very low temperatures, noting importance of use of cavity 20 p3579 A66-37768

Photodissociation laser system, discussing output energy dependence on pressure, temperature and number of successive optical pumping flashes 20 p3579 A66-37781

Stimulated emission spectrum in axial-mode model of plane resonator in stationary generation regime 20 p3580 A66-38127

Pulsed-mode gain characteristics in neodymium-doped silicate glass laser experimentally related to giant-pulse laser energy output 20 p3582 A66-38396

Amplification by parallel pumping of traveling magnetostatic waves in normally magnetized single-crystal disk of YIG 20 p3624 A66-38410

General nonequilibrium system in contact with reservoir described via correlation functions of quantized field operators,

noting influence of cavity and optical pump 21 p3746 A66-38633

Coupling of adjacent axial modes in external Raman resonator observed as first Stokes frequency with benzene as Raman medium and Q-switched ruby laser as pump source 21 p3747 A66-39109

Experimental excited state band locations and intensities in absorption spectrum of electron transitions in optically pumped ruby laser 21 p3749 A66-39569

Light absorption by optically pumped atoms undergoing magnetic resonance, noting modulation amplitudes and modulation frequency limitation for primary interaction 22 p3930 A66-39807

Optical pumping on He 4 atom in metastable level, examining modulation of light in absorption in longitudinal and transverse beams and obtaining magnetic resonance curves 22 p3930 A66-39808

Ground state resonance, noting absence of Doppler broadening of signals in forward scattered light 22 p3931 A66-39810

Ruby laser pumping system and low cost mercury flash tube with high repetition rates used for micromachining process 22 p3933 A66-40336

Compact discharge lamp designed for continuous pumping of solid state laser, with integral mounts for crystals and enclosure providing cooling circuits for lamp and crystal 23 p4076 A66-41247

Fractional metastable-state population measurements of Cr ions in ruby crystal under Q-switching operation 23 p4077 A66-41288

Master equation solved to obtain diagonal elements of density matrix for laser light, taking into account pumping scheme characterizing three-level laser 23 p4077 A66-41374

Spontaneous emission in inversely populated medium examined for uniform ruby rod laser with uniform pumping distribution 23 p4078 A66-41450

Stimulated emission of polymethine dyes upon pumping with Q-switched laser, noting wavelength parameters and oscillation 24 p4219 A66-42247

Conductivity modulation by heavy-to-light hole transitions in p-type germanium noting carrier lifetime and ringing of laser pulse 24 p4219 A66-42249

Absorber concentration effect on pulsed laser system noting performance characteristics, threshold energy, pumping dynamics and time parameters 24 p4220 A66-42254

Book on lasers covering optical cavities, gas lasers, solid state lasers, optical pumping, Q-switching, population inversion, etc 24 p4220 A66-42319

Mode selection, relaxation oscillations, mode interaction and thermal effects in room temperature CW lasers in ellipsoidal pumping systems 24 p4221 A66-42546

Glass lasers, comparing glass with crystals as hosts for laser ions, considering neodymium laser properties 24 p4224 A66-42800

Semiconductor laser technology, operating principles, material properties and performance, with emphasis on GaAs junction lasers 24 p4224 A66-42802

Maser amplifier based on UV continuum pumping from nearby stars, explaining 18-cm OH emission from anomalous H-2 regions 24 p4280 A66-43042

OPTICAL PYROMETER

Temperature measurement above 1000 degrees K, using disappearing filament and line reversal optical pyrometers 15 p2502 A66-29063

Flame temperature measurement using response time of Wolfram-rhenium thermocouples to correct radiation errors in optical pyrometer readings 19 p3360 A66-36160

Polarized pyrometric probe with thermal insulation, comparing probe radiation with volt ampere characteristics of plasma to obtain particle density and energy 19 p3409 A66-36280

Arc image stagnation-flow reactor for measuring gas-solid reaction rates between 2000 and 3000 degrees K 24 p4216 A66-43214

OPTICAL RADAR

SA LIDAR

Statistical performance of energy and heterodyne detection techniques in pulsed-optical radar compared for target detection capability 02 p0240 A66-11456

Radar systems with rotating optical disks, describing optical correlation techniques 06 p0834 A66-16729

Atmospheric turbulence, power fluctuation and radar detection in laser systems design 07 p1041 A66-17294

Lower atmospheric density measurements through light scattering from Q-spooled ruby laser beam, using optical radar detector 09 p1373 A66-20398

Moon shape determined by measuring distance from lunar surface points to lunar center of mass, using optical laser radar 11 p1774 A66-22964

Ruby laser optical radar detection of upper atmospheric backscattering 12 p1818 A66-24395

Clear air turbulence detection with laser Doppler optical radar [AIAA PAPER 66-374] 12 p1818 A66-24498

Optical instrumentation radar for real-time positional data on high-speed cooperative targets 13 p2023 A66-25654

Optical thickness of noctilucent cloud, using optical radar measurements 14 p2283 A66-26931

Light detection and ranging /LIDAR/ technique use in atmospheric research, particularly meteorological factors important to aviation and rocket operations [AIAA PAPER 65-464] 14 p2309 A66-27892

Clear air turbulence detection with optical radar, using spectral analysis of backscattered Doppler-shifted light particle formation mapping via correlates of rough flying conditions 15 p2450 A66-28920

Measurement of distance to Moon by optical radar, discussing ruby laser/photomultiplier apparatus and procedure 16 p2647 A66-30291

Laser radar ranging system using pseudorandom code modulation, considering application to pulse and digital circuitry, statistical communication theory and electro-optical engineering 18 p3117 A66-33557

Energy-and heterodyne-detection techniques compared in pulsed optical radar applications 23 p4037 A66-41311

OPTICAL RANGEFINDER

Optical rangefinder design using movable plane mirrors as optical compensators and focusing systems with fixed basis at instrument 09 p1380 A66-20312

Laser ranging via digital counter coupled photomultiplier tube, noting spectral response, gain transit time dependence, output coupling and effective cathode diameter 12 p1830 A66-23759

Structural design relationship to optical design with reference to tolerance in range tracking instruments 19 p3358 A66-35826

OPTICAL REFLECTIVITY

Directional reflective coating consisting of cylindrical dielectric fibers oriented perpendicular to absorbing substrate [AIAA PAPER 65-671] 01 p0160 A66-10232

Bidirectional reflectance measurements to determine optical degradation induced by UV radiation [AIAA PAPER 65-672] 01 p0066 A66-10233

Antireflection coatings and coverglass on silicon solar cell to improve performance 02 p0180 A66-12162

Reflectivity of n-type lead sulfide measured as function of wavelength, temperature and carrier density 03 p0412 A66-13147

Angular distribution of diffusely reflected light flux as function of scattering indicatrix, survival probability of light quantum and conditions of medium illumination 04 p0541 A66-13415

Conical emission in ruby lasers with exterior mirrors 04 p0532 A66-14278

Fused silica output coupling component for laser system, using frustrated total internal reflection configuration 07 p1040 A66-17287

Mirrors composed of multilayer stacks of dielectric films and attaining high reflectance over extended spectral range 07 p1079 A66-17290

Reflection spectrum of clouds in Venus

atmosphere measured, using telescope mounted on helium balloon, noting details of instrument 07 p1137 A66-18055

Numerical Neumann solution to scalar equation of transfer in homogeneous layer of optical thickness 08 p1255 A66-18780

Accurate tracking of Beacon-Explorer orbiting optical reflectors, using pulsed ruby laser beams 09 p1341 A66-19902

Reflectivity of atmospheric shock front determined, using laser range finder and wide-bandwidth dual-beam oscilloscope 09 p1367 A66-20396

Magnesium fluoride overcoated aluminum mirrors, discussing thickness monitoring techniques by vacuum UV reflectance measurements 11 p1737 A66-23430

Electroreflectance effect on gallium arsenide surfaces, noting reflectance response upon electric field modulation 13 p2158 A66-25051

Cavity loss and optimum reflectivity of output mirror in ruby laser with external mirror 13 p2089 A66-25187

Index of refraction of thin film coatings from transmittance and reflectivity measurements with attention to titanium and silver films 13 p2168 A66-25944

Fabry-Perot interferometer adjustment for reflectance of narrow-band dielectric reflection coating peaked in UV spectral region 13 p2081 A66-26002

Photon echo, optical analog of spin echo, in ruby crystals, using ruby laser as excitation source 13 p2097 A66-26170

Plasma resonance and scattering, threshold variation and optical reflectivity in pulsed laser beam-induced gas breakdown 13 p2134 A66-26192

Free carrier absorption on GaAs films which exhibit absorption edge shift to lower energies 15 p2561 A66-28698

Electron-hole recombination effect on semiconductor reflectivity modulation study with ruby laser 15 p2563 A66-28757

Optical reflection of gallium sulfide and gallium selenide single crystal 15 p2566 A66-29206

Diffusely reflecting surfaces for simulating brightness of lunar surfaces, noting pronounced rise of reflectivity at small phase angles 16 p2802 A66-30929

Static uniaxial compression effect measurement along /100/, /110/ and /111/ on electroreflectance spectrum of gallium arsenide, using electrolyte technique 16 p2777 A66-30951

Lattice vibrational properties of hexagonal CdSe 16 p2778 A66-31075

Overcast sky luminances above snow covered terrain and directional luminous reflectance of backgrounds and objects under overcast skies 17 p2948 A66-32612

Optical reflection of gallium sulfide and gallium selenide single crystals 17 p2982 A66-33055

Lunar figure and orbit parameters measured by optical location method 19 p3455 A66-35285

Normal incidence reflectivity and transmissivity coefficient measurements in Ge thin epitaxial films 20 p3623 A66-38397

Bistatic radar method for determination of permeability and permittivity of material for smooth spherical target 22 p3863 A66-39941

OPTICAL RESONANCE

Optical double resonance in ruby, discussing absorption transitions from lowest excited state of chromium ion effected by laser pumping 09 p1387 A66-20856

Intense light pulse propagation in optical media, noting polarized nature of transient oscillations, phase and amplitude distortion and two-level composition of medium 13 p2098 A66-26171

Acousto-optical deflection and modulation devices, considering specific geometries and scattering-efficiency-bandwidth products 24 p4174 A66-42812

OPTICAL RESONATOR

Self-locked gas laser mode dependence on cavity length and position of laser medium in cavity 01 p0081 A66-10347

Confocal multimode resonator with open-walled structure formed by two spherical reflectors spaced by their common radius of curvature 01 p0081 A66-10370

Phase relations of longitudinal modes in

gas laser with annular resonator 01 p0082 A66-10726

Zinc selenide as highly refractory substance in dielectric mirror layers for laser resonators and interference filters 02 p0238 A66-11252

Reflection coefficient of mirrors measured on operating wavelength of laser in which they are used 02 p0239 A66-11420

Laser with hollow cathode discharge on neon-hydrogen mixture and cavity formed by cylindrical mirrors 02 p0239 A66-11421

Traveling wave oscillations in ruby laser resonator using passive optical isolator, eliminating Faraday rotator and attendant magnetic field 02 p0240 A66-11448

Diffraction losses of open resonator oscillations with plane mirrors as function of absorption band of mirror 02 p0241 A66-11772

Laser mirrors consisting of alternating lead-oxide and cryolite films 02 p0241 A66-11820

Modes in optical resonator formed by two reflectors of dissimilar spherical curvature and circular shape 03 p0391 A66-12305

Current discharge of helium neon laser on laser action 03 p0376 A66-12439

Multiple light filter narrowing emission bands of ruby laser with multiplex resonator 03 p0378 A66-12627

Multireflector Fabry-Perot laser resonators, discussing suppression effect against unwanted modes 03 p0380 A66-13325

Optical resonator using cylindrical mirror with variable radius of curvature 04 p0530 A66-13890

Fabry-Perot interferometer and confocal and spherical resonator, calculating integral equations for eigenvalue and eigenfunction of lowest order TW eigenmode 04 p0523 A66-14277

Traveling wave oscillations of ion ring laser in mirror-ring resonator 05 p0694 A66-14903

Output spectra of argon ion laser in ring resonator and two mirror resonators 05 p0694 A66-14904

Microwave models used to measure frequency and quality factors of Fabry-Perot resonator with plane square mirrors operating in X-band 05 p0695 A66-14909

Modulation of laser light with composite Fabry-Perot resonator, using more than three multiple reflecting plates 05 p0698 A66-15836

Optical-misalignment effect on threshold power of solid state laser and compensation via lens in resonator 05 p0698 A66-15854

Threshold pumping energies compared to determine losses in Fabry-Perot resonators due to mirror misalignment 05 p0685 A66-15856

Dispersion resonator performance in ruby laser, showing generation of R sub 1 and R sub 2 lines 06 p0889 A66-16346

Mode competition and coupling in Q-switched ruby laser 06 p0890 A66-16383

Optical design of elliptical cavities and comparison of energy transfers from light source to ruby laser with cylindrical cavities 06 p0891 A66-16647

Triangular resonator for coherent light sources, considering natural oscillations and energy withdrawal 06 p0893 A66-16883

Solid state laser output exhibiting regular and irregular spikes analyzed through relaxation oscillations and classical physics 09 p1387 A66-20568

Eigenvalues of integral equations in laser resonant cavities 10 p1542 A66-21343

Theoretical optical resonator for laser with rare earth liquid solutions as active components 10 p1543 A66-21970

Multiplex light filter for excitation of ruby laser 10 p1544 A66-22032

Dispersion resonator performance in ruby laser, showing generation of R sub 1 and R sub 2 lines 11 p1711 A66-22345

Standing waves in laser resonators verified by placing thin metallic films between external mirrors of pulsed neodymium laser 11 p1713 A66-22893

Mode suppression techniques for gas laser single axial mode operation for large mirror separations 11 p1713 A66-23093

Laser action on rotational line in carbon dioxide and nitrous oxide vibrational spectra

in both P and R branches up to J values of over 50 11 p1714 A66-23357

Equations of motion governing interaction of optical modes in presence of time-varying parameters 12 p1890 A66-24559

Two-level atom interaction with multimode gas laser cavity, obtaining stationary state and solving unique eigenvalue in special cases 12 p1891 A66-24568

Dependence of beat frequency of neodymium laser axial modes on distance between mirrors and neodymium rod position within resonator 12 p1891 A66-24881

Optical resonator diffraction loss, noting laser oscillations in high loss arrangements, output beam power, field patterns, etc 13 p2090 A66-25195

Laser producing two or three light pulses in sequence with interval between pulses mechanically controlled by optical wedge inserted into resonator 13 p2090 A66-25322

Ruby laser experiment yielding giant pulses by separating mirrors from crystals 13 p2092 A66-25684

Elliptic cavity design for solid state lasers, discussing multiple reflections, absorption coefficient, refraction losses, etc 13 p2092 A66-25998

Microwave models of optical resonators, discussing correction of discrepancies resulting from approximations in measurements 13 p2093 A66-26006

Natural modes of plane and cylindrical dielectric resonators in optical band 13 p2093 A66-26042

Helium-neon laser multibeam generation in gas discharge tube, using spherical mirrors and tapered plates 13 p2093 A66-26053

Interaction between stimulated Brillouin and Raman scattering in carbon sulfide, using optical resonator and laser beam 13 p2097 A66-26162

Dust particles in laser cavity observed for angular stabilization and constant velocities 13 p2105 A66-26594

LF fluctuations in emission of He-Ne gas laser measured, using Fabry-Perot resonator and ring-type resonator 14 p2307 A66-27186

Resonators with confocal mirrors with variable reflection coefficients calculated, using integral equations for field distributions 14 p2254 A66-27746

Oscillation types for gas-laser semiconcentric resonator 14 p2310 A66-28160

Open laser resonator composed of two ideally spherical mirrors with rectangular aperture 15 p2515 A66-29200

Resonator geometry and mirror positions and effect on radiation output in helium-neon laser 15 p2515 A66-29201

Optical resonator using cylindrical mirror with variable radius of curvature 15 p2518 A66-29703

Multiplex light filter for excitation of ruby laser 16 p2718 A66-30853

Nonuniform pumping effects on near-axial low-order transverse mode structure in solid state laser cavity 16 p2719 A66-31087

Modes of tilt-mirror optical resonator, using spillover radiation to extract coherent far IR 16 p2747 A66-31134

Linear operators describing passage of wave beam through system of amplitude-phase converters forming quasi-optical waveguide or resonator 16 p2666 A66-31546

Truncated equations describing coherent radiation of excited chromium ions in ruby situated in traveling wave resonator 16 p2720 A66-31547

Laser mode operation in pressure of radiation absorbing impurity analyzed by extended Thomson type system 16 p2720 A66-31558

Obtaining highly monochromatic radiation on single wave from ruby laser 17 p2933 A66-31809

Steady state oscillations of molecular beam laser with inhomogeneous sinusoidal field in resonator 17 p2885 A66-32243

Ray envelopes within stable optical resonators containing focusing media determined by geometric optical approach 17 p2958 A66-32624

Large wavelength changes in gallium arsenide injection lasers due to changes in cavity Q 17 p2935 A66-32635

Open laser resonator composed of two ideally spherical mirrors with rectangular

- aperture 17 p2935 A66-33049
- Resonator geometry and mirror positions and effect on radiation output in helium-neon laser 17 p2935 A66-33050
- Two-laser cavity in tandem to resolve components with homogeneously broadened /Doppler/ line 19 p3376 A66-36720
- Mode theory of spherical mirror resonators, discussing diffraction losses, resonant conditions, mode patterns, internal focusing elements, mode selection, etc 20 p3599 A66-36972
- Polarization of pulsed radiation from GaAs laser diode to determine origin of natural oscillations of resonator 20 p3578 A66-37549
- Phase relations of longitudinal modes in gas laser with annular resonator 20 p3579 A66-37663
- Confocal resonator theory instead of diffraction as explanation of 90 degree rotation between near and far fields of ruby lasers 20 p3581 A66-38243
- Performance of GaAs semiconductor laser with resonator, noting dependence of forbidden zone width and absorption coefficient on free carrier concentration and incident photon energy 21 p3746 A66-38955
- Neodymium laser oscillator using time-variable reflector, noting loading and dumping of optical cavity with nearly maximum amount of energy 21 p3747 A66-39118
- Wave synchronization in gas laser with ring resonator cavity 21 p3748 A66-39301
- Laser mode-locking during resonator Q-factor modulation 21 p3748 A66-39303
- Gas laser frequency and emitted power dependence on resonator tuning 21 p3748 A66-39308
- Theoretical optical resonator for laser with rare earth liquid solutions as active components 21 p3749 A66-39549
- Frequency doubling of laser light with variable Q-switched resonator 22 p3929 A66-39654
- Ruby laser pumping threshold energy, divergence angle and output power as affected by resonator length 22 p3930 A66-39769
- Dependence of beat frequency of neodymium laser axial modes on distance between mirrors and neodymium rod position within resonator 23 p4076 A66-41088
- Radiative power amplification of He-Ne laser with nearly confocal resonators 23 p4078 A66-41453
- Resonator misalignment effect on output of neon-helium laser with spherical mirrors 23 p4079 A66-41830
- Zeeman laser interferometer, using axial magnetic field to obtain simultaneous left- and right-hand circularly polarized oscillation modes at upper and lower cavity resonances 24 p4219 A66-42248
- Giant pulse generation range in transverse direction after Q-switching in ruby laser, examining resonator properties 24 p4220 A66-42516
- Single transverse and longitudinal modes observed in output of passive Q-switched ruby laser when two spherical mirrors are used for resonator 24 p4223 A66-42563
- Ring laser rotation rate sensor noting relation to electromagnetic radiation 24 p4223 A66-42564
- Laser beams and resonators, discussing beam propagation in free space, geometrical optics application and resonator modes in view of aperture diffraction effects 24 p4225 A66-42806
- LF fluctuations in emission of He-Ne gas laser measured, using Fabry-Perot resonator and ring-type resonator 24 p4226 A66-43084
- OPTICAL SENSOR**
- Test pad stability measurement using two accelerometers and recording autocollimator 01 p0065 A66-10031
- Observation satellite optics, discussing focal length, resolution, viewing angle, Earth curvature effect, etc 12 p1915 A66-24935
- Vidicon applicability as radiation sensor in star tracking systems 13 p2024 A66-25981
- Scintillating target intensity effect on performance of PPM optical tracker used as error sensor in various guidance systems 13 p2125 A66-25985
- Sensor calibrations using NBS standard of spectral irradiance, as used for Mariner IV Canopus sensor 13 p2080 A66-25986
- Test pad stability measurement using two accelerometers and recording autocollimator 18 p3110 A66-33815
- Equivalent circuit for pyroelectric materials used in obtaining noise equivalent power for detection of electromagnetic radiation and heat transfer measurement 20 p3562 A66-38405
- Signal generating image tubes for photo-optical tracking and surveillance sensors 23 p4070 A66-41669
- OPTICAL SIGNAL**
- SA VISUAL SIGNAL**
- Switching with optical signals classifying polycrystalline noncoherent and coherent types of optoelectronic devices 02 p0200 A66-11890
- Laser light redistribution in illuminating optical signal processing systems noting apodization, spatial modes and aspheric elements 05 p0693 A66-14830
- Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 05 p0697 A66-15352
- Optical range parametric amplification, describing power output experiment with glass-laser-excited potassium dihydrogen phosphate crystal 09 p1387 A66-20893
- Text on high speed optical pulse technology, lasers and measuring techniques, emphasizing capacitor discharge application 10 p1538 A66-22063
- OPTICAL SPECTRUM**
- Optical absorption spectra of transition elements especially ruby, based on crystal field, ligand field and molecular orbital theories 03 p0408 A66-12500
- Fluctuation-dissipation theorems for relating noise current power spectrum to first and third order conductivity tensors in thermal equilibrium and pumped Raman-active media 04 p0532 A66-14310
- Fabry-Perot interferometer using wire grids instead of glass plates, covering operation, advantages and bandwidth characteristics 05 p0682 A66-15355
- Spectroscopic analysis of velocity field in radio and Seyfert galaxy NGC 1275 suggests occurrence of violent outburst in galaxy 08 p1287 A66-18776
- Gamma irradiation intermediates of polyamide MXD-6 examined, using electron spin resonance and optical spectroscopy 08 p1243 A66-19065
- Electrical and optical experiments performed on single crystals of beta-rhombohedral boron, noting resistivity decrease and differences between thermal and optical band gap 10 p1579 A66-21720
- Optical interstellar absorption lines and galactic structure, noting observational data and comparison with 21 cm studies 11 p1767 A66-22258
- Transverse motion modification of longitudinal frequency spectrum resonances of light scattered from plasma 11 p1745 A66-22973
- Laser detection of coherent light and superheterodyne and nonlinear parametric studies in optical spectrum 14 p2309 A66-27821
- Conduction-electron plasmons interaction with longitudinal optical phonon in Raman spectrum of gallium arsenide 17 p2975 A66-31888
- Fundamental optical spectra theory for high energy atoms interaction with solids 17 p2977 A66-32399
- Spectra and intensity vs excitation level and spatial distribution vs current density determined for optical radiation by electron excited cadmium sulfide 17 p2937 A66-33308
- Doppler shift and high velocity mirror translation effects on mutual optical coherence function of gas laser Michelson interferometers 19 p3354 A66-35387
- Optical techniques in laser detection systems 20 p3516 A66-37439
- Microwave and optical range electromagnetic wave scattering in plasma, noting frequency and power of probing signal 21 p3789 A66-39066
- Optical spectra of ultrashort optical pulses generated by mode-locked glass-doped neodymium lasers, considering saturable absorber cell placed parallel to Fabry-Perot reflector 21 p3747 A66-39115
- Gas laser frequency and emitted power dependence on resonator tuning 21 p3748 A66-39308
- Optical spectrum of normal excitons in deformed and nondeformed n-type Ge single crystal layers for four orientations 22 p3964 A66-40306
- OPTICAL THICKNESS**
- Polar interferometric method for measuring north-south component of ultrashort wave refraction in ionosphere and optical thickness gradient 02 p0190 A66-11415
- Optical thickness of Jupiter isothermal atmosphere assuming it consists of hydrogen, methane and ammonia 05 p0759 A66-14879
- Light scattering in spherical nebula of great optical thickness 05 p0765 A66-15417
- Diffusive reflection of light from and passage through optically thick atmosphere with nonspherical indicatrix 07 p1080 A66-17921
- Optical thickness measurement of transparent films on silicon, using spectrophotometric interference technique 07 p1036 A66-18404
- Effect of thickness nonuniformity on capacitance of Al-Al₂O₃-Al tunnel junction structure compared with device with uniform thickness 09 p1426 A66-20198
- Diffusive reflection of light from and passage through optically thick atmosphere with nonspherical indicatrix 12 p1913 A66-23882
- Heat transfer in Couette flow of radiating fluid with viscous dissipation, noting conduction coupling, effects of temperature level, profile, wall emission, fluid optical thickness, etc 13 p2210 A66-26718
- Optical thickness effect on monochromatic directional transmittance and emittance of isothermal dielectric surrounded by air 18 p3134 A66-33991
- Optical thickness measurement of nonabsorbing dielectric film when it is inconvenient to apply overlay film to measure thickness by Fizeau fringe shift 22 p3968 A66-40889
- OPTICAL TRACKING**
- Radio beacon telemetry system for measuring orbital performance of Echo II satellite, including internal pressure and skin temperature 01 p0032 A66-11125
- Satellite and space-probe tracking by radar, radio and optical observations from Earth 02 p0191 A66-11693
- Optical technique for satellite and space probe tracking noting equipment, orbit determination, checkpoints, etc 02 p0192 A66-12008
- Manual on basic information for institutions and nations planning new optical tracking stations for satellites 06 p0833 A66-16689
- Computer method calculation of minimum time track, using quasi-optical law of refraction 07 p1066 A66-17681
- Tracking and recording of telemetry from artificial Earth satellites and space probes as South African contribution to space research 09 p1459 A66-20723
- Contribution of accommodation and eye movements to effectiveness of visual observation and tracking of objects by aircraft personnel 10 p1490 A66-22133
- Transverse wave FM phototube system for detection of microwave-frequency modulated light, noting design, operation and application 12 p1838 A66-24558
- Optical communication for Mars exploration with outline of laser modulators and antennas 13 p2021 A66-25251
- Optical tracking including history, techniques, categories, light sources, power limitation, etc 13 p2024 A66-25980
- Digital-mode FM CW laser ranging and tracking system using compound axis servomechanism 13 p2024 A66-25982
- Scintillating target intensity effect on performance of PPM optical tracker used as error sensor in various guidance systems 13 p2125 A66-25985
- Satellite perturbation observation in deriving data on Earth shape, aerodynamic drag and radiation 16 p2654 A66-30993
- Autonomous orbital navigation by optical

tracking of unknown landmarks 21 p3766 A66-38881

Automatic tracking from video signals, discussing characteristics of single and multiple gate trackers and measured performance 23 p4089 A66-41672

OPTICAL TRANSITION

Atomic beam lasers, particularly for population inversion in levels of optical transition 01 p0082 A66-10448

Indirect optical transitions in semiconductors due to photons and impurities, noting absorption and emission of photons, avalanche and long wavelength radiation 02 p0273 A66-11714

Electric field effect on light absorption by silicon throughout region of phonon-assisted indirect transitions 03 p0412 A66-13150

Atomic beam lasers, particularly for population inversion in levels of optical transition 03 p0380 A66-13311

Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 04 p0568 A66-14348

Fine structure exhibited by near IR absorption and emission spectra of copper ions in ZnS and CdS crystals recorded at low temperatures 05 p0742 A66-15874

Positions of defect energy levels in n-type germanium irradiated with fast neutrons analyzed by optical methods, measuring spectral distribution of photoconductivity and quenching curve 06 p0934 A66-17127

Indirect and direct radiative recombination transitions in germanium and in analysis of lifetime 07 p1094 A66-17314

Mechanism for indirect phototransition in semiconductors near natural absorption edge when interacting with current carriers 07 p1105 A66-18373

Simultaneous action of RF perturbation between Zeeman sublevels of atomic transition which is also producing laser oscillation 10 p1541 A66-21177

Bipolar excitation of photoconductivity in silicon due to structural disarrangement caused by IR radiation 10 p1583 A66-22019

Q-switching of carbon dioxide and nitrous oxide gas laser transitions 11 p1714 A66-23354

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 13 p2089 A66-25103

Optical linewidth study of energy transfer between impurity ions and homogeneous broadening and lineshape changes in optical transitions 13 p2098 A66-26176

Helium-neon gas laser used to study pressure effect on line shape of 2s-2p optical transitions of neon excited states 13 p2100 A66-26198

Optical transition of manganese fluoride as function of temperature and magnetic field in both emission and absorption 14 p2351 A66-26886

Long-wave recombination radiation of germanium associated with optical transitions involving photon emission and current carrier heating 14 p2368 A66-28245

Frequency shift in resonance transition induced in potassium vapor by ruby laser pulse 16 p2717 A66-30282

Atomic-beam technique for studying Stark effect in optical D-line transition in cesium and rubidium 19 p3402 A66-35993

Optical transition in zinc telluride attributed to oxygen substituting isoelectronically for tellurium, classifying isoelectronic traps into donors and acceptors 20 p3622 A66-38250

Intensity and frequency equations for interband optical transitions and multimode properties in semiconductor lasers 22 p3929 A66-39666

Electron thermalization effect on semiconductor laser behavior, noting optical transition between impurity level and band, taking into account diffusion process 22 p3933 A66-40790

Perturbation theory-variational calculus analysis of optical rotatory power of molecules based on wavefunction badness 22 p3951 A66-40907

Precise measurement of excited-state lifetimes for radiative and collision-induced relaxation in fine structure levels of atomic neon, noting optical

transitions 23 p4098 A66-41361

OPTICO-PHOTOGRAPHIC STRESS MEASUREMENT

Principal-stress sum in transparent models under plane stress determined, using Ronchi fringes 03 p0433 A66-12313

Strain and deformation over extended field determined from single photograph by moire grid-analyzer method 03 p0433 A66-12314

OPTICS

SA FIBER OPTICS

SA GEOMETRICAL OPTICS

SA INTERFEROMETRY

SA PHYSICAL OPTICS

Book on modern optics including laser and coherent light, geometrical optics, lens systems, instruments, etc 03 p0392 A66-12623

Book on radiative transfer on discrete spaces developed on mathematical and physical basis, covering optical media to geo-optical fields 05 p0716 A66-15084

Applied Optics and Optical Engineering, Volume 2 06 p0909 A66-16557

New optics techniques including interference filters, lasers and optical fibers 08 p1255 A66-19118

Atmospheric optics noting attenuation, reflectance, flux and optical radiation 09 p1398 A66-20274

Microwave optics diffraction theory, reflectors, lenses, interferometers, spectrometers, beam waveguides and millimeters wave 09 p1402 A66-20511

Progress in optics, Volume 5 14 p2330 A66-26962

Nonlinear optics, considering Maxwell equation and nonlinear material response 14 p2330 A66-26964

Photographic and spectroscopic optics - Conference, Tokyo and Kyoto, September 1964 14 p2291 A66-27316

Electrophotographic technician training at Foothill College 15 p2618 A66-28828

Disproof of Senitzky fundamental theorem in quantum optics 17 p2936 A66-33094

Frequency and spatially variable electric and magnetic polarizations induced in nonlinear media by electromagnetic fields 19 p3399 A66-35594

Book on atmospheric optics of twilight phenomena 19 p3394 A66-36732

Thin film manufacturing problems for applications in optics, examining physical and chemical factors 23 p4071 A66-41871

Nonlinear optics emphasizing parametric oscillation, self-focusing and trapping of laser beams and stimulated Raman, Rayleigh and Brillouin scattering, using Maxwell equations and electric dipole approximation 24 p4225 A66-42810

OPTICAL CONTROL

Characteristics of linear optimal systems whose performance criterion is defined by minimum of infinite integral of quadratic function of outputs and inputs of system 01 p0049 A66-10016

Frequency domain approach to minimizing quadratic performance index for system with only one available control 01 p0050 A66-10017

Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 01 p0100 A66-10026

Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 01 p0100 A66-10027

Optimum prognosis for random processes by applying asymptotically optimal succession of automatic systems 01 p0050 A66-10655

Optimum control and stability of processes described by system of partial differential equations 01 p0051 A66-10705

Selection of maximum number of constraints for which solution can be obtained for problems of linear or nonlinear programming and approximation of

functions 01 p0051 A66-10707

Search theory extremal problems, considering theorems in terms of maximum principle for finding optimal strategy 01 p0051 A66-10734

Synthesis of optimal linear control system coupled with vehicle configuration design technique for guidance parameters and temperature accumulation along optimum entry trajectories 01 p0105 A66-10787

Huygens principle in geometrical optics to solve certain time problems in calculus of variations, particularly airplane minimum time [SAE PAPER 650784] 01 p0105 A66-10841

Control systems optimal with respect to control regime or to transient synthesized with aid of Pontryagin principle or Bellman principle 01 p0051 A66-11000

Gradient method of solving terminal control problems in linear automatic control system 01 p0051 A66-11012

Statistical probability problems of optimal control for linear systems 01 p0051 A66-11183

Optimal transfer function of linear automatic system determined from criterion of minimum mean square error 02 p0206 A66-11310

Disturbance signals used to synthesize optimal structure of rapid action automatic systems 02 p0206 A66-11311

Parameter variation effect on performance of second order maximum effort /bang-bang/ controller, noting optimum system, stability analysis and analog computer study 02 p0207 A66-11790

Optimization of nonlinear control system with random input using analog computer, automatic optimizer and dimensional analysis 02 p0207 A66-11791

Analysis of equation system for constructing regularizing algorithms for optimum control 02 p0209 A66-12103

Optimal control problems considering arbitrary piecewise-continuous function with finite number of discontinuities of first kind 02 p0209 A66-12176

Current trends in nonlinear control theory 03 p0349 A66-12701

Optimum control synthesis reviewing theory and practice, especially for flight mechanics and control 03 p0349 A66-12780

Optimal steering and staging of multistage boosters using extended variational method to include variable discontinuities at corners [AIAA PAPER 65-62] 03 p0432 A66-12781

Optimal control approach and uncertainties to feedback control problems 03 p0349 A66-12995

Pontryagin method applied to choice of optimal minimax controls of dynamic systems 03 p0350 A66-13035

Optimal fixed time constant-energy regulator for linear plants with perturbations operating within bounding hypersurface 03 p0350 A66-13176

Stochastic differential equations specifying dynamical structure of filters generating posterior probability distribution when inputs are time functions 03 p0351 A66-13259

Optimal control display relationships in general tracking including piloting and radar tracking operation 03 p0329 A66-13349

Pontryagin maximum principle used for solving optimization problems of space interception and rendezvous 04 p0584 A66-13522

Optimum motion in central force field, discussing orbital transfer for circular orbits when energy source is controllable 04 p0576 A66-13560

Optimal control process with stochastic feedback for automatic control system 04 p0502 A66-13699

Algorithms for teaching open-loop optimizing control system correct recognition of situations expressed as regions of complex configuration 04 p0503 A66-13773

Synthesis of optimum discrete system for continuous information transmission, using statistical theory of estimates 04 p0482 A66-13971

Mathematical theory of optimal control - Symposium, University of Michigan, October 1964 04 p0505 A66-13987

Variational and optimal control theory

- discussing extension of McShane and Pontryagin methods to general problem of Bolza 04 p0505 A66-13988
- Geometrical aspects of optimal processes, discussing existence of limiting surfaces in cost augmented state space, state equations, maximum principle and functional equations for optimal trajectories 04 p0505 A66-13990
- Parabolic differential equations connected with optimal pursuit, discussing analysis and solution of problem of two moving points, with application of maximum principle 04 p0539 A66-13991
- Controllability of nonlinear processes discussing qualitative and quantitative theory and geometric properties of set of attainability 04 p0505 A66-13993
- Theory of differential equations discussing extremal problems for generalization of optimal control problem 04 p0505 A66-13994
- Fuel optimal linear control through minimization of convex function, using convex programming and steepest descent technique 04 p0505 A66-13996
- Optimal control problems in Banach spaces, discussing extension to infinite dimensions and application to distributed parameter systems 04 p0506 A66-13998
- Optimally controlling stochastic systems for measuring and observing state vectors, noting Markov properties 04 p0506 A66-14200
- Global search of performance surface to find parameters optimizing performance of learning control system, using variable structure stochastic automaton 05 p0653 A66-14598
- Error effect in a priori information on sequential estimate variance of linear system states, noting optimal filter synthesis 05 p0653 A66-14601
- Shipboard inertial navigation system recalibration, using periodic position information from communications satellite 05 p0712 A66-14604
- Optimization of class of multistable hybrid systems having both continuous and discrete state variables 05 p0654 A66-14611
- Energy-optimal control with cost function for bounded time and control system [ASME PAPER 65-WA/AUT-14] 05 p0659 A66-15605
- Sufficient condition for existence of admissible control for optimization systems [ASME PAPER 65-WA/AUT-12] 05 p0710 A66-15607
- Fuel optimum guidance law to achieve required velocity 06 p0906 A66-15928
- Switching surfaces in three-dimensional phase space obtained by analog computer for optimizing nonlinear control systems 06 p0862 A66-16361
- Optimization of multistage ballistic missile system operating in drag environment by solution of physical discontinuity problems [AIAA PAPER 66-91] 06 p0959 A66-16406
- Determination of optimum control in automatically controlled plants 06 p0862 A66-16419
- Algorithm for optimum control problem based on Pontryagin maximum principle 06 p0902 A66-16424
- Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 06 p0862 A66-16522
- Distributed parameter oscillatory system, deriving optimum control formulas via variational method 06 p0862 A66-16523
- Discrete stepwise-proportional-search system, discussing optimum parameter determination 06 p0862 A66-16525
- Multicordinate systems, discussing control method development for plants with large number of correlated inputs and outputs 06 p0863 A66-16527
- Nonlinear automatic control system, discussing optimum tuning via parametric stability region 06 p0863 A66-16528
- Optimum speed control of automatic system, noting nonlinear mechanical characteristics of slave motor and speed dependence of load 06 p0863 A66-16531
- Variational calculus problem of bounded space coordinates as Hestenes problem 06 p0863 A66-16617
- Pontryagin principle extended for nonlinear control system whose control laws contain Radon measures 06 p0863 A66-16618
- Optimal control theory for nonlinear vector differential equations containing measures 06 p0863 A66-16620
- Pseudo-convex functions, discussing existence criteria, properties and application 06 p0864 A66-16621
- Newton-Raphson algorithm as tool for extracting solutions to nonlinear problems of optimal control and inequality state constraints 06 p0864 A66-16622
- Optimal control, discussing fundamental general necessary conditions for Mayer problem solution 06 p0864 A66-16623
- Heuristic approach to reinforcement learning control systems, describing operation and simulation on IBM 1710-GEDA hybrid computer 06 p0864 A66-16734
- Optimal control system terminal condition sensitivity, examining parameter variation effects on open loop, feedback and optimal open loop adjacent to closed loop control 06 p0864 A66-16738
- Criteria for reachability of subspace by trajectories of linear control system 06 p0865 A66-16744
- Vector equation F/X equals zero solved by transforming nonlinear algebraic equation into nonlinear differential equation 06 p0865 A66-16746
- Optimal control of distributed parameter systems governed by systems of linear partial differential equations 06 p0866 A66-16964
- Optimum distribution of correcting pulses in single parameter correction 06 p0957 A66-17168
- Analytical construction of optimal controller for solution of system of Riccati differential equations 07 p1012 A66-17377
- General variational problem for system described by differential equations in which at least one control figures linearly 07 p1012 A66-17378
- Optimal program control for minimization of finite state vector norm of linear system with two types of sets of permissible controls 07 p1013 A66-17425
- Optimal control for systems whose behavior is described by ordinary and differential equations set with initial and boundary conditions 07 p1013 A66-17426
- Navigation and flight instrument, discussing deficiencies of panel-mounted navigational command system 07 p1033 A66-17685
- Optimum control calculated by iteration method 07 p1016 A66-17910
- Computational reduction of high speed memory requirements in solving optimization problems by dynamic programming and supersonic transport trajectory application 07 p1004 A66-17976
- Reentry guidance by threshold network storage of precomputed optimum commands, using analogy of surface approximation problem in N plus one-dimensional space [AIAA PAPER 66-52] 08 p1249 A66-18989
- Minimum impulse transfer of rocket between coplanar intersecting Keplerian orbits [AIAA PAPER 66-93] 08 p1290 A66-18999
- Optimal feedback control and bounding hypersurface of allowable perturbations in linear plant regulator, noting multiplier equation 08 p1200 A66-19543
- Optimum processes in systems with distributed parameters described by partial differential equations 08 p1202 A66-19710
- Stochastic optimal control problem solution by dynamic programming and relation to interplanetary guidance 09 p1360 A66-19908
- Optimal control by random sequences, dynamic programming and Wald sequential analysis 09 p1362 A66-20644
- Existence of optimal stationary policy in Markov decision process in study of asymptotic behavior of recurrence relations in dynamic programming 09 p1397 A66-20646
- Book on advances in control systems, Volume 2 09 p1362 A66-20649
- Singular solutions in optimal control problems, treating singular control surface, flooding technique and allowable switching directions 09 p1362 A66-20653
- Optimum-in-mean controlled stochastic system design 09 p1363 A66-20749
- Optimal trajectory and guidance role of conjugate points in determining maximum duration of optimal control for linear and nonlinear processes 10 p1516 A66-21076
- Technique for controlling acceleration vector along powered flight trajectory, using linear perturbation method [AIAA PAPER 63-267] 10 p1608 A66-21789
- Optimal amplitude modulations for radar signal design subject to simultaneous peak and average power constraints 10 p1505 A66-21840
- Sufficient statistics in optimum control of stochastic systems, considering two classes of loss functions 10 p1518 A66-21925
- Sufficient conditions of optimality having control region dependent on phase coordinates 10 p1518 A66-21980
- Theoretical and engineering aspects of applying predicting systems to automatic guidance and control 11 p1673 A66-22201
- Optimum quantization step for given distribution law of quantized signal, using minimum error distortion criteria 11 p1674 A66-22204
- Universal nonlinear Gabor filter that optimizes itself by learning process used to determine static characteristics of controlled plant 11 p1674 A66-22205
- Optimization of five second and third-order systems with saturating and relay controllers and with random Brownian Motion input 11 p1674 A66-22222
- Optimal cooperative state rendezvous and Pontryagin maximum principle for two independently controlled systems having common goal 11 p1765 A66-22223
- Optimization of terminal state of controlled system when equations of motion contain derivatives of control parameters 11 p1674 A66-22350
- Optimum control in nonlinear automatic control systems and linear systems with distributed parameters 11 p1674 A66-22352
- Pontryagin maximum principle applied to Mayer variation problem in dynamics of point of variable mass /rocket/ 11 p1732 A66-22353
- Extension of Pontryagin maximum principle for application to optimum discrete control systems 11 p1674 A66-22355
- Optimum control processes in systems containing plants with distributed parameters described by ordinary or partial differential equations with initial and boundary conditions 11 p1674 A66-22356
- Successive approximations method for calculating optimum regimes of some systems with distributed parameters, using gradient procedure 11 p1674 A66-22357
- Multistage rocket acceleration by explosive separation of individual stages, solving optimization problems connected with problem 11 p1777 A66-22456
- Optimal rendezvous maneuver calculated between propelled spacecraft and unpropelled target moving in elliptical orbit of arbitrary eccentricity 11 p1768 A66-22457
- Optimum control and stability of processes described by system of partial differential equations 11 p1675 A66-22617
- Selection of maximum number of constraints for which solution can be obtained for problems of linear or nonlinear programming and approximation of functions 11 p1675 A66-22619
- Algorithm for optimal parameter choice in reliability control of complex systems, based on dynamic programming 11 p1675 A66-22623
- Nonlinear filters, including system analysis optimization, realization via Volterra functionals, etc 11 p1675 A66-22630
- Optimization of systems with stepwise control constraints, using Pontryagin maximum principle to determine special features 11 p1676 A66-22753
- Nonlinear system optimizing by analytical method, deriving expression for random telegraph signal 11 p1676 A66-22756
- Transient processes and periodic motions in extremal control system with higher derivative control action 11 p1677 A66-22757
- Stochastic maximum principle with averaged constraint developed for control problems affected by stochastic process 11 p1678 A66-23181
- Optimal control - Symposium, Imperial College of Science and Technology, London,

- April 1964 11 p1679 A66-23271
Automatic control systems, discussing optimal and on-line adaptive control in electricity, nuclear research, steel industry, numerical problems, etc 11 p1679 A66-23272
Successive approximation methods of solving optimal control problems, based on variational calculus and Euler-Lagrange equation 11 p1679 A66-23273
Optimal control systems and numerical analysis of error effect on sensitivity 11 p1680 A66-23274
Newton-Raphson method iterative solution of two-point boundary value problem and application to trajectory optimization and tubular reactor design 11 p1680 A66-23276
Lagrange and Mayer problems of optimal control of cost 11 p1680 A66-23277
Book on flight dynamics, covering optimum control, multistage rocket trajectory optimization, VTOL aircraft dynamics, autopilot design, etc 11 p1732 A66-23335
Optimal control program satisfying all boundary conditions, noting application to thrust vector control 11 p1733 A66-23336
Optimum control for supersonic winged vehicle, allowing for inequality-type limitations in solution algorithm for maximum range in nonmaneuvering flight 11 p1733 A66-23340
System controllers for signal reproduction in noise conditions, noting limitations on regular and random components, controller optimality criterion, etc 11 p1681 A66-23341
Optimum autopilot design for maneuverable lifting bodies 11 p1733 A66-23342
Existence and uniqueness of minimum effort control for wide class of effort functions, using generalization of Neustadt problem 11 p1681 A66-23424
Variational problem of Hestenes with necessary conditions for piecewise continuous control variables obtained under weakened hypotheses 11 p1681 A66-23453
Approximate solution for differential equations and restrictive conditions with unbounded controls 11 p1681 A66-23454
Existence of optimal stochastic controls 11 p1682 A66-23457
Existence theorems for optimal control solutions of Pontryagin and Lagrange problems 11 p1725 A66-23458
Sufficient conditions for optimal stochastic control of diffusion processes governed by vector equations satisfying local Lipschitz conditions 11 p1682 A66-23459
Monograph on continuous maximum principle covering design and control of industrial and process engineering systems, dynamic programming, process optimization, etc 12 p1901 A66-23534
Numerical optimization techniques applied to state variable inequality restraints 12 p1901 A66-23602
Optimum design and error analysis of digital integrators for discrete system simulation via quasi-linearization 12 p1828 A66-23840
Subinterval optimization technique for final value control system with magnitude constraint on control variable 12 p1848 A66-23852
Optimum prognosis for random processes by applying asymptotically optimal succession of automatic systems 12 p1848 A66-24006
Statistical probability problems of optimal control of linear systems 12 p1848 A66-24016
Optimal control for mechanical system ensuring optimal stabilization and maximum accuracy at terminal moment through minimization of difference between perturbed and unperturbed motion 12 p1914 A66-24239
Directional convexity included in Halkin derivation of maximum principle, using topological and geometrical arguments related to optimal control theory 12 p1849 A66-24250
Linear distributed parameter systems with bounded input in minimization of difference between desired response and obtainable response 12 p1849 A66-24251
Discrete and self-adaptive systems - International Federation on Automatic Control Congress, Basel, Switzerland, August-September 1963 12 p1851 A66-24323
Efficiency criteria in synthesis of optimum sampled data systems 12 p1852 A66-24324
Specialized procedures for constructing diversified types of optimum control systems for discrete dynamic processes 12 p1852 A66-24327
Optimum design strategies for discrete control systems with minimal time of control 12 p1852 A66-24328
Optimum dual system design for plant investigation and regime requirements 12 p1853 A66-24331
Automatic system optimization techniques using independent random trial signals, relying on correlation functions 12 p1853 A66-24332
Algebraic conditions of controllability and observability and relation between two Riccati-type matrix equations, deriving one from optimal regulation and second from optimal linear filtering 12 p1854 A66-24339
Deterministic optimal control, discussing Bellman dynamic programming method, Pontryagin maximum principle, orbital transfer, interplanetary guidance, etc 12 p1854 A66-24635
Optimal control and stability for stochastic systems, viewing linear diffusion models based upon Gaussian-Markov process as finite dimensional linear system driven by white noise 12 p1854 A66-24637
Digital simulation of scheduling logistic support by helicopter, using Backtrack techniques 12 p1858 A66-24683
Adaptive utilization of communication satellite systems optimizing dynamic traffic handling of combined ground and satellite communications complex, noting network configurations [AIAA PAPER 66-295] 12 p1822 A66-24764
Parametric analysis, penalty-effectiveness tradeoff and system selection for communications satellites, using block digital computer synthesis with subroutines for operational requirements [AIAA PAPER 66-330] 12 p1824 A66-24797
Successive approximations to determine vector in theory of optimal control 13 p2045 A66-25294
Optimum tests for check of working order of system with minimal material losses of safe or fault system functioning 13 p2045 A66-25298
Design of multivariable control system using signal flow graph techniques and establishing optimality criteria 13 p2045 A66-25337
Programming and control - International Conference, Air Force Academy, Colorado Springs, April 1965 13 p2046 A66-25339
Optimal control system geometry, discussing properties of interior points of limiting surfaces, maximum principle and separability concept 13 p2046 A66-25340
General theory of optimal processes, discussing general version of maximum principle 13 p2116 A66-25342
Minimizing functionals on normed linear spaces, discussing steepest descent and rendezvous problems in control theory 13 p2116 A66-25343
Maximum principle for systems described by difference equations, justifying convexity assumptions for approximation of differential equations 13 p2116 A66-25344
Duoplex method applied to nonlinear programming by linearization of expressions with lambda algorithm and determining optimum point 13 p2046 A66-25345
Sufficient conditions for nonlinear system optimal control derived, imposing state and control-variable constraints and fixed initial and terminal times 13 p2046 A66-25346
Programming under uncertainty and stochastic optimal control for two-stage system treated by derivation of equivalent convex program 13 p2047 A66-25351
Mathematical programming methods for solving nonlinear state-constrained discrete optimal control problems 13 p2047 A66-25352
Steepest descent with inequality constraints on control variables 13 p2047 A66-25353
Reducing optimal control variational problems to limit problem associated with Hamilton-Jacobi equation 13 p2047 A66-25423
Synthesis of closed loop optimal system with nonlinearity and integral criterion 13 p2047 A66-25475
Reliability in optimal control problems in terms of probability of faultless operation 13 p2047 A66-25626
Optimum stability of body with fixed point, using stabilizing gyros 13 p2127 A66-25627
Dynamic programming for stochastic systems applied in designing controller for transferring linear system from initial to final position in specified time interval 13 p2048 A66-25852
Property of identification as applied to adaptive control system 13 p2048 A66-25859
Optimum systems with limited process information, analyzing class of input signals and minimizing amplitude of error signals 13 p2048 A66-25888
Sensitivity design of systems with optimal controller structures, using game theory 13 p2050 A66-26061
Combined optimization problem, equivalent to dual control problem, considering determination of optimal control policies for plant under random disturbances, using iterative equations 13 p2051 A66-26065
Optimum control of linear systems in presence of random disturbances, noting choice between cost design and cost variance methods 13 p2051 A66-26066
Approach to sensitivity problem of optimal control systems by introducing performance index 13 p2052 A66-26072
Controllability of general class of nonlinear systems describable by nth order ODE with bounded state and control spaces 13 p2052 A66-26079
Algorithm for optimal controller design with closed loop characteristics 13 p2053 A66-26081
Iterative approximation of rational transfer function in Laplace transform variable s, optimal with respect to given input and output time functions, and deviation from desired output-input-time functional relation 13 p2054 A66-26087
Suboptimal control for system with random or deterministic input by frequency domain techniques, differential approximation and quasi-linearization 13 p2055 A66-26096
Satisfaction approach to synthesis and control of linear systems 13 p2055 A66-26097
Computer programming method for analysis of complex systems 13 p2028 A66-26474
Optimal control problems described by classical boundary problems for equations of parabolic and hyperbolic type 14 p2263 A66-26768
Optimum controller design for systems with unlimited delay 14 p2264 A66-27340
Optimum guidance in two dimensions of constant acceleration low-thrust vehicle spiraling away from and in toward planet 14 p2328 A66-27419
Phase space techniques for optimization of relay control systems with plants having multivalued nonlinearities 14 p2265 A66-27482
Synthesis of linear automatic control system with constant parameters for integral Q-factor, noting effect of small parameters on properties of optimum system 14 p2265 A66-27521
Linear dynamic programming for unrestricted control, noting discrete phase function and unrestricted nonclassical function 14 p2266 A66-27591
Approximation of optimum-control providing stability to system with memory 14 p2266 A66-27593
Approximation to linear bounded phase coordinate control problem and continuous adjoint solution for optimum controller 14 p2266 A66-27632
Convergence of optimal control for denumerable system of differential equations treated by functional-space decomposition 14 p2267 A66-27672
Nonlinear and constrained variational problems in search theory and boundary value problem construction by maximum principle 14 p2324 A66-28190
Optimum control systems for plants described by ordinary nonlinear differential equations or differential equations with constant or variable delay 14 p2268 A66-28278
Optimal controllability and stability criteria

for viscous and inviscid fluid dynamics 14 p2348 A66-28463
 Approximate synthesis of second-order optimum system with controlled coefficients 14 p2269 A66-28479
 Field theory, variational calculus, dynamic programming and Pontryagin maximum principle approaches to plasma optimal controllability 15 p2548 A66-28520
 Optimal control process with stochastic feedback for automatic control system 15 p2469 A66-28540
 Letov problem and analytical construction of optimal controller from motion equations of linear servosystem 15 p2469 A66-29045
 Dynamic system stability, control and observation, noting optimal system synthesis, application of functional analysis, Liapunov function and dynamic programming 15 p2470 A66-29149
 Optimal control process for brachistochrone motion, discussing solution and inversion of synthesis problem 15 p2470 A66-29150
 Analytical dynamics and optimal transfers between orbits 15 p2596 A66-29154
 Low thrust space flight mechanics and optimal control of low thrust engine spacecraft 15 p2596 A66-29157
 System theory including communications systems, filtering, feedback, optimal control, etc 15 p2472 A66-29368
 Variational problem in Banach space including optimal control problems, deriving conditions for extremality and Pontryagin maximum principle 15 p2473 A66-29378
 Dynamic programming for optimum design of sampled data control systems 15 p2474 A66-29628
 Optimum mean square linear interpolation for random sampling, discussing periodic and Poisson sampling 15 p2474 A66-29731
 Dynamics of speed optimum control system with asynchronous two-cycle activating motor 15 p2475 A66-29990
 Synthesis of relay automatic control systems with optimum dynamic properties 15 p2476 A66-29994
 Orbital rendezvous, stressing necessity of measuring absolute angular velocity of line of sight connecting two vehicles, noting details on gyroscopes, coupling, optimization, etc 16 p2743 A66-30314
 Solution of optimal problem with single-cycle switching 16 p2734 A66-30748
 Optimization of linear control systems when placing step limitations on control, using functional analysis 16 p2668 A66-30751
 Synthesis problem of optimum dynamic characteristics of multivariate linear control systems with random input signals 16 p2668 A66-30752
 Optimum control of two-dimensional oscillating system when placing limitations on control, using Butkovskii L-problem of moments 16 p2668 A66-30753
 Optimal control problem of variable structure system, deriving necessary and sufficient conditions for existence of trajectories 16 p2669 A66-30756
 Comparison of nonoptimum and optimum strategies in dual control of inertialess plants in presence of noise in feedback loop 16 p2669 A66-30757
 Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 16 p2670 A66-30832
 Distributed parameter oscillatory system, deriving optimum control formulas via variational method 16 p2670 A66-30833
 Discrete stepwise-proportional-search system, discussing optimum parameter determination 16 p2670 A66-30835
 Multicordinate systems, discussing control method development for plants with large number of correlated inputs and outputs 16 p2670 A66-30837
 Nonlinear automatic control system, discussing optimum tuning via parametric stability region construction 16 p2670 A66-30838
 Random noise effects and optimal control of nuclear rocket start-up for rapid and precise attainment of full power 16 p2745 A66-30881
 Functional analysis methods applied to optimal control system sensitivity

problem 16 p2671 A66-31060
 Servomechanism design, noting optimum response parameters, physical characteristics as functions of inertia, external force, energy dissipation, kinetic energy for operation, etc 16 p2671 A66-31062
 Duality theory of optimal control and resulting duality correspondence between formulation of optimal control and calculus of variations, noting decomposition algorithm 16 p2671 A66-31229
 Reciprocal optimal control problem and several variations, using inequalities based on convexity assumptions 16 p2671 A66-31232
 Uniqueness of solutions of equations derived from Pontryagin maximum principle for optimal control problem with free right end of trajectory and fixed terminal time 16 p2672 A66-31339
 Optimal trajectories of nonlinear discrete-time systems determined by second-order gradient method for use in dynamic programming 16 p2672 A66-31341
 High performance aerodynamic vehicle design, noting configuration variables, optimum performance parameters, vehicle force characteristics, optimization of hypersonic aircraft performance, etc [AIAA PAPER 66-486] 16 p2635 A66-31476
 Linear system damping while using minimum control intensity treated as functional analysis problem 16 p2672 A66-31504
 Necessary conditions of calculus of variations applicable to optimization of control processes dependent on discontinuity point time and location 16 p2672 A66-31520
 Text on relation between dynamic programming and variational calculus, noting application to Mayer problem, optimization and stochastic processes, etc 16 p2739 A66-31750
 Stochastic analysis of systems described by linear differential equations subject to random disturbances, noting application to variational behavior of optimal control systems 17 p2900 A66-32076
 Variation of mean square error of linear system with time, applying parameter perturbation process to random or deterministic input 17 p2901 A66-32289
 Modern control theory applied to system design for reduction of sensitivity of system to plant-parameter variation by use of feedback 17 p2901 A66-32290
 Dynamic programming applied to synthesis of linear optimal or suboptimal multivariable control systems in which control-signal vector depends only on certain prescribed state variables 17 p2901 A66-32291
 Optimal system determined from maximum probability criteria of target hitting 17 p2901 A66-32571
 Minimum control system optimization, noting adaptation with respect to minimum mean square error, statistical criterion calculation, etc 17 p2901 A66-32572
 Switching surface construction using one to one correspondence between points in controllability region and points on surface of n-th order system 17 p2902 A66-32575
 Accuracy problems in control systems, discussing error assessment and accuracy estimates of optimal control 17 p2902 A66-32576
 Maximum principle application to optimal control procedure, minimizing transient response and decreasing effect of random changes in system parameters 17 p2902 A66-32577
 Optimal control theory in design of aerodynamic shapes, flight paths, guidance and control logic, data processing logic, etc 17 p2950 A66-32682
 Mathematical problems arising in theory of optimal control in regular dynamic systems 17 p2903 A66-33096
 Simplification of steepest-ascent method for determining optimal control program by introducing penalty method to eliminate adjoint variables 18 p3089 A66-33603
 Dual control of plant with random amplification factor as Bayesian problem 18 p3089 A66-33738
 Optimum three-dimensional attitude control of spacecraft with two pairs of reaction jets 18 p3244 A66-33863

Nonlinear control laws for takeoff and landing of circular-orbit winged glide space vehicle 18 p3132 A66-33880
 Russian research dealing with optimal control functions of spacecraft powered by low thrust rocket engines 18 p3228 A66-33883
 Injection phenomena of theory of perturbational optimal guidance of space vehicles 18 p3132 A66-33887
 Discontinuity condition in optimal control problem, considering motion of points in n-dimensional space separated by hypersurface 18 p3126 A66-33930
 Synthesis of specific optimum control law for optimum stabilization problem of tumbling satellite via Hamilton-Jacobi theory, comparing results with optimum solution 18 p3246 A66-34255
 Digital optimal control of steerable antennas using radiation lobe geometry, dynamic programming and control strategy principles 18 p3081 A66-34269
 Optimal control minimizing quadratic functional for plant, showing difference in certain phase coordinate region from linear control 18 p3092 A66-34992
 Pontryagin method applied to choice of optimal minimax controls of dynamic systems 18 p3092 A66-34998
 Optimal control for plant with polynomial ratio as transfer function, noting general performance index which involves output and control variables 19 p3323 A66-35341
 Analog computer solution of high-order optimal control problem, noting application of Pontryagin maximum principle and extension to two-point boundary value problems 19 p3306 A66-35536
 Sensitivity of closed loop optimal control system to parameter variations and external perturbations 19 p3324 A66-35581
 Minimum-energy control law derived for attitude acquisition of satellite about single axis, using reaction-wheel control system [AIAA PAPER 65-434] 19 p3468 A66-35602
 Ion engine satellite control system noting design and laboratory tests [AIAA PAPER 65-417] 19 p3450 A66-35616
 Optimization of control loop type for minimum threshold which is function of modulation index, obtaining results using sine wave modulation 19 p3301 A66-35695
 Sufficient conditions of optimality having control region dependent on phase coordinates 19 p3325 A66-35858
 Optimal control of time-varying linear systems subject to additive noises and load disturbances, based on exact plant equations 19 p3325 A66-35877
 Multifactor Max-Rankine optimization technique evaluated from point of system performance, minimum mean square error, intrasystem interactions, etc 19 p3325 A66-35878
 Newton-Raphson method solution of variational problems with inequality restraints on control variables 19 p3388 A66-35880
 Steepest descent method of solving multiple-arc optimal control problems of orbital transfer 19 p3388 A66-35881
 Optimal and suboptimal design of vehicular control and proportional navigation system based on Pontryagin maximum principle 19 p3397 A66-35882
 Controller synthesis for three-axis reaction-wheel control of space vehicle in negligible gravitational field, using optimization theory and Pontryagin maximum principle 19 p3468 A66-35883
 System consisting of communications satellites distributed in nonsynchronous orbits and set of ground stations, formulating link scheduling problem as optimum control 19 p3303 A66-35884
 Book on methods in astrodynamics and celestial mechanics including libration points, satellite motion, orbit determination, optimization, optimal control, etc 19 p3460 A66-35887
 Optimal control for stochastic differential equation system, noting existence and uniqueness of solution for coefficients satisfying Lipschitz condition 19 p3325 A66-35983
 Sensitivity methods in control theory - International Symposium on Sensitivity Analysis, Dubrovnik, Yugoslavia, August-

September 1964 19 p3326 A66-36009
Sensitivity theory of nonlinear sampled data control system, establishing conditions for stability of equilibrium 19 p3327 A66-36012
positions 19 p3327 A66-36012
Solution of two-point boundary problems in optimal control syntheses in which sensitivity coefficients for differential equations satisfy jump conditions at discontinuity point 19 p3327 A66-36017
Sensitivity of performance of optimal control systems to plant parameter variations 19 p3329 A66-36027
Optimal control system sensitivity to inaccuracies determined in error measurement of initial state 19 p3329 A66-36028
Optimal stochastic control system with control of linear plants approximating characteristics of airframes, allowing plant parameters to vary 19 p3329 A66-36030
Laser output energy controller having eight-to-one improvement in pulse repeatability in solid state lasers 19 p3374 A66-36034
Necessary and sufficient condition of existence of extremal trajectories of nonlinear system within framework of optimal control theory 19 p3330 A66-36251
Coordination technique for synthesis of dynamic multilevel control systems 19 p3334 A66-36667
Stability and sensitivity of terminal linear feedback control systems 19 p3334 A66-36668
Numerical computation of optimal control bypassing two-point boundary problem, considering aircraft landing and boiler control 19 p3334 A66-36678
Optimal control of dynamic systems with minimax type performance index, discussing application of proposed method of solution 19 p3334 A66-36686
Gain specification of linear controller for large launch booster, using new application of linear control theory 19 p3471 A66-36687
Linear optimal control techniques for design of control system for short-range stationkeeping of large assault helicopter 19 p3280 A66-36688
Linear optimal control in systems with uncertain parameters, noting application to design of compensating network for flexible booster for uncertain value of first bending mode 19 p3471 A66-36696
Parameter adjustment model reference adaptive control of nuclear rocket engine, noting design parameters, system performance, propellant savings estimates and dynamic stability 19 p3398 A66-36699
Nonlinear and nonstationary finite differential system identification by quasi-linearization and differential approximation 19 p3335 A66-36701
Generalizations of functional Lagrange expansion to multivariable nonlinear systems such as state space and functional equations in s domain for control problems application 19 p3391 A66-36704
Optimum design of piecewise-linear switching functions for linear, constant, lumped systems with single ideal relay controller 19 p3336 A66-36708
Pattern recognition techniques applied to process identification, examining capability of mode learning machines for on-line identification of both linear and nonlinear processes 19 p3310 A66-36712
Parameter optimization using steepest descent approximation for systems subject to worst bounded disturbance in order to provide performance index minimization 19 p3337 A66-36713
Optimization criterion capable of simultaneously considering different performance aspects applied to linear second-order control system with acceleration, velocity and displacement feedback loops 19 p3337 A66-36714
Optimal control and dynamics of class of hybrid state continuous time systems described by differential equations combined with multistable element 19 p3337 A66-36734
Pontryagin principle extended to control systems, computing optimal control laws 19 p3337 A66-36735
Existence of inflection points in cost vs

terminal time curve for linear minimum energy regulator 19 p3339 A66-36745
State vector determination for digital optimal control of system characterized by matrix equation 19 p3339 A66-36746
Generalized Lur coordinates used in canonical forms for controllable systems, with applications to optimal nonlinear feedback 20 p3535 A66-36848
Suboptimal adjoint-vector control theory for linearization of feedback control systems independent of nominal trajectory 20 p3535 A66-36849
Weierstrass necessary condition and basic equations for optimal control of initial or boundary states of continuum mechanical MHD and hypersonic partial differential systems 20 p3535 A66-36853
Synthesis procedure which insures good control system performance by adding to performance index term involving sensitivity coefficients 20 p3535 A66-36854
Iterative computational procedures applicable to optimal control problems including treatment of minimum-error regulator, minimum-error rendezvous and minimum-fuel terminal control 20 p3536 A66-36855
Optimum control laws for bilinear system, using distributed parameter model with optimizing procedures including bang-bang control and optimum feedback 20 p3598 A66-36856
Synthesis parametry of ensemble-averaged second-order polynomial approximation to performance index of optimal guidance linear feedback control 20 p3589 A66-36858
Wiener filtering theory for stationary ergodic inputs with known spectral densities and optimal control transfer functions of random-input nonlinear saturating systems with random unwanted disturbances 20 p3536 A66-36859
Trajectory corrections of space vehicle launched toward planet, noting fuel consumption 20 p3595 A66-36872
Optimum control theory applied to shipboard inertial navigation systems with position and azimuth errors because of gyroscope drift-rate fluctuations 20 p3595 A66-36873
Optimal self-adapting control system analysis with external actions information lacking 20 p3536 A66-36882
Optimal control analysis of system behavior described by linear stochastic differential equations 20 p3537 A66-36893
Space control system using digital SUBORDINATE OR logic blocks to add optimum response capability to maneuver commands 20 p3662 A66-37229
Time domain characteristics application to pulse amplifier design, noting correlation with results obtained via frequency method 20 p3538 A66-37582
Noise effect on synthesis of discrete systems with and without feedback channel for transmitting continuous messages, using binary signal and criterion of minimum rms error 20 p3538 A66-37745
Dynamic programming for optimal algorithm for external control in presence of noise at system input and output 20 p3538 A66-37746
Truncated sequential life acceptance tests of AGREE Task Group Three type, noting that such tests while useful are not optimum 20 p3574 A66-37968
Book on variational methods in control engineering covering optimal processes based on maximum principle, variational calculus and dynamic programming 20 p3539 A66-37985
Integral criterion based on absolute value of error, integral-square-ideal error, used as measure of distortion of communication system 20 p3539 A66-38285
Optimal control problem, considering system of linear differential equations subject to constraint 21 p3717 A66-38536
Shortest route problem with constraint, using set of nodes 21 p3717 A66-38537
Optimal control problem for linear systems with phase constraints 21 p3717 A66-38540
Matrix quadratic equation solution derivation applied in finding steady state solutions of Riccati differential equations

with constant coefficients 21 p3755 A66-38598
Closed loop optimization of fixed configuration systems termed specific optimal control solved by applying Pontryagin maximum principle to reduce problem to two-point boundary value problem 21 p3718 A66-38668
Minimum impulse transfer of rocket between coplanar intersecting Keplerian orbits [AIAA PAPER 66-93] 21 p3811 A66-38696
Computational limitations of onboard orbiting computers such as fixed point arithmetic, limited word length and solution techniques 21 p3766 A66-38884
Optimum parameters for low-thrust propulsion system with energy storage for specific maneuver 21 p3808 A66-38974
Optimal discrete binary system of electrical control of beam position of phased linear antenna array 21 p3712 A66-39251
Optimal control of elastic flight vehicles, describing axis oscillations by equations of beam with variable cross section 21 p3768 A66-39279
Variation of functional determined on trajectories of differential equation systems with discontinuities, discussing application to optimal control problems 21 p3758 A66-39280
Synthesis of optimal Liapunov-Bellman function, noting sequential solution method for independent variables and method using first-order partial differential equation 21 p3758 A66-39281
Filter theory method applied in solving analytical construction problems for optimal controllers, noting existence of Fourier transform and Pally-Wiener condition 21 p3719 A66-39282
Optimal control of variable structure system in presence of perturbation, discussing quality control and preservation of sliding plane 21 p3719 A66-39285
Minimum mean-square-error design of distributed-parameter control systems characterized by Laplace transform transfer functions 21 p3720 A66-39430
Control laws providing attainment of prescribed attitude and acceleration to prescribed speed in minimum time or fuel consumption for VTOL aircraft 21 p3768 A66-39606
Optimizer for shaping control signal of hunting-type system with plant in form of nonlinear inertialess element, examining inadequacy for system operation 22 p3883 A66-39659
Numerical method of solving optimum control problems through reduction to solution of simple minimization problems by constructing suitable sequence of auxiliary functionals 22 p3938 A66-39900
Optimization multistage ballistic missile system operating drag environment by solution of physical discontinuity problems [AIAA PAPER 66-91] 22 p3986 A66-40362
Error correcting problem in space trajectory of continuous powered space vehicle, discussing optimal terminal guidance [AIAA PAPER 65-696] 22 p3945 A66-40367
Linear dynamic programming for unrestricted control, noting discrete phase function and unrestricted nonclassical function 22 p3884 A66-40440
Optimum trajectories between material points moving along same orbit in gravitational field of spherically symmetric central body, obtaining numerical solutions for circular initial orbit 22 p3980 A66-40462
Optimum stabilization of axisymmetric satellite by system of n reactive jets 22 p3986 A66-40464
Minimum of maximum overload in braking of vehicle in atmosphere, examining aerodynamic lift on basis of Pontryagin maximum principle 22 p3986 A66-40465
Optimal regulation of linear symmetric hyperbolic systems of partial differential equations with finite dimensional control 22 p3884 A66-40528
Deduction procedure for generalized Clebsch necessary condition for singular extremals for which final form of accessory minimum problem is nonsingular Bolza problem 22 p3940 A66-40530
Maximum principle shown to be necessary and sufficient optimality condition for

- dynamic programming method for condition of existence of regular synthesis 22 p3884 A66-40531
- Optimization of linear control system by expressing quadratic performance index as quadratic functional of control functions 22 p3884 A66-40533
- Optimal averaging theories of controls of dynamic systems 22 p3885 A66-40683
- Plasma in flat-electrode accelerator, examining optimum accelerator length associated with equilibrium between acceleration processes in plasma and diffusive scattering of plasmoid 22 p3958 A66-40937
- Synthesis of linear multivariable control systems in statistical dynamics, using method of factorization of spectral matrices 23 p4048 A66-41394
- Existence and uniqueness theorems in Poincare-Liapunov theory for multipoint control boundary value problems 23 p4085 A66-41539
- Optimal feedback control of random discrete-time system using Pontryagin maximum principle 23 p4049 A66-41543
- IEEE Region Six Conference, Tucson, April 1966, Volume 2 23 p4049 A66-41600
- Pontryagin maximum principle applied to solution of optimal control problems by hybrid computer, using digital parameter optimizer to solve two-point boundary value problem 23 p4042 A66-41601
- Numerical solution of BVP for optimal control parameters in trajectory analysis 23 p4051 A66-41617
- Optimization of nonlinear control systems by means of Bellman equation and dimensional analysis minimizing integral square error 23 p4051 A66-41695
- Averaging controls of discontinuous stochastic system with sequence of discontinuities forming Poisson flow of events 23 p4051 A66-41782
- Asymptotically optimal stochastic automata in random medium, discussing penalization 23 p4051 A66-41840
- Functional analysis applied to optimum control by reduction of variational problem to finite dimensional analysis and calculation of algorithms for use with digital computer 24 p4231 A66-42470
- Optimum control problems solved by numerical methods based on variation in state space 24 p4231 A66-42471
- Maximum probability criterion on output coordinates of system for selection of parameters of optimal nonlinear control system 24 p4188 A66-42477
- Analytic design of optimal digital controller, resolving problem of choice of weighting coefficients of functional representing generalized rms estimate of transient 24 p4188 A66-42481
- Approximation of optimum control providing stability to system with memory 24 p4189 A66-42726
- Search theory extremal problems, considering theorems in terms of maximum principle for finding optimal strategy 24 p4232 A66-42750
- Optimization of guidance laws to achieve orbital rendezvous with propulsion system of only moderate throttling capability 24 p4235 A66-42766
- OPTIMIZATION**
- SA BOLZA PROBLEM
- SA FLIGHT OPTIMIZATION
- SA TRAJECTORY CONTROL
- SA TRAJECTORY OPTIMIZATION
- Discrete optimization problem approach and evaluation of results of applying it to variety of traveling salesman problems 03 p0387 A66-12622
- Optimization of linear servosystem comprising ideal proportional, integral and differential control regulator and order system 03 p0350 A66-13095
- Programming techniques for optimizing computer use especially in space tracking network 04 p0489 A66-13609
- Optimum transfer function determination, using Liapunov method and superposition theorem 06 p0864 A66-16683
- Optimization of transmitted signal and receiving filter for data transmission system with fixed channel and detection process 08 p1183 A66-18932
- Optimization of quality control procedures in searching for faults, using mathematical models 08 p1232 A66-19767
- Optimum magnitude of jet-noise reduction in cylindrical muffler 13 p2056 A66-25090
- Dynamic optimization and minimizing kernel function for dual control problem 13 p2117 A66-25348
- Optimum design of emitter follower transistor logic /ETL/ circuits and comparison with various other logic circuits 14 p2263 A66-27023
- Statistical optimization of rate-composite inertial navigation system based on Phillips theory of servo systems 14 p2328 A66-27364
- Gain optimization problem for antenna arrays responding to quasi-monochromatic periodic signal 14 p2240 A66-27929
- Mathematical models of system reliability, redundancy and design optimization 14 p2227 A66-28425
- Optimization of data acquisition and reduction systems generated by random vibration, considering dynamic ranges 16 p2655 A66-30447
- Optimizing performance of ultra high thermal vacuum system 16 p2681 A66-30499
- Parameter selection for optimum characteristics of machine part shock absorbers subject to orthogonal impact pulses 17 p2930 A66-32814
- Program producing optimum structural design configurations when restrictions on variables and aims of design are given as input data [AIAA PAPER 66-531] 18 p3250 A66-33663
- Optimal processes in sampled data control system 18 p3089 A66-33734
- Optimal communication system selection methods 18 p3069 A66-34254
- Optimal solution method for linear program in which second member and several constraint matrices depend linearly on one parameter 18 p3127 A66-34389
- Optimum estimate of nonlinear process in presence of non-Gaussian noise and disturbances, deriving algorithm for correcting approximation 19 p3323 A66-35340
- Computer optimization of baseband design of angle-modulated unified carrier space-ground communication link 19 p3299 A66-35664
- Optimal design of one-way and two-way coherent communication links for space communication 19 p3300 A66-35667
- Optimization techniques - Symposium, Carnegie Institute of Technology, Pittsburgh, April 1965 19 p3307 A66-35867

- Optimal design of one-way and two-way coherent communication links for space communication 22 p3864 A66-40060
- Intermediate-thrust arcs in central force field satisfying optimality conditions, noting that motions are degenerate solutions of Euler equations 22 p3980 A66-40460
- Optimum trajectory of pulsed coplanar orbital transfer in central Newtonian force

- field with restrictions placed on distance to attracting center 22 p3980 A66-40461
 Programming tasks optimization through infinite iteration 22 p3941 A66-40542
 procedure 22 p3941 A66-40542
 Buckling of stiffened cylindrical shells under various loads and load combinations, noting optimization procedure for elastic stability [ICAS PAPER 66-13] 22 p3996 A66-40673
 Optimization of VTOL control concepts with and without stabilization compared with six degree of freedom motion simulator, noting system failure effects and nonlinear concepts [ICAS PAPER 66-9] 22 p3851 A66-40675
 Adaptive antenna system circuitry for maximum signal to noise ratio of signals reaching ground station from deep space probe 22 p3881 A66-40750
 Optimal lumped constant dispersive network design with inductors and capacitors functioning independently 23 p4034 A66-41015
 Pontryagin maximum principle minimization of time frequency transition in white noise driven phase-locked loop 23 p4048 A66-41316
 Optimum filtration of signals in presence of arbitrary interference, using orthogonal function series 23 p4037 A66-41514
 Optimum microwave filters with even number of sections, using first-order Chebyshev polynomial to obtain equivalent circuit 23 p4037 A66-41515
 Fixed filter structures optimized according to criterion of minimizing average mean square error for nonstationary and statistical description of signals in noise 23 p4039 A66-41591
 Optimum impulsive transfers between noncoplanar elliptic orbits having collinear major axes and common center of attraction, noting overlap configuration of initial and final elliptic orbits 23 p4129 A66-41686
 Optimal redistribution of lifting surface between wing and stabilizer-elevator unit ensuring minimum reduction of lift-drag ratio 23 p4011 A66-41796
 Optimization of lift-drag ratio of power law half-bodies in hypersonic viscous flows, considering interrelation between body shape and skin friction 23 p4012 A66-41915
 Combustion of atomized liquid fuels, noting optimum value of atomization fineness affecting completeness of combustion 24 p4293 A66-42208
 Reverse flow and deformation optimization theories applied to subsonic aeroelasticity of lifting surface in harmonic oscillation, using numerical integration and computer programs 24 p4157 A66-42343
 Integral equations for weight function of optimum filter and correlation function of random absolute error 24 p4188 A66-42475
 Improved central tube configuration to optimize design of pressurization multicell cylindrical shell, comparing structural efficiency with other shells 24 p4291 A66-42794
- OPTIMUM THRUST PROGRAMMING**
 Air-augmented rocket engine used as propulsion system for carrier vehicle 02 p0278 A66-11666
 Optimum rendezvous trajectories in same circular orbit with continuous thrust 03 p0432 A66-12803
 Linear theory of optimum variable thrust rendezvous trajectories with power limit propulsion system 04 p0575 A66-13457
 Fehlberg integration method used to calculate optimum interplanetary transfer orbits at low thrust acceleration 04 p0576 A66-13527
 Optimal interplanetary guidance, discussing optimization of variable observation rate and correction schedule to achieve desired terminal accuracy 04 p0544 A66-13992
 General theory of minimum fuel free space trajectories 06 p0954 A66-16624
 Variational problem for optimum acceleration of low thrust vehicle that attains hyperbolic velocity after departure from near circular orbit 06 p0957 A66-17167
 Minimum fuel transfer solution of Lawden problem involving finite number of impulse thrusts separated by coasting arcs [AIAA PAPER 66-7] 07 p1136 A66-17881
 Multistage extremum searching process leading to development of dynamic programming system, discussing application 09 p1362 A66-20628
 Optimum impulsive transfer between elliptic and noncoplanar circular orbits, noting paths with up to three apsidal impulses 09 p1459 A66-20884
 Optimal transfer trajectories among coplanar elliptical orbits, noting application of one, two or three finite impulses 14 p2382 A66-27562
 Canonical transformation in optimal steering and cut-off-relight programs for orbital transfer about central field 14 p2387 A66-28182
 Optimum flight of axially propelled nonlifting vehicles through resisting medium calculated by calculus of variations [AIAA PAPER 66-485] 16 p2799 A66-30524
 Booster rocket ascent trajectory optimization, using steepest ascent method [AIAA PAPER 64-663] 16 p2801 A66-30883
 Nonlinear optimal control problems with control appearing linearly, using Pontryagin maximum principle [AIAA PAPER 65-702] 19 p3468 A66-35905
 Optimum thrust nozzle contours for chemically reacting gas flows, obtaining set of partial differential equations for gas dynamic properties [AIAA PAPER 66-638] 19 p3277 A66-36599
 Minimum fuel transfer between neighboring elliptic orbits for low-thrust power-limited propulsion system, using Pontryagin maximum principle, vehicle motion and fuel consumption 20 p3645 A66-36875
 Optimization of supersonic portion of three-dimensional flow geometry in rocket motor nozzle for maximum thrust [AIAA PAPER 65-568] 23 p4007 A66-41108

- ORBIT CALCULATION**
 SA MINIMUM VARIANCE ORBIT DETERMINATION /MINIVAR/
 Atmospheric density and heating as function of altitude determined from satellite drag measurements [AIAA PAPER 65-507] 01 p0134 A66-10192
 Perturbation technique to study three-body problem of motion of close satellite [AIAA PAPER 65-690] 01 p0134 A66-10236
 Geometric restraints on orbit about Mars noting trajectories of unmanned Mars exploration satellite, payload, orbit inclination, etc 01 p0137 A66-10810
 Quasi-linearization used to determine orbits from observational data such as angular data, range and range rate 02 p0288 A66-11547
 Computation capability onboard manned spacecraft of out-of-plane maneuvers achieving specified ground track 02 p0256 A66-11857
 Launch vehicle guidance, premidcourse orbit determination and midcourse maneuver of Ranger IX spacecraft lunar mission and merger 02 p0260 A66-12056
 Smoothing, filtering and prediction problems of filtering theory correspond in field of orbit determination to ephemeris reconstruction, navigation and orbital prediction 05 p0631 A66-14630
 Mass accretion and variation in shape and dimensions of comet 05 p0761 A66-15130
 Solution of extremal problems of celestial mechanics 05 p0764 A66-15318
 Atlas-Agena and Atlas-Centaur launch vehicles to investigate comets 06 p0951 A66-15903
 Moiniva type communication satellite, discussing optimum orbital requirements for maximum coverage, phasing, etc 06 p0952 A66-15907
 Planet Mercury rotation theory, applying motion of rigid system in inverse square field 06 p0955 A66-16732
 Orbit determination of Everhart comet 07 p1134 A66-17522
 Tracking geometry and dynamics of lunar satellite, estimating orbital elements and lunar gravitational field parameters through Earth-based range and range rate observations [AIAA PAPER 66-39] 07 p1139 A66-18448
 Rapidly convergent iterative unique determination of linear steering function for desired orbit conditions 08 p1289 A66-18826
 Orbital, geocentric, heliocentric and heliographic positions of cometary nuclei and tails in ecliptic or parabolic orbit 08 p1292 A66-19198
 Classical spectroscopic binary star orbit determination techniques to provide orbital elements for lunar satellite tracked by Earth-based Doppler radar [AIAA PAPER 66-40] 08 p1298 A66-19727
 Ground antenna for satellite tracking and orbit calculation 09 p1355 A66-20587
 Orbital elements of 13 asteroids, using digital computer and taking Jupiter and Saturn perturbations into account 10 p1606 A66-21262
 Orbits of Tsuchinshan 1 /1965b/ and Tsuchinshan 2 /1965c/ 10 p1606 A66-21266
 Teilar orbit prediction method compared with accuracy of solutions obtained by Brouwer, by Izsak and by Hall-Gawlowicz-Vahradian 10 p1609 A66-21790
 Second degree sectorial harmonic of Earth gravitational potential based on 338-day variation in revolution period of Syncom 11 p1697 A66-22436
 Motion of near-Earth satellite under sole influence of ellipsoidal polar-flattened Earth 11 p1774 A66-23001
 Satellite lifetimes in low near-circular orbits predicted from rate of change of orbital period 11 p1776 A66-23497
 Compensated coordinates of artificial Earth satellites from synchronous observations at two given points on Earth surface 12 p1824 A66-24875
 Onboard guidance scheme as backup to Earth-based orbit determination techniques and for approach navigation and orbit correction in planetary capture maneuver 13 p2123 A66-25253
 Pulse radar observation of Moon and four nearest planets, determining values of round-trip-delay and Doppler shift for application to orbital ephemerides 13 p2181 A66-25535
 Short-period Trojan orbits in restricted three-body problem numerically determined, using Jupiter and Sun as principal masses 13 p2185 A66-25807
 Analytical continuation and first-order stability of short-period orbits originating at equilateral center of libration in Sun-Jupiter system 13 p2048 A66-25808
 Astronomical and orbital data of comet Ikeya-Seki noting elements for parabolic orbit, elliptical orbit, etc 13 p2188 A66-26319
 Inclusion of third zonal harmonic in accurate reference orbit of artificial satellite 14 p2378 A66-27112
 Orbit measurements by radar with random error and radar with random and bias errors [AIAA PAPER 65-31] 14 p2381 A66-27420
 Mean element determination for Vinti satellite theory 14 p2381 A66-27441
 Polynomial approximation method for determining satellite orbits from large-time-

- interval trajectory measurements 15 p2592 A66-28488
- Orbit of Comet 1959 IX
- /Mrkos/ 15 p2593 A66-28647

- Powered reentry of vehicle into planet atmosphere with propulsion program where thrust equals drag and trajectory is minor

circle 03 p0432 A66-13130
 Fehlbeg integration method used to
 calculate optimum interplanetary transfer
 orbits at low thrust
 acceleration 04 p0576 A66-13527
 Optimum motion in central force field,
 discussing orbital transfer for circular orbits
 when energy source is
 controllable 04 p0576 A66-13560
 Optimum trajectory between coplanar
 orbits for variable-mass particle in central
 field 05 p0764 A66-15319
 Transfer of point over ellipse between two
 coplanar circular orbits in Newtonian
 gravitational field determined by method of
 variations 05 p0765 A66-15423
 Numerical determination of optimum two-
 impulse orbital transfers between inclined
 elliptical orbits 05 p0769 A66-15793
 Synchronous orbit communications
 satellites, noting advantages in reliability
 and cost 05 p0771 A66-15828
 Impulsive approximation, basis for
 trajectory analyses for space missions in
 which finite-thrust powered phases of finite
 duration are replaced by instantaneous
 changes of velocity
 [AIAA PAPER 66-12] 06 p0953 A66-16257
 Prediction technique for impulse required
 to supplement aerodynamic rotation of
 satellite orbit plane
 [AIAA PAPER 66-59] 06 p0956 A66-17085
 Use of lifting upper stage to achieve large
 offsets during ascent to orbit
 [AIAA PAPER 66-60] 06 p0960 A66-17108
 Minimum impulse transfer of rocket
 between coplanar intersecting Keplerian
 orbits
 [AIAA PAPER 66-93] 08 p1290 A66-18999
 Optimization of interplanetary transfer
 between coplanar circular orbits with small
 thrust acceleration based on Pontryagin
 maximum principle 09 p1457 A66-20586
 Optimum energy transfer from hyperbolic
 orbit in Newtonian central force field in
 absence of transfer time
 limitations 11 p1774 A66-23035
 Plane optimum transfer of point of
 variable mass between two elliptical orbits
 centrally directed Newtonian force
 field 11 p1774 A66-23036
 Deterministic optimal control, discussing
 Bellman dynamic programming method,
 Pontryagin maximum principle, orbital
 transfer, interplanetary guidance,
 etc 12 p1854 A66-24635
 Plane change split techniques for circularly
 orbiting satellite by aerodynamic propulsive
 and impulsive maneuvers 14 p2384 A66-27894
 Analytical dynamics and optimal transfers
 between orbits 15 p2596 A66-29154
 Impulse functions associated with two-
 impulse transfer between nearly tangent
 noncoplanar coplanar elliptical
 orbits 16 p2805 A66-31539
 Bibliography of programmed low-thrust
 trajectories and optimal low-thrust
 trajectories 17 p3001 A66-32350
 Second-order optimal elliptical orbital
 transfer trajectory between two coplanar
 circular orbits in Newtonian force
 field 17 p3003 A66-32586
 Russian research dealing with optimal
 control functions of spacecraft powered by
 low thrust rocket engines 18 p3228 A66-33883
 Computer iteration scheme for calculating
 arbitrary hyperbolic transfer orbit in field
 of attracting center, based on Gauss
 equations 19 p3455 A66-35278
 Steepest descent method of solving
 multiple-arc optimal control problems of
 orbital transfer 19 p3388 A66-35881
 Minimum fuel transfer between
 neighboring elliptical orbits for low-thrust
 over-limited propulsion system, using
 Pontryagin maximum principle, vehicle
 motion and fuel
 consumption 20 p3645 A66-36875
 Rendezvous-maneuver of thrusting space
 vehicle with unthrusting target flying in
 elliptical orbit, examining computation of
 rendezvous acceleration for orbital
 transfer 20 p3662 A66-37390
 Rendezvous maneuver with effect of
 velocity changes on orbital transfer of near-
 earth satellite 20 p3663 A66-37532
 Orbital transfer and rendezvous maneuvers
 between inclined circular orbits, particularly

bielliptic transfer with plane change,
 Hohmann transfer with plane change and in-
 plane modified Hohmann
 transfer 20 p3657 A66-38158
 Minimum impulse transfer of rocket
 between coplanar intersecting Keplerian
 orbits
 [AIAA PAPER 66-93] 21 p3811 A66-38696
 Impulsive approximation, basis for
 trajectory analyses for space missions in
 which finite-thrust powered phases of finite
 duration are replaced by instantaneous
 changes of velocity
 [AIAA PAPER 66-12] 21 p3811 A66-38698
 Asymptotic solution for optimum power-
 limited orbit transfer 21 p3811 A66-38736
 Euler-Lambert equation for orbital transfer
 in Newtonian field solved by approximate
 method 22 p3981 A66-40475
 Use of lifting upper stage to achieve large
 offsets during ascent to orbit
 [AIAA PAPER 66-60] 23 p4132 A66-41114
 Lambert theorem for orbital transfer in
 elliptic, parabolic and hyperbolic
 cases 23 p4127 A66-41117
ORBITAL VELOCITY
 Two-body problem with elliptical formulas
 for orbit changes of predetermined points
 caused by small drive thrusts, considering
 effect of tangential velocity
 change 08 p1298 A66-19752
 Newtonian and relativistic analysis of
 orbits of electromagnetically neutral test
 particles in magnetic
 universe 12 p1914 A66-24567
 Direct and orbit flight modes considered
 for unmanned lander on Mars, noting
 ballistic coefficients, flight path angles,
 targeting capability, etc 13 p2180 A66-25243
 Interplanetary trajectory adaptive
 gyrocompass system, discussing orbital
 angular velocity, angular acceleration, error
 sensitivity coefficients, error sources,
 etc 13 p2124 A66-25256
 Atmospheric reentry trajectory of space
 vehicle at orbital velocities and constant
 lift-drag ratio 18 p3244 A66-33879
 Optimum trajectories between material
 points moving along same orbit in
 gravitational field of spherically symmetric
 central body, obtaining numerical solutions
 for circular initial orbit 22 p3980 A66-40462

 GLC-mass spectrometric stereoisomer
 discrimination as means of detecting
 biological processes 18 p3059 A66-34372
 Mass spectrometry and gas chromatography
 in analysis of organic compounds present in
 extraterrestrial bodies to provide
 information on existence of
 life 18 p3059 A66-34373
 Carbonaceous meteorite analysis, indicating
 possible biological
 substances 18 p3232 A66-34374
 Periodic volt-ampere curves of anode
 oxidation mechanism of hydrocarbons,
 alcohols, ketones, aldehydes and carboxylic
 acid to carbon dioxide, using Raney
 platinum catalyst 19 p3295 A66-36291
 Phthalocyanine crystal phase change effect
 on electric conductivity 22 p3860 A66-39921
 Formation of organic compounds under
 conditions of thermal equilibrium, noting
 aromatic compounds in solar nebula and
 gases activated to plasma
 state 22 p3860 A66-40483
ORGANIC FLUORINE COMPOUND
 High temperature analysis of mechanism
 and kinetics of tetrafluoroethylene
 decomposition and oxidation in excess argon
 behind shock waves, using UV absorption
 and mass spectrometry 04 p0571 A66-13650
ORGANIC LASER
 Peripheral modes in chelate laser, noting
 luminescence emitted by axis of cylindrical
 cell and lateral face 05 p0697 A66-15171

Organic laser systems including luminescence for achieving laser action, fluorescent and phosphorescent systems and chemistry and spectroscopic properties of rare earth chelates 20 p3576 A66-36970

Selective feedback and saturation mechanisms of Raman lasers using secondary Raman lines, emphasizing cyclohexane 20 p3579 A66-37777

ORGANIC LIQUID

Fluids and elastomers for low temperature heat transfer and hydraulic systems [ASLE PREPRINT 65-LC-7]

02 p0249 A66-12256

Saturated film-boiling heat transfer coefficient measurements of ethanol, pentane and Freon 113 at atmospheric pressure

[ASME PAPER 65-AV-37] 11 p1786 A66-22468

Fluids and elastomers for low temperature heat transfer and hydraulic systems [ASLE PREPRINT 65-LC-7]

12 p1901 A66-24992

Organic solvents and water classed according to increase in oscillator strength of absorption bands of praseodymium, samarium, neodymium and erbium ions 13 p2168 A66-25948

ORGANIC MATERIAL

Organic matter connected with biological activity in Orgueil meteorite, discussing optical rotation 01 p0134 A66-10249

Dielectric organic polymers in microcircuit communications modules 02 p0195 A66-11289

Exobiological trend and problems indicating types of organic matter on planet and origin and transfer of organisms in solar system 02 p0182 A66-11611

Composition, properties and electrical characteristics of organic semiconductors 09 p1425 A66-20186

Text on evolution, interpreting functions of body organs in terms of chemical processes and tracing development of complex organic molecules 10 p1487 A66-22065

Electrophysical characteristics and preparation of thin organic semiconductor film on radiothermally modified polyethylene 11 p1750 A66-22609

Electro-oxidation of organic materials capable of functioning as fuel in fuel cells 13 p2017 A66-25674

Adsorptive phenomena effect on reaction kinetics of electrochemical oxidation involving organic materials on platinum electrode 13 p2017 A66-25676

Spectral analysis of organic flames, noting band intensity variation of different radicals with air-fuel composition and influence of diluents 14 p2413 A66-27722

Biological macromolecule detection using thiocarbocyanine dye and observation of absorption spectra changes 15 p2441 A66-29962

Photomultiplier tube socket assembly with high gain and clean output signals for viewing organic scintillator light pulses 16 p2702 A66-30429

Dielectric properties and thermostability of glow-discharge thin organic polymer films for electronic application 16 p2783 A66-31429

Amino acid, peptides and spherules obtained from sparking in closed atmosphere of ammonia, methane, hydrogen and water 17 p2851 A66-32088

Indigenous organic matter on Moon by comparing Gilvarry and Sagan theories 17 p3005 A66-33006

High temperature behavior of organic materials for aircraft, noting elastomers and plasmomers [ICAS PAPER 66-33] 22 p3938 A66-40660

ORGANIC SILICON COMPOUND

Carbonaceous chondrite in stony meteorites, noting presence of organized elements and microfossils 02 p0289 A66-11604

Silicone copolymers lubricants containing both trifluoropropyl and halophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5]

02 p0237 A66-12233

Silicone copolymer lubricants containing both trifluoropropyl and halophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5]

12 p1889 A66-24990

ORGANISM**SA ANIMAL STUDY****SA MICROORGANISM**

Conditions under which gas bubbles arise in organs and physiological fluids of living organism during pressure drop 13 p2011 A66-26577

Mathematical representation for transport phenomena in living organism 13 p2011 A66-26578

Automatic device for reversible hypothermia in living organism, considering parameters of physiological functions, included in logic circuits 15 p2444 A66-29498

ORGANOMETALLIC COMPOUND**S CHELATE COMPOUND****ORQUEIL METEORITE**

Organic matter connected with biological activity in Orgueil meteorite, discussing optical rotation 01 p0134 A66-10249

Organized elements of Orgueil meteorite by quantitative fluorescence microscopy, correlating morphology with chemical composition 03 p0429 A66-13353

Orgueil carbonaceous meteorite microstructure studied by techniques of coal petrography and electron microscopy 14 p2385 A66-27931

Sulfur compounds analysis in lipid extracts from Orgueil meteorite support concept of low temperature environment on parent body and differ from petroleum 20 p3648 A66-37304

Absorption and scattering effects on measurements of optical rotation in polarimeters studied to account for optical activity in Orgueil meteorite 21 p3816 A66-39490

ORIENTATION**S INSTRUMENT ORIENTATION****S SATELLITE ORIENTATION****S SPACE ORIENTATION****S SPATIAL ORIENTATION****ORIFICE**

Orifice constant discharge coefficient when Reynolds number drops below 10,000 achieved in series or parallel flow 01 p0059 A66-10958

Nonsteady flow through square-edged orifice in pipe 07 p1026 A66-18283

Book on flow measurement through pipes by square-edge orifice plate using corner tapings, including pipe layout, fluid density, temperature, pressure, orifice design, tables, graphs, etc 08 p1221 A66-18679

Orifice effect on detonation wave propagation in tube, noting flame formation and detonation regeneration 10 p1523 A66-21792

Fluid flow impedance parameters and properties, discussing nonlinear orifice resistors in fluidic circuitry, tube resistance and fluid capacity 12 p1803 A66-24384

Effect of orifice dimensions and heat transfer to surface with orifice on pressures measured in low density gases 16 p2628 A66-30379

Turbulent swirling jets issuing from round orifice studied experimentally and theoretically, based on continuity equations and Reynolds equations of motion 17 p2913 A66-33067

Quadrant edge orifice meter performance under cavitating conditions, noting discharge coefficient curves [ASME PAPER 66-FE-9] 17 p2915 A66-33263

ORIGIN**S PLANETARY ORIGIN****ORION AIRCRAFT****S P-3 AIRCRAFT****ORION CONSTELLATION**

Cosmic ray anisotropy and gamma rays in Orion analyzed, using Geiger counter and Cerenkov telescope 15 p2579 A66-29525

Intrinsic rotation of Orion B stars with weak He lines, discussing color-magnitude diagram 23 p4130 A66-41815

Optical hydrogen-line profiles in Orion nebula compared to radio profile obtained from antenna response and weighting factors of brightness temperature 23 p4131 A66-41820

OROGRAPHY**SA MOUNTAIN****SA TOPOLOGY**

Analytical particular solution of vorticity equation, using kinematic boundary condition and wind field approximations 08 p1246 A66-18800

Dynamic influence of orography of atmospheric motion examined, using fluid mechanics analogy with periodicity at boundary condition 16 p2699 A66-31633

High altitude turbulence in presence of strong jet stream or under influence of orographic systems 22 p3942 A66-39733

ORTHICON**SA IMAGE ORTHICON TUBE**

Metal surface structure, semiconductor and dielectric films analyzed, using image orthicon technique for data on work function, electron reflection coefficient and electric resistance 05 p0621 A66-15577

ORTHOGONAL FUNCTION**SA KARHUNEN-LOEVE EXPANSION**

Quantitative description of elementary climatic field by orthogonal functions 03 p0389 A66-12933

Wiener theory for analysis and synthesis of nonlinear physical systems applied to non-Gaussian and Gaussian inputs 05 p0656 A66-14627

Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations 05 p0662 A66-14980

Nonlinear optimal filtration problem solved, using quasi-orthogonal representations of random functions 07 p1014 A66-17433

Zeros of general orthogonal polynomials at interpolation nodes and relation to Jacksonian properties 07 p1058 A66-17866

Bubnov-Galerkin method extended to solution of any system of equations not associated with variational principles 08 p1306 A66-18601

Second derivatives of Legendre and Laguerre polynomials based on Markov inequalities 08 p1244 A66-18793

Target scattering matrix generalized to include dependence upon radar polarization determining matrix through two successive transmissions at orthogonal polarizations 10 p1499 A66-21603

Linear system dynamics, discussing time function vector space, spectral coefficients, orthonormal and transfer functions, parameter variation, Fourier approximation, etc 11 p1679 A66-23269

Asymmetric nonuniformly spaced antenna array design by orthogonal function expansion of radiation pattern, using Schmidt orthogonal method 12 p1836 A66-24307

Static boundary value problem for shallow shells with multiply connected sections 13 p2202 A66-26414

Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations [ASME PAPER 65-WA/GTP-2] 16 p2684 A66-30344

Method of approximating functions with aid of orthonormal systems and single channel optimization, using analog computer 16 p2656 A66-30763

Core integral and electron repulsion integral for 2p-1 Slater-type orbitals of allyl radical and benzene molecule transformed to Lowdin orthogonalized basis set of atomic orbitals 16 p2754 A66-31185

Polynomials orthogonal with respect to contours, examining analytic function representation via Fourier series expansion of such polynomials 16 p2738 A66-31409

Solution of particular elementary boundary value problem using new set of orthogonal functions 16 p2739 A66-31726

K-orthogonality for inversion of state transition matrices 17 p2946 A66-32482

Orthogonal sets of rational functions on unit circle 18 p3128 A66-34700

Reduction of variance by least squares polynomial approximations, noting exact functional dependence of variance on degree of polynomial 19 p3388 A66-35832

Computer programs for generalized orthonormal optimization problems and variations such as multilayer optical filter design 19 p3308 A66-35869

Series expansion of inversion of n-dimensional Laplace transforms in terms of ultraspherical polynomials having coefficient computed recursively 19 p3392 A66-36784

Unified approach to synthesis of
orthonormal exponential functions with
elements whose asymptotic order may be
chosen arbitrarily and poles that may be
real, complex or both 20 p3522 A66-37665
Vector equations of steady inviscid
thermally nonconducting gas flows from
geometric theory of triply orthogonal spatial
curves 21 p3729 A66-39446
Optimum filtration of signals in presence
of arbitrary interference, using orthogonal
function series 23 p4037 A66-41514
Orthogonality condition for eigenvalue
problem of out-of-plane twist-bending
vibrations of elastic ring for various sets of
boundary conditions 23 p4139 A66-41693

ORTHOGONAL WAVEFORM

MULTIPLEXING
Non-orthogonal phase-modulated codes
generalized from first-order Reed-Muller
codes and biorthogonal
signals 21 p3721 A66-39641

ORTHOSTATIC TOLERANCE

Effects of water immersion, recumbency
and activity without negative breathing
pressures, measuring heart rate and blood
pressure with and without
tilting 11 p1642 A66-22573
Long-term lower body negative pressure in
supine position effect on deterioration in
cardiovascular function of man during
prolonged bed rest 15 p2430 A66-28657
Sympathetic nervous system integrity
following water immersion evaluated by
measuring plasma-free fatty acid responses
to passive tilting 16 p2639 A66-30649
Hypoxia and lower body negative pressure
effects on blood volume, and orthostatic and
physical tolerance after four weeks of
hypoxic bed rest 16 p2640 A66-31124
Lower body negative pressure effect on
blood volume and orthostatic tolerance
during prolonged bed
rest 17 p2858 A66-32178
Medical problems of
weightlessness 18 p3059 A66-34365
Heart rate response to Valsalva maneuver
performed regularly during space flight
suggests application to development of
astronaut orthostatic
tolerance 19 p3286 A66-36376
Tilt table orthostatic tolerance test, noting
heart rate change and mechanical systole
shortening 24 p4164 A66-42455

ORTHOTROPIC CYLINDER

Elastic general instability of orthotropically
stiffened cylinders under axial compression
[AIAA PAPER 66-139] 08 p1308 A66-19003
Variational solution of simultaneous
stability equations boundary value problem
for transverse displacements and stress
state 16 p2819 A66-31137
Residual stress determination in elastic
cylindrical orthotropic materials, using
stress-strain relations and Sachs
equations 22 p3994 A66-40434
Nonaxisymmetric temperature fields for
orthotropic hollow cylinder and sphere
solved using Bessel functions, noting heat
transfer between external and internal
surfaces 22 p4000 A66-40693

ORTHOTROPIC MATERIAL

Steady state problems in orthotropic slabs
subjected to forces and temperature
distribution on faces solved by Fourier
transform
[ASME PAPER 65-APMW-33] 04 p0593 A66-14233
Stress-strain state of axisymmetrically
heated orthotropic glass-fiber reinforced
spherical base with circular
hole 08 p1306 A66-18603
Strength of structural composites of
orthotropic materials with arbitrary
thickness and orientation including
lamination and anisotropy effects
[AIAA PAPER 65-75] 10 p1617 A66-21781
Steady state problems in orthotropic slabs
subjected to forces and temperature
distribution on faces, solved by Fourier
transform
[ASME PAPER 65-APMW-33] 12 p1960 A66-23973
Stability analysis of elastic axially
compressed orthotropic glass-fiber-
reinforced-plastic cylindrical shell with
linear heredity properties 15 p2611 A66-29341

ORTHOTROPIC PLATE

Strains and internal force in bending of
two coupled orthotropic plate strips of
different rigidity under effect of uniformly
distributed loads 01 p0152 A66-10406
Bending problem of circular orthotropic
plate on elastic base under axisymmetric
load 01 p0153 A66-10467
Stability equilibrium criteria for
orthotropic rectangular
Liapunov and other
theories 01 p0154 A66-10476
Transverse shear displacements for
orthotropic plate of constant thickness
determined by iterative
method 03 p0439 A66-13153
Bending of orthotropic plates and beams
supported by elastic layer under uniform
transverse load, noting effect of length-
width ratio change 10 p1615 A66-21410
Symmetric bending of circular orthotropic
plate of systematically variable thickness for
different types of loading 15 p2613 A66-29435
Approximate solution of free axisymmetric
oscillations of circular structurally
orthotropic plate of specific laws of variable
thickness 15 p2613 A66-29436
Bending equations of orthotropic three-
layer plates with rigid
filler 16 p2818 A66-31055
Boundary value problem of temperature
stresses of rectangular orthotropic plates
solved, using separation of variables
method 16 p2818 A66-31067
Fluid loading effect on acoustic radiation
from point-driven infinite orthotropic
plate 18 p3251 A66-33677
Free vibrations and stability of rectangular
orthotropic plates reinforced by network of
ribs 18 p3252 A66-33705
Multiply connected orthotropic plate of
variable thickness, discussing bending
stresses, load distribution, temperature
distribution and boundary
load 18 p3256 A66-34492
Flutter of rectangular orthotropic panel
supported by deflectional spring along two
edges in supersonic
airflow 18 p3257 A66-34590
Elasticity and thermal stress in infinite
orthotropic plate exposed to distributed and
concentrated heat source 21 p3830 A66-38985
Approximate solution of forced oscillation
PDEs of rectangular orthotropic plate on
elastic base with two
characteristics 23 p4139 A66-41557
Free and forced vibrations, static and
dynamic stability and air elasticity of
orthotropic shells and plates in time-
alternating temperature
field 23 p4142 A66-41955

ORTHOTROPIC SHELL

Computer analysis of axisymmetric free
vibrations of orthotropic shells of revolution
and elastic rings 05 p0781 A66-15790
Perturbation solutions of stress and
deformation problems for homogeneous
anisotropic shells constructed from
orthotropic material
[AIAA PAPER 66-141] 08 p1309 A66-19004
Complex forces method reduces stress-
strain determination of orthotropic shells to
determination of orthotropy
function 10 p1613 A66-21326
Generalized analysis of rotationally
symmetric thin elastic shells applied to
cases where shell wall consists of any
number of layers of isotropic or orthotropic
material 10 p1617 A66-21496
Free and forced vibrations, static and
dynamic stability and aeroelasticity of
orthotropic shells and plates in variable
temperature field 11 p1781 A66-22614
Linear creep stability of orthotropic shells,
considering shear creep and lateral buckling,
determining critical loads and noting
errors 13 p2113 A66-25913
Stress concentration at circular hole in
orthotropic cylindrical shell, using
coordinates system and Bubnov-Galerkin
method 13 p2206 A66-26455
Oscillations of cylindrical orthotropic
three-layer shell having ideal fluid flow at
variable rate, establishing parametric
resonance and determining limits of shell
motion instability regions 13 p2206 A66-26461
Orthotropic-elasticity solutions applied to

wave propagation in infinite cylindrical
shell, obtaining asymptotic solutions for HF
range 14 p2400 A66-27662
Deformation of shallow orthotropic shells
of rectangular planform 15 p2613 A66-29438
Linearized theoretical motion equations for
orthotropic cylindrical sandwich shells under
initial stress, considering free
vibrations 16 p2822 A66-31490
Linearized theory of free-vibratory motion
of cylindrical sandwich shells under state of
initial stress 17 p3025 A66-32455
Natural frequencies and modes for
axisymmetric vibration of orthotropic
shells 18 p3258 A66-34605
Stressed state near round opening in
orthotropic cylindrical shell solved for
various loading and boundary conditions by
Bubnov-Galerkin variational
method 22 p3990 A66-40145
Inelastic buckling of rib-cored orthotropic
sandwich cylinders under external
hydrostatic pressure evaluated by
deformation theory of
plasticity 24 p4285 A66-42147

OSCILLATING CYLINDER

Space-time correlation function of response
of finite cylindrical shell to purely random
pressure field and to subsonic boundary
layer pressure
fluctuations 01 p0147 A66-10131
Oscillating coaxial cylinder viscometer to
determine rheological properties of
viscoelastic materials, using Bessel function
approximations 05 p0678 A66-14969
Cylinders in reciprocating harmonic
rotation, calculating momentum, heat and
mass transfer in forced convective field via
perturbation technique
[ASME PAPER 65-WA/HT-6] 05 p0791 A66-15654

Resistance due to viscous shear on circular
cylinder in oscillating stream calculated by
boundary layer equations formulated in
polar coordinates 09 p1367 A66-20262
Small axisymmetric oscillations of fluid
inside elastic cylindrical shell with elastic
bottom determined by reducing problem to
internal Neumann problem for circular
cylinder 09 p1368 A66-20756
Angular velocity effect on radial
hydromagnetic oscillations of rotating
plasma cylinder 10 p1566 A66-21732
Tangency condition and pressure
coefficient of supersonic flow past
oscillating bodies of
revolution 10 p1481 A66-21795
Oscillation of viscoelastic liquid between
stationary outer coaxial cylinder and
vibrating inner coaxial
cylinder 11 p1688 A66-22440
Mathematical and numerical determinations
of aerodynamic forces on harmonically
oscillating cylindrical shell under subsonic
and supersonic speeds and comparison with
slender body theory
results 14 p2218 A66-27405
Small oscillations produced by combined
action of stationary and harmonic forces in
nonlinearly elastic cylindrical shell of
rectangular planform 15 p2607 A66-28769
Linearized unsteady supersonic potential
flow theory formulation of boundary value
problem of aerodynamic forces on oscillating
cylinder and comparison with two-
dimensional quasi-steady and slender body
approximations 16 p2628 A66-30259
Natural oscillations of three-layer circular
cylindrical shells with freely supported and
clamped edges 16 p2818 A66-31056
Linearized unsteady nonequilibrium flows
produced by unsteady motion of thin foil or
circular cylindrical shell in incompressible
gas 16 p2687 A66-31288

OSCILLATING FLOW

Oscillation modes on oscillators in locally
concentrated magnetic field determined by
simultaneous study of predominant and
helical modes 01 p0116 A66-11195
Forced discontinuous oscillations of fluid
in pipeline, discussing energy dissipation
effects in LF range 04 p0509 A66-13556
Presence of suspended particles leads to
more rapid attenuation of pulsations in final
stage of degeneration of isotropic
turbulence 04 p0512 A66-14436
Cycle of solar activity interpreted via
mechanism of oscillatory instability with

period of order of ten years 05 p0748 A66-14869

Oscillating disk induced flow, discussing mathematical formulation of flow field produced by finite-amplitude rotational oscillations 06 p0872 A66-16354

Unsteady oscillations of boundary layer interaction with shock waves in lower transonic region 07 p1022 A66-18106

Damping of liquid oscillations in cylindrical tanks, determining rigid and flexible baffle loss coefficients, baffle efficiency and maximum bending stress [AIAA PAPER 66-97] 08 p1207 A66-19000

Free convection heat transfer to carbon dioxide near critical point, noting free, turbulent and oscillating flow 10 p1619 A66-21271

Oscillating viscous flows past cylinder and torsionally vibrating disk 11 p1687 A66-22438

Airfoil cascade oscillation in near-sonic gas flow 12 p1798 A66-24432

Critical Reynolds numbers for oscillating fluid in tube in region of laminar-turbulent transition 12 p1864 A66-24448

Three-dimensional periodic oscillations in jet at high Reynolds number 14 p2273 A66-26929

Aerodynamic forces acting on harmonically oscillating thin profile in stalled plane parallel flow of ideal incompressible fluid 14 p2220 A66-27695

Oscillating laminar separated flow formed ahead of forward facing step oscillating transversely to hypersonic free stream, noting phase differences between separation point movement and that of step 14 p2221 A66-28110

Double unsteady laminar boundary layers on solid bodies in presence of oscillating external flow of small amplitude 15 p2480 A66-29686

Laminar boundary layer in oscillatory flow along infinite flat plate with variable suction 16 p2686 A66-31107

Natural modes and eigenfunctions of low amplitude oscillation determined by Ritz averaging method for ideal fluid with equilibrium surface in weak force field 16 p2687 A66-31297

Vibrational and rotational nonequilibrium flow effects in hypersonic conical nozzle expansion of nitrogen flows and airflows 17 p2842 A66-33478

Separated shock wave distance from free flying blunt body influence by real gas oscillation excitation 19 p3341 A66-35746

Nonsteady helical flow of viscoelastic liquid contained in circular cylinder, noting occurrence of oscillations in fluid decaying exponentially with time 21 p3723 A66-38588

Velocity distribution of fluctuating axisymmetric flow of incompressible second-order fluid near stagnation point 21 p3728 A66-39346

Velocity profile, induced magnetic field, shear stresses and skin friction on plates for viscoelastic liquid flow between nonconducting oscillating infinite flat plates in uniform TM field 21 p3794 A66-39575

Wind tunnel simulation of transient state of takeoff and landing of V/STOL aircraft, noting application of electric circuit analogy to measure flow dynamic response to control valve movement 23 p4053 A66-41388

Oscillating two-phase flow through rigid circular pipe investigated to understand blood cells effects on changes in shape of pressure pulse wave 23 p4058 A66-41916

Viscous electrically conducting liquid oscillating in laminar regime between parallel planes when applying magnetic field normal to planes and motion direction 23 p4108 A66-42047

OSCILLATING WING

Oscillating thin airfoil theory, using Oseen method for classical potential solution of flow about thin airfoil 04 p0456 A66-14476

Undulating propeller, combination of flapping and fixed wing, as propulsion system for water, land and air vehicles 07 p0987 A66-17484

Airflow interference theory applied to streamlined wings and bodies undergoing simple harmonic oscillations 07 p0981 A66-18102

Air disturbances due to small transverse vibrations of finite span thin wing with

variable velocity 07 p0981 A66-18111

Pressure distribution on oscillating two-dimensional symmetric airfoil in incompressible flow, examining trailing edge angle influence 07 p0982 A66-18133

Mixed boundary value problem for velocity potential of unsteady perturbation flow past oscillating thin profile in inviscid compressible gas at subsonic speeds 08 p1205 A66-18674

Modified strip analysis method for predicting finite-span, swept or unswept wing flutter at subsonic to hypersonic speeds 09 p1328 A66-20738

Unsteady airfoil functions evaluated approximately 10 p1479 A66-21345

Theoretical determination of buffeting limits of wings, using boundary layer theory, obtaining Reynolds number effect on location of buffeting limits 10 p1479 A66-21377

Aerodynamic forces of oscillating lifting surfaces of large aspect ratio in subsonic range investigated by approximation method 10 p1479 A66-21378

Integral equation for slender wing oscillating in subsonic flow near solid wall 13 p2087 A66-26538

Frequency equations from plane cross sections law and exact linearized theory solved for oscillating rigid band in supersonic flow 16 p2823 A66-31631

Response of two-dimensional laminar boundary layer to fluctuating free stream or surface oscillation 17 p2908 A66-32443

Bending-torsional flutter of uniform swept wing with velocity component aerodynamic-strip theory [AIAA PAPER 66-475] 17 p3028 A66-32767

Aerodynamic pressure on deformable, oscillating and rigid wing surfaces in subsonic flow 18 p3049 A66-34733

Approximation theory for calculating linearized subsonic and supersonic flow over pulsating bodies with low aspect ratio, noting structure of flow field 19 p3277 A66-36641

Matrix methods of forces and displacements applied to free oscillations of aircraft structures, proposing procedure yielding coherent mass matrix 21 p3825 A66-38582

Subsonic aerodynamic loading on harmonically oscillating nonplanar lifting surfaces in kernel-function formulation 21 p3694 A66-38733

Oscillating airfoils in incompressible flow in Possio equation, with solutions obtained in closed form 21 p3832 A66-39378

Dither and sinusoidal incidence variations effect on control wing hinge moments of transonic-supersonic rolling maneuvering guided missile [ATAA PAPER 66-755] 22 p3846 A66-40639

Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 01 p0043 A66-10764

Confining annular regions for solution trajectory of relaxation oscillations described by generalized Lienard equation 02 p0261 A66-12151

Existence of stable periodic solution of Lienard equation, using asymptotic methods 03 p0392 A66-12617

Oscillation parameters and effects of nonlinear coupling on solid body with built-in rotating rotor 04 p0587 A66-13557

Book on asymptotic expansions in powers of small parameter applied to nonsteady oscillations in nonlinear systems with one or more degrees of freedom 05 p0776 A66-15320

Oscillatory motion of pendulum-gyroscope system near given position of relative stability 07 p1035 A66-18192

Stability analysis of multiple controls matrix analysis, symmetry and general oscillation equation 08 p1246 A66-19832

Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 09 p1429 A66-20768

Parasitic oscillations in E-type oscillators and action of HF space-charge fields 09 p1358 A66-20794

Variations of turbulent plasma electric conductivity with input oscillation intensity and with square of RF input voltage 09 p1409 A66-20855

Asymptotic behavior, at plus infinity, of first order linear differential-difference delay equation solutions, discussing asymptotic oscillatory number 10 p1549 A66-21224

Singular perturbation problems with infinite domain treated by perturbation method 10 p1550 A66-21304

Comparing modified method of averaging and two-variable expansion procedure in nonlinear oscillations of autonomous system 10 p1555 A66-21344

Oscillation stability criteria for simple surge tank obtained from second method of Liapunov 10 p1523 A66-21497

Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 11 p1661 A66-22275

Steady state oscillations in hunting system, using nonlinear amplifier and artificial delay line 11 p1681 A66-23415

Liapunov second method applied to interconnected differential systems 11 p1682 A66-23456

Monograph on microwave frequency space-charge waves in electron beams including electron-wave oscillators, resonators and magnetrons 12 p1813 A66-23740

Integrals of equations of small axisymmetrical oscillations of thin elastic shell of revolution 12 p1966 A66-24061

Second order approximation and perturbation theory applied to determine effect of instantaneous pulse on oscillation amplitude 13 p2127 A66-25451

Nonlinear differential equations in theory of electrical oscillation 13 p2118 A66-25826

Oscillation index in qualitative assessment of equilibrium converging processes in nonlinear systems 13 p2056 A66-26479

Text on dynamics of vibrations covering oscillations with variable and constant amplitude, damping, differential equations of motion, nonlinear oscillations, wave propagation in elastic solids, etc 13 p2207 A66-26573

Graphical determination of phase trajectories and oscillation limits of nonlinear sampled system 13 p2056 A66-26755

Gunn effect involving current oscillations higher than 1000 mc in GaAs crystal under applied electric field 14 p2355 A66-26920

Monograph on lasers including gas lasers, ruby lasers, giant-pulse techniques, oscillation modes, etc 14 p2305 A66-26961

Resonance oscillations and rotations in pendulum with vibrating suspension point analyzed, using averaging method to determine stability conditions for steady state operation 14 p2290 A66-27164

Thermal emf quantum oscillation and quantization of electron energy spectrum of n-InAs 14 p2361 A66-27303

Axially symmetric oscillations of elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness 14 p2400 A66-27682

Oscillation amplitude of rotor with hydraulic dampers on elastic supports 14 p2374 A66-27689

Fermi surface of metals and semimetals and quantum oscillations in ultrasonic attenuation and magnetic susceptibility of InBi 14 p2366 A66-27763

Breakdown of biennial oscillation of ozone

- and of lower stratospheric temperature of Southern Hemisphere and relation to sunspot cycle 14 p2286 A66-27904
- Motion equations for radial oscillation of shaft with ball bearing chatter 14 p2305 A66-28478

- Response of plasma in magnetic field to electric field oscillating with frequencies higher than collision frequency 06 p0915 A66-16179
- Nonsymmetric self-oscillations in relay system, discussing sliding mode of operation of controller with feedback loop 06 p0863 A66-16529
- Current oscillations in nonuniformly illuminated cadmium sulfide, examining effects of variation in parameters 06 p0925 A66-16664
- Phase comparison of outputs from variable frequency oscillator and crystal oscillator 06 p0853 A66-16674
- Current instabilities in gallium arsenide, noting oscillation frequency and volt-ampere characteristics 06 p0925 A66-16688
- Oscillations in two-circuit parametric oscillator operating on fixed-bias p-n junction 06 p0860 A66-17194
- High sensitivity method for measuring small phase modulations according to line width of Lissajous figures 07 p1005 A66-17346
- Short-pulse shaping of high repetition rate with transistorized blocking oscillator 07 p1001 A66-17355
- Approximation method of calculating axisymmetric oscillations of shells of revolution filled with liquid 08 p1308 A66-18891
- Higher order calculation of laser output, noting approximation method for linewidth parameter and Lamb dip shape accuracy 08 p1233 A66-19063
- Plasma formation during unstable electron beam passage through air, argon and hydrogen in magnetic field, determining plasma density, oscillation frequency and amplitude 08 p1263 A66-19176
- Time dependent frequency spectra variations of plasma oscillations induced by electron beams during instability onset 08 p1263 A66-19177
- Period of oscillation of multivibrator triggering device is nonmonotonic function of grid bias 09 p1357 A66-20783
- Spectral composition of oscillations produced by keying oscillator 09 p1357 A66-20786
- Temperature oscillations in molten metals and relation to growth striae in melt-grown crystals 10 p1572 A66-21167
- Spontaneous LF oscillations in alkali plasma when applying DC voltage 10 p1559 A66-21196
- Kadomtsev instability characteristics in terms of onset and spectra of strong oscillations in positive column discharge [AIAA PAPER 66-157] 10 p1565 A66-21685
- Microwave oscillations in epitaxial layers of gallium arsenide 10 p1585 A66-22080
- Current oscillations and microwave emission in indium antimonide subjected to high applied parallel electric and magnetic fields at 77 degrees K 10 p1585 A66-22082
- Effect of electric field on LF oscillations of nonhomogeneous plasma contained by magnetic field, using geometrical optics approximation 11 p1744 A66-22449
- Effect of cold plasma admixture on LF oscillation spectrum and stability of nonhomogeneous hot plasma contained by magnetic field 11 p1744 A66-22450
- P-n transitions in gallium arsenide investigated as factor in performance of such diodes as converters of ultrasonic into electrical oscillations 11 p1664 A66-22608
- Linearized one-dimensional Krook equation solved for half-space of gas bounded by oscillating wall 11 p1736 A66-22902
- Steady state sound disturbances induced in monatomic gas by oscillating plane boundary 11 p1737 A66-22904
- Microwave generation with conventional transistors in avalanche mode, describing circuit, mounting construction and avalanche oscillator frequency 12 p1830 A66-23757
- Book on strength and dynamics of aircraft engines including deformation of shells of revolution, oscillation frequencies of various shells, turbine rotor dynamics, etc 12 p1963 A66-24042
- Natural oscillation frequency of smooth cylindrical shells representing combustion chambers, diffusors, etc, analyzing effect of static loads 12 p1964 A66-24045
- Rarefying of dense frequency spectrum of shell-shaped elements of aircraft engines by corrugating shell surface, determining natural oscillation modes and frequencies 12 p1964 A66-24046
- Approximate determination of flexural vibrations of shells of revolution with vibrations involving appearance of nodal lines along generatrix and meridional directions 12 p1964 A66-24047
- Longitudinal oscillation frequency of rod with one end fixed and other end carrying rigid load 12 p1966 A66-24065
- Frequency fluctuations in frequency standards, analyzing noise and finite observation time effects and atomic standard characteristics, using servocontrolled oscillator 12 p1881 A66-24123
- Cavitating and noncavitating flows past plano-convex hydrofoil, noting oscillation frequency dependence on attack angle, tunnel velocity and cavitation number [ASME PAPER 65-FE-3] 12 p1865 A66-24557
- Spatially independent laser rate equation generalized for multimode effects, noting

steady state oscillation threshold singularities, spiking parameters, etc 12 p1891 A66-24560

Steady state structure and LF modes of infinitely long finite thickness cylindrical sheet of relativistic electrons in applied external field 12 p1873 A66-24576

Relative drift between ions in adjacent layers exciting Kelvin-Helmholtz instability analyzed in thermally ionized cesium plasma, noting range of frequency oscillations 12 p1923 A66-24577

Transistor base resistance measured, using input method where equivalent circuit is determined through simultaneous application of three separate frequencies to bridge 12 p1845 A66-24853

Effect of heterophase fluctuations at high and low frequencies near first order phase-transition point on elastic oscillation propagation, noting role of acoustic wave 12 p1972 A66-25020

Optical resonator diffraction loss, noting laser oscillations in high loss arrangements, output beam power, field patterns, etc 13 p2090 A66-25195

Complex deviation dependence on amplitude and frequency stabilization in bridge oscillators 13 p2030 A66-25214

Recording assembly for measurement of flexural and torsional moduli and internal friction at various frequencies and temperatures of small samples, using constant amplitude undamped oscillations 13 p2077 A66-25324

Detection and analysis of oscillations excited in electron beam and plasma as result of interaction, noting frequency spectrum, phase velocities, etc 13 p2146 A66-25745

Phase stability of system of particles in cyclic accelerator with automatic frequency correction of accelerating field, noting kinetic equation method 13 p2147 A66-25748

Residual difference between oscillator frequencies used to investigate noise immunity of phase automatic frequency control 14 p2236 A66-27245

Microwave oscillations in 4 to 31 gc/s frequency range from single Gunn diode 14 p2254 A66-27590

Spectral features of stable generation of oscillation in delayed-feedback microwave oscillator consisting of TW amplifier and waveguide delay line 14 p2267 A66-27738

Short-lived oscillation in light emitted in active aurora 14 p2286 A66-27985

RF harmonic oscillator design, using characteristic equations for natural oscillation frequency expressions, analyzing changing load effects, changing passive parameters, etc 14 p2262 A66-28380

Flare initiated filament oscillations, noting photographic measurement of oscillation frequencies 15 p2573 A66-28646

Tunnel diode coupling to Q resonator of hybrid type, ensuring wide tuning range and oscillation frequency insensitive to temperature change, supply voltage variations, etc 15 p2466 A66-29676

Oscillatory phenomenon in gaseous multicomponent diffusion, noting convection caused by density inversion 15 p2481 A66-29745

Transverse and axial magnetic field effects on gas lasers, deriving expression for atomic and macroscopic polarization, determining oscillation mode characteristics, frequency responses, etc 15 p2518 A66-29813

Diatomic gas flow past blunt bodies, noting effect of oscillation and dissociation relaxation on mean energy 16 p2627 A66-30100

Plasma electron density and formation determined, using Fabry-Perot resonator 16 p2756 A66-30104

Collective oscillations of atoms in Hartree-Fock approximation 16 p2751 A66-30191

Resonance phenomena in oscillator acted upon by sinusoidal external force with slowly varying frequency and amplitude 16 p2747 A66-30740

Sinusoidal UHF tunnel diode oscillator, showing selection of particular oscillation mode by power matching load to oscillator 16 p2662 A66-30959

Parametric resonance in plasma situated in magnetic field, noting oscillation, frequency

stability, kinetic equations, electric field effect, etc 16 p2762 A66-31170

Spatial periodic modulation of high field domain in cadmium sulfide 17 p2974 A66-31813

Spectral analysis of HF oscillations with phase-modulated fluctuations as functions of phase dispersion and spectral form of modulating fluctuations 17 p2898 A66-31854

Axisymmetric oscillations of spherical shell 17 p3026 A66-32602

Natural oscillation frequency of gyro mounted in torsional suspension, taking into account moments of inertia of sensitive element 17 p2926 A66-32799

Noise characteristics of solid state, X-band microwave sources, using VHF crystal oscillator, amplifier and varactor multiplier 17 p2893 A66-32924

Vibration of entire multifrequency system reduced to single frequency resonance when frequency passes through zero, illustrated with solar system 17 p2959 A66-32934

Continuous wave oscillations in n-type GaAs due to voltage controlled negative conductance 17 p2983 A66-33107

Detection and causes of fretting corrosion, discussing prevention via lubrication, effects of load, surface finish, material hardness, friction coefficient, vibration, etc 18 p3117 A66-34400

Fluid dynamic characteristics of propellant pumps in presence of oscillatory cavitation, noting performance of J-2 rocket engine system [AIAA PAPER 66-559] 18 p3246 A66-34428

Large amplitude oscillations with frequencies corresponding to ion transit times in thermal cesium plasma diodes with parallel plane construction 19 p3313 A66-35425

Oscillations in two-circuit parametric oscillation operating on fixed-bias p-n junction 19 p3315 A66-35552

Configuration interaction in helium continuum between first and second quantum thresholds 19 p3402 A66-35994

Winking filaments, prominence and coronal magnetic fields 19 p3463 A66-36171

Electron beam interaction with plasma in mirror magnetic fields and heating of plasma components under beam instability, noting oscillation spectrum and thermal energy 19 p3430 A66-36586

Upper oscillation frequency limit for Gunn oscillator imposed by finite energy-relaxation time of heated carriers 20 p3527 A66-37449

Field and charge density distributions in semiconductor with hot electrons, showing domain movement type oscillations due to stationary wave propagation 20 p3617 A66-37555

Nonlinear interaction of oscillations of two types in laser does not effect stationary operation when oscillations are sufficiently apart in band 20 p3579 A66-37661

Stationarity conditions for FM oscillations with noise-modulated frequency 20 p3519 A66-38003

Small oscillation analysis of superconductors in intermediate phase for larger-than-layer width wavelengths 20 p3624 A66-38426

Small oscillation analysis of superconductors in intermediate phase for larger-than-layer width wavelengths 21 p3800 A66-38959

Mode separation in bifilar-helix backward-wave oscillator 21 p3712 A66-39228

Lateral vibration of rotating bar with circular cross section under simultaneous axial force and torque, noting eigenvalue equations and damping effects 21 p3833 A66-39598

Energy loss of charged particles during passage through weakly turbulent plasma in magnetic field with HF oscillations 22 p3952 A66-39751

Generation of oscillations in circuit which has long diode with base containing impurity atoms producing deep energy levels in forbidden zone 22 p3961 A66-39827

Period of oscillation of multivibrator triggering device is nonmonotonic function of grid bias 22 p3874 A66-39842

Spectral composition of oscillations produced by keying

oscillator 22 p3874 A66-39845

Dynamic characteristics of rotary wing decelerator and recovery system obtained, using frequency oscillation technique [AIAA PAPER 66-733] 22 p3893 A66-40624

Steady pearl type oscillations in terrestrial electromagnetic field, noting role of diurnal and seasonal variations 22 p3915 A66-40784

Domain and circuit properties effect on oscillations in GaAs 22 p3967 A66-40865

Continuous current oscillation in GaAs caused by acoustoelectric effect 23 p4112 A66-41296

Frequency tuning of coherent emission over vibronic continuum of phonon-terminated optical masers by thermal tuning and wavelength-selective feedback 23 p4077 A66-41369

Lithium transformation by plastic deformation from bcc to fcc lattice analyzed by measuring damping of free torsional oscillations of samples, noting role of internal friction 23 p4113 A66-41387

Hypersonic small disturbance theory of unsteady inviscid flow past thin wedge oscillating in pitch motion and effects of wave reflections 23 p4012 A66-41925

Zeeman laser interferometer, using axial magnetic field to obtain simultaneous left and right-hand circularly polarized oscillation modes at upper and lower cavity resonances 24 p4219 A66-42248

LF oscillation modes in TOPSY thermally generated cesium plasma devices investigated as function of plasma parameters 24 p4240 A66-42299

Molecular oscillation difference frequency generation in IR spectrum by beating together laser and laser-stimulated Raman emission 24 p4221 A66-42544

Radiation interaction between laser oscillators with different active materials and frequencies 24 p4221 A66-42549

Scattering matrix analysis of single frequency Michelson type He-Ne gas laser, including frequency and amplitude stability analysis of oscillation spectrum 24 p4223 A66-42566

Tunnel diodes operating above resistive cut-off frequency and mounted in tapered waveguide, noting oscillating frequency 24 p4182 A66-42619

Beating of oscillating frequencies corresponding to two directions of travel of annular cavity laser with active gas medium in movement 24 p4225 A66-43007

Redesigning UHF triodes compatible with solid state devices 01 p0044 A66-10930

Oscillator circuits with several series-connected tunnel diodes to increase voltage amplitude and full utilization of power of bias batteries 02 p0196 A66-11412

Above resistive cut-off frequency operation of tunnel diode in microwave oscillator for series and parallel circuits 02 p0199 A66-11874

Nonlinear differential equations describing RC oscillator determining frequency, stable amplitude and transient response 03 p0345 A66-13238

Five-channel FM/FM telemetry encoder using molecular electronics, noting oscillators, delay lines and linear amplification functional blocks 04 p0493 A66-13601

Frequency stabilization for narrow band microwave oscillators, using supplementary resonator connected by transmission line with basic resonator of oscillator 04 p0496 A66-13904

Serrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 04 p0499 A66-14052

Influence of anisotropic stress effect on output voltage and frequency of Colpitts

- oscillator with mesa NPN transistor 04 p0501 A66-14208
- Phase modulated standard signal and additive noise effect on nonlinear phased locked oscillator 04 p0488 A66-14401
- Lower bounds for energy levels of anharmonic oscillators 06 p0911 A66-16167
- Extension into microwave region of pulse-driven oscillators produced by biasing common diffused p-n junctions into avalanche breakdown region 06 p0851 A66-16451
- Performance of tunnel diode self-excited oscillator in various operating regimes 06 p0852 A66-16513
- Gallium arsenide tunnel diode oscillator tuned with 5-10 GHz YIG 06 p0853 A66-16648
- Phase comparison of outputs from variable frequency oscillator and crystal oscillator 06 p0853 A66-16674
- Transistor RC oscillator with single-element tuning, using two push-pull driven half-lattice phase shifters 07 p1004 A66-17216
- Oscillators in local cylindrically symmetric and uniform magnetic fields 07 p1104 A66-18222
- Perturbations in amplitude and period of oscillators derived by simultaneous application of variation-of-constants and successive approximation methods 07 p1145 A66-18241
- Tunnel diode voltage-controlled oscillator to expand FM system channel capacity 07 p1010 A66-18246
- Crystal oscillator described, using quartz as series resonant element with integrated solid state circuit 07 p1010 A66-18250
- Intensity fluctuations in output of four-level CW laser oscillators by linearized rate equations 07 p1047 A66-18434
- Solid state voltage-controlled subcarrier oscillator for satellite and spacecraft low-power telemetry systems 08 p1196 A66-19519
- Oscillator design procedure incorporating circuit and equivalent AC model and transfer functions of feedback and amplifier networks 08 p1197 A66-19560
- Analysis of uncontrolled, synchronized self-excited oscillator 09 p1352 A66-20351
- Determination of length of deductive circuits of recycling memories and oscillators 09 p1352 A66-20357
- Frequency stabilization method for reflex klystrons and other self-excited microwave oscillators 09 p1357 A66-20780
- Transistorized LR oscillator design using piecewise linear approximation in oscillation theory 09 p1357 A66-20784
